The Kotoko (whose number was estimated at 50,000 in 1950) are a minority in their own territory. They are outnumbered by the Shuwa Arabs, who penetrated into these lands since the 18th century. Smaller groups of Kanuri, Fulbe and Hausa moved in later. Each of these ethnic groups, however, lives separately in homogeneous villages. The Kotoko live on fishing and hunting, supplemented by agriculture. The grassland between the rivers is left for the Arab pastoralists.

The etymological origin of the name Kotoko is obscure. Some authors referred to them as Makari, which is in fact the name of a northern group of Kotoko, first known to visitors coming from Bornu. Makari is the most important dialect among the northern Kotoko, as Lagwane (often spelled Logone) dialect is in the south. The linguistic diversity of the Kotoko reflects their political division, as the extent of each dialect is almost identical with the area of one principality. The particularism of each group is so strong that even under modern conditions no one dialect prevails, and almost all the Kotoko now speak the Arabic dialect of the Shuwa. The Kotoko dialects belong to the central sub-group of the Chadian languages. They are distantly related to Hausa, which is classified in the western sub-group of the Chadian languages (J. H. Greenberg, *Studies in African linguistic classification*, New Haven 1955, 43-62).

The Kotoko are considered direct descendants of the Sao or So people, to whom the historical traditions of Kanem [*q.v.*] and Bornu [*q.v.*] refer as the early inhabitants of the area around Lake Chad. Those Sao who had not been assimilated or exterminated by the Kanembus and the Kanuris sought refuge in the less accessible flooding area of the Shari and Logone rivers, where they gave rise to the Kotoko. In the second half of the 16th century, Bornu under Idrīs Alūma expanded to the south. The northern Kotoko principalities, Makari and Afade, were brought within the political ambit of Bornu and under the cultural and Islamic influence of the Kanuri. Because of the imperial and dynastic connections with Bornu, islamisation among the Kotoko began chiefly in the courts. The southern Kotoko had been for a long period subject to the harassment of Bagirmi [*q.v.*]. Towards the end of the 18th century, the south was consolidated under the authority of the ruler of Logone-Birni, who was converted to Islam at about that period. Logone was visited by Major Denham in 1824 and by H. Barth in 1852. In between these two dates, probably *ca.* 1830, Logone became a tributary of Bornu. The Kotoko often saw their territory invaded by their more powerful neighbours. It was the battleground for Bornu's wars with its rivals Waday [*q.v.*] and Bagirmi. Between 1893 and 1900 it was overrun by Rābih [*q.v.*] and his warriors.

The authority of the Kotoko chiefs was circumscribed by a council of high officials and by Bornu's representative, the *alifa* (from Ar. *khalīfa*). The chiefs were also bound by pre-Islamic taboos and by the obligation to consult "the protecting animals" through their priests. The Kotoko chiefs, referred by the colonial administration as *sulṭāns*, are Muslims but they must respect old traditions. Muslim *imāms* live in their courts with traditional priests. Mosques were built near traditional shrines, whereas pre-Islamic customs and rituals are performed during Muslim festivals. Most of the Kotoko are now considered Muslims, and the number of those more fully committed to Islam grows steadily. Thousands of Kotoko are to be found in the towns of Chad and in the Sudan along the routes to Mecca. The Kotoko, who had emerged as people in refuge, away from the Muslim states of the Central Sudan, are gradually becoming integrated into the world of Islam.

(N. Levtzion)

KOTONOU or Cotonou, capital of the People's Republic of Benin (formerly Dahomey). It had long been the economic capital and rival of the administrative one Porto Novo, and since independence Cotonou has established itself definitively as the capital of the republic, even if certain services still remain at Porto Novo.

The village founded by the Aïzo of Allada was called Donukpa ("near the hole", i.e. "near the lagoon"). An envoy from Abomey was struck by the reddish colour of the trees growing along this lagoon and thought that this was the result of blood. It was then believed by the Fon of Abomey that the spirits of the dead came down to Ouémé towards the lagoon and the sea; each dead person crossing the lagoon left behind a little blood which reddened the tree bark, whence the name of Ku Tonu (*ku* "dead person", *tonu* "lagoon") given to the village. However, the passage of armies from Dahomey in the 18th century led to the evacuation of this latter village. It was Yekpé Zinsou, a slave dealer, who found this spot favourable for loading up slaves away from the eyes of European control shipping, and with the help of a half-breed Portuguese interpreter Sangronio he founded this Fon village. Once he had become Jévogan of the king of Dahomey (i.e. the minister charged with relations with the white men), Yekpé settled there with his family. The place became prosperous through the trade in palm oil and through anchorage rights (payable in cowrie shells and in goods) which the Europeans had to pay. A Brazilian half-breed, Domingo Martins, settled now at Cotonou and developed the cultivation and trade in palm oil. It developed further during Glélé's reign and at the time of the French appearance there (treaties of 1868 and 1878). But Béhanzin refused France any rights over Cotonou, and two attacks on the 23 February and 4 March 1878 were repelled by the French garrison. A wharf was built between 1891 and 1899, bringing about a growth in trade, and the town's importance grew. In 1905 the population comprised 75 Europeans (including seven women and a child) and 1,100 Africans. It became a *commune mixte* in 1912 and grew especially in importance after 1928.

In the 1920s it had 8,500 inhabitants, including 300 Muslims, who were distributed in the following manner. There were 100 or so Senegalese who had come as infantrymen, officials and above all as railway workers; 100 or so Hausa from northern Nigeria, functioning as butchers or as traders in cloth and beasts; and 100 or so Nago (Yoruba), mainly coming originally from Porto Novo and working in the trading houses.

The first *imām* of Cotonou was Moussé Col Popo of Agoue, born in *ca.* 1845 and initiated into the Ḳādirī order by Seidou Collou of Nigeria. Being worn-out and hardly capable of delivering the sermon or *khuṭba* in Arabic, he was replaced in October 1920 by Soaïtou Mamadou, born at Lagos in *ca.* 1870 and living in Cotonou since the French occupation. Since he had received the Ḳādirī *wird* from Shaykh Ismailia of Zaria, it seems that he was an adherent of the mystical path of the Fulbe of Sokoto. After having given the *khuṭba* in literary Arabic, he himself translated into Hausa this sermon; then his *hailé* or deputy translated it into Nago. After these two Yoruba *imāms*, there followed a Sarakolé, al-Ḥādjdj Sakaba, born at Bakel in 1875, an educated and likeable trader who had made the Pilgrimage to Mecca in 1906 via Lagos, Las Palmas and Marseilles. He had connections with the Arab bookseller of Algiers, Kaddow Roudouci (Ḳaddūz Rudusī). He was succeeded by a Hausa, Malam Bako, but after the latter's death there was a division between the two main Muslim communities, the Yoruba and the Hausa, with the latter reproaching the Yoruba for retaining animistic practices, of drinking alcohol, of having more than four wives and of not fasting at the same time as other people. On 31 August 1966 the Muslim Union of Dahomey was formed, bringing about the pre-eminence of the Muslim community of Porto Novo; the President of the Union was in fact al-Ḥādjdj ʿAlī Paraiso. If the meetings of the Muslim community of Benin take place at Cotonou, it is nevertheless the Islamic north and Porto Novo who have benefited from these arrangements and from aid coming from the Arab world's communities.

KŌTWĀL (Persian orthography, *k.w.twāl*), commander of a fortress, town, etc. The word is used throughout mediaeval times in the Iranian, Central Asian and Muslim Indian worlds, and has spread westwards into the regions of ʿIrāḳ and the Persian Gulf, where we find it, for instance, as a component of place names like Kūt al-ʿAmāra [*q.v.*], and given an Arabic-pattern diminutive form in al-Kuwayt [*q.v.*].

Although the word appears from the Mongol period onwards in Turkish, including Čaghatay, in such versions as *ketaul*, *kütäül*, etc., so that many native authorities (and following them, western linguists and lexicographers such as A. Vámbery, Pavet de Courteille and W. Radloff) assumed that it was a Turkish or even a Mongol word, G. Doerfer is undoubtedly right in tracing it back to an Indian origin, from *kōt* "fortress", whence *kōtwālā* "castellan, keeper of a stronghold", and frequent north Indian place names like Nagarkōt, Lohkōt, etc. The earliest attestations of the word in Islamic sources are all in an Indo-Muslim context, e.g. Maḥmūd of Ghazna's bestowal of the *kōtwālī* of Nandana in the western Pandjāb on one of his commanders in 405/1015 (Gardīzī *Zayn al-akhbār*, ed. Nāẓim, 72, ed. Ḥabībī, 181), and the frequent appearance in Bayhaḳī's *Taʾrīkh-i Masʿūdī* of a commander Bū ʿAlī Kōtwāl, the local governor of the capital Ghazna. On the other hand, it does not appear in Kāshgharī. Gradually, the word became general throughout the eastern Islamic world, passing into Turkic languages, into Pashto, and into Indian vernaculars like Pandjābī, Bengali and Urdu. In Persia of the Mongol, Tīmūrid and Ṣafawid periods it was the term used for the local governor of a town or citadel, as is attested by western travellers like du Mans (1660). Cf. Doerfer,

Türkische und mongolische Elemente im Neupersischen, iii, 618-21, No. 1658.

The term *kōlwāl* was especially used in Muslim India under the Mughals and, after the collapse of their empire in the mid-18th century, in British India for approximately a century more. But in fact, this office, in the sense of "official responsible for public order, the maintenance of public services etc., in a town" (something like the *Ṣāḥib al-Shurṭa* [*q.v.*] of the earlier caliphate), existed before the Mughals, e.g. in the territories of the Dihlī sultanate and in the provincial sultanates which arose in South India and eastern India during the post-Tughlukid period, cf. I. H. Qureshi, *The administration of the sultanate of Delhi*[4], Karachi 1958, 173-4, and Majumdar, ed., *The history and culture of the Indian people*. vi. *The Delhi sultanate*, Bombay 1960, index s.v. The accounts of Portuguese adventurers in India, from Vasco da Gama onwards, speak of encounters with the *Catual* or royal representative in the towns where they disembarked (thus also in Camoëns, *The Lusiads* [completed 1572], vii, viii, *passim*).

In the *Āʾīn-i Akbarī* of Abu 'l-Faḍl ʿAllāmī [*q.v.*], we find a classic exposition of the duties of the *kōlwāl*. His multifarious responsibilities included the maintenance of law and order, with the pursuance of criminals and robbers (for the recovery of whose depredations the *kōlwāl* was personally responsible); the keeping of a register of houses and streets; maintaining an intelligence system in the town, including observations of the incomes and life-styles of the populace, the results of which espionage to be reported to the central government; the enforcement of a curfew; the supervision of weights and measures and fair market practices; the upholding of the standard of coinage and the calling-in of bad coins for re-minting; the oversight of public water supplies; the appropriation for the state of intestate properties; the care that widows did not make the sacrifice of *sati* against their wills; the allocation of separate quarters in the town for noisome and despised trades like those of butchers, corpse-washers [see DJAZZĀR and GHASSĀL in Suppl.] and sweepers; etc. One notes the correspondence of many of these duties with those of the classical Islamic *muḥtasib*, whose office was certainly known in pre-Mughal India under the Dihlī sultans and their epigoni [see ḤISBA. iv. The Indian subcontinent]; it seems that the purely secular, semi-military *kōlwāl* now largely replaced the *muḥtasib*. But in many ways, the wide range of the *kōlwāl*'s responsibilities is an echo of those of the *nagaraka* or Town Prefect of Mauryan times; cf. Kauṭilya's *Arthasaśtra*, ch. xxxvi. Abu 'l-Faḍl's whole exposition has, however, a somewhat theoretical cast, and should probably be interpreted as a blue-print for the ideal administrative system for Akbar, rather than a delineation of actual practice; amongst other duties of the *kōlwāl* mentioned is responsibility for seeing that the festivals of Akbar's *Dīn-i Ilāhī* and the new *Ilāhī* era [see AKBAR] were observed (*Āʾīn-i Akbarī*, ii, tr. H. S. Jarrett[2], Calcutta 1949, 43-5; cf. also Mīrzā Muḥammad Ḥasan, *Mirʾāt-i Aḥmadī*, ed. Syed Nawab Ali, Baroda 1947-8, i, 163 ff. [compiled in Gudjarat, 1175/1761], section on the duties of officials charged with the safety and good governance of the state).

More definitely in accordance with contemporary Mughal practice are the reports of European travellers within India at this time. Thus F. Bernier speaks of the *Cotoüal* or "grand Prevost de la campagne" as sending soldiers all through his town when the Mughal court passed through it, and these blew trumpets in order to scare away malefactors (*Travels in the Mogul empire A.D. 1656-1668*, tr. A. Constable 1891, repr. Delhi 1972, 188, 369). N. Manucci's personal observations are especially valuable. Describing the situation in the latter part of Awrangzīb's reign, he tells how the *kōlwāl* stopped the illicit distilling of arrack and spirits, and the practice of prostitution, and how he sent intelligence reports to the court based on the information gathered in private houses by the scavengers, *alacor* (= *ḥalāl-khūr*). He also saw that ferry tolls, abolished by the Emperor, were not illegally exacted. At his disposal, he had a force of cavalry and infantry, with detachments for each quarter of the town. In the administration of justice, on the other hand, he was under the orders of the *ḳāḍī*, and carried out his written orders, such as sentence of death (*Storia do Mogor, or Mogul India, 1653-1708*, tr. W. Irvine 1907-8, repr. Calcutta 1965-7, ii, 420-1). In fact, we know that towards the end of Awrangzīb's reign, *kōlwāl*s in the newly-conquered, peripheral regions like South India, managed to achieve considerable freedom of action, away from the central government's control; this was the case with the *kōlwāl* and *fawdjdār* [*q.v.*] of Ḥaydarābād, the most important city of the eastern Deccan, see J. F. Richards, *Mughal administration in Golconda*, Oxford 1975, 83-5.

When a new police system was introduced into British India after 1861, the office of *kōlwāl* disappeared from most of the subcontinent, and his duties were taken over by Inspectors or Sub-Inspectors. In the North-West Frontier Province, however, the term continued in use to designate the chief police officer of the larger towns and cantonments.

(C. E. BOSWORTH)

KOUANDÉ, at present a regional capital of the People's Republic of Benin, was founded by a clan of Bariba hunters, the Tosso, specialists in the hunting of elephants, who provided a tribute of ivory tusks to the sovereign of Nikki. This settlement of hunters must have been ancient (perhaps in the 16th century), but a prolonged dynastic quarrel at Nikki brought to Kouandé considerable numbers of young warriors who must have used this city, every dry season, as a raiding-base.

The prince Chabi Gada of Nikki, having killed one of his pregnant wives, was expelled and took refuge at Birno Maro at the court of the *Tossounon* (chief of the Tosso) who offered him in marriage his eldest daughter, Gnon Birsi (in about 1762). Accepting succession to the throne of his father-in-law, he renounced all allegiance with regard to Nikki. He had, moreover, carried off with him some of the ritual objects that were the property of the king: six *kakati* (trumpets), silver and bronze stirrups, ceremonial sabres and lances, harness and bridle-bits as well as the ritual scissors which were used to cut the hair of young princes on the day of the ceremony of *Gnon Kogui*, which marked the passage from childhood to adolescence.

The death of Gada (in about 1789) led to a quarrel over the throne between Ouaoro Ouari, known as Tabouroufa ("wearer of the ear-ring"), a prince born at Nikki, and Ouorou Kpassi, son of Gnon Birsi, princess of Birni. The latter was victorious and took

the title of *Tossounon* while Ouarou Ouari moved from Birni to Kouandé.

The foundation of Kouandé. With an army of sixty-six horsemen Ouarou Ouari arrived in the region of Kouandé where the Bariba Seko had been installed for several generations. Ouarou Ourari was well received by the Kouandé Sounon, who gave him a vast area of land at the foot of the hill and died soon afterwards. A few days later he received the regalia brought from Nikki by Gada, and the following Friday, to the sound of the six royal trumpets, he accepted the homage of the Bariba and Somba chiefs. He took the title of *Bangana* ("buffalo") and appointed another Kouandé Sounon as his colleague and chief minister, and extended his authority over Birni, Pably, the region of Ouassa (Tobré and Péhounco), an area of some 10,000 km².

On his death, his brother Simé Yerima succeeded him, taking the name *Ourou Sourou* ("the Saint"). He took the young princes to task, demanding that they abandon their extortions "at once", thereby acquiring the nickname of *Baba Tantame* ("Papa at once"). To provide a diversion for the troublesome young princes, he mounted expeditions against the Berba, the Taneka, Pila-Pila, Somba, etc.

Dafia, eldest son of Ouorou Ouoari took the name *Sorou* ("the mortar that receives the blows of the pestle without being affected"). Tradition is reticent concerning his reign. All that is known is that the king authorised volunteers from his kingdom to take part in the campaign against the Peuls of Ilorin (1830). After these contingents were defeated and returned in disarray, king Sorou died as the result of being bitten by a dog; his sister, princess Ganigui, saw in this a conspiracy on the part of the successor and on the day of his coronation predicted an early death for him. In fact the *Bangana* Bio Diko ruled for only three months.

Sero, the eldest son of Baba Tantamé, was elected king (1833) and took the name *Bouko Ya Dari* ("stormy cloud"). He was obliged to suppress the intrigues of his younger brother Mora N'Gobi, who after two attempts on the throne, with the aid of the Natimba, was defeated. He obtained pardon for himself but not for Sinkossi, king of the Natimba, who, on coming to pay homage on the day of the *Gani*, was thrown into a ditch and crushed under a heap of stones, whence the king's nickname *Guinimoussikou* ("he who buries alive"). This king mounted expeditions against his neighbours the Berba, the Akpénon, the Cotokoli and the Aniagan of the valley of the Anié.

The *Bangana* Séké (1852-83) continued in similar circumstances the campaign against the Cotokoli of Kirikri (1866-8) and against Bafilo. He was also obliged to deal with civil wars.

Ouorou Ouari II (1883-97) was removed from office by Commandant Ganier in 1897 after the revolt of the Bariba. He withdrew to the village of Doh (30 km. to the east of Kouandé) and poisoned himself so as not to survive the surrender of the tombs of his ancestors. Since then the traditional sovereigns have been confined to their roles as regional chiefs.

Rules of investiture. Theoretically Islamised, the Bariba observe strict rules of investiture. After the funeral ceremonies which last three months, the council of ministers choose a new king. The choice having been made, the princes who are candidates for the throne kneel and the chief minister, Baba Agban, passes a white loincloth (*békou Kpékourou*) over the heads of the candidates.

In passing along the line for the third time, Baba Agban stops in front of the prince who has already been chosen as if held by an invisible force, then unfolding the *békou Kpékourou*, he wraps it round the body of the newly-appointed king. All those present kneel before the new king to wish him well, while the trumpets sound.

The festival of the Gani which takes place throughout the land of the Bariba is the occasion where the princes and senior officials assemble in the presence of the king to the sound of the ritual drums. At Kouandé, the Gani includes a special rite. The *Bangana* goes to the tree on the path where his ancestor used to rest. This tree lies at the southern end of the village of Kouandé and is called *Bouroh* ("good luck"). The king dismounts from his horse, leans against the throne and appeals to his ancestors for aid and protection.

A superstition holds that the man who picks up the pebbles under the tree will have his wish granted if the pebbles are of even number.

The Islamisation of Kouandé, at the beginning of the century, was very superficial. Only the community of foreign merchants was Muslim. Alfa Sabi, known as Aloufa, who was born in Kouandé in about 1863, supervised a Ḳurʾān school attended by a number of pupils. Since then, the influence of the Tid̲j̲ānī order has developed considerably.

(R. Cornevin)

KÖY, the word used in western Turkish (e.g. in Ottoman and Crimean Tatar cf. Radloff, *Versuch eines Wörterbuches der Türk-Dialecte*, ii, 1216) for village. It is the form in which Turkish has borrowed the Persian *gūy* (cf. Bittner, *Der Einfluss des Arabischen und Persischen auf das Türkische*, in *SB Ak. Wien*, cxlii, No. 3, 103), or perhaps more correctly *kūy* (Vullers, *Lexicon*; *Burhān-i ḳāṭiʿ*, 759) meaning originally path, street. In the toponomastic of the Ottoman empire we find many place-names compounded with *köy*, like Bog̲h̲az Köy, Ermeni Köy, etc. It seems that these names are not found before the end of the Sald̲j̲ūḳ period; the word does not occur, for instance, in Kās̲h̲g̲h̲arī. *Köy* in the sense of an open village is opposed to *ḳaṣaba* meaning a small town. In eastern Turkish place-names we always find the word *kend* (itself a loan-word from Soghdian) used for a village. Sometimes this last word seems to have been replaced by *köy* (cf. e.g. Ritter, *Erdkunde*, xi, 221 ff.; Ḳāḍī Kend, near al-Mawṣil, becomes Ḳāḍī Köy).

(J. H. Kramers*)

KÖY ENSTİTÜLERİ (T. "village institutes"), a Turkish educational institution of 1940-54, founded to combat the high illiteracy in rural areas by training and equipping village boys and girls for the special requirements of each region and using them as teachers in distant or under-developed areas where city-born teachers have been reluctant to work. They were the brain-child of İsmail Hakkı Tonguç [*q.v.*] a prominent educator, and were put into operation by Hasan Ali Yücel [*q.v.*] the reformist Minister of Education (1938-46) under President İsmet İnönü [see ʿIṣmet Pas̲h̲a İnönü in Suppl.].

From the early years of the Republic the problem

of mass education, particularly that of village children, was of great concern to Mustafa Kemal (Atatürk) and Turkish educators. During this period, nearly 80% of the population of over 13 million (1927 census) lived in some 40,000 villages unevenly scattered throughout war-devastated Anatolia and Eastern Thrace. Less than 20% of village children (mostly boys) attended for the most part inadequate schools, where the majority of teachers had had little or no proper training. Early experiments in setting up village teachers' training colleges, first under the young pioneer minister of education Muṣṭafā Nedjātī (1894-1929), and later during an attempt at collaboration between the Ministries of Education and Agriculture, failed owing to poor planning and inadequate funds. In 1936, during the ministry of Saffet Arıkan (1935-8), a new project was developed. A selected number of villagers who had served in the army as corporals and sergeants were sent to special courses called *eğitmen kursu* (*eğitmen* "instructor, educator" from the newly-coined neologisms *eğitmek* "to educate" and *eğitim* "education"), trained as teachers and appointed to village schools. To facilitate their settlement there, the *eğitmen*s were given land, agricultural equipment, tools, seeds, young plants, etc. In the meantime, İ. H. Tonguç had been appointed Director-General of Primary Education in the Ministry (1936). In 1937 the idea of village-teachers' training colleges was revived, and three colleges were set up in the Izmir, Eskişehir and Kastamonu areas (in Kızılçullu, Mahmudiye and Gölköy respectively). The new minister, Hasan Ali Yücel, gave Tonguç full authority, and the latter was able to put into practice extensively his long-cherished project, elaborated in his many works (particularly in *Canlandırılacak köy*[2], Istanbul 1947). On 17 April 1940 the law No. 3803 on Village Institutes was passed, and with the law No. 4274 on 19 June 1942 they were fully organised (for the texts of these laws, see *Düstur, üçüncü tertib*, xxi Ankara 1940, 692-7 and xxii, 1942, 1575-6 respectively). The Institutes were put under the direct control of Tonguç and after a survey of local conditions and requirements, 20 of them were set up in the following regions of Turkey (the nearest provincial centre is shown in brackets): South-East: Dicle (Diyarbakr); East: Pulur (Erzurum), Cilavuz (Kars), Akçadağ (Malatya); Eastern Black Sea: Beşikdüzü (Trabzon), Akpınar (Samsun); Western Black Sea: Gölköy (Kastamonu); Marmara and Thrace: Kepirtepe (Kırklareli), Arifiye (Izmit), Savaştepe (Balıkesir); Aegean: Kızılçullu (Izmir), Ortaklar (Aydın); Mediterranean: Aksu (Antalya), Düziçi (Adana), Gönen (Isparta); Central Anatolia: Hasanoğlan (Ankara), Pamukpınar (Sivas), Pazarören (Kayseri), Çifteler (Eskişehir), Ivriz (Konya).

The village Institutes were co-educational, admitting students with five years' village schooling (or three years' village schooling with two years' extra training) and giving a five-year course of instruction. The syllabus, which allowed great freedom of variety according to local conditions and requirements, consisted mainly of "cultural subjects" (Turkish, history, geography, civics, mathematics, physics, chemistry, a foreign language, military science and art) for 22 hours per week; agricultural subjects (farming, gardening, fruit growing, poultry farming, bee-keeping, fishing, etc.) for 11 hours per week; and technical subjects (metal working, carpentry, building, tailoring and dress-making, etc.) for 11 hours a week. The curriculum was mainly functional and was based on the essentially concrete and practical, with special emphasis on skills needed in the peasants' daily lives in a particular region. The aim was not merely to train village school teachers, but also to equip them to participate in the leadership of the community by developing their sense of personal responsibility and their ability to cooperate with villagers (specific aims which so far most city-born and trained teachers had been unable to realise). In 1943 a special teachers' training college was set up in Hasanoğlan near Ankara (*Hasanoğlan Yüksek Köy Enstitüsü*) with a three years' training programme. Up to the school year 1946-7 these Institutes trained more than 5,000 village teachers and 500 health officers.

With the ending of the single party régime (1945) and the authoritarian rule of the Republican Peoples Party (RPP, see DJUMHŪRIYYET KHALḲ PARTISI), the Village Institutes began to be subjected to violent attacks both by the conservative wing of the RPP and the newly-founded (January 1946) liberal Democrat Party (DP, see DEMOKRAT PARTİ). They were accused of fostering an unruly, subversive, anti-traditional generation and being the hotbeds of Marxist indoctrination. This campaign was waged mainly by the great landowners in and outside Parliament, and their mouthpieces in the press. The campaign reached such dimensions that President İnönü replaced the Minister of Education, H. A. Yücel with the conservative Reşat Şemsettin Sirer (1946), who in turn removed İ. H. Tonguç, the brain behind the Institutes, from office, closed the Hasanoğlan Teachers' Training College and changed most of the staff of the Institutes. Under the ministry of Tahsin Banguoğlu (1948-50), the gradual liquidation of the İnstitutes continued and was completed by Tevfik Ileri (1951-61), the second Minister of Education (appointed August 1950) of the Democrat Party, which came to power in the general election of May 1950. İleri put an end to the co-educational system in the Institutes (1951) and reformed their curriculum to bring it into line with classical teachers' training colleges of the cities. Their abolition was officially registered when their name was eventually (1954) changed to *İlk Öğretmen Okulları* ("Primary Teachers' Training Colleges"). The heated controversy over village Institutes continued and still (1978) continues without abating between their supporters and accusers, and is a strong social, political, economic and emotional issue. In spite of the rapid industrialisation of Turkey since 1950 and subsequent migration of great numbers of villagers to the cities, which has considerably altered the rural and urban scene, leading intellectuals, particularly noted writers with Village Institute backgrounds, such as Mahmut Makal (b. 1930), Fakir Baykurt (b. 1929), Talip Apaydın (b. 1926), Dursun Akçam (b. 1930) and Mehmet Başaran (b. 1926), celebrate each year the date of April 17, the anniversary of the founding of these Institutes, and demand their re-opening.

The only notable objection to the conception of Village Institutes among non-conservatives was raised by Kemal Tahir [*q.v.*] in his novel *Bozkırdakı çekirdek* ("The Seed in the Steppe", Istanbul 1967), who maintained that the Institutes were planned to train a conformist generation in rural areas in order to postpone a real social revolution.

KOYL, KOIL, a town of northern India situated 75 miles south-east of Dihlī and coming within the United Provinces in British India, now Uttar Pradesh in the Indian Union. The more modern town of ʿAlīgaṛh [*q.v.*] has expanded out of a suburb of Koyl. In 590/1194 the commander of the Ghūrids, Ḳuṭb al-Dīn Aybak [*q.v.*], captured Koyl on a raid from Dihlī, and henceforth there were usually Muslim governors over local Rādjput rulers, such as Kučuk ʿAlī under Bābur (932/1526) (*Bābur-nāma*, tr. Beveridge, 176). Ibn Baṭṭūṭa visited Koyl on his way southwards from Dihlī to the Deccan and Malabar, and speaks also of a noted *shaykh* of Kuwil (as he writes the name), one Shams al-Dīn b. Tādj al-ʿĀrifīn, whom Sultan Muḥammad b. Tughluḳ did to death (*Riḥla*, iii, 307-9, tr. Gibb, iii, 704-5, and iv, 6-7). The minaret of Koyl (now destroyed) had on it an inscription of the Slave King Nāṣir al-Dīn Maḥmūd Shāh from 652/1254 (see G. Yazdani, *The inscriptions of the Turk Sulṭāns of Delhi ...*, in *Epigraphia Indo-Moslemica* [1913-14], 22-3). Koyl is listed in the *Āʾīn-i Akbarī*, tr. Blochmann and Jarrett[2], Calcutta 1939-48, ii, 197, as a *sarkār* in the Āgra *ṣūba* of the Mughal empire, with a revenue of 55 million *dams*.

In *ca.* 1757 Koyl was captured by the Jhāt leader Sūradj Mal and then in 1759 by the Afghāns, its strategic position on the Dihlī-Āgra road giving it importance. It was re-named ʿAlīgaṛh "the high fortress" by Nadjaf Khān in 1776, when he rebuilt the citadel. All the upper Dōāb passed into British hands in 1803, but with Koyl-ʿAlīgaṛh only captured from the Marāṭhās after a prolonged siege. Native troops there mutinied in May 1857, but order was restored in August by a British force after internal strife between the Jhāts and Rādjputs. For the town's subsequent history, see ALIGARH.

Bibliography: *Imperial gazetter of India*[2], v, 209-11, xv, 354; and see GŪRAN, SHAYKH, in Suppl. (C. E. BOSWORTH)

ḲOYLU ḤIṢĀR (ḲOYUNLU ḤIṢĀR), modern Koyulhisar, centre of an *ilçe* of the province (*il*) of Sıvas in the valley of the Kelkit River along the old route from *Niksar* to *Shābīn Ḳaraḥiṣār* and Erzurum in the so-called "left wing" (*sol ḳol*) of Anatolia within the framework of the Ottoman road and postal system. The site has changed a few times because of earthquakes (most recently in 1939). Before *ca.* 1850 the township probably lay on the site of the actual Yukarı Kale.

The town and fortress were lost by the Byzantines after the battle of Manzikert (Malazgirt). After direct Saldjūḳid rule, it became part of the amīrate of Eretna [*q.v.*], then possession of the semi-independent Turcoman ruler of Ḳara Ḥiṣār-i Sharḳī (= Shābīn Ḳaraḥiṣār). In *ca.* 763/1381 it was part of the dominions of Ḳāḍī Burhān al-Dīn [*q.v.*] of Sīvās, whose government was succeeded by that of the Aḳ-Ḳoyunlu [*q.v.*]. Uzun Ḥasan [*q.v.*] lost the place to Sultan Meḥemmed II in 865/1461, upon which it became part of the *eyālet* of Erzurum as a subdivision of Ḳara Ḥiṣār-i Sharḳī. In 1864 its status became that of a *ḳaḍāʾ* in the *wilāyet* of Sıvas. In the 19th century its population was only half Muslim, and V. Cuinet (*La Turquie d'Asie*, Paris 1892, i, 237, 793) enumerated a population of 1,809, of whom 905 were Muslims, 604 Greeks and 300 Armenians. In 1927 the census indicated a total Muslim-Turkish population of 1,800. In 1970 the town numbered 3,524, with 28,887 in the *ilce*.

Darkot, with the older literature indicated); F. Taeschner, *Wegennetz*, Leipzig 1924-6, ii, 4, 13-24, 54, 75, 192, Tables 41-4; Y. Yücel, *Kadı Burhaneddin Ahmed ve devleti (1344-1398)*, Ankara 1970, 27, 50 f., 65, 83, 92, 138, 148. (A. H. DE GROOT)

ḲOYUL ḤIṢĀR (ḲOYUNLU ḤIṢĀR), more properly ḲOYUN ḤIṢĀR, the name for two Byzantine fortresses: 1. identical with Baphaeon, to the north-east of Izmīd, the site of the first battle won by ʿOthmān I against the Byzantines in 1301; 2. a fortress on the Saḳarya river [*q.v.*] to the north-east of Bursa near Dinboz, taken by Orkhān during a campaign in 1324-5.

Bibliography: ʿĀshıḳpashazāde, *Taʾrīkh*, tr. R. F. Kreutel, Graz, etc. 1959, 43, 63, map I; H. İnalcık, *The Ottoman empire—the classical age 1300-1600*, London 1973, 6, 55; D. E. Pitcher, *An historical geography of the Ottoman empire*, Leiden 1972, 37; İ. H. Uzunçarsılı, *Osmanlı tarihi*, i, Ankara 1972[3], 109 ff., map 2. (A. H. DE GROOT)

ḲOYUN BABA, lit "father of sheep", a Turkish saint. He is thought to have been a contemporary of Ḥādjdjī Bektāsh [see BEKTĀSHIYYA] and is said to have received his name from the fact that he did not speak, but only bleated like a sheep five times a day at the periods for prayer. Sulṭān Bāyezīd II, called *Walī*, built a splendid tomb and dervish monastery on the site of his alleged grave at ʿOthmāndjıḳ (near Amasya, in Anatolia) which was one of the finest and richest in the Ottoman empire. Ewliyā Čelebi in his *Travels* (*Seyāḥet-nāme*, ii, 180 ff.) describes very fully the great Bektāshī monastery there, at which he was cured of a malady of the eye and was initiated into the order (cf. J. von Hammer, *GOR*, i, 608, on Ewliyā's pilgrimage to the tomb of Ḳoyun Baba). Nothing is known regarding the life of this remarkable saint, nor even whether he really existed. That he is represented as a disciple and contemporary of Ḥādjdjī Bektāsh means nothing, as almost all early Ottoman saints are credited with having enjoyed this privilege. The sanctuary itself does not seem to have been examined; but see Maercker in *ZGE*, xxiv (1899), 376.

Bibliography: Ḥādjdjī Khalīfa, *Djihān-numā*, 625 (brief mention of the tomb); Ewliyā, *Seyāḥet-nāme*, ii, 180 ff.; cf. also J. von Hammer, *GOR*, i, 230, 608 (extracts from Ewliyā). (F. BABINGER)

ḲŌZĀN, (1) a town in southern Turkey, formerly the Armenian town of Sīs [*q.v.*], and now administrative centre of Ḳōzān district (*kaza*) in the province of Adana.

(2) in Ottoman times, that portion of the Taurus Mountains comprising the present districts of Kadirli, Ḳozān, Feke and Saimbeyli. This name originated with the Ḳozān-oghlu *derebeys* [see below] who controlled the area during the 18th and much of the 19th centuries.

The origin of the Ḳōzān-og͟hlu dynasty and its name is uncertain. According to Aḥmad D̲j̲ewdet Pas̲h̲a, the family came from the Arıḳ tribe, one of the Wārsāḳ (Fārsāḥ) tribes which settled the Taurus Mountains in the 13th century A.D., and its name originated with an ancestor from the village of Ḳōzān near ʿAyntāb (*Tedh̲ākir*, iii, 108-9). The family had gained leadership of the tribe by 1689 (Ahmet Refik [Altınay], *Anadolu'da türk aşiretleri*, 89) and went on to control the entire area and exercise the functions of government in virtual independence of Istanbul. Only in 1865 were the Ottomans able to defeat, capture and exile the *derebeys*, settling the tribes on which their power had depended and establishing normal administration. Ḳōzān was of concern once again in 1878 when Ḳōzān-og͟hlu Aḥmad Pas̲h̲a tried to re-establish his control, but with his defeat the area ceased to be of special importance.

Bibliography: The most detailed accounts of Ḳōzān and the Ḳōzān-og͟hlu are those of Aḥmad D̲j̲ewdet Pas̲h̲a in *Maʿrūḍāt*, in *TTEM*, x (87), 278-82 and *Tedh̲ākir*, iii, ed. Cavid Baysun, Ankara 1963, 107-15, 117-19. A general description of the area as it was in 1890 is given in V. Cuinet, *La Turquie d'Asie*, ii, Paris 1892, 90-7. Selected documents concerning the Ḳōzān-og͟hlu are found in Ahmet Refik (Altınay), *Anadolu'da türk aşiretleri: 966-1200*, Istanbul 1930. On the Wārsāḳ tribes, see Faruk Sümer, *Çukurova tarihine dair araştırmalar* (*Fetihten XVI yüzyılın ikinci yarısına kadar*), in *AÜDTCFD*, i, 70-93. The most recent study of this area in the nineteenth century is A. G. Gould, *Pashas and brigands: Ottoman provincial reform and its impact on the nomads of Southern Anatolia, 1840-1885*, Ph.D. thesis, University of California, Los Angeles 1973, unpublished.

(A. G. Gould)

ḲŌZĀN-OG͟HULLARÎ, a family of *derebeys* [*q.v.*] in Ottoman southern Anatolia, with their centre of power in the 19th century in the *sand̲j̲aḳ* of Ḳōzān [*q.v.*] (i.e. western Ḳōzān) and the *ḳaḍāʾ* of Ḳōzān (i.e. east Ḳōzān), in the piedmont area where the Taurus Mountains come down to the Cilician Plain or Çukurova. They were thus in a good position, during the 19th century, together with other local *derebeys*, to dominate the plain and at times to exert influence in Adana itself.

The Ḳōzān-og͟hullarî claimed descent from a Türkmen tribe which had entered Cilicia in Sald̲j̲ūḳ times, and which is certainly heard of in historical sources for the 17th century. From the beginning of the 19th century onwards, they were able to beat off several military attacks by the Porte in Istanbul and to act as virtually independent local rulers, levying taxes, but acting nominally as officials, *ḳāʾimmaḳāms* or *müdürs*, of the Ottoman government. Their position locally was strengthened by an informal alliance with the Armenian clergy and notables of Ḳōzān (the Armenian Catholicos or Patriarch had his seat in a monastery at Sîs in the Ḳōzān district, the ancient capital of mediaeval Little Armenia [see V. F. Büchner, art. *Sîs*, in *EI*[1]), who were also concerned lest the Sultan's direct influence be extended into the region. The Ḳōzān-og͟hlu family was, however, rent by internal rivalries in the middle years of the 19th century. In 1865 the central government was able to reduce the power of the Cilician derebeys by the despatch of the military "Reform Division" (*Fîrḳa-yi Iṣlāḥiyye*) to Iskenderūn; various members of the Ḳōzān-og͟hullarî went over to the government side, and after some attemps at resistance, the family finally submitted. Several of them were given official posts in the Ottoman administration, and others brought to honourable exile in Istanbul; after a final local rising in 1878 just after the Russo-Turkish War, the region of Ḳōzān was substantially pacified.

Bibliography: see A. G. Gould, *Lords or bandits? The derebeys of Cilicia*, in *IJMES*, vii (1976), 491-505, with references to the sources, and a kinship table of the family as it was in 1865 at p. 492.

(Ed.)

ḲRĀN [see sikka].

ḲRÎM [see ḳirim].

ḲRÎZ (Russian designation, Krîzî [from the *aul* Ḳrîz]), a small Caucasian ethnic group, forming with the K͟haput [*q.v.*] and Dzhek the Dzhek subdivision of the Samurian group (Lezghin, Agul, Rutul, Tsak͟hur, Tabasaran, Buduk͟h, Dzhek), of the north-eastern Ibero-Caucasian language family.

According to the 1926 Soviet census, ethnically there were 5 Ḳrîz, and linguistically 4,348 (including speakers of Dzhek and K͟haput dialects). According to a 1954 estimate, there were some hundreds of Ḳrîz living in a single *aul*, that of Ḳrîz, located in the basin of the upper Ḳudialchay, in the S̲h̲ak͟hdag͟h area (Konak͟hkend district, Azerbaidjan SSR). The Ḳrîz are Sunnî Muslims of the S̲h̲āfiʿî rite. The traditional economy of the Ḳrîz was based on sedentary animal husbandry, agriculture, and horticulture.

The Ḳrîz language is only a variant of Dzhek (as is K͟haput), which is a purely vernacular language; Azeri is used as the literary language. The Ḳrîz are being culturally and linguistically assimilated by the Azeris.

A. Tokarev, *Etnografiya narodov S.S.S.R.*, Moscow 1958.

(R. Wixman)

KRUJË, a town in northern Albania, lying around the foot of a precipitous rock, a spur of the steep Krujë Range, with the fertile plain of the Ishm river to the south and west.

Under the Ottoman administration the town was officially known as Aḳ Ḥiṣār [*q.v.*]. It was the chief administrative centre of the *wilāyet* and after 1466 of the *ḳaḍāʾ* of this name. For most of the second half of the 19th century the *ḳaḍāʾ* was part of the *wilāyet* and of the *sand̲j̲aḳ* of Skutari (cf. Th. Ippen, *Beiträge zur inneren Geschichte Albaniens im XIX. Jahrhundert*, in L. von Thallóczy, *Illyrisch-Albanische Forschungen*, Munich-Leipzig 1916, i, 363). The *ḳaḍāʾ* comprised a *nāḥiye*, an area north of the river Mat, known as Ohëri i vogël (cf. F. Seiner, *Die Gliederung der albanischen Stämme*, Graz 1922, 6), which was inhabited by the Kthella tribe (cf. *Detailbeschreibung von Albanien. 1. Theil: Nord-albanien mit den angrenzenden Theilen Dalmatiens und Montenegros*, Vienna 1900, 110 ff., 130 ff.). At the time of the Austro-Hungarian occupation of Northern Albania in 1916, the *ḳaḍāʾ* of Krujë functioned as part of the *sand̲j̲ak* of Krujë, together with the *ḳaḍāʾ*s of Matja and Ohëri (cf. F. Seiner, *Ergebnisse der Volkszählung in Albanien in dem von den österr.-ungarischen Truppen 1916-1918 besetzten Gebiete*, Vienna-Leipzig 1922, 14). In the independent Albanian state the area of Krujë became a sub-prefecture of the prefecture of Dürres (cf. *Albania. Geographical Handbook Series, Naval Intelligence Division*, Oxford 1945, 146). After 1949, the position of the town was affected by various administrative changes; cf. *Die*

Verwaltungseinstellung und die Entwicklung der Bevölkerung in Albanien, Wissenschaftlicher Dienst Südosteuropa (München: Südost Institut), iii, No. 10 (1954), 211-16, *passim*. In present-day Albania the district (*rrethe*) of Krujë covers an area of 607 sq. km. and had a population of 70,700 in 1971 (cf. *Vjetari statistikor i R.P.SH.-1971 dhe 1972*, Tiranë 1973, 24). The number of inhabitants of the town itself, which is known for the characteristic architecture of its buildings (cf. Koco Zheku, *La Kulle (manoir) de Kruje*, in *Deuxième Conférence des Etudes Albanologiques*, ii, Tirana 1970, 263-8 (text), 269-89 (illustrations)), amounted to about 7,000 souls (cf. Zheku, *ibid.*, 263).

Throughout the 19th and early 20th century, the region of Krujë was the scene of various anti-Ottoman rebellions, mainly in response to the imposition of new taxes (cf. Luan Bajo, *Faqe nga Lufta e kacakëve në rrethin e Krujës (fundi i shekullit XIX—fillimi i shekullit XX)*, in *Studime Historike*, vi [1969], ii, 65-74). During one of the last of these rebellions in 1906-7, the so-called battle of Tallajbe—named after the quarter of the town of Krujë where it took place—was fought between peasants from the Krujë area and Ottoman forces under Shemsi Pasha (cf. Luan Bajo, *Mbi "Luftën e Tallajbesë" në rrethin e Krujës në vitet 1906-1907*, in *Studime Historike*, vi [1969], iii, 147-58).

Accounts of these events as well as of the revolts against local landlords belonging to the Toptan family, within which the office of *sandjaḳ-beg* [*q.v.*] had become a hereditary position, are preserved in local oral tradition and were collected, studied and analysed by G. Komnino, *Expedita folklorike e Krujës*, in *Buletin për shkencat shoqërore*, iii (1955), 235-61. During the general insurrection of 1912, which led to the proclamation of Albanian independence, the region of Krujë was one of the major centres of anti-Ottoman activity (cf. P. Bartl, *Die Albanischen Muslime zur Zeit der Nationalen Unabhängigkeitsbewegung (1878-1912)*, Wiesbaden 1968, 180, and for a more detailed account, L. Bajo, *Mbi kryengritjen e përgjithshme të vitit 1912 në rrethin ë Krujës*, in *Studime Historike*, viii [1971], i, 131-54); and in 1914 it was the centre of the Essadist movement, which was partly pro-Turkish and directed against the Albanian sovereign Wilhelm von Wied. The town was captured by anti-Essadist troops of Mati tribesmen under Ahmet Zogu (cf. C. A. Dako, *Zogu the First, King of the Albanians*, Tirana 1937, 61).

The population of the *ḳaḍā'* was predominantly Muslim and the town of Krujë was inhabited by Muslims exclusively (cf. Seiner, *Volkszählung*, 14). The majority of its inhabitants belonged to the Bektāshī order [see BEKTĀSHIYYA] which had several sanctuaries in and around the town and a *tekke* in the plain below Krujë (Fushë e Krujës), which was visited and described by F. Babinger in 1928 (F. Babinger, *Bei den Derwischen von Kruja*, in *Mitteilungen der Deutsch-Türkischen Vereinigung*, ix [1928], Heft 8/9, 148-9; Heft 10, 164-5; and idem, *With the Dervishes of Krooya*, in *The Sphere*, cxvii [1929], no. 1525, 63. For photographs of the *tekke*, see E. Rossi, *Credenze ed usi dei Bektasci*, in *Studi e materiali di storia delle religioni*, xviii [1942], 60-80). Until 1967, the *tekke* was the seat of a *gjysh* (grandfather) who had under his jurisdiction the prefectures of Tirana, Durrës and Shkodër. These constituted one of the six zones into which Albania had been subdivided by the order for administrative purposes (cf. S. Skendi, *Albania*, New York 1958, 294).

(F. DE JONG)

ḲUBAČI, self-designation, Urbugh; Russian, Kubačintsï; Arabic and Persian, Zirihgarān), a people of the eastern Caucasus. The Ḳubači inhabit the single *aul* of Ḳubači, located in Dakhadaev *rayon*, Dāghistān. They are a Caucasic people whose language belongs with Ḳaytaḳ and Dargin to the Dargino-Lak (Lak-Dargwa) group of the Ibero-Caucasian language family. Ḳubači is now regarded as a dialect of the Dargin language, and they are considered in the Soviet Union as a sub-group of Dargins rather than as a distinct ethnic group. The Ḳubači use the Dargin literary language, and they are being assimilated by the Dargins. In 1926, according to the Soviet census, there were 2,322 Ḳubači.

The first mention of the Ḳubači appears in Arabic sources of the 4th/10th century from Darband [see BĀB AL-ABWĀB]. Although the Ḳubači maintained patriarchal clan divisions and had a strong self-ruling free society, they paid tribute both to the Shamkhāl of Ḳāzīḳumukh (4th-8th/10th-14th centuries) and the Utsmiat of Ḳaytāḳ (9th-10th/15th-16th centuries). The *aul* of Ḳubači was part of the Gapsh free society, a division of the Utsmi-Dargwa, a Dargin federation. The Ḳubači are Sunnī Muslims of the Shāfiʿī school. They, along with the Dargins, accepted Islam in the 6th/12th century.

Since the middle Ages, Ḳubači artisans have been renowned as gold, silver, and coppersmiths, and as makers of fine jewelry and weapons. So famed were they as makers of daggers, sabres, and chain-mail that they were, and are, called Zirihgarān ("makers of mail") by the Arabs and Persians. Even under the Soviets today, the Ḳubači masters are still famous for their fine jewelry, gold and silver smithing.

(R. WIXMAN)

ḲUBĀDĀBĀD, a residence of the Rūm Saldjūḳ ʿAlā' al-Dīn Ḳayḳubād I (616-34/1219-37) [*q.v.*] on the west bank of the Lake Beyşehir, *ca.* 100 km. south-west of Konya. On the spur of the Güllüce Dağları, probably in 624/1227 chosen by Ḳayḳubād I as a site for its scenic qualities, a palace-city was constructed under the direction of Saʿd al-Dīn Köpek, his Court Architect and Master of the

Royal Hunt (*amīr-i shikār ū miʿmār*). The first palace is said to have been erected in the presence of the ruler according to his detailed indications. But it may have taken longer to erect the buildings of the area, which measures *ca.* 430 × 200 m. and on which until now there can be identified the ruins of 15 constructions, as well as the outline of a quay and a fenced enclosure perhaps to be identified as an enclosure for animals. Unambiguous evidence for continued building activity is provided by an inscription, dated 633/1236, commemorating the foundation of a mosque by Badr al-Dīn Sūtāsh, governor (*wālī*) of Ḳubādābād, later transferred to the mosque at Kürtler Köyü, at a distance of *ca.* 3 km. to the south. The palace-city was inhabited temporarily by Ghiyāth al-Dīn Kaykhusraw II (634-44/1239-46) too and finally also by ʿIzz al-Dīn Kayḳāʾūs II [*q.v.*] (during his second reign 655-9/1257-61), but its importance must have declined sharply after the occupation of Anatolia by the Mongols (641/1243).

The ruins were identified in 1949 by M. Zeki Oral, who made limited, trial excavations up to 1951. The systematic excavations in 1965 and 1966 by Katharina Otto-Dorn and Mehmet Önder included a topographical survey of the area, but remained restricted to clearing the two main buildings located at the lake shore. Both buildings are characteristic palaces with central double rooms: a raised *iwān*, probably a throne-room, preceded by a barrel-vaulted entrance hall. The smaller building of 30 × 29 m. of dressed stone, by a quay and associated with a dockyard, is probably the older one of the two palaces. This is indicated by the stone blocks of the porch, which have been excavated; with its simple, angular, interlacing bands it points to the early years of the reign of Ḳayḳubād I. The greater palace of 50 × 35 m., erected probably only slightly later in an isolated position on the northern side of the building area, is a rubble construction clearly less pretentious as far as masonry is concerned. It is, however, distinguished by an outer court and a terrace which border upon the shore of the lake.

The rubble walls of the greater palace, not very notable by themselves, were originally richly decorated. Up to a height of 1.75 m., the inner walls of the main rooms bore a revetment of underglaze-painted tiles mostly arranged in an all-over star and cross pattern, the eight-pointed stars bearing figural subjects and the crosses florate ornaments. The tiles, datable *ca.* 627/1230 or a little later, show a variety of iconographic themes side-by-side, apparently reflecting the multiple functions of the building, as a Royal residence and as a hunting lodge; on the one hand, there are symbols of power like the sovereign enthroned, eagles bearing the inscription *al-sulṭān* on their breasts or lions; and on the other, astrological symbols and fabulous creatures, or trees of life which may well be allusions to paradise. Finally there are stylised animal figures, with falcons or horses together with game animals like foxes, hares, deer, bears, etc. Tile fragments proved that the smaller palace was also covered with tiles, bearing similar iconographic themes. This revetment, however, is possibly datable to a later phase of decoration.

In addition to these considerable series of tiles, which are particularly important as one of the earliest known examples in architecture of tile-decoration with figural subjects, there were also excavated in the greater palace fragments of window-screens of mosaic faïence, as well as vestiges of moulded stucco, decorated with peacocks and riders, and some figural stone reliefs. Together with numerous smaller finds, which included fine glazed pottery and in particular, a glass dish bearing the names and titles of Ghiyāth al-Dīn Kaykhusraw II, the son of the imperial founder of the site, the richly-decorated palaces of Ḳubādābād represent impressive evidence for the artistic splendour of the court of the Rūm Saldjūḳs which reached its zenith under Ḳayḳubād I.

ḲUBĀDHIYĀN, ḲUWĀDHIYĀN, in mediaeval

Islamic times a small province situated on the right bank of the upper Oxus, and also a town, the chief settlement of the province. The latter comprised essentially the basin of the Ḳubādhiyān (modern Kafirnihan) River, which ran down from the Buttamān Mountains and joined the Oxus at the fording-place of Awwadj or Awzadj (modern Ayvadj); accordingly, it lay between the provinces of Čaghāniyān [*q.v.*] on the west and Wakhsh and Khuttal [*q.v.*] on the east. Administratively, it was most often attached to Khuttal. It now falls substantially within the Tadzhikstan SSR.

The name Ḳubādhiyān/Ḳuwādhiyān seems to appear in the Chinese Buddhist pilgrim Hiuen-Tsang's travel account as Kio-ho-yen-na, according to Marquart, *Ērānšahr*, 226, 233. The 4th/10th century geographers describe it amongst the upper Oxus provinces of Transoxania. Its chef-lieu was the town of Ḳubādhiyān itself (modern Kabadian), also called in Ibn Ḥawḳal Fazz, but in Muḳaddasī B.y.z. (?); this was a strongly-fortified town on the Ḳubādhiyān River, smaller however than Tirmidh [*q.v.*]. In the north, on the upper course of the river, lay the fortresses of Wāshgird and Shūmān, frontier posts against such predatory peoples of the Buttamān Mountains as the Kumīdjīs [*q.v.*]; indeed, the whole province was well-supplied with *ribāṭ*s and defensive posts. According to Ibn Ḥawḳal, the *Ṣāḥib-Barīd* or postmaster and intelligence agent [see BARĪD] for the Sāmānids in Ḳubādhiyān received the salary for each three months (*ʿishrīniyya*) of 200 *dirhams*. The chief products for exports from the province were saffron in the north and madder in the south, the latter being a crop whose marketing was strictly controlled by the Sāmānid government (see Ibn Ḥawḳal, ed. Kramers, ii, 454, 470, 474-7, tr. Kramers and Wiet, ii, 439, 453, 456-9; Muḳaddasī, 284, 289-90; *Ḥudūd al-ʿālam*, tr. Minorsky, 114-15, § 25; R. B. Serjeant, *Islamic textiles, material for a history up to the Mongol conquest*, Beirut 1972, 102-3). Samʿānī, *K. al-Ansāb*, f. 440b, gives "al-Ḳubādhiyānī" as the best-attested form of the *nisba*, and accounts Ḳubādhiyān as belonging administratively (in the Saldjūḳ period?) to Balkh.

In Islamic history, we hear little of Ḳubādhiyān under this very name. It was a dependency of the Sāmānid empire, passing with Khuttal and Čaghāniyān to the Ghaznawids in the early 5th/11th century (whence several mentions of it in Bayhaḳī's *Taʾrīkh-i Masʿūdī*), and then to the Saldjūḳs; in Tīmūrid times it was often controlled by the rulers of Harāt. See further for the historical aspect, ČAGHĀNIYĀN and KHUTTALĀN.

KUBAFOLO or **BAFILO,** the centre of the administrative region of Northern Togo, situated in lat. 8° 40′ N. and long. 1′ 30′ E., 73 km. north of Sokodé. It owes its origin to the unforeseen halting of a column of Gonja warriors led by Mama, ruler of Pembi, and which was returning from a campaign against Djougou at the beginning of the 19th century. They stopped at Séméré (now in the People's Republic of Benin), and a group settled there. The warriors were tired by a long march through the mountain regions, but did not dare to ask their chief to stop; however, the latter's horse stopped to urinate, and the warriors seized the opportunity to halt. Finding the spot pleasant, they set up an encampment which they named Gobangafol (from *banga* "horse" and *mbofol* "urine"). These Gouang warriors settling there married Tem women and adopted the Tem language. The traditions vary concerning this expedition; according to Goody, it was probably commanded by Soumaïla Ndewura Jakpa, king of Pembi, and according to others, by Mama, with Séméré and Bafilo being founded by rebellious dissidents rather than by disciplined soldiers.

At present, representatives of the main clans are to be found at Bafilo: the Touré, originating from the Niger banks under the leadership of a certain Boukari; the Fofana, descended from Sabani (of the royal family of Fada N'Gurma); the Keita of Kabara; and the Taraore. The Peuls who are said to have arrived in Nigeria between 1840 and 1875 (the Sakara and Dabo clans) allegedly initiated the Temba into stock-raising. When the Germans arrived, there were already several mosques. Islamisation has continued, and at the present time, there are 27 mosques in the town, divided between its two component quarters, 18 in the Agodadé one and 9 in the Central one. The chief mosque is 25 years old; a Ḳurʾān school with three grades is attached to it, with a Libyan teacher giving instruction there since 1977. About 100 men and some 50 women have made the Pilgrimage to Mecca. Until the Second World War there existed a small minority of the Ḳādiriyya order, but with the death of the last Alfa then, these adherents have rallied to the Tidjāniyya. Bafilo is an important centre for the spread of Islam, since several of the Muslim missionaries in Togo have received their religious education there.

ḲUBAN (called in Noghay Turkish, ḲUMAN, in Čerkes, P^H^SHIZ), one of the four great rivers of the Caucasus (Rion, Kura, Terek and Ḳuban). It is about 450 miles long. It rises near Mount Elburz at a height of 13,930 feet. Its three constituents (Khurzuḳ, Ulu-Ḳam, Uč-Ḳulan) join together before reaching the defile through which the Ḳuban enters the plains (at a height of 1,075 feet). The Ḳuban at first runs through the wooded outer spurs of the mountains and then, taking a westerly direction, flows through the plains with forests on either bank. Its left bank tributaries are the Daʾut, Teberda, Zelenčuk, Urup, Laba, Bēlaia, Pshish, Psekups, Afips, Adagum, etc. Its lower course breaks into two branches, one of which (Protoka) flows into the Sea of Azov and the other (the main one) into the Black Sea (although it also sends off a channel to the Sea of Azov). The lower course of the river frequently changes its bed. As late as the 15th century for example, it discharged the bulk of its waters into the Sea of Azov. The Ḳuban with its tributaries drains an area of 20,000 sq. miles.

The administrative district of the Ḳuban—before 1918 the province (*oblastʾ*) of the Ḳuban Cossacks—also included the valleys, further north of the Baisugh, Čelbasī, Sasīka and the left bank of the Yeya, all flowing towards the Sea of Azov or ending in lakes and marshes. This territory between the chain of the Caucasus and the sea stretched to the north as far as the province of the Don Cossacks and to the east as far as that of the Terek Cossacks. The area of this

great province, which is divided into 7 districts (Yeya, Temrük, Kawkazski, Ekaterinodar, Maykop [in Turkish: "much oil"], Laba, Baṭṭālpas̲h̲insk), was estimated at about 32,000 sq. miles.

Klaproth, *Tableau du Caucase*, Paris 1827, 89, estimated the tribes of the Ķuban at about 100,000 families. According to the *Russian Encyclopaedia*, the native population in about 1861 was 200,000 men (?), but as a result of expatriations en masse, this number had fallen to 90,471 by about 1883. Russian colonisation, which was begun by the Cossacks in about 1861, had reached 1,500,000 by 1894. In 1916, official statistics put the whole population of the province at over 3,000,000. The number of "highlanders" and "Sunnīs" included in this total had also increased and reached 139,000. The native elements indicated by these official terms, which lack precision, included the remainder of the Čerkes and Abaz tribes [*q.v.*] (related to the Abk̲h̲āz, *q.v.*) and Turks of Ķara-Čay. The latter (about 15,000 in 1900) lived in the villages (*aul*) of Ķart-D̲j̲urt, Uč-Ķulan and K̲h̲urzuķ, etc. in the upper waters of the Ķuban and spoke a northern Turkish dialect (Nog̲h̲ay). They were at one time under the Čerkes princes of Ķabarda and in 1822 submitted to the Russians.

After 1920, the territory of Ķuban was re-organised on an ethnic basis; besides the Kabarda-Balķar region (on the Terek) (now an Autonomous SSR) two autonomous (within the Soviet system) areas were created on the Ķuban: first, the Ķara-Čay-Čerkes, east of Urup with its capital Baṭṭāl-pas̲h̲insk; it has about 150,000 inhabitants of whom 45% are Turks, 25% Čerkes and 13% Cossacks; and second, the Adīg̲h̲e, a strip of territory along the Ķuban and Laba; its capital is Tok̲h̲tamukay and it contains about 70,000 Čerkes. Both these are now Autonomous Regions.

The basin of the Ķuban has been inhabited since the bronze age. The oldest tombs at Maykop go back to the second (according to Rostovtzeff, to the third) millenium B.C. Scythian tombs of the 4th-5th centuries B.C. are very numerous (Kelermes, Voronežskaia) and Sarmatian tombs from the 2nd century B.C. to the 1st A.D. The Greeks called the Ķuban Hypanis, Vardanes and Anticites. In Byzantine authors we find Κοῦφις, Κοῦφις (Marquart, *Osteuropäische Streifzüge*, 32). The spread of Christianity among the Adīg̲h̲e (Čerkes), according to local legends, dates from the emperor Justinian (527-65); cf. S̲h̲ora Nogmov, *Istoria adīg̲h̲eiskago naroda*, Tiflis 1861, 43.

The Arabs were not well acquainted with the district. According to a bold conjecture of Marquart, *ibid.*, 37, 161, 164, Ķuban is to be read for Dūbā (*Kūbā), which according to Gardīzī (quoting D̲j̲ayhānī, *ca.* 301/914) formed the southern boundary of the Mad̲j̲ār (Magyars) and to the south of which (on the left bank) lived (Ibn Rusta, 139) the Ṭwlās, probably an Alān [*q.v.*] tribe (cf. the southern Ossete tribe of Tual-tā and the name of the Alāns: Ās). On the other hand, Masʿūdī (*Murūd̲j̲ al-d̲h̲ahab*, ii, 45-6) says that the immediate neighbours of the Alān were the Kasak living between the Caucasus and the Black Sea. The Kas̲h̲ak (a parallel form is al-Kāsakiyya, Masʿūdī, *Tanbīh*, 157) are the Čerkes, whom the Russian chronicles call Kasogī and with whom the Russian principality of Tmutarakan (on the peninsula of Taman in the 9th to the 11th century) had continuous relations.

The later history of the territory of Ķuban is at first the story of the struggle between the Russians and Ottomans, and more particularly the K̲h̲āns of the Crimea, for the possession of the fertile plains southeast of the Sea of Azov and later of the struggle of the Russians with the warlike tribes of the left bank of the Ķuban.

In the 16th century, Moscow's interest in the northern Caucasus was stimulated by the marriage of Ivan the Terrible with the Ķabardian princess, Maria Temrükovna, in 1561. Soon afterwards Sulṭān Selīm II sent Ķāsim Pas̲h̲a to Astrak̲h̲an, and Dewlet-Giray of the Crimea invaded Ķabarda.

In 1589 the Cossacks appeared before Azov, a former Venetian and Genoese colony, which the Ottomans had taken in 880/1475. A long series of struggles began for the possession of Azov [cf. AZAĶ] and the Čerkes principality of Ķabarda (to the east of the Ķuban on both sides of the middle course of the Terek). Down to the beginning of the 18th century the K̲h̲āns of the Crimea had the upper hand, and by about 1717 the Čerkes had been converted to Islam (Nogmov). By the Russo-Turkish treaty of 1739 the two Ķabardas were proclaimed independent to constitute a buffer state between the two powers. By the treaty of Küčük-Kaynard̲j̲ī [*q.v.*] in 1774, Great and Little Ķabarda were placed under the suzerainty of the K̲h̲ān of the Crimea, whose independence was recognised. In 1782 the Turks occupied Taman, but by the edict of 8 April 1783, Catherine II proclaimed the annexation by Russia of the Crimea, Taman and the "Tatārs of Ķuban". On 28 December 1783, the Porte recognised the course of the Ķuban as the frontier. Between 1787 and 1791, the movement in the western Caucasus led by the religious leader S̲h̲ayk̲h̲ Manṣūr caused the Russians considerable trouble, but the Russo-Turkish treaty of Yassi (a town which owes its name to the Ās = Alān; cf. Tomaschek, in Pauly-Wissowa[2], i, 1282-4) confirmed the frontier of 1783. The treaty of 1829 moved it southwards to the roadstead of St. Nicolas (between Poti and Batum), but the territory within these bounds was only effectively occupied 32 years later after a stubborn and heroic resistance by the tribes of the Ķuban.

The line of defences of the Caucasus had been planned under the Empress Anna (1730-40). In 1777, the line started from Azov and went by Stavropol, Georgievsk to Ekaterinograd (on the Terek). In 1792, it began at Bug̲h̲az (north of Anapa) and following the Ķuban for a while, left it to go to Georgievsk (1794) and then 1798 to Ekaterinograd (cf. the map in the *Aktī kavk. ark̲h̲eogr. kommissii*, Tiflis 1868, i). In 1834 General Veliaminov established a military cordon on the left bank of the Ķuban as far as Gelend̲j̲ik on the Black Sea. In 1838 Novorossisk (Tsemes) was founded on the site of the old Turkish fortress of Sud̲j̲uk-Ķalʿa. After risings provoked by the operations of the allies in the Crimean War, General Yevdokimov in 1861 carried out an enveloping manoeuvre with the object of making the highlanders descend into the plains and of driving the rebels towards the coast to force them to migrate to Turkey. According to native sources (H. Bammate, in the *Revue Politique Internationale*, Nov.-Dec. 1918), 75,000 (?) refugees left the Caucasus in 1864; Russian sources give the number of emigrants at 13,586 from 1871 till 84. In 1864, the Russians reached the passes of the chain of the Western Caucasus.

Bibliography: Cf. the articles ABK̲H̲ĀZ, AZAĶ, ČERKES, and AL-ĶABĶ. Archaeology: E. H. Minns, *Scythians and Greeks*, Oxford 1913, 634-8 gives a complete bibliography; N. Rostovtzeff, *Iranians and Greeks in South Russia*, Oxford 1922. All the passages in classical authors relating to the Caucasus are in B. Latyschev, *Scythica et caucasica*

e veteribus scriptoribus graecis et latinis, in *Zap. Russ. Arkh. obshč.* (1890-1906). Similar passages in the Arabic geographers have been translated by N. Karaulov, *Sbornik materialov ... Kavkasa*, Tiflis, xxix, xxxi, xxxii, xxxviii (map). For the general bibliography, see Miansarov, *Bibliographia caucasica et transcaucasica*, St. Petersburg 1874-6, and Dubrovin in *Istorya voinï na Kavkase*, iii/1, St. Petersburg 1885-8. (V. Minorsky*)

ḲUBBA, the Arabic name used throughout the whole Muslim world for a tomb surmounted by a dome.

Purpose and significance. The term is applied to the thousands of simple local domed tombs of *shaykhs* and saints made by the people as well as to great mausoleums. The term *ḳubba* became established as a *pars pro toto* abbreviation for the domes of tombs, for which it is exclusively reserved. All the special names for sepulchral buildings, which vary with country and language as well as with the style of building and person interred, come under the generic name of *ḳubba*. The classical word *turba* was driven out of use by *ḳubba* until it was again popularised by the Turks. Just as we have *gunbād* for *ḳubba*, so we occasionally have *turbat* for *turba* in Iran. Tombs of saints which, along with tombs of princes, are almost the only material with which the history of art has to deal, have different names in different countries, and these usually also indicate different grades. The highest is the *mashhad*, which according to its etymology means a place where a *shahīd* is buried. "As a rule a *mashhad* is found only as the tomb of a martyr held in particular esteem, indeed of a saint endued with a semblance of divinity; but then the *mashhad* is not only a grave, but a memorial in the wider sense, which as a place of pilgrimage (*mazār*) attracts numerous visitors and has certain rites associated with it, that is to say, it is not a burial-place for any Muslim, but a tomb and also a place of worship for saints" (M. van Berchem, in E. Diez, *Churasanische Baudenkmäler* [to be quoted as *Ch. Bdkm.*], 89). The general term in Shīʿī lands for the tomb of a saint is *imām-zāde* or *shāh-zāde*. In lands where Arabic is spoken, these domed tombs are called *marbūṭ*, *shaykh*, *walī*, *nābī*, and as places of pilgrimage, *maḳām*.

Form, evolution and embellishment. The original form of the *ḳubba* is a square building covered by a dome, which evolved from the domed house of the peoples of the desert and became stereotyped as a monumental form. In the process, the very low-lying vaulting of the dwellinghouse, which is only a flat calotte rising from the cube of masonry, was raised. This evolution of a rounded vault into a round dome required the insertion of an octagonal intermediate story, the drum, and led in the interior to that development of the transitions from the square to the round dome which constitute the constructive and decorative charm of all Muslim domed chambers (pictures of round vaulting in Diez, *Kunst der islamischen Völker*¹, Berlin 1915, 79). This development began with primitive corbelling, then passed to simple spherical corner arcades or niches and in the end took its own way in West and East, as will be dealt with under the separate countries. Alongside of this typical orthodox normal form of *ḳubba*, which is found from the Maghrib to the eastern Asiatic steppes and India, special forms, which are described under the different countries, arose in the lands conquered by the Turkish peoples, such as northern Iran, Māzandarān, the lands of the Caucasus, Anatolia and Central Asia. The ornamentation of the buildings depended on the material and the systems of decorations in vogue in the different countries. So far and so long as brick predominated, we find also the primitive, probably almost always coloured, stucco covering, with which in Iran, and exceptionally also in Anatolia, is associated glaze, which gradually took the place of stucco. The stone buildings of the Ayyūbid and Mamlūk periods in Egypt and Syria, as well as in Anatolia and the Caucasus, attained their effects through alternating layers of colour and decoration in relief. The stone domes of the Cairo *ḳubbas* covered with geometrical patterns and scrolls rival the brightly decorated glazed domes of Iran.

We shall now deal with the form and development of the *ḳubba* in the various lands.

Maghrib. The *ḳubbas* or *marabūṭs* of the Maghrib are usually of uncertain age. Even the period of introduction of the different types is often difficuit to determine. Comparisons with the architectural forms, especially with the decoration of the great dated mosques, sometimes afford a clue. The types of the different countries have their origins in old forms of the sepulchres of the people. The Tunisian type A has derived its octagonal drum from the monumental style; the Algerian type B shows the combination of the original domed circular structure with the later rectangle, with the addition of the pinnacles indigenous to African native architecture; the western type C also found in Spain conceals the dome under the pyramid roof, which comes from building in wood and thus points to mountain valleys rich in wood and is a parallel phenomenon to the tomb of similar form in Māzandarān on the south shore of the Caspian Sea. Type D is found among the nomads of the high Algerian plateau and follows the local style of building in clay of the nomad territory, with the egg-shaped dome and the usually tapering lower structure.

In view of this undoubtedly popular origin of the *ḳubba*, we can hardly agree with the common assumption that the open type of *ḳubba*—a dome on four pillars—as represented in the Cubola in Palermo, is the oldest in the Maghrib (Marçais, *op. cit.*, 532). Several *ḳubbas* of the cemetery of Ḳayrawān might, according to Marçais, date from the same time as the domes of the Great Mosque (cf. Marçais, *op. cit.*, fig. 17). To the same group also appears to belong the *ḳubba* of Sidi el-Mazeri in Monastir which can be dated to the 6th/12th century.

In al-ʿUbbād al-Suflī ("the Lower") near Tlemcen, Algeria, there are still several pre-Marīnid *ḳubbas* (i.e.

before 591/1195) built of brick and pisé on four pillars with horse-shoe arches and semi-niche pendentives as arcades and octagonal domes (Marçais, *op. cit.*, fig. 310). The walls were either crowned with wreaths of pinnacles or with corner pinnacles. In the old cemetery of Sīdī Yaʿḳūb outside Tlemcen is the "Tomb of the Sulṭāna", the rounded arches in nine sections of which piercing the eight sides of the lower drum make a date in the early 7th/13th century certain. The octagonal drum made the arcades superfluous here. The Ḳbibat Benī Merīn ("Tombs of the Marīnids") in Shālla (Chella) near Rabat link up with the preceding type from Tlemcen. Here from 763-801/1361-98 were buried four successors of Abu 'l-Hasan ʿAlī. One of these *ḳubbas* has a quadrangular drum, pierced by four horse-shoe arches, and a dome with twelve sections. The arcades have again the form of semi-pendentives. The mausoleum of Abu 'l-Ḥasan there, the most splendid of the Marīnid tombs, has also a square drum with slightly deformed horse-shoe windows in three sides (H. Basset and E. Lévi-Provençal, *Chella, une nécropole mérinide*, in *Hespéris* [1922]; Marçais, *op. cit.*, 497). Next to these open *ḳubbas* just mentioned the closed *ḳubba* is by far the most frequent. These buildings have only one door, but within, three similarly formed blind-niches. This is the form of the *ḳubbas* of Sīdī Bū Medyen, the famous Spanish mystic, in Tlemcen which was already in existence in the 8th/14th century and restored at the end of the 18th century. The dome is divided inside by painting with intertwining bands into twelve sectors. The *ḳubba* in Tlemcen now called Sīdī Brāhīm was built by Sīdī Abū Hammū Mūsā II (753-88/1352-86). The interior walls with the usual blind-niches still possess their socles ornamented with glazes and their painted stucco relief. The dome divided into eight parts rests on Maghribī arcades in the form of semi-pendentives. These two last-named *ḳubbas* have pillared outer halls for the pilgrims. As elsewhere, in the Maghrib, particularly in Tunis, mosques and *madrasas* were rendered particularly sacred by the inclusion of a *ḳubba* (Marçais, *op. cit.*, 860).

Egypt. The oldest buildings of the *ḳubba* type in Cairo belong to the Fāṭimid period. The oldest is the *mashhad* built by Badr al-Djamālī, the builder of the second wall and its gates, and by his son al-Afḍal—the *mashhad* of al-Djuyūshī on the Muḳaṭṭam hills. *Amīr al-djuyūsh*, commander-in-chief of the army, was Badr's title. The date of the inscription was read as 478/1085 by van Berchem, *Notes d'archéologie arabe, I.*, in *JA* (1891), 478-9 = *Opera minora*, Geneva 1978, 144-5. The building consists of a rectangular chamber, roofed by a high arcaded dome raised on an octagonal drum and five cross-vaults, which opens into a little court with three arcades on which a minaret is built (picture in Glück-Diez, *Die Kunst des Islam*, Propyläen Kunstgeschichte, 159; M. S. Briggs, *Muhammadan architecture in Egypt and Palestine*, Oxford 1924, figs. 35-8).The tomb chamber, left of the cupola, encloses the tomb of an unknown saint, whom the natives call Sīdī Djuyūshī, and to which pilgrimage is made on certain days; van Berchem raises the question whether this is the tomb of Badr himself (*Notes*, 487-8 = *Opera minora*, 153-4; idem, *Une mosquée du temps des Fatimides*, in *Mems. de l'Inst. égyptien*, ii [1888], 605-19). In the domed chapel is a finely painted stucco *miḥrāb*. The transition from square to octagon is done with Persian single arcades which survive in Cairo down to the Ayyūbid period. Directly below the Djāmiʿ al-Djuyūshī at the foot of the Muḳaṭṭam hills in the Ḳarāfa is a building similar in plan and construction to the Mashhad on the Muḳaṭṭam, *Djāmiʿ Ikhwat Sidnā Yūsuf*. It has no court or minaret. The arches here again have the Persian profile characteristic of the Fāṭimid period as well as the cupola. This building again is not a mosque but a *ḳubba*. There are four small *ḳubbas* of this period in the Ḳarāfa near the *ḳubba* of Sīdī ʿUḳbā called by people *es-sabʿā banāt* "the seven daughters" (van Berchem, *Notes, loc. cit.*). These are small square buildings with octagonal drum and cupolas, originally seven, already mentioned by Maḳrīzī.

A *ḳubba* with tombs of ʿAbbāsid caliphs situated behind the renovated mausoleum of Sayyida Nafīsa in the south of Cairo shows the characteristic forms of the transition to the Ayyûbid style (van Berchem, *Notes. II.*, in *JA* [1892], repr., 20 ff.). A date 640/1243 in an inscription gives the *terminus ante*, which in view of the style of writing cannot be earlier than the beginning of the Ayyûbid period. Here the transition from square to octagonal drum is also produced through two series of *muḳarnas* [*q.v.*] niches which shows Turkish influence. This *ḳubba*, however, still follows Fāṭimid tradition as a brick building and in its stucco decoration. The profile of the cupola still retains its Persian form, indeed according to van Berchem, it is the only cupola of Cairo which still retains this cupola in completely characteristic fashion (*Notes. II.*, 21). From the Ayyūbid period also date the *ḳubbas* of Sulṭān Ṣāliḥ Nadjm al-Dīn Ayyûb of 647-8/1249-50 and of his widow Shadjarat al-Durr of 648/1250. These are rectangular buildings of stone with octagonal drum and a thin, eggshaped cupola with eight rectangular windows shooting up from it. Three keel-arched windows arranged in a triangle pierce each of the four principal sides of the drum. The façades of this *ḳubba* are ornamented with keel-arched flat niches and lozenge-shaped and circular shields decorated in stucco in the style of the Aḳmar mosque (519/1125) and other Fāṭimid buildings. In the interior, the transitions from the rectangular to the octagon are made with squinches and *muḳarnas*, the *miḥrābs* were decorated with rich ornament and framed above with keel-arched *muḳarnas* in the form of a fan (pictures in the volumes of the Comité de Conservation . . . , in R. L. Devonshire, *Some Cairo mosques and their founders*, London 1922, fig. 32 and Briggs, *Muhammadan architecture*, figs. 72-5).

With the Baḥrī Mamlūks (1250-1390) there began an increase in the height of the cupola by raising the drum, as could be seen in the ruins still standing in the early 20th century of the *ḳubbas* of the family of Sulṭān Ḳalāwūn (678-89/1279-90) (Diez, *Kunst d. isl. Völker*, figs. 187 and 153). The two *ḳubbas*, which were associated with *madrasas*, had rectangular substructures of stone with an octagonal drum of brick like those of the great mausoleums of Ḳalāwūn and al-Nāṣir Muḥammad. The two domes fell in and one was renovated. The interior of the drum had stepped recess niches with pillars from ancient buildings, but was otherwise bare. The substructures had windows of brick with pointed arches set into the stone walls, the fluted frames of which were decorated with stucco. The Syrian stone and the local brick technique here encountered one another. With these ruins the last remnants of the *ḳubba* of the Baḥrī Mamlūks disappeared. The *ḳubba* of Ḳalāwūn himself is an exception; he had it built after the model of the Ḳubbat al-Ṣakhra [*q.v.*] in Jerusalem, and therefore it is outside of the regular line of development. It also fell in, and was given a wooden cupola. In the

Baḥrī period, the melon cupola also appears in Cairo.

The *ḳubba* of Zayn al-Dīn Yūsuf, a Ṣūfī *shaykh* of the line of the Banū Umayya, of 697/1298, is one of the most beautiful *ḳubbas* of Cairo, unfortunately much damaged in the interior by fire. The outside shows polygonal bevelling of the squinch area, a drum full of windows with a richly decorated calligraphic frieze about it, and a melon dome divided into numerous compartments. All the compartments and windows are framed in bands of stucco. The interior of the drum zone is broken up into richly ornamented, formerly painted, *muḳarnas* (picture in Briggs, *op. cit.*, 73). On this rests a dome of 28 segments, the ribs of which are decorated with sprigs of leaves in relief and it is beautifully adorned at top and bottom by inscriptions (picture in Devonshire, *op. cit.*, 42). If the influence of the Central Asian style was already seen in the melon cupola of the *ḳubba* just considered, it became more and more powerful in the raising of the cupola, the drums of which were no longer borne by Persian squinches and the cell-work evolved from it, but by Turkish triangular consoles and their numerous interruptions and combinations with *muḳarnas* honeycomb. The internal transition by means of such stereometric structures is henceforth shown outside also in triangular bevellings of the corners of the drum storey. The dome is in the shape of a helmet and is placed like a helmet on the drum. The external decoration of these domes with network patterns of all kinds in high relief carved in glazed stone is one of the peculiarities of Cairo. The older so-called "Tombs of the Mamlūks" and the later so-called "Tombs of the caliphs" all belong to the second Mamlūk period and are similar.

Lists of the *ḳubbas* of Cairo are given in K. A. C. Creswell, *A brief chronology*, in *BIFAO*, xvi, and Devonshire, *op. cit.*, 123-7.

Syria. According to Wulzinger's list, there are still in Damascus and its neighbourhood over a hundred *ḳubbas*, which are there called *turba* and *walī* and are usually connected with small *madrasas* or *djāmiʿs*. The general form is the same as everywhere else: a quadrangular-cubic building with a squinch storey, a window storey and dome. Nothing has survived from the Umayyad period. It was only under the Zangids and their successors the Ayyūbids that architecture began to flourish again. As, however, the sepulchral dome over the Nūriyya *madrasa*, with its clusters of cells shows, architecture on the larger scale under Nūr al-Dīn b. Zangī was still dependent on other lands, and in this case imitated the Mesopotamian form (F. K. Wulzinger and C. Watzinger, *Damaskus, die antike und die islamische Stadt*, Berlin 1921-4, ii, pl. 4b). Saladīn's *ḳubba* above the ʿAzīziyya *madrasa* has a rather too small dome above the heavy substructure.

From the period of the Baḥrī Mamlūks, 1250-1390, many *turbas* still exist which are described by Wulzinger and Watzinger. Through the Crusaders, the Syrians learned to work in a way suitable to dressed stone. "A touch of Gothic, even in so far as the artistic side, the idea, the aesthetic norm is concerned, becomes perceptible in the time of Baybars, indeed half a century earlier, just as in Egypt. The dome now rises with still greater vigour, the drum becomes higher and the silhouette steeper ... In particular, the portal niche now becomes high and steep" (Wulzinger and Watzinger, 7). In keeping with this towering tendency, the *turba* of Rukn al-Dīn of 621/1224, which has a *masdjid* associated with it, has already two transitional stories on a square substructure, one octagonal with Persian concave squinches and the other 16-sided with windows, and a melon-shaped dome above (Wulzinger and Watzinger, fig. 42, pl. 8c and 9b). Very similar is the *turba* of ʿIzz al-Dīn of 626/1228-9 and several others (Wulzinger and Watzinger, pl. 9a, figs. 34, 35; pl. 7b, pl. 10a). A more modest type is represented by the Ḳilidjiyya *turba* of 645/1247 built along with a *madrasa* for Sayf al-Dīn Ḳilidj al-Nūrī. As frequently in Syria, there were originally here two domes separated by a gateway, but of the western one nothing has survived. Here one squinch-area was sufficient, since with the help of pendentive consoles the transition was made direct from the quadrilateral to the duodecagon, and then by twelve triangular consoles, which are placed in the spandrels of the twelve pointed drum windows, the round base of the dome was reached (Wulzinger and Watzinger, figs. 10-12; cf. also fig. 47). Open *ḳubbas* with four great gate arches are also found in the 7th/13th century (Wulzinger and Watzinger, pl. 7c). As an example of rich inner decoration with stucco-relief may be mentioned the al-Ṣāliḥiyya *turba* of the 7th/13th century (Wulzinger and Watzinger, pl. 12).

As in Egypt, so also in Syria under the Circassian Mamlūks, the architectural form rapidly lost vigour, and was replaced by a fondness for decorative detail (Wulzinger and Watzinger, 10). The exterior was brightened, as in Cairo, by the use of stones of many colours, which were also arranged in ornamental patterns. The dome shows a further tendency to increase in height. The Ṭāwūsiyya of 784/1382 betrays a marked slackening in creative power by its two window-storeys directly opposite and externally exactly like one another (Wulzinger and Watzinger, pl. 22b). As the al-Turīzī *ḳubba* of 828/1424-5 shows, there are no further changes internally in the transition from square to octagon and sixteen-sided figure (Wulzinger and Watzinger, pl. 28a). The rich dome *muḳarnas* of Egypt is not to be found in Syria, and it remained here confined to the niches of the gateway. Outside of Damascus we may mention the double dome of Khayrbek in Aleppo, also known as the *ḳubba* of Shaykh ʿAlī and Ḳāʾit-Bay, of 924/1518 (Gluck-Diez, *op. cit.*, 189 and Devonshire, *op. cit.*, 106).

The Ottoman *türbes* from 1517 A.D. offer, as in Egypt, little of interest and little variety. They are, as the *türbe* of Darwīsh Pasha of 987/1579 shows, mainly octagonal with two drum storeys in the lower of which the corners are still decoratively rounded off with niches, although they are now functionally superfluous (Wulzinger and Watzinger, pl. 55).

Asia Minor and Armenia. In Saldjūḳ Anatolia more than in other countries, the association of *madrasas* with the sepulchral domes of the founders was the rule. In Ḳonya and the towns under its influence, such as Aḳsaray, we find in the open *madrasas*, as in those with domes courts, at each side of the *ḳibla-īwān* in the main axis behind the court a domed chamber, one of which is usually used as a tomb, the other as a lecture room; exceptionally both are tombs (Indje Minareli; cf. MASDJID, Architecture). In Ḳonya the transition to the dome is made partly still by fanshaped trihedral consoles and partly by salient and re-entrant friezes of trihedral consoles (Ḳara Ṭāʾiʿ, 649/1251-2), Indje Minareli, 650-684/1252-85, Sirdjeli Medrese, 641/1243-4). The earliest, still clumsy, trihedral console friezes shrink in the course of development to narrower, ornamental friezes. This abstract stereometric rounding-off of the angles was brought by Turkish architects from Central Asia where they had developed it in wood-

work. In the more eastern Anatolian towns like Nigde, Ḳayṣariyya etc., the system of transition with arcades, most used in Iran and Syria, predominates. In addition to those already mentioned, attention may be called in Ḳonya to the *turba* of Fak̲h̲r al-Dīn ʿAlī (666-82/1267-83) which was also built as a *madrasa* with two domed sepulchral chambers (cf. F. Sarre, *Konia*, reprinted from *Persische Baudenkmaler*). The independent *ḳubba*, usually called *turba* or *gunbād*, also *minareli*, forms in Anatolia and Armenia a uniform group of tent-like buildings, mainly of stone, polygonal in Asia Minor, round in Armenia, with pyramidal or conical roofs.

A list of the more important *turba*s, so far as they have been published, follows. In Ḳayṣariyya: Čifte Günbed, 645/1247; Döner Günbed, 675/1276; Sird̲j̲eli Günbed, 750/1349; ʿAlī D̲j̲aʿfar, 750/1349; Amīr ʿAlī, 751/1350, all of stone, octagonal with pyramidal roof, except the last named which is square (cf. A. Gabriel, *Monuments turcs d'Anatolie*). The transition from the polygon to the round dome is here usually effected through rows of pointed arches. The Kös̲h̲-Madrasa in the same town (740/1339-40) has an octagonal *turba* standing in its court. The mosque of Lala Pas̲h̲a has an octagonal *turba* of the 8th/14th century built on to it. In Nigde the mosque of Sunḳur Bey has an octagonal *turba* of the year 620/1223 added to it. Outside of the town stands the octagonal *turba* of K̲h̲udābanda (712/1312-13); there are also several undated *turba*s in the vicinity (Gabriel, *op. cit.*). In Sīwās is the octagonal *turba* of Ḥusayn b. D̲j̲aʿfar of 629/1231-2) and the square one of S̲h̲ayk̲h̲ Ḥasan Beg (Guduk Minâre) of 748/1347 (cf. van Berchem, *Matériaux pour un Corpus . . . , Asie Mineure*, i, 17 and 39, pl. ii). In Diwrigi are the octagons of Amīr Kamāl al-Dīn, 529/1134-5 and of Amīr S̲h̲āhāns̲h̲āh (Sayyida Malik), 529/1134-5, also an anonymous *turba* (van Berchem, *op. cit.*, 94, pl. xli). In Tekke, a village near Zara-Diwrigi, is the undated *turba* of S̲h̲ayk̲h̲ Marzubān. In Beys̲h̲ehir the As̲h̲raf Rūm D̲j̲āmiʿ has a square *turba* attached to it with a conical roof, the inner dome of which is decorated with unglazed mosaic such as we occasionally find in Ḳonya. These stone *turba*s are usually decorated on the outside with bands of relief and in the entrance doorway with *muḳarnas* lunettes. Of the *turba*s in Aḳs̲h̲ehir, Sarre mentions that of Sayyid Maḥmūd, 621/1224 (*Kleinasien*, 22; Cl. Huart, *Epigraphie arabe d'Asie Mineure*, in *Revue sémitique* [1894-5]).

In Armenia there are several *turba*s of structural interest by Lake Van. They are cylindrical, like most northern Iranian sepulchral towers, with cement walls faced with hewn stone in the Armenian tradition, and occupy a special position in view of their subterranean tombs. The latter are vaulted on a square base and have concealed entrances. The interior chambers vaulted with pointed arched domes are therefore above the level of the ground, reached by steps and used as chapels. These sepulchral towers have further four entrances facing the four quarters with *muḳarnas* lunettes. The exterior is decorated with arcades in relief and Armenian two-sided niches with friezes of *muḳarnas* at the top. The combination of Turco-Islamic and Armenian traditions of structure constitutes their particular charm. The three great *turba*s in Ak̲h̲lāṭ date from the end of the 7th/13th century, the small one from 862/1457-8, the *turba* in Vostan from 736/1334-5 (cf. W. Bachmann, *Kirchen und Moscheen in Armenien und Kurdistan*, 1913; Diez, *Kunst d. isl. Völker*, fig. 156 f., 118 f.).

Ottoman Turkey. The building of *turba*s continued under the rule of the Ottomans without, however, new types of artistic interest being created. The polygonal shape continues. The buildings show a stereometrically clear articulation of the façades, with triads of windows with pointed arches framed by straight lines. The often too large number of windows and the glazing of the windows make these *turba*s as a rule look plain and practical. In addition, the inner chambers lose in atmosphere by being too well lit and overfilled with sarcophagi. To give a list of the monuments by name seems hardly worth while here, in view of their large number and uniformity, as well as their lack of significance in the history of art; see on them G. Goodwin, *A history of Ottoman architecture*, London 1971.

ʿIrāḳ, Iran and Central Asia. In ʿIrāḳ and Iran the normal type of *ḳubba* was preceded by indigenous tomb-buildings. In ʿIrāḳ these are the polygonal tombs with *muḳarnas* domes above them, of which the best known example is the tomb of Sayyida Zubayda near Bag̲h̲dād. Others are al-Nad̲j̲mī, al-Asiba, Imām Dūr, Imāmzāde Tuil, etc. This type was also taken to Ḳūm (figs. in Sarre-Herzfeld, *Archäologische Reise im Euphrat- und Tigris-Gebiet*, Berlin 1911-20; Sarre, *Persische Baudenkmäler*; Diez, *Kunst d. isl. Völker*, 100-202; or p. 20, 72-74 and MUḲARNAS). Ḳum [*q.v.*], as one of the holy places of Iran since an early date, still offers, with its 16 *ḳubba*s still standing, the most fruitful source for the study of this type in Iran. They are almost all octagonal with an inner dome, which is covered over by a polygonal tent roof. With one exception, they are built of red brick and have roofs of blue glaze. They date from the 6th/12th to the 10th/16th centuries. They are S̲h̲āhzāde Ibrāhīm, an octagonal domed building with eight high deep niches, a Sald̲j̲ūḳ (?) precursor of the similar Ṣafawid type (K̲h̲ōd̲j̲a Rabīʿ); S̲h̲āhzāde Ibrāhīm near the Kās̲h̲ān Gate of 721/1321 and restored in 805/1402; S̲h̲āhzāde Ismāʿīl 776/1374; ʿAlī b. D̲j̲aʿfar 740/1339; ʿAlī b. Abi 'l-Maʿālī near the Kās̲h̲ān Gate 761/1359; K̲h̲ōd̲j̲a ʿImād al-Dīn near the Kās̲h̲ān Gate 792/1389; K̲h̲ōd̲j̲a D̲j̲amāl al-Dīn near the Kās̲h̲ān Gate; S̲h̲āh Sayyid ʿAlī outside the Rayy Gate; S̲h̲āhzāde Aḥmad outside the Rayy Gate; S̲h̲ahār Imām-zāde outside the Rayy Gate; S̲h̲āhzāde D̲j̲aʿfar 707/1307; S̲h̲āhzāde Aḥmad (K̲h̲āk-i Farad̲j̲); S̲h̲āhzāde Aḥmad Ḳāsim; Čihil Ak̲h̲tarān 905/1499; S̲h̲āhzāde Ḥamza; S̲h̲āhzāde ʿAbd Allāh (A. U. Pope, *Preliminary report on the tombs of the saints at Qumm*, in *Bull. of the Amer. Inst. for Persian Art and Archaeology*, iv/1 [1935]). The Imām-zāde Karrār in Buzūn dated 528/1134 east of Iṣfahān was published by M. B. Smith and E. Herzfeld (*Arch. Mitt. aus Iran*, vii [1935]). It contains splendid stucco decoration. In northern Iran along the Elburz chain, much more frequently than the normal *ḳubba* we find in the period of the 4th/10th to the 7th/13th centuries cylindrical sepulchral towers of brick, usually called *mīl* or *gumbād*: D̲j̲urd̲j̲ān, Rayy, Radkān, Dāmg̲h̲ān, Demāwend, Kis̲h̲mar, Wārāmīn, Nak̲h̲čewān, Marāg̲h̲a, Bistām, etc. (figs. in Sarre, *op. cit.*; Diez, *Chur. Bdkm.* and *Kunst d. isl. Völker*, etc.).

The type is found with variations beyond Iran as far as K̲h̲ʷārazm (Old Urgend̲j̲), although the norm in Central Asia is the domed *ḳubba*. These towers are mediaeval descendants of the very ancient Central Asian tombs, which were built by the sometimes nomadic, sometimes settled peoples of the steppes for their tribal chiefs and leaders. In form they are to be interpreted as a rendering of the prince's tent of the nomadic peoples in monumental form and sometimes they copy its textile character (cf. Diez, *Persien*,

islamische Baukunst in Churasan, 1923, 51-5, 73 ff.; R. Hillenbrand, *The tomb towers of Iran to 1550*, Oxford D. Phil. thesis 1974, unpublished). A particular type which is closer to that of the normal *ḳubba* developed in the province of Māzandarān on the southern shore of the Caspian Sea. These are quadrangular and polygonal brick buildings, with pyramidal tower-roofs mainly belonging to the 7th-8th/13th-14th centuries and are undoubtedly descendants of an older native type of wooden building (figs. in Sarre, *Persische Baudenkmäler*; Diez, *Kunst d. isl. Völker*, figs. 98, 99 or 73.) The *ḳubba* proper was already latent in the old square building of stone with squinch dome, with which, however, it has nothing genetically to do. The few Sāsānid domed buildings of this kind that have survived are simply monumental examples of a much older Īrānian type of house (cf. the eastern Iranian, Sāsānid domed building Ribāṭ Sefīd in Diez, *Persien*, fig. 1). Domed buildings of the *ḳubba* were probably already in use as fire-temples in the pre-Islamic period.

The oldest *ḳubba* in ʿIrāḳ is, if Herzfeld's ascription is correct, the Ḳubbat al-Ṣulaybiyya in Sāmarrā, which deserves our attention as the domed sepulchre of the caliph al-Muntaṣir, in which al-Muʿtazz and al-Muhtadī were perhaps also buried, as three graves were found: a domed building quadrangular in the interior, while outside the corners were cut off by the corridor-like octagonal pathway round it. The transition to the (now destroyed) dome was made by an octagonal series of squinches with niches, of which only fragments survive. There are four gates at the ends of the axes. The building followed the Ḳubbat al-Ṣak͟hra in Jerusalem and its Christian predecessors (cf. E. Herzfeld, *Erster Bericht ... von Samarra*, Berlin 1912, 28-31; Sarre-Herzfeld, *Arch. Reise im Euphrat- u. Tigrisgebiet*, i, 83-6).

The oldest remaining *ḳubbas* in Central Asia and Iran date from the 3rd/9th century, and in contrast to Sāsānid domes, show an innovation in construction which opened up new possibilities of development: the corners are bridged over with keel arches instead of with the clumsy, funnel-shaped squinches proper. These, in smaller buildings, as in the *ḳubba* in Sāngbāst, might be closed up with a filling of bricks arranged in a pattern, in larger buildings left open to the gallery passage behind, whereby the intramural passage which already existed in the great Sāsānid domes in Fārs in the squinch storey was now made visible for the first time and given an aesthetic function for the inner articulation of the chamber and the external articulation of the façades. The oldest *ḳubba* still preserved is the tomb of Ismāʿīl b. Aḥmad Sāmānī in Buk͟hārā of 296/907; the most celebrated and largest is the *turba*—as Yāḳūt calls it—of the Saldjūḳ Sultan Sand͟jar (511-52/1117-57) in Marw. The building is of colossal dimensions. The square lower part, with walls 20 feet thick and sides 90 feet long, is 45 feet high and is crowned outside by a gallery 17 feet high, behind which rises the drum with the dome, originally covered with blue glaze, to a height of about 100 feet. The drum shows signs of its original concealment by a wall of niches, in the empty niches of which only the Buddhist idols are lacking to complete the resemblance to the stupas of similar structure—for example in Balk͟h which is not far away. The direct connection between this decoration of the exterior of the *ḳubba* and the equally imposing stupas is undoubted. The gallery is ornamented with reliefs in brick and stucco. The interior walls are painted with ornamental designs, and have a frieze in Kūfic script around the top. The keel arches bridging the corners connect the chamber with the gallery. Similar windows pierce the walls in the central axes. The spandrels between these eight windows in the zone of transition are decorated with *muḳarnas*. The vaulting of the dome which towers above this is adorned with ribbed arches arranged in fan-shaped and criss-cross patterns in plaster, a method of giving the dome a spheroidal shape, which in later buildings came to be painted and filled in with tendril patterns (Diez, *Persien*, etc., 93 f.; E. Cohn-Wiener, *Das Mausoleum des Sultan Sandjar*, in *Jb. d. As. Kunst*, xi/1, 925; idem, *Turan, Islamische Baukunst in Mittelasien*, Berlin 1930).

In Old Sarak͟hs on the Harī Rūd in the modern Turkmenistan S.S.R. is a *ḳubba* similar in construction, but on a more modest scale (V. Zhukovskii, *Rasvalini Starago Merva*, fig. 33). Two others in the region of the Murg͟hāb and Zarafs͟han oases are Talk͟hatan Bābā and Mazār Sulṭān Ismāʿīl in Buk͟hārā, both of the 6th/12th century (Zhukovskii, *op. cit.*, figs. 30-2). Their squinches are still funnel-shaped like the Sāsānid ones and without a gallery. Like the tomb of Sand͟jar, they are distinguished by their brick ornamentation and are evidence of a native pure brick style of a vigorous character in the Marw oasis area, of which Cohn-Wiener gives examples in his book. The small *ḳubba* with its richly decorated interior belonging to the former Ribāṭ of Sāngbāst in Mas͟hhad is probably an outlier of this style on the Iranian highlands (Diez, *Churasanische Baudenkmäler*, 52 f., pls. 14-18; Glüeck and Diez, *Die Kunst des Islam*, 292-3). The *ḳubba* of Sandjar opens the important series of Central Asian-Iranian mausoleum *ḳubbas* of the 7th-11th/13th-17th centuries. If the emancipation of the squinches from the body of the dome and their becoming independent in an intermediate storey was the first step in this development, the second is the emancipation of the gallery storey from the squinch area. We see the process completed in the *ḳubba* of New Sarak͟hs on the Persian side of the Harī Rūd, which was restored in the 8th/14th century, but probably dates from the beginning of the 7th/13th century (Diez, *Chur. Bdkm.*, 62 ff., pls. 20-2; Glüeck and Diez, *op. cit.*, 291). Here the gallery is included in the lower structure which makes the latter, and also the dome, higher. The dome is still resting on a square substructure with an octagonal drum formed by corner arches. This intermediate storey, however, no longer plays an important part in the articulation. It has already disappeared in the *ḳubba* of Ṭūs almost contemporary with that of Sarak͟hs (Diez, *Chur. Bdkm.*, 55, pls. 19-20; idem, *Kunst d. isl. Völker*, coloured plate; idem, *Persien, Bauk. in Chur.*, fig. 40; Glüeck and Diez, *op. cit.*, 291). In Ṭūs the four interior niches of the square main course have become broader, and these now become broader still. They were also made higher than before and linked up by a common framework with the niches above (cf. *Chur. Bdkm.*, fig. 26, section). The four corner arches rising out of the squinches which make the transition from the square to the octagon are now also included by a common framework in the main body of the building, so that they no longer form as before a separate intermediate storey but bring about the change from square to octagon within the main storey. Formally, this is a fusion with combined effect, i.e. a step towards the decorative Islamisation of the interior. The development of the gallery as a factor in shaping the interior was thus more or less brought to an end. As Ṭūs is not dated (8th/14th century?), we cannot fix the time relation of this *ḳubba* with the Western

Persian one of Sulṭān Muḥammad Öldjeytü Khudābanda (703-16/1304-16) in Sulṭāniyya. In the interval, a variant had established itself there, the object of which was to transfer the gallery to the outside, an aim latent since the *ḳubba* of Sandjar. We really have here a type of building of a different, namely octagonal, shape which, as Texier has already pointed out, was an Indian variant imitated in Iran. The interior gallery with corridor has here become a series of separate windows which resemble in shape and size the eight doorways below, so that two stories of equal size are created within, which gives the interior an effect of massive calm. On the other hand, a staircase within the wall leads up to a gallery above the window storey, which opens to the outside only and can no longer be regarded as an interior gallery. Equally peculiar are the eight minaret-like pillars which are placed at the corners of the roof terrace to buttress the dome (cf. the illustrations in *Kunst d. isl. Völker* and Dieulafoy and Sarre's sketches in *Pers. Bdkm.*). We shall return to this type of *ḳubba* in the section on India. Another *ḳubba*, the only one of its kind in Iran, is the Djabal-i Sāng near Kirmān, an octagonal building of cement with dome and drum of brick, which resembles the Syrian *turba*s (Diez, *Persien*, etc., 97 and fig. at p. 79; Creswell, *Persian domes before 1400 A.D.*, in *Burlington Magazine*, xxii [1915], 208, pl. 2). With the sepulchral dome of Öldjeytü, the *ḳubba* in Iran reached the considerable height of 165 feet.

Alongside of this line of development in construction, there was a second which began probably as early as the Saldjūḳ, but certainly in the Tīmūrid period; this aimed at the same object, the raising of the height of the dome, and attained it by other means, namely by a drum and double-shelled dome. In both cases, the aim is not so much to raise the height of the interior chamber as to give a towering effect to the exterior. For the inner shell of the dome makes the interior much lower than would appear from the outer shell. The Ḳubba-yi Sābz in Kirmān is the oldest—at latest dating from the middle of the 7th/13th century—sepulchral tomb of this kind (Diez, *Kunst d. isl. Völker*, fig. 115). The models for these towered domes may possibly be found in the equally towerlike stupas of Afghānistān and the Tarim basin, with domes built one above the other and chambers between them. Tīmūr's *ḳubba*, the Gūr-i Mīr in Samarḳand of 808/1405, the dome of which structurally resembles the Ḳubba-yi Sābz, is the next monument of this style still standing; after it come the *ḳubba*s of the Tīmūrids at Shāh Zinda near Samarḳand and others in Herāt and Turkestān (Diez, *Kunst d. isl. Völker*, fig. 116, 119; J. M. Rogers, tr., *V. V. Barthold's article O pogrebenii Timura* ("*The burial of Tīmūr*"), in *Iran, Jnal. of the BIPS*, xii [1974], 65-87). Gūr-i Mīr has, it is true, a gallery, but this no longer opens on to the interior by open niches, piercing the wall, but only through grilles, which are in the plane of the wall, is it possible from the passage within the wall to get a glimpse of the interior, an innovation of decisive importance in the layout of the latter. In and around Herāt there were once many *ḳubba*s, of which only two still exist (Niedermayer-Diez, *Afghanistan*, figs. 163, 164); others east of Herāt (figs. 182-4).

The last phase of evolution in Iran was reached in the Ṣafawid period. The very similar memorial buildings of Khōdja Rabīʿ of 1030/1621 near Mashhad and Ḳadam-gāh of 1091/1680 east of Nīshāpūr (*Chur. Bdkm.*, pls. 23, 39) are octagonal *ḳubba*s with galleries, which open to the outside in four great corner niches. These buildings seem to have their origin in the Persian garden pavilion, as a comparison with the Hasht Bihisht in Iṣfahān shows. But the idea of using garden pavilions as memorial buildings again comes from India. We may here mention also the *ḳubba* of Shaykh Djām which has a court mosque and *madrasa* adjoining in Turbat-i Shaykh Djām near the Afghān frontier, as an example of a *mazār* on a large scale (Diez, *Chur. Bdkm.*, 78 ff., pls. 35-7). The largest place of pilgrimage of this kind is the sanctuary of the Imām Riḍā in Mashhad, with the domed sepulchre of the Imām (Diez, *Persien*, etc., figs. 44-56). In Afghānistān, the *mazār*s of Khōdja Akashi in Balkh and Mazār-i Sharīf, with domed tombs, may be mentioned (O. Niedermayer-Diez, *Afghanistan*, 64 ff.).

India. The first Muslim dynasty to reign exclusively in India was descended from Ḳuṭb al-Dīn Aybak [*q.v.*], a former slave of Muḥammad Ghūrī who was installed by his master as viceroy in Dihlī and on the latter's death declared himself independent (602/1206). It is only with this dynasty of the "Slave Kings" or Sulṭāns of Dihlī that monumental Muslim architecture begins in India. Nothing has survived of earlier buildings, which were probably built of perishable material. From the 7th/13th century, however, the building of tombs in the Muslim regions of India becomes important, and in keeping with the great expansion of Islām over the vast peninsula there are still in India far more *ḳubba*s than in the other lands of Islām. The influences interacting within the peninsula were very varied; the main genetic principle in the style of the *ḳubba*, as for all Indian Muslim architecture, can therefore only be said to be the combination of foreign and native Arabo-Turkish-Persian and Indian, traditions. The amalgamation of these two traditions, which found expression in material, technique, shape and form, resulted in the manifold variations of the Indian types of *ḳubba*.

In the course of the general development, we can distinguish some ten different phases of style, or local styles (and when we use the word "local" we must remember the great scale of India). Sir Alexander Cunningham distinguished the following styles (*Archaeological survey of India, Reports*, iii, iv): 1. The Indo-Turkish, which began with the Slave Kings dynasty, with pointed or overlapping arches of corbelled horizontal layers, i.e. still using the old Indian technique of vaulting, and with rich decoration in relief in stone: tomb of Sulṭān Iltutmish in Dihlī (*Kunst d. isl. Völker*, fig. 228, 187). 2. The style of the Khaldjīs of the second dynasty (689-720/1290-1320), or decorated Turkish style with horseshoe arches of radiating layers and rich ornamentation. 3. The Tughluḳid, called after the third Turkish dynasty (720-817/1320-1414), with sloping, very thick walls and cusped horseshoe arches. The domes rest on low drums and the walls of red limestone are panelled with white marble frames: *ḳubba* of Tughluḳ Shāh in Tughluḳābād (*op. cit.*, fig. 226, 168); also brick buildings inlaid with glazed bricks: sepulchral dome of Rukn al-Dawla in Multān. Later, we have still thicker walls without arches and inlay but with a covering of stucco, which was probably decorated and painted: *ḳubba* of Fīrūz Shāh in Fīrūzābād. 4. The Afghān style, called after the Afghān dynasties (Sayyids, Lodīs and Sūrīs) (817-962/1414-1555) with perpendicular walls; mostly octagonal mausoleums with arcades: tomb of Shēr Shāh (*op. cit.*, fig. 224, 173); decorated with coloured stucco or with strips of glaze: *ḳubba* of Bahlūl Lōdī near Čirak-Dihlī; the octagonal mausoleums of

Sikandar in Old Khayrpur and others in Mubārakpur-Kotila and Khayrpur. Later, a coating of different coloured stones was preferred to the covering of stucco: mausoleums of Shēr Shāh and Ḥusayn Khān in Sahsarām. 5. The Turkish style in Bengal, an independent provincial style; squat buildings of brick sometimes decorated with minute faïence work: tombs in Ḥaḍrat Pandua (769/1368) and Gawr with curved brick roofs. 6. The Turkish style of the Sharḳids in Djawnpūr (796-883/1394-1479) a provincial style similar to (1) and (2): tombs in Djawnpūr. 7. The early Mughal style comprises the buildings of the reigns of Akbar and Djahāngīr (963-1037/1556-1628). With the tomb of Humāyūn, finished in 980/1572, the Persian style established itself. In Akbar's tomb it again makes way for the Indian (here the old vihāra type) to reappear in Djahāngīr's tomb in Lahore—in the faïence which decorates it, at least (*ca.* 1039/1630). Red sandstone is the material preferred. 8. The late Mughal style under Shāh Djahān (1037-68/1628-57) finds its most brilliant manifestation in the Tādj Maḥall, which shows the Indian and Persian traditions in perfect union.

To this list may be added: 9. The Deccan style, which covers the numerous sepulchral domes and around the old capital on the plateau of the Deccan, although they show as many varieties as localities and are only variations of the north Indian sepulchral domes of the Turkish dynasties who founded Muslim rule in the Deccan. ʿAlāʾ al-Dīn Muḥammad Shāh of Dihlī was the first to establish himself here in 693/1294. Half a century later the Bahmanids succeeded in bringing the northern half of the Deccan under their rule (748-934/1347-1527). Their capital was Gulbargā [*q.v.*]. At the end of the 9th/15th century began the division of the Deccan under five dynasties: the ʿImād Shāhs in Berār (890-980/1485-1572), the Niẓām Shāhs (897-1028/1492-1619) in Bīdar, the ʿĀdil Shāhs (895-1097/1490-1686) in Bīdjāpūr and the Ḳuṭb Shāhs (918-1098/1512-1687) in Golkondā. The most important sites for the study of the architecture are Gulbargā, the oldest capital, then Bīdjāpūr, Bīdar and Golkondā; Bīdjāpūr, "the Palmyra of the Deccan", stands out from all for the richness and size of the buildings. The shape common to all domed tombs is here as in northern India a square building with a dome. Some of them, like the Ibrāhīm Rawḍa, the mausoleum of Ibrāhīm II (987-1036/1579-1626), and the incomplete ʿAlī II Rawḍa of the last ʿĀdil Shāh in Bīdjāpūr, are enclosed by long terraced arcades. Almost all the old buildings in the Deccan are built of hewn stone; in Bīdjāpūr and elsewhere also we frequently find a reddish-brown basalt. The transition from the square to the dome was here again effected from the transition zone with corner arches to a kind of folding of the wall by means of crossing pendentive-like arches which led direct to the round of the dome without an intervening course. By far the largest of these tombs, indeed the largest *ḳubba* in the world, is that of Muḥammad ʿĀdil Shāh (1036-70/1626-60), the celebrated Gul Gumbād in Bīdjāpūr (pictures in *Kunst d. isl. Völker*, 223 and 171; *Die Kunst des Islam*, 319 and many other works); a square building with an interior diameter of 150 feet, i.e. larger than the interior of the Pantheon (110 feet). The interior narrows towards the top through a system of intersecting pendentives to a circular basis of about 105 feet in diameter on which rises the dome—leaving an inner gallery open—about 130 feet in diameter; the interior height is nearly 200 feet and the exterior 220 feet. The weight presses inwards through the pendentives, but is counteracted by the weight of the dome, so that it was not necessary to counteract any outward pressure by massive walls.

In Gulbargā, which was the capital of the Bahmanids (748-920/1347-1514), still stand the simple *ḳubbas* of the early rulers of this dynasty, among them the tomb—here reproduced—of its founder Ḥasan Gangū ʿAlāʾ al-Dīn (748-59/1347-58). The *ḳubbas* of the later Bahmanids from Aḥmad Shāh Walī onwards (825-39/1422-36) are at Bīdar and are already much larger and sometimes richly decorated, especially the mausoleum of Aḥmad Shāh. The square building is transformed to the round by keel arches at the corners. The interior walls are brought into rhythm by three flat niches on each, of which the central ones on the north-south axis are opened as doors. The central niche on the west is deepened to form a pentagonal *miḥrāb*. The niches are flanked with Indian pilasters. The painting of the interior is undoubtedly of later origin, but the old designs may survive in places. The painting of the dome resembles that of Khōdja Rabīʿ (in Khurāsān; see above), as does the frieze of inscription. Almost as large as that just mentioned, but without decoration in the interior, is the *ḳubba* of Maḥmūd Shāh II (887-924/1482-1518). To this group also belongs an octagonal tomb without dome, obviously unfinished, which resembles the mausoleum of Khudābanda Shāh in Sulṭāniyya (Persia) and was built for Shāh Khalīl Allāh Ḥusayn, the iconoclast and saint, son of the tutor of Aḥmad Shāh Bahman. The tombs of the Barīdīs who followed the Bahmanids are open *ḳubbas* standing on pillars.

The fine city of tombs of the Ḳuṭb Shāhīs of Golkondā lies outside the town in a large walled garden, the *ḳubbas* of the last rulers of the dynasty, ʿAbd Allāh (1045-83/1635-72) and of Abu 'l-Ḥasan (1083-98/1672-87), who died in Mughal captivity, built only up to the dome, outside the walls. The cubic buildings are sometimes surrounded by galleries of arcades as in Bīdjāpūr. The bulbous domes rise out of a lotus pattern (see the illustrations). In the country around are *ḳubbas* of prominent families and saints, like the Čahār Gumbād reproduced here. They belong to the same type. The last great group to be mentioned is: 10. The style of Gudjārāt, with Aḥmadābād as its capital, founded by the second ruler of the sulṭāns of Gudjārāt, Aḥmad Shāh I (814-46/1411-42); his descendants ruled till 991/1583. Aḥmad Shāh's *ḳubba* or *rawḍa* in the centre of the town beside the Djāmiʿ Masdjid, a square building with sides 90 feet long, consists of a domed chamber 35 feet high and four corner chambers connected by pillared halls. The preference for rich, pointed ornamentation peculiar to this style finds expression in the marble cenotaphs and fillings of the windows. In *ḳubbas* outside the city, as in the mausoleum of Daryā Khān of *ca.* 857/1453, we again find the Turco-Persian transition storeys with corner arches and gallery with a dome above built of horizontal layers (*Kunst d. isl. Völker*, fig. 214, and 182).

The most important groups have been mentioned. For the most notable Mughal tombs, which are only briefly mentioned above, see HIND, vii. Architecture, and MUGHALS, Architecture.

Finally, it should be noted that *ḳubba* "cover" occurs as a technical term in the construction of scales and balances, where the housing for the pointer (*lisān*), often used also as a carrying handle (cf. Pedro de Alcala: *cûbba = manija del peso*), was called the *ḳubba*. See J. D. Latham, ***The interpretation of a passage on scales*** (mawāzīn) ***in an Andalusian*** ḥisba ***manual***, in *JSS*, xxiii (1978), 285-7.

(E. DIEZ*)

ḲUBBA (now Ḳuba), **a district in the eastern Caucasus** between Bākū and Derbend [*q.vv.*]. The district of Ḳubba, with an area of 2,800 sq. miles, is bounded on the north by a large river, the Samūr, which flows into the Caspian, on the west by the "district" of Samūr which belongs to Dāghistān [*q.v.*], on the south by the southern slopes of the Caucasian range (peaks: Shāh-Dagh, 13,951 feet high, Bābā Dagh, 11,900) which separate Ḳubba from Shamākha (cf. the article SHIRWĀN), on the south-east by the district of Bākū and on the east by the Caspian. The area between the mountains and the flat coast land is called Djāf (Vullers, i, 499; *djāf*, "ad venerationem principis destinatum nemus"). The plain between the rivers Yalama and Belbele is called Muskūr; Shābarān lies further south (cf. SHIRWĀN). The other cantons are Barmak (so-called after a member of the Barmakī family, who sought refuge here in the reign of Hārūn al-Rashīd), Shishpāra, Tīp, Khinalugh, Budugh, Yukharī-bash, Sīrt, Anakh-dara, and (sometimes) Ḳabistān (*Akti*, iv, 650).

The population in 1896 was 175,000; 36.7% Tāt [*q.v.*], speaking the Iranian dialect of Tatī; 25.5% of Ādharbāydjāni Turks; 24% of highlanders of the Kürā group (the Kürin [*q.v.*]); and 8% highlanders of the group (southeastern Dāghistān group) formed of Khinalugh [*q.v.*], Djek, Ḳrīz [*q.v.*] and Budugh, to whom the Udi of Shekkī [*q.v.*] seem to be related. Muslims form 94% of the population (76.5% Sunnīs, and 17.5% Shīʿīs). Jews, Russians and Armenians together number several thousands. The town of Ḳubba (16,300 inhabitants), only founded in about 1750, lies on the right bank of the river Ḳudiāl; on the left bank is the Jewish quarter of the town. Near the mouth of the Ḳudiāl is the roadstead of Nisābād (called Nizovaia by the Russians) which played an important part in Russian military operations in Transcaucasia.

The history of the district of Ḳubba, which at first must have formed part of the ancient Caucasian Albania, is mixed up with that of Shīrwān; Shābarān (now a ruined site on the river Ḳulhan, Russian Gilkhin) had been an important centre inhabited by Christians (Muḳaddasī, 376) before Shamākha became the capital of Shīrwān. On the banks of the river Ḳulhan may still be seen ruins with a wall running from the sea to Bābā Dagh. Near the town of Ḳubba is the tomb of the Shīrwān-Shāh Kāwūs b. Kayḳubād (d. 774/1373).

It was only in the 18th century that Ḳubba enjoyed a period of independence. In the time of Shāh Sulaymān Ṣafawī, a member of the family of the *ūsmī* of Ḳaytaḳ (cf. DĀGHISTĀN) called Ḥusayn Khān arrived at the court of Iṣfahān. He became a Shīʿī and gained the favour of the Shāh, who appointed him Khān of Ḳubba and of Sāliyān (at the mouth of the Kura). Ḥusayn Khān built the castle of Khudād. His grandson Ḥusayn ʿAlī b. Aḥmad, with the help of Peter the Great, regained the ancestral estates of the *ūsmī*, but his position was threatened by the alliance of Surkhay, prince of the Ḳāzī-Kumūkh, with Ḥādjdjī Dāwūd, religious chief of Muskūr, who with the help of Turkey played a considerable part in Dāghistān from 1712. Nādir Shāh restored Sāliyān to Ḥusayn ʿAlī. After the death of Nādir, local dynasties arose everywhere. At this time Ḥusayn ʿAlī moved his capital from Khudād to Ḳubba where he built a town and annexed Shābarān and Ḳulhan. He died in 1171/1758. His son Fatḥ ʿAlī Khān who succeeded him sought the help of the empress Catherine II, who in 1189/1775 sent General de Medem to Derbend, under a pretext of avenging the death of the academician Gmelin, who had died on 27 June 1774 in captivity with the *ūsmī* of Ḳayaḳ. With the help of the Russians, Fatḥ ʿAlī re-established his authority over what he could regard as his hereditary fief (Dāghistān, Ḳubba, Sāliyān). He also took Shīrwān, and the Khān of Bākū appointed him his son's guardian. The influence of Fatḥ ʿAlī Khān gradually extended beyond the bounds of the district. In 1193/1778 he sent 9,000 men to Gīlān to restore Hidāyat Khān, who had been driven out by the Ḳādjārs [*q.v.*]. In 1202/1788 he seized Ardabīl, whereupon the Shāh-sewān [*q.v.*] recognised his authority. The Khāns of Ḳara-Dagh and of Tabrīz sought his support. Fatḥ ʿAlī is credited with ambitious designs on Ādharbāydjān. To reconcile his plans with those of the king Irakli of Georgia, Fatḥ ʿAlī met the latter at Shamkūr (Shamkhor) but soon afterwards fell ill and died in 1203/1789.

The political and military work of Fatḥ ʿAlī Khān crumbled away under his successors. His young son Shaykh ʿAlī Āghā (succeeded in 1791) had a very adventurous career. This young Khān relied on the support of the Ḳādjārs, but Count Zubov took Derbend on 4 May 1796, and entrusted the government to his sister Perī-Djahān Khānum. Taken prisoner by the Russians, Shaykh ʿAlī Āghā escaped and renewed the struggle. On the accession of the emperor Paul, Russian policy suddenly changed and the Russian troops were withdrawn. Shaykh ʿAlī returned to Derbend. In 1801 he and the other Khāns sent a delegation to Alexander I, but by 1805 we again find Shaykh ʿAlī rebelling against the Russians to whom he caused continual trouble till 1226/1811. The khānate of Ḳubba was occupied by the Russians in 1806, and by the treaty of 1813 Persia renounced her claim to the eastern Caucasus. From its incorporation in the Russian empire, Ḳubba formed a "gouvernement" of Shīrwān (later of Bākū). Since 1919 Ḳubba has been part of the republic of Ādharbāydjān, at first independent and then a Soviet SSR.

himself (1794-1846) was published at Bākū in 1926 (*Travaux de la société scientifique de l'Azerbaidjan*, part 4). The principal documents are in the collection by A. Bergé, Tiflis 1866 ff., i-xii, index under *Derbend-Ḳubba*. (V. MINORSKY)

AL-ḲUBBA, ḲUBBAT AL-ʿĀLAM, Ḳ. AL-ARḌ, Ḳ. ARĪN "the dome of the world, of the earth, of Arīn", expressions used by the Islamic geographers and astronomers to denote the geographical centre of the earth (*wasaṭ al-arḍ*) at the zenith of which exists the *ḳubbat al-samāʾ* or *wasaṭ al-samāʾ*; the *ḳubbat al-arḍ*, defined as being equidistant from the four cardinal points or *djihāt* (see e.g. Ibn Rustih, 8, tr. Wiet, 7), is theoretically to be found at 90° from each of the poles and meridians of longitude zero and 180°, passing through the two extremities of the inhabited world (whether the longitudes are calculated starting from the east or the west). It is thus situated on the equator, and, for those authorities who followed Ptolemy, at 90° to the east of the meridian of the Fortunate Isles [see AL-DJAZĀʾIR AL-KHĀLIDĀT] taken as the starting point. Now, if the theoretical position of the *ḳubba* causes no problems, its localisation in practice does in fact pose an interesting one.

The author of the *Ḥudūd al-ʿālam* (tr. Minorsky, 58, § 4, No. 13) echoes a tradition which places the centre of the inhabited world in an island called Nāra (read as Bāra by Minorsky) at a longitude of 90° east, and he adds that the astronomical tables and the position of the planets and fixed stars were calculated in relation to this equinoxial island (*istiwāʾ al-layl wa 'l-nahār*; cf. Ibn Rustih, 84 tr. 92, "l'île équatoriale"). However, al-Bīrūnī in his *al-Ḳānūn al-Masʿūdī*, whilst noting the fact that this island is mentioned by al-Fazārī and Yaʿḳūb b. Ṭārik, places it at 190° 50′ longitude east, i.e. at 50′ to the east of Yamakoṭi/Djamakūt/Djamagūd, which marked the extreme eastern boundary of the inhabited world, and he states that there are some more or less unknown places there. In his *India*, 157, tr. i, 303-4, al-Bīrūnī notes that the name Yamakoṭi is reminiscent of Kankdiz/Gangdiz, which Abū Maʿshar al-Balkhī took as the starting-place for the longitudes, calculated from east to west and no longer from west to east (cf. D. Pingree, *The thousands of Abū Maʿshar*, London 1968, 41 and index). Al-Masʿūdī, *Murūdj*, ii, 131 = § 555, recording an ancient Iranian tradition, attributes to Kay Khusraw the foundation of Kankdiz, and he notes specifically that certain authorities equate it with Yang-chʾeou; he further adds that several Chinese kings made it their capital. Al-Bīrūnī, *loc. cit.*, mentions Kay Kāwūs or Djim/Djamshīd as founder of this legendary town which was to remain, at least theoretically, as the extreme limit of the known world for later scholars. Abū Maʿshar likewise places it to the east of China and at 90° from the *ḳubbat al-arḍ*, but he identifies it with Ūzayn, which is a dangerous error.

The Indians used to calculate the longitudes from Lanka (Ceylon), whose southern tip is not very far from the equator, but they were led to displace the original meridian westwards and to adopt instead that of Udjdjayn [*q.v.*], which is near to the Tropic of Cancer but not at all near to the Equator. The name of this town, which has indeed a genuine geographical existence, was written in Arabic script Ūzayn/Uzayn أزين/أوزين (cf. Ibn Rustih, 22, tr. 19 and n. 6, with bibl.; al-Masʿūdī, *Tanbīh*, ed. Ṣāwī, Cairo 1357/1937, 192), and then, by means of a wrong reading, Arīn أرين; it is under this latter form that this toponym appears in later works, that it is transcribed in the mediaeval Latin translations, and that it appears even in some French lexica (Arine). Being unaware of the exact position of Udjdjayn, some authors tended to consider it as an island in the Indian Ocean (cf. *Ḥudūd al-ʿālam*, tr. 190), or at least to place it quite naturally on the equator, totally unaware of their error (thus Ibn Rustih, *loc. cit.*, or al-Masʿūdī, *Tanbīh*, *loc. cit.*). In this way, *ḳubbat Arīn* and *ḳubbat al-arḍ* became synonymous; an astronomer as recent as al-Rūdānī correctly defines the *ḳubbat al-arḍ* or *al-ʿālam* as the point of intersection of the equator and the *dāʾirat niṣf al-nahār* and still calls it the *ḳubbat Arīn*, but he probably saw only there a traditional name without any direct connection with the town of Udjdjayn.

Finally, it may be noted that the use of the word *ḳubba* to denote the geographical centre of the earth has given rise to the idea that a particularly high point of the earth is involved here. The Indian tradition which makes the zero meridian go through Ceylon, where Adam's Peak rises, may conceivably be influenced by this conception, which al-Bīrūnī attacked in his *Ḳānūn* (cf. A. Bausani, in *Studies on Islam*, Amsterdam-London 1974, 28-9).

Bibliography: In addition to the sources already mentioned, see above all the *Ḥudūd al-ʿālam*, comm. 189, 245, 335-6; M. Reinaud, *Introd. générale à la géographie des Orientaux*, Paris 1848, pp. ccxxxix ff.; Battānī, *Opus astronomicum*, ed. Nallino, Milan 1899-1907, *passim*; art. DJUGHRĀFIYA. (CH. PELLAT)

ḲUBBAT AL-HAWĀʾ, "the Dome of the Winds", a popular appellation for isolated monuments situated on rocky spurs, for example, the (undated) domed tomb of a *shaykh* on the west bank of the Nile (cf. Murray's *Handbook for travellers in Upper and Lower Egypt*, 9th edition, ed. Mary Brodrick, London 1896, 920) above Aswān. This presumably postdates the destruction of an adjacent Coptic monastery, attested by a graffito, in Shams al-Dawla's Nubian expedition of 1173, though the monasteries of the area, to judge from desecratory Muslim visitation inscriptions in Arabic dated, *inter alia*, 694/1294-5, in the neighbouring monastery of "St. Simeon" (not mentioned in U. Monneret de Villard, *Description générale du monastère de Snt. Siméon à Aswân*, Milan 1927), survived for a further century or more.

The most celebrated edifice of the name no longer exists. This is recorded by al-Kindī (*Faḍāʾil Miṣr*, ed. Guest, 147, ll. 14-15; cf. al-Maḳrīzī, *Khiṭaṭ*, ii, Būlāḳ 1853, 201, l. 21; 202, ll. 3-31) as a palace built by Ḥātim b. Harthama, governor of Egypt in 194-5/809-11 on a spur of the Muḳaṭṭam hills. This was deliberately destroyed on the fall of the Ṭūlūnid dynasty and no trace of it exists. The exact site has been disputed, but its total disappearance makes it more probable that it was on the site later occupied by the Ayyūbid Citadel of Cairo (K. A. C. Creswell, *The Muslim architecture of Egypt*, ii, Oxford 1959, 6, and references) than higher on the Muḳaṭṭam hills in the neighbourhood of the Fāṭimid *mashhad*, generally known as the Mashhad al-Djuyūshī. The site of this Ḳubbat al-Hawāʾ was subsequently converted into a cemetery, and various mosques, which have equally disappeared without trace, were erected there (P. Casanova, *Histoire et description de la Citadelle du Caire* [= *MMAFC* VI], Paris 1894, 557-61).

Though the possibility that the Cairene Ḳubbat al-Hawāʾ may be identified with the presumed Fāṭimid observatory on the Muḳaṭṭam hills must be

discounted (cf. A. Sayılı, *The observatory in Islam and its place in the general history of the observatory*, Ankara 1960, 130-56), the sense of the term *Ḳubbat al-Hawāʾ* suggests the persistence into Islamic tradition of some reminiscence of the Athenian Tower of the Winds, described as an *horologium* by Varro (*De re rustica*, 3.5.17) and dated accordingly pre-37 B.C., but also representing the winds on its eight facets (H. S. Robinson, *The Tower of the Winds and the Roman market place*, in *American Journal of Archaeology*, xlvii [1943], 291-305; J. V. Noble and D. J. de Solla Price, *The water clock in the Tower of the Winds*, in *ibid.*, lxii [1968], 345-55]. The term *Ḳubbat al-Hawāʾ* may thus have been used in Islam for structures associated with time-keeping or meteorology, though the evidence for this in the standard authorities is lacking. The reasons, incidentally, for the use, in the 18th century A.D., of the Tower of the Winds in Athens as a *samāʿ-k͟hāne* of the Ḳādirī dervishes (Hasluck, *Christianity and Islam under the Sultans*, Oxford 1928, i, 12 *et passim*) have still to be elucidated.

Bibliography: given in the article.

(J. M. ROGERS)

ḲUBBAT AL-ṢAK͟HRA, the Dome of the Rock, at times called the Mosque of ʿUmar, is the oldest remaining monument of Islamic architecture, and probably the first conscious work of art of Islamic civilisation.

Location and description. The Dome of the Rock is located on an artificial platform, roughly but not exactly in the centre of the Ḥaram al-S͟harīf [*q.v.*] in Jerusalem. The shape and emplacement of the platform were probably determined by the ruined state of the old Jewish Temple area, together with whatever Roman constructions may have been left; it is also possible that there were pious and historical or legendary associations with parts of this area of the Ḥaram, but these are difficult to demonstrate (see below).

A celebrated inscription, in which al-Maʾmūn replaced ʿAbd al-Malik's name with his own, dates the construction of the Dome (*ḳubba* in the inscription) to 72/691-2. It has been superbly described in all details by K. A. C. Creswell, and recent repairs have only confirmed most of his reconstruction of the original monument. It consists of a dome (20.44 m. in diameter and 30 m. in height) surrounded by two octagonal ambulatories, each side of the outer one being around 20.50 m. Interior supports consisted of piers and columns; the dome was set on a high drum and probably was from the very beginning a wooden double dome. There were fifty-six windows in the drum and the octagons, a parapet on the outside, and simple porches. Two important architectural characteristics of the Dome of the Rock must be noted. One is the superb geometry of its layout, based on the extension of two squares inscribed in the circle of the rotunda. It is this geometry which provides the monument with its harmonious airiness and which makes it possible to perceive the whole building at a glance. The second characteristic is that, from the point of view of its plan and composition, the Dome of the Rock belongs to a high tradition of Byzantine architecture represented by monuments found in Ravenna, Syria (St. Simeon, Boṣrā), and Jerusalem (Holy Sepulchre, Church of the Ascension). It is almost certain that its builders and planners were Christians from Syria or Palestine.

The Dome of the Rock was lavishly decorated with marble, mosaics, and gilt bronze plaques. The cupola was gilded on the outside and the outer walls were in large part covered with mosaics. Most of the exterior decoration has disappeared, but, in spite of numerous restaurations, the interior still approximates to its original appearance of a glittering sheathing of mosaics. Almost every part of the walls was covered with vegetal and geometric designs, and these included the very unusual motif of royal crowns and jewels. A fairly complete description of all these themes has been provided by Marguerite van Berchem in Creswell's *Early Muslim architecture*. Although there is some debate about the origins of the mosaicists (Syrian or Byzantine), there is little disagreement about the stylistic origins of the decoration. Most of it derives from the rich vocabulary of Late Antique and early Byzantine art, but there are also definite Iranian elements. Together with the important absence of any figural representations, this mixture of sources indicates that a conscious new Muslim taste affected the decoration of the Dome of the Rock far more than its architecture. We shall return later to the interpretation which could be given to these mosaics, since it is closely related to the problem of the meaning of the whole monument. As we shall see, a key document for whatever interpretation is given lies in the long inscription in gold mosaic cubes which runs along both sides of the octagonal arcades. In addition to providing the date of the building, this inscription contains numerous Ḳurʾānic passages which range from statements of the faith of Islam (cxii; xxxiii, 54; xvii, 111, etc.) to the major Christological passages in the Holy Book (especially iv, 169-71 and xix, 34-7). These are our earliest dated fragments from the Ḳurʾān, and C. Kessler has shown recently that many letters were already provided with clear diacritical marks (see *Bibl.*).

Although the Dome of the Rock has been amazingly well preserved, it was affected by many alterations and repairs over the centuries. The exact chronology of all these changes is difficult to establish. The cupola was redone in Fāṭimid times and under the Ottomans; the roof of the octagons was repaired in ʿAbbāsid times; and their ceilings transformed under the Mamlūks. The Crusaders added a handsome iron screen around the Rock, which has now been removed, but it was the Ottomans who in the 10th/16th century covered the building's exterior walls with some of the best-known examples of Turkish ceramics. Between 1956 and 1964 a Restoration Committee under the leadership of Egyptian and Jordanian architects and authorities undertook a complete restoration of the monument. Some part, such as the dome, were totally redone, others, the mosaics for instance, cleaned and repaired. The guiding principle of this work was to put every part of the building back in its earliest documented shape. Although future research may quibble at some of the decisions taken (for instance, it is likely that the beams of the ambulatory's roof were visible, since painted ones were found there), it has been one of the most successful jobs of restoration known anywhere, and it is hoped that its carefully-kept records will soon be published.

Significance. The Dome of the Rock has excited more scholarly concern than any other Islamic monument, and this for several reasons. It is a unique building which was rarely copied for its shape (a few later mausoleums like the Sulaybiyya in Sāmarrā or Ḳalāwūn's tomb in Cairo may have used it as a model), and never for its functions. It does not fit into any architectural series. Also it is located on the site of the Jewish Temple, in the holy city of

Christianity, without showing obvious traces of impact from the two older monotheistic faiths. It does not look like a mosque, and the Aḳṣā nearby fulfilled the congregational needs of the Muslim community. Finally, literary sources on the Dome of the Rock are confused and contradictory, even though the inscription on the building indicates that it was a major effort of the Umayyad dynasty.

The many explanations which exist can be divided into three broad groups. The first one is the traditional pious Muslim view, which interprets the Rock as the place whence the Prophet went on his celebrated Journey into Heaven (*miʿrādj* [*q.v.*]). That such became eventually the holy meaning of the Dome of the Rock is undisputable, since the whole Ḥaram became the *Masdjid al-Aḳṣā* of Ḳurʾān, XVII, 1. But, while the association between the Rock and the Prophet's Journey may have been made quite early, there is no trace of it in the most authentic document about the monument, sc. its long inscription.

The second explanation is concretely historical, and goes back to a passage from al-Yaʿḳūbī. This explanation holds that, during the struggle of the Umayyads with Ibn al-Zubayr, ʿAbd al-Malik attempted to create in Jerusalem a shrine which would compete with the Kaʿba and the pilgrimage to Mecca. Recently, W. Caskel revived the theory by pointing out that the Umayyads as a dynasty did seek a cultic center in Syria or Palestine, and that Jerusalem was the only one which fulfilled the necessary conditions. The main objection to this theory is that, even though there are several literary indications of a special Umayyad attachment to Palestine, there is some doubt as to whether such a basic Islamic requirement as the pilgrimage to Mecca could be altered. Furthermore, al-Yaʿḳūbī was a violently anti-Umayyad polemicist, whose interpretations are open to criticism.

The third explanation is cultural-historical. Starting with the evidence of the inscriptions and of the mosaics, it proposes to see in the Dome of the Rock a monument proclaiming the new faith and empire in the city of the older two religions. It sanctified anew a Jewish sanctuary and slowly incorporated within itself the memories of Abraham and Joseph, among others. It set up the crowns of Byzantine and Persian kings like an offering around the centre of the monuments, and put up its own Christology above the crowns. It was a missionary monument of victory, built at a time when ʿAbd al-Malik was concerned with Christian enmity, but especially when he sought to proclaim Islamic uniqueness within a common religious tradition, as, for instance, in his coinage. As the specific need of maintaining the cohesion of the community of faithful waned, pious associations grew up and eventually transformed the Dome of the Rock into the unique sanctuary it is today.

While this third explanation seems to us to reflect bettei than the first two the evidence of contemporary sources and of the spirit of the time, it is only fair to say that the debate is not yet closed. However it may be eventually resolved, two conclusions are pertinent. One is that, both as a work of art and as a cultural and pious document, the Dome of the Rock is a unique monument of Islamic culture in almost all repects. The second one is that it is a monument with a history, for, whatever its initial purpose may have been, it developed more and more complicated associations as time went on. It may indeed be a rare instance of a sanctuary whose holy meaning grew after it had been built. But, as a work of art, it is one of the most telling documents about the gradual transformation of a local Syro-Palestinian Christian art into Islamic art.

Bibliography: All earlier works are listed and discussed in K. A. C. Creswell, *Early Muslim architecture*, i, Oxford 1969. Of particular importance are O. Grabar, *The Umayyad Dome of the Rock*, in *Ars Orientalis*, iii (1957), and C. Kessler, *Above the ceiling of . . . the Dome of the Rock*, in *JRAS* (1964). Since 1969, one should see Grabar, *The formation of Islamic art*, New Haven 1973; Kessler, *ʿAbd al-Malik's inscription*, in *JRAS* (1970); M. Ecochard, *A propos du Dôme du Rocher*, in *BEO*, xxv (1972); W. Caskel, *Der Felsendom und die Wallfahrt nach Jerusalem*, Cologne 1963.

(O. GRABAR)

ḲUBBE WEZĪRI (T.) "vizier of the dome" was the name given, under the Ottomans, to the members of the imperial *Dīwān* (*dīwān-i hümāyūn* [*q.v.*]) who came together on several mornings each week around the Grand Vizier in the chamber of the Topkapı Palace called Ḳubbe altı because it was crowned by a dome. The *ḳubbe wezīrleri* were the *ḳāḍī-ʿasker*s [*q.v.*] of Rumelia and Anatolia, the *ḳāḍī* of Istanbul, the *defterdār* [see DAFTARDĀR], the *nishāndjī* [*q.v.*], the *agha*s of the Janissaries, the commander of the cavalry and, when he happened to be in the capital, the *ḳapudan pasha* [*q.v.*]. This institution was abandoned under Aḥmed III [*q.v.*].

ḲŪBČŪR (in Central Asia), the most important of the taxes and impositions of Mongol origin in the Čingizkhānid period. It was originally a tax on flocks and herds, payable by the Mongols to their ruler. Such a levy was made by Čingiz-Khān early in his career for the support of his ally and patron the Ong-Khān of the Kereyts (*Histoire secrète des Mongols*, ed. L. Ligeti, Budapest 1971, 107; Rashīd al-Dīn, *Sbornik letopisei*, ed. Berezin, xiii, 178). In the formative years of the Mongol Empire, *ḳūbčūr* was levied at a rate of one animal out of every 100 (Djuwaynī, iii, 79; Rashīd al-Dīn, *Djami el-Tévarikh*, ed. Blochet, 42). At this stage it seems to have been paid only by the nomads.

In 650/1252 the Greak Khān Möngke introduced among other reforms a new method of taxation. Following the model that had been established in Transoxania by the governor Maḥmūd Yalawāč, he imposed on the Empire a poll-tax, levied according to the wealth of the individual taxpayer on a sliding scale from ten *dīnār*s down to one. Other rates are also mentioned. This tax was to be called *ḳūbčūr*, and was to be paid by the subject population (Djuwaynī, i, 253-4). Such a tax inevitably involved periodical censuses of the conquered population (Djuwaynī, i, 25; cf. Grigor of Akancʿ, *History of the Nation of the Archers*, ed. and tr. Blake and Frye, Cambridge, Mass. 1954, 57). On the basis of a new census, *ḳūbčūr* was reassessed in 656/1258 on a scale ranging from 500 *dīnār*s to one. Thereafter the imposition of census and "poll-tax" *ḳūbčūr* seems to have become a regular procedure, at least in the west, as new territory submitted to the Mongols or was conquered by them (see e.g. Rashīd al-Dīn, *Histoire des Mongols de la Perse*, ed. and tr. Quatremère, 256-7). It became something of a byword for Mongol oppression (see Minorsky, *Pūr-i Bahā and his poems*, in *Iranica*, Tehran 1964, 299).

The original "animal-levy" *ḳūbčūr* continued to

be paid by the Mongols—in Persia until the reign of Ghāzān, who abolished it (Rashīd al-Dīn, *Geschichte Ġāzān-Ḫān's*, ed. Jahn, 300). The sources consequently sometimes use the term *ḳūbčūr-i mawāshī* for the animal-levy, in order to distinguish it from the poll-tax.

(D. O. MORGAN)

ḲUBILAY, Mongol Great Khān (1260-94), the brother and successor of Möngke [*q.v.*], was born in 1215. In 1251 Möngke entrusted him with the administration of Northern China, and he took part in the subsequent war which his brother launched against the Sung rulers of the South. The conquest of the Sung was finally completed only during his own reign (1279), when the whole of China was again united under one ruler for the first time since the tenth century. Already in 1260 he had transferred the capital of the Empire from Ḳaraḳorum [*q.v.*] to Peking, in Mongol Khān-Balīgh [*q.v.*], i.e. "Khān's Town", and in 1271 he proclaimed the foundation of the Yüan Dynasty, the twentieth of the Chinese Official Dynasties. His right to the Khānate was at first disputed by his younger brother Arīgh Böke, who perhaps had the stronger claim and who finally surrendered only in 1264; the struggle was then taken up by Ḳaydu [*q.v.*], who remained a thorn in Ḳubilay's side during the whole of his long reign. Nor was Ḳubilay more successful in his campaigns against the Japanese and the Indo-Chinese or in an attempt to gain a foothold on the island of Java. In China he encouraged the propagation of Tibetan Buddhism, but, like most of the Great Khāns, was favourably disposed to Islam and the Muslims; only for a time (during the years 1282-9), as a result of the events connected with the assassination of the minister Aḥmad, did the Muslims fall into disfavour with him. He was described by a European observer, who had travelled widely within his territories, the Venetian Marco Polo, as "the most puissant of men, in subjects, lands, and treasures, that there is on earth or ever was, from the time of our first father Adam to this day".

Grousset, *L'Empire des steppes*, 352-90; P. Ratchnevsky, *Rašīd ad-Dīn über die Mohammedanerverfolgungen in China unter Qubilai*, in *Rashīd al-Dīn commemoration volume (1318-1968)*, ed. J. A. Boyle and K. Jahn, Wiesbaden 1970, 163-80. (W. BARTHOLD - [J. A. BOYLE])

KUBRĀ, SHAYKH ABU 'L-DJANNĀB AḤMAD B. ʿUMAR NADJM AL-DĪN, eponymous founder of the Kubrawī Ṣūfī order, one of the major orders of the Mongol period in Central Asia and Khurāsān, from which stem numerous derivative initiatic lines. The sobriquet of Kubrā is an abbreviation of the Ḳurʾānic expression *al-ṭāmmat al-kubrā*, "the major disaster", a nickname Nadjm al-Dīn earned through his formidable talent in polemic and disputation.

Born in Khwārazm in 540/1145, he began his career as a scholar of *ḥadīth* and *kalām*, travelling extensively in the cultivation of these disciplines. His interest in Ṣūfism was awakened in Egypt, where he became a *murīd* of Shaykh Rūzbihān al-Wazzān al-Miṣrī, an initiate of the Suhrawardī order. After a number of years in Egypt, he went to Tabrīz to pursue his studies of *kalām*, but came instead under the influence of a certain Bābā Faradj Tabrīzī, who persuaded him definitively to abandon his concern with the external religious sciences and to devote himself fully to the Ṣūfī path. He then spent some time in the company of two other preceptors, ʿAmmār b. Yāsir al-Bidlīsī and Ismāʿīl al-Ḳaṣrī, from both of whom he received the ritual *khirḳa*, before returning to Shaykh Rūzbihān in Egypt. By then, Rūzbihān evidently regarded Kubrā as fully mature, for in about 540/1145 he sent him back to Khwārazm with full authority to train and initiate disciples. Kubrā swiftly gathered a large following, including a remarkable number of individuals who attained prominence in their own right as gnostics and writers on Ṣūfism; he is, in fact, frequently designated as *walī-turāsh*, the "manufacturer of saints". Among his foremost disciples were Madjd al-Dīn Baghdādī (d. 616/1219), Nadjm al-Dīn Dāya Rāzī (d. 654/1256; author of the celebrated Ṣūfī compendium *Mirṣād al-ʿibād*, ed. Amīn Riyāḥī, Tehran 1352/1972; Eng. tr. Hamid Algar, *The path of God's bondsmen from origin to return*, forthcoming), Saʿd al-Dīn Ḥamūya (d. 650/1252), Bābā Kamāl Djandī, Sayf al-Dīn Bākharzī (d. 658/1260; cf. Saʿīd Nafīsī, *Sayf al-Dīn Bākharzī*, in *Madjalla-y Dānishkada-i Adabiyyāt*, ii/4 [Tīr 1334/October 1955], 1-15, and Īradj Afshār, *Sargudhasht-i Sayf al-Dīn Bākharzī*, Tehran 1341/1962), and Raḍī al-Dīn ʿAlī Lālā (d. 642/1244). Kubrā died during the Mongol conquest of Khwārazm in 617/1220; according to the traditional accounts, he refused an invitation by the Mongols to leave the city before they proceeded with their massacre of the inhabitants, and died at the head of a band of followers while engaged in hand-to-hand combat. He is reputed to have been buried at the site of his *khānaḳāh* outside the city, and his tomb, located in what subsequently became known as Köhne-Urgenj [see GURGANDJ], became a centre of pious visitation, retaining this function even under Soviet rule (cf. G. P. Snesarev, *Relikti domusul'manskikh verovanii i obryadov u Uzbekov Khorezma*, Moscow 1969, 269, 433).

Kubrā left behind a number of brief but important works dominated by a concern with the analysis of the visionary experience. He discussed in them, for example, the various significances of dreams and visions; the degrees of luminous epiphany that are manifested to the mystic; the different classes of concept and image (*khawāṭir*) that engage his attention; and the nature and interrelations of man's "subtle centres" (*laṭāʾif*). Most important of Kubrā's treatises are *Fawāʾiḥ al-djamāl wa-fawātiḥ al-djalāl* (edited with an exhaustive introduction on the life and work of Kubrā by F. Meier, Wiesbaden 1957), *al-Uṣūl al-ʿashara* and *Risālat al-khāʾif al-hāʾim min lawmat al-lāʾim* (edited, together with other lesser treatises, by M. Molé under the title of *Traités mineurs*, in *Annales Islamologiques (Cairo)*, iv [1963], 1-78). In addition to these short works on the path, Kubrā also embarked on a Ṣūfī commentary on the Ḳurʾān that he was unable to complete but was continued after his death first by his *murīd* Nadjm al-Dīn Rāzī and then by another Kubrawī, ʿAlāʾ al-Dīn Simnānī (cf. H. Corbin, *En Islam iranien*, Paris 1972, iii, 175-6, 276 n. 90, and Süleyman Ateş, *Işarî tefsir okulu*, Ankara 1974, 139-60).

The line of Kubrā was perpetuated by several of his disciples. Sayf al-Dīn Bā<u>kh</u>arzī established a well-endowed *<u>kh</u>ānaḳāh* in Bu<u>kh</u>ārā. *Waḳf* documents relating to this *<u>kh</u>ānaḳāh* have been published by C. D. Če<u>k</u>hovič, *Bu<u>kh</u>arskie dokumentī XIV v.*, Tashkent 1965); it was there that Berke <u>Kh</u>ān, fifth ruler of the Golden Horde, proclaimed his acceptance of Islam (J. Richard, *La conversion de Berke et les débuts de l'islamisation de la Horde d'Or*, in *REI*, xxxv [1967], 173-9). Badr al-Dīn Samarḳandī, a *murīd* of Bā<u>kh</u>arzī, travelled to India and established there a branch of the Kubrawiyya that came to be known as the Firdawsiyya; its most important figure was Aḥmad Yaḥyā Manērī (d. 772/1371), author of widely-read *Maktūbāt* (publ. Lucknow 1911). Saʿd al-Dīn Ḥamūya established a *<u>kh</u>ānaḳāh* at Baḥrābād in <u>Kh</u>urāsān, the direction of which was assumed by his son, Ṣadr al-Dīn Ibrāhīm, who in 694/1295 presided over the conversion to Islam of <u>Gh</u>āzān <u>Kh</u>ān, the Īl<u>kh</u>ānid ruler of Iran (cf. Ra<u>sh</u>īd al-Dīn Faḍl Allāh, *Taʾrī<u>kh</u>-i Mubārak-i <u>Gh</u>āzānī*, ed. K. Jahn, London 1940, 76-80). Another *murīd* of Saʿd al-Dīn Ḥamūya was ʿAzīz al-Dīn Nasafī (d. 661/1263), author of several important treatises (published by Molé under the title *Kitāb al-Insān al-kāmil*, Tehran and Paris 1962).

The most long-lived and prolific initiate line deriving from Na<u>dj</u>m al-Dīn Kubrā was probably that descending by way of Raḍī al-Dīn ʿAlī Lālā and two further links of the chain to ʿAlāʾ al-Dawla Simnānī. Simnānī further elaborated the analysis of the *laṭāʾif* and also formulated a critique of Ibn ʿArabī's doctrine of *waḥdat al-wu<u>dj</u>ūd* that was to have much influence on Indian Naḳ<u>sh</u>bandī circles (see H. Landolt's introduction to *Mukātabāt-i ʿAbd al-Raḥmān Isfarāʾinī wa ʿAlāʾ al-Dawla Simnānī*, Tehran and Paris 1972, for a copious bibliography on Simnānī). ʿAlī Hamadānī, a *murīd* successively of two of Simnānī's followers, Taḳī al-Dīn A<u>kh</u>ī and Maḥmūd Mazdaḳānī, introduced the Kubrawī order to Bada<u>kh</u><u>sh</u>ān and Ka<u>sh</u>mīr. He died in 786/1385, and is variously reputed to have been buried in <u>Kh</u>uttalān (present-day Kulāb, Tadzhik SSR) [see <u>Kh</u>UTTALĀN] and Srinagar (J. K. Teufel, *Eine Lebensbeschreibung des Scheichs ʿAlī-i Hamadānī*, Leiden 1962; Sayyida A<u>sh</u>raf Ẓafar, *Amīr-i Kabīr Sayyid ʿAlī Hamadānī*, Lahore 1972). He designated himself as a "second ʿAlī", and although the branch of the Kubrawī order he introduced to Ka<u>sh</u>mīr remains purely Sunnī to the present day, it is not surprising that various descendants of Hamadānī came to adopt <u>Sh</u>īʿism. Isḥāḳ al-<u>Kh</u>uttalānī, successor of ʿAlī Hamadānī, was murdered by emissaries of the Tīmūrid ruler <u>Sh</u>āhru<u>kh</u> in about 826/1423, but before dying appointed as his successor Muḥammad Nūrba<u>kh</u><u>sh</u>. The majority of <u>Kh</u>uttalānī's followers accepted Nūrba<u>kh</u><u>sh</u>, but a minority gave their loyalty to ʿAbd Allāh Barzi<u>sh</u>ābādī instead. This schism gave rise to two separate derivatives of the Kubrawiyya, each with its own name, but having in common an adoption of <u>Sh</u>īʿism. One was the Nūrba<u>kh</u><u>sh</u>iyya, that survived in Iran into the Ṣafawid period; the other came to acquire, at a date and in a fashion unknown, the designation of <u>Dh</u>ahabbiyya, and has survived down to the present in Iran, where its chief centre is <u>Sh</u>īrāz (cf. R. Gramlich, *Die schiitischen Derwischorden Persiens*, in *AfKM*, xxvi/1 [1965], 14-26).

The latter history of the Kubrawiyya in its Central Asian homeland is not well-known. It is probable that it was almost universally displaced, even in <u>Kh</u>ʷārazm, by the Naḳ<u>sh</u>bandiyya from the early 9th/15th century onwards. The small town of Sāktarī near Bu<u>kh</u>ārā remained, however, an active centre of the Kubrawiyya until at least the early 11th/17th century (for a list of works produced by the *<u>shaykh</u>s* of Sāktarī, see A. A. Semenov, *Sobranie vostočnī<u>kh</u> rukopisei Akademii Nauk Uzbekskoi SSR*, Tashkent 1955, iii, 327-8); and at some point the Kubrawiyya spread eastwards from Central Asia into the Muslim regions of China (cf. Muḥammad Tawāḍuʿ, *al-Islām wa 'l-Ṣīn*, Cairo 1364/1945, 112).

Finally, there are traces of the Kubrawiyya in Turkey—a Kubrawī *<u>shaykh</u>* by the name of Muṣṭafā Dede is recorded to have fought in the ranks of the army that conquered Istanbul (Ayvānsarāʾī, *Ḥadīḳat ül-<u>dj</u>ewāmiʿ*, Istanbul 1281/1861, ii, 261)—but no lasting implantation of the order appears to have taken place either in Turkey or the Arab lands. Only a nominal existence of the Kubrawiyya persisted in the western Islamic world as one of the multiple secondary affiliations professed by Naḳ<u>sh</u>bandīs of the Mu<u>dj</u>addidī-<u>Kh</u>ālidī line (cf. Muḥammad Asʿad al-Irbilī, *al-Risāla al-asʿadiyya fī 'l-ṭarīḳa al-ʿaliyya*, Istanbul 1343/1924, 29).

Bibliography: (in addition to that contained in the text): Meier's introduction to his edition of the *Fawāʾiḥ al-<u>dj</u>amal* contains a comprehensive listing of all sources on the life and work of Kubrā. See also Kamāl al-Dīn al-Ḥarīrī, *Tibyān wasāʾil al-ḥaḳāʾiḳ wa-salāsil al-ṭarāʾiḳ*, ms. Ibrahim Efendi (Süleymaniye) 430, iii, ff. 79b-84a; Molé, *Les Kubrawiya entre Sunnisme et Shi'isme aux huitième et neuvième siècles de l'Hégire*, in *REI*, xxix (1961), 61-142 (a pioneering study, despite excessive emphasis on allegedly proto-<u>Sh</u>īʿī elements in the early Kubrawiyya; cf. Algar, *Some observations on religion in Safavid Persia*, in *Iranian Studies*, vii/1-2 [winter-spring 1974], 287-90); Ye. E. Bertel's, *Četverosti<u>sh</u>iya <u>Sh</u>ei<u>kh</u>a Nadžm ad-Dina Kubra*, in *Sufizm i sufiiskaya literatura*, Moscow 1965, 324-8; Corbin, *L'Homme de lumière dans le soufisme iranien*, Paris 1971, 95-148; J. S. Trimingham, *The Sufi orders in Islam*, Oxford 1971, 55-8.

(H. ALGAR)

ĶUBRUS, modern Turkish Kıbrıs, Greek Kúpros (etymologically derived probably from the word for "copper"), in western languages Cyprus, is the largest island in the Eastern Mediterranean, with a surface area of 9,251 km². The nearest distance to the mainland is from Cape Kormakiti in the north to Anamur on the southern coast of Turkey, 71 km. The distance to the Syrian coast between Cape Andreas and Raʾs ibn <u>Kh</u>ān north of al-Lā<u>dh</u>iḳiyya [*q.v.*] is 98 km. The distance to Crete (Arabic Iḳrīṭi<u>sh</u> [*q.v.*] is about 553 km. The island consists of two mountain ranges, Kyrenia-Karpass rising to 1,019 m. altitude in the north, and Troodos rising up to 1.952 m. in the south-west. In between lies a plain, the Mesaoria (Turkish Mesarya, Mesalya), which supports most of the island's agriculture, although its rainfall is marginal and the percentage of irrigated land is not large. Agriculture continues to be the mainstay of the economy. Copper has been mined since before 3,000 B.C., but its known veins, like those of other minerals (iron pyrites), are near exhaustion. Non-metal minerals are available in exportable quantities, e.g. asbestos. Refining of salt is still revenue-producing; it is being extracted from salt lakes in the low lands near Limassol and Larnaca (old names Les Salines, Turkish Tuzla).

The geopolitical situation of Cyprus within the spheres of the ancient civilisations of the Near East explains why the island has always played a certain

role in history, although its importance has sometimes been overrated. Lying on the main sea routes of the Levant, within striking distance of the mainland, the island has always been in a dependent position to any of the surrounding big powers; political independence has rarely been attained (see below, *Lusignan period*).

1. *Byzantium and Islam* (*632-1192*).

Cyprus' history in antiquity will not be dealt with here. When the expansion of Islam began, the island was a province of the Byzantine Empire, with its capital at Constantia, ancient Salamis. Since 431 (Council of Ephesus) the Orthodox Church of Cyprus has been autocephalous under an archbishop who ranks immediately behind the four great patriarchs. The church has moulded the island into a social, religious and cultural unit. The old and strong links between clergy and people have created a sense of social solidarity, which has remained characteristic for the history of the Orthodox Greek population of the island during the succession periods of foreign dominations. Cyprus's important cities at this time were: Salamis-Constantia, Citium (near Larnaca), Curium (near Episkopi), Tamassus (Nea) Paphos, Neapolis (Nemesos) (= Limassol), Amathos, Arsinoe (Marium) (= Chrysokhou), Lapithos, Karpasia (Near Rhizo karpaso), Chytri (= Kythrea), Tremithus, Soli, Kerynia and Ledrae or Leukosia (= Nicosia).

It was after the reign of Heraclius (610-41) that Cyprus began to be invaded by the Arabs. According to a Greek writer, a raiding party under the caliph Abū Bakr appeared on the island in 632, which is not very probable. In 647 (648, 649?) Muʿāwiya, governor of Syria, organised an expedition against the island, which was in fact the first large-scale maritime enterprise of the Arabs in the Mediterranean (cf. Balādhurī, tr. Hitti, i, 235 ff., 431 f.). His fleet of 17,000 sail, commanded by ʿAbd Allāh b. Kays, landed the Arab forces at Constantia. The city was besieged, surrendered and sacked. The whole island was overrun. Cyprus was compelled to pay a tribute of 7,000-7,200 goldpieces, to be paid annually to the governor at Damascus, a sum equal to the island's tribute to the Byzantine treasury. This seems to indicate a form of joint-rule over the island by the Emperor and the caliph. It was during this raid that Umm Ḥarām, wife of ʿUbāda b. al-Sāmit, a relation of the Prophet, died and was buried near Larnaca. On that site was to be erected the most venerated shrine of the Muslims of Cyprus, the Hâla Sultan Tekke. A second raid was organised by Muʿāwiya in 33/653-4 led by Abu 'l-Anwār. Lapithos was sacked, and a force of 12,000 occupied the island permanently till the caliph Yazīd (680-3) withdrew it. The tributary relationship with the caliph at Damascus lasted till the time of caliph al-Manṣūr (754-75), it seems.

The peace treaty concluded between Constantine IV and ʿAbd al-Malik in 685 and renewed in 688-9 with Justinian II provided for the division of the revenues of Armenia, Iberia and Cyprus. The last-mentioned emperor decided to transplant the Orthodox population of Cyprus to the south coast of the sea of Marmara near ancient Cyzicus, where the city of Nova Justiniana (Justinianopolis) was founded for the archbishop of Cyprus and his flock. (This town's name still figures in the title of the head of the church of Cyprus. This exile of the Cypriots lasted till 698, when the island became resettled by its old inhabitants, and also by those who had gone to Muslim Syria.) For two-and-a-half centuries longer, there persisted the intermediate status of Cyprus between the Roman Emperor and the caliph. The island was normally used as a base for Arab maritime actions against Asia Minor.

In 747 a fleet from Alexandria was destroyed by a Byzantine force commanded by the admiral of the Cibyrrhaeote Theme. Raids and attacks followed each other in 772, 790 and 806 under command of the ʿAbbāsid governor in Syria, Ḥumayd. The island nevertheless remained a part of the Byzantine Empire, and the Emperor Basil I (867-86) reorganised its administration temporarily into a theme, the general Alexius being governor. The tribute to the caliph was continued (cf. Constantine Porphyrogenitus, *De Thematibus*, Bonn ed., 40). Cyprus served as a base during the campaign of Himerius against the Arabs in Crete [see IḲRĪṬISH] in 902. In 911-12 an Arab force under Dimyana occupied the island for four months. Byzantine authority was restored after the recovery of Crete in 963. After *ca.* 963, Cyprus was hardly ever more troubled by Arab invasions, and was able to restore its economy. Evidence for the island's renewed florescence is the new foundation of the main cities, old sites on the sea coast being abandoned. In 1042-3 and in 1092 revolts against the Emperor Alexius Comnenus occurred.

Towards the end of that century, Cyrpus became a base for operations of Byzantine land and sea forces, sometimes in combination with those of the Crusaders (in particular, Raymond de St. Gilles, Count of Toulouse, and his successors at Tripoli). Scanty evidence for the interior history of Cyprus in this period points to maladministration and the economic draining of the island's resources by the Byzantine government. The source of Nicolas Mouzalon, one-time archbishop of Cyprus, must, however, be considered suspect because of prejudice against the emperor. The first half of the 12th century left Cyprus in peace. Pilgrim traffic passed through it as usual, and relations with Muslim powers were correct. The *amīr* of Beirut and many inhabitants of that city found refuge on Cyprus when Baldwin, king of Jerusalem, captured it on 13 May 1110. The first Maronites probably settled on the island around this time. Inhabitants of Tell Ḥamdūn in Little Armenia were removed to Cyprus by the Emperor John II Comnenus (Caloioannes) (Ibn al-Ḳalānisī, tr. H. A. R. Gibb, *The Damascus chronicle of the Crusades*, London 1932, 241). In 1148 Manuel Comnenus extended the commercial privileges of the Venetians to Crete and Cyprus. This marked the beginning of the Latin penetration.

In 1155 or 1156 the Crusader Renaud of Châtillon, in co-operation with Thoros II (1145-68) of Little Armenia (Armeno-Cilicia), launched an expedition against Cyprus and put the Byzantine authorities (the Duke John Comnenus) out of action. Cyprus suffered badly, and had to pay ransom for hostages from among principal members of the clergy and the lay population.

In 553/1158 a fleet from Egypt raided Cyprus, and in 1161 pirates equipped by Raymond III of Antioch, Count of Tripoli, raided Cyprus and the coast of Cilicia. The last period of Byzantine dominion over Cyprus was the rule of Isaac Ducas Comnenus, the self-styled Emperor of Cyprus from 1185 to 1191, who was able with support of the Norman King William II to defeat an expedition sent by the Emperor Isaac II Angelus against him and to rule till he was dethroned by Richard the Lion Heart in 1191.

King Richard's fleet ran into heavy weather on its way to the Holy Land. The ship carrying his sister Joanna and his bride Berengaria, daughter of the King of Navarre, sought shelter in the port of Limassol. Isaac tried to take the ladies hostage, but Richard appeared on 6 May 1191 and landed in force on Cyprus. Having been joined by Crusader lords from Syria, among whom were Guy de Lusignan, a claimant to the crown of Jerusalem, Richard, after failure of a peaceful settlement, opened war against Isaac and defeated his forces. Isaac surrendered at the end of May 1191. The people of Cyprus delivered half of their possessions to the King of England, who confirmed the laws and institutions as granted to Cyprus by the Emperor Manuel Comnenus. Frankish garrisons took the place of the Greek ones, and two English gentlemen were appointed as justiciars and sheriffs to administer the island. It was to serve as the base to provision the Crusaders in Syria, and the island became essential for the operations of the Franks in the Holy Land during the next century, after Saladin had almost destroyed the Latin's position there at Ḥaṭṭīn (1187).

2. *The Frankish period (1192-1571)*

(a) The rule of the House of Lusignan (1192-1489). — The King of England sold the island in July 1191 to the Knights of the Temple. During their rule, a rebellion broke out which was suppressed at great cost. In May 1192 King Richard resold Cyprus to Guy de Lusignan, husband to the heiress of the crown of Jerusalem. The Byzantine Emperor could only raise a protest on the diplomatic level.

Aimery de Lusignan succeeded his brother as lord of Cyprus (1194-1205). He continued the feudal organisation, granting fiefs to many Latin nobles and founding an extensive private domain. The state acquired its administrative institutions, and the castles of St. Hilarion ("Dieu d'amour"), Kyrenia (Cérines) and Buffavento were built. By Papal bulls of 20 February and 13 December 1196 a Latin hierarchy was installed under the archdiocese of Nicosia, with three suffragans, as a parallel to the Latin feudal institution. In 1197 Aimery acquired the title of King, holding his dominion from the Emperor Henry VI with Papal assent. In the same year, the Syrian Crusader barons elected him King of Jerusalem in Acre. This personal union was restored under King Hugh III (1267-84) of Lusignan in 1269, to remain as a honorific title of the Kings of Cyprus after 1291. A third royal title was collected by the Lusignans, that of Armenia in 1368—again an empty title without land.

The new kingdom kept the peace with the Muslim powers in Syria till the 5th Crusade (1228-9). The Cypriots also participated in the expedition to Damietta of 1219-21. During the Seventh Crusade, the King of France, St. Louis, used the island as his support base in the campaign against Egypt, when Damietta was again taken in 1249, and both Kings entered the town triumphantly together. The Kings of Cyprus remained involved in the Crusaders' wars till the end. In 1269 Hugh III became King of Jerusalem, but could not establish his authority over the unruly Crusader barons of Syria, Cyprus and the maritime republics of Italy. He withdrew from Acre in 1276, and when that town fell to the Mamlūks in 1291, Cyprus became the last refuge for the Christians fleeing from Syria. This new position in the Levant was of advantage to Cyprus.

The 14th century was the great period of the kingdom of the Lusignan "Kings of Cyprus and Jerusalem". Its legal foundation was the purest feudal constitution ever to come about in mediaeval times, involving an elected monarchy controlled by the feudal nobility. The latter had as instruments of their policy the *Haute Cour* (*Cour des Liges*) with all executive, legislative and judicial power, as the only organ entitled to establish the rightful succession to the throne. The King was its president, and he had to convene the *Haute Cour*, but the continuity of the dynasty ensured the strong and dominating position of the monarch versus the Latin nobility.

The royal administration was directed by the *sénéchal, chambellan, chancellier* and *Grand Bailli* for civil affairs, and the *connétable, maréchal, Grand Turcoplier* (commander of light cavalry) and an admiral for military affairs. The two main cities of Nicosia and Famagusta were administered by 2 viscounts assisted by *mactasibs* (*mahtescps*).

The King, together with the Crusader aristocracy of baronial families of French origin (d'Ibelin, de Norès, etc.) and a smaller group of Frankish citizens, formed a small ruling class. The second element of Cyprus society formed the foreign merchants communities living in privileged, extraterritorial *fondachi*, Italians from Genoa and Venice, Catalans and Provençals.

The native Orthodox Greek-speaking people formed on the whole a class of subjects, ruled and exploited like slaves and serfs, *parici* and *perperiarii*. Personally free were the Greek *lefteri* or *Francomati*. The division between native Greeks and foreign Franks became strengthened by the existence of two churches. In 1196 King Aimery installed a Roman Catholic ("Latin") hierarchy at the side of the Orthodox one. By 1260 Pope Alexander IV issued the *Constitutio Cypria* confirming the supremacy of the Latins over the Greeks. The Latin archbishop solely remained as metropolitan of both hierarchies. However, the Orthodox clergy managed to subsist as a church organisation conserving the Greek ethnicity of its flock.

The Lusignan period was the first in which the island's produce and taxation became spent in and for the land itself. This alone must be considered a major cause of its economic growth. Next to that was the island's position as a transit trading station for the East-West trade, the *échelle du Levant par excellence* after the disappearance of the Crusader states. Famagusta developed into a commercial centre connecting Genoa, Venice, Pisa, Florence, Barcelona and Montpellier with Alexandria, Damascus, Aleppo, and through to the Persian Gulf, with South and East Asia.

King Henry II (1285-1324) had to direct the influx of the refugees from Syria and Palestine after the fall of Acre (1291) and the settlement of the Syrian Crusader barons and merchants. In 1343 a Holy League between the Pope, Venice, the Knights of St. John at Rhodes and Cyprus was instituted against the emerging sea power of the *amīrs* of Aydın [*q.v.*] in Anatolia. Smyrna was occupied on 28 October 1344. Otherwise, peaceful commercial relations were maintained with Mamlūk Egypt and the southern Anatolian coastlands. King Peter I (1359-69) revived the ideal of a crusade against Islam. In 1361 Gorhigos (Kızkalesi) was annexed and Antalya [*q.v.*] was captured from the Turkman Amīr Ḥamīdoghlu Meḥmed Bey. A European tour of the King, now styled *athleta Christi* by Pope Urban V, prepared for a Crusade: Venice, Cyprus and the Knights of St. John collected 10,000 troops transported in a fleet of 115 sail at Rhodes.

In October 1365 Alexandria was temporarily occupied, but the commercial interests of Venice and Genoa stopped any further confrontation with Mamlūk power. These two merchant republics were to dominate Cyprus's politics in the last century of its independent existence. At first, it was Genoa which gained the upper hand in the competition with Venice. In 1372 the Genoese Podestà (in Famagusta) defeated the Venetian Bailo, whose party received support from the Greek Cypriots. A Genoese force invaded Famagusta and Nicosia. In October 1374, a treaty was concluded which assured Genoa complete economic hegemony on Cyprus for 90 years. The *Maona Cypri* was the private mercantile organisation of Genoese bankers established at Famagusta. The King of Cyprus had to cede the town as a guarantee for the payment of reparations amounting to 2,146,400 florins and the yearly tribute to Genoa of 40,000 florins.

The next blow to Cyprus's independence was an invasion by the Mamlūk Sultan Barsbāy [*q.v.*]. On 7 July 1426, King Janus (1398-1432) and his army were defeated near Khirokitia, and Nicosia was plundered. The King was set free on the condition of becoming a vassal, paying 200,000 florins' ransom and a yearly tribute of 8,000 florins. After this invasion, the island's economy began to decline. Social unrest within the Greek population worsened the situation. In 1448 Gorhigos fell under control of the Ḳaramān amīrate [see ḲARAMĀN-OG͟HULLARI]. Cyprus lost her last continental interest.

When in 1458 Charlotte, the daughter of King John II, came to the throne, her half-brother James the Bastard (1440-73) disputed the succession. He applied to the Mamlūk sultan for support. In 1460, with the aid of Mamlūk auxiliaries, James II defeated the legitimist opposition and took the last stronghold of the Queen, Kyrenia, and the Genoese held Famagusta in 1464. To defend himself against a Genoese counter-attack, James II enlisted Venice as an ally, and chose a Venetian subject, Caterina Cornaro (d. 1510) as his Queen in 1472; after his death (1473), she was to rule as the last monarch of independent Cyprus till 1489. During her reign, Venice installed a virtual protectorate. A Venetian garrison and two Venetian counsellors to the Queen were not considered enough by the Venetian government to safeguard the island from the Ottoman Turks' expansion. In 1488 an Ottoman fleet appeared before Famagusta. On 26 February 1489, Queen Caterina abdicated in Famagusta, and the Venetian *Capitan Generale da Mar*, Francesco Priuli, took over the government of the island.

Thus it was Christian Venice that ended the last of the Crusader states in the East. The Signory of Venice duly notified and offered justification of the take-over to the Sultan Ḳāʾit Bāy [*q.v.*] in Cairo, and the envoy carried with him presents and 16,000 ducats, being the tribute for 2 years. The Sultan thereupon agreed to the transfer of the Kingdom of Cyprus to Venice (February 1490).

(b) Venetian rule (1489-1571). — With the acquisition of Cyprus, the commercial "colonial" empire of Venice reached its greatest dimensions. The new possession was reorganised. The centralised government, the *Rettori*, consisted of the *Luogotenente* and two counsellors. Venetian nobles elected for a two years' tenure, controlled the finances and administration, and resided at Nicosia. A quadrennial census was instituted, the first reliable population data of Cyprus's history. The governor of Famagusta, the *Capitan del Regno di Cipró*, acted as commander-in-chief of the army and the fortresses in peace-time, and had a share in the civil administration. In time of war or menace, a proveditor-general was elected for two years to command. From the period of the Lusignan rule, two offices were retained only, the viscounties of Famagusta and Nicosia being reserved for Cypriots. A Great Council replaced the *Haute Cour*, but did not leave any real power to the Frankish baronage, by now a commingling of military adventurers from all over the Mediterranean world.

On the whole, Venetian administration was inefficient and corrupt. It estranged the local Latin ruling class and did not manage to gain the loyalty of the Greek population. The island remained a colony and a military base only for the Venetians, and one inadequately manned at that. The economy continued its decline, aggravated by natural disasters in the course of the century. The burden of the tribute to the Mamlūk sultans remained till 1517, when it became payable to the Ottoman sultan at Istanbul. The monopolistic exploitation of the island's resources did not encourage local enterprise. Apart from salt and grain, cotton, cultivated since the early 14th century, now became the major source of revenue, replacing sugar cane. Various forms of taxation pressed hard upon the labouring population. A conspiracy against Venice in 1562, led by a Greek, one Jacob Diassorin, was suppressed. Its dangerous aspect was that the rebels had made contact with the Ottomans. The Venetians now modernised the island's defences, and three fortresses, those of Kyrenia, Nicosia and Famagusta, were to be the sole defensible places; old fortifications like St. Hilarion, Buffavento and Kantara were dismantled by 1567.

The Ottoman threat hovered over Cyprus during the rule of Venice, and in the years following the Ottoman-Venetian peace treaty of 1540 (cf. texts ed. by Bonelli, Lehmann and Bombaci), pressure increased. The admiral Piyāle Pas͟ha promoted the continuation of a naval policy aimed at annexing the Latin-held islands in the Levant seas on the routes of Ottoman communications; Chios and Cyprus, the principal among them, were both already tributary to the Porte. In the end, the pro-Venetian peace party at the Porte, Soḳollu Meḥmed Pas͟ha's, gave in to the war party, and the attack on Cyprus was decided for the early spring 1570. Joseph Nasi, alias Don Juan Micas, seems to have been implicated here.

Selīm II (1566-74) issued his orders for war in 1568. A *fetwā* by the *s͟heyk͟h ül-Islām* provided a justification for breaking the peace (cf. text in Pečewī, i, 386-7, tr. in d'Ohsson, *Tableau*, ed. 1824, v, 73 f. = *GOR*, iii, 566 f.). Preparations continued during 1569. On 28 March 1570 the Ottoman envoy Ḳubād formally handed to the Senate and the Doge Sultan Selīm II's demand for the cession of Cyprus, which was refused. In the meantime, Lâla Muṣṭafā Pas͟ha, the fifth vizier [*q.v.*] was appointed *serdār*, and Piyāle Pas͟ha, the third vizier [*q.v.*], was made commander of a fleet of 80 galleys and 30 galliots, followed by ʿAlī Pas͟ha with troops, munitions and materials for the land campaign.

On 3 July 1570 the Ottoman fleet appeared before Larnaca (*Les Salines*). A Holy League created by Pope Pius V, Spain and Venice failed to organise a timely counterattack. The Venetian commander, the *Luogotenente* Nicolo Dandolo, had to limit himself to the defence of the fortress towns. On 25 July 1570 the siege of Nicosia began, and ended on 9 September when the city was taken by storm. Kyrenia capitulated without a fight 5 days later. The population

in the countryside seems not to have opposed the invaders at all. The fortress city of Famagusta still held out. The Ottomans began the siege in September 1570. The fleet of the Holy League never came nearer than Castelorizo island, and only small Venetian reinforcements reached Famagusta in January 1571. The new season of war began in the middle of April 1571, when work on the siege trenches and mines was begun in earnest. Heavy bombardments, mining and ensuing man-to-man fighting exacted a heavy toll (50-80,000 on the Turkish side, out of a force totalling 250,000 or more). Marc Antonio Bragadin surrendered on 1 August upon condition of a free withdrawal of troops with their dependents. Lala Muṣṭāfā Pas̲h̲a did not, however, keep to the treaty of surrender in the end, and the Venetian commander and many of his staff were massacred.

3. *Ottoman Rule (1571-1878).*

By a treaty of 7 March 1573 Venice formally ceded Cyprus to the Ottoman Sultan and agreed to pay a war indemnity of 300,000 ducats.

Already, by an imperial order of 9 September issued by the *serdār* Lala Muṣṭāfā Pas̲h̲a after the capture of Nicosia, Cyprus had been made an *eyālet* or *beglerbegilik*, with Muẓaffar Pas̲h̲a as the first Ottoman governor. Next to the *beglerbegi* were appointed, as usual, a chief *ḳāḍī* of the province and a *defterdār*. The new province comprised eight *sand̲j̲aḳ*s: *merkez* or Nicosia (Lefḳos̲h̲a), and on the mainland Ičel, Sis, ʿAlāʾiyye (Alanya), Ṭarsūs, Ṭarāblus and S̲h̲ām (till 1573) (all with the *tīmār* system), and Kyrenia, Paphos (Baf) and Famagusta (Magos̲h̲a) (with *sālyāne* [*q.v.*]). Apart from the main towns, there were, according to the 1572 *taḥrīr*, 905 inhabited and 76 desolate villages.

Population numbers of Ottoman Cyprus fluctuated greatly; from the 18th century many observers indicated ± 80,000, but some observers 200,000, both figures contrasting with the census result of 1572 which produced ± 85,000 taxable heads of family (*k̲h̲āne*). Ewliyā Čelebi indicated 30,000 Moslems and 150,000 infidels in around 1670-5. Probably the reports of the depletion of the island in the first centuries of Ottoman rule have been exaggerated. The first census after the British occupation in 1881 showed a total population of 185,630.

The organisation of the new province was based on a new survey of population and revenue, *taḥrīr*, ordered by a *fermān* of 19 D̲j̲umādā II 979/9 October 1571 to the newly-appointed *beglerbegi* Sinān Pas̲h̲a. This survey is recorded in the *defter-i mufaṣṣal-i Ḳibrus* dated 18 October 1572 (Ankara tapu ve kadastro arşivi, Old records No. 506/64). Government was to be according to Islamic and Ottoman law. A major change was the grant of *mīrī* lands in usufruct to the native farmers, who were freed from serfdom, the feudal system being abolished. The amount of *d̲j̲izya* (= *k̲h̲arād̲j̲*) [*q.v.*] was one gold piece per head of family. In the other forms of taxation, the Ottoman government also exercised moderation and produced a favourable change in respect to Venetian and Lusignan policy.

The abolition of the *mète du sel*, for instance, resulted in a sharp decrease of revenue, though production of salt was not reduced (Inalcık, *Ottoman policy* ... [see Bibl.], 60 f.). Forced labour was abolished in practice as well. From 45 % to 67 % of taxes were levied in kind, as elsewhere in the Ottoman provinces; *d̲j̲izya* and *ispend̲j̲e* [*q.vv.*] were paid in cash.

A squadron of galleys was stationed at Famagusta and Kyrenia. Ottoman troops garrisoned on the island numbered 3,779 including 1,000 Janissaries, established in Nicosia, Limasol, Paphos, Famagusta and Kyrenia. A great number of Anatolian Turks from the regions of Ḳonya, Ḳaramān, Niğde, Içel, Alanya, Antalya, Mentes̲h̲e and Deñizli were settled on the island as so-called *sürgün* (cf. Barkan, in *IFM*, xi [1949-50], xv [1955], *fermān* of D̲j̲umādā I 980/21 September 1571 to the *Ḳāḍīs* of Ḳaramān, Anadolu and D̲h̲ulḳadriyye; see *Muhimme defteri*, 19, pp. 334-7, no. 669, publ. in *ibid.*, 552-3). In total, 1689 families immigrated by 1572, mainly farmers. In 1581 8,000 families were registered as immigrants (MD 43, cf. C. Orhonlu, art. in *Kıbrıs tetkikleri kongresi* [see Bibl.], 99-103). Conversion of Latin and Greek Christians added little to the number of Muslim "Turkish" population, amounting to only about 400.

A major contribution to the welfare of the native Greek population was the Ottoman decision to abolish the Roman Catholic hierarchy and to restore the Orthodox Church of Cyprus under its archbishop. This prelate was made representative of his community vis-à-vis the Ottoman government as the Ethnarch or head of the Greek community. It meant an increasing degree of autonomy for the Orthodox Greek population under its own chosen leaders, and the relatively unhindered development of its own cultural tradition into modern times. This privileged status of the Greek population, together with the new dominating but smaller group of Turkish Muslims on Cyprus, was to form the basic situation of the Cypriots down to modern times. The Latin element entirely lost its former status. It survived only in small numbers, profiting from diplomatic protection within the framework of the Capitulations system [see IMTIYĀZĀT].

Ottoman possession of the island was not seriously threatened after 1571. The Grand Duke of Tuscany organised a raid on Famagusta in 1607 at the time of his grand oriental scheme involving Fak̲h̲r al-Dīn [*q.v.*], *amīr* of the Druzes, and the rebel D̲j̲ānbulāt ʿAlī Pas̲h̲a [*q.v.*]. The Veneto-Ottoman war of Candia (1645-69) did not have any great effect on Cyprus. In the 17th and 18th centuries, Cyprus was still an important centre of Levant trade, cotton and salt being valuable commodities. Consuls of Venice, France, of the Dutch Republic (since 1613) and of England resided at Larnaca, the factory (*iskele* [*q.v.* in Suppl.]) of the island. The consuls and their national groups of foreign residents sometimes played an important political as well as a commercial role on the island, especially in times of rebellion.

The importance of Cyprus decreased after the conquest of Crete was completed in 1669. At that time, the *beglerbegilik* was incorporated into the province of the *Ḳapudān Pas̲h̲a*, who sent a deputy-governor, the *müsellim*. The role of the Orthodox hierarchy in the administration increased at the same time. Strife among the Ottoman notables of Nicosia led to armed conflict, which in its turn caused the Porte to interfere by sending troops repeatedly. Čifutog̲h̲lu Aḥmed Pas̲h̲a at last succeeded in defeating the rebels and executing their leader Boyad̲j̲ı Meḥmed Ag̲h̲a in *ca.* 1690. In 1703 Cyprus was transformed into a *k̲h̲āṣṣ* domain of the Grand Vizier. The government was now exercised by a *muḥaṣṣil* (*taḥṣīldār*) in the name of the latter, who was a farmer of taxes at the same time. The frequent change of these functionaries, as elsewhere, led to overburdening by taxation. In 1745 Cyprus once

again became an independent province under its own *pasha* for a few years. Abū Bekir Pasha (1746-8) exercised his charge satisfactorily, bequeathing to the island an aqueduct serving Larnaca, the harbour and passing ships (*waḳfiyya* of 12 Rabīʿ I 1161/12 March 1748, in Luke, *Cyprus*, 69-74).

In 1754 a *khaṭṭ-i humāyūn* was issued at the request of the Archbishop and suffragans to fix the amount of the *kharādj* together with the *maʿishet* and *nuzūl* taxes at 21½ piastres per head on 10,066 assessments. The bishops acquired the status of *Ḳodjabashî* (Gr. *demogeron*), responsible for the peace and the payment of taxes by the Greek subject population. In 1764 Čil ʿOthmān Agha, *muḥaṣṣil* of the Grand Vizier and a *mültezim*, doubled the *kharādj* on Christians and Muslims alike, who rose in revolt and killed him. The revolt lasted till August 1766. Cyprus suffered the depredations of the Russian fleet after the destruction of the Ottoman one (Česhme 5-7 July 1770) till 1774. From 1777 to 1783 Ḥādjdjī ʿAbd ül-Bāḳī Agha was *muḥaṣṣil*. By this time, the actual administration and levying of taxes was shared between the Ottoman administrator and the Archbishop and bishops, who employed the Greek "Dragoman of the Saray" as their agent also. In 1804 a revolt of the Turkish troops broke out against the Archbishop and the dragoman Ḥādjdjī Georgiakis Kornesios (executed in 1809), and this lasted till 1805.

The Greek Cypriots contributed little to the Greek War of Independence (1821-9). The little involvement there was (1821) gave the *müsellim* the pretext for, firstly, a general disarmament of all Christians. Then the leading personalities were arrested and put to death in July 1821, among them the Archbishop Kyprianos (1810-21) and three bishops. After the massacre there followed a partial confiscation of the possessions of the victims and of the churches and monasteries on the islands, although much was restored later. The Christians living within the fortresses of Nicosia, Famagusta and other towns were ordered to remove themselves to the outside, a situation which has remained. The archbishops never recovered their powerful pre-1821 position. The Greek Kingdom was recognised by the Porte in 1829, and this caused the beginning of nationalist aspirations of *enosis* amongst the Greek Cypriots. The overtaxation of the island's resources continued to frustrate a fundamental improvement of its economy, and revolts by both groups of the population occurred in 1833.

In 1838 the era of the *Tanẓīmāt* [*q.v.*] set in. By 1849 Cyprus was reformed as a *sandjaḳ* of the province of the Islands of the Aegean Sea, *Djezāʾir-i baḥr-i sefīd* [*q.v.*] and administered by a *müteṣarrif*, assisted by a *dīwān* or council where Christians and Muslims were represented. Governors followed each other in quick succession. In 1861 Cyprus became an independent *sandjaḳ* (Hill, iv, 239). The second *tanẓīmāt* decree of 1856 was applied in Cyprus, and the effects of reform were becoming noticeable during the last decades of the Ottoman administration (1856-78), when courts came into being. The population increased from *ca.* 100,000 in 1840 to 200,000 in 1862. The island's economy progressed moderately, and Larnaca remained the principal port. The administrative status of Cyprus was however reduced again in 1868 to a *sandjaḳ* in the *wilāyet* of the Islands, but restored in 1870.

4. *The British Occupation 1878-1959.*

A few days before the Congress of Berlin, Great Britain concluded with Sultan ʿAbd ül-Ḥamīd II [*q.v.*] a secret Convention of Defensive Alliance in which she promised help to defend his empire against Russian encroachment. The sultan ceded Cyprus for occupation and administration as a "place d'armes". In an annexe of 1 July 1878 it was provided that the annual surplus revenue of Cyprus, assessed from the average of the previous 5 years, was to continue to be paid to the Sultan. The so-called "tribute" in fact never reached the Sultan, but was diverted to the creditors of the Ottoman Debt instead, and this arrangement remained in force till Sir Ronald Storrs' administration in 1927. The Sultan retained his sovereign rights to the island and continued appointing its *müfti* and *ḳāḍīs*. This status gave little incentive to the British government to develop Cyprus, but elementary reforms and ameliorations were effected. With the outbreak of the First World War in 1914, Great Britain annexed the island. A representative régime was instituted (1922), with a council of 18 members, comprising 9 Greeks, 3 Turks and 6 British officials. Any proposal for union with Greece, *enosis*, could thus be deadlocked by the Turco-British bloc. The repeated refusal of *enosis* created tension between Greek Cypriots and the British. At the Peace of Lausanne (1923), Turkey formally renounced all claims to Cyprus. In 1925 Cyprus became a British crown colony.

A small number of Turks, however, opted for the Turkish nationality and left. The first great conflict between Greeks and British broke in 1931 during Sir Ronald Storrs' tenure as governor. A state of emergency was proclaimed. Military government remained till after World War II. Already in 1941, however, political parties were permitted again: a communist party A.K.E.L., a Greek nationalist party K.E.K., and a Turkish party. Trade Unions came about mainly under communist leadership. Municipal elections were held in 1943. After 1945 the British government did not consider any change of status for Cyprus. In 1950 Greek Cypriot nationalists organised a plebiscite among Greek Cypriots, and 96 % voted for *enosis*. The young Bishop of Kition, Michael Mouskos, was the organiser of this demonstration. On 18 October 1950 he was elected the "Most Blessed and Most Reverend Archbishop of New Justiniana and all Cyprus" under the name Makarios III (1919-77). In 1954 a Cyprus-born Greek officer, George Grivas, began organising an anti-British guerrilla organisation, E.O.K.A. The British government devised a new constitution for the colony without giving any hopes for independence. In early 1955 the first discussion of the Cyprus problem in the U.N.O. failed to have a pro-Greek result. Soon afterwards guerrilla warfare by E.O.K.A. began. In July 1955 the British Premier Sir Anthony Eden held the first tripartite talks on the question, with Greece and Turkey, the latter also invited to have a say as an ally of N.A.T.O. Turkey's point of view was maintenance of the *status quo* as a guarantee against *enosis*. The leader of the Greek Cypriots, Archbishop Makarios III, protested against discussion of the interests of Cyprus without the presence of its own people, meaning only the Greek Cypriots. E.O.K.A. stepped up its activities. Field-Marshal Sir John Harding was appointed governor. He opened talks with Makarios upon the base of "a wide measure of self government". This was acceptable for the Turks and nearly so for Makarios. The talks were unexpectedly broken off by order of the London government, and Makarios deported to the Seychelles Islands (9 March 1956).

E.O.K.A. terrorism came into full fury. The

British began to recruit Turkish Cypriots as policemen, who consequently also fell victim to Greek bullets; the beginning of inter-communal violence dates back from this time. A Turkish militant organisation grew up, and a Turkish Cypriot leader emerged, Dr. Fazil Küçük. At the U.N.O. meeting in February 1957, neither *enosis* nor its Turkish answer *taksim* (division of Cyprus into two parts) got sufficient support. The new British Prime Minister, Harold Macmillan, decided to release Makarios, who was not, however, allowed to return to his island, and Sir Hugh Foot was appointed governor. The Menderes government in Ankara protested against this liberal figure succeeding the Field-Marshal, and blocked the plans for self-government of Cyprus, the return of the Archbishop and talks with all Cypriot leaders. A revised Foot-Macmillan constitutional proposal contained many elements later used in the London-Zürich treaties of 1959. At the time of its announcement, Cyprus experienced the worst terrorist fighting between the two communities, between E.O.K.A. and T.M.T., the Turkish National Defence Organisation, with 200 dead in two months. At this time there were 20,000 British troops on the island.

Civil war suddenly came to an end in July 1958, although E.O.K.A. continued its fight against the British. Makarios, fearing an Anglo-Turkish co-operation to divide Cyprus, came forward in September with a proposal for independence under auspices of the U.N.O. Grivas did not support it, and *enosis* remained his only aim. Great Britain did not consider it either, but began to change its own position: 28,000 troops on Cyprus became too heavy a burden, and a Greco-Turkish conflict would harm N.A.T.O. Sovereign base areas in Cyprus would be sufficient for Britain's strategic needs. Athens wanted to prevent *taksim*; but Ankara could accept any compromise which prevented *enosis*. The U.S.A. made it clear that it would not continue supporting Great Britain in the Middle East. Any Greco-Turkish solution must be accepted.

In December 1958, the first talks between Greece and Turkey (by Averoff-Tossizza and Zorlu respectively) were held. In February 1959 the prime ministers and foreign secretaries reached agreements in Zürich. At a second meeting in London these and a draft constitution were submitted to the British government. The Cypriots had not taken part officially before, but the Cypriot leaders Makarios and Küçük were now invited to accept the agreements. Makarios was put under heavy pressure by Greece. In London, at Lancaster House on 19 February 1959, three treaties were signed by all parties:

(1) a "Treaty of establishment", Britain declaring Cyprus independent, with the reservation of two sovereign base areas.

(2) a "Treaty of guarantee": the 3 powers guarantee the independence of Cyprus and its status as defined in a number of fundamental articles of its Constitution. *Enosis* and *taksim* are forbidden, and in case of violation, all three powers together, or if not feasible, each separately, may take action to restore the *status foederis*.

(3) a "Treaty of alliance" between Cyprus, Greece and Turkey, a military alliance with headquarters at Nicosia, where 950 Greek and 650 Turkish soldiers will be stationed, was laid down as an extra guarantee for the other treaties.

Furthermore, a Constitution was laid down which came into force on 16 August 1960. The independent Republic of Cyprus, with a presidential régime and Greek and Turkish as official languages, has an executive of one President and one Vice-President, a Greek and a Turk respectively, elected by their own communities. There is a council of 10 ministers, comprising 7 Greeks and 3 Turks, deciding with a majority vote. Its decisions are subject to a veto of President and/or Vice-President. There is a Parliament of 50 (35 plus 15), with a Greek speaker and a Turkish deputy speaker, deciding with a majority vote, except in electoral municipal and fiscal legislation, when separate communal majorities are needed. (Full text in: *Conference on Cyprus. Documents signed and initialled at Lancaster House on February 19, 1959*. Cmnd. 679, London [H.M.S.O.] 1959).

5. *Independence 1960.*

After the transitory period from 19 February 1959 to 15 August 1960, Cyprus became an independent state on 16 August 1960. Its population in about 1968 was estimated at 621,500 (last official census of 1960: 557,615, with 442,521 Greeks, 104,350 Turks, 3,628 Armenians, 2,708 Maronites, 3,351 British, 2,796 Latins and 18,261 others). Reliable estimates are that in 1970 the Greeks made up 78 % and Turks 18 %, which means a slight lack of increase of the Turks.

The application of the detailed and imposed constitution caused serious difficulties. The first opposition came from Grivas, who with his followers continued to insist on *enosis*. The formation of an army caused insurmountable difficulties; the Turks wanted separate communal units and Küçük in the end used his veto against Makarios. Appointments of civil servants became problematical because the Turks could not fill all the 30 % of posts due to them. The most serious conflict was caused by the separation of municipalities, no longer desired by the Greeks. The Turks took this point as a test case for the loyal application of the constitution. When the Turks proposed to continue with it in the end of 1962, Makarios blocked it. Both parties were considered to be wrong by the constitutional court, whose members ("neutral" German lawyers) left the country not long after for fear of their lives.

On the 1 January 1963 Makarios came forward with a proposal to amend 13 points of the constitution, which was no longer functioning. The idea was to install a more unified state, with guarantees for the Turkish Cypriots, Makarios and Küçük being co-presidents.

The Ankara government declined these proposals. The intercommunal deadlock led to civil war. On 4 March 1964 a United Nations peace force was organised and a U.N. mediator was appointed. Violence continued. Makarios introduced military service, and could thus mobilise a Greek National Guard to control the extremist bands directed by Grivas from Athens. The situation worsened in the course of the year. The U.S. President Lyndon Johnson warned the Prime Minister İnönü in June that Turkey would not be protected by N.A.T.O. in case of a Russian attack after Turkish unilateral action. All over the island the Turkish Cypriots withdrew inside fortified enclaves surrounded by Greek Cypriot guerrillas and men of the National Guard. This meant a definitive change of the old settlement pattern of 120 all-Turkish and 106 mixed villages. There was a relocation to Turkish-dominated areas of at least 25,000 Turkish refugees. In 1969, 115,189 Turk refugees still remained unsettled. A precarious balance was maintained by the U.N.

Force in Cyprus (U.N.F.I.C.Y.P.). Greek Cypriots dominated the greater part of the Republic. A U.N. mediator, Galo Plaza, began his work in March 1965. Makarios and Küçük did not act together any more, nor did the cabinet or parliament. Makarios kept on insisting that the imposed constitution was impracticable. Küçük maintained that a limitation of independence was necessary for the survival of the Turkish community, which must never be treated as a minority, and proposed *taksim*. Neither of the two Cypriot parties was able to make concessions.

Greco-Turkish talks in 1966 led to no results. In the autumn of 1967, violence flared up again after Greek Cypriot provocation. The Ankara government threatened intervention. The Athens Junta government gave in, and withdrew Grivas from the island. Makarios's position had now become the stronger one. Küçük proclaimed a separate transitional government for all Turkish sectors in December 1967. On 25 February 1968, presidential elections were held which resulted in a 95.4 % vote for Makarios and his independence policy. Concessions were granted to the Turks. R. Denktaş was allowed to return and was elected president of the Turkish Communal Chamber. He conducted intercommunal talks with G. Clerides in June, July and autumn of 1968 and in the spring of 1969. On 8 March 1970, an attack was made on President Makarios, probably by Greek ex-E.O.K.A. members. Parliamentary elections were held in July 1970 separately by both communities.

The year 1971 saw talks on Cyprus by the governments of Athens and Ankara in Lisbon (by Foreign Ministers Olçay and Xanthopoulos-Palamas). The communal talks between Denktaş and Clerides were also continued. In September, General Grivas returned secretly to organise a new E.O.K.A. terrorist (1972) movement, mainly directed against Makarios' position, but also a menace to Turkish Cypriots. In March 1972 Grivas, assisted by the Bishops of Paphos, Kitium and Kyrenia, staged a coup to defrock the President-Archbishop and followed it up with raids and killings among Makarios's party which continued during 1973. Grivas died on 27 January 1974. Makarios's conflict with the Athens Junta led to the overthrow by Greek army officers of his government on 15 July 1974.

Led by an E.O.K.A. terrorist, Nikos Sampson, the coup seemed to aim at *enosis*. The Turkish government invoked the Treaty of Guarantee and intervened unilaterally. On 20 July massive Turkish troop landings were effected near Kyrenia and elsewhere. A short war ensued between the Turkish army units and the Greek Cypriot National Guard, which led to a lasting division of the island along the cease-fire line, stretching from the East, south of Famagusta to the West, near Lefka including the Turkish zone of Nicosia. Massive relocation of the population was the result, with at least 200,000 displaced persons. In December 1974 Makarios returned to Cyprus as President. His authority was now, however, less. The new leaders of the two communities are G. Clerides and R. Denktaş, both lawyers by profession. Intercommunal talks were continued by them in 1975 without significant results, and on 13 February 1975 Denktaş announced the formation of a separate Turkish state in the northern half of Cyprus. The intercommunal talks were resumed in Vienna in April under the auspices of U.N. Secretary-General K. Waldheim.

On 3 August 1977, President Archbishop Makarios III died aged 63. S. Kyprianou succeeded him as President, and Bishop Chrysostomos of Paphos was elected head of the Orthodox Church of Cyprus in the course of the year. Intercommunal talks were resumed in January 1978 under auspices of the U.N.O. Secretary-General between Kyprianou and Denktaş.

The Cyprus Question, one of the last remnants of the Eastern Question, remains to be solved on the both national and international levels.

KUBU, a sub-district (*kecamatan*) of the regency (*kabupaten*) of Pontianak, situated in the south of the delta of the Great Kapuas river, in the Indonesian province of Western Kalimantan in Borneo [*q.v.* in Suppl.]. In 1971 it had 16,031 inhabitants, among them 643 foreigners, most of them Chinese. The scattered population is mainly of mixed Arab, Buginese, or Malay origin, besides the Chinese and few Dayaks. Since 1955, the Indonesian government has tried to open some areas for Javanese immigrants.

The family which ruled this area until 1958 was of Arab descent originating from Ḥaḍramawt. The founder of the kingdom was Sayyid (according to others S̲h̲arīf) Īdrus al-Īdrus, who settled not far from the mouth of the river Terentang with a few Arab, Buginese and Malay followers in *ca.* 1780, soon after his brother-in-law, the Arab adventurer S̲h̲arīf ʿAbd al-Raḥmān al-Ḳadrī, had founded the sultanate of Pontianak. The capital and kingdom received its name from an entrenchment (Malay *kubu*) thrown up as a defence against raids by pirates. He put himself under the protection of the Dutch East India Company, who recognised him as a ruler with the title *tuan* (lord). One of his sons, ʿAlawī bin Īdrus, because of his opposition against the Dutch and favour of the British, left Kubu in 1823 and finally settled in Sarawak; some of his descendants have had a certain political influence there, especially since independence (1963).

In 1910, the Dutch introduced a *bestuur comité* in Kubu, consisting of three notables, each of whom was allotted a certain territory as an appanage. The last king, Ḥasan bin Zayn, was appointed as head of the *bestuur comité* by the Japanese in 1943, before he was elected head of the self-governing kingdom in 1949. In 1958, the monarchy was abolished and Kubu was transformed into its present administrative position as a *kecamatan*. The predominant religion is Islam, but this is mixed with animistic beliefs.

(W. H. RASSERS — [O. SCHUMANN])

KŪČAK KHĀN DJANGALĪ, MĪRZĀ, known also as Shaykh Yūnus (1880-1921), Persian revolutionary and the first person to declare a republican régime in Iran. He was born into a lower middle class family of Rasht, in the north of Iran, and studied Arabic and other religious subjects in the traditional schools in his region. He then moved to Tehran, continuing his studies in a religious school called the *madrasa-yi maḥmūdiyya*. His early training in traditional schools, together with his association with the Russian revolutionaries in Tiflis and Baku in 1908, plus his close co-operation with the militant Iranians involved in the Persian Constitutional Revolution of 1905-11, developed in Kūčak Khān a strong sense both of revolutionary patriotism and also of devotion to Islam. We therefore see him occasionally consulting the Ḳur'ān as well as setting up sessions for reciting the heroic poetry of Firdawsī [*q.v.*] (Ibrāhīm Fakhrā'ī, *Sardār-i Djangal Mirzā Kūčak Khān*, Tehran 1965, 37-8). In 1909 Kūčak joined the revolutionary group of Gīlān aimed at overthrowing the then despotic Shāh, Muḥammad ʿAlī (reigned 1907-9). The Gīlān Bakhtiyārī forces moved on Tehran victoriously in July 1909 while Kūčak Khān was suffering a severe back injury caused by carrying a heavy gun during the expedition.

After this short-lived victory on the part of the constitutionalists, Muḥammad ʿAlī Shāh fled to Russia, where he made an attempt to regain his throne. A year or so later he entered Iran and, with the help of some Turkoman supporters, he moved towards Tehran. At this time (1911) Kūčak Khān joined the government troops in Māzandarān and "took many heroic actions" against the former Shāh's forces (Aḥmad Kasravī, *Ta'rīkh-i hidjdahsāla-yi Ādharbāydjān*, Tehran 1961, 181). In this expedition, Kūčak Khān was wounded. After his recovery, he was denied residence in Rasht by the then Consul-General of Tsarist Russia; hence he moved to Tehran, suffering extreme poverty.

While in Tehran, Kūčak Khān took an active interest in the idea of Pan-Islamism which was then (1913) being propagated by the Ottomans and which enjoyed a considerable following in Tehran and elsewhere. Kūčak Khān had a series of meetings and discussions with religious and political personalities concerned about the future of Iran, and finally decided to undertake armed struggles against the British-backed government of Iran. In 1914, therefore, he went to Gīlān and rose against the government and, with the help of some German and Ottoman advisers, organised his Pan-Islamic group, with the newspaper *Djangal* as its official organ, the latter first appearing in 1917.

After the Soviet Revolution, the termination of Tsarist claims on Iran and the conclusion of the Anglo-Persian Agreement of 1919 which established British control over the Persian army, customs, and financial affairs, Kūčak Khān, like other revolutionary leaders such as Khiyābānī [*q.v.*] and Muḥammad Taḳī Khān Pisyān, intensified his campaign against the British. He established friendship with the Russian Bolshevik régime and in the name of the liberation of Iran, in May 1920, he proclaimed the Socialist Republic of Gīlān.

To Kūčak Khān's revolution was, of course, opposed the British-backed government of Tehran; a number of clashes therefore took place between the Djangalīs and the opposing British and Persian troops. There were also internecine fights between Kūčak Khān on the one hand and other Djangalī leaders, such as Iḥsān Allāh Khān and Khālū Ḳurbān and a number of the ʿAdālat Party members, who held extremist communist views. These conflicts finally resulted in the murder of a prominent revolutionary, Haydar Khān ʿAmū Ughlī [*q.v.* in Suppl.]. In the meantime, the pro-British Sayyid Ḍiyā' al-Dīn Ṭabāṭabā'ī set up the Zarganda Committee, which was joined by a number of the large landowners of Gīlān such as Fatḥ Allāh Khān Sardār Manṣūr. At the same time the Soviets decided to establish friendship with the British and the government of Tehran, culminating in the Soviet-Persian Agreement of 1921, on the basis of which the Soviet Ambassador to Tehran, M. Rothstein, wrote a long letter to Kūčak Khān urging him to put an end to his revolutionary activities. Thus abandoned, Kūčak Khān took refuge in the forests of Gīlān, and shortly afterwards his frozen corpse was found and his head was taken to the authorities.

Kūčak Khān's writings and manifestos suggest that he was aiming at a united Iran without any foreign interference, including that of the Soviets. He believed in land reform and in compulsory education, and during his short control over Gīlān, he did carry out some land reform and founded a number of public primary schools in Sawmaʿasarā, Shaft, Kasmā, and Māsūla.

The evaluation of the revolutionary activities of Kūčak Khān has caused controversy, and many contradictory accounts have also been given concerning the factual history of the Djangalī movement. He has been called a "willing puppet" of the Soviets (George Lenczowski, *Russia and the West in Iran, 1918-1948*, Ithaca 1949, 60). On the other hand, Soviet writers (*The borderlands of Soviet Central Asia*, in *Central Asian Review*, iv [1956], 287-331), as well as the Iranian revolutionary groups (S. ʿAwn Allāhī, *Inḳilāb-i kabīr-i sūsiyālīstī-yi uktubr va nahḍat-i kumūnīstī va kārgarī-yi Īrān*, and Taḳī Mūsawī, *Inḳilāb-i uktubr va nahḍat-i Gīlān*, both in *Inḳilāb-i uktubr va Īrān*, ed. Ḥizb-i Tūda-yi Īrān, 1967, 241-62, 263-74; *Djunbish-i kumūnīstī-yi Īrān*, in *Tūda: Urgān-i sāzmān-i inḳilābī-yi Ḥizb-i Tūda-yi Īrān dar khāridj-i az kishwar*, No. 15, 1969, 22 ff.) do not seem to have paid enough attention to the eventual Soviet abandonment of the Djangalī movement; this latter question has constituted the point of emphasis of a number of other writers (Muṣṭafā Shuʿāʿī, *Nigāhī bi rawābiṭ-i shūrawī va nahḍat-i inḳilābī-yi Djangal*, Tehran 1968) who have considered Kūčak Khān to be a national hero. A third group of the accounts are hostile to the movement, expressing openly the attitude of the big landowners of Iran, particularly of those of Gīlān; the best example of this group of literature is the anonymously-written book *Ta'rīkhča-yi Djangaliyān*, Tehran 1918.

(Abdul-Hadi Hairi)

ĶŪČĀN, modern form of the mediaeval Islamic Khabūshān/Khūdjān, a town of northern Khurāsān on the main highway connecting Tehran and Mashhad. It lies at an altitude of 4,060 feet in the fertile and populous Atrek River-Kashaf Rūd corridors, on the headwaters of the Atrek and between the parallel mountain ranges of the Kūh-i Hazār Masdjid on the north and the Kūh-i Shāh Djahān and Kūh-i Bīnālūd on the south; the modern town lies several miles upstream, sc. to the east-south-east, of the mediaeval town.

Khabūshān was apparently the earliest Islamic form of the town's name, although nothing is known about it during the period of the Arab conquests and the ensuing two or three centuries. But already in the 4th/10th and early 5th/11th centuries, such writers as Ibn Ḥawḳal; ed. Kramers, 433, tr. Kramers-Wiet, 419, Muḳaddasī, 318-19, the author of the *Ḥudūd al-ʿālam*, tr. Minorsky, 103, § 23, and Bayhaḳī, *Taʾrīkh-i Masʿūdī*, ed. Ghanī and Fayyāḍ[1], 604, 607, tr. Arends[2], 735, 739, spell its name as Khūdjān. Samʿānī (who had personally visited the town), *Ansāb*, ed. Hyderabad, v, 223-4, repeated in Yāḳūt, ed. Beirut, ii, 399-400, says that the locals pronounced Khadjdjān. The geographers and others describe it as the chef-lieu (*ḳaṣaba*) of the rich and flourishing rural district (*rustāḳ*) of Ustuwā (the Ἀσταυηνή of Greek sources), which was administratively a dependency of Nīshāpūr and comprised 93 villages. It constituted the granary of Nīshāpūr, growing corn and fruits in both rain-watered fields (*mabākhis*) and in those irrigated by *ḳanāts* [*q.v.*], cf. Bosworth, *The Ghaznavids, their empire in Afghanistan and eastern Iran 994-1040*, 153-4. Cotton was also grown and textiles produced. Concerning the religious complexion of the district, we learn that in the early 5th/11th century the doctrines of the Shāfiʿī *madhhab* were promoted in Khūdjān and Ustuwā by the *faḳīh* Abū ʿAmr Farāhī (Muḥammad b. al-Munawwar, *Asrār al-tawḥīd fī maḳāmāt al-Shaykh Abī Saʿīd*, ed. Dhabīḥ Allāh Ṣafā, Tehran 1332/1953, 24); at this time, the famous Shāfiʿī scholar Abu 'l-Ḥasan ʿAlī al-Māwardī [*q.v.*] served for a while as *ḳāḍī* of Ustuwā before moving to Baghdād (cf. H. Halm, *Die Ausbreitung des šāfiʿitischen Rechtsschule von den Anfängen bis zum 8./14. Jahrhundert*, Wiesbaden 1974, 96). By the Il-Khānid period, the name Ustuwā was going out of use, though still used in the tax-registers, according to Ḥamd Allāh Mustawfī, *Nuzha*, 150, tr. 149.

Ḳūčān makes sporadic appearances in the mediaeval Islamic chronicles, since it lay on the principal route from Gurgān and the Caspian provinces to Ṭūs and Nīshāpūr, and because the pasture grounds of the upper Atrek valley were especially attractive to powers with nomadic followings, such as the Saldjūḳs, the Mongols and the Il-Khānids. It played a part in the manoeuvrings of Masʿūd of Ghazna and the Saldjūḳs under Ṭoghrīl Beg during the struggle for Khurāsān (Bayhaḳī, *loc. cit.*). In 551/1156 it was the meeting-place of the Khwārazm-Shāh Atsïz [*q.v.*] and the Ḳarākhānid Maḥmūd Khān, after the latter had invited the Shāh into Khurāsān to combat the Oghuz captors of Sultan Sandjar, and it was in Ḳūčān that Atsïz died shortly afterwards (Barthold, *Turkestan down to the Mongol invasion*[3], 330-1). The town suffered badly during Čingiz Khān's attack on Khurāsān. According to Djuwaynī, the Mongol general Sübetey wrought great slaughter at Khabūshān, Isfarāʾin [*q.v.*] and (?) Adkan, and for nearly 40 years the town lay devastated and depopulated. Then in 654/1256, Djuwaynī—who had with considerable acumen purchased a quarter of the town from its inhabitants—himself persuaded Hülegü to rebuild it. The latter issued a *yarlïgh* for the repair of the *ḳanāts* and the rebuilding of the houses and markets, all at his own expense, and the *amīr* Sayf al-Dīn Aḳa expended 3,000 *dīnārs* on reconstructing and restoring the Friday mosque and cemetery (Djuwaynī-Boyle, i, 146, ii, 617, cf. Boyle, in *Cambridge history of Iran*, v, 342).

Ķūčān thus enjoyed a recovery of prosperity under the later Mongols and Il-Khānids. Rashīd al-Dīn mentions that there was an imperial workshop (*kārkhāna*) there (Petrushevsky, in *ibid.*, v, 513), and also that Ghāzān, when governor of Khurāsān and himself still a Buddhist, built a Buddhist temple in the town for those devotees within the Mongol court entourage and official classes (*Djāmiʿ al-tawārikh*, ed. Alizade, iii, Baku 1957, 373, cf. D'Ohsson, *Histoire des Mongols*, The Hague 1834-5, iv, 147-8). However, Ķūčān had at some point of time also acquired an *imāmzāde* or saint's tomb of some importance, sc. that of Ibrāhīm, son of the Eighth *Imām* of the Shīʿa, ʿAlī al-Riḍā.

The whole Atrek-Kashaf Rūd corridor lay in the front line of Persian defences against the Özbegs during the Ṣafawid period. Hence Shāh ʿAbbās I settled Kurdish tribesmen in northern Khurāsān, to the number, it is said, of 15,000 families, and subsequently, what were in effect a string of Kurdish tribal principalities grew up along the frontier, with hereditary chieftains and exemption from taxation in return for maintaining armed cavalrymen against incursions from Central Asia. Ķūčān came within the area of the Zaʿfarānlū Kurds, whose hereditary leaders had the title of *Ilkhānī* bestowed upon them. Nādir Shāh had an especially consistent policy of resettling peoples in frontier regions for strategic purposes, and during his reign (1148-60/1736-47) there were considerable further implantations in northern Khurāsān, including the Ķūčān district (see on all these population movements, J. R. Perry, *Forced migration in Iran during the seventeenth and eighteenth centuries*, in *Iranian studies, Jnal. of the Society for Iranian Studies*, viii/4 [New York, Autumn 1975], 205 ff.).

The local chiefs of Ķūčān were nevertheless frequently in revolt against the Persian central government. Nādir Shāh was killed in 1160/1747 whilst engaged in the subjugation of the town, and a nearby hill is still called Nādir Tepe. In the reign of the Ķādjār Fatḥ ʿAlī Shāh, the *Ilkhānī* Riḍā Ķulī Khān (who entertained the British traveller J. B. Fraser in Ķūčān in 1822) revolted against his overlord, so that the Shāh's *walī ʿahd* or heir, ʿAbbās Mīrzā [*q.v.*], came and suppressed the outbreak, razing the town's walls and causing much destruction within it. Severe earthquakes in 1852, 1871, 1893 and 1895 increased the devastation, and Curzon, who was there in 1889, found many ruinous houses there, estimating the population at less than 12,000. With the pushing-forward in the later 19th century of the Russian frontier in Central Asia up to the natural frontier of the Kopet Dāgh-Kūh-i Hazār Masdjid range and the subjection to Imperial Russian rule of the formerly predatory Türkmens, the three Kurdish principalities of northern Khurāsān, Ķūčān, Budjnurd [*q.v.*] and Darreh Gaz, lost much of their military and strategic raisons d'être, and Curzon noted that the power and prestige of the then *Ilkhānī*, Shudjāʿ al-Dawla Ḥusayn Khān b. Riḍā Ķulī Khān, had diminished (G. N. Curzon, *Persia and the Persian question*, London 1892, i, 94-112).

In the present century, Ķūčān has remained the centre of an important wheat-growing area, supplying much of the rest of Persia; these crops are grown, as in mediaeval times, both on *ķanāt*-irrigated land and on *daymī*, dry-farmed (cf. *Admiralty handbook, Persia* London 1945, 40, 43 439, 453). Administratively, Ķūčān is now the chef-lieu of a *shahrastān* or district of the 9th *ustān* or province of Khurāsān; the population of the *shahrastān* in 1950 was *ca.* 111,000 (cf. *Farhang-i djughrāfiyā-yi Īrān*, ix, 307).

Bibliography: In addition to sources given in the article, see Le Strange, *The lands of the Eastern Caliphate*, 393, and for the accounts of European travellers who visited Ķūčān, see A. Gabriel, *Die Erforschung Persiens*, Vienna 1952, 157-61, 221-3, 252. (C. E. Bosworth)

KÜČÜK ĶAYNARDJA (modern Tkish. Küçük Kaynarca, "little hot spring", a village in north-eastern Bulgaria, 25 km. south-east of Silistre, noteworthy as the place at which was concluded between the Ottoman and Russian Empires on 12 Djumādā I 1188/$^{10}/_{21}$ July 1774 one of the most famous and important treaties in the history of diplomacy. The Treaty of Küčük Ķaynardja, which brought to an end a disastrous war over the partition of Poland on which the Porte had irresponsibly embarked six years previously, contained terms which were uniformly regrettable in their consequences for the Ottoman state and, in particular, for the khānate of the Crimea.

The treaty, which consisted of 28 articles and a separate secret convention of two articles, was the final outcome of protracted negotiations for a truce which had been conducted by the two sides since 1186/1772. Only in the campaign of 1188/1774, with Russian forces strongly entrenched south of the Danube and with the strong fortress of Shumen (Shumla, Shumnī), which commanded the passage of the Balkan range, abandoned by the Ottomans, were negotiations pushed rapidly to a conclusion. The Ottoman field-commander (*serdār-i ekrem*), the Grand Vizier Muḥsinzāde Meḥmed Pasha, nominated as plenipotentiaries his *kāhyā-begi* Nishāndjī/Tewķīʿī Aḥmed Resmī Efendi and the then *reʾis efendi* Ibrāhīm Munīb (Münip) Efendi; the chief Russian negotiator, under the aegis of the Russian commander-in-chief, Field-Marshal Count Pyotr Aleksandrovič Rumyantsev, was Prince Nikolai Repnin, who had served as Russian ambassador at the Porte prior to the outbreak of hostilities.

Negotiations were begun and rapidly concluded in the Russian camp before Shumen on 8 Djumādā I 1188/$^{8}/_{17}$ July 1774; the actual date and place of signing were stipulated by the Russians for their historical significance. The controlling text of the treaty was drawn up in Italian; Russian and Turkish versions were also signed by the respective plenipotentiaries. Contrary to a widely-held belief, there are only minor textual variations between the Russian and Turkish versions.

The consequences of the Treaty of Küčük Ķaynardja were most unfortunate for the khānate of the Crimea. Although by the terms of art. 3 Russian forces were to evacuate its territory with the exception of the strong points of Kerč and Yeñi Ķalʿe, the Ottomans were obliged to relinquish their suzerainty over the khānate, and to concede to the Crimean Tatars a specious and unlooked-for "independence" (*serbestiyyet*). Religious supremacy over the Muslim inhabitants of the khānate was reserved to the Ottoman sultan as rightful caliph ("Supremo Califfo Maomettano"), a concept entirely alien to Islamic law, and one which was to cause endless diplomatic confusion, in part corrected by the *convention explicative* of Aynalī Ķavaķ (3 Rabīʿ I 1193/$^{10}/_{21}$ March 1779). The "independence" of the Crimea proved in fact to be merely a prelude to its absorption by Russia, on the pretext of misgovernment, in 1783 [see further, ķirim].

For the Ottomans, the consequences, in strategic

terms, of the treaty were equally ominous. Through her possession of the fortresses of Ķilburun (Ķinburun) [*q.v.*] (art. 18); Kerč and Yeñi Ķalʿe [*q.vv.*] (arts. 3 and 19); Azaķ (Azov) [*q.v.*] (art. 20) and Greater and Lesser Kabarda [see KABARDS] (art. 21), and despite restitution to the Ottomans of Özü (Ochakov) and Bessarabia, including, *inter alia*, the fortresses of Aķ Kermān, Kili, Ismāʿīl, Bender and Khotin [*qq.v.*], Russia gained a secure and permanent strategic foothold on the northern shores of the Black Sea, thus bringing to an end its four centuries' history as an Ottoman "lake". This new position of strength Russia was able immediately to exploit through further concessions (art. 11) which gave her unrestricted commercial privileges in the Black Sea and through the Straits into the Mediterranean, and the right to establish consulates and vice-consulates at will on Ottoman territory and to maintain a permanent embassy at Istanbul. A further detailed clause afforded Russia a privileged position with regard to the Christian population and the semi-autonomous hospodars of Moldavia and Wallachia (Boghdan and Eflāķ [*q.vv.*]) (art. 16), while by art. 13 the Porte was obliged to concede to Catherine II and her successors the title of *pādishāh* (*tamāmen Rusyalarinîñ pādishāhi*, i.e. "Empress/Emperor of all the Russians").

Two articles in particular (arts. 7 and 14) of the treaty have given rise to much subsequent misunderstanding. Art. 7, which in fact specifically recognised the protection of the *Ottoman* government over its own Christian subjects, permitted Russia only to make representations on behalf of a single church building—an Orthodox church in Ghalaṭa [*q.v.* in Suppl.], separate from the Russian embassy chapel, where services were to be held according to the Russian rite—and those who served in it. Art. 14, which actually gave to Russia the right to establish a church in Ghalaṭa to serve the Russian community resident there "on the example of the other Powers"—i.e., France and Austria—had already been proposed in the negotiations of 1772-3. From these articles, or possibly from those which related to Moldavia and Wallachia, or to the Archipelago (still under the occupation of the Russian fleet: art. 17) or to Georgia and Mingrelia (art. 23), but more probably from a general claim to guardianship over the Orthodox in the Ottoman Empire which was put forward by Catherine II in 1775, there derived the widely held but erroneous belief that by the terms of the Treaty of Küčük Ķaynardja Russia had acquired an "ill-defined 'right'" to exercise a protection over the largely Orthodox Christian subjects of the Sulṭān which might serve as a basis for subsequent diplomatic claims against the Ottoman state.

Two separate secret articles provided for the evacuation at an unspecified date of the Russian fleet from the Archipelago and for the payment by the Porte of a war indemnity of 15,000 purses (*kese*), i.e. 7.5 million *ķurush*.

The largely factitious "rights" in arts. 7 and 14 apart, the gains which were made by Russia as a consequence of the Treaty of Küčük Ķaynardja were considerable, and the losses in territory and prestige in which the Ottoman state was obliged to acquiesce were correspondingly severe. For the khānate of the Crimea its consequences were sombre in the extreme. To Catherine II, Küčük Ķaynardja was a treaty "the like of which Russia [had] never had before"; a recent historian has correctly characterised it as "a major step, possibly the greatest single step prior to 1955, by Russia into the Near East".

Bibliography: No satisfactory edition of the three versions of the Treaty of Küčük Ķaynardja exists. The original of the Italian and Russian-language treaty seems to be lost: the Russian text printed in Družinina, cited below, 349-60, does not derive from it (for references to other published Russian versions, see Davison, below, 469, n. 22). The original of the Turkish and Russian version has not yet been found in the Başbakanlık Arşivi, Istanbul. A register book copy exists there (Ecnebī Defterleri, 83/1, 138-49), which may be the source for the various printed versions (e.g. *Medjmuʿāt muʿāhedesi*, 5 vols., Istanbul 1294-8/1877-8 to 1880-1, iii, 254-75; Djewdet (Cevdet), *Taʾrīkh*[2], Istanbul 1301-9/1883-4 to 1891-2, i, 285-95; Muṣṭafā Nūrī Pasha, *Netāʾidj al-wuķūʿāt*[2], Istanbul 1294-1327/1877-1909, iii, 56-64). The Italian text is reproduced (from a version published in the *Storia del Anno* for 1774) in G. Fr. Martens, *Recueil des principaux traités de l'Europe*[1], 7 vols., Göttingen 1791-1801, iv, 606 38; 2nd edn. 8 vols., Göttingen 1817-35, ii, 286-322; no other version appears to exist. A French version (of no legal standing but widely regarded as authoritative in the 19th century) is most conveniently accessible in Gabriel Efendi, Noradounghian, *Recueil d'actes internationaux de l'Empire Ottoman*, i, Paris 1897, 319-34, and in *Treaties... between Turkey and Foreign Powers*, London 1855, 463 ff.

The sole monograph devoted to the Treaty of Küčük Ķaynardja is E. I. Družinina, *Kyučuk-Kaynardžiiski mir 1774 goda*, Moscow 1955; a collection of essays of unequal value by Soviet and East European historians (N. Todorov, E. I. Družinina and others) is contained in *Études Balkaniques* (Sofia), 1975/2, 74-127. For the effect of the treaty on the khānate of the Crimea, see A. W. Fisher, *The Russian annexation of the Crimea 1772-1783*, Cambridge 1970; for a more extended treatment from the Ottoman side, cf. Cemal Tukin, *Küçük Kaynarca*, in *İA*, vi, 1064-71. The most recent study is R. H. Davison, "*Russian skill and Turkish imbecility*": *the treaty of Kuchuk Kainardji reconsidered*, in *Slavic Review*, xxxv (1976), 463-83. All these works contain supplementary bibliographies and further references to sources in the relevant languages.

(C. J. Heywood)

KÜČÜK SAʿĪD PASHA (1838-1914), 19th century Ottoman statesman, seven times Grand Vizier under Sultan ʿAbd al Ḥamīd II, and twice in the Young Turk era. Born in Erzurum, Saʿīd received a traditional Muslim education until his father's death in 1853 forced him to seek an administrative career. Trained largely as an apprentice rather than in the new secular schools being established by the Tanẓīmāt [*q.v.*], he served first as secretary to the governor of Erzurum Province (1853-7) and secretary to the Anadolu Ordusu (1857-9) before entering the central bureaucracy in Istanbul. He served for some time as secretary in the *Medjlis-i Wālā* (1859-63), rising to various high positions in and out of Istanbul before becoming director of the Imperial Press (*Maṭbaʿa-i ʿĀmire*) and editor of the official government newspaper *Taķwīm-i Weķāyiʿ* (1863-8). He continued to rise in the secretarial service, becoming director of a department in the Council of State (*Shūrā-yi Dewlet*) in 1868, and of the Courts Department of the *Dīwān-i Aḥkām-i ʿAdliyye* in 1871, rising to become Chief Secretary of the Ministry of

Trade (*Tid̲j̲āret Neẓāreti*) in 1874 and Chief Secretary of the Grand Vizier a year later.

It was during these later years that Saʿīd Efendi came into contact with Prince ʿAbd al-Ḥamīd, advising him on administrative matters, so that one of the latter's first acts after his accession to the sultanate was to raise him to the rank of Pas̲h̲a and appoint him as Chief Secretary (1876-8), at which time he acquired the nickname *Küčük* ("the small one") to distinguish him from Ingiliz Saʿīd Pas̲h̲a, who also advised the sultan for a time until he was dismissed due to implication in the ʿAlī Suʿāwī affair.

Küčük Saʿīd now became the Sultan's chief instrument in the Ottoman cabinet. As minister of justice (1878-9), he worked to modernise the *Niẓāmiyye* secular court system, introducing the institution of public defender, and also securing promulgation of new commercial and criminal codes of law. In seven terms as Grand Vizier (1879-80, 1880-2, 1882, 1882-5, 1895, 1901-3, 1908), he faithfully carried out the sultan's reform programs, also taking the initiative to introduce important reforms. He developed a program to centralise government control of the provinces, modernised the financial system, increased tax collections and balanced the budgets, negotiated the settlement with the empire's foreign creditors that led to the creation of the Public Debt Commission (1881), established the Istanbul Chamber of Commerce to develop native trade and industry, modernised and expanded the system of secular schools on the elementary and higher technical levels in particular, reorganised and modernised the regular police, and made the secular courts fully independent of government interference so they could administer justice without fear of intervention. He played a major role in modernising the bureaucratic hierarchy, introducing examinations for appointment and promotion and establishing a pension system so that aged officials could retire without fear of poverty.

As the sultan became increasingly withdrawn and subject to the influence of his palace coterie, Saʿīd Pas̲h̲a became more and more fearful of his master. At the same time, his rivalry with Meḥmed Kāmil Pas̲h̲a became so intense that he at times feared for his life, and at one point refused the sultan's call to resume the Grand Vizierate. As a result, Saʿīd Pas̲h̲a was not included in the disfavour of the Young Turks for most of the sultan's advisers following the Young Turk Revolution (108), and in fact served twice more as grand vizier during the Constitutional period which followed, in 1911 and 1912, with the support of the Committee of Union and Progress, leading its fight against the Liberal Union Party, and directing the government's efforts against the Italian invasions of Libya and of the Dodecanese islands. In the face of strong military pressure in support of the Liberal Union, however, Saʿīd Pas̲h̲a resigned for the final time (17 July 1912), so that the hero of the Russo-Turkish war, Aḥmed Muk̲h̲tār Pas̲h̲a, could establish a non-party government to resolve the crisis. Saʿīd Pas̲h̲a then served as chairman of the upper house of the legislature, the Council of Notables (1913-14) until he retired shortly before his death.

KUČUM K̲H̲ĀN, a Tatar K̲h̲ān of Siberia, in whose reign this country was conquered by the Russians. Abu 'l G̲h̲āzī (ed. Desmaisons, 177), is the only authority to give information regarding his origin and his genealogical relation to the other descendants of Čingiz K̲h̲ān. According to this source, he reigned for forty years in "Tūrān", lost his eyesight towards the end of his life, was driven from his kingdom by the Russians in 1003/1594-5, took refuge with the Mang̲h̲īt (Nogay) and died among them. References to Kučum are also found in the work of the Ottoman Turk Sayfī, said to have been written in 990/1582 (Leiden MS., No. 197; tr. without a reference to the MS. by Ch. Schefer as an appendix to his translation of the history of Central Asia. *Histoire de l'Asie Centrale*, by ʿAbd al-Karīm Buk̲h̲ārī, Paris 1876, 303 ff.). Kučum's kingdom and its capital are there called "Turā"; the Russians had taken this town during Kučum's absence. Kučum afterwards returned and drove out the Russians after a long siege (one to two years), but the latter carried off his son a prisoner to Moscow. These stories seem to show that Sayfī's work was probably composed later than the year given in the title (Schefer, *loc. cit.*, Preface, p. iv, even gives the year 990 A.H. as date of death of the author).

The name of "Isker" for the capital of Kučum (near the confluence of the Tobol and Irtis̲h̲) seems to be found only in Russian sources; it is only from the latter also that the principal events of his reign can be chronologically arranged. Kučum did not inherit his kingdom from his father but had expelled his predecessor Yādigār; in 1563 Yādigār is still mentioned as king of Siberia, while in 1569 we find Kučum. In 1581 Isker was conquered by Russian Cossacks under Yermak; the Cossacks owed their victory to the use of fire-arms, then still unknown in Siberia. Kučum's son Mak̲h̲met-Kul (Muḥammad Ḳulī) was sent a prisoner to Moscow. It was not till Yermak fell in an unexpected attack (1586 or 1585) that Isker was vacated by the Russians; but by the year 1587 we find troops, who had just arrived, building the Russian town of Tobolsk near this town. Kučum did not suffer his last defeat at the hands of the Russians till 20 August 1598. He is said to have been slain by the Nogay, with whom he had taken refuge, out of revenge for his father's raids on them. The document used by Radloff (*Aus Sibirien*[2], Leipzig 1893, 146 ff.) dealing with an embassy from Kučum to Buk̲h̲ārā and the order by ʿAbd Allāh K̲h̲ān to his governor in K̲h̲ʷārazm to send teachers of religion to Siberia, cannot be genuine. K̲h̲ʷārazm was at this date an independent kingdom and not under the rule of the K̲h̲ān of Buk̲h̲ārā. The form "Közüm" adopted by Radloff is also not to be found in any historical sources.

Bibliography: Sir H. Howorth, *History of the Mongols*, ii, London 1880, 982 ff. and the Russian works used there; Hādī Aṭlāsī, *Sībīr taʾrīk̲h̲ī*, Kazan 1912, 36, 46, 67 ff., and W. Barthold's review in *ZVOIRAO*, xxiii, 421 f. (W. Barthold)

ĶUḌĀʿA, a group of Arab tribes of obscure origin. The opinions of the genealogists about their origin are contradictory. Some of them assert that they were descendants of Maʿadd, others say that they were from Ḥimyar. Both parties had recourse to traditions and utterances attributed to the Prophet, in which he is said either to have declared that Maʿadd's *kunya* was Abū Ķuḍāʿa, or to have stated explicitly that Ķuḍāʿa is a descendant of Ḥimyar. Harmonising traditions reported that the mother of Ķuḍāʿa was the wife of Mālik b. ʿAmr b. Murra b. Mālik b. Ḥimyar and later married Maʿadd, bringing with her Ķuḍāʿa, her son from the first marriage; Ķuḍāʿa was therefore later called Ķuḍāʿa b. Maʿadd. A contradictory tradition of this kind claimed that Ķuḍāʿa was the son of Maʿadd; later his mother married Mālik b. ʿAmr al-Ḥimyarī, who adopted the child, Ķuḍāʿa, and thus he was called Ķuḍāʿa al Ḥimyarī (see M. J. Kister and M. Plessner, *Notes on Caskel's Ğamharat an-nasab*, in *Oriens*, xxv-xxvi [1976], 56-7, and references in notes 43-51; also Nūr al-Dīn al-Hayt̲h̲amī, *Madjmaʿ al-zawāʾid*, repr. Beirut 1967, i, 194-5; *Ag̲h̲ānī*, vii, 77-8; al-Hāmdānī, *al-Iklīl*, ed. Muḥammad al-Akwaʿ al-Ḥiwālī, Cairo 1383/1963, i, 180-90). Some traditions say explicitly that the Ķuḍāʿī tribes related themselves to Maʿadd, but turned to the Ḥimyarī *nasab* under Muʿāwiya's pressure and bribes (see e.g. Kister and Plessner, *op. cit.*, notes 51-7; Nūr al-Dīn al-Hayt̲h̲amī, *op. cit.*, i, 194; Ag̲h̲ānī, *loc. cit.*; Iḥsān Naṣṣ, *al ʿAṣabiyya al-ķabaliyya wa-at̲h̲aruhā fi 'l s̲h̲iʿr al-umawī*, Beirut 1964, 340 3; and see al-Ķuṭāmī, *Dīwān*, ed. Ibrāhīm al-Sāmarrāʾī and Aḥmad Maṭlūb, Beirut 1960, 34, 145, 147, 149; al-Kumayt, *S̲h̲iʿr*, ed. Dāwūd Sallūm, Bag̲h̲dād 1969, nos 162, vv. 10-13, 469 vv. 1-7, 509 vv. 1-4, 523 v. 2, 550 v. 1, 606 v. 1). The name Ķuḍāʿa is an early one and can be traced in fragments of the old Arab poetry. The tribes recorded as Ķuḍāʿī were: Kalb [*q.v.*], Djuhayna, Balī, Bahrāʾ [*q.v.*], K̲h̲awlān [*q.v.*], Mahra, K̲h̲us̲h̲ayn, Djarm, ʿUd̲h̲ra [*q.v.*], Balķayn [see AL-ĶAYN], Tanūk̲h̲ [*q.v.*] and Salīḥ; the attribution of some of these tribes to Ķuḍāʿa (like Tanūk̲h̲, K̲h̲awlān and Mahra) was the subject of dispute among genealogists. Several of the clans of Ķuḍāʿa joined other tribes, adopting their pedigree and changing their tribal identity.

Among the prominent divisions of Ķuḍāʿa one may particularly refer here to Djuhayna and Balī.

1. The vast territory of Djuhayna, controlling the coastal route of the caravans between Syria and Mecca, included the localities of Ṣafrāʾ, Ṣufayna, al Marwa, al Ḥawrāʾ and Yanbuʿ; to them belonged the mountains of Raḍwā ([*q.v.*]; and see M. von Oppenheim, *Die Beduinen*, Leipzig 1943, ii, 361, on the legendary story of the hidden *Imām* living in Raḍwā), Adjrad, As̲h̲ʿar and ʿAzwar and the *wādīs* of Iḍam and al-ʿĪṣ (see e.g. al-Bakrī, *Muʿdjam mā staʿdjam*, ed. Muṣṭafā al-Saķā, Cairo 1364/1965; Yāķūt, s.v. Raḍwa; ʿArrām, *Asmāʾ djibāl Tihāma wa-sukkānihā*, in ʿAbd al-Salām Hārūn's *Nawādir al-mak̲h̲ṭūṭāt*, Cairo 1375/1956, ii, 8, 396-8 and indices; cf. Ḥamad al-Djāsir, *Bilād Yanbuʿ*, Riyāḍ n.d., *passim*, and see esp. the supplement: *bilād djuhayna wa-manāziluhā 'l ķadīma*, 156-7). Djuhayna seems to have had a clear perception of tribal identity, as can be gauged from a collection of tribal war poetry, the *ayyām Djuhayna*; some fragments of this poetry were recorded as late as the 4th/10th century (see al-Ṭayālisī, *al-Mukāt̲h̲ara ʿind al-mud̲h̲ākara*, ed. Muḥammad aṭ-Ṭandjī, in *Şarkiyat Mecmuası*, i [Ankara 1956], 37-9; see on Bug̲h̲ayt: al-Āmidī, *al-Muʾtalif wa 'l muk̲h̲talif*, ed. Krenkow, Cairo 1354, 57-8; and see on Salāma b. al-Yaʿbūb, *ibid.*, 53, 165; on the compilation of war poetry of the Ķuḍāʿī tribe of Balķayn, *as̲h̲ʿar Bani 'l Ķayn*, see *ibid.*, 23-4).

According to a tradition recorded by Ibn al-Kalbī, a Djuhanī, ʿAbd al-Dār b. Ḥudayb (or Hud̲h̲ayl in another version), intended to build a sanctuary in one of the centres of Djuhayna, Ķawdam, to rival the Kaʿba of Mecca; however, he encountered opposition on the part of his people who were reluctant to aid him in carrying out his plan (Ibn al-Kalbī, *al-Aṣnām*, ed. Aḥmad Zakī Pas̲h̲a, Cairo 1343/1924, 45; Yāķūt, s.v. Ķawdam). This report may give us a clue for assessing the attitude of some other tribal groups of Ķuḍāʿa. Ibn His̲h̲ām records a tradition according to which al-G̲h̲awt̲h̲, who was in charge of certain pilgrimage practices at Mecca, used to announce during one of the services, "O God I am following the example of others; if there is a sin it is Ķuḍāʿa's" (Ibn His̲h̲ām, *Sīra*, ed. al-Saķā, al-Abyārī, S̲h̲alabī, Cairo 1355/1936, i, 126, l. 1; Guillaume's translation, *The life of Muhammad*, Karachi 1967, 50, of the second hemistich "If that is wrong, the fault is Quḍāʿa's" is inaccurate). It is evident that this declaration points to certain sections within Ķuḍāʿa who were reluctant to acknowledge the authority of Mecca and the sanctity of the Kaʿba.

The relations of Djuhayna with the Aws and K̲h̲azradj seem to have been quite close; some Djuhanīs are recorded as allies of the Medinan families or clans (see e.g. Ibn Ḥazm, *Djamharat ansāb al-ʿarab*, ed. ʿAbd al-Salām Hārūn, Cairo 1962, 444). It is noteworthy that among the Anṣārī group who gave the Prophet the oath of allegiance at the ʿAķaba was an ally of the Banū Salima of Kalbī extraction, who joined Djuhayna and stayed with them, ʿAbd Allāh b. Unays; he gained the honourable titles of *al-muhādjiri, al-anṣārī, al-salamī, al-djuhanī al-ʿaķabī* (see e.g. Ibn His̲h̲ām, ii, 106 sup.; Ibn al-Kalbī, *Djamhara*, Ms. Br. Mus., Add. 22346, f. 73a; Ibn Ḥadjar, *al-Iṣāba*, ed. ʿAlī al-Bidjāwī, Cairo 1389/1970, iv, 15-17, no. 4553; Ibn Ķudāma al-Maķdisī, *al-Istibṣār fī nasab al-ṣaḥāba min al-anṣār*, ed. ʿAlī Nuwayhid, Beirut 1392/1972, 166-8; Ibn ʿAbd al-Barr, *al-Istīʿāb*, ed. al-Bidjāwī, Cairo 1380/1960, 869-70, no. 1477; al-Balād̲h̲urī, *Ansāb al-as̲h̲rāf*, ed. Muḥammad Ḥamīdullāh, Cairo 1959, i, 249). It was ʿAbd Allāh b. Unays who asked the Prophet on which night he should come to Medina from his abode in al-Aʿrāf during Ramaḍān, and the Prophet bade him come on the night of 27 Ramaḍān; this night is therefore named "The Night of the Djuhanī". It refers, of course, to the *laylat al-ķadr* (see e.g. *al-Ag̲h̲ānī*, xvii, 133; Ibn ʿAbd al-Barr, *op. cit.*, 870).

On the Day of Buʿāt̲h̲ [*q.v.*], Djuhayna fought on the side of the K̲h̲azradj (*Ag̲h̲ānī*, xv, 162-3; Ibn K̲h̲aldūn, *al-ʿIbar*, Beirut 1956, ii, 602), but on the eve of the encounter of *Badr al-mawʿid* they were said to have hurried to Medina (together with Balī) as allies of the Aws (al-Wāķidī, *Mag̲h̲āzī*, ed. Marsden Jones, Oxford 1966, 385, l. 11).

When the Prophet settled in Medina, he was, of course, concerned to establish peaceful relations with its neighbours, Djuhayna. Djuhayna, making a careful assessment of the fundamental change in the situation in Medina with the advent of the Prophet, were eager to secure their position in the new structure of power. According to some traditions, a delegation of Djuhayna came to the Prophet in Medina, pointed out that the Prophet alighted

"among them" (*bayna aẓhurinā*, i.e. in the area controlled by them) and requested him to conclude with them an agreement of mutual security (*fa-awthiḳ lanā ḥattā naʾmanakā wa-taʾmananā*). This treaty was indeed agreed upon between the Prophet and Djuhayna. A peculiar aspect of this treaty was the tacit agreement by the Prophet for Djuhayna not to convert to Islam; this is clearly indicated in the account about the treaty, *wa-lam yuslimū*. The implementation of the treaty occurred a short time after its conclusion; the Prophet sent a troop of less than hundred warriors to raid a tribal group of Kināna which dwelt in the neighbourhood of Djuhayna. When the Muslim warriors realised that the Kinānīs outnumbered them, they retreated asking refuge with Djuhayna. When the Djuhanīs interrogated them as to why they had gone out fighting in the holy month of Radjab, they justified their deed by mentioning that they were driven out from the *Ḥaram* (of Mecca) during the holy month. The account further tells about dissension among the Muslim warriors; a group of them wanted to remain in the place where they were staying, whilst another one planned to return to the Prophet to obtain a decision from him. When this group met the Prophet, he expressed his anger about the division that had occurred within the expedition, which having left in unity returned divided. He then appointed ʿAbd Allāh b. Djaḥsh as the commander of the troop; ʿAbd Allāh b. Djaḥsh was thus the first appointed *amīr* in Islam (Ibn Abī Shayba, *Taʾrīkh*, Ms. Berlin 9409 = Sprenger 104, ff. 28b-30a; cf. Nūr al-Dīn al-Haythamī, *Madjmaʿ al-zawāʾid*, vi, 66-7, with an essential variant, that the Djuhanīs converted to Islam after the conclusion of the treaty; and see al-Bayhaḳī, *Dalāʾil al-nubuwwa*, ed. ʿAbd al-Raḥmān ʿUthmān, Cairo 1389/1969, ii, 304-5 [the commander of the first troop, dispatched by the Prophet, was Saʿd b. Abī Waḳḳās]; Ibn Djunghul, *Taʾrīkh*, Ms. Br. Mus., Or. 5912, i, 229b).

The reports about the first cases of co-operation between Djuhanīs and the nascent Muslim community at Medina, though sometimes divergent or even contradictory, point clearly to the period preceding the battle of Badr and are connected with the earliest attempts of the Prophet at impeding the free traffic of the Ḳurashī caravans. The detachments dispatched by the Prophet were relatively small and served a twofold purpose: that of reconnoitring in case a greater force of the enemy made an appearance, and of an attacking troop in case they met with a smaller division of the enemy. It was essential in such a situation to have at their disposal a territory with a friendly population both for military enterprises and as a resort to which the force could retreat in safety. The treaty with the Djuhanīs was indeed successful, and enabled the Prophet to launch his first attacks against some Kinānī allies of Ḳuraysh; the expeditions operated indeed in the territory controlled by Djuhayna.

Furthermore, some Djuhanīs carried out certain subtle and responsible duties for the Prophet's troops: Basbas b. ʿAmr and ʿAdī b. Abi 'l-Zaghbāʾ (both allies of the Anṣārī clans) served as spies for the Muslim troops (see e.g. Ibn Ḥazm, *Djawāmiʿ al-sīra*, ed. Iḥsān ʿAbbās, Nāṣir al-Dīn al-Asad, Aḥmad Shākir, Cairo n.d., 110; Ibn Hishām, index; Ibn al-Athīr, *Usd al-ghāba*, Cairo 1280, i, 178 ult.-179; Ibn Ḥadjar, *al-Iṣāba*, i, 288, no. 640, iv, 474, no. 5486; al-Wāḳidī, 40-1; al-Balādhurī, *Ansāb*, i, 289). Another Djuhanī, Kashad, granted shelter to two other spies of the Prophet, Ṭalḥa b. ʿUbayd Allāh and Saʿīd b. Zayd; he misled the men of the Ḳurashī caravan who inquired about the spies sent by the Prophet. After the departure of the Ḳurashī caravan, Kashad accompanied the two spies to Turbān, where he met the Prophet; the Prophet wanted to grant him Yanbūʿ (as an *iḳṭāʿ* or fief), but Kashad advised the Prophet to grant it to one of his relatives (see e.g. al-Wāḳidī, 19-20; Ibn Ḥadjar, v, 590, no. 7409; Ibn al-Athīr, *Usd*, iv, 239; al-Māḳrīzī, *Imtāʿ al-asmāʾ*, ed. Maḥmūd Shākir, Cairo 1941, i, 62). Another Djuhanī, Madjdī b. ʿAmr, performed an even more complicated service for the Muslim detachment; he interposed between the small Muslim force under the command of Ḥamza b. ʿAbd al-Muṭṭalib and the Ḳurashī caravan escorted by 300 Ḳurashī riders under the command of Abū Djahl (see e.g. al-Wāḳidī, 9-10, 40-1; al-Bayhaḳī, *Dalāʾil al-nubuwwa*, ed. ʿAbd al-Raḥmān Muḥammad ʿUthmān, Cairo 1389/1969, ii, 302; Ibn Ḥazm, *Djamhara*, 446; idem, *Djawāmiʿ*, 101, cf. 110; al-Maḳrīzī, *Imtāʿ*, i, 51-2; Ibn Hishām, ii, 245, 269). Madjdī succeeded in accomplishing his task as he was an ally (*ḥalīf, muwādiʿ*) of both parties (i.e. of the Muslim party and the Ḳurashīs). It is noteworthy for the assessment of the personality of Madjdī and the reliability of the traditions that some reports state that he did not convert to Islam (see e.g. al-Zurḳānī, *Sharḥ al-mawāhib al-ladunniyya*, Cairo 1325, i, 390).

The reports about the participation of Djuhanīs in the first encounters of the Prophet with Ḳuraysh seem to be sound, and are confirmed by a tradition recorded by al-Ṭabarānī, stating that the first tribe to fight on the side of the Prophet was Djuhayna (al-Ṭabarānī, *al-Awāʾil*, Ms. Br. Mus., Or. 1530, f. 196b).

Some factors which motivated Djuhayna in concluding the treaty with the Prophet can be deduced from a report recorded by al-Samhūdī and al-Fayrūzābādī; the Prophet alighted at Dhu 'l-Marwa; Djuhanī people assembled at the place from the mountains and the plains and complained of being pressed by alien people, who were trying by force to get hold of their wells. Then the Prophet granted the people of Djuhayna the lands of Dhu 'l-Marwa, forbade them to be treated with iniquity and announced that the angel Djibrīl ordered him to consider Djuhayna as his allies (al-Samhūdī, *Wafāʾ al-wafā*, ed. Muḥammad Muḥyī 'l-Dīn ʿAbd al-Ḥamīd, Cairo 1374/1955, 1305-6; al-Fayrūzābādī, *al-Maghānim al-muṭāba fī maʿālim ṭāba*, ed. Ḥamad al-Djāsir, Riyāḍ 1389/1969, 379). It is plausible that this utterance of the Prophet confirmed Djuhayna's rights to their landed property and formed a warning for tribal groups to refrain from transgressing on the wells (sc. wells and other property) of Djuhayna, as they were the allies of the Prophet and their rights would be defended by the Prophet. The lands of Dhu 'l-Marwa were in fact granted by the Prophet to a man from Djuhayna (see Ibn Saʿd, *Ṭabaḳāt*, Beirut 1380/1960, i, 271; see on ʿAwsadja b. Ḥarmala, Ibn al-Kalbī-Caskel, *Ǧamharat an-nasab*, ii, 216; Ibn Ḥadjar, *al-Iṣāba*, iv, 739, no. 6093; on Dhū 'l-Marwa see al-Bakrī, *Muʿdjam*, s.v. Marwa).

The Prophet concluded several treaties with the various tribal groups of Djuhayna. Some of these treaties can be traced to the very early period of the Prophet's stay at Medina; they do not contain any stipulation as to conversion to Islam. There are, however, some treaties which may be attributed to a later period, when conversion to Islam became obligatory, and include instructions concerning the religious duties to be performed (cf. Ibn Saʿd, i,

270-1). A tradition recorded by Ibn Saʿd (i, 333) says that a delegation of Djuhayna embraced Islam at the advent of the Prophet to Medina; this story may, however, refer to a unit of Djuhayna, and certainly not to the whole tribe.

The early conversion of several groups of Djuhayna and another Ḳuḍāʿī group, the Aslam, is reflected in some traditions attributed to the Prophet, in which Djuhayna is counted among the tribal groups surpassing (in virtues) the great tribes of Asad, Ghaṭafān, Tamīm and ʿĀmir b. Ṣaʿṣaʿa (see e.g. al-Ḥumaydī, *Musnad*, ed. Ḥabīb al-Raḥmān al-Aʿẓamī, Beirut-Cairo 1381, ii, no. 1048; ʿAbd al-Razzāḳ, *al-Muṣannaf*, ed. al-Aʿẓamī, Beirut 1392/1972, xi, 47, no. 19877; al-Ṭabarānī, *al-Muʿdjam al-ṣaghīr*, ed. ʿAbd al-Raḥmān ʿUthmān, Cairo 1388/1968, i, 54, ii, 151). Only few cases of opposition by some units of Djuhayna against the Muslim commonwealth of Medina are known (see e.g. al-Wāḳidī, 774-5; al-Ṭabarī, *Taʾrīkh*, ed. Muḥammad Abu 'l-Faḍl Ibrāhīm, Cairo 1969, iii, 32, about the expedition of Abū ʿUbayda). When the Prophet set out for al-Ḥudaybiya, some nomad Djuhanīs were disinclined to respond to his summons and to join him, fearing that the Muslims might be defeated by the Ḳurashī forces (see e.g. Mudjāhid, *Tafsīr*, ed. ʿAbd al-Raḥmān al-Ṭāhir al-Sūratī, Beirut n.d., 601 inf.; Muḳātil, *Tafsīr*, Ms. Aḥmet II, 74/II, ff. 160b, 166b; al-Wāḳidī, 574, 619; al-Nawawī al-Djāwī, *Marāḥ labīd*, Cairo 1305, ii, 305 inf.; al-Ḳurṭubī, *Tafsīr*, Cairo 1387/1967, xvi, 268, 348; al-Suyūṭī, *al-Durr al-manthūr*, Cairo 1314, vi, 72-73).

Djuhayna appeared as a strong force of 800 warriors and 50 riders (or 1400 warriors according to Ṭabarī, *Taʾrīkh*, iii, 65 sup.) on the expedition for the conquest of Mecca; four banners were borne by its leaders (see e.g. al-Wāḳidī, 799, 820, 896; al-Muttaḳī al-Hindī, *Kanz al-ʿummāl*, Hyderabad 1390/1970, xvii, 78, no. 199; and see Ibn Ḥadjar, *al-Iṣāba*, ii, 445, no. 2549, ii, 604 sup., no. 2897, vi, 165, no. 8098; Ibn al-Athīr, *Usd*, iii, 124; Ibn ʿAbd al-Barr, *al-Istiʿāb*, 871-2). The Djuhanī Rāfiʿ b. Makīth was appointed by the Prophet as tax-collector (*muṣaddiḳ*) of his tribe (al-Wāḳidī, 1073). A number of Djuhanīs emigrated to Medina; the Prophet himself fixed the place of the tribal mosque of Djuhayna in Medina (Ibn Saʿd, i, 333).

Djuhayna remained faithful to Islam after the death of the Prophet (cf. al-Wāḳidī, 1122) and favourable utterances attributed to the Prophet emphasised their virtues. The Prophet is said to have considered Djuhayna among his *mawālī* (see e.g. al-ʿAynī, *ʿUmdat al-ḳārī*, Cairo 1348, xvi, 75-6; al-Munāwī, *Fayḍ al-ḳadīr*, Beirut 1391/1972, iv, 516, no. 6122). The Prophet is said to have recommended seeking refuge in the mountains of Djuhayna during the periods of strife, *fitan* (see e.g. al-Bakrī, 154; Ḥamad al-Djāsir, *Abū ʿAlī al-Hadjarī*, Riyāḍ 1388/1968, 192; and see the utterance of the Prophet in Ibn Saʿd, i, 333). In an alleged utterance, the Prophet is said to have recommended marrying Djuhanī women (Ibn Ḥibbān, *Kitāb al-Madjrūḥīn*, ed. ʿAzīz Beg al-Naḳshbandī, Hyderabad 1390/1970, ii, 10). A peculiar tradition attributed to the Prophet forbids anyone to harm Djuhayna, saying "he who harms Djuhayna harms me, and he who harms me harms God"; this utterance was instantly denied when transmitted to Muʿāwiya (al-Āmidī, *al-Muʾtalif*, 60, no. 147).

Djuhayna participated, together with other groups of Ḳuḍāʿa, in the conquest of Egypt; some of them settled in Fusṭāṭ (cf. Ibn ʿAbd al-Ḥakam, *Futūḥ Miṣr*, ed. Torrey, New Haven 1922, index). Djuhanīs lived in Manfalūṭ and Asyūṭ. After clashes with other tribal groups, Djuhayna migrated to Upper Egypt and settled in the region of Ikhmīm during the Fāṭimid period; they became one of the powerful Arab tribes of Egypt (see Maḳrīzī, *al-Bayān wa 'l-iʿrāb ʿammā fī arḍ Miṣr min al-aʿrāb*, ed. ʿAbd al-Madjīd ʿĀbidīn, Cairo 1961; and see the researches of ʿĀbidīn, in *ibid.*, 77-8). Groups of Djuhayna penetrated in the 8th/14th century into the Christian kingdom of Nubia and got mastery over it. From Nubia, Djuhayna continued to push forward into the Sudan and mixed with the native tribes (see C. H. Becker, *Zur Geschichte des östlichen Sudan*, in *Isl.*, i, 153-77; idem, *EI*[1] art. *Djuhaina*; F. C. Thomas Jr., *The Juhaina Arabs of Chad*, in *MEJ* [1959], 142-55; von Oppenheim, *op. cit.*, ii, 359). In the Djuhanī territories of the Arab peninsula, the different sections of that tribe became controlled by the descendants of ʿAlī, who succeeded in acquiring a great deal of landed property in these regions. Nevertheless, the various branches of Djuhayna succeeded in keeping their identity during the centuries. Although wavering at the beginning of the First World War, the majority of the tribe followed the sons of the *Sharīf* Ḥusayn; later, they changed attitude and became loyal subjects of the Saʿūdī dynasty (see von Oppenheim, ii, 360). In recent times, they have been exerting themselves in developing their region (see Ḥamad al-Djāsir, *Bilād Yanbuʿ*, *passim*).

2. To the north of the territory of Djuhayna was the region of Balī, another branch of Ḳuḍāʿa. Starting at Wādī Iḍam, their usual habitations extended far to the north, including the places of Shaghab, Badā and Taymāʾ (cf. Ibn Khaldūn, *ʿIbar*, ii, 516; von Oppenheim, ii, 315, 352-3). The Ḳuḍāʿī tribal groups of Balī, Djuhayna and ʿUdhra migrated, according to tradition, to the Wādī 'l-Ḳurā in which Jewish settlers cultivated the soil, dug the wells and planted palm-trees. According to an agreement between the Jewish settlers and these Ḳuḍāʿī groups, the Jews undertook to give them a certain payment; in return Balī, Djuhayna and ʿUdhra were under obligation to give protection to the Jewish settlements against the Bedouin tribes, including other Ḳuḍāʿī units (see Yāḳūt, s.v. al-Ḳurā; al-Bakrī, *Muʿdjam*, i, 43). The stipulations of this agreement remained valid until the advent of Islam; then the ʿUdhrī Djamra b. al-Nuʿmān visited the Prophet and was given by him a grant of land. The Jewish settlers of the family of ʿUrayḍ (or ʿArīḍ) were allowed by the Prophet to stay in their places; they were granted by the Prophet the privilege of receiving a certain annual payment (see Ibn Saʿd, i, 279; al-Bakrī, i, 44; cf. W. M. Watt, *Muḥammad at Medina*, Oxford 1956, 107-8). Some clans of Balī got involved in internal fighting; one of the fighting groups, the Banū Ḥishna, was compelled to seek refuge with the Jewish settlers of Taymāʾ, and at their demand converted to Judaism. Some of these refugees left later for Medina and embraced Islam at the advent of the Prophet (see al-Bakrī, i, 29). A corroborating report counts among the Jewish tribal groups at Medina three groups from Balī (see Ibn Khaldūn, *op. cit.*, ii, 596; and cf. al-Samhūdī, *Wafāʾ al-wafā*, ed. Muḥammad Muḥyī 'l-Dīn ʿAbd al-Ḥamīd, Cairo 1374/1955, i, 162-3, 194, 200, 223). Some traditions, in reporting of the migration of the Balawī clans to Medina, remark that they became allies (*ḥulafāʾ*) of the Aws and Khazradj (see e.g. al-Bakrī, i, 28; Ibn ʿAbd al-Barr, *al-Inbāh ʿalā*

ķabā'il al-ruwāt, Nadjaf 1386/1966, 128). The position of Balī at Medina and their status can be gauged from the accounts about the ʿAķaba meeting, reporting that seven members out of the seventy Anṣārī group of delegates, who gave the Prophet the oath of allegiance, were of Balawī descent (ʿUwaym b. Sāʿida [on whom see al-Balādhurī, *Ansāb*, i, 241; Ibn ʿAbd al-Barr, *al-Istiʿāb*, 1248, no. 2052; Ibn al-Athīr, *Usd*, iv, 158; cf. Ibn Ḥadjar, *al-Iṣāba*, iv, 745 inf., no. 6116], Maʿn b. ʿAdī [on whom see al-Balādhurī, *Ansāb*, i, 241; Ibn Ķudāma, *al-Istibṣār*, 297; Ibn al-Athīr, *Usd*, iv, 401], Khadīdj b. Uways [on whom see al-Balādhurī, i, 249; Ibn Hishām, ii, 106], Abu 'l-Haytham b. al-Tayyihān [see on him: al-Balādhurī, i, 240; Ibn Ķudāma, *op. cit.*, 228], Abū Burda b. Niyār [on whom see Ibn Hishām, ii, 198; al-Balādhurī, i, 241; al-Bakrī, *Muʿdjam*, i, 28 inf.], al-Nuʿmān b. ʿAmr [or b. ʿIṣr, on whom see Ibn al-Athīr, *Usd*, v, 27; Ibn Ḥazm, *Djamhara*, 443], Yazīd b. Thaʿlaba [on whom see al-Balādhurī, i, 251; Ibn Ķudāma, 202; al-Samhūdī, i, 228; Ibn Ḥadjar, *al-Iṣāba*, vi, 650]. However, the Balawī descent of some of these persons is put in question in some of the sources). Balawī tribesmen took part in the battles between the Prophet and Ķuraysh on the side of the Prophet, and names of Balawī warriors can be found in the lists of those who were killed in the encounters. The traditions mention a peculiar letter of the Prophet sent to a Balawī group, the Banū Djuʿayl. According to this letter, the Prophet granted to them the privileges of being taxed no more than once a year and of not having to gather with their live stock in the tax-collection centres (*lā yuḥsharūn wa-lā yuʿsharūn*; this explanation given by Ibn Saʿd seems however to be uncertain: there are interpretations commenting that *ḥashr* and *ʿashr* refer to exemption from being levied and taxed); they were also appointed by the Prophet as tax-collectors of some other tribes. They were given the status of Ķurashīs, as they were allies of the ʿAbd Manāf (see Ibn Saʿd, i, 270-1; Watt, *Muḥammad at Medina*, 111). The favourable conditions granted to the Banū Djuʿayl were probably intended to gain the loyalty of a tribal group allied with Ķuraysh, securing their control over other tribal groups for the benefit of the Muslim community.

The expedition against the Balī sent in 8 AH was intended to gain their allegiance and their succour for the Muslim community; it was essential for the latter to secure the co-operation of the Balī who dwelt in the northern regions of the peninsula, who controlled the road to Medina and Mecca, and of whom some members were in the service of the Byzantine army; the commander of the troop which fought the Muslim force at Mu'ta was a Balawī (see al-Wāķidī, 760). It was a shrewd decision of the Prophet to appoint ʿAmr b. al-ʿĀṣ, whose mother was from Balī, as commander of the Muslim force (*ibid.*, 770); the expedition was also directed at the Mahra and Balķayn, two Ķuḍāʿī tribes sojourning in the region of Balī. In 9 A.H. the Prophet met the delegation of Balī, who embraced Islam (see e.g. Ibn Saʿd, i, 330; al-Zurķānī, *Sharḥ al-mawāhib*, iv, 57-8; Ibn Ķayyim al-Djawziyya, *Zād al-maʿād*, Beirut n.d., iii, 49).

The forces of Balī played an important role in the conquest of Egypt; ʿAmr b. al-ʿĀṣ fought under the banner of Balī (see Ibn ʿAbd al-Ḥakam, i, 62). ʿUmar established the pay of Balī warriors as equal to that of Muḍar, Kalb and Ṭayyi', sc. 300-400 *dirhams*; it was lower than that of the Yemeni tribes because they were closer to the places of migration (see al-Djāḥiẓ, *al-ʿUthmāniyya*, ed. ʿAbd al-Salām Hārūn, Cairo 1374/1955, 212). When ʿUmar was informed that a man from Balī summoned his people in Syria by the battle-cry *yā Ķuḍāʿa*, he ordered a third of Ķuḍāʿa to be removed to Egypt; as Balī formed a third part of Ķuḍāʿa, they were indeed transferred to Egypt (Ibn ʿAbd al-Ḥakam, 116; al-Maķrīzī, *al-Bayān*, 29). It was a Balawī, ʿAbd al-Raḥmān b. ʿUdays, a Companion of the Prophet, who was at the head of a troop of riders in revolt against ʿUthmān. He was later imprisoned by Muʿāwiya, and was killed on his flight from the prison (see al-Samʿānī, *al-Ansāb*, Hyderabad 1963, ii, 324, Ibn al-Athīr, *Usd*, iii, 309-10; Ibn Ḥadjar, *al-Iṣāba*, iv, 334, no. 5166; Muḥammad b. Yaḥyā al-Ashʿarī al-Mālikī, *al-Tamhīd wa 'l-bayān fī maķtal al-shahīd ʿUthmān*, ed. Maḥmūd Yūsuf Zāyid, Beirut 1964, index).

Balī settlements are mentioned in the regions of Akhmīm, Asyūṭ and Ushmūn; they were expelled by Fāṭimid troops and were compelled to move to the south. In the 8th/14th century the Balī entered together with Djuhayna, the Sudān and contributed considerably to the islamisation and arabisation of the native tribes of the Bedja and the Baķķāra [*q.vv.*]; the Arabic language is known among the Bedja even today as "Balawiyyat", i.e. the language of Balī.

In the Arabian peninsula, the Balī played during the First World War an important role in the conflict between the *Sharīf* Ḥusayn and the Turkish authorities, finally (in 1918) following the lead of the sons of the *Sharīf* Ḥusayn.

Some groups of Balī joined the new régime in the Ḥidjāz in 1925 and became loyal subjects of Saʿūdī Arabia; but some rebellious units of Balī took refuge in the kingdom of Trans-Jordan. They crossed the borders at ʿAķaba and raided, together with other rebels, the northern districts of Saʿūdī Arabia in 1932, but were defeated by the Saʿūdī forces (cf. von Oppenheim, ii, 354).

In Spain descendants of the Balī tribe lived in the region of Cordova or Ķurṭuba and it was reported that they excelled in hospitality. They were unable to speak Romance (*al-laṭīniyya*), and spoke only Arabic, according to Ibn Ḥazm, *Djamhara*, 443.

Bibliography: given in the article essentially, but see also W. Robertson Smith, *Kinship and marriage in early Arabia*, Cambridge 1885, 8-9, 155, 246-9, and H. Lammens, *EI*[1] art. s.v.

(M. J. Kister)

ĶUDĀMA b. Djaʿfar al-Kātib al-Baghdādī, Abu 'l-Faradj, philologist, historian, and one of the first scholars to introduce the systematic study of the figures of speech in Arabic literature. The date of his birth is nowhere mentioned and may have been as early as around the year 260/873-4. He died at an uncertain date which is variously given as "during the reign of al-Muķtadir" (i.e. not later than 320/932), 328/939-40, and 337/948. The dates "shortly after 300" and 310 cannot be correct (see below).

Almost every aspect of Ķudāma's biography, his work, and his personality as a scholar raises delicate problems which cannot be fully discussed, let alone answered, in the context of this article. The only data which are certain, or at least have not been questioned, are (a) that he converted from Christianity to Islam during the reign of al-Muktafī (289-95/902-8); (b) that he held unimportant positions in various *dīwāns* of the central administration in Baghdad till he won an appointment in Shawwāl

297/910, or shortly thereafter, to the *madjlis al-zimām* in the *dīwān al-mashriḳ* when Abu 'l-Ḥasan b. al-Furāt [*q.v.*] appointed his son, al-Muḥassin, as head of that office (thus according to Yāḳūt, vi, 205, whose account however contradicts reports that al-Muḥassin was in charge of the *dīwān al-maghrib*); (c) that he was alive in 320/932; and (d) that he was the author of a *Kitāb al-Kharādj*, which has survived in part. Moreover, there can be little doubt that the famous and often-quoted *Kitāb Naḳd al-shi'r* was written by Ḳudāma, since al-Muṭarrizī [*q.v.*] in his commentary on the *Maḳāmāt* of al-Ḥarīrī (quoted in the introduction to the edition of Ḳudāma's *Djawāhir*, 13), who lived three centuries later, is the only author to mention that the *Naḳd* was sometimes attributed to Ḳudāma's father.

The *Ta'rīkh Baghdād* does not have a biography of Ḳudāma. It only mentions (vii, 205) one Dja'far b. Ḳudāma b. Ziyād whom the Khaṭīb describes as a learned and distinguished secretary. The Khaṭīb also mentions that Dja'far wrote books dealing with the secretarial art as well as other subjects, that he was often quoted as an authority by Abu 'l-Faradj al-Iṣfahānī, the author of the *Aghānī*, and was himself a pupil of, among others, Ḥammād, the son of the famous Isḥāḳ b. Ibrāhīm al-Mawṣilī. Ibn al-Nadīm (*Fihrist*, 130) states that Ḳudāma's father, Dja'far, was a man without scholarly distinction, and this statement is repeated by Yāḳūt, who clearly borrowed it from Ibn al-Nadīm. Since Yāḳūt (ii, 412-15) also has a fairly elaborate biography of Dja'far b. Ḳudāma b. Ziyād al-Kātib (he adds the *kunya* Abu 'l-Ḳāsim, cf. *Aghānī*³. x, 281, l. 7) he apparently did not believe that this Dja'far b. Ḳudāma was the father of our author, since otherwise he would have noticed the discrepancy between the facts as they appear from this biography and the characterisation of Ḳudāma's father as a man without learning (if the "poet-secretary", Dja'far b. Ḳudāma, mentioned in the *Fihrist*, 168, l. 7, is identical with the scholar mentioned in the *Ta'rīkh Baghdād* and in Yāḳūt, Ibn al-Nadīm must have held the same view). Yāḳūt's contemporary, al-Muṭarrizī does not, however, hesitate to identify the scholar mentioned in the *Ta'rīkh Baghdād* as the father of Ḳudāma. The question is of considerable interest, since, according to the *Aghānī*³ (x, 280-5, xii, 52), Dja'far b. Ḳudāma [b. Ziyād al-Kātib in several places in the *Aghānī*] was a close friend of Ibn al-Mu'tazz [*q.v.*], the author of the *Kitāb al-Badī'*. Yet Ḳudāma is reported to have written a book to refute Ibn al-Mu'tazz (according to the version of the title of the book in Yāḳūt, in order to refute Ibn al-Mu'tazz's views on the poet Abū Tammām) and makes no mention of his predecessor in the *Naḳd*, even though some of the subject matter is the same and may even have been borrowed by Ḳudāma from the *Kitāb al-Badī'* (see *Naḳd*, introd., 29-30). Ḳudāma also fails to use the term *badī'*, but here the explanation may be that, unlike Ibn al-Mu'tazz, Ḳudāma was not concerned with the identification of the figures of speech to which this term was applicable, and that the practice of using the term as a collective for figures of speech had not yet been established (cf. *Kitāb al-Badī'*, ed. I. Kratchkovsky, London 1935, 57, l. 15-58, l. 3, and S. Bonebakker, *Ibn Abi 'l-Iṣba''s text of the Kitāb al-Badī'*, in *Israel Oriental Studies*, ii [1972], 89-90). One could also suggest that the *Naḳd* was written shortly after the abortive attempt to bring Ibn al-Mu'tazz to the throne and that Ḳudāma thought it wiser not to make any reference to the unfortunate "one-day caliph". His attack on Ibn al-Mu'tazz could have been written in the same period as an attempt to dissociate himself from his famous predecessor. Still, the possibility remains that there were two personalities by the name of Dja'far b. Ḳudāma who could easily be confused. The first would have been a member of a Christian family and a professional secretary who occupied a minor position in the central administration, in which he was succeeded by his son, Ḳudāma; the second a Muslim official who enjoyed a considerable reputation as a scholar, distinguished himself as a poet, and won the favour of Ibn al-Mu'tazz, of Ibn al-Mu'tazz's champion, the vizier 'Alī b. 'Īsā (see below), and later of 'Alī b. 'Īsā's rival, the vizier Abu 'l-Ḥasan b. al-Furāt (see Hilāl al-Ṣābi', *Tuḥfat al-umarā' fī ta'rīkh al-wuzarā'*, ed. H. F. Amedroz, Beirut 1904, 211-12; Yāḳūt, ii, 414, ll. 9-10). It is curious that the *Aghānī* nowhere mentions that Dja'far b. Ḳudāma was a Christian, and even suggests in two places that his name was Dja'far b. Muḥammad b. Ḳudāma (³x, 131, note and xxiii, 115). That both this Dja'far and Ḳudāma were acquainted with members of the Ibn al-Furāt family and with the vizier 'Alī b. 'Īsā [*q.v.*] may be due to the fact that both of them pursued the same type of official career (for 'Alī b. 'Īsā and Dja'far, see Yāḳūt, ii, 413, ll. 16-18, and for 'Alī b. 'Īsā and Ḳudāma, see below). Similarly, the fact that Dja'far and Ḳudāma distinguished themselves as men of letters would account for their reliance on the same sources: Ḳudāma, in his *Kitāb al-Kharādj*, used the same sources as Ibn Khurradādhbih [*q.v.*] (see de Goeje's ed., introd., xxii). Dja'far was acquainted with the same Ibn Khurradādhbih, as is shown by an *isnād* in the *Aghānī*³, xxii, 201, l. 6. It appears certain that Ḳudāma knew a definition of the *ishāra* [*q.v.*] by Isḥāḳ b. Ibrāhīm al-Mawṣilī and a definition of the *taḳsīm* by the same scholar (see Bonebakker, *Notes on the Kitāb Naḍrat al-Ighrīḍ*, Istanbul 1968, 18-19; idem, *Materials for the History of Arabic Rhetoric*, in *AIUON*, Suppl. no. 4 = vol. xxxv [1975], 36, 45, 48-50; cf. also *Naḳd*, introd., 26, ll. 17-21). Dja'far was a pupil of Isḥāḳ's son, Ḥammād. Less likely to be coincidental—and therefore to be considered an argument in favour of al-Muṭarrizī's identification—is the acquaintance of the two authors with the family of the Ṭāhirids (see *Materials*, 36-7; *Aghānī*³, v, 390, xi, 337, xviii, 128). Finally there is strong evidence that the author of the *Aghānī*, who related many traditions from Dja'far, also knew Ḳudāma's work and may even have met him in person (see *Notes*, 17-18, 27-9; *Materials*, 39, 51). If al-Muṭarrizī is correct, one could suggest that Ibn al-Nadīm had wrongly identified a certain Abū Ḳudāma as the father of our author. This Abū Ḳudāma appears in al-Marzubānī's *al-Muwashshaḥ* (Cairo 1385/1965, 572) as a *kātib* who composed bad verse (cf. also an anecdote on a certain Ibn Ḳudāma whom Yāḳūt, ii, 414-5 is apparently unable to identify, and al-Ṣūlī, *Kitāb al-Awrāḳ*: *Akhbār al-Rāḍī wa-'l-Muttaḳī*, ed. J. Heyworth Dunne, Cairo 1354/1935, 212-13).

The date 337/948 for Ḳudāma's death which is reported by Ibn al-Djawzī (*al-Muntaẓam*, vi, 363) and repeated by others, is rejected by Yāḳūt (vi, 204). Yāḳūt also rejects a statement by an unnamed commentator on the *Maḳāmāt* of al-Ḥarīrī who makes Ḳudāma a secretary of the Buwayhids. He argues that Ḳudāma was a contemporary of Tha'lab (*adraka zamana Tha'labin*), al-Mubarrad, Abū Sa'īd al-Sukkarī, Ibn Ḳutayba, and other scholars of the same generation. Ibn Taghrībirdī, *Nudjūm* (Cairo 1348, iii, 297-8) goes further and says

explicitly that Ḳudāma was a pupil of al-Mubarrad, and according to Ibn al-Djawzī, he consulted Thaʿlab; but in the *Naḳd* there is evidence only of a personal acquaintance between Ḳudāma and Thaʿlab (d. 291/904) (*Naḳd*, text, 35, 44, 45, 102, 115, 117, introd., 23-9). If Ḳudāma was indeed a pupil of Abū Saʿīd al-Sukkarī (d. at the latest 275/888), this would mean that he was born around 260, which would not necessarily conflict with the date reported by Ibn al-Djawzī. Yāḳūt offers the year 320/932 as the only reliable *terminus post quem*. Abū Ḥayyān al-Tawḥīdī, to whom Yāḳūt refers, mentions that in that year Abū ʿAmr (*sic*; read Abū ʿUmar wa-?) Ḳudāma b. Djaʿfar attended a famous disputation between Abū Saʿīd al-Sīrāfī and Abū Bishr Mattā b. Yūnus in the presence of Abu 'l-Fatḥ al-Faḍl b. Djaʿfar b. al-Furāt (in 326 according to Abū Ḥayyān's *Imtāʿ*, Cairo 1373/1953, i, 108, but cf. i, 129, l. 1; in 320 according to his *Muḳābasāt*, Cairo 1347/1929, 69, and Yāḳūt, iii, 106 and vi, 204, see also *JRAS* [1905], 82, 84-5). According to a second report by Abū Ḥayyān al-Tawḥīdī (*Imtāʿ*, ii, 145-6), Ḳudāma showed (*ʿaraḍa*) his *Kitāb al-Kharādj* to the vizier ʿAlī b. ʿĪsā in that year.

The two other dates for Ḳudāma's death, "during the reign of al-Muḳtadir" and 328, appear respectively in al-Suyūṭī, *Taʾrīkh al-khulafāʾ* (Cairo 1351, 256 = Cairo 1383/1964, 386) and in the *Dhayl taʾrīkh Baghdād* of Ibn al-Nadidjār [*q.v.*] as quoted in an unedited section of the *Wāfī bi 'l-Wafayāt* of al-Ṣafadī (see Ṭabāna, 4 and 71).

Finally, mention should be made of de Slane's assertion that Ḳudāma belonged to a Christian family from Baṣra, possibly based on a statement by al-Idrīsī, who mentions one Ḳudāma al-Baṣrī among the sources which he used in compiling his monumental geography (*Opus geographicum*, i, Naples-Rome 1970, 6).

It is not easy to determine the range of Ḳudāma's scholarly interests on the basis of the titles of his works. So much seems certain that he was competent as a philosopher and commentator on Aristotle, as well as a historian, a philologist, and an expert on administration. To the list in the *Fihrist*, 130, 250, we should add a *Zahr al-rabīʿ fi 'l-akhbār* mentioned by al-Masʿūdī (*Murūdj*, ed. Ch. Pellat, i, 15-6) and Yāḳūt, and an *al-Ḥayawānāt* (*Djawābāt*, *Djawābān*?) listed by Abū Ḥayyān al-Tawḥīdī (*al-Baṣāʾir wa 'l-dhakhāʾir*, Cairo 1373/1953, 6). Lists of titles given by later authors are probably unreliable (see below). Only three works have survived: (a) the *Kitāb al-Kharādj*. The full title of this work is no doubt *Kitāb al-Kharādj wa-ṣināʿat* (or *ṣanʿat*) *al-kitāba*. Not only is this the form in which the title appears in the unique manuscript of this work in the Köprülü Library (the manuscript in Paris is a late copy), but it also agrees with the contents of the work as far as they are known (Ṭabāna, 81-4; the *Ṣināʿat al-kuttāb* quoted by al-Ḳalḳashandī, *Ṣubḥ al-aʿshā*, vi, 481, must be a work by Abū Djaʿfar al-Naḥḥās quoted by al-Ḳalḳashandī elsewhere in the *Ṣubḥ*). Only the second half of the *Kitāb al-Kharādj* (the 5th to the 8th *manzila*) have survived. They deal not only with a wide range of technical matters, sc. the various departments which constitute the central government, taxation and its historical, geographical and legal foundations, etc., but also give attention to linguistic usage, literary traditions, and the proper forms for conducting official correspondence. The first half had a section (the 3rd *manzila*) especially devoted to literary rhetoric (see Bonebakker, *A Fatimid manual for secretaries*, in *AIUON*, xxxvii [1977], 328), on which ʿAlī b. ʿĪsā (quoted in the *Imtāʿ*) had made some interesting observations. Some prose examples quoted on Ḳudāma's authority may go back to this section, and its fame may have earned Ḳudāma his proverbial reputation as a master of eloquence (see al-Ḥarīrī, *Maḳāmāt*, ed. de Sacy, 9; al-Ḳalḳashandī, *Ṣubḥ*, xi, 306; al-Maḳḳarī, *Nafḥ al-Ṭīb*, ed. Iḥsān ʿAbbās, Beirut 1388/1968, ii, 670). There is no satisfactory explanation for the statement of the *Fihrist* (repeated by others) that the book consisted of eight *manāzil*, to which Ḳudāma himself added a ninth (Ṭabāna, 93). This statement conflicts with the testimony of al-Muṭarrizī, who had read the work and found that it had only seven. A note in the Chester Beatty manuscript of the *Fihrist* (quoted on p. 144 of the Tehran ed. of 1391/1971) lends support to al-Muṭarrizī's assertion and suggests that the 8th *manzila* did not originally belong to the *Kitāb al-Kharādj*, though it may have been identical with a *Kitāb al-Siyāsa* by Ḳudāma which is also listed in the *Fihrist*. This 8th *manzila* is the only extant section that remains unedited (apart from the historical outline in the 7th *manzila*, which merely copies al-Balādhurī, cf. de Goeje's ed. of the *Kharādj*, xxiii). It is characterised by Rosenthal as a systematic presentation of social and political science and as a *Fürstenspiegel*. De Goeje believes that the *Kitāb al-Kharādj* was written between 316 and 320.

(b) There is no reason to question the authenticity of the *Kitāb al-Alfāẓ* or *Djawāhir al-alfāẓ*, even though al-Muṭarrizī is the only author to mention this work (see *Naḳd*, introd., 7-8, 12-5, 47 note, and the above-mentioned article in *AIUON*, 328-9, 336-7 and notes 34-5, 43). Nor is there any reason to suggest that it was originally perhaps part of the *Kitāb al-Kharādj*. The *Djawāhir al-alfāẓ* lists synonyms and phrases in *sadjʿ* for use by orators and writers of artistic prose, and offers a short introduction on the figures of speech.

(c) The *Kitāb Naḳd al-shiʿr* is intended, as its title says, as a guide for the literary critic. Disregarding the treatise by Ibn al-Muʿtazz and the Introduction to the *Kitāb al-Shiʿr wa 'l-shuʿarāʾ* of Ibn Ḳutayba [*q.v.*], Ḳudāma claims that no book has ever been written that would enable people to distinguish between good and bad poetry. He defines poetry as "metrical, rhymed speech expressing a meaning" (*maʿnā*). This definition in itself cannot be used to distinguish good poetry from bad, but it is possible to set standards for the use of the four constituent elements of poetry implicit in this definition, sc. the *maʿnā* (content), the *lafẓ* (verbal expression of this content, wording), the *wazn* (metre), and the *ḳāfiya* (rhyme) [*q.v.*], and the combination of these elements two by two (the combination of the *wazn* with the *ḳāfiya* need not be considered, since the *ḳāfiya* is part of the *lafẓ* and as such already subject to the metre). In passing, he reminds his readers that the distinction between good and bad poetry does not rest on the moral quality of the theme or on the question whether or not the poet is consistent in the sentiments he expresses, but rather on his skill in the use of the four constituent elements separately and in combination. The success of the poems thus depends on the ratio between good qualities (*nuʿūt*) and defects (*ʿuyūb*) specifically related to these elements or to combinations of these elements. Ḳudāma lists these *nuʿūt* and *ʿuyūb* in separate sections. In the first section he begins by discussing the four elements separately. Speaking of the *maʿnā*, he admits that there are an unlimited number of *maʿānī*, i.e. concepts, ideas, that may come to the

poet's mind. He will therefore limit himself to the principal "aims" (*aghrāḍ*), i.e. subjects or themes which can be associated with these *maʿānī* and to which the *maʿānī* should correspond; panegyric, satire, elegy, simile, description, and the *nasīb* [*q.v.*] which he sees as an erotic theme. The various figures of speech which come next are interpreted as ornaments pertaining to the *maʿnā* or as successful combinations of the four constituent elements. In the classification of these figures Ḳudāma shows much ingenuity. He has to recognise, however, that there are no figures of speech that can be classified as combinations of *lafẓ* with *wazn* and *maʿnā* with *wazn*: all technically good poetry that adequately expresses the poet's intentions illustrates these two combinations. Specimens of bad poetry are therefore the only illustrations of the principles involved. The section on the defects in poetry follows the arrangement of the section on the good qualities: Ḳudāma examines the faults resulting from a wrong use of the four constituent elements and classifies certain errors under these four elements or the combinations of these elements two by two. He also shows how the figures of speech are sometimes handled incorrectly. In both sections the discussion follows the pattern of term—definition—example found in the *Kitāb al-Badīʿ* and the *Ḳawāʿid al-shiʿr* of Thaʿlab [*q.v.*]; but whereas the two earlier treatises usually do not comment on the examples, Ḳudāma often analyses his examples in detail.

There are some further points in Ḳudāma's presentation that deserve to be mentioned. The following are perhaps the most important: (a) his interest in Greek philosophy which appears, for instance, in his analysis of the function of the four cardinal virtues, *ʿaḳl*, *shadjāʿa*, *ʿadl*, and *ʿiffa* in panegyric, elegy, and satire (he goes on to list other virtues as deriving either from these cardinal virtues themselves or from combinations of these cardinal virtues two by two), from a quotation from Galen's Περὶ ἠθῶν in the chapter on satire, and from arguments based on Aristotle's *Categories* (further details in *Naḳd*, introd., 36-44 and the recent studies cited in the *Bibliography*). There is no clear evidence, however, that he was influenced by the *Poetics* and the *Rhetoric* of Aristotle; (b) his defence of the hyperbole (*ghuluww*). Ḳudāma quotes an unidentified connoisseur of poetry as saying: "The best poetry is the least truthful" (*aḥsanu 'l-shiʿri akdhabuhū*). He finds that the "Greek philosophers" support this view, but does not attribute the maxim itself to the Greeks (an antecedent of this famous maxim in L. Zolondek, *Diʿbil b. ʿAlī*, Lexington, Kentucky 1961, 128b, 133; cf. also al-Djāḥiẓ, *Bukhalāʾ*, Cairo 1958, 26-7). Ḳudāma does not go so far that he accepts every form of hyperbole: there must be a link with reality which can be established by using the verb *kāda*, "to be almost ..." in a paraphrase of the statement, e.g. "You inspire the infidels with fear so that even the seed [of these infidels] fears you before it becomes a creature [in the womb]" can be paraphrased "... so that it is almost as though the seed of the enemy fears you ...", but a prayer to grant immortality to a ruler cannot be justified, since immortality in man is inconceivable (*laysa fī ṭibāʿi 'l-insāni*; he illustrates this rule more clearly when he points out that describing the noise of battle as being so strong that it can be heard as far as a two days' journey is an exaggeration, though it is possib'e in principle that this should happen); (c) his lack of interest in the early ʿAbbāsid poets (*muḥdathūn*). This tendency appears clearly from the above-mentioned list of the "principal aims" from which genres like the love lyric (*ghazal*), the wine poem (*khamriyya*), and the hunting poem (*ṭaradiyya*) are conspicuously absent. Ḳudāma nowhere expresses a categorical judgment. One could suggest therefore that his choice reflects a belief, which was perhaps not uncommon in his days, that ʿAbbāsid poetry did not represent a real break with ancient, that is classical, tradition. Consequently he may not have felt that there was a need to justify his choice. The same may be true of the examples, most of which are taken from ancient poetry, though Ḳudāma occasionally discusses examples by later poets (see *Naḳd*, text, 80-1, 83; for a list of *muḥdathūn* poets quoted in the *Naḳd*, see p. 72 of the article by Kratchkovsky cited in the *Bibl.*).

Ḳudāma may have been more dependent on his predecessors than is apparent at first sight (see *Naḳd*, introd., 22-36). He may have followed Ibn Ḳutayba and Ibn al-Muʿtazz respectively when he discussed the *lafẓ* and the *maʿnā* as independent constituent elements and distinguished between the proper and the erroneous use of the figures of speech. He may have depended on Ibn al-Muʿtazz and on earlier critics for the choice of his terminology and examples. Yet the theory on which he based the framework of his thesis, as well as many aspects of the elaboration of this theory, appear to be unique. However, his system did not provide a sound basis for a theory of literature and quickly fell into oblivion: the four-element scheme was rarely taken over and never in its complete form. The same is true of the distinction between *nuʿūt* and *ʿuyūb* and the system of cardinal virtues. By contrast, those aspects of his work that conformed closely to the system of Ibn al-Muʿtazz and the 2nd and 3rd century scholars who preceded him were readily accepted, in particular his terminology and definitions of the figures of speech. Ḳudāma's figures were combined with those of Ibn al-Muʿtazz and came to be known collectively as *badīʿ*. The exact extent of Ḳudāma's influence is not, however, always easy to determine, since direct references to Ḳudāma are far exceeded by instances of unacknowledged borrowing (*Naḳd*, introd., 44-60). In other cases it is clear that scholars used not only the *Naḳd*, but also the *Kharādj* (*ibid.*, 57 and 47 note). There is a third category of borrowings where we find scholars borrowing from Ḳudāma without having any direct knowledge of the text they are quoting (ibid., 58; Bonebakker, *Notes*, 16-17 and the above-mentioned article in *AIUON*, 309-10). Parallel to this we find that biographers after the time of Yāḳūt copy out their predecessors or offer erroneous information on the author and his work (see, for instance, al-Sharīshī, *Sharḥ Maḳāmāt al-Ḥarīrī*, Cairo 1372/1952, i, 20).

Ḳudāma's *Naḳd* was the subject of refutations and commentaries, none of which appear to have survived. A complex system of division into sections, chapters, and paragraphs introduced by Ḥamza al-Iṣfahānī [*q.v.*] was recently discovered in a manuscript in Tunis (see Bonebakker in a forthcoming article in *RSO*, which also offers minor corrections to the text of his ed.). A work with the title *Naḳd al-nathr*, erroneously attributed to Ḳudāma, was identified in 1949 as the *Kitāb al-Burhān fī wujūh al-bayān* of Abu 'l-Ḥusayn Isḥāḳ b. Ibrāhīm b. Sulaymān b. Wahb al-Kātib (ed. A. Maṭlūb and Kh. al-Ḥadīthī, Baghdād 1387/1967), though it is occasionally still quoted by its old title [see IBN WAHB in Suppl.]. The Shīʿī bias of this last work may have prompted Āghā Buzurg al-Ṭihrānī to include Ḳudāma in his *Ṭabaḳāt aʿlām al-shīʿa* (*al-Ḳarn al-*

rābiʿ, Beirut 1390/1971, 221). The attribution to Ḳudāma existed as early as the 6th/12th century (see *Naḳd*, introd., 15-20, 60-1; Bonebakker, *Some early definitions of the Tawriya*, The Hague 1966, 48-9 note).

(S. A. Bonebakker)

AL-ḲUDS, the most common Arabic name for Jerusalem.

A. History

1. The Islamic history of Jerusalem clearly falls into three periods. During the first six hundred years, the possession of the city was contested between Islam and Christianity and between many Islamic princes and factions. After the bloodless and poorly-recorded delivery of the town into the hands of an inconspicuous tribal commander, the history of the period was solemnly inaugurated by the erection of the marvellous Dome of the Rock, the majestic testimony to the Islamic presence in the Holy City; it culminated in the vicissitudes of the Crusades and was concluded by the devastations of the first half of the 7th/13th century, which, with the exclusion of the buildings on the Temple area and the Holy Sepulchre, left Jerusalem a heap of ruins.

The subsequent six hundred years were comparatively uneventful. Jerusalem mostly lived the life of an out-of-the-way provincial town, delivered to the exactions of rapacious officials and notables, often also to tribulations at the hands of seditious *fellaḥīn* or nomads. But, in conformity with the religious policy of the Mamlūks and Ottomans, and with the general spirit of the age, Jerusalem greatly benefited by its holy character. The many Mamlūk buildings still decorating the old city and Sultan Sulaymān's wall encircling it manifest this trend to the present-day visitor.

The modern history of Jerusalem begins with its conquest by Ibrāhīm Pasha in 1831. The reforms started by the son of Muḥammad ʿAlī could not be ignored by the Ottomans, to whose control the city reverted in 1840. The restrictions imposed on the non-Muslims were alleviated. Many important Christian buildings and institutions were erected both inside and outside the old city. The improved living conditions (albeit still very hard) induced many religious persons to settle in Jerusalem. By about 1880 Jews formed the majority of the population. Jerusalem became the capital of a *mutaṣarriflīḳ*, whose governor was directly responsible to the government in Istanbul, and by 1920 it was the capital of mandatory Palestine. In December 1949 the State of Israel made it its capital and seat of government (a step not recognised internationally). Fortunately, the war of 1967 and the events following it have not changed the historical character of the old city, while the new city has immensely expanded in every respect and direction. Jerusalem will always live on its past, but at present one feels in it the pulse of an active and vigorous community.

Mudjīr al-Dīn al-ʿUlaymī, the excellent historian of Jerusalem, who wrote his book *al-Uns al-djalīl bi-taʾrīkh al-Ḳuds wa 'l-Khalīl* in 900/1494-5, rightly observes (p. 6) that besides material of the type of the *faḍāʾil* ("Praises of the excellence of the city"), "ʿUmar's conquest" and stories about the Dome of the Rock and scholars visiting Jerusalem, little useful about the history of the city had been written before him. He explains this deficiency partly by the interruption of the Muslim tradition by the Christian conquest (232, 262, etc.) and mentions the symbolic fact that Abu 'l-Ḳāsim al-Makkī, who had compiled a book on the subject, was killed by the Crusaders before completing it (264). The intrinsic reason for the absence of coherent information was, of course, the character of Jerusalem as a holy city which lived on the care lavished on it from outside, rather than being itself of political, administrative or cultural significance. Consequently, the presentation of its history must be one of highlights rather than a continuous account.

I. The first six hundred years

2. *Names*. In early Islam the full name of Jerusalem was *Īliyāʾ madīnat bayt al-maḳdis*, "Aelia, the city of the Temple" (Ṭabarī, i, 2360, l. 15). In practice, Īliyāʾ, or, more commonly, *bayt al-maḳdis*, were used. Īliyāʾ (pronounced in three different ways, Bakrī, *Muʿjam*, ed. 1945, i, 134, l. 5; 217), is the Roman Aelia, but since this origin was unknown to the Muslim scholars, they suggested various other ex-

planations, such as the sanctuary of Elijah (Muṭahhar b. Ṭāhir, *al-Bad' wa 'l-ta'rīkh*, ed. Huart, iv, 87, l. 8; from Hebrew, since the Ḳur'ānic form of the name is *Ilyās*), or "the House of God" (*Yāh* as name of God is mentioned by Muṭahhar). *Bayt al-maḳdis* is Aramaic *bēth maḳdᵉshā*, "Temple", and was used in this sense by Muslims, e.g. *ʿIḳd al-farīd*, 1321, iii, 290, l. 10: "In the prayer of Ezra this is found: Oh God, from all places you have chosen Īliyā' and from Īliyā'—*bayt al-maḳdis*". Soon, however, the term (pronounced also *bayt al-muḳaddas*, see below) was transferred to the city, while the Temple area was designated by the Arabic equivalent of *bayt al-maḳdis*, sc. *al-ḥaram*.

The common name of Jerusalem, *al-Ḳuds*, still unknown to Ibn Saʿd, Balādhurī, Ṭabarī, the *Aghānī*, the *ʿIḳd al-farīd* and other classics of the 3rd/9th century, underwent a similar development. Muṭahhar, himself a native of Jerusalem, writing in 355/966, mentions the term only once (vi, 91, perhaps a later change), but al-Muḳaddasī, writing *ca.* 375/985, uses it frequently. Nāṣir-i Khusraw (439/1047) states that *al-Ḳuds* was used by the local people. *Al-Ḳuds* is Aramaic *ḳudsha*, which, in the term *ḳarta de-ḳudsha* (e.g. Isaiah, xlviii, 2) was understood not as "city of holiness", but as "city of the sanctuary". This is borne out by the usage of Karaite scholars writing in Jerusalem early in the 10th century, who call the city *bayt al-maḳdis*, but the Temple area *al-ḳuds* (see the lengthy quotation in J. Mann, *Texts and studies*, Philadelphia 1935, ii, 18; cf. also the Geniza [*q.v.*] fragment in S. Assaf, *Texts and studies*, Jerusalem 1946, 21, l. 13). Similarly, in a version of the often-quoted tradition in which the Jewish convert Kaʿb al-Aḥbār tries to induce the caliph ʿUmar to pray north of the Holy Rock, he says to him: "Then the entire *al-ḳuds*, that is, *al-masdjid al-ḥaram* (!) will be before you (Suyūṭī, *Itḥāf al-akhiṣṣā'*, Ms. Heb. Univ. Library, fol. 81a, l. 8). It should be noted that, in letters from the 5th/11th century, when Hebrew had replaced Aramaic, Jerusalem was commonly called *ʿīr haḳ-ḳōdesh*, to be understood as "city of the sanctuary".

In accordance with the principle that "the multitude of names proves the excellence of their bearer", *Itḥāf al-akhiṣṣa'*, ff. 9b-10b, enumerates seventeen Arabic names of Jerusalem (*Midrash Tehillim*, ed. S. Schechter, 1896, 8-9, has "seventy"). Suyūṭī's list does not include here the Ḳur'ānic expressions taken by the Muslim commentators as denoting Jerusalem, such as *al-masdjid al-aḳṣā* (see below), or *mubawwā ṣidḳ*, "the safe abode" (X, 93, cf. *neve ṣedeḳ*, Jeremiah xxxi, 22). *Al-arḍ al-muḳaddasa* (V, 21), "the Holy Land", also was understood as denoting Jerusalem (*Itḥāf*, fol. 188b, l. 9), which is in conformity with Jewish and Christian usage, which often expands the name of the city on the country. This explanation might have influenced the pronunciation of *bayt al-maḳdis* as *bayt al-muḳaddas*.

Various Arabic versions of Hebr. *shālēm* (Ps. lxxvi, 3) and Aram. *Urishlem* (Arabicised *urshalīm*) are found in the sources and even in ancient Arabic poetry (*Sallam*, al-Aʿshā, al-Bakrī, 144, l. 22, 812, l. 17; *Salim*, *Itḥāf*, f. 10a). Whether *dār al-salām*, "abode of peace" (S. Assaf, *Texts*, 108-10, corresponding to Heb. *ʿīr hash-shālōm*, Gottheil-Worrel, *Geniza fragments from the Freer Collection*, New York 1926, 26), found in Geniza letters of the 11th century, was used also by Muslims has not yet been ascertained.

3. *Jerusalem in the Ḳur'ān.* Jerusalem is not mentioned expressly in the Ḳur'ān. But "the city of the sanctuary" certainly was known to the Prophet. Sūra XVII, significantly named both *al-Isrā'* and *Banū Isrā'īl*, in vv. 2-8 clearly refers to the destruction of the first and second temples (called *masdjid* in V, 7) as crucial events in the history of the Banū Isrā'īl. *Al-masdjid al-aḳṣā* in the opening verse of the Sūra is taken by the prevailing Muslim tradition as referring to the sanctuary of Jerusalem. Against this, it has been argued that there was no building on the site of the Temple at the time of the Prophet, that the Holy Land is called in the Ḳur'ān the "nearest" (XXX, 2) and not the farthest (XVII, 1), and that, in general, the verse makes the impression (and is taken thus by Islamic tradition) of an account of a nightly ascension to a heavenly sanctuary (details in the articles of Bevan, Schrieke and Horovitz, cited in MIʿRĀDJ). But knowledge of the state of the site of the Temple or consistency in geographical definition were outside the interests of the Prophet. It may be concluded with reasonable certainty that, at the time when XVII, 1, was combined with XVII, 2-8, the tradition identifying *al-masdjid al-aḳṣā* as the Temple of Jerusalem was already dominant, and that the original meaning of the verse as that of a visionary experience was connected with it in one way or another (cf. "The Jerusalem above", St. Paul's Epistle to the Galatians, iv, 26).

The situation is similar with regard to the *ḳibla*, or direction of prayer (II, 136-8). Again, Jerusalem is not mentioned expressly, but the Islamic tradition that it was intended by "the first *ḳibla*" is no doubt genuine; since the new *ḳibla*, which satisfied the Prophet's heart, was to the direction of the sanctuary of his native city, it stands to reason that the original one also was oriented to a holy city, and there was none for monotheists except Jerusalem. No "political" reasons, however, should be assumed for this change ("trying to win the Jews", "breaking with the Jews"). One prayed towards Jerusalem because this was the direction of the People of the Book as was known in Medina. It simply was the proper thing to do. When Islam became a separate religion with Mecca as its central sanctuary, the change was natural and religiously cogent.

4. *The Conquest.* The battle of Adjnādayn [*q.v.*] in the summer of 13/634 opened southern Palestine to the conquering Muslims. No siege was laid on Jerusalem, but already in his sermon on Christmas night 634 the aged patriarch Sophronius expressed his grief that it was impossible to proceed from Jerusalem to Bethlehem as usual because of the marauding Arabs. A few days later, in his sermon on Epiphany, he mourned over the bloodshed, the destruction of the monasteries, the plunder of the cities and the burning of the villages by the Saracens, "who boast they would conquer the entire world". Still, four years passed from the Arab invasion of Palestine to the fall of Jerusalem. It came about early in the year 638 (end of 16, or beginning of 17 A.H.), after the decisive battle of the Yarmūk [*q.v.*] (Radjab 15/Aug. 636).

The stories about the fall of Jerusalem can be divided into three groups. The ancient and most trustworthy tradition simply reports that the capitulation was arranged with Khālid b. Thābit al-Fahmī, a little-known tribal commander, under the condition that the open country belonged to the Muslims, while the city would not be touched as long as its inhabitants paid the tribute imposed on them (Balādhurī, *Futūḥ*, 139, ll. 4-9). No treaty is mentioned yet. The second type, represented, e.g. by Yaʿḳūbī, ii, 167, and Eutychius, *Annales*, ii, 17, reproduces a treaty,

but the treaty is very succinct and does not differ much from Balādhurī's version. Later, conditions similar to those made with the Byzantine authorities in Egypt were added and some (but not all) Christian authors added the condition "that no Jew should live with them in Jerusalem". This condition is found also in Ṭabarī, i, 2405, from where several later Muslim writers have copied it. But Ṭabarī's source here was Sayf b. ʿUmar, whose fathomless unreliability has been proved in detail long time ago (J. Wellhausen, *Skizzen und Vorarbeiten*, vi, 3-7) and who tells us, e.g. here, Ṭabarī, i, 2404, about the conquest of Ramla, a city founded by the crown prince Sulaymān b. ʿAbd al-Malik eighty years later. A mere look at the treaty produced by Sayf, its wrong date and fantastic witnesses, shows its worthlessness. It is natural, however, that in times of tension, as in 879/1474, when the Mamlūk sultan ordered the rebuilding of a synagogue in Jerusalem, or as from 1929, this treaty served a purpose. From the Christian point of view, it is understandable that some writers wished to preserve Jerusalem as a Christian city, as it was in Byzantine times, but this was hardly in the interests of the Muslims, and their actions proved that such a stipulation never existed.

In addition to these three comparatively old versions, a later one, represented among many others by *Uns*, 225, adds several conditions of the legendary "Covenant of ʿUmar", in which the Christians undertake, *inter alia*, not to speak Arabic. Even more fantastic is Ibn ʿAsākir, ii, 323 (pseudo-Wāķidī), where the treaty is made with twenty Jews headed by Yūsuf (a scribal error for Yūshaʿ) b. Nūn. This is a "harmonising" legend; a Jew, bearing the same name as the Jewish conqueror of the Holy Land, delivers it into the hands of the Muslims.

5. *The beginnings of Islamisation*. Ṭabarī, i, 2408, ff., and many later Muslim and Christian sources, tell about a visit to Jerusalem by the caliph ʿUmar, but all we have about it are legends whose easily recognisable tendencies betray their worthlessness. According to one school, the caliph was accompanied by Jews who showed him the true site of the Temple, which was concealed by rubble purposely heaped on it by Christians. When the place was cleared and the ubiquitous Kaʿb al-Aḥbār [*q.v.*] suggested to ʿUmar to pray behind the Holy Rock so that the two *ķibla*s should be in front of him (see § 2, above), the caliph refused, since the Muslims should turn towards the Kaʿba alone. This is, of course, one of the many traditions against the *bidʿa* of the overrating of the sanctity of Jerusalem (see § 11, below). According to Christian sources, the caliph visited the churches, but declined to pray in one of them in order to preclude any claims on it by later Muslim generations. This legend was a pious wish which originated at a time when the encroachments of the Muslims, which later became a reality, still were only a menace, see § 7, below. Since the conditions of the surrender safeguarded to the Christians the use of their churches, it is likely that the Temple area, which was largely or entirely unoccupied, served as a place of prayer to the Muslims from the very beginning, and there is no reason to doubt that this was done on order of the ruling caliph ʿUmar.

As far as the ancient sources go, it appears that the early Muslim settlers in Jerusalem were people from Medina, such as Aws, the nephew of the Prophet's court poet Ḥassān b. Thābit. Aws was a disciple of Kaʿb al-Aḥbār and himself a pietist, Ibn Saʿd, vii/2, 124; his tomb was still known at the time of Mudjīr al-Dīn, *Uns*, 233. Several other Medinese are listed as settlers in Jerusalem by Ibn Saʿd, iii/3, 57; vii/2, 129, l. 13, etc. Among them the famous "companion" ʿUbāda b. al-Ṣāmit, the first Muslim judge in the city (al-Dhahabī, *Duwal al-Islām*, 1364, i, 14) is to be noted. The Anṣār were accounted of Yaman; thus it was natural that the Yemenī auxiliary corps, *al-madad min ahl al-Yaman*, also was stationed there (Ibn Saʿd, vii/2, 140, l. 14). Simeon, the father of Muḥammad's Jewish concubine Rayḥāna, settled in Jerusalem and delivered sermons in the Muslim place of worship on the Temple area. He, too, of course, was from Medina (*Uns*, 235).

The strange *ḥadīth* running *ʿimrān bayt al-maķdis kharāb yathrib*, "The building of Jerusalem is the destruction of Medina", might have been originally a *bon mot* on this exodus from the capital of the Ḥidjāz to Jerusalem (which cannot have been more than a trickle); but soon became a standing element in the *malāḥim* literature. (Its continuation: *wa-kharāb yathrib khurūdj al-malḥama*, "and the destruction of Medina is the beginning of the war of the End of the Days". *Musnad Aḥmad b. Ḥanbal*, v, 232, 245; Abū Dāwūd, *Malāḥim*, 3; Djāḥiẓ, *Bayān*, ed. Sandūbī, ii, 28; Ibn Kathīr, *Nihāyat al-bidāya*, i, 79; Samhūdī, *Wafāʾ*, 1955, i, 120; *al-Sirādj al-munīr*, ii, 460, where are further sources).

Muķaddasī, 171, l. 12 and others report that the caliph ʿUthmān, whose rule began only eight years after the Islamic conquest of Jerusalem, dedicated the revenue from the rich vegetable gardens of Siloam (which, in accordance with the peace settlement, belonged to the Muslims) to the poor of the city. Umm al-Dardāʾ, the wife of the wise *ķāḍī* of Damascus, spent every year six months in Jerusalem, where "she sat among the poor" (*Uns*, 254). These and similar reports are not necessarily spurious, but may betray early Christian influence.

The Islamic conquest threw the Christian community of the city into complete disarray. The aged patriarch Sophronius died shortly afterwards and no new one was appointed until 706. The further history of the patriarchate of Jerusalem in early Islamic times is almost as obscure as that of the Jewish spiritual leadership in the country during that period. But Jerusalem retained largely its Christian character. As al-Muķaddasī tells us (182, l. 16 ff.), the Christian holidays regulated the rhythm of the year also for the Muslim population, and through Jerusalem and the hermits populating the mountains in its environment, pious Muslims became acquainted with the ways of Christian ascetism (S. D. Goitein, *Studies in Islamic history*, 141, 146).

6. *The Umayyads (19-132/640-750)*. About two years after the fall of Jerusalem, the Umayyad Muʿāwiya was appointed commander of the army operating in Palestine and Syria. He governed these countries for forty years, first as governor, and later as caliph. Jerusalem was the scene of two decisive events in his career. In 38/658, Muʿāwiya and ʿAmr b. al-ʿĀṣ, the conqueror of Egypt, concluded there a pact of co-operation, which decided the contest between ʿAlī and Muʿāwiya in the latter's favour (Ibn Saʿd, iv/2, 2, l. 22 ff.; the text of the agreement seems to be genuine). In Ṣafar-Rabīʿ I 40/July 660 homage was paid to Muʿāwiya as caliph in Jerusalem. A Syriac source, giving this date, reports also that Muʿāwiya prayed on this occasion at Golgotha, Gethsemane and the Tomb of Maria (T. Nöldeke, in *ZDMG*, xxix, 95). This was hardly mere politics (*ibid.*, 85), but a manifestation of the chiliastic state of mind of the time, sc. Islam entering into its inheritance of the preceding monotheistic religions.

During the long rule of Muʿāwiya, the Muslim place of worship on the Temple area, approximately described by bishop Arculfus in *ca.* 680 (see L. Bieler, *Corpus Christianorum, Series Latina*, clxxv, *Itineraria etc.*, Turnhout 1965, 177), must have taken shape. Muṭahhar b. Ṭāhir, iv, 87, l. 11, expressly states that Muʿāwiya built the Muslim sanctuary there "after ʿUmar". It stands also to reason that the plan for the erection of the Dome of the Rock, which needed immense preparations, was already made during the protracted and orderly rule of Muʿāwiya. The inscription in the dome bears the year 72/691-2, but the beginning of ʿAbd al-Malik's reign (65-86/685-705) was extremely turbulent. ʿAbd al-Malik had good reasons to make efforts towards the completion of the building, which would show him as the great champion of Islam, but the early years of his caliphate were hardly suited for both conceiving such an enormous undertaking and carrying it out to its very end during a comparatively short period. Contrariwise, Muʿāwiya is known also by his extensive buying and building activities in Mecca (in order to provide shelter for pilgrims and *mudjāwirūn*), in which he was not followed by later Umayyads, see M. J. Kister, *Some reports concerning Mecca*, in *JESHO*, xv (1972), 84-91.

Goldziher, *Muh. St.*, ii, 35-7, Eng. tr. ii, 44-6, expounded the theory that ʿAbd al-Malik, by erecting the Dome of the Rock, tried to divert the Pilgrimage from Mecca, then the capital of his rival ʿAbd Allāh b. Zubayr, to Jerusalem, and that the many "traditions" in the name of the Prophet in favour or against the sanctity of Jerusalem reflect this political contest for the caliphate. This thesis was generally accepted and has found its way into the textbooks on Islamic history. It cannot be maintained, however. None of the great Muslim historians of the 3rd/9th century who describe the conflict between ʿAbd al-Malik and Ibn Zubayr in utmost detail, nor any of the older geographers, including al-Muḳaddasī, a native of Jerusalem, makes the slightest allusion to such an intention of the Umayyad caliph. On the contrary, for the year 68/687-8, Ṭabarī, ii, 781-3 and others, report expressly that the soldiers of ʿAbd al-Malik's expeditionary force participated in the *ḥadjdj*. They wished to do so even during the very siege of Mecca, a request which Ibn Zubayr naturally had to refuse, Balādhurī, *Ansāb*, v, 360. Moreover, it is obvious that ʿAbd al-Malik would not have strengthened, but endangered his position by trying to divert the *ḥadjdj* from the holy sites expressly mentioned in the Ḳurʾān, and this after the *ḳibla* had been emphatically turned away from Jerusalem. By abolishing one of the five pillars of Islam, he would have made himself a *kāfir*, against whom the *djihād* was obligatory. The two older sources that mention the allegation that ʿAbd al-Malik, by constructing the Dome of the Rock, tried to attract the *ḥadjdj* to Jerusalem, sc. Yaʿḳūbī, ii, 311, and Eutychius, i, 39, invalidate their statements by others, obviously untrue, connected with them. They have the Umayyads forbid the Pilgrimage to Mecca, which is in flagrant contradiction to trustworthy reports that Umayyad caliphs made the pilgrimage themselves.

Nāṣir-i Khusraw, who visited Jerusalem in 439/1047, reports that people in Palestine who were unable to make the *ḥadjdj*, assembled in Jerusalem *wa-bi-mawḳif bi-īstand*, "and performed the *wuḳūf*", the standing in the presence of God which was the main ceremony at the sacred mountain of ʿArafāt [*q.v.*]. This statement, which has sometimes been adduced as a corroboration of Goldziher's thesis, must be understood in a wider Islamic context. Such a substitute for the pilgrimage is attested also for the main cities of other provinces, such as Baṣra and Fusṭāṭ; it even had a special name, *taʿrīf*, derived from ʿArafāt, Ibn Taghribirdī, i, 207. But, like the individual sacrifices, it manifested a participation in the *ḥadjdj*, celebrated on the same day in Arabia, not its replacement by a local pilgrimage.

The real urge for the erection of the Dome of the Rock on the site where it stands and in the form which it has, was religious, in addition, of course, to the natural acculturation of the Arabs to an environment, where magnificent edifices were the eloquent witnesses of a triumphant Church and of great rulers. Rajāʾ b. Ḥaywa [*q.v.*] of Baysān, who was in charge of the building operations (*Uns*, 241, and others; probably only the financial aspect, while the *mawlā* Yazīd b. Salām supervised the actual work) was the most prominent traditionist of Shaʾm, a pietist and ascetic, (Ibn Ḥadjar, *Tahdhīb*, iii, 266), and he and people of his ilk might have been the spiritual originators of the undertaking. By choosing the site, Islam manifested itself as the exclusive heir of the older religions. The gorgeous mosaics, representing jewels and ornaments of the greatest variety, were in chiliastic fulfillment of the prophetic descriptions of the future Jerusalem (Isaiah, liv, 12, etc.), which had become known to the Muslims (Ibn al-Faḳīh, *BGA*, v, 97, ll. 11-13) and were incorporated by them in the legendary descriptions of Solomon's Temple (*ibid.*, 99, l. 10). The detailed inscriptions in the Dome betray a spirit of Islamic mission, specifically to the Christians, since the "prophethood" of Jesus is emphatically stressed and his sonship denied with equal fervour. Details in the articles of Goitein, Grabar and Caskel; see Bibliography.

Muslim and Jewish sources report that Jews were employed as servants of the sanctuary on the Temple area, its cleaning and illumination (including the making of the glass lamps). If true at all, these reports can refer only to an early and very short period. On the other hand, the contribution of oil for the illumination of the Temple area seems to have been regarded by both Christians and Jews as a pious deed, widely observed. Al-Khaṣṣāf (d. 261/874-5) in his book on *waḳf*, 341, says: "If a Christian or Jew dedicates his land or house to the repairs of the *Bayt al-maḳdis* or for the purchase of oil for its illumination, it is permissible to accept this from him, for this is an act of piety both with regard to Muslims and to them". Previously, the author had explained that it was not permitted to accept from non-Muslims a *waḳf* for specific Muslim purposes). An Italian Jew of the 10th century, who was of great munificence, also contributed oil "to the sanctuary on the Western Wall, namely to the altar (clearly an expression for a non-Jewish building) which is inside" (*Aḥimaʿa's chronicle*, ed. B. Klar, Jerusalem 1944, 47).

Besides the erection of the Dome of the Rock, the Umayyad period contributed to Jerusalem other great architectural achievements, the *masdjid al-aḳṣā* and the *dār al-imāra*, see section B. New gates were added (Ibn Kathīr, xi, 226, repeating the anecdote that the gate with the inscription of al-Ḥadjdjādj, at that time governor of Filasṭīn, remained intact, while that bearing the name of ʿAbd al-Malik collapsed) and the road to Jerusalem was repaired (mentioned also in a Jewish source), its milestones receiving Arab inscriptions (*RCEA*, no. 15). It is evident that such comprehensive building operations must have had a considerable impact on the composition of Jerusalem's population.

The extensive foundations of Umayyad buildings laid bare to the south and south west of the Aḳṣā mosque during the recent excavations of B. Mazar (1968-76) suggest that the Muslims planned to do in Palestine what they had done in Ifrīḳiya, Egypt and Syria, sc. to replace the Byzantine capital situated on the seashore (Caesarea) by an inland administrative centre. In view of the lack of written sources on the subject, we cannot know why Jerusalem finally did not acquire this status. For the then available means of transportation, Jerusalem was perhaps too far away from the main lines of international traffic.

The foundation of Ramla [*q.v.*] as capital city of the province of Filasṭīn by the crown prince Sulaymān was in the first place a blow for neighbouring Lod or Lydda, but in the long run was detrimental to Jerusalem. According to later traditions, Sulaymān himself received homage in Jerusalem and intended to stay there (Ibn Kat͟hīr, ix, 174; cf. also E. Sivan, in *Israel Or. Stud.*, i, 270, n. 33), but he took Ramla as his permanent residence and the town became the administrative and economic centre of the country. The inhabitants of Jerusalem were well aware of this fact, as Muṭahhar b. Ṭāhir, one of them, observes (iv, 72, ll. 2-3): *bayt al-maḳdis min sawād al-ramla baʿd mā kānat dār al-mulk fī ayyām Sulaymān wa-Dāwūd*, "Jerusalem is a provincial town attached to Ramla after having been the seat of the government in the days of Solomon and David".

7. *The ʿAbbāsid Period (132-358/750-969)*. The end of Umayyad rule was for Jerusalem, as for Palestine and Syria in general, a period of great tribulations. In the wake of a rebellion against the last Umayyad Marwān II, the walls of Jerusalem were pulled down and its inhabitants punished. Earthquakes aggravated the situation. At the beginning, the new dynasty paid special tribute to the holy character of the city. This was manifested by the first visit of al-Manṣūr, who set out for Jerusalem immediately after returning to Bag͟hdād from the pilgrimage to Mecca of the year 140/758 (Ṭabarī, iii, 129). He did so in order to fulfill a vow (Masʿūdī, vi, 212, l. 9), made perhaps because a hundred lunar years had passed since Muʿāwiya had received homage in the Holy City in 19/40. A second visit of the ʿAbbāsid caliph, in 154/771 (Ṭab. iii, 372) was made in connection with a great rising in the Mag͟hrib; al-Manṣūr accompanied as far as Jerusalem the large army assembled by him for the quelling of the revolt (Balād͟hurī, *Futūḥ*, 233, ll. 4-5, Ibn al-At͟hīr, v, 467). His son al-Mahdī also visited Jerusalem and prayed there (Ṭab. iii, 500), but Hārūn al-Ras͟hīd, who made the *ḥadjdj* almost every second year and frequented Syria because of the Holy War against Byzantium, never came to Jerusalem. Nor did his son al-Maʾmūn, although he sojourned in Syria and even in Egypt, or any other later ʿAbbāsid caliph. This change of attitude probably reflected the new trend of Islamic piety, which abhorred the *bidʿas*, the foreign elements and "innovations", in the legends about Jerusalem.

Theophanes, *Chronographia*, i, 446, reports that al-Manṣūr, on the occasion of his visit to Jerusalem, ordered the Christians and Hebrews to tattoo their names on their hands (so that they could not escape the poll tax), whereupon many Christians fled to "Romania" via the sea. Such measures had been taken earlier in Islam; their adoption with regard to Jerusalem obviously means that at that time both the Muslim and the non-Muslim population of the city must have become quite numerous and the mutual assimilation of the various elements comparatively progressed. This increase must have been due to religious incentive, for the ancient *ḥadīt͟h* assuring the Muslims that God permanently guaranteed sustenance to the inhabitants of Jerusalem (Ibn al-Faḳīh, *BGA*, v, 94, l. 12, and others) proves that life there never was easy. The legendary biographies of most of the early Ṣūfīs, especially those of Iranian origin, contain the detail that they stayed in Jerusalem one time or another (*JAOS*, lxx, 107), and well-founded sources prove a considerable Muslim influx from Iran, see § 9, below.

The Christians of Jerusalem received a mighty uplift by the interest shown for the Holy City by the rulers and the pious of Western Europe. Whatever the truth about the embassies exchanged between Hārūn al-Ras͟hīd and Charlemagne, and the delivery to the latter of the key and the standard of Jerusalem (received by him in Rome in the year 800, at the time of his coronation as Emperor), there can be no doubt that many new buildings destined for the religious and material needs of pilgrims and newcomers were erected in Jerusalem by the emperor and his successors (a list in T. Tobler, *Itinera Hierosolymitana*, i, 314). Charlemagne's son and successor Louis ordered each estate in his empire to contribute one denarius for the needs of Christian Jerusalem. It is evident that most of the money needed for the payment of the poll tax and other impositions on the Christians of the city came from abroad. The composition of the Christian population may be gauged from a list of the hermits living in cells on the Mount of Olives, of whom eleven said their psalmodies in Greek, six in Syriac, five in Latin, four in Georgian, two in Armenian, and one in Arabic (Tobler, *op. cit.*, i, 302).

Ca. 800, the Jewish High Council, the *yes͟hiva*, headed by the Gaon (corresponding to the Christian patriarch), moved from Tiberias to Jerusalem. His authority was soon challenged by the Karaites [*q.v.*]' a dissident Jewish sect, which made Jerusalem its centre. The Karaite dispensation, which mainly developed on Iranian soil, is to be understood in the Islamic context as a branch of the S͟huʿūbiyya [*q.v.*], emphasising the return to the Bible, the revival of Hebrew, and the settling in the Holy Land. As is natural, the movement originated preponderantly in circles near to the Arabs, Jewish government officials or otherwise prominent people. Consequently, the Karaite settlers in Jerusalem easily got the upper hand. Jerusalem became indeed their main spiritual centre. In the ensuing controversies, which, during the turbulent 3rd/9th century, were brought before the Muslim authorities, one Gaon lost his life and two others with difficulty escaped a similar fate (J. Mann, *Jews in Egypt and Palestine under the Fāṭimids*, repr. 1970, i, 57). In the course of time, the two denominations learned to co-exist and to cooperate, but in Jerusalem rather less than, e.g., in Egypt. The Fāṭimids recognised the Gaon of Jerusalem as the head of the Rabbanite Jews in their empire (see Goitein, *A Mediterranean society*, ii, Berkeley and Los Angeles 1971, 5 ff.).

During the reign of al-Maʾmūn (198-218/813-33), Jerusalem suffered by a famine and became depleted of its Muslims, an opportunity used by the patriarch to execute repairs in the building of the Holy Sepulchre (Eutychius, ii, 55-57). More serious was a great revolt of *fellāḥīn*, which broke out at the end of the reign of his successor al-Muʿtaṣim (218-27/833-42). The revolt was led by one Abū Ḥarb al-

Mubarḳaʿ ("veiled one"—as former impostors had been) and soon encompassed the whole of Syria. Its leader assumed the role of the Sufyānī, or messiah of Umayyad stock, reduced the poll tax and made other promises to the population. But soon he changed his ways. When he entered Jerusalem, its entire populace, Muslims, Christians and Jews, fled and all the places of worship were pillaged. Only a large contribution by the patriarch prevented him from burning the Holy Sepulchre. It was a typical peasants' revolt, which was unable to make a stand against the regular army sent to subdue it by al-Muʿtaṣim's successor (Ibn al-Athīr, vi, 371-2, who does not mention Jerusalem; Michael Syrus, ii, 541).

In 256/869-70 Syria and Palestine received for the first time a Turk as governor (Amadjūr, Ibn al-Athīr, vii, 165, ll. 3-7), but this did not change the ways of the ʿAbbāsid régime, which had long before assumed the character of a bureaucracy based largely on foreign hirelings. Precisely at that time, the patriarch Theodosius of Jerusalem praised the Saracens for permitting the Christians to build churches and to live in accordance with their religion without oppressing them. (J. D. Mansi, *Conciliorum collectio*, repr. 1960, xvi, 26), and Bernard the monk expressed his admiration for the safety of the roads in the country (Tobler, *Itinera*, 319).

Aḥmad b. Ṭulūn, who had made himself lord of Egypt in 254/868, conquered Palestine in 264/878, but in the wars between the Ṭūlūnids and later the Ikhshīdids [*q.v.*], the rulers of Egypt, and their overlords, the ʿAbbāsid caliphs, Jerusalem played no role. But a new turn in the concepts about the holy character of Jerusalem must have taken place. The belief that it would be the scene of the Last Judgement and the gate to Paradise (Ibn al-Faḳīh, *BGA*, v, 94, etc.), must have gained ground, whence people who could afford it arranged for their burial there. Ṭabarī, i, 486, l. 12, and others report that the Jews from all countries, following the example of Moses, who carried the coffin of Joseph with him from Egypt, used to bring their dead to the Holy Land. This custom, as is proved by many Geniza documents, was indeed widespread, even among people of limited means. It went back to Roman times, when "Ḥimyarite" Jews buried their dead in the Bēth-Shaʿarayim necropolis near Haifa. In the 4th/10th century it must have become popular among Muslims. ʿĪsā b. Mūsā al-Nūsharī, the first ʿAbbāsid governor of Egypt after the overthrow of the Ṭūlūnids, was buried in Jerusalem in 296/909; the founder of the Ikhshīdid dynasty, the Turk Muḥammad b. Ṭughdj, happened to die in Damascus in 334/946, but he and several other members of his family and retinue, including the famous black eunuch Kāfūr, one of the able rulers of Egypt, were interred in Jerusalem.

Ṭabarī, iii, 2128, l. 18, and others report under the year 891 that the esoteric sect of the Ḳarmaṭians [*q.v.*] turned towards Jerusalem in their prayers. But he notes also that they kept Monday instead of Friday as their weekly day of worship and celebrated it (in the Jewish fashion) as a day of rest. Such oddities (if they really existed) were of no general significance for Islam. In their devastating raids, the Ḳarmaṭians reached also Palestine, but Jerusalem is not mentioned at that time in connection with their exploits.

The absence of a strong central government during the 3rd/9th century and perhaps also other circumstances, such as the Byzantine offensive against Islamic territories (culminating in the boasting threat of the emperor Nicephorus II Phocas in 964 that he would take Jerusalem) caused friction between the various religious communities. Half of the outer court of the Holy Sepulchre was taken away and a mosque erected on it (later called *masdjid ʿUmar*, probably in order to emphasise, against Christian claims (above, § 4), that the caliph had prayed there). Shortly afterwards, on Palm Sunday 938, the Christian procession was attacked and the Holy Sepulchre damaged by fire. Even worse, and characteristic for the period, were the events of 355/966. The patriarch of Jerusalem had sought the intervention of Kāfūr, the black viceroy of Egypt, against the overreaching Berber governor of Jerusalem who had imposed excessive financial demands on the Christians. Kāfūr sent a Turkish officer for the protection of the Christians. But the governor did not budge. When, on Pentecost, the patriarch refused to pay more than the tribute usually delivered on that holiday, the Berber incited the mob; the Holy Sepulchre and other churches were pillaged and set on fire, the patriarch was murdered and his body burnt. Yaḥyā b. Saʿīd al-Anṭākī, 125, who tells this story, adds that the Jews outdid the Muslims in damaging the sacred buildings. This sounds strange, considering the weak position of the Jews in Jerusalem, but perhaps finds its explanation in a cryptic remark by a contemporary Karaite scholar about dangerous Christian machinations against the Jews in the city (J. Mann, *Texts and studies*, ii, 18-19) and in complaints about Jews in letters sent from Jerusalem and Venice to Henry I the Fowler in 922 (*M.G.H. Const.*, i, 4-7).

8. *Fāṭimids, Turkomāns and Saldjūḳs* (*358-492/969-1099*). Shortly after the conquest of Egypt by the Fāṭimids [*q.v.*], Palestine with Jerusalem came under their domination, but participated only comparatively little in the economic efflorescence of the first hundred years of their rule. Palestine was incessantly harrassed by Ḳarmaṭians and bedouins, first as allies, but soon (as from 363/974) separately. For about seventy years the Banū Djarrāḥ chieftains tried to get a hold of the country including Jerusalem (Ibn Athīr, x, 308, l. 17), sometimes supported by the Byzantine emperors. The 1020s were particularly harrowing. The outrages perpetrated by the bedouins "were unlike anything experienced in the countries of Islam since its inception" (Geniza letter, J. Mann, *Jews in Egypt*, ii, 181, l. 22). The details reported in the Geniza letters are revolting.

The unceasing local tribulations were temporarily overshadowed by the general persecution of Christians and Jews ordered by the caliph al-Ḥākim (386-411/996-1021). It culminated in the destruction of the Holy Sepulchre on 28 September 1009. This extraordinary measure cannot be explained by special circumstances alone, such as the abnormal state of mind of the caliph or the Muslims' anger over the pious fraud of the holy fire (M. Canard, *La destruction de l'Église de la Résurrection ... et ... la descente du feu sacré*, in *Byzantion*, xxv (1965), 16-43, where the literature on the event is surveyed). The persecution was a prolonged process; that of the Jews began only in 402/1012, at a time when the Christians of Jerusalem, with the help or connivance of the bedouin chieftain Mufarridj b. al-Djarrāḥ already tried to restore the Holy Sepulchre. Most likely, an inner turn-about of the religious policy of the Ismāʿīlī leadership was the main cause of the persecution. Anyhow, it left Jerusalem, which had consisted largely of Christian buildings, a shambles. The earthquake of 407/1016, in which the dome of the

Ṣak͟hra collapsed, made things worse (according to a Geniza letter, the collapse occurred on the 25 July, at 4 p.m., J. Mann, *Texts and studies*, i, 313). The persecution petered out, but the Jews and Christians were much too impoverished to be able to undo the destruction. It took almost forty years until the restoration of the Holy Sepulchre was completed.

Around the middle of the 5th/11th century, Jerusalem began to take the place of Ramla as the main city of the country. Ramla had suffered by the earthquakes of 424/1033 and 460/1068 and by the endless depredations of the bedouins more extensively than had Jerusalem (cf. Yaḥyā b. Saʿīd al-Anṭākī, ii, 201). Contrariwise, the stream of pilgrims from Europe to Jerusalem became ever stronger, the great caravan of 12,000 pilgrims from southern Germany and Holland arriving in 1065, so lively described by Lambert of Hersfeld, being one of its best known examples. It may also be that the techniques of warfare and fortifications had changed, making Jerusalem more easily defendable than a city in a flat country like Ramla. The audacity of the Banū D̲j̲arrāḥ and other bedouin hordes forced the Fāṭimids to strengthen the walls of Jerusalem in 424/1033 and again in 455/1063. In the last third of the 5th/11th century, Jerusalem and not Ramla was in the centre of military events.

The Sald̲j̲ūḳ invasions set into motion motley crowds of soldiers of fortune from many nations, led by ruthless condottieri. One of these was the Turkoman Atsïz b. Uvak [*q.v.*], whom the Fāṭimid government, paralysed by famine, plague and complete anarchy in Egypt, called in against the unruly bedouins in Palestine. But Atsïz turned against the Fāṭimids and took Jerusalem in 463/1071 after a prolonged siege. Emboldened by his successes, he attacked Egypt itself, but there order had been restored by the Armenian convert Badr al-D̲j̲āmālī [*q.v.*], and Atsïz was forced to retreat (469/1077). In a long Hebrew poem celebrating the Fāṭimid victory, a Jewish dignitary from Palestine describes in detail the sufferings of Jerusalem, and in particular the devastation of its environment with its vineyards and orchards by Atsïz's hordes (ed. J. Greenstone, repr. from *AJSLL* [1906], 1-34). The local population rose against the barbarian conquerors and Atsïz had to take Jerusalem a second time, putting the inhabitants to sword, even those who had fled into the al-Aḳṣā mosque. Only those who had taken refuge in the Dome of the Rock were spared. Atsïz was soon liquidated by the brother of the Sald̲j̲ūḳ Sultan Malik S̲h̲āh, Tutus̲h̲, who then was governor of Damascus (470/1078). Thus Jerusalem was incorporated in the great Sald̲j̲ūḳ empire, the borders of which henceforth were given as stretching "from Kās̲h̲g̲h̲ar to Jerusalem" (Yāfiʿī, *Mirʾāt al-d̲j̲anān*, iii, 139). Tutus̲h̲ assigned Jerusalem to Artuḳ [*q.v.*], the founder of the Mesopotamian dynasty called after him. It is not sure when exactly Artuḳ took possession of the city; it was in his hands in 479/1086 (Ibn al-At̲h̲īr, x, 96), and was given by him to two of his sons in 484/1091. In S̲h̲aʿbān 491/July 1098 (Ibn Muyassar, ed. Massé, 38), that is, when the Crusaders were already on their march to Jerusalem, al-Afḍal, the Fāṭimid viceroy of Egypt, laid siege on the city, "bombarding it from forty catapults during forty days" (Ibn K̲h̲aldūn, *ʿIbar*, v, 184). The two brothers surrendered, but were released unharmed by al-Afḍal. How unaware the Muslims were of the magnitude of the Crusader menace can be gauged from the fact that another Sald̲j̲ūḳ, Riḍwān, a son of Tutus̲h̲, set out from Damascus via Nābulus to wrest Jerusalem from the Fāṭimids. But he was no match for al-Afḍal's army; the viceroy returned to Egypt, leaving a small garrison in Jerusalem.

9. *Life in Jerusalem in the 4th/10th and 5th/11th centuries*. Copious references in the works of Muslim authors and over a hundred Geniza letters from Jerusalem written during the 5th/11th century enable us to form a fairly substantial idea about life in Jerusalem during the two centuries preceding its capture by the Crusaders. This is particularly true with regard to the last third of the 4th/10th century, when al-Muṭahhar b. Ṭāhir and al-Muḳaddasī wrote, and the second third of the 5th/11th, when Nāṣir-i K̲h̲usraw visited the city and when the country had a short respite of comparatively normal times, reflected in the Geniza letters, between the atrocities of the bedouins and the devastations of the Turkomans.

The Muslim geographers naturally dedicated most of their attention to the sacred buildings and the fortifications, see section B. Al-Muḳaddasī, a keen observer (see e.g. his remark about a bath near the Bāb al-Asbāṭ (St. Stephen's gate), which was built half in the local tradition, and half according to the Persian fashion, 440, l. 15) again and again praises the unique beauty of Jerusalem (e.g. 33, l. 16; 166, l. 2; 167, n.n.), its clean and well-stocked markets and public bathhouses, and does not forget to mention the latrines near the mosques and in the bazaars (182, l. 9). During the 4th/10th century, it seems, Muslim religious instruction in Jerusalem was mainly concentrated in the mosques of the Ḥaram (comparable to what happened in other Islamic cities; see also below). In the wake of al-Ḥākim's persecution, some Christian buildings might have become available for the *zāwiya*s mentioned by Mud̲j̲īr al-Dīn, 264. The Persian religious group of the Karrāmiyya [*q.v.*], which had first settled in Jerusalem already around the middle of the 3rd/9th century, erected *k̲h̲ānaḳāh*s for the needs of its members. By the middle of the 5th/11th century, the Christian quarter in the north-western part of the city, that is, around the Holy Sepulchre and other age-old churches, the Armenian quarter near St. James cathedral in the south, as well as two Jewish enclaves, one near the Western Wall, where people prayed, and one near the Damascus gate, were well-established. The synagogues referred to by Muṭahhar, Nāṣir-i K̲h̲usraw and Ḳalānisī, might have been identical with the *midrās̲h̲*s or houses of learning mentioned in a Geniza letter as places where prayers were held. The Karaites lived in a separate quarter in the south of the city, called *ḥārat al-mas̲h̲āriḳa*, the quarter of the Easterners, since most of them had come from Persia and ʿIrāḳ.

It is difficult to form a judgment about the size of the population. Nāṣir-i K̲h̲usraw's 20,000 betrays only the mysterious and widely-diffused predilection for the number 20. He gives 20,000 also for Tripoli in Lebanon, and for the number of people assembling in Jerusalem during the *ʿīd al-ḳurbān*, but Ibn At̲h̲īr, xi, 20, assigns that number to the membership of the Karrāmiyya settled in Jerusalem alone. Al-Muḳaddasī is more helpful when he says that Jerusalem was smaller than Mecca, but larger than Medina (167, l. 9), or more populous than many a provincial capital (165, l. 12). The repeatedly-mentioned number of 70,000 persons killed by the Crusaders in 492/1099 can by no means be used as an indication of the number of the inhabitants. Many people fled into the city before the approaching

invaders, and in general, on such occasions numbers are grossly exaggerated and worthless. If the al-Aḳṣā mosque was indeed reduced from fourteen to seven aisles after the earthquake of 424/1033 and others, the population must have considerably shrunk, possibly an outcome of the catastrophic tribulations by the bedouins in the 1020s.

The most characteristic trait of life in Jerusalem was, of course, that "no day passed without foreigners" (Muḳaddasī, 166, l. 6). Pilgrims from all regions filled the city (*ibid.*, 167, n. 12). The usage of pious Muslims to enter the state of *iḥrām* [*q.v.*] for the pilgrimage to Mecca in Jerusalem had the consequence that the city was frequented by Muslims from distant countries, in particular from the Maghrib (*ibid.*, 243, l. 12). Similarly, many a Jew from the Maghrib and Spain, visiting Jerusalem either as *ḥādjdj* (i.e. on the holidays prescribed for the pilgrimage) or as the *zāʾir* (on another occasion) has left letters in Geniza. The religious ceremonies of the various communities were not always confined to the houses of worship or even the walls of the city. We have detailed descriptions of these processions and assemblies. They must have conveyed to Jerusalem a festive appearance during many days of the year.

As to the government of the city, Muḳaddasī, 167, l. 7, complains that "the oppressed has no helper". But he makes similar remarks concerning other places, e.g. 448, and the Geniza letters show that the situation was not quite so hopeless. Justice was done, provided that there was someone strong and interested enough to take care of the case. Since Ramla was the capital of the province, everything had to be dealt with there, and in more serious cases appeals had to be made to Cairo. A dignitary from Jerusalem would appeal to a notable in Ramla such as "the chief physician of the dysentery department in the hospital", and ask him to bring the case of the wronged person or institution before the governor or chief *ḳāḍī* there, as the matter required, whereupon the latter would instruct their subordinates in Jerusalem to settle the dispute properly. In public affairs, the system worked the same way, as the edicts of the Fāṭimid caliphs for and against the Karaites of Palestine and the correspondence connected with these matters prove (see S. M. Stern, *Fāṭimid decrees*, London 1964; idem, *A petition to the Fāṭimid caliph al-Mustanṣir*, in *REJ*, cxxviii [1969], 203-22).

Ramla was also the economic centre of the country, as many references prove. *Suftadjas*, or bankers' cheques, for persons in Jerusalem were converted into cash in Ramla, which then was forwarded to Jerusalem, though we find also a banker, with a Persian name, in Jerusalem who issued *suftadjas* on Cairo. The money mostly used in Jerusalem around the middle of the 5th/11th century was the "Rūmī" (i.e. Southern Italian) and Muslim quarter- *dīnār* of the West, presumably because the pilgrims coming from those parts and from western Europe formed the majority of the customers. Oil, cheese, cotton and fruits are mentioned by the Muslim geographers and in the Geniza letters as main exports from Jerusalem. A letter from Tyre speaks of yarn sent from Jerusalem sufficient for the weaving of a thousand robes, *thawb*, of the bazaar type and even more of the home-made class. Since every mediaeval traveller tried also to do some business, we find in Jerusalem transit trade too, especially with Persians, bringing the heavy *ibrīzim* silk from Khurāsān (to be re-exported to Egypt), and taking with them Mediterranean goods such as coral. Jerusalem, as becoming a holy city, affected some austerity in clothing. "Here", a silk merchant writes in a letter to Fustat, "black and sky-blue silk is worn, not crimson as in Ramla and Ascalon". Wool traders, *ṣawwāf*, clothiers and *tādjirs* are mentioned as the prominent types of businessmen in the city. The well-developed commercial mail service connecting Jerusalem with Cairo, which was carried on by Muslims, shows that the city must have had some economic importance (Goitein, *A Mediterranean society*, i, 292-4).

Those newcomers who could afford it bought houses and stores and lived on the income from their rents. Others tried to do business, but complaints such as "there is no livelihood in Jerusalem", "when one exerts oneself here, the exertion works against him", or "many have come here rich and have been reduced to poverty", are frequent. As many letters show, the town was too far away from the main stream of international commerce. Another unfavourable factor was the crushing impositions on non-Muslims (or perhaps on foreigners in general). The Jewish community was almost permanently in debt to Muslim creditors, paying them exorbitant interest, because it had to deliver the yearly tributes to the authorities and others, e.g. the *Aḥdāth* [*q.v.*], whether the expected numbers of pilgrims arrived or not. To a large extent, the city was a refuge for the poor, of whom their respective religious communities abroad took care in many different ways (about which social service the Geniza is again very specific, cf. Goitein, *op. cit.*, ii, 96-7 and *passim*).

Jerusalem's mostly unsatisfactory economic situation might have been responsible for another negative aspect of its life during this period; despite its holiness for the three monotheistic religions, it did not become for any of them a great spiritual centre with a characteristic contribution of its own (smaller groups, such as Armenians and Georgians on the Christian side and the Karaites among the Jews, perhaps excepted). Many Muslim scholars came there to teach or to study, cf. Yāḳūt, i, 516, 859, 887, etc.; Ibn ʿAsākir, i, 397, l. 26; ii, 54, l. 3; 161, 14; iv, 153, l. 16; 154, l. 2, etc. But it is characteristic that in Yāḳūt's *Dictionary of learned men* Baṣra occurs 170 times, Damascus 100, but Jerusalem only once and in passing; in the *K. al-Aghānī* it is not mentioned at all. Al-Muḳaddasī's complaint, 167: "The mosque (that is, the house of study, see above) is empty, there are no scholars and no savants, no disputations and no instruction", was certainly an exaggeration, inspired by the deep love of the writer for his native city, as was his famous censure that Christians and Jews had there the upper hand, but Jerusalem certainly could not boast of excellence in the sciences of Islam or any other fields. The great al-Ghazālī sojourned there in 488/1095 not in order to make contacts, but with the intention to locking himself up and of seeking solitude.

The city had some importance as a refuge or place of banishment for persons with unorthodox views and ways of life. This trend began already in Umayyad times (Ṭabarī, i, 1920, l. 10; Ibn Saʿd, vii/2, 156-7). Thawr b. Yazīd had to leave Damascus because of his Ḳadarī [*q.v.*] views and died in Jerusalem ca. 153/770 (Ibn ʿAsākir, i, 68, l. 21; iii, 383-84). Tekīn, the Turkish governor of Egypt (who, at his request was buried in Jerusalem in 321/933) banished thither the Ṣūfī Abu 'l-Ḥasan al-Dīnawarī (Suyūṭī, *Ḥusn al-muḥāḍara*, i, 294). In Mamlūk times forced retirement in Jerusalem became almost customary, see § 12, below.

Jerusalem was a town of copyists, the occupation of the pious who were both learned and poor. Christian Arabic manuscripts written in the monastery of Mār Sābā near Jerusalem in the second half of the 3rd/9th century and in Jerusalem at the beginning of the 4th/10th are still extant, and an Armenian colophon from Jerusalem from the year 870 is known (J. Blau, *A grammar of Christian Arabic*, Louvain 1966, i, 24, 25, 33; E. Stone, *The manuscript library of the Armenian Patriarchate in Jerusalem*, in *Tarbiz*, xli [1972], 158). Jewish copyists active in Jerusalem during the 5th/11th century give us many details about their work.

According to Mudjīr al-Dīn, 263-5, the main local *madhhab* in the town, even before the Crusades, was Shāfiʿī, with a sprinkling of the Ḥanbalī, introduced by the Persian Abu 'l-Faradj al-Shīrāzī, while a Ḥanafī Turk was the *ḳāḍī*, a situation similar to that of much later times.

There was a marked difference between the spirit of the late 4th/10th century and the 5th/11th one. The former was characterised by three highly interesting Jerusalemites of Persian origin and of wide humanistic interests: the great traveller al-Muḳaddasī, one of the finest personalities produced by Islamic civilisation; al-Muṭahhar b. Ṭāhir, a keen and remarkably unbiased student of religions, writing in Bust, eastern Persia; and Abū Sulaymān Muḥammad b. Maʿshar al-Ḳudsī al-Bustī, who, according to Abū Sulayman al-Manṭiḳī, was the author of the *rasāʾil* of the Ikhwān al-Ṣafāʾ [*q.v.*]. The subsequent century witnessed a narrowing down to the more specifically Islamic branches of knowledge. A typical representative of the age was Abu 'l-Faḍl b. Ṭāhir al-Ḳaysarānī, active in Arabic language study, *ḥadīth*, and, especially, mysticism; he made his extensive travels on foot, carrying his books on his back and finally settled in Hamadhān, continuing the long-standing connection between Jerusalem and Persia. Al-Musharraf b. Muradjdjaʾ, the author of a book on the *Faḍāʾil al-Ḳuds* (see § 11, below) lived in the same century. The leading scholar of Jerusalem, "the *shaykh* of the Shāfiʿīs in the whole of Syria", Abu 'l-Fatḥ Naṣr b. Ibrāhīm, left the city for Tyre (Yāfiʿī, *Mirʾāt*, iii, 152-3). The Jewish Gaon did the same (*ca.* 1071). This, as well as many Geniza letters, shows that the situation in Jerusalem had become unbearable long before the Crusaders temporarily suspended Muslim and Jewish life in the city altogether.

10. *Crusaders and Ayyūbids.* The Crusaders laid siege on Jerusalem on June 6, 1099 and took it by assault on July 15, penetrating into the city from three different points. The behaviour of the different groups of conquerors, Frenchmen, Flemings, Provençals and Normans from Sicily, was not entirely uniform. Tancred, the leader of the Normans, granted safe-conduct to the Fāṭimid commander of the citadel (the "Tower of David") and to his men. A Geniza letter reports that the Jews in the entourage of the commander were included in the safe-conduct. Thus, no doubt, the Muslim civilians in the citadel were saved as well. The same letter says also that "the damned ones called Ashkenazim" (convincingly identified by B. Z. Kedar as Normans), "unlike others", did not rape women. The massacre of the Muslims and the Jews in the town was perpetrated out of military and religious considerations alike. The Crusaders did not run berserk, but proceeded systematically, as is shown first by the fact that they took time to collect hundreds of books, which they sold at Ascalon soon afterwards. The Geniza naturally speaks about Hebrew books, but there is no reason to assume that Muslim books were treated differently. The fact that a number of prisoners were sold far beneath the standard price of 33 1/3 *dīnārs* per person does not prove at all that the Crusaders were ignorant of the accepted norms; the war situation did not permit the keeping of larger numbers of captives for a protracted period. But prisoners from better families, for whom higher ransoms could be expected, were retained in Antioch for years. All in all, the letters of persons actually involved in the events somehow qualify the accepted notions about the conquest of Jerusalem by the Crusaders. There was a gruesome bloodbath, no doubt. But it was not as all-embracing as the summary reports of the chroniclers led us to believe.

Jerusalem became a Christian city, where no Muslim or Jewish cult was permitted and no non-Christian could take residence permanently. The mosques were turned into churches or used as secular buildings. The newly-founded kingdom was appropriately called the Kingdom of Jerusalem, *Regnum Hierusalem*, since the conversion of the Holy City into a Christian sanctuary had been the purpose of its erection. As a capital city, Jerusalem soon began to flourish. The court, the administration of the state, the ecclesiastical authorities, the monastic and military religious orders were all located here, and thousands of pilgrims visited the city every year, many staying on for longer periods or for good. Besides Eastern Christians, such as Syrians, Copts, Armenians and Georgians, the inhabitants were mostly Europeans, above all French. Smaller European communities, such as Spaniards, Provençals, Germans and Hungarians, lived in compact groups around their churches and public institutions. Many new buildings were erected, of which the enlarged Holy Sepulchre was the most conspicuous. The remarkably spacious and beautiful market hall, erected on the foundations of a similar Islamic building, still dominates daily life in the Old City today. Everywhere in Jerusalem the vestiges of Crusaders' activities are visible. When, after the war of 1967, the ruins of the Jewish quarter were cleared away, what is believed to be the remains of St. Mary of the Germans made their appearance.

Less than a decade after the conquest, a letter from Palestine (not from Jerusalem) reports that life in the country had returned to normal also for the non-Christian population. Jerusalem remained closed to Muslims and Jews, but, in the course of time, they were permitted to come there for business and prayer. A famous incident reported in the autobiography of Usāma b. Munḳidh [*q.v.*] shows him performing his prayers on the Temple area during a considerable stretch of time (ed. P. K. Hitti, Princeton 1930, 134-5). Jewish dyers worked for the King's wardrobe in the vicinity of the palace *ca.* 1170.

After the decisive victory of Ḥaṭṭīn (Rabīʿ II 583/July 1187), Saladin advanced towards Jerusalem and laid siege on the city. After prolonged negotiations, in which the defenders threatened to kill the Muslim prisoners and all non-combatants (so that they would not be sold into slavery), to burn all the valuables and to destroy the buildings on the Ḥaram al-Sharīf, an agreement was reached in Ramaḍān 583/November 1187, which permitted the inhabitants to ransom themselves after surrender. Only the Eastern Christians remained, and Jerusalem soon assumed the character of a predominantly Muslim city. The Muslim shrines were given back to their original destination and many Christian buildings were

dedicated to Muslim purposes. Outstanding examples were the convent of the church of St. Anne, which became the famous Ṣalāḥiyya *madrasa*, so called after its founder Saladin, and the Mūristān, a hospital, which originally had been the church at the hostel of the Knights of St. John. The Holy Sepulchre was left to the Christians, but the pilgrimage to it was temporarily suspended until 1192.

There remained the problem of repopulation. In 587/1191 the great port city of Ascalon was dismantled and destroyed at Saladin's command, in order to prevent the Crusaders from turning it into a new base for their operations. The dispossessed inhabitants must have found new homes in the empty houses of Jerusalem, for the Geniza letters from this period repeatedly speak of a community of *ʿAsāḳila* in the Holy City, and Jews certainly were given no preferential treatment. Another community listed alongside with them was that of the *Maghāriba*—a trend noted already two hundred years before by al-Muḳaddasī, see § 9 above. Individuals are described in the same source as hailing from Yaman, ʿIrāḳ, and Egypt. The influx of learned Jews from France attested for the period *ca.* 1210-15 in both literary texts and Geniza letters proves that Ayyūbid rule at that time must have had a reputation of an orderly government able to guarantee the safety of foreigners. But life in Jerusalem was hard, and before the 6th/12th century was out, we already read about newcomers who had left for the greener pastures of Egypt and the port cities of the Eastern Mediterranean.

A new and catastrophic turning point in the history of Jerusalem was the rule of Saladin's nephew al-Muʿaẓẓam, the Sultan of Damascus. On the one hand, as his many inscriptions prove, al-Muʿaẓẓam did much to adorn the Ḥaram, and erected there the Ḥanafī college called after him, see section B; but being afraid of a new encroachment by the Christians, he ordered in 616/1219 the destruction of the city with the exception of the Temple area, the Holy Sepulchre and the citadel. His apprehensions did not materialise, but his brother al-Kāmil, the ruler of Egypt, in order to shield himself from the Syrian Ayyūbids, concluded a treaty with the Emperor Frederick II, ceding to him the city for ten years (626/1229). The emperor, being under papal ban, crowned himself there without clerical assistance—the last time that a monarch was crowned in Jerusalem. Again Muslims (and of course, also Jews, as proved by a Geniza letter from 1236) were not permitted access to the city with the exception of the Ḥaram al-Sharīf, which remained in Muslim hands, but the *ḳāḍī*, the bearer of Muslim authority, had his seat outside Jerusalem (in al-Bīra, near Rāmallāh, J. Prawer, *Royaume latin*, Paris 1970, ii, 199). The subsequent hostilities between the Ayyūbids of Egypt and Syria resulted in an agreement between the latter and the Christians, which seemingly removed the Muslims even from the Temple area, so that the commander of the Templars could boast that the city was inhabited solely by Christians (Matthew Pâris, ***Historia major***, iv, 290, quoted by B. Z. Kedar, in *Tarbiz*, xli [1971] 88). But this lasted only a very short time. The Egyptian Ayyūbid al-Malik al-Ṣāliḥ Nadjm al-Dīn enlisted the help of the wild Khwārazmians, who had been driven to the West by the Mongols. The Khwārazmians overran Syria and Palestine, took Jerusalem in Rabīʿ I 642/August 1244 and plundered and murdered in the town, desecrating the Holy Sepulchre and other churches. The combined armies of the Khwārazmians and al-Malik al-Ṣāliḥ Nadjm joined battle with the Syrians and their allies, the Crusaders, and vanquished them (Djumādā I 642/October 1244). Consequently, Jerusalem came under the domination of the rulers of Egypt, under which, after a short interval in 647/1249, when again it was returned to the Sultan of Damascus, it remained until the Ottoman conquest of 922-3/1516-17).

II. The second six hundred years

11. *The sanctity of Jerusalem in Islam. Faḍāʾil al-Ḳuds.* The history of Jerusalem during this period was largely influenced by the enhanced religious halo it had acquired through the long struggle between Christians and Muslims. The position of Jerusalem in Islam had its ups and downs. It cannot be described yet in full, since important relevant texts, such as the *Tafsīr* of al-Muḳātil (d. 150/767), the *Muṣannaf* of ʿAbd al-Razzāḳ (d. 211/827) and the two oldest books of *Faḍāʾil al-Ḳuds* still await publication (see below). An excellent discussion of the literature on the subject and the present stage of research is found in E. Sivan, *Le caractère de Jérusalem dans l'Islam aux XIIe-XIIIe siècles*, in *SI*, xxvii (1967), 149-82, and idem, *The beginnings of the Faḍāʾil al-Quds literature*, in *Israel Or. Stud.*, i (1971), 263-71.

It was entirely in the spirit of early Islam that it incorporated the Jewish and Christian notions of the holiness of Jerusalem and made the area of the ancient Jewish Temple into a Muslim place of worship (§§ 4-6, above). The *ḥadīth* ranking Jerusalem as the third central sanctuary of Islam after Mecca and Medina, excluding others, was formulated in the course of the first century of Islam and obtained general recognition during the second, after the status of Jerusalem had been vehemently contested as being alien to Islam, whose cradle was the Ḥidjāz (cf. the saying attributed to ʿAbd Allāh b. Masʿūd and Ḥudhayfa: "Even if the distance between me and Jerusalem was only two parasangs, I would not go there", quoted in M. J. Kister, *You shall only set out for three mosques, a study of an early tradition*, in *Le Muséon*, lxxxii [1969], 173-96, where the material about this struggle is assembled [this quotation at 182, n. 39].

Both aspects, the veneration for Jerusalem and the objection to it, deepened with the increasing influx of foreign ideas on the subject and their development by Islamic popular piety. The notions that Jerusalem was holy as the domicile of the ancient prophets and saints [see ABDĀL] and as the scene of Muḥammad's *Isrāʾ* and *Miʿrādj* [*q.v.*] (the latter was mentioned in Saladin's letter to Richard Cœur de Lion as the main proof for the Muslims' claim on Jerusalem, Sivan, *Caractère sacré*, 165) were accepted by everyone; it was the more exuberant legends woven around those notions and, above all, the belief that Jerusalem would be the scene of Resurrection and of the Last Judgment, and the crude fantasies evolving from these themes, which aroused criticism and suspicion that they were local inventions destined to attract pilgrims and visitors. As Ibn Kathīr, *Bidāya*, viii, 280, l. 4 ff., formulated it: "They (the people of Jerusalem) have depicted there the spectacles of the *Ṣirāṭ* (the bridge suspended from the Mount of Olives to the Temple Mount, which will be thinner than a hair etc.), of the gate of the Paradise, of the footprints of the Prophet, and of the valley of Gehenna". As a result, Jerusalem during the 3rd-5th/9th-11th centuries did not com-

mand a paramount position in the religious consciousness of the Islamic world. While many Islamic cities inspired books of *faḍāʾil* already by the end of the 3rd and throughout the 4th centuries, Jerusalem appears only with two, compiled during the 5th: a tract by Abū Bakr al-Wāsiṭī, a *khaṭīb* of the al-Aḳṣā mosque (recently identified by M. J. Kister in the library of the al-Djazzār Pasha mosque of Acre; in the course of publication by Y. Hasson), and another by Abu 'l-Maʿālī al-Musharraf b. Muradjdjā, a *faḳīh* living in Jerusalem (to be edited by E. Sivan). The author of a third compilation, mainly of *ḥadīth*s, Abu 'l-Ḳāsim al-Makkī al-Maḳdisī, did not complete his work, since he was captured and killed by the Crusaders, see above. It is characteristic that these three authors were inhabitants of Jerusalem. The often-noted astounding fact that the conquest of Jerusalem by the Crusaders and its conversion into an exclusively Christian city did not arouse any strong Muslim reaction for decades also indicates that the veneration for the Holy City had not yet become a spiritual force in Islam.

The situation changed when ʿImād al-Dīn Zankī's conquest of Edessa in 539/1144 suggested to an ambitious ruler that territorial aspirations could well be underpinned by religious propaganda. The court poets and secretaries of Zankī and his son Nūr al-Dīn took up the topic of the *djihād* for Jerusalem. With Saladin, both before and after 583/1187, this propaganda reached its apogee. While no *Faḍāʾil al-Ḳuds* work appeared during the first half of the 6th/12th century, they became abundant and ubiquitous in the second half and in the subsequent centuries. How much Jerusalem had become an all-Islamic concern might be gauged from the widely diffused protests against al-Muʿaẓẓam's dismantling of the city in 616/1219 and al-Kāmil's ceding it to the Emperor Frederick II in 626/1229. Precisely after Jerusalem had ceased to be a military or political issue, sc. during the Mamlūk period, the *Faḍāʾil al-Ḳuds* multiplied; at least thirty are known from this period, see Sivan, *Caractère sacré*, 181. The exceptions taken by Ibn Taymiyya [*q.v.*] in his treatise on the subject were directed against the *bidʿa*s disfiguring the cult of Jerusalem; its canonical status as third in rank of the sanctuaries of Islam was never questioned.

To modern Muslims, this position symbolises the universal character of Islam. Sayyid Ḳuṭb (d. 1966) writes this in his huge work on the Ḳurʾān with reference to Sūra XVII, 1: "The *Isrāʾ* connects the great monotheistic religions from Abraham and Ishmael to the Seal of the Prophets. It combines the sites holy to the monotheistic religions with one another and it is as if Muḥammad, the last of the prophets, declares by this wondrous night voyage that his message contains those of the prophets preceding him and is connected with theirs" (*Fī ẓalāl al-Ḳurʾān*, xv, 12, ll. 5-9).

12. *Jerusalem under the Mamlūks (648-922/1250-1516)*. At the beginning of this period, Jerusalem was mostly in ruins and deserted. The few Christians who remained or returned there after the sack by the Khwārazmians in 642/1244 and the Muslims and Jews who had settled there anew, fled in 658/1260 before the onslaught of the Mongols who had reached places as far south of Jerusalem as Hebron and Gaza (latest discussion of the sources: B. Z. Kedar, *Tarbiz*, xli [1971], 89-91). After the victory of the Mamlūks at ʿAyn Djālūt [*q v*] in Shawwāl 658/September 1260, Jerusalem was definitely incorporated in their empire and was administered first by the Mamlūk viceroy of Damascus. In 778/1376 the Jerusalem district was made a separate administrative unit, whose governor, styled *nāʾib*, or deputy of the Sultan, was directly responsible to the government in Cairo. The sanctuaries of the Ḥaram (together with that of Hebron) were under the supervision of the "superintendent of the two holy sites", *nāẓir al-ḥaramayn*, who was responsible for their upkeep and in charge of their endowments. The history of the period was mainly one of rebuilding the city, see section B, Monuments. While the sultans repaired or adorned the great sanctuaries and carried out works for providing them with water, or erected important institutions such as the Ashrafiyya (see section B), so the *amīr*s and princes of the Mamlūk empire, as well as of other Muslim states and private persons erected *madrasas*, *zāwiyas*, *khānaḳāh*s, and mausoleums, many of which are still extant, or at least identifiable. Most of these buildings were small, having the appearance of ordinary townhouses, and were probably built with the use of ruins and their materials. But some of these foundations, such as the 8th/14th century Tengiziyya college, were spacious and distinguished.

Because of its relative isolation, its proximity of Egypt the absence of strong fortifications or of a garrison of any size, which might be used by a potential insurgent, Jerusalem served as a place of compulsory sojourn for discharged, dismissed, or exiled members of the Mamlūk military nobility, the so-called *baṭṭāl*s. What had been in early Islam an occasional occurrence (§ 9, above), now became a widespread practice of high socio-economic importance. As D. Ayalon, in a special study devoted to the subject, has pointed out, the Holy City was the most commonly assigned place of exile in the entire Mamluk empire (*Discharges from service, banishment and imprisonments in Mamluk society*, in *Israel Or. St.*, ii [1973], 324-49). To the many reasons for this choice adduced by the author, *ibid.*, 333, it might be added that the authorities intended with this perhaps the repopulation of the city. In any case, these *baṭṭāl*s, to whom fixed incomes were assigned by the government and who often possessed means of their own, were in a position to keep fine households and to leave behind them well-constructed mansions.

In the main, Jerusalem of the Mamlūk period must be envisaged as a city of Muslim divines living on pious foundations and salaries. The most conspicious aspect of the members of this dominant class of Jerusalem's society was their mobility. They served, often simultaneously, in different occupations and posts, such as professors or "repetitors" in *madrasas*, as *khaṭīb*s, *ḳāḍī*s, *muftī*s, or heads of dervish convents. They rarely stayed in Jerusalem for good, but moved on to Cairo or Damascus or other places, often returning for some time to Jerusalem, and finally concluding their lives somewhere else or back in the Holy City. Their literary output was equally diversified, comprising several or all of the fields of *ḥadīth*, *fiḳh* (*uṣūl* and *furūʿ*), *tafsīr*, *sīra*, occasionally also Arabic language and rhetorics. Arranging and classifying the knowledge they wished to impart under novel headings, or in the form of commentaries to other works, or in versifications, were favourite means of pouring old wine into new bottles.

A second characteristic of this class of scholars was the prominence of leading families which divided between themselves the most richly-endowed offices. This was, of course, nothing new in Islam. But in Jerusalem, which lived on endowments from abroad, nepotism was rife, and family rule was not always

to the benefit of scholarship or good administration (we often hear about pious foundations falling into desuetude). The most prominent family of Muslim divines during almost the entire Mamlūk period (and also in early Ottoman times), were the Banū Ibn Djamāʿa [*q.v.*], who originated in Ḥamā and inhabited in Jerusalem a mansion bordering on the north-west corner of the Ḥaram. The biographies of the more prolific authors of this family show, however, that they passed most of their adult lives in the great centres of Islamic scholarship, sc. Cairo and Damascus. In Jerusalem they mostly served as *khaṭīb*s and *ḳāḍī*s. One branch of them, the al-Khaṭīb family, is still extant. (There are other families in Jerusalem, unconnected with them, bearing this name.) An Egyptian family, the Ḳarḳashandīs, shared with them the prerogative of the office of *khaṭīb*s in the al-Aḳṣā mosque. The Banū Ghānim, also living on the northern edge of the Ḥaram, mostly held the position of heads of the large al-Ṣāliḥiyya *khānaḳāh*. All these were Shāfiʿīs. The most important Ḥanafī family were the Dayrīs, natives of Palestine. They served as Ḥanafī judges in Jerusalem and in other cities of Palestine, as well as in Cairo, as teachers in the Ḥanafī al-Muʿaẓẓamiyya *madrasa*, and one of them became *nāẓir al-ḥaramayn*. The well-known modern al-Khālidī family (see §§ 13 and 14, below) derives its origin from them.

Besides the great families of divines, there were smaller ones, as well as unaffiliated scholars, local and foreign, who were appointed to teaching of juridical posts, or purchased them (or parts of them; positions were often held in partnership). Of the more distinguished scholars who passed considerable parts of their lives in Jerusalem, Ibn al-Hāʾim, an expert on arithmetic and the science of the division of inheritances (d. 412/1021), and Kamāl al-Dīn Ibn Abī Sharīf, a native of Jerusalem and great authority on Muslim law (822-905/1419-1500), both prolific authors, should be noted. Both died in Jerusalem and were buried in the Māmillāh cemetery (ʿĀrif al-ʿĀrif, *al-Mufaṣṣal fī taʾrīkh al-Ḳuds*, Jerusalem 1961, 506, 508).

Jerusalem, the city of the poor and the pious, was the proper domicile for Ṣūfīs. Mudjīr al-Dīn notes about twenty Ṣūfī convents representing most of the major orders and several less known ones. E. Ashtor, in his study on Jerusalem in the Mamlūk period (the most comprehensive one on the subject, see Bibliography) describes the ambivalent relations prevailing in Jerusalem, as elsewhere, between the two classes of Islamic divines, the scholars and the mystics. On the one hand, we read about members of a *zāwiya* studying at a *madrasa* or about prominent scholars adopting the Ṣūfī way of life. On the other hand, the ecstatic practices of some orders, especially the whirling dances accompanied by instrumental music (prohibited in principle by Islam) were sharply condemned. A collection of *fatwā*s in this spirit, written by an Ibn Djamāʿa and copied many years later by a Dayrī, has been described by Ashtor.

The Christians, hard pressed in this intensely Islamic atmosphere of Mamlūk Jerusalem, were strengthened by the establishment of a Franciscan monastery on Mount Zion in the 1330s. Mount Zion with its many religious associations, the "Tomb of David", the Cenaculum (scene of the Last Supper) and the Dormitio (the place where Mary, the mother of Jesus, fell into eternal sleep), was the scene of endless contests between Christians and Muslims and even Jews, involving the demolition, re-erection and renewed destruction of buildings down to the very end of the Mamlūk period, see section B. Other Christian buildings were also objects of attacks. The demolition and restoration in 879/1474 of the synagogue of the then small Jewish community is described in great detail by Mudjīr al-Dīn, 633-46, by Ibn Iyās, ii, 154-5, and in a book especially devoted to this matter by the Shāfiʿī *ḳāḍī* of Jerusalem Ibn ʿUbayya (analysed by Goitein, in *Zion*, xiii-xiv [1948-9], 18-32). Against orders from Cairo, Ibn ʿUbayya three times decided that the Jewish place of workship was to be closed; it was finally demolished by mobs led by a Ṣūfī *shaykh*. Upon this, the Sultan took stern measures. Ibn ʿUbayya and others involved were summoned to the capital, flogged and imprisoned; Ibn ʿUbayya lost his post and ended his days in Damascus, consoling himself with writing poems; the synagogue was restored. These happenings were typical for their time and place. Ibn ʿUbayya was certainly right in asserting that the synagogue was "new", that is, a building erected after the advent of Islam and used as a non-Muslim house of worship, which was against the provisions of Islamic law. But the government, naturally, had to pay attention to the exigencies of life and the preservation of public order.

The impressive number of Muslim schools founded in Jerusalem in the course of this period (ʿĀrif al-ʿĀrif, *Mufaṣṣal*, 236-57, describes fifty-six) should not be taken as an indication of economic prosperity. The endowments were mostly limited in size and dwindled rapidly. The governors and other officials who had often to buy their offices for considerable sums and frequently also served for only short terms, had to indemnify themselves by heavy impositions, first on the non-Muslims, but on Muslims as well. Jerusalem's only important industry (still flourishing in the 19th century), sc. the manufacture of soap made from the oil produced in the then rich olive groves of its environment, was heavily damaged by the pernicious economic policy of the Mamlūk government, which monopolised production and forced the population to buy quantities not needed by it for exorbitant prices. The constant insecurity inside and, in particular, outside the city added to the hardships of life. Early in the 16th century no one could make the *ḥadjdj* from Jerusalem for ten years because bedouin anarchy prevented travel between Jerusalem and the Red Sea (L. A. Mayer, *A sequel to Mujīr al-Dīn's chronicle*, in *JPOS*, xi [1931], 95-6, Ar. text 11-12). At that time, as travellers' reports show, there were still many unbuilt areas within the boundaries of the city. But the core of the Old City outside the Ḥaram, as it appears today, was the creation of the Mamlūk period.

13. *The first Ottoman period (922-1247/1516-1831)*. The exact date of the entry of the Turks into Jerusalem during the victorious campaign of Selīm I against the Mamlūks in 1516-17 is not known. His successor Sultan Sulaymān Ḳānūnī left most enduring imprints on the city: the wall, constructed between 944/1537 and 948/1541, as indicated in its eleven decorative inscriptions, the renovated Dome of the Rock and the four beautiful public fountains, *sabīl*, inside the city and the one near the Sultan's Pool, also created by him, at the foot of Mount Zion. The many *waḳf*s made by him and his wife Khurrem [*q.v.*] further contributed to the welfare of the city during his reign. The soup kitchen, *ʿimāret*, donated by her for the feeding of the poor and of students, naturally does not operate any more, but its caul-

drons, lists of recipients and other impressive remnants can still be seen in the Ḥaram Museum.

The Ottoman archives for the first time provide us with exact demographic, topographic and, to a certain extent, also economic data about Jerusalem. Bernard Lewis analyses the relevant material in *Studies in the Ottoman Archives*, in *BSOAS* xvi/3 (1954), 476, and *Yerushalayim*, ii/5, Jerusalem 1955, 117-27 (see *ibid.*, 117, n. 1, further publications of his on the subject, and also his *Notes and documents from the Turkish archives*, Jerusalem 1952). The population movement during Sulaymān's reign is illustrated on p. 122 by lists of taxpayers: (H = Heads of households; B = Bachelors; E = Exempt from the duty of paying taxes, such as religious dignitaries and insane persons):

	932/1525-6			940-45/1533-9			961/1553-4		
	H	B	E	H	B	E	H	B	E
Muslims	616	2	1	1168	75	34	1987	141	16
Christians	119	-	-	136	26	42	413	25	3
Jews	199	-	-	224	19	-	324	13	1
Totals	934	2	1	1528	120	76	2724	179	20

Thus at the beginning of the Ottoman period Jerusalem had a population of about 4,000 inhabitants, which tripled during Sulaymān's reign. (Lewis points out that the later lists might have been more complete than the first one). The slower increase of the Jewish population, which until the end of the thirties was more numerous than the Christians, was due to the fact that Ṣafad and not Jerusalem, was the main Jewish centre around the mid-century. By far the most important revenue collected in Jerusalem was the toll levied from the visitors of the Holy Sepulchre, which also tripled during this period (from 40,000 *aḳčas* in 1525 to 120,000 in 1553). It was given by the Sultan to the readers of the Ḳur'ān in the Aḳṣā mosque. The second largest item was the poll tax paid by Christians and Jews (one gold piece per person, the total being about one half of the income derived from the Holy Sepulchre). All taxes derived from economic activities, such as licenses (*iḥtisāb*), sales taxes and tolls on export of soap to Egypt, brought far smaller amounts.

Sulaymān's wall, though a lasting monument to his munificence, also revealed that the Ottoman government was not able, nor willing, to guarantee the safety of Jerusalem by administrative and military means. During almost the entire Turkish period, well into the second half of the 19th century, Jerusalem's development was impeded by this lack of security. The safety of the travellers between Ramla and Jerusalem, that is, the bulk of visitors from abroad, was entrusted already under Sulaymān to the Abu Ghosh, a rural clan after which the picturesque village Ḳaryat al-ʿAnab west of Jerusalem was renamed. Complaints that bedouins murdered Muslim inhabitants, burnt copies of the Ḳur'ān and taxed Muslim pilgrims on their way to Jerusalem are officially noted already in 991/1583 (U. Heyd, *Ottoman documents on Palestine 1552-1615*, Oxford 1960, no. 43). An imperial order of 1023/1614 exempts the fiefholders in the *sandjaḳ* of Jerusalem from participation in military expeditions outside the *sandjaḳ*, because this was "the border of ʿArabistān, where rebellious bedouins disturb the peace" (Heyd, *ibid.*, no. 28). By the end of the 18th century Giovanni Mariti, *Voyage*, Neuwied 1791, ii, 301-3, reports that the Pasha of Jerusalem accompanied the Christian pilgrims under heavy guard to the Jordan, but only after having paid the usual tribute to the bedouins. Shortly afterwards another traveller, W. G. Browne, *Travels in Africa, etc.*, London 1806, writes with regard to 1797 that the whole environment of Jerusalem was dominated by the bedouins (see Amnon Cohen, *Palestine in the 18th century*, Jerusalem 1973).

The root of this misery was the fact that Jerusalem was not so much administered by Istanbul as given as a source of income, albeit a very modest one, to the *wālī* of Damascus, or sometimes to that of Sidon, or, early in the period, to that of Egypt. The *wālī* was represented in the town by a *mutasallim*, but once a year he himself would appear, accompanied by a detachment of troops and collect taxes (described by ʿĀrif al-ʿĀrif, *Mufaṣṣal*, 309-10, for as late a date as 1808). By the 18th century the revenue from economic activities had dwindled to next to nothing (one list notes as income from the *iḥtisāb* only 500 *ḳurush*, one-twelfth of that of Sidon, Cohen, *ibid.*) and consisted mainly in taxes and tolls on Christians and Jews. A *firmān* by Selīm III (1205/1791) reducing the toll usually imposed on a Jewish pilgrim entering Jerusalem from between 3 and 4 to the legal 1½ *ḳurush* and freeing him from any payment while leaving the city, shows that arbitrary extortions were common in those matters (M. Maʿoz, *Palestine during the Ottoman period, documents from archives and collections in Israel*, Jerusalem 1970, 38).

An important source for the socio-economic history of Jerusalem under the Ottomans is contained in the *sidjills* of the *maḥkama sharʿiyya* of the city. ʿĀrif al-ʿĀrif, *Mufaṣṣal*, 241 ff., provides a number of specimens: a detailed list of prices by the *ḳāḍī* "in the presence of the two *muḥtasibs*" in 970/1563, the inventory of the estate of a Christian veterinary surgeon from the same year, and prices of building lots, houses, rents, salaries and *mahrs* through three centuries. Other matters, like three letters concerning the revolt of the *naḳīb al-ashrāf* in 1117/1705 and the demolition of his mansion, or notes about Jewish communal affairs, are also included. Only a systematic study of the entire material will provide historically valid results.

The governor of Jerusalem was a military man (a tentative list of Ottoman governors 1517-1917 in ʿĀrif al-ʿĀrif, *Mufaṣṣal*, 317-28). The governor, the holders of fiefs in the *sandjaḳ* and the garrison in the town were not normally recruited locally. The *ḳāḍī* was sent from Istanbul and invariably belonged to the Ḥanafī rite. This preponderance of a foreign ruling class with no roots in the city and often connected with it only for short periods naturally precluded healthy developments. But it had also its advantages. Since few Turks settled permanently in Jerusalem, its Arab character was preserved and germs of local autonomy developed. Popular risings, sometimes deteriorating into riots, occasionally chased a particularly oppressive (or weak) governor from the city. A more constant factor was the rise of families becoming powerful by the holding of well-paid religious offices, tax-farming, the administration of *waḳfs* and by acting as protectors of villages (in which capacity they also mostly succeeded in acquiring large holdings of land). The well-known families of the Khaṭīb, Khālidī (see sec. 12, above) ʿAlamī, Anṣārī, Dadjānī, Ḥusaynī, Nashāshībī, Nusayba and others, were formed or gained prominence in this period. The very considerable percentage of fair, blue-eyed, round-headed persons found in these families indicates that the local upper class, during the long centuries of Otto-

man domination, became thoroughly mixed with the many non-Arab elements passing through the city.

An interesting picture of folk life in Jerusalem is preserved in a pamphlet by Abu 'l-Fatḥ al-Dadjānī (d. 1660), entitled *Djawāhir al-ḳalā'id fī faḍl al-masādjid*. It shows the *ḥaram al-sharīf* as the scene of popular feasts and other mundane activities (see M. Perlmann, *A seventeenth century exhortation concerning al-Aqṣā*, in *Israel Oriental Studies*, iii [1973], 261-92, reproducing the Arabic original of the *Djawāhir*).

The 19th century opened for Jerusalem ominously. In 1808 a fire destroyed most of the western part of the Holy Sepulchre. Sultan Maḥmūd II granted the Greeks the right to restore the building, but the Janissaries in the town, who were angry that the citadel was garrisoned by other troops, incited the Muslim population to obstruct the repairs. A general revolt ensued. Finally, the *wālī* of Damascus, alerted by the beleaguered *mutasallim* of Jerusalem, sent a detachment of Maghribī horsemen on a clandestine route, which succeeded in penetrating into the city and to overpower the insurgents. Thirty-eight of the leaders were hanged (ʿĀrif al-ʿĀrif, *Mufaṣṣal*, 356-8, quoting Mikhā'īl Burayk al-Dimashḳī). At the time of the Greek revolt of 1821, the Christians of Jerusalem were charged of conniving with them and were in great danger. But thanks to the quick action of the *wālī* of Damascus and the firm attitude of the *ḳāḍī* of Jerusalem, no harm was done to the Christians. Another *wālī* of Damascus was the cause of a revolt of large dimensions and long duration. Townsmen and *fellāḥīn* alike refused to pay the heavy taxes imposed by him. He came to Jerusalem with a large army in 1825 and raised a fine of 100,000 *ḳurush* from the rebellious city. But hardly had he turned his back, when the population rose again; the *mutasallim*, who had been on a punitive expedition to Bethlehem, was unable to re-enter Jerusalem; the few soldiers who had remained in the citadel were easily overpowered, and the city and the countryside alike were in full revolt. Even when the Sultan sent a special detachment which laid siege on the city, the inhabitants would not budge. Only when the balls from the canons deployed on the Mount of Olives fell into the city and set some houses of notables on fire was the resistance broken (Neophytos of Cyprus, *Annals of Palestine*, 1821-1841, ed. S. N. Spyridon, Jerusalem 1938, 3-4). This time the revolt was terminated without bloodshed. But it showed that the spirit of resistance to tyranny, fully ablaze in Hellas, was not entirely absent from the Holy City.

III. Modern times

14. *1831-1917*. A time of radical changes. Before one half of this short period was over, Jerusalem had become preponderantly Christian and Jewish, while the Muslim population, too, had made visible progress. The unprecedented expansion of the Christians was caused by the increasing dependence of Ottoman Turkey on developments in Europe, with its rivalling states and churches, and by the upsurge of political, religious, humanitarian and scientific interest in the Holy Land manifest in many Christian countries. The steep increase in the number of Jews, who formed the majority of the population by the end of the seventies, was a corollary of the general improvement; they formed a modest community of devout and mostly poor people.

This development was put into motion by the conquest of Palestine by Ibrāhīm Pasha, the stepson of Muḥammad ʿAlī, in 1831. His actions, of particular significance for Jerusalem, were inspired by his endeavour to create a strong government and to win the friendship of the European powers. He started to disarm the civil population, to break the despotism of urban families and rural factions, to raise a standing army by enforced recruitment and also to enlist the co-operation of the local people by appointments to administrative posts and the formation of consultative bodies. The Christians (and Jews) of Jerusalem were freed from the many special contributions they had to pay to local notables, permitted to repair and erect religious buildings and to work in the government. All this hurt many vested interests and aroused the ire of the Muslim population in general. The *fellāḥīn*, supported by the leading urban families, rose in arms and drove the Egyptian garrison from the town (1834-5). But Ibrāhīm Pasha quelled the revolt and vigorously pursued his aims. The establishment of the British consulate in Jerusalem in 1838 was a sign of the time.

When European intervention forced Ibrāhīm Pasha to give up his conquests, the Sultan, who had just promised equality to all his subjects (1839), could not turn the clock back. The trend of western penetration was strengthened by the Crimean war, in which Turkey was saved by England and France from Russian aggression. France, Austria, Prussia, Russia, Sardinia, Spain and the United States opened consulates in Jerusalem. The flags of Christian powers were now raised in the Holy City on Sundays and Holidays, the birthdays of their sovereigns were honoured by 21-canon salvoes (an honour, formerly reserved in Jerusalem for Muslim holidays and the birthday of the Prophet), and bells began to chime from the churches. At first, the Muslims in Jerusalem tried to stop these innovations by force. But such attempts were quickly suppressed and soon the immense material and spiritual advantages derived by the local population from the foreign activities became evident. Naturally, the local Christians were the first to benefit; it was in this period that certain Christian families of Jerusalem became rich and influential.

The Latin patriarchate of Jerusalem, which had been abolished in 1291 as a result of the Crusades (being represented by merely titular patriarchs who lived in Rome), was revived in 1847 and became a powerful factor in the city. The Greek Patriarch moved from Istanbul to Jerusalem. An Anglican bishopric was established in 1841 (functioning for some decades in co-operation with Prussia). In the same year the Jewish community of Jerusalem received by imperial *firmān* a *ḥākhām bashī*, or chief rabbi, who was sent from Istanbul and had access to the central government. The gift by ʿAbd al-Medjīd of the Ṣalāḥiyya *madrasa* (see § 10, above), the ancient convent of St. Anne, to the French emperor Napoleon III in 1856 (resulting in its restitution to its original use) and the presentation of a part of the Mūristān area (see § 10, above) to Prussia, which used it for the erection of a Protestant church, palpably illustrate the new situation.

Slowly the central government was able to assert its authority over the unruly city and the anarchic countryside. At mid-century, the bedouins still plundered travellers under the very walls of Jerusalem and inside the town Christians and Jews were still exposed to arbitrary extortions by notables and officials. But administrative and military reforms, the interventions by the consulates and improved means of communications brought relief. By 1865 Jerusalem was connected with the outer

world by telegraph, and in 1868 the first road between Jerusalem and Jaffa usable by wheeled vehicles was completed. The railway followed only in 1892, and the French company building it had to insure its safety and that of its station-buildings (even that of Jerusalem) by arrangements with the heads of the villages adjacent to it. Postal services were provided by Austrian, French and other foreign agencies. There were many changes in the administration of the Jerusalem district (details in ʿAbd al-ʿAzīz ʿIwāḍ, *Mutaṣarrifiyyat al-Ḳuds awākhir al-ʿahd al-ʿUthmānī*, in *Palestine Affairs*, iv [Beirut 1971], 126-41). In a letter to the German consul, dated 2 January 1872, the Pasha of Jerusalem calls himself "gouverneur de la Palestine" (M. Maʿoz, *Palestine during the Ottoman period*, 25), but the Jerusalem administrative unit never comprised more than the southern part of the country. As from 1874 (as several times before) Jerusalem was an independent *mutaṣarrifliḳ* directly responsible to Istanbul and was headed by a rather ramified administration, having besides departments for general administration, finance, *ṭābū* (land register), *waḳf*, security, agriculture, commerce and education, one for foreign affairs, a speciality necessitated by the many consulates and foreign nationals in the town. In the consultative bodies, both of the district and the city, Christians and Jews were represented, albeit less than warranted by their numbers.

The area of Jerusalem, its physical appearance and the size and composition of its population totally changed during this period. Cathedrals and churches, some new mosques, synagogues and yeshivas (rabbinical colleges), palaces of patriarchs, convents, hospices, schools (first schools for girls, Jewish 1864; Arab, a German foundation, 1868), scientific institutions, hospitals, clinics, orphanages and other charitable foundations were erected in and outside the Old City, see section B. As from 1860, the inhabitants of the Old City began to establish new quarters outside, with the Jews, who were particularly closely crammed, taking the lead. For a further twenty years, the gates remained closed during the nights, which was not conducive to the security of the suburbs. The Muslims preferred to settle in the south (Abū Tōr) and in particular north of the city, in Wādī Djōz and the hills west of it; the Greek Orthodox centred mostly in the vicinity of St. Simon, the summer residence of their patriarch (the Katamon quarter), and the Jews founded about sixty suburbs mostly in the west. The "German colony" of the Templars in the south-west, and the "American colony" in the north, largely inhabited by Swedes, were renowned as particularly roomy. Selma Lagerlöf's famous novel *Jerusalem* (1901-2) depicts, besides the religious and personal plights of Swedish pilgrims, also local representatives of Islamic mysticism, inspired probably by the *imām* of the Shaykh Djarrāh mosque near the American colony, who was a leading Ṣūfī.

The events of the Young Turkish revolution of 1908, the disappointment following it and of World War I, with its terrible sufferings by an oppressive military dictatorship, famine and epidemics and the subsequent shrinking of the population—all these belong to the general history of the country. An often-reproduced photograph shows the British general Allenby entering the Holy City on 11 December 1917 on foot, displaying Christian humility.

15. *After 1917*. The military government of the British occupation army was replaced by civil administration on 1 July 1920. Jerusalem, as the seat of the Mandatory government, of the executives of the Jewish world organisations for Palestine, of the national council of the Jews of Palestine, of the Muslim Supreme Council (created in 1921), the various Christian church authorities and other local and foreign bodies, recovered, albeit slowly, from the effects of World War I. According to the census of 1931, the population comprised 90,503 souls, of whom 51,222 were Jews, 19,894 Muslims, 19,335 Christians and 52 others. It increased to about 150,000 at the beginning of World War II.

During the Mandatory period, important public buildings were erected, such as Government House (later the headquarters of the U.N. Truce Supervision Organisation), the Hebrew University campus and the Hadassah Hospital compound on Mount Scopus, the Pontifical Biblical Institute and the Rockefeller Archaeological Museum, the YMCA and several new churches, and a great number of schools. New suburbs were founded, some of which quickly developed into populous centres.

The composition of the municipal corporation council experienced many changes, but always a Muslim mayor was appointed, although the vast majority of the population, and especially of the taxpayers, was Jewish. When, after the death of a Muslim mayor in 1944, the Jewish acting mayor demanded to be appointed officially, the council was dissolved and replaced by a commission composed exclusively of British officials.

The Pro-Jerusalem Society, whose committee comprised leading religious dignitaries, prominent scholars and other outstanding Jerusalem personalities, was indicative of the hopes for co-operation prevailing in the years immediately following the arrival of the British; its subsequent dissolution manifested the change of hearts and conditions. An interconfessional meeting place of longer duration was the Palestine Oriental Society, which had its seat in Jerusalem and in which local, British, American, French and other scholars joined efforts. The newly founded Hebrew University (opened 1925), the British, French, American and Pontifical institutes for archaeological and biblical studies and the ever-increasing number of writers (e.g. S. Y. Agnon, Nobel Prize winner) and artists of all descriptions created a lively intellectual atmosphere. The Government Arab College, led by the jovial savant Aḥmad Sāmiḥ al-Khālidī, laid the foundations for the rise of a new generation of Arab intellectuals in the country. Younger writers connected with the Government Department of Education, such as Isḥāḳ Mūsā al-Ḥusaynī and A. L. Ṭībāwī, published the first fruits of their pens. Jerusalem authors, such as Isʿāf al-Nashāshībī, Khalīl al-Sakākīnī and Khalīl Baydas, enjoyed good standing in the world of Arabic letters. Alongside with all these developments much of the traditional life of the various communities and their subsections continued almost unchanged.

The clash of the national aspirations of Arabs and Jews affected the destinies of Jerusalem more than that of any other city in Palestine. The first bloody events occurred in Jerusalem in April 1920 with several Jews and Arabs killed and many wounded. Al-Ḥādjdj Amīn al-Ḥusaynī, who had been condemned to death by a military court as main instigator of the disturbances and exempted from the amnesty granted by the new High Commissioner Sir Herbert Samuel when he took office, was appointed by him soon afterwards as *muftī* of Jerusalem and then elected head of the Supreme Muslim Council

created by the government (1921). For the next seventeen years al-Ḥād̲j̲d̲j̲ Amīn strove for unrestricted leadership of the Palestine Arabs, which brought him into conflict with other leaders, especially the mayor of Jerusalem, Rāg̲h̲ib al-Nas̲h̲ās̲h̲ībī and the *amīr* (since 1946 king) ʿAbd Allāh of Transjordan. The Western Wall - Burāḳ [*q.v.*] affair, which led to the shocking events of August 1929 (when, however, Jerusalem suffered less than Ṣafad and Hebron) greatly enhanced al-Ḥād̲j̲d̲j̲ Amīn's prestige, and so did his collections in India and elsewhere for repairs on the Ḥaram and the organisation of the Muslim Conference convened in Jerusalem in 1931. The burial in the same year of the Indian leader Muḥammad ʿAlī in the western portico of the Ḥaram was another significant step in arousing the interest of the Muslim world.

The mass immigration of Jewish refugees in 1933 and after led to a general uprising of the Arab population and ferocious fighting. Internecine warfare between the followers of al-Ḥād̲j̲d̲j̲ Amīn and his adversaries acerbated the situation. Among the many victims were the British archaeologist J. L. Starkey, famous as discoverer of the Lachish ostraca, and two fine Arabists, Levi Billig of the Hebrew University and Avinoam Yellin of the Government Department of Education, known to many students of Arabic as authors of a useful classical Arabic reader.

The Peel Royal Commission, sent out in 1936 to investigate the situation, for the first time recommended the creation of an Arab and a Jewish state and the conversion of Jerusalem, together with Bethlehem, into a separate unit remaining under British mandate. But neither this nor any other of the subsequent attempts of the mandatory government to find a solution led to results. On 29 November 1947, the General Assembly of the United Nations adopted Resolution 189 (II) calling for the division of Palestine into two states, but united by economic union. Jerusalem was to be "internationalised".

Immediately after this decision the country was in flames. Jerusalem in particular suffered great losses in lives and property even before 15 May 1948, the official end of the British mandate. An Egyptian detachment took position in the Bethlehem area, while the Transjordanian Arab Legion attacked the Jewish quarter in the Old City. It was left by its Jewish population on 27 May and subsequently demolished, including its old Sefaradi synagogues and the two large Ashkenazi synagogues, the Ḥurva (dedicated 1865) and Nisan Bak (1872), whose cupolas had been landmarks of Jerusalem.

The ceasefire divided Jerusalem by a line slightly west of the western wall of the Old City. This left a number of predominantly non-Jewish quarters within the Israeli sector, while Mount Scopus with its University and Hadassah Hospital compounds formed an Israeli enclave, which soon became useless, since the free access to it, envisaged in the armistice agreement with Transjordan of 3 April 1949, was never granted. East Jerusalem was cut off from its electricity and water supply and from its direct routes to the West and the South. Both parties had to work hard before a semblance of normality was restored.

On 13 December 1948 the Transjordanian parliament resolved the annexation of the areas of Palestine occupied by the Arab Legion. Israel followed suit by transferring its parliament from Tel Aviv to Jerusalem in February 1949 and proclaiming Jerusalem its capital on 13 December 1949. Both actions were in contradiction of the U.N. resolution of November 1947, which had foreseen Jerusalem as a *corpus separatum*. The matter came up repeatedly in the U.N. until 1952, when it was left dormant, until the war of 1967 created an entirely new situation.

The history of the Israeli sector of Jerusalem during the years 1948-1967 lies outside the scope of this article. Suffice it to say that during this period it received most of the administrative and cultural edifices a modern society needs. The eastern sector had lost its status as part of a capital, but still was the main city of the West Bank and developed also as a centre of tourism. It expanded greatly towards the north, engulfing S̲h̲aʿfāṭ and other villages. Important public buildings, founded by both local and foreign authorities, were erected and stately new hotels were built to cope with the developing tourist trade. ʿĀrif al-ʿĀrif, a former senior official of the Mandatory regime and meritorious author of books on Jerusalem and on the Beersheba district and its tribes, became mayor of Jerusalem. The last Jordanian mayor was Rūḥī al-K̲h̲aṭīb (Rouhi el Khatib) of a Hebron family, thus personifying the considerable influx of Hebronites into Jerusalem during its Jordanian period. The ups and downs of inner-Arab politics with regard to the legal status of Jerusalem and Jordan's rights on it belong to history. Jordan's rule left a permanent imprint by the restoration work carried out in the *ḥaram al-s̲h̲arīf*, in particular, the golden dome and the ceramic inscriptions on the Dome of the Rock. The murder of King ʿAbd Allāh while proceeding from the Aḳṣā mosque on 21 July 1951 did not have the far-reaching consequences expected by his assassins. Fires broke out during this period both in the Holy Sepulchre and the Aḳṣā mosque, but did not give rise to any demonstrations or diplomatic moves. The visit of Pope Paul VI in January 1964 to both sectors of Jerusalem showed his deep concern for the Holy City.

The war of 1967, which lasted in Jerusalem only three days (Monday-Wednesday 5-7 June) caused loss of precious lives, but comparatively little damage. The Jordanians had occupied the U.N. headquarters and tried to encircle the new city from the south, but this attempt failed. The main fighting was in the north. After having taken the positions on the north-eastern hills, the Israeli forces entered the Old City from the St. Stephen's (Lions) Gate, *Bāb al-Asbāṭ*, finding but little resistance. The barriers between the two sectors of the city were removed, the eastern sector was immediately connected with the Israeli water system and received other municipal services and on 28 June 1967 the inhabitants of the two sectors were permitted to move freely throughout the town.

Naturally, this sudden turn of events at first had a stunning effect on the population of East Jerusalem. There were also great socio-economic difficulties. The middle class, especially the circles connected with the Jordanian administration and courts, was particularly affected. But the enormous expansion of the city in the subsequent years, which provided work and income for almost everyone, greatly alleviated the economic situation and brought about many contacts between the two parts of Jerusalem. But this did by no means solve the political problem. Strikes and acts of terror were not uncommon, but under the leadership of Teddy Kollek, mayor of the united city, the policy devised and implemented was one of non-intervention in the daily life and communal institutions of the Muslim population. The

most conspicuous expression of this policy was to be found in the exclusive control which the Muslim religious institutions retained on the mosques of the Temple Mount and in the continued independent activities of the Muslim *Waḳf* and religious courts.

The declarations and actions of the Israeli authorities aiming at the "reunification" of Jerusalem were immediately followed by resolutions of the General Assembly and the Security Council of the U.N. calling for a return to the *status quo* prior to the war, as well as by protests on the side of Muslim bodies all over the world. The creation of a huge square in front of the Western Wall and of secure approaches to the inner city involved the demolition of a considerable number of Arab dwellings. Although such measures had been envisaged already in Ottoman times and although the inhabitants were indemnified, these were, of course, grave actions. Relevant complaints were submitted by Jordan to U.N., as from June 1967 but were described by Israel as grossly exaggerated. The fire damage caused to the Aḳṣā mosque on 21 August 1969 by a deranged Christian tourist from Australia made great stirrings in the Muslim world and it took some time until the truth penetrated.

About a year after the fire, the Muslim Council began repairing the damage caused by the fire. The repairs took several years and are practically completed. During the process of the work many parts of the mosque were built anew, including areas which were not damaged during the fire. With the funds of the Muslim *Waḳf* several ancient drinking fountains and the market of the cotton merchants were restored, existing mosques were repaired, and two new mosques were built.

Besides the monuments described in part B. and the vibrant folklife in the Old City, Jerusalem offers much of interest to the Islamist. The Palestine ("Rockefeller") Museum contains unique exhibits from Khirbat al-Mafdjar [*q.v.*] and other treasures of Islamic art and archaeology. The Khālidiyya library in the Old City possesses valuable manuscripts, including some not listed in the *Barnāmadj al-maktaba al-Khālidiyya*, Jerusalem 1318, and so does the library of the Hebrew University. The Oriental reading room of the University library is an exceptionally good working library for Islamic studies. The Institute of Asian and African Studies of the Hebrew University harbours, among other collections, a Concordance of Pre-Islamic and Early Islamic Poetry, comprising at present over a million-and-half index cards, while the newly created L. A. Mayer Memorial Institute of Islamic Art (officially opened on 9 October 1974) can boast of exquisite examples of Islamic art and workmanship.

(S. D. GOITEIN)

B. MONUMENTS

The Islamic monuments of Jerusalem reflect at the same time the unique character of the Holy City itself with its complex memories translated into major works of architecture or into mystical and liturgical associations and the pecularities of the Muslim rule of the city as it has been outlined in the historical section A of this article. With the Dome of the Rock, Jerusalem possesses the first consciously-created masterpiece of Islamic art, while the city remains unique among almost all Muslim cities in the manner in which its Muslim monuments are almost entirely concentrated in one part of the city, on or near the Ḥaram al-Sharīf [*q.v.*]. The first feature reflects the singular position of Jerusalem in early Umayyad times, while the second one is a direct result of the city's unique character. Any understanding of Jerusalem's monumental history requires, therefore, both an awareness of the city's archaeology, i.e. of its own peculiar relationship between a complicated topography and remains from former civilisations, and a knowledge of the types of official, religious, emotional, and financial investments which Muslim culture put into it at various times. As has been shown in the historical part, the latter changed considerably over the centuries and the changes affected the growth and the meaning of monuments in a way which is totally unique in Islamic history. While the presentation which follows is primarily historical, it should be borne in mind that eventually a similar survey could and should be made quarter by quarter, or else from the point of view of the type of political or pietistic associations which have surrounded the Muslim monuments of Jerusalem.

There is no complete study of Jerusalem's Islamic monuments as a whole. The most thorough investigation is that of Max van Berchem, which utilises simultaneously inscriptions, architectural remains, and written sources, especially the invaluable guidebook of Mud͟jīr al-Dīn. Since his time a number of monographs have modified our understanding of the two main buildings on the Ḥaram (we will use the term for convenience's sake, even though it did not become common until the Ottomans, see AL-ḤARAM AL-S͟HARĪF), the Dome of the Rock and the Aḳṣā mosque, while recent and still unfinished excavations to the south and southwest of the Ḥaram have introduced a large number of new elements in any understanding of the city in early Islamic times. A survey of Jerusalem's Ayyūbid and Mamlūk remains has only recently been initiated and very little has been published so far. The bibliography which follows this essay gives an idea of the considerable amount of information we possess about Jerusalem, but this very abundance identifies the main problem faced by the investigator of the city's monuments, which is to determine what in them is typical of Islamic culture as a whole and what is unique to a unique city. We shall return to this question at the end of our survey. In the meantime, it has seemed preferable to describe the city's growth chronologically and to identify in it four major periods of development: (1) early Islamic up to the middle of the 4th/10th century; (2) from the middle of the 4th/10th century to the Crusades (492/1099); (3) Ayyūbid and Mamlūk periods, from the time of the reconquest at the end of the 6th/12th century to *ca.* 1500; (4) Ottoman period. No mention is made of the city's development after its awakening to the modern world in the 19th century, for by then we are no longer dealing with an Islamic city in the traditional sense but with a modern town searching for ways to accommodate its own unique spiritual and emotional values with the pressures of contemporary life. Much thought has been given to these problems in Jerusalem since the first reports sponsored by British mandatory authorities and by various ecclesiastical groups. Their investigation and discussion belongs, however, to modern urbanism rather than to the understanding of a Muslim city.

1. *Early Islamic, until the middle of the 4th/10th century.*

All later developments in the monumental history of Jerusalem were affected by the manner of the

city's conquest and by the circumstances surrounding its first Muslim settlements. However uncertainly known the actual events of the conquest may have been, one key archaeological point is clear: the huge Herodian setting for the Jewish Temple on the eastern side of the city was standing in ruins; many courses of its magnificent masonry, most of its gates, possible fragments of its towers could still be recognised, and its surface as well as the surrounding areas were littered with easily-accessible stones from its constructions. For scriptural reasons, the Christians had left the Herodian space unused except for a small and comparatively late memorial church to St. James in the south-western corner. South of the Temple area there were Christian hostels and monasteries, but apparently no major living areas, for the Christian city was concentrated in the western side of the town, around the hills of Zion and Golgotha, with the Holy Sepulchre and its attendant constructions as focal points. Whether or not there was a Byzantine wall enclosing the whole of Zion hill and the spur of Mount Moriah which overlooks Siloam from the north (the so-called wall of Eudocia) is still a moot question, but seems likely.

Almost as soon as the formal take-over had been completed, the Muslims appropriated for themselves the Herodian Temple area for their own administrative and religious purposes. The reasons for this act were many. It was a large empty space in a city in which by treaty the conquerors were not allowed to expropriate Christian buildings; the early Muslims were under the influence of Jewish converts with presumed knowledge of the area's holy significance; the Muslims may have wanted to show their opposition to the Christian belief that the area must stay empty; and, finally, the Muslims themselves may have had a spiritual attachment to Jerusalem before conquering it, though the possibility is difficult to demonstrate. But regardless of the reasons, the key point is that a huge space became available to the new culture in a striking location overlooking most of the city. It can furthermore be deduced from a variety of later developments that the earliest settlements by Muslims took place in the sparsely populated area south and south-west of the Temple.

There began then a monumental and ideological Islamisation of an ancient site, for which we possess a rather remarkable series of documents, even though all of its concrete modalities are still far from being clear. What occurred in effect is that the Muslims provided new and highly individual meanings to an existing space with different meanings. The following chronological scheme can be provided for this unusual development, although, as will be seen, much in it is still hypothetical.

First a small "rudely built . . . quadrangular place of prayer" (as described by the western pilgrim Arculfus *ca.* 680) was erected. It was mostly in wood and set somewhere in the midst of the Herodian ruins. Nothing is known of its internal arrangements, but it was probably a typically early Islamic hypostyle mosque. Its exact location is also unknown, although it is likely but by no means certain that it was not far from the place of the present Aḳṣā mosque. This building probably remained until the first decade of the 8th century, but, as will be seen below, there is a possibility that already under ʿAbd al-Malik a new building was begun. There is no textual or archaeological information as to whether any of the newly found buildings south and south-west of the Ḥaram belong to this very first period, but the possibility cannot be excluded.

The second step in the development of the Herodian site coincided with the rule of ʿAbd al-Malik. Its most remarkable monument is the Dome of the Rock completed in 71/691. Often described and often studied, it consists of two octagonal ambulatories around a dome-covered cylinder, 30.30 m. high and 20.30 m. in diameter. The dome is set over a huge rocky outcrop with an underground chamber. The building is provided with four axial gates preceded by often redone porches. The building is a remarkably thought-out composition whose every detail in plan and in evaluation has been most accurately measured so as to create the most impressive effect. Its conception, and almost every architectural detail in its interior arrangement (piers, columns, capitals, arches, etc.), belong to the architectural repertory of Byzantine art and more specifically to the *martyrium* tradition of Jerusalem buildings like the Holy Sepulchre or the church of the Ascension. It is from the same tradition that derives its internal decoration of marble panelling and especially of mosaics covering almost all wall surfaces above the capitals and cornices of piers and columns. There is both literary and archaeological evidence that the early building was also covered with mosaics on the outside. The subject matter of these mosaics is also derived from earlier artistic traditions, mostly Mediterranean, but also with a few themes of Iranian origin. These mosaics are often considered as typical examples of a pre-Islamic way of decorating the interior of major buildings. This is true to the extent that a rich variety of vegetal and occasionally geometric motifs, superbly adapted to the shapes provided by the architecture, have any number of models in earlier buildings, even though rarely preserved in such spectacular fashion. But there is quite a bit of originality in these mosaics as well. In subject matter two points are of importance. One is the presence of an imperial jewelry of Byzantine and Iranian origin on all wall faces directed toward the centre of the building. The other one is the absence of any representation of living beings several decades before we become aware of a partial Muslim prohibition of images. A long inscription, however, comprising primarily Ḳurʾānic quotations, has been shown to fulfill an iconographic purpose by its choice of passages, as will be discussed below. Stylistically, the mosaics are perhaps less unique, although their effect as a sort of sheath over the architecture rather than as a series of independent panels emphasising each part of the building may be understood as prefiguring the later use in Islamic art of decoration overwhelming the architectonic values of a monument.

The Dome of the Rock, as it appears today, is not entirely in its original shape. Beyond numerous repairs and restorations carried out over the centuries on basically original elements (particularly under the Fāṭimids and after the Crusades), there are two areas where later changes have completely obliterated earlier features. Inside, all the ceilings, including the dome, appear in Mamlūk or Ottoman garb and the whole exterior has been redone with superb coloured tiles in the 10th/16th and 11th/17th centuries. In the 1950s and 1960s the building was virtually taken apart by a team of Egyptian architects and engineers supported with contributions from the whole Muslim world and then put back together and restored in a particularly successful manner. Every part of the building was put back in the manner which reflects the earliest information we possess about it.

The most frequently-raised question about the

Dome of the Rock is that of its original purpose. Three explanations are available. One is that it is a building commemorating the Prophet's Night Journey and Ascension (*isrāʾ* and *miʿrād̲j̲*); the second one is that it sought to replace the Meccan Kaʿba for Muslim pilgrimage; the third one is that it was a monument celebrating the new faith's presence in the city of Judaism and Christianity and its belonging to the same monotheistic tradition. Too many arguments (see above, section A and articles by Goitein and Grabar) exist against the second explanation to maintain its possibility. The first one has the advantage of corresponding to the eventual association which was and still is made by Muslim piety, but there is much doubt about the likelihood of its existence at the time of ʿAbd al-Malik. The third explanation agrees with the political and psychological circumstances of the times and with the internal evidence of the decoration (with its royal symbols strung like trophies around the centre of the building) and especially of the inscriptions (which contain the whole Christology of the Ḳurʾān). For the history of art, the Dome of the Rock would then appear as an extraordinary monument which succeeded in providing new meanings to traditional forms.

But the construction of the Dome of the Rock raises a number of additional problems which pertain to the archaeological history of the city of Jerusalem. It is on an artificial platform situated excentrically to any other part of the former Temple area. The platform was reached through a series of stairs, some of which must have been there at the time of ʿAbd al-Malik. Since we know otherwise that at the time of the Muslim conquest the Temple area was in ruins, we must conclude that by 71/691 a considerable amount of work had already been accomplished on the walls and pavements of the area as well as on its gates. The nature and extent of this work cannot be determined but, if it is true, as H. Stern believes (*contra* Creswell and Hamilton) that the earliest Aḳṣā mosque may have been begun at the time of ʿAbd al-Malik, then we must also assume that much of the south walls of the Ḥaram and the Double and Triple gates had been rebuilt, for, as Corbett and Monneret de Villard have suggested, their plans and location may be Herodian but their construction and completion are early Islamic.

Be this as it may, the third step in the transformation of the Temple area by the Muslims can be dated to the time of al-Walīd (86-96/705-15). It is to him that we owe the first clearly documented Aḳṣā mosque (see, however, the controversies between Stern, Hamilton and Creswell). It was a building consisting of an uncertain number of naves perpendicular to the *ḳibla* wall with a central nave provided with a dome (following here Stern *contra* Creswell). The plan was an unusual one for its time, and should probably be explained by the fact that the substructures of the Ḥaram platform which had to be restored by this time consisted of north-south arcades serving as supports for the building above. The Aḳṣā mosque was decorated with mosaics and with marble and was also provided with remarkable carved and painted woodwork, now kept in the Palestine Archaeological Museum and in the Aḳṣā Museum. One last point should be made about the Aḳṣā mosque. Although its internal organisation was but a modification of the hypostyle tradition prevalent at the time, it was quite consciously located on the same axis as the earlier Dome of the Rock and thus was part of an architecturally thought-out ensemble comprising a congregational and a commemorative building, just as in the complex of the Holy Sepulchre in the western part of Jerusalem. Although their exact chronology is still difficult to establish with any sort of precision, we may also assume that the group of large buildings with courts and with long rooms recently excavated to the south and to the south-west of the Ḥaram had been completed by the time of al-Walīd. Whether they were the palaces and administrative buildings (*dār al-imāra*) mentioned in papyri, whether they were commercial establishments or more simply the residence of whatever Arab families and clans moved into the city in early Islamic times, they form a striking monumental ensemble of large constructions along streets and stairs (partly Herodian) leading up to the Double Gate, at the time the main entrance into the Ḥaram al-Sharīf, or, as we probably must call it, the *masd̲j̲id bayt al-maḳdis*, the mosque of Jerusalem. It is at this time that we begin to have the first indications of specifically Muslim associations with the Ḥaram, whether strictly new ones pertaining to the life of the Prophet or Muslim versions of the lives of earlier prophets. These developments are, however, very difficult to date properly. What can be ascertained is that by the middle Umayyad period a uniquely original architectural composition had been created: two major buildings on a partly refurbished enormous space inherited from earlier times which, unlike the Roman temple in Damascus, was too large to be transformed into a single building for new Muslim functions, but which therefore ended up by acquiring particularly original ones.

The following two centuries are the least documented in the monumental history of Jerusalem. Yet their importance is considerable, not so much by their contribution to the architecture of the city (consisting mostly of repairs and restorations, including major reconstructions of the Aḳṣā mosque under al-Manṣūr and al-Mahdī) as by the indications they provide of the continuing concern of the Muslim community at large for its sanctuary in Jerusalem. Part of this concern is purely practical; walls are built up or repaired after earthquakes; the area of the Ḥaram is officially measured and apparently surveyed, as appears from inscriptions which are our main source for this aspect of Muslim activities on the Ḥaram. Each gate was provided with a wooden porch ordered by the mother of al-Muḳtadir, who also paid for the repairs of the Dome of the Rock's cupola. A portico was built on the western and northern sides of the Ḥaram, thus providing a formal frame to the sanctuary; some of the minarets may be of that time.

But another concern is far more interesting. It consists in the growth of pious associations. The latter were certainly translated into buildings, although none of the latter are known to have survived and our information is entirely through the testimony of geographers like Ibn al-Faḳīh or al-Muḳaddasī or through littérateurs like Ibn ʿAbd Rabbih. Three themes appear in these associations which will remain constantly in the religious and architectural history of the Ḥaram: the Night Journey of the Prophet commemorated through a score of *maḳāms* and of *ḳubbas*, ancient prophets commemorated either through gates or through *miḥrābs*, and eschatology commemorated by the new interpretations given to the strange *Ḳubba al-Silsila* (Dome of the Chain, probably the Treasury of Umayyad times, see van Berchem) as the place of Judgement, by a *ḳubba* of

the Trumpet, or by the appearance of a new name to the Golden Gate, the Gate of Mercy. The theme of eschatology should probably be related to the development of the Muslim cemetery to the east of the Ḥaram into something more than just a local cemetery, for even the rulers of Ikhshīdid Egypt wanted to be buried there. But it is also true that funerary cults grew at that time in many parts of the Muslim world, although Jerusalem, as the town of the Prophets and of Resurrection, played a unique part in this growth.

Altogether, then, if one takes the time of al-Muḳaddasī (*ca.* 385/985) as the terminal point of the first period in the monumental history of Jerusalem, one can clearly see that its most remarkable achievement was the transformation of Herod's ruined Temple into a unique Muslim sanctuary, by then already accepted as the third most important sanctuary of the faith. Dominated by the Dome of the Rock, high above the whole city, comprising a large mosque with a cupola, full of new commemorative buildings of varying sizes, partly surrounded by a portico, with almost all of its gates underground leading to the Muslim quarters to the south and possibly also to the west, the Ḥaram must have been a very impressive sight, a fitting tribute to the Umayyad princes who initiated the transformation of an empty space full of memories into a Muslim holy place. But beyond such conclusions as can be drawn from the buildings of Jerusalem in early Islamic times for religious and cultural history, they also lead to a number of important conclusions for the historian of art. For, on the one hand, they illustrate the ways in which pre-Islamic themes have been transformed into Islamic ones and, on the other, they are our best examples of what may be called an imperial Islamic style initiated by the Umayyad dynasty.

Little is known about Islamic constructions outside the Ḥaram area. From an inscription analysed by van Berchem and from a passage in the Christian chronicler Eutychius (*Matériaux, Ville*, no. 24), it appears that in the early 4th/10th century a mosque was built within the compound of the Holy Sepulchre in contradiction to the early treaties between Muslims and Christians. Nothing is known of its shape.

2. *From ca. 338/950 to the Crusaders.*

In many ways, the second period is nothing but a continuation of the first one. Repairs and restorations are recorded in texts and in inscriptions as buildings deteriorated or as they were damaged by man or by nature. But two phenomena identified primarily with the Fāṭimid dynasty appear to indicate more significant changes.

The first of these affected the whole city of Jerusalem. It is that under the caliph al-Ẓāhir, probably around 421-4/1030-3, the walls of the city were rebuilt and, more importantly, shortened on the south side of the city to approximately their present position. What this meant is that the traditional Muslim quarter to the south of the Ḥaram was abandoned and that the underground gates found there were blocked. The main entrances into the sanctuary were shifted to the west and possibly to the north. This involved certain changes in the names of gates (cf. Ḥaram), but it also involved a major building-up of the western gate, the present Bāb al-Silsila, and Nāṣir-i Khusraw, who was there in 438/1047, describes the brilliance of its mosaics, apparently similar to those of the Aḳṣā mosque which are Fāṭimid (cf. below). It is also from the Persian traveller that we can infer that the commercial centre of the city had by then shifted to the area west of the sanctuaries, probably to where it is now.

The second phenomenon is the rebuilding of the Aḳṣā mosque also under al-Ẓāhir. Probably as a reflection of a depopulation in the city, the mosque diminished in size to approximately its present dimensions, but the most remarkable feature of the Fāṭimid mosque consists in its mosaic decoration, studied by Henri Stern who showed, among other things, that the Fāṭimids used Umayyad models in their decoration. If one considers that a number of additional buildings were built on the Ḥaram—for instance a mosque near the Golden Gate—and that the imperial mosaic inscription on the triumphal arch of the Aḳṣā is the first one in Jerusalem to begin with Ḳurʾān, xvii, 1, the *isrāʾ* verse, one may propose the hypothesis that there had been a formal attempt by the dynasty to build up the holiness of Jerusalem's sanctuaries. This development, which was cut short in the second half of the 5th/11th century by political difficulties, must probably be connected with other Fāṭimid activities in Palestine, as exemplified for instance in the celebrated *minbar* now in Hebron (G. Wiet, *Notes d'épigraphie arabe*, in *Syria*, v [1924], 217 ff.) and even with the earlier destruction of the Holy Sepulchre under al-Ḥākim. All these matters still require fuller investigation. What is important at this stage is that, even though the city had diminished in size, the Fāṭimids, probably for religious and political reasons of their own, sought to increase both the splendour and the meaning of the main sanctuaries of Jerusalem.

It should also be pointed out that it is under the Fāṭimids that we have our first evidence for the use of the citadel on the western side of the city. The evidence is primarily archaeological.

3. *The Ayyūbids and Mamlūks.*

As is well known, the Crusaders took over the Ḥaram area and transformed it into a palace and eventually into the military and religious centre of the Knights Templar. Since the earlier underground gates had been blocked, the Crusaders made a new gate, the so-called Single Gate leading directly into the Stables of Solomon in the north-eastern part of the sanctuary. In addition, the Crusaders modified the Holy Sepulchre and built many new churches, some of which, like the Church of St. Anne, still survive, even though in a slightly romanticised 19th century garb. Much in the city's topography during the time of the Latin Kingdom is not clear, but it does seem that they initiated many buildings in the valley immediately east of the Ḥaram and thus began the process of partial levelling of the Ḥaram's platform with its western surroundings which has continued from that moment onwards. Finally, it should be noted that the Crusaders were very active builders and, even though much of their work was destroyed, it provided an enormous supply of already-carved stones with the result that, in addition to remaining completed units such as the transept of the Aḳṣā mosque, a large number of subsequent Muslim buildings, especially in the area of the Bāb al-Silsila or in adjoining streets, contain decorative units taken from Latin constructions.

It is possible to discuss as one entity the monuments built in Jerusalem between 1200 and 1500 for two main reasons. One is that the nearly ninety original monuments which remain (not to speak of those mentioned in Mudjīr al-Dīn's chronicle) have

not been studied with as much attention as the earlier ones, and stylistic or functional differentiations which doubtlessly occurred cannot therefore be identified as precisely. The second reason is that, partly because of their number and partly because they are functionally and even stylistically relatable to monuments found in Cairo, Damascus, or Aleppo, these monuments lend themselves more readily than the earlier ones to typological rather than to chronological definition.

One kind of architectural activity which followed the Crusades does, however, escape this general rule. It consisted in the task of re-Islamising the city. Churches were destroyed or transformed into mosques and the two main sanctuaries on the Ḥaram were systematically cleansed of as many traces of Christian occupation as possible. This activity was particularly notable in the Aḳṣā mosque, where Saladin put up a new *miḥrāb* with a rare mosaic decoration and to which he transported Nūr al-Dīn's celebrated *minbar* made especially for Jerusalem and which was tragically destroyed in 1969 (cf. the historical section, § 15, above). In addition, Saladin and his immediate followers sought to repair, rebuild, and resanctify all the holy places which had existed on the Ḥaram. As van Berchem showed on several occasions, this task was carried out in some confusion and led to any number of misunderstandings. On the whole, however, it seems that the old sanctuary was returned quite rapidly to its former shape but not necessarily splendour, for, as will be shown presently, a totally new taste affected its western and northern sides.

One can put into the same category of refurbishing the city of Jerusalem the rebuilding of its walls. Inscriptions, texts, and masonries are for the time being quite confusing for the establishment of a coherent chronology of the fortifications from the 7th/13th century until the Ottomans. It is not even certain whether the present walls coincide with those rebuilt under the Ayyūbids, although what differences may have existed were probably minimal. The citadel on the western side of the city, whose use by the Muslims before the Crusades is still uncertainly documented either archaeologically or through literary sources, was entirely redone and remained in use as a typical late mediaeval *ḳalʿa* until very recent times.

Within a walled city with its restored ancient sanctuary and with a diminished Christian population, an enormous building activity took place over three centuries. Its first characteristic is that it was almost entirely concentrated on the Ḥaram proper and on its western and northern sides, either alongside the sanctuary itself or along the streets leading to it. Only two Muslim buildings are known with certainty in the whole western half of the city. Its second characteristic is that it was a continuous activity. It is true of course that one can recognise and identify certain particularly active moments, such as the twenties and thirties of the 8th/14th century, during the times of the remarkable governor Tenkiz or else the times of Ḳāʾitbāy in the 9th/15th century. But these clusters of activity, which deserve individual monographs, should not hide the fact that buildings were erected all the time and by an extraordinary broad social spectrum of sponsors.

The functions of the buildings are typical of any place in the Mamlūk period: schools, orphanages, libraries, *madrasas*, baths, *k͟hānaḳāhs*, *ribāṭs*, hospitals, commercial establishments, caravanserais, public latrines, fountains. The only apparent peculiarity of Jerusalem when compared to Cairo or to Aleppo is the preponderance of purely charitable institutions over private mosques, *madrasas*, and mausoleums, the latter being quite scarce. This latter point obviously reflects the practicality of Muslim piety as well as the fact that, as a politically provincial city, Jerusalem did not lend itself to the conspicuous consumption inherent in the construction of mausoleums.

Few plans and elevations are available for these buildings but, when they do exist, the plans appear to be variations of the ubiquitous central plan (often covered, either because of the small size of the buildings or because of the impact of another tradition of construction than Cairo's) with one to four *īwāns*. The most visible feature of each building was always its façade, and Jerusalem is provided with an unusually wide range of Mamlūk portals. There are few variations in their plans, but many in their elevation, especially in the types of vaults used. Superb *muḳarnas* series coexist with simple barrel vaults and the zone of transition of the Bāb al-Silsila's domes exhibit the remarkable range of models available to local masons and architects. Of all the buildings the most remarkable ones are the Tenkiziyya, the Arg͟hūniyya, and the Sūḳ al-Kattānīn for the 8th/14th century and the As͟hrafiyya or the jewel-like fountain of Ḳāʾitbāy on the Ḥaram for the 9th/15th one. The construction is throughout of stone and all monuments exhibit the superb technique of Palestinian masonry: closely jointed courses often of stone of alternating colour, joggled voussoirs, sobriety of decoration consisting usually of mouldings around openings or of inscriptions. While it will eventually be possible to determine a number of stylistic details which will identify a Jerusalem style of architecture, the main impression given by most of these monuments is that they exemplify the consistently high standards of Mamlūk architecture all over Syria and Egypt.

The more important aspect of all these constructions lies in the manner in which they have transformed the Ḥaram. For instead of being simply an area surrounded by a portico and reached through a number of more or less monumental gates, the northern and western sides of the Ḥaram became a show place of façades to buildings whose function was no longer connected to the Ḥaram but received a certain value or grace from it. Thus the most magnificent gateway on the Ḥaram is not an entrance to it but to the bazaar of cloth merchants. The older, traditional gates with their consecrated names lost their importance. The Ḥaram itself became cluttered with all sorts of new buildings which detract by their very multiplicity from the main sanctuaries, inasmuch as many of them were for private or restricted use as places of prayer or for public charity rather than for the formal expression of the faith's beliefs. What seems to be involved is at the same time a different, far more practical and more pluralistic piety, and also a different taste, no longer the imperial taste of the Umayyads nor probably that of the Fāṭimids, but the taste of a wider social order which sought individual salvation through works rather than through the monumental glorification of the faith.

4. *The Ottomans.*

During the first years of Ottoman rule, earlier practices continued and a *madrasa* like the Risāsiyya (947/1540) still follows Mamlūk practice and Mamlūk ideals. A large number of fountains are even later.

But the main effort of the Ottoman dynasty in its heyday was once again an imperial one, and it is therefore not an accident that its two most spectacular achievements are still among the most impressive monuments of the city. One is the tile revetment of the Dome of the Rock and the other one is in the walls and gates of Jerusalem. Both are essentially 10th/16th century achievements attributed to Sulaymān the Magnificent, and it is important to note that neither one sought to be functionally or spiritually original. For regardless of their effectiveness, which is striking indeed, their main point is that they have managed to capture two consistent themes in the monumental history of Jerusalem: the creation of a new Muslim holy place and the symbolic as well as physical separation of the Holy City from the rest of the world.

After this century, the main activity of the Ottomans consisted in constant repairs of the main sanctuaries of the Ḥaram. The quality of these repairs decreased with the centuries as Ottoman wealth decreased and as Jerusalem declined in population and importance, until the second half of the 19th century brought a new, European-centred, significance and architecture into the city.

In the most recent years, two different types of investigations have been carried out in Islamic Jerusalem. The first one is the continuation and partial publication of excavations to the south and southwest of the Ḥaram. These have by now fully demonstrated that the Umayyads utilised and probably rebuilt the staircases of Herodian origin leading to the sanctuary. See N. Avigad, *Archaeological discoveries in the Jewish quarter of Jerusalem, Second Temple period*, Jerusalem 1976, and Mayer Ben-Dov, *Hashiridim min hatikufa hamuslamit hakaduma beʿazor har habayit*, in *Qadmoniot* (Jerusalem 1972).

The second group of investigations are the studies of Mamlūk monuments by A. Walls and M. Burgoyne, published in vols. iii (1971) onwards of *Levant, Jnal. of the British School of Archaeology in Jerusalem*, and with a checklist by Burgoyne, *The architecture of Islamic Jerusalem*, British School of Archaeology in Jerusalem, 1976. In addition to providing accurate plans and elevations of buildings to the west of the Ḥaram, these studies have at times dealt with broader issues and a particularly original note by A. Walls in *Levant*, viii (1976), 159-61, suggests that the construction of the minarets of Afḍal ʿAlī (1465-6) and of the Ṣalāḥiyya (1417) in the western and primarily Christian part of the city served to frame symbolically the domes of the Holy Sepulchre with prototypical Muslim monuments.

Bibliography: The most complete introduction to the monuments of Islamic Jerusalem is by Max van Berchem, *Matériaux pour un Corpus inscriptionum arabicarum*. ii. *Syrie du Sud, Jérusalem ville, Jérusalem Haram*, vols. xliii-xlv of the *Mémoires de l'Institut Français d'Archéologie Orientale* (Cairo 1920-3). The most common literary sources are available in G. Le Strange, *Palestine under the Moslems*, London 1890, and A.-S. Marmarji, *Textes géographiques arabes sur la Palestine*, Paris 1951, in addition of course to the indispensable Mudjīr al-Dīn. The new translation of Muķaddasī's chapters on Syria by A. Miquel, Damascus 1963, has important notes.

General considerations on the monuments of Jerusalem in early Islamic times can be found in U. Monneret de Villard, *Introduzione allo studio dell' archeologia islamica*, Venice 1966, especially 181-215; Lucien Golvin, *Essai sur l'architecture religieuse musulmane*, ii, Paris 1971, and O. Grabar, *The formation of Islamic art*, New Haven 1973. For the Dome of the Rock, the most complete description is by K. A. C. Creswell and Marguerite van Berchem, *Early Muslim architecture*², Oxford 1969. For a different interpretation, see O. Grabar, *The Umayyad Dome of the Rock*, in *Ars Orientalis*, iii (1957). Additional information is in C. Kessler, *Above the ceiling ... of the Dome of the Rock*, in *JRAS* (1964), and *ʿAbd al-Malik's inscription*, in *JRAS* (1970). For the Aķṣā mosque, the key works are R. W. Hamilton, *The structural history of the Aqsa Mosque*, Jerusalem 1949, and H. Stern, *Recherches sur la Mosquée al-Aqsa*, in *Ars Orientalis*, v (1963). For the Ḥaram gates in Umayyad times, see S. Corbett, *Some observations*, in *Palestine Exploration Quarterly* (1952-3). The first publications of the new excavations are by B. Mazar and M. Ben-Dov, *The excavations in the Old City of Jerusalem*, Jerusalem 1971.

Much less work has been done on the later periods. See O. Grabar, *A new inscription*, in *Studies in honour of K. A. C. Creswell*, Cairo 1965; A. Miquel, *Jérusalem arabe*, in *B. Et. Or.*, xvi (1961); L. Golvin, *Quelques notes sur le Suq al-Qattanin*, in *B. Et. Or.*, xx (1967); M. H. Burgoyne, *Some Mameluke doorways*, in *Levant*, from iii 1971 to present; *idem*, *The architecture of Islamic Jerusalem*, British School of Archaeology in Jerusalem 1976. For the citadel, C. H. Johns, *The Citadel*, in *QDAP*, xiv (1950).

No understanding of Jerusalem in the Middle Ages can avoid a thorough awareness of pre-Islamic Jerusalem. Among the huge bibliography dealing with the latter, the most convenient works are L. H. Vincent, *Jérusalem de l'Ancien Testament*, Paris 1954, summarising and revising his older work; J. Simons, *Jerusalem*, Leiden 1954; and M. Avi-Yonah, *The Madaba mosaic*, Jerusalem 1954.

Several general books have provided valuable introductions to Islamic Jerusalem, even though many of them still tend to deal primarily with pre-Islamic times. The most accurate ones are Y. Yadin, *Jerusalem revealed*, New Haven 1975 and Israel Pocket Library, *Jerusalem*, Jerusalem 1973. An exception with good photographs is A. Duncan, *The Noble Sanctuary*, London 1972. An interesting but controversial book about the future is A. Kutcher, *The new Jerusalem*, Cambridge 1973. (O. GRABAR)

ĶUDSĪ, MUḤAMMAD DJĀN, poet at the Mughal court in India. He was born and raised in Mashhad, from where he performed the pilgrimage to Mecca, and was then engaged in the grocery trade before he went to India. In 1041/1632 he joined the ranks of the Emperor Shāh Djahān's poets. Dāghistānī, the author of the *Riyāḍ al-shuʿarāʾ*, states that Ķudsī preceded Kalīm as poet-laureate to Shāh Djahān, but this is not confirmed by contemporary sources. He died in Lahore in 1056/1646-7 and, according to Ādhar's *Ātash-kada*, his remains were removed to Khurāsān.

Ķudsī's poems are distinguished by a felicity of style. Like Kalīm, he was also engaged to compose a poetic history of Shāh Djahān's reign. Though less talented than his more famous contemporary, he seems to have been held in high esteem, and was regarded as a leading poet of his day.

KUDUMMUL, a small volcanic island in the Red Sea in 17° 52′ N lat., called Kotumble on the English Admiralty charts and Qotanbul in *Admiralty handbook, Western Arabia and the Red Sea*, London 1946, 133. The island has a rich flora, which has been studied by the botanist Ehrenberg, and is noteworthy for its iron deposits, which are mentioned as early as the geographer Ibn al-Mudjāwir (d. 630/1233). Kudummul, which lies near Ḥamiḍa on the Arabian coast off ʿAsīr [*q.v.*], once marked the boundary between the land of the Kināna and Yemen.

AL-ḲUDŪRĪ, ABU 'L-ḤUSAYN/AL-ḤASAN AḤMAD B. MUḤAMMAD B. AḤMAD B. DJAʿFAR B. ḤAMDĀN AL-BAGHDĀDĪ, Ḥanafī *faḳīh* who was born and who died at Baghdād (362-5 Radjab 428/972-24 April 1037). He was head of the Ḥanafī school in ʿIrāḳ, and had occasion to lead several public discussions, in which he defended his own viewpoint, with his contemporary, the Shāfiʿī Abū Ḥāmid al-Isfarāʾinī, whom he however especially revered. A number of pupils gathered around him, the most famous of whom was al-Khaṭīb al-Baghdādī [*q.v.*].

As well as various works like his *K. al-Nikāḥ* on marriage and his *K. al-Tadjrīd* on the differences between the Ḥanafīs and Shāfiʿīs, al-Ḳudūrī wrote a *Mukhtaṣar*, which had a great scholarly renown and enjoyed a sanctity comparable to the *Risāla* of al-Ḳayrawānī [*q.v.*] amongst the Mālikīs. It is a concise legal manual, but is clearer than the one of the same name by Khalīl b. Isḥāḳ [*q.v.*]; it deals with ritual, contracts, personal status, criminal law and the law of succession, without particular care for logical order. This *Mukhtaṣar* inspired many commentaries, including e.g. *al-Djawhara al-nayyira* of Abū Bakr b. ʿAlī al-ʿAbbādī (Istanbul 1301, 1314, 1323, Delhi 1327) and *al-Lubāb fī sharḥ al-Kitāb* of ʿAbd al-Ghanī al-Maydānī (in the margins of the previous work, and Cairo 1344/1927). Numerous mss. of the *Mukhtaṣar* exist, which has been published many times, notably at Delhi in 1847, at Bombay in 1303 with trs. in Persian and Pashto, at Istanbul in 1281 with a Turkish paraphrase, and in 1309 also. The chapter on the holy war was edited and translated into Latin by Rosenmüller, in *Analecta arabica*, Leipzig 1825-6, and in French by Ch. Solve, Paris 1829; that on marriage was edited and translated by G. Helmsdörfer, Frankfurt 1832; and more recently, G.-H. Bousquet and L. Bercher edited and translated extensive passages in *Le statut personel en droit musulman hanéfite*, Tunis n.d.

(M. BEN CHENEB*)

AL-KŪFA, one of the two cities (*miṣr* [*q.v.*]), along with Baṣra [*q.v.*], founded in ʿIrāḳ by early Islam. A permanent military establishment of the Arabs in Mesopotamia, Kūfa retained the whole of the ʿIrāḳī *Sawād* [*q.v.*] under its control. It participated actively in the Islamic expansion into Iranian territory, and, throughout the 1st/7th century, was a hotbed of intense political ferment. It was there also, as at Baṣra, that there took place for three centuries the gestation of Arabo-Islamic civilisation and culture. Then Kūfa experienced decline and ruin; today only a few traces remain, mostly of late date or restored.

Kūfa was founded in 17/638 by Saʿd b. Abī Waḳḳāṣ [*q.v.*], the victor of al-Ḳādisiyya [*q.v.*], after the whole of ʿIrāḳ had been wrested from the hands of the Sāsānids and notably after the capture of Madāʾin-Ctesiphon (16/637), whose climate the Arabs could not endure. But other no less important reasons must be added to this: given the existence of a willingness to settle and immigrate, ʿUmar preferred to keep the Arabs grouped together and segregated from the peoples and territory conquered, in a relationship of spatial continuity with Arabia. This presupposes that, very swiftly, these main ideas were issued which set out to dictate the relationship of conquering people-conquered peoples: no dispersal in the *Sawād* or agricultural settlement, maintenance of the military striking force, the setting-up of a newly-originated fiscal system which would tap the revenues of the ʿIrāḳī territory without direct exploitation on the part of the Arabs, all this resting upon the co-existence of Arab clans very dissimilar in their origin. The role of the new state and the new religion as tutelary power and unifying principle was also implicitly taken into consideration. There is no doubt that ʿUmar wished to make of it the experimental melting-pot of his system, given concrete form by the establishment of the *dīwān* between 20 and 23/640-3.

I. The city of Kūfa.

Kūfa, a creation *ex nihilo*, was placed at the edge of the Arabian steppe, but on the bank of the principal branch of the middle Euphrates, guarding the passage to Bābil and, from there, Ctesiphon, a few miles to the north-east of al-Ḥīra; an excellent position of contact, astride two worlds, somewhat familiar to the Arab army due to its being situated in the region of al-Ḳādisiyya. Kūfa, placed on the right bank of the Euphrates, on a tongue (*lisān*) of dry, grey sand mixed with gravel, was slightly above the water level. It escaped floods, was well-supplied with water, and enjoyed a salubrious climate.

We do not know with exactitude the origin of the word Kūfa. The Arab historians and geographers, as they were accustomed, made of it a common noun designating any surface of rounded sand, but obviously, this appears to be a reconstruction a *posteriori*. Massignon derives it from the Syriac ʿAḳūla,

basing it in particular on Chinese testimony; a text of al-Ṭabarī situates the place ʿAḳūl between the Euphrates and the houses of Kūfa, probably to the north of the *miṣr*. Perhaps it is nearer the truth to see its origin in the Persianised form Kūba (Sarkis, in *Sumer* [1954]). Only a text of Sayf b. ʿUmar (al-Ṭabarī, ed. Cairo, iv, 40 ff.) gives some detailed information on the first settlement, on the *takhṭīṭ* of the mosque and the palace, and the apportioning of land to the tribes, clans and fragments of tribes, who constituted the army of Madāʾin. This has to be rectified and completed in the light of other historical and geographical texts. A public area was at first delimited; this was to include essentially the mosque and the governor's palace, and to become the focal point from which the whole encampment branched out. Fifteen *manāhidj* or avenues separating the tribal lots, each forty cubits wide, radiated from this central area. Along the five *manāhidj* of the north were settled the tribes Sulaym, Thaḳīf, Hamdān, Badjīla, Taghlib and Taym al-Lāt; to the south, the Asad, Nakhaʿ, Kinda and Azd; to the east, the Anṣār, Muzayna, Tamīm and Muḥārib, Asad and ʿĀmir; finally, to the west, Badjāla, Badjla, Djadīla and Djuhayna. This picture, it may be seen, contradicts a tradition of al-Shaʿbī cited by al-Balādhurī (*Futūḥ*, 276) according to which all the Yemenīs were placed to the east, between the mosque and the Euphrates, and the Nizārīs to the west, a tradition which study of the topography of Kūfa as it appears from the narratives on the great revolts of the 1st/7th century does not corroborate. But it is beyond doubt that some alterations were effected by historical evolution in this picture of tribal geography: the Tamīm, in particular, migrated from the east to the west with the ʿAbs. The problem of the great tribes of Rabīʿa, Bakr and ʿAbd al-Ḳays still remains. For the most part, the Bakr migrated to Baṣra, but a certain number of them settled at Kūfa—including the ancient family of Dhu 'l-Djaddayn. As for ʿAbd al-Ḳays, initially established at Baṣra, they were possibly moved on a large scale to Kūfa at the time of the caliphate of ʿAlī, to leave it again in 40/660 for Baṣra. In any event, a certain number of characteristic features of the tribal establishment at Kūfa are to be noted: settlement of the main part—but not the whole—of the Arab *muḳātila* who had to confront the Sāsānid armies; heterogeneity of the tribal structure, in contrast to Baṣra; presence of a majority of Muḍarī and Ḳaysī elements formed either from large Bedouin clans (Tamīm, Asad), or from clans of the Ḥidjāz (Thaḳīf, Sulaym, Djuhayna, Muzayna), but nevertheless a concentration of a strong Yemenī minority, completely uncustomary elsewhere. It may even be asked if early Kūfa did not contain a majority of Yemenīs, who later became a weaker and weaker minority; certain modern authors have gone as far as to assert that the *takhṭīṭ* of Kūfa was conceived to shelter these distant migrants, together with those of the Ḥidjāz, rather than the others (M. Hinds, in *IJMES*, ii [1971], 346-67). The pure Yemenī elements are here massively present (Ḥimyar, Hamdān, Ḥaḍramawt, Madhḥidj) alongside tribes newly Yemenised (Kinda and Badjīla in particular, Azd Sarāt and Ṭayyiʾ), but the tribe which became the most numerous of the Yemenīs and without doubt of all the tribes, that of Hamdān, was not settled at Kūfa as early as the Madhḥidj, Badjīla and Kinda, and it was made up for the most part of recent immigrants (*rawādif*), who had come under ʿUthmān, ʿAlī and perhaps Muʿāwiya. It remains a fact that the Yemenī phenomenon was to determine the political destiny of Kūfa as well as the colour of its civilisation. According to Massignon, it is through the influence of the old Yemenī element, city dwellers for a long period, that the sedentarisation of the Arab tribes at Kūfa was effected; hence a civilising and urbanising role of the first order may be attributed to it from very early on.

Figures for the total population vary according to the sources and periods. It may be admitted that during the very first phase, there were between 20,000 and 30,000 inhabitants (al-Balādhurī, *Futūḥ*, 276), although Yāḳūt gives the figure of 40,000 (*Buldān*, iv, 491). A text of Abū Mikhnaf (al-Ṭabarī, v, 79) speaks of the mobilisation by ʿAlī of all the 57,000 *muḳātila*, of whom 40,000 were adults and 17,000 adolescents. Ziyād b. Abī Sufyān, having enlarged the mosque, foresaw it as accommodating 60,000 people, a figure corroborated by a reliable piece of information given by al-Balādhurī (*Futūḥ*, 345) concerning the people registered in the *dīwān*. So there would have been, around the year 50/670, 60,000 men and 80,000 women and children, that is, 140,000 Arabs of whom a census had been made, to which it is reasonable to add the clandestine residents and the non-Arabs, slaves or *mawālī*. Certainly at the same period the figure for the population of Baṣra (200,000 registered) rather outnumbered that of Kūfa, but the demographic inflation in the space of a generation was nevertheless considerable. This may explain the transplantation by Ziyād to Khurāsān of 50,000 people, of whom 40,000 were from Baṣra and 10,000 from Kūfa. It is probable that after Ziyād and throughout the Umayyad régime, the number of Arabs drawing stipends and registered remained stable or even had a tendency to diminish from al-Ḥadjdjādj (75-95/694-713) onwards, but the number of non-Arabs, uprooted from the land, new *mawālī* flocking to the *miṣr*, cannot be known for certain. The fact that this last governor took drastic measures to repulse them is clear proof of the existence of this disordered influx, dangerous for the equilibrium of the city. The history of the population of Kūfa, in the earliest and Umayyad period, is that of a very swift and essentially Arab expansion in a first phase (17-53/638-73), followed by a stabilisation, at times disrupted by the rural non-Arab immigration.

The topographic framework of Kūfa during the 1st/7th century evolved while remaining faithful to the original plan. The first Kūfa, that of ʿUmar (17-23/638-43) was a military camp, geometrical, airy and open, where tents quickly raised for an expedition were drawn up in lines. Soon, without doubt after the pacification of the Iranian territories, the need arose for a more permanent settlement, where tents were replaced by huts of reeds, which were abundant in the region. A third stage saw the substitution of houses (*dūr*) for huts, in *labin* or clay dried and cut up in large rectangular blocks, a stage inaugurated under the first governorship of al-Mughīra b. Shuʿba (22-4/642-4). In fact, all this is information given by Yāḳūt and reproduced by Massignon. Nevertheless, it is contradicted by Sayf, who compresses the stages, stating that the building of Kūfa in *labin* was decided very rapidly, before the *takhṭīṭ* itself, in 17/638. Finally, it is with Ziyād (50-3/670-3) that the *ādjur* or Mesopotamian fired brick was introduced, at first to construct the cathedral mosque and the governor's palace which adjoined it on the south, later no doubt for the houses of the aristocracy or *dūr*. Considerable ex-

penses were incurred to give to the mosque an architectural form: materials brought from al-Ahwāz for the columns, and the calling in of Aramaean or Persian masons. Kūfa was changed into a well-built city and began to take on, with this governor, the features of its topography which would only really change with the end of the Umayyad period and the beginning of the ʿAbbāsid period.

Umayyad Kūfa was not surrounded by ramparts; it may be supposed that its diameter did not exceed two kilometres. The monumental centre was composed of the *djāmiʿ*, of the fortified *ḳaṣr*, of the *raḥba* or *maydān* where various ceremonies took place, and of markets or *aswāḳ*, constructed under the governorship of Khālid al-Ḳasrī (105-20/723-37) but given a specialised use much earlier. Massignon sees here the prototype of the future *aswāḳ* of Baghdād, but it is permissible to consider them as the model for the markets of all the Islamic towns of the Middle Ages by virtue of their vaulted form as well as the structure of their activities, where a special place had to be accorded to the *ṣayārifa* or moneychangers, at the time bankers of the governors and moneylenders of the Shīʿi conspiracies.

From the monumental centre there radiated out the *khiṭaṭ* or tribal lots which constituted the main part of the dwellings of Kūfa. Nevertheless, *ḳaṭāʾiʿ* or individual lots were assigned from the earliest period as exceptional favours to the Companions and to certain great figures who had their aristocratic houses built there, always situated in the centre. Al-Yaʿḳūbī gives a list of 25 *dār*, in which are to be noted the names of Ṭalḥa, al-Zubayr, Saʿd and his son ʿUmar, Abū Mūsā al-Ashʿarī and his descendants who played an important role in Kūfa before emigrating to Ḳumm, ʿAbd Allāh b. Masʿūd, Khālid b. ʿUrfuṭa, one of the principal leaders of the army of conquest, ʿAdī b. Ḥātim, Djarīr b. ʿAbd Allāh al-Badjalī, al-Ashʿath al-Kindī and Umm Hānī sister of ʿAlī. Other sources speak of the private houses of al-Walīd b. ʿUḳba, al-Mukhtār al-Thaḳafī and ʿAmr b. Ḥurayth.

In addition to the monumental centre, to the collective *khiṭaṭ* and the private *dūr*, let us cite as essential elements of the topography of Kūfa the *manāhidj* or avenues, the *sikak* or streets, the *ṣaḥārī* (waste pieces of ground? e.g. *ṣaḥrāʾ al-Bardakht*), the *ḥammāmāt*, the *masādjid*, small mosques of a clan or quarter, and especially the *djabbānāt* of Kūfa. The *djabbānāt*, numbering a dozen, riddling the city everywhere almost certainly from the time of ʿAlī, played the role of tribal cemeteries, but they owed their importance to the fact that they served as places of assembly, mobilisation and taking-up arms. Their name was linked with some major historical episodes, such as the revolt of al-Mukhtār. It may be that we have there a privileged example of the influence of old Yemen on the urban structure of Kūfa. Among the principal *djabbānāt* may be cited that of Sabīʿ devolved to the Hamdān, dj. Mikhnaf (Azd), Murād (Madhḥidj), Kinda (Kinda and Rabīʿa), Ṣāʾidiyyīn (Asad), Uthayr (ʿAbs), etc. Other topographical features, whether in Kūfa itself or in its immediate environs, are often mentioned in the sources and assume a certain importance: the *Kunāsa*, at first a dumping-ground situated to the west of the camp-town, having become later, from the Umayyad period, a place of unloading for caravans from Arabia, a market for animals, on occasion a place of execution, and above all a fair for the poets similar to the *Mirbad* of Baṣra; the *dār ar-rizḳ*, the *sikkat al-barīd*, the *bāb al-fīl*, the *ḳinṭara*, all this within the city; *ḥammām* Aʿyan, *sūḳ* Asad, *dayr* Hind, *dayr* Kaʿb, *dayr* al-Djamādjim and *ḳaṣr* Muḳātil, situated immediately outside but all places intimately involved in the city's existence.

Umayyad Kūfa, marked by the attempt at urbanism of Ziyād and Khālid al-Ḳasrī, evolved, while remaining faithful to the earliest plan, from a Bedouin-style camp to a well-built, articulated, functional city, an evolution which was to be completed in the ʿAbbāsid period by the mere fact of the maturing of the Arabo-Muslim civilisation of which Kūfa was precisely one of the two primordial melting pots. Throughout the 1st/7th century, Kūfa no doubt remained airy, not yet surrounded by ramparts and open to the Arab steppe, as is witnessed by the traffic of men and poetry and the obstinate presence of the Bedouin model. Sedentarisation, a rapid and undeniable success, would have been inexplicable without the maintenance of the umbilical cord with Arabia, but the Arabs of Kūfa were well and truly settled people, almost totally cut off from the nomadic way of life. For it was the first time in their history that the Arabs united to form such a great urban concentration, a melting-pot where specimens of the whole of Arabia came to live and dwell together. If we continue to consider the urban sphere, we have to notice that Kūfa was to undergo profound changes during the high ʿAbbāsid period. The early ʿAbbāsids considered making it their capital and established themselves there for some time, but the ʿAlid presence and sympathies were so strong that they wavered for some time between Kūfa, Anbār and the new city of Hāshimiyya which was coupled with Ḳaṣr Ibn Hubayra, before al-Manṣūr founded Baghdād (145-6/762-3) and moved the *bayt al-māl* and *dawāwīn* there from Kūfa (al-Balādhurī, *Futūḥ*, 293), which indicates clearly that Kūfa had assumed the role of administrative capital of the empire, even if the caliphs did not always reside there.

During this short period of thirty years (132-46/750-63), there took place an Iranisation of a part of the Kūfan toponymy, following the influx of Khurāsānian soldiers: for example, the streets of Laḥḥām Djarīr and Ḥadjdjām ʿAntara and the naming of crossroads by the Iranian form of *čahārsūdj*, such as the *čahārsūdj* of Badjīla (al-Balādhurī, *Futūḥ*, 280). On the other hand, the early ʿAbbāsids undertook the building at Kūfa of al-Ruṣāfa and the castle of Abu 'l-Khaṣīb; above all, al-Manṣūr, after the move to Baghdād, had the city surrounded by ramparts and a moat, making the inhabitants bear the costs of it. It is probable that the enclosure did not surround the *Kunāsa* and some *djabbānāt* outside the centre, thus creating a differentiation between a *madīna* and suburbs. The term *madīna* in the sense of a historical urban nucleus, elaborated, closely-packed and protected by walls with gates, makes its appearance for the first time in the account given by al-Ṭabarī with regard to the revolt of Ibn Ṭabāṭabā (199/814). The same author remarks that the *Kunāsa* contained dwelling houses, just as there appears in his writing the idea of a suburb or *rabaḍ* (viii, 561). Thus we are in the presence of the "process of civilisation" of Kūfa in every sense of the term: it became a classical Muslim town after having been an Arab camp-town, and it became a civil centre after having been a military camp. Finally, during the 3rd/9th century, and although it always remained clearly Arab, its population was mixed and the city began to live in osmosis with the Sawādiyyūn or people from the Sawād who started to become Muslim. Nevertheless, there is a problem of knowing

whether, at its apogee as a city, in the 3rd/9th century, Kūfa entirely lost its character of a spacious town and came to resemble those Islamic cities of a latter age where the *madīna* became an assemblage extremely crowded with houses and almost stifling. It does not seem so, because the geographers of a later period, such as al-Muḳaddasī and much later Ibn Djubayr (though the latter was writing in a period of the city's complete decadence), allow one to catch a glimpse of the existence of green or garden spaces in the heart of the town. But these same geographers, as the archaeological remains stretching as far as Nadjaf also indicate, testify to the expansion of Kūfa towards the west, far beyond the early boundaries. But then, Kūfa was no longer one of the centres from which early Islam, i.e. conquering Arab Islam, radiated, but an important city of ʿIrāḳ, the simple capital of an administrative area.

The provincialisation of Kūfa, and even its decadence, became an established fact in the 4th/10th century. The old structures (the military *arbāʿ*, the tribal spirit, the financial system) began to break down, because the whole edifice of the conquest, inherited from the Arab empire, and of which Kūfa was merely the concrete form, became obsolete, and it is known that at its height the caliphate submitted to the tutelage of the Būyids at the same time as the unity of the Muslim world broke up. Because of this, the decadence of Kūfa was only one of the manifestations of this profound change which intercontinental commercial activity was unable to sustain and prolong, as at Baṣra for one or two centuries. One may speak of a crisis of the Islamic city (Massignon), but in reality we are concerned with a general crisis of early Islam as a state and society, indeed as a civilisation; even more, one might say, with a historical mutation for which a town like Kūfa should certainly pay the price. On the concrete level, there was the great Ismāʿīlī outbreak at the end of the 3rd/9th century, of which Kūfa was the primordial crucible and of which the Ḳarmaṭian violence was one of the destructive elements. In 293/905, 312/924 and 315/927, Kūfa underwent the assaults and pillage of the Ḳarmaṭians. It was never to recover from these. It is this which explains the emergence in 334/945, not far from it, thanks to the protection of the Būyids, of Nadjaf or Mashhad ʿAlī as a centre of Shīʿī devotion which, since the 3rd/9th century, had become the specifically distinguishing dimension of Kūfa. Shīʿī religious symbolism was concentrated there, but as it happened, the old Arab Kūfa which was far from being identified with the Shīʿī phenomenon vanished. The urbanised tribal structure also collapsed at the same time as there arose a "re-bedouinisation" or, at any rate, a growing threat from a new nomad world of the Arabo-ʿIrāḳī steppe. Thus it was in 386/996 that Bahāʾ al-Dawla ceded Kūfa as an *iḳṭāʿ* to the chief of the ʿUḳaylids [*q.v.*]. The Banū Asad, the Ṭayyiʾ, of whom a large fringe remained outside the city limits, because undoubtedly living in symbiosis with it, and also the Shammār, newly-come on the scene, dominated Kūfa and ruined it. Thus these same Asad (to differentiate them from the settled Asad), from whom the grammarians of Kūfa derive, by means of a real ethnological effort, all the flavour of their citations, preserving themselves with their very strong identity, came to present themselves as taking part in the ruin of Kūfa, the new incarnation of Lagash, Ur and Babylon, and which was soon dead like them. In 495/1101, with the emergence of al-Ḥilla, Kūfa lost definitively its importance and the major part of its inhabitants. Ibn Djubayr (539-614/1144-1217), who visited it a little later (578-81/1182-5), speaks of it as a deserted and ruined city but one where some inhabitants still survived, subjected to the regular pillages of the tribe of Khafādja (*Riḥla*, Beirut 1959, 187, 188). The whole built-up area between the mosque and the Euphrates had been destroyed and was covered now with orchards. He speaks at some length of the cathedral mosque, still standing, with its high ceilings, its columns leaded on the inside, a prayer hall with five bays, its sacred vestiges where the Shīʿī myths were neighbours to the recurring myths of old Babylonia taken over by Islam: the *muṣallā* of Ibrāhīm, the *miḥrāb* of ʿAlī, the *tinnawr* of Noah and the supposed tomb of Muslim b. ʿAḳīl. After the Mongols had conquered ʿIrāḳ, Mustawfī Ḳazwīnī wrote for the Mongol prince a treatise describing the resources of the country (*Nuzhat al-ḳulūb*, tr. Le Strange, 30, 166, 210), where he speaks of Kūfa as having ramparts with a circumference of 18,000 paces and of its important agricultural role. Finally, Ibn Baṭṭūṭa (8th/14th century) who, on the subject of Kūfa, reproduces in part Ibn Djubayr but adds some personal elements, sees it, in a similar way to Mustawfī, as a town ruined for the most part, but not yet dead. According to him, of the *ḳaṣr al-ʿimāra*, nothing more than the foundations remained, but the markets, still beautiful, survived. He speaks of the *djabbāna* of Kūfa as if there were no more than one, where the tomb of al-Mukhtār had been repaired and over which a cupola had been erected (*Riḥla*, Beirut 1960, 219). In the Ottoman period, Kūfa fell to the rank of a *nāḥiya* dependent on the *ḳaḍāʾ* of Nadjaf, which was dependent in its turn on the *sandjaḳ* of Karbalāʾ. Niebuhr visited it and compiled a plan of it. Massignon went there for a first time in 1908 and for a second time in 1934. He spoke of the "now deserted site of the great city which was the most Arab of the Muslim metropolises", of which just a few traces of buildings were marked out: the Djāmiʿ, the tombs of Hāniʾ b. ʿUrwa and Muslim b. ʿAḳīl, the Bayt ʿAlī, two guard houses, one of which was built by the English, the small oratory Ḥannāna and the *masdjid* al-Sahla. He noted that a new quarter had appeared between the mosque and the Euphrates. It still exists, and has even been extended; however, it is less important than the recent western quarter, towards Nadjaf, which is mainly residential. Some other European archaeological missions went to al-Ḥīra (Talbot Rice in 1931, in particular). Since 1938, the site of Kūfa, declared an archaeological site, has become an object of interest to the ʿIrāḳī academic authorities and a first season of excavations was made there at that date. The great mosque, completely and sometimes awkwardly restored, remains the central building; it seems to be raised in comparison with its earlier level and only the ramparts remain. The *ḳaṣr*, much larger, has just been mapped out. It is a building now in ruins, though more instructive than the mosque. Let us also note the presence of the mosque of al-Sahla to the west of the site. Various objects in glass and ceramic and some coins of the Umayyad period have been found. Nevertheless, the archaeological exploration of Kūfa may be considered as only in its early stage and, if well handled, as being capable of adding much to our knowledge of the city, still essentially one derived from books.

II. Politics, ideology and culture in Kūfa.

While in the 1st/7th century Kūfa played a political

role of the first order, as the matrix of a large number of matters of future significance for Islam, in the 2nd/8th, after the foundation of Baghdād and with the opening-up of the Islamic empire, politics and the struggle for power left Kūfa aside; but, on the other hand, cultural activities developed there and achieved a high level (between 150 to 250/approx. 760 to 860). From then there is evidence of a triple Kūfa: a political Kūfa (up to 150); a cultural Kūfa (150-250) and then a purely ideological Kūfa (250-350) which had become a focal point of doctrinal Shīʿism.

The principal episodes which punctuated the political activity of early Kūfa were: the participation in the revolt against ʿUthmān (34-5/654-5); the support given to ʿAlī for the two great internecine battles of al-Djamal (36/656) and Ṣiffīn (37/657); the emergence in its heart of the Khāridjī movement; the beginnings of political Shīʿism with the action, which was suppressed, of Ḥudjr b. ʿAdī al-Kindī (51/671). After that, the pro-Shīʿi revolts succeeded one another, and were just as regularly quelled: the episode of Muslim b. ʿAḳīl and the massacre at Karbalāʾ (60-1/679-80), the march of the *Tawwābūn* (65/684), the uprising of al-Mukhtār (66-7/685-6), the preaching of al-Mughīra and of Bayān, the revolt of Zayd b. ʿAlī (122/739) and that of ʿAbd Allāh b. Muʿāwiya (127/744). Finally, it was Kūfa which was the directing brain behind the ʿAbbāsid *daʿwa*, and it was at the great mosque of Kūfa that the first caliph of the new dynasty was solemnly invested (132/749). But Kūfa equally underwent numerous rounds of Khāridjī assaults, particularly in 76/695, when it was threatened by Shabīb, and more seriously in 127-8/744-5 by al-Ḍaḥḥāk. It participated, in 82-3/701-2, alongside Baṣra, in the great revolt of Ibn al-Ashʿath which brought the Umayyad régime close to its collapse and which was a revolt of the *amṣār* without ideological content.

This abundance of insurrections, of seditious actions and political events, earned Kūfa the reputation of a turbulent, agitated, ambitious city, and, for the later Shīʿi consciousness, of a martyr city. Thus on the majority Sunnī side, there were some solid prejudices, on the other side, a whole apocalyptic elaboration in which "accursed Baghdād will be destroyed and Kūfa will be queen of the world, after having been a dwelling of exile and waiting for true believers." According to the *ḥadīth* of Salmān, "Kūfa is the *ḳubba* (= royal tent) of Islam; a time will come for the world when there will be no true believer except the one who lives there or whose heart sighs for it" (Massignon, *Explication du plan de Kūfa*, repr. in *Opera Minora*, iii, 54).

In reality, this constant political effervescence of the 1st/7th century resulted from the structure of Kūfa itself as well as in historical evolution. As a fundamental component of the system of the *amṣār* at least until 30/650, the date at which Baṣra outstripped it in the conquest of the Iranian East, Kūfa sheltered the conquerors of ʿIrāḳ from the time of the first wave onwards, that of the *Ahl al-Ayyām* until the *Ahl al-Ḳādisiyya*. The first presumed upon the antiquity of their conversion and their faithfulness to Islam, the second had participated in the *Ridda*, but they were of no less high Arab lineage. Kūfa, on the other hand, drained the major part of the resources of the *Sawād* and the leaders of the army managed the ancient royal domains, this becoming later a real apple of discord, while the immigration to Baṣra, except for that of the Bakr, was that of latecomers, of tribes from the Arabian south-east, newly come to the scene of conquest and arriving in complete, homogenous tribal groups. Within the tribal structure of Kūfa, in the conditions which surrounded its genesis, by the attraction exercised over the new immigrants or *rawādif*, and the lack of any immigration control, from the very fact of its supremacy in the high period, some germs of tension took root which were ready to develop. Under the caliphate of ʿUmar, the equilibrum was maintained, and the armies of Kūfa were occupied in conquering Persia. It is in the caliphate of ʿUthmān that the internal conflicts began to appear; the former Islamic élite, raised up by ʿUmar, yielded ground to the traditional chiefs who shared in the *aʿmāl* and saw their position reinforced by the waves of *rawādif* of their own tribes (a typical case of opposition is between an Ashtar Nakhaʿī and an Ashʿath b. Ḳays). The activism of the Ahl al-Ayyām, disappointed by the new politics, resulted in the murder of ʿUthmān in which a number among them were involved, and this ranged them necessarily on the side of ʿAlī. ʿAlī's coming to Kūfa highlighted the new phenomenon of the supremacy of the *amṣār* over Arabia for the definition of the political destiny of the Arabs; for four years, Kūfa was to be if not the capital of the empire, seeing that the empire was divided, at least a centre of major decision and the seat of the caliphate. From this privileged episode of its existence, Kūfa was to derive its future pretensions, but also a persistent faithfulness to ʿAlī and his family. Nevertheless, from its origin, this faithfulness was far from making for unanimity. The Ashrāf or traditional chiefs of the tribes, having in general participated at al-Ḳādisiyya, and being enrolled in the *sharaf al-ʿaṭāʾ*, were lukewarm towards the cause of ʿAlī and consequently also the mass of the inhabitants who, in general, followed them. The activists remained (who may be named as the *ḳurrāʾ* [*q.v.*]), of whom a majority cast in its lot with ʿAlī and on whom he showered benefits, but of whom a minority, harder and more intransigent, showed itself reticent and soon hostile with regard to him. After the arbitration, it appeared that ʿAlī could no longer be certain of anyone except his partisans, his *shīʿa* in the political sense of the term, while the intransigent members of the *ḳurrāʾ* fell into Khāridjism and the conservative group of the Ashrāf abandoned him; whence the dislocation of the coalition which he had constituted, whence also the minority character and powerlessness of the Shīʿa for a century. The Umayyads governed indeed with the support of the Ashrāf, who did not like them, but found in them a principle of order. They were satisfied with their growing social influence, guaranteed by the Umayyad régime. It is this which explains why the Ashrāf ranged themselves on the side of the established power every time that a Shīʿi insurrection broke out, and why that power gained their collaboration in disarming the Shīʿi troops. In 61/680, they even took part in the murder of Ḥusayn; they mobilised actively against al-Mukhtār, who threatened their privileges; and they regrouped themselves around the governor in order to bring about the failure of Zayd b. ʿAlī's action. Only the great revolt of 82-3/701-2 was a specifically ʿIrāḳī revolt against the preponderance of the Ahl al-Shām, the tyranny of the governor al-Ḥadjdjādj and, because of this, it was led by the Ashrāf as well as by the *ḳurrāʾ*. But there followed a large-scale demilitarisation of the *miṣr*, and the foundation of Wāsiṭ, the settlement of the Syrian army in ʿIrāḳ as if in occupied territory.

If, throughout the 1st/7th century, the majority of the Ashrāf showed themselves hostile to the

S͟hīʿī movement. certain of the As͟hrāf nevertheless participated actively in it, such as al-Mukh͟tār himself, Ibrāhīm b. al-As͟htar and ʿAbd al-Raḥmān b. S͟huraykh al-S͟hibāmī, But after al-Mukh͟tār, it was above all popular elements which supported S͟hīʿī activism, whether from among the Arabs, Yemenīs in particular and, more precisely, Yemenīs from certain clans of Hamdān (Kh͟ārif, S͟hakir, etc.), or else recruited from among the plebeians of the new immigrant *mawālī*, a mass operation utilised by al-Mukh͟tār. It is probable that the rallying of the Yemenīs to the S͟hīʿī cause was due to their marginal position in the Arab city, socially as well as culturally, for there is no doubt that a number of poor were recruited from the clans of Hamdān (clans of *rawādif?*) and that the call for the rights of the *Ahl al-Bayt* found some echoes in the old Yemenī consciousness. It is this which explains the populist character of the revolt of al-Mukh͟tār (66-7/685-6), perhaps the most important S͟hīʿī revolt of the 1st/7th century. It succeeded in assuming power at Kūfa for some time; above all, it fashioned the S͟hīʿī consciousness by giving it a mystique, a language, slogans and some elements of a doctrine. Also, the Kaysāniyya [*q.v.*], who derived from it, would be, via Abū Hās͟him, at the root of the *daʿwa* for the Family.

With the ʿAbbāsid dynasty, there took place an intellectualisation and a deepening of S͟hīʿism, the political action becoming intermittent. Hence one must wait until the year 195/814 to see a resurgence of an insurrection of the old style, that of Ibn Ṭabāṭabā, and the year 250/864 for that of Yaḥyā b. ʿUmar, far less dangerous, to break out. But S͟hīʿism as a faith did not cease to gain ground, so that it veritably became the quasi-unique ideology of the town at the end of the 3rd/9th century and constituted a cultural and religious tradition in the 4th/10th century. Certainly, it was at this moment that the S͟hīʿī imagination, re-reading the history of the town, reclassified its sites according to its own standards, dividing quarters and mosques into blessed and cursed ones.

Kūfa was able to export its S͟hīʿī consciousness to the Iranian world, and to Ḳumm especially. Ḳumm was indeed a projection of S͟hīʿī Kūfa, as Balkh͟, Marw and Nīsābūr were a projection of Baṣra. Because of this, as a colonising centre, Kūfa showed itself less active than Baṣra. Each of the two *miṣrs* is known to have had its *th͟ugh͟ūr* and its *māh* [*q.vv.*]. The central Iranian territory was practically partitioned: Rayy was the *th͟agh͟r* of Kūfa, and Iṣbahān depended on it, but the *māh* of Kūfa, sc. Nihāwand, showed itself less active than the *māh* of Baṣra, sc. Dīnawar, although several sources speak of Dīnawar as the *māh* of Kūfa. But it is especially in the race to the peripheral Iranian territories, from 29/649 onwards, that Baṣra gained the upper hand, with the conquest of Kh͟urāsān, while Kūfa had to be content with Ād͟harbāyd͟jān, a province of little account, with Ḳazwīn as an extreme *th͟agh͟r*. Nevertheless, over the centuries, the specifically S͟hīʿī nature of Kūfa imposed itself by a process of slow penetration into the whole S͟hīʿī consciousness of Islam by way of Bagh͟dād and, by that of Ḳumm and Mas͟hhad, to the whole modern Iranian lands, while Baṣra was not alone in defining the structures of later Sunnī Islam, although it had been a primordial centre bringing the idea of *d͟jamāʿa* into action. However, the religious and cultural legacy of Kūfa should not be limited to the transmission of the S͟hīʿī tradition. Far more important can be shown by analysis to be the participation of Kūfa in the elaboration of the universal Arabo-Islamic culture which became rooted in the great *miṣr* of the first two centuries. Bagh͟dād was to be the heir of Kūfa and Baṣra. these two fundamental matrices which defined the general lines of the culture of Islam, each with its own genius: Kūfa excelled in the recovery of the Arab poetic patrimony, in the exegesis of the Ḳurʾān, in law and genealogy, whereas Baṣra, more rationalist and critical, invented Arabic grammar and was the great centre of Muʿtazilī speculation.

There are two great cultural moments in the history of Kūfa: the one oral, of obscure gestation, where the culture, still undifferentiated, was seeking to establish its foundations (17-150/638-767); the other, brilliant, which developed a true classicism and bequeathed to us some great works (150-250/767-864). In both cases, the two fundamental poles around which the new culture expressed itself were Bedouin Arabism and the Islamic message, the influence of the conquered peoples proving negligible. Arabic writing was perfected at Kūfa, undoubtedly with the participation of the Arabs of al-Ḥīra, and Kūfic, having become a monumental writing, may be considered the most ancient specimen of post-Islamic Arabic writing, although the type of writing was used on Sāsānid *dirhams*. It is also in very early Kūfa that Ibn Masʿūd lived and taught, later becoming the eponym whose name crystallised the traditionist current and to whom some disciples were attached: ʿAlḳama b. Ḳays, al-Aswad b. Yazīd, Masrūḳ b. al-Ad͟jdaʿ, ʿUbayda, al-Hamdānī and S͟huraykh. Schacht thought that the founding role of Ibn Masʿūd was fictitious and that some forged traditions were projected on to him between 100 and 130/719-48, establishing the chain Ḥammād b. Abī Sulaymān-Ibrāhīm al-Nakh͟aʿī-Ibn Masʿūd, but that nevertheless *fiḳh*, which preceded *ḥadīth͟*, was created by the single centre of Kūfa. In fact, it seems clear that three key-personalities, living in the 1st/7th century, played a main role in the first glimmerings of law, *ḥadīth͟* and exegesis: Ibrāhīm al-Nakh͟aʿī, Saʿīd b. D͟jubayr and ʿAmr b. S͟harāḥbīl al-S͟haʿbī. In the domain of spirituality, there was no personality here comparable to Ḥasan al-Baṣrī, but the currents of asceticism and mysticism found their masters in Uways al-Ḳaranī and Rabīʿ b. Kh͟uth͟aym. Let us cite in the sphere of *tafsīr* and *akh͟bār* the names of two precursors: Mud͟jālid b. Saʿīd and Muḥammad al-Kalbī; for the collection of poetry that of Ḥammād; and for poetic creation, the names of Aʿs͟hā Hamdān and al-Kumayt.

The second phase of the cultural history of Kūfa, whose beginnings coincide with those of the ʿAbbāsid dynasty, saw the differentiation of the disciplines and the emergence of the great founders and synthesisers: Abū Ḥanīfa, master of the school of *raʾy* in canon law (d. 156/772); Abū Mikh͟naf, one of the first great Arab historians (*akh͟bāriyyūn*) (d. 157/773); al-Ruʾāsī, to whom the first work of grammar is attributed, ʿĀṣim b. Bahdala (d. 131/748), and Ḥamza, who, together with al-Kisāʾī, established three of the seven canonical readings of the Ḳurʾān. Later, the generation of those who died in the years between 180 and 200/796-816 assumed the burden of recording, codifying and totalising the knowledge founded in the preceding period, so that the works which survive today belong to this generation of active disciples and totalisers: Abū Yūsuf (d. 182/798) and Muḥammad b. al-Ḥasan al-S͟haybānī (d. 189/804) in law; His͟hām b. Muḥammad al-Kalbī (d. 206/821), highly erudite, a genealogist and *akh͟bārī*, well-versed in

knowledge of the Arab patrimony which he worked increasingly at collecting and establishing; and finally al-Kisāʾī (d. 179/795), who was the supreme master of the grammatical school of Kūfa. This school collective opinion still claims to set up as a rival of that of Baṣra. It is regarded as more deeply rooted in the Arab environment, with a passion for anomalies (*shawādhdh*) and a more acute sense of poetry. Nevertheless, on examination, it is revealed as being a particularisation of the fundamental contribution of Baṣra, i.e. that of al-Khalīl, master of everyone, although the role of al-Ruʾāsī deserves to be clarified. This being granted, al-Kisāʾī, like Sībawayh at Baṣra, engendered a line of grammarians marked out by al-Farrāʾ, who is comparable to al-Akhfash, and by Thaʿlab, who may be compared with al-Mubarrad, the height of activity of these two last occurring around 250/864; the two of them achieved the totalisation of the earlier knowledge of the two schools. But already Baghdād, after having gathered to itself the greatest names of Kūfa and Baṣra for two generations, begins to give forth an eclectic tradition in all fields, digesting, surpassing and delivering to the Islamic world the admirable work of two centuries which had been produced in the two *miṣrs*.

In the intellectual consciousness of contemporary Islam, that which is willingly remembered of the historical evolution of Kūfa, that by which it is largely known, is its school of grammar and its role as cradle of Shīʿism, perhaps because this is what particularises it the most in the last instance, and laid the foundations for its survival in the other. But the renewal of interest in the political and cultural history of ancient Islam will allow for the growth of a further consciousness of the role it assumed as a place of Arab settlement and immigration, as a centre of great political struggles and as a specifically Arab city which, along with Baṣra, established the basis and true style of the cultural scheme of Islam.

Bibliography: The most ancient sources on the history of Kūfa, consisting of monographs written by the *akhbāriyyūn* of the 2nd/8th century, have entirely disappeared as such, but some more or less important fragments of them are to be found in the great well-known standard works which have derived from them the main part of their information. Let us cite first al-Haytham b. ʿAdī, *Kitāb Khiṭaṭ al-Kūfa*, *K. Wulāt al-Kūfa*, *K. Ḳuḍāt al-Kūfa wa 'l-Baṣra*, *K. Fakhr ahl al-Kūfa ʿala 'l-Baṣra*; ʿUmar b. Shabba al-Baṣrī, *Kitāb al-Kūfa*, *K. Umarāʾ al-Kūfa*; the well-known monographs of Abū Mikhnaf, resumed by al-Ṭabarī in particular, inform us of the main events but also indirectly of the topography. A manuscript attributed to Abū Mikhnaf exists at Berlin under the classification Spr. 160 and bears the number 9039 in Ahlwardt's catalogue, with the title *Kitāb Khabar al-Mukhtār wa-bni Ziyād*; the present author has examined it and it appears to him apocryphal. Moreover, the later monographs have themselves also disappeared: that of Muḥammad b. ʿAlī al-Nadjashī al-Asadī (*Kitāb al-Kūfa*) and that of Muḥammad b. Djaʿfar b. al-Nadjdjār (*Taʾrīkh al-Kūfa*).

Great classical works: (a) Principal sources: Balādhurī, *Futūḥ al-buldān* and *Ansāb al-ashrāf*; Ṭabarī; Ibn Saʿd, *Ṭabaḳāt*, vi, devoted to Kūfa; Yaʿḳūbī, *Taʾrīkh* and especially *Buldān*; Ibn al-Faḳīh, *Mukhtaṣar Kitāb al-Buldān*; Yāḳūt, *Muʿdjam al-buldān*.—(b) additional sources: these comprise the greater part of the works of history, geography, *adab*, law etc. The most useful are, apart from those which have been indicated in the body of the article: Naṣr b. Muzāḥim, *Waḳʿat Ṣiffīn*; Dīnawarī, *al-Akhbār al-ṭiwāl*; Khalīfa b. Khayyāṭ, *Taʾrīkh*; anonymous, *Taʾrīkh al-ʿAbbās wa-waladih*, ed. Dūrī, and anonymous, *Taʾrīkh al-khulafāʾ*, ed. Griyaznevitch; Ibn Ḥazm, *Djamhara*; Ibn al-Kalbī, *Nasab*; Dhahabī, *Taʾrīkh* and *Mīzān al-iʿtidāl*; Iṣfahānī, *Aghānī* and *Maḳātil al-Ṭālibiyyīn*; Ibn al-Nadīm, *Fihrist*; Djāḥiẓ, *Bayān*; Ibn Ḥabīb, *Muḥabbar*; al-Khaṭīb al-Baghdādī, *Taʾrīkh Baghdād*; all the classical works of geography and *adab*; amongst works of *fiḳh*, in particular Abū Yūsuf, *Kharādj*, but also Abū ʿUbayd Ibn Sallām, *Kitāb al-Amwāl* and Ḳudāma b. Djaʿfar; the works of *Ṭabaḳāt* and heresiography are equally useful;—Shīʿī sources: Ibn Abī Ḥadīd, *Sharḥ Nahdj al-balāgha*; Kulaynī, *Kitāb al-Kāfī*; al-Kashshī, *Akhbār al-ridjāl*, Bombay 1317; anonymous, *Mukhtār-nāma*, lith. Tehran 1351; Ṭabarsī Nūrī, *Nafas al-Raḥmān*, lith. 1868, *al-Iḥtidjādj*, Nadjaf 1966; al-Barāḳī, *Taʾrīkh al-Kūfa*, Nadjaf 1960;—Studies: Nearly all that has been written by modern scholars on early Islam, the Umayyads, the development of Islamic culture, Shīʿism, is relevant to Kūfa. We refer the reader only to the studies relating specifically to Kūfa: Le Strange; L. Massignon, *Mission en Mésopotamie*, i, *IFAO*, Cairo 1910; idem, *Explication du plan de Kūfa*, in *Mélanges Maspero*, iii, 337-60 (fundamental); idem, *Explication du plan de Baṣra*, in *Westöstliche Abhandlungen R. Tschudi*, Wiesbaden 1954, 154-74; P. Pelliot, *Des artisans chinois à la capitale abbasside*, in *T'oung Pao* (1928-9); R. Guest, *A tablet in Kufic from Kūfa*, in *JRAS* (1933); F. Kmietowicz, *Un trésor de monnaies coufiques trouvé en Pologne*, in *Folia Orientalia*, i/2 (1959), 209-30; W. M. Watt, *Shīʿism under the Umayyads*, in *JRAS* (1960), 158-72; Muḥammad ʿAlī Muṣṭafā, *Taḳrīr awwalī ʿan al-tanḳīb fi 'l-Kūfa*, in *Sumer*, x, xii, xiii (1954, 1956, 1957), with Eng. tr. in *Sumer*, xix (1963); Ṣāliḥ Aḥmad al-ʿAlī, *Dirāsa Tubughrāfiyya li-nāḥiyat al-Kūfa*, in *Sumer*, xxi (1965); Mahdī al-Makhzūmī, *Madrasat al-Kūfa wa-manhadjuha fī dirāsat al-lugha wa 'l-naḥw*, Baghdād 1955; Kāẓim al-Djannābī, *Takhṭīṭ madīnat al-Kūfa*, Baghdād 1967; Yūsuf Khulayf, *Ḥayāt al-shiʿr fi 'l-Kūfa*, Cairo 1968; Ḥusayn al-Zubaydī, *al-Ḥayāt al-idjtimāʿiyya wa 'l-iḳtiṣādiyya fi 'l-Kūfa fi 'l-ḳarn al-awwal al-hidjrī*, Baghdād 1970; M. Hinds, *Kūfan political alignments and their background in the mid-seventh century A.D.*, in *IJMES*, ii (1971), 346-67; M. A. Shaban, *Islamic history A.D. 600-750 (A.H. 132), a new interpretation*, Cambridge 1971; ʿAbd Allāh al-Kayyāḍ, *Taʾrīkh al-Imāmiyya wa-aslāfihim min al-Shīʿa*, Beirut 1975; Hichem Djaït, *Les Yamanites à Kūfa au Ier siècle de l'Hégire*, in *JESHO*, xix/2 (1976), 148-81.

(HICHEM DJAÏT)

KUFRA, a group of oases in the Eastern Sahara in the Libyan Desert half-way between Cyrenaica and Wadai. For a long time it was known only from Rohlfs' account, who managed to reach it in 1879. Subsequently, Kufra has been visited by two other Europeans, Maréchal des Logis Lapierre (1918) and Mrs. Rosita Forbes (1920-1). Their descriptions have completed and corrected that of Rohlfs.

The name Kufra applies to a number of oases

which stretch from the south-east to the north-west in a line about 300 km. long, between 24° and 26° N, 18° 40′ and 21° 40′ E. The most southerly oasis lies about 1,350 km. south-east of Tripoli and 900 km. south of Benghāzī. There are five in all, and they are separated from each other by *sarir*, or plains of compressed gravel. The total area of the group amounts to about 17,842 km². It occupies the bottom of a depression which rises in altitude from 250 m. in the north to 460 m. in the south. The soil is generally formed from overlapping strata of marly sand in the northern area of the dunes which join those of the Libyan desert. In the central and southern parts, the depression is crossed by calcareous mountains which rise above a base of Numidian sandstone; their summits are table-shaped and similar to that of the *gūr* of the South Algerian Sahara.

There are neither springs or running water at Kufra, but everywhere the water-table rises to between one and three metres from the surface. At various points of the landscape the water forms brackish lagoons or even permanent lakes, of which the most imposing is 10 km. long. They can be regarded as the remains of an earlier situation when the lacustrian nature of the oasis was much more marked than it is to-day. The subterranean water is sufficient to support plentiful and varied vegetation. In the dried-out basins *hād* (*cornucala monacantha*) and *dīs* grow, which provide excellent food for camels. Although the green belt around the lakes and marsh depressions is often very narrow, cereal crops are grown in it—wheat, *dhura* (*sorghum vulgare*), vegetables, plantations of fruit trees (olives, figs, oranges and lemons). The main source of wealth is the date palm. Among the fauna are gazelles, many species of bird (crow, falcon and stork) and reptiles such as lizards and non-poisonous snakes.

Almost the entire population belongs to the Zāwiya tribes, Arabised Berbers who took the place of the Tūbu, the previous masters of the oases. Most of them are semi-nomadic and occupy only temporary encampments. The geographical position of Kufra gives it a certain commercial importance. It was a stopping place on the caravan route leading from Cyrenaica to Wadai and has been in use as such since the beginning of the 19th century. According to Muḥammad al-Ḥashā'ishī, there was a market at Djōf, where business was conducted by barter. As in all Saharan markets, the chief item of trade was slaves.

There is very little information on the history of Kufra. According to Rohlfs, it could have been inhabited by the Garamantes. Buildings there are comparable with some at Fazzān [*q.v.*] which Duveyrier pointed out and which seem to go back a considerable period in time. When its history began, the country was occupied by the Tūbu, who left many traces of their stay from this period—cemeteries, houses and fortified villages built on the summits of mountains. The population of these places was pagan, and this may explain the origin of the name Kufra (*kafara*, pl. of *kāfir*, "infidel"), given to the region when they settled there. In about 1730 they were ousted by the Zāwiya and the Ḥassūna, tribes from Tripolitania, who took over their position. The last of the Tūbu seem to have disappeared at the beginning of the 19th century. In the middle of that century the Sanūsiyya [*q.v.*] appeared and built the *zāwiya* of al-Istāt not far from the village of Djōf. They appropriated the best ground and the richest gardens. At the time of Rohlfs' journey, they already owned a quarter of the palm trees in the oasis and had begun new plantations. The *zāwiya* of al-Istāt was already very important at this time, and it became the residence of the Grand Master of the brotherhood from the moment in 1895 when Sīdī al-Mahdī, son and successor of Sīdī Muḥammad al-Sanūsī, the founder of the order, left Djaghbūb [*q.v.*] to go and take up residence there.

Journal* (1921), 81-101; eadem, *The secret of Sahara: Kufara*, London 1921.

(G. YVER)

ĶUFṢ, Arabised form of Persian Kūfičīs, a people inhabiting south eastern Persia, more exactly the Kirmān-western Balūčistān region, in early mediaeval Islamic times.

The name, literally "mountain dwellers", probably stems ultimately from O. Pers. *ākaufačiya*—(< O. Pers. *kaufa*- "mountain"), the name of a people in the Daiva inscription of Xerxes, who are mentioned together with the *mačiya* "men of Maka" (= Makrān, the coastal region of Balūčistān?), via N. Pers. *kūfidj/kūfič* (cf. R. G. Kent, *Old Persian grammar, texts, lexicon*², New Haven 1953, 151, 165). In early Islamic sources, the Kūfičīs are frequently linked with the Balūčīs in the alliterative phrase *Kūč u Balūč*, although it is clear that we are dealing here with two separate peoples [for the latter, see BALŪČISTĀN].

The Arabic and Persian geographical writers of the 4th/10th century (Iṣṭakhrī, Ibn Ḥawḳal, the *Ḥudūd al-ʿālam*, etc.) mention the region of the Kūfičīs as a mountainous one, lying to the south of the Djabal Bāriz in eastern Kirmān, where dwelt the Balūč. *Grosso modo*, this region corresponded with the little-known one of Bashākard/Bashkardia [*q.v.* in Suppl.] in modern Persia, sc. the mountainous area lying to the east of Mīnāb and between the Djāz Mūryān depression on the north and the coastal plain of Makrān on the south. Whether the present-day Bashkardīs are descendants of the mediaeval Kūfičīs is unclear and probably impossible to prove or disprove, in view of the dearth of historical, demographic and linguistic information on this remote corner of Persia; one can only remark that the two groups of dialects making up Bashkardī form a distinct Iranian language of its own, to be separated from New Persian on the one hand and Balūčī on the other.

The Islamic sources agree on stigmatising the Kūfičīs on the 4th-5th/10th-11th centuries as a predatory people, nominally Muslim, but behaving with inhuman cruelty to the travellers and others whom they intercepted within the Dasht-i Lūṭ, into which they raided from their hill fastnesses; there is a classic description of their characteristic savagery in al-Muḳaddasī (wrote *ca.* 375/985), 488-90, cf. Schwarz, *Iran im Mittelalter*, 263-5. The Būyid *amīr*s Muʿizz al-Dawla and his nephew ʿAḍud al-Dawla took draconian measures against the Kūfičīs as they extended their rule eastwards from Fārs to Kirmān and put an end to the independent power in Kirmān of Muḥammad b. Ilyās [see ILYĀSIDS]. In 324/936 Muʿizz al-Dawla defeated the "chief of the Ḳufṣ and Balūṣ", ʿAlī b. al-Zandjī, at Dilfārid in the *sardsīr* or mountainous zone of Kirmān, but had to leave him in control of the Kūfičīs' mountain haunts.

After the death of Muḥammad b. Ilyās in 356/967, ʿAḍud al-Dawla invaded Kirmān and wrested the province from the former's sons and their allies the Kūfičīs. During 360-1/970-2, two campaigns were launched against the Kūfičīs, as a result of which Būyid authority was extended as far eastwards as Tīz and Makrān, the Kūfičī and Balūč lands laid waste, and large numbers of them deported or taken as hostages (for details, see C. E. Bosworth, *The Banū Ilyās of Kirmān (320-57/932-68)*, in *Iran and Islam, in memory of the late Vladimir Minorsky*, ed. Bosworth, Edinburgh 1971, 111-18).

The Kūfičīs did not, of course, disappear after this. They continued to prey on travellers through the Great Desert, although the establishment in the 5th/11th century of the Great Saldjūḳ sultanate and the autonomous Saldjūḳ amīrate in Kirmān seems to have reduced their activities to manageable proportions. The *amīr* of Kirmān Ḳāwurd [*q.v.*] is said to massacred the Kūfičī chiefs in their strongholds in the Djabal Bāriz, and after this, mention of the Kūfičīs as a distinct ethnic element drops out of mention in the histories; presumably they now mingled with the general ethnic stock of south-eastern Persia.

Bibliography: The information of the mediaeval geographers is given in Le Strange, *The lands of the Castern Caliphate*, 316-17, 323-4, and Schwarz, *Iran im Mittelalter*, 261-6, cf. also *Ḥudud al-ʿālam*, 65, 124, 201, 374-5. The Būyid campaigns are described by Miskawayh in his *Tadjārib al-umam*, later repeated in Ibn al-Athīr; see Bosworth, *The Banū Ilyās of Kirmān, loc. cit.* All these sources are utilised in the detailed study by idem, *The Kūfichīs or Qufṣ in Persian history*, in *Iran, Jnal. of the British Institute of Persian Studies*, xiv (1976), 9-17. (C. E. Bosworth)

KŪH-I BĀBĀ, the mountain massif of central Afghānistān, being the westwards and southwards extension of the Pamirs "knot" and the Hindū Kush [*q.v.*] of north-eastern Afghānistān. The name Kūh-i Bābā is properly given to the east-west chaîne magistrale running westwards from Kābul and lying to the south of the upper Herī Rūd, with outliers running southwards and westwards through the regions of the Ghōrāt and Hazāradjāt [see GHŪR and HAZĀRADJĀT in Suppl.] between such river valleys as those of the Helmand, Arghandāb and Tarnak. On the northern side of the Herī Rūd stretch the Paropamisus Mountains, rising to 3,600 m./11,200 ft., and northwestwards to the Murghāb valley and the Russian border, the Kūh-i Ḥiṣār (4,230 m./13,150 ft.) and its continuation the Band-i Turkistān (3,500 m./10,900 ft.). To the east of Kābul, the Safīd Kūh stretches to the south of Djalālābād towards the Khyber Pass [see KHAYBAR PASS] and the Pakistan frontier, attaining a height of 4,760 m./14,800 ft. The central Kūh-i Bābā has as its highest point Shāh Fūlādī, 5,140 m./16,000 ft. high and covered in perpetual snow. The whole region is thus a ganglion of mountain chains and upland plateaux, across which communication has always been arduous: thus the Unai Pass between the headwaters of the Kābul River and the Helmand lies at 3,300 m./10,300 ft., the Shibar Pass between the Kābul valley and northern Afghānistān via the Ghōrband lies at 3,000 m./9,400 ft., the Hadjigak Pass from the Unai district northwards to Bāmiyān lies at 3,700 m./11,550 ft., and the Kirmu Pass connecting the valleys of the upper Herī Rūd and the Helmand lies at 3,100 m./9,730 ft.

Because of the difficult communications, the historic routes linking the principal towns of Afghānistān, sc. Kābul, Ḳandahār and Herāt, have often gone round this central massif southwards or northwards, and today, it remains one of the most thinly-populated and least-known regions of the country. Much field work, archaeological, ethnological and topographical, needs to be done here, and this will certainly throw important light on Afghānistān's past history. Because of the configuration and the harsh climate, much of the region is totally unpopulated, but on the plateaux and in the villages there is pastoralist transhumance and nomadism and some agriculture. The population of the Ghōrāt and Hazāradjāt regions is predominantly Tādjīk, with vestigal ethnic elements like the Mongols, and with increased penetration on the southern fringes by Pashtūns. The towns of the region, like Pandjāb or Pandjāō, Ghizāō, Uruzgān and Dawlatyār, are small and have only local importance.

Bibliography: J. Humlum, *La géographie de l'Afghanistan, étude d'un pays aride*, Copenhagen 1959, 16-37, 85-8; L. Dupree, *Afghanistan*, Princeton 1973, 3 ff., 57 ff. (C. E. Bosworth)

KŪH-I NŪR (Koh-i Noor) a diamond, now weighing 106¹/16 carats, but originally much larger; the early history of it is obscure, and authorities are not agreed as to whether it may be identified with the diamond mentioned by Bābur in his Memoirs (*Bābur-nāma*, tr. Beveridge, 477, 702); but *ca.* 1656 it was presented by Mīr Djumla [see MUḤAMMAD SAʿĪD] to the Mughal emperor, Shāh Djahān, and was seen in 1665 by Tavernier in the treasury of Awrangzēb; in 1739 it was carried off to Persia by Nādir Shāh, who gave it the name it now bears. Nādir Shāh's grandson, Shāh Rukh, gave it in 1751 to Aḥmad Shāh Durrānī, whose grandson, Shāh Shudjāʿ, when in exile in Lahore in 1813, had to surrender it to the Sikh Mahārādjā Randjīt Singh. On his death-bed in 1839, Randjīt Singh is said to have expressed a wish that the diamond should be sent to the temple of Djagannāth, in Orissa, but it remained in Lahore until the annexation of the Pandjāb in 1849 by the East India Company, who presented it to Queen Victoria. It was subsequently incorporated in the state crown used by Queen Elizabeth, consort of King George VI, at their coronation in 1937.

Beveridge, *Bābur's diamond: was it the Koh-i nūr?*, in *Imperial and Asiatic Quarterly Review* (April 1899); Yule and Burnell, *Hobson-Jobson*, ed. W. Crooke, London 1903, 491, s.v. *Kohinor*. (T. W. Arnold)

AL-**KŪHĪ** [see Suppl.]

AL-**KŪHIN**, name of a certain number of Moroccan families, of Jewish origin but converts to Islam. One of the best-known of them is the family to which belonged Abū Muḥammad ʿAbd al-Ḳādir b. Aḥmad, who towards the end of the 12th/18th century pursued religious studies under the direction of such famous scholars as Ibn al-Ḥādjdj [*q.v.*], Ḥamdūn, Ibn Sūda [*q.v.*], Aḥmad and Ibn Kīrān [*q.v.* in Suppl.]. Being an immediate disciple of Mawlāy al-ʿArbī al-Darḳāwī [see DARḲĀWA], he joined the religious order which the latter had recently founded. He made his first pilgrimage, and wrote about this in a *Riḥla* apparently lost, then finally settled in Medina where he died in Ṣafar 1254/April-May 1838.

Al-Kūhin left behind a *Fahrasa* [*q.v.*] called *Imdād dhawī 'l-istiʿdād ilā maʿālim al-riwāya wa 'l-isnād* (Ms. Rabat, 514, ff. 1-20), two commentaries on al-Bukhārī, *Minaḥ ilāhiyya wa-mawāhib ikhtiṣāṣiyya ʿalā 'l-Djāmiʿ al-Ṣaḥīḥ* (Ms. Rabat, 34) and *Nawāfiḥ al-ward wa 'l-ʿanbar wa 'l-misk al-wārī li-sharḥ ākhir tardjamat Ṣaḥīḥ al-Bukhārī* (Ms. Rabat, 892 D), and finally, a *Munyat al-faḳīr al-mutadjarrid wa-samīr al-munīr al-munfarid*, a selective gloss on the *Sharḥ al-Ādjurrūmiyya* of Ibn ʿAdjība [*q.v.*], printed at Istanbul in 1315: "purely grammatical explanations are set aside, and only the allusive character is kept, in which the grammar is used to illustrate the process of the manifestation of divine light" (J.-L. Michon, 282, cf. 115-19, where two passages from this work are translated).

One of this mystic's descendants, Ḥasan b. Muḥammad b. Ḳāsim b. Aḥmad b. ʿAbd al-Ḳādir (b. 1915 in Cairo) is the author of the *Kitāb Ṭabakāt al-Shādhiliyya al-kubrā*, published at Cairo in 1347/1938-8).

Bibliography: Kattānī, *Salwat al-anfās*, lith. Fās 1316, ii, 169-70; ʿAbd al-Ḥayy al-Kattānī, *Fihris al-fahāris*, Fās 1346-7/1937-8, i, 368-71; R. Michon, *Ibn ʿAjība et son Miʿrāj*, Paris 1973, index. (ED.)

ĶŪHISTĀN (P.) or **ĶUHISTĀN** is the arabicised form of the Persian name Kūhistān meaning a mountainous country (derived from *kūh*, "mountain" with the sufix *-istān*) and corresponds to the Arabic designation al-Djibāl. As the Iranian plateau is very mountainous, we find many more or less extensive areas in it to which the name Ķūhistān has been given, as Yāḳūt has already remarked (iv, 204). Many of these names have disappeared in course of time. Thus Ḳazwīnī (ed. Wüstenfeld, 228) says that the term Ķūhistān is used for Media, which other geographers always call al-Djibāl. In the *Shāh-nāma* of Firdawsī we even find Ķūhistān used as the old name of Mā warāʾ al-Nahr (ed. Vullers, 531) but this is probably a case of erroneous identification made by Firdawsī himself (cf. also Vullers, *Lexicon*, s.v. *Kūh*).

The principal districts that are or have been called Ķūhistān are as follows:

1. Ķūhistān-i Khurāsān. This is the mountainous and partially arable region which stretches south of Nīshāpūr as far as Sīstān in the south-east. It is surrounded on all sides by the great salt desert of the Central Iranian plateau and consists of scattered groups of oases; one feature of its geographical unity is the fact that no part of it belongs to one of the great centres of civilisation that surround it. These are in the north Nīshāpūr, in the north-east Herāt, in the south-east Sīstān, in the south-west Kirmān with Yazd, and in the west Media. Although Ķūhistān has always been connected with these by caravan routes and is therefore not absolutely cut off, its isolated position, combined with the relatively low productivity of the soil, has caused it to be little-known and neglected and its inhabitants have usually been ruled by a member of independent lords. If it has been reckoned a district of Khurāsān, this is only because Nīshāpūr and Herāt are relatively the nearest places to it. Ķūhistān has therefore never been a very clear-cut geographical term; a modern traveller like Curzon, although he describes the different districts, does not even mention its name.

The orography of Ķūhistān is still little known. The mountain chains which in the north run more east to west, assume the direction N.W.-S.E. as one moves southwards. These chains, which have passes rising to over 3,000 feet, enclose cultivated areas of which the principal are, beginning in the north: Turshīz and Turbat-i Ḥaydarī [*q.v.*], now called Turbat-i Shaykh Isḥāḳ, and to the east Djām; next comes the district of Djunābād (formerly Yunābid) and more to the east, that of Khwāf [*q.v.*] with the old town of Zawzan; then comes Tūn, with the district of Ṭabas on the west of it, which later extends so far to the west that in the Middle Ages it was not included in Ķūhistān; next come to the south of these, Ḳāʾin and Bīrdjand, to the south of which there are no more oases of any importance until we reach Sīstān by the Nih route. The rivers of the region are of little importance; irrigation is done by canals and *ḳanāts*; Muḳaddasī, (322, reading of the Istanbul ms.) says that the only running stream he knows in Ķūhistān is near Ṭabas; the latter is also the only town which he includes, with the neighbouring district of Kurī, in the *djurūm* or warm regions.

It is probable that various places in Ķūhistān have a history going back to pre-Islamic times, but so far we have no information on this period. To realise this, it is sufficient to glance at the second map given by Herfeld in his article *Khorasan: Denkmalsgeographische Studien zur Kulturgeschichte des Islams in Iran*, in *Isl.*, xi (1921), 107-74. The journey of this writer in 1925 confirmed his first impression. Moses of Chorene does not mention this region in his *Geography*. In the period of the early Arab conquests, we find Ķūhistān under the rule of the Hephthalites. Historians say that it was first conquered in the caliphate of ʿUmar by ʿAbd Allāh b. Budayl al-Khuzāʿī; the latter setting out for Kirmān took al-Ṭabasayn—it is by this dual (for Ṭabas and Kurīn, according to al-Balādhurī) that the Arabs always refer to the district of Ṭabas—later called the "two gates of Khurāsān" (Ṭabarī, i, 2704); a deputation of the inhabitants is said to have concluded a treaty with ʿUmar (Balādhurī, 403). In 31/653, when Ibn ʿĀmir undertook the conquest of Khurāsān, his advance guard under al-Aḥnaf passed through Ķūhistān and defeated the Hephthalites there (Ṭabarī, i, 2885, and Balādhurī, 403, who give other traditions also). In the years following, Ķūhistān was the centre of a great national revolt under a chief called Ḳārin (a village in Ķūhistān still bears this name), a rising which was put down by Ibn Khāzim (Ṭabarī, i, 2905; Marquart, *Ērānšahr*, 135). In 51/671 it was again necessary to reconquer it; this was done by al-Rabīʿ b. Ziyād from "the Turks" or rather Hephthalites (Ṭabarī, ii, 156). Henceforth Ķūhistān formed from the administrative point of view a part of Khurāsān, and more particularly of the provinces which the Arab geographers still call by the old name of Abarshahr with its capital Nīshāpūr (cf. particularly Yaʿḳūbī, *Buldān*, 278, tr. Wiet, 84, who gives a rather limited definition to Ķūhistān, for he mentions al-Ṭabasayn, Djām and Zawzan separately). These remote districts became in the early centuries of Islam the principal refuge of Zoroastrians driven from their homes by the new religion (cf. particularly, Inostrantsev's work quoted in the Bibliography). In the 3rd/9th century the province was under the rule of the Ṭāhirids (Ibn Khurradādhbih, 35) and later of the Ṣaffārids. The Arab geographers of the 3rd-4th/9th-10th centuries know it very well. In this period Ḳāʾin was the capital and the commercial centre of

Ḳūhistān, especially for through trade between Kirmān and Khurāsān. The province was further noted for a very fine linen woven there, which Abū Nuwās mentions under the name *Ḳūhiyya* (cf. Djāḥiẓ, *Bayān*, Cairo 1332, i, 79, and R. B. Serjeant, *Islamic textiles, material for a history up to the Mongol conquest*, Beirut 1972, 95-6); this industry flourished at Tūn in particular. Prayer-carpets also were made there. In the year 444/1052, Nāṣir-i Khusrāw passed through Ḳūhistān, going from Iṣfahān. He went by Ṭabas, Tūn, Ḳā'in and Sarakhs and describes them as large flourishing towns. In the time of the Saldjūḳs, Ḳūhistān, the old asylum of the Zoroastrians, became a refuge for the Ismāʿīlī heretics, who for this reason were often called *al-malāḥida al-ḳūhiyya*. They built here strongholds on the model of the famous citadel of Alamut; there are still many ruins of these castles which have not yet been fully examined (Herzfeld, *Reisebericht*, 273; M. G. S. Hodgson, *The order of Assasins*, The Hague 1955, index; B. Lewis, *The Assasins, a radical sect in Islam*, London 1967, 44-5; P. R. E. Willey, *The Assassins in Quhistan*, in *Jnal. Royal Central Asiatic Soc.*, lv [1968], 180-3). The Khwārizmshāhs had on several occasions to send military expeditions to punish the *malāḥida* (cf. e.g. Djuwaynī, *Ta'rīkh-i Djihān-Gushā*, ii, 47, 49). The coming of the Mongols, who exterminated the Ismāʿīlīs, at the same time brought about the ruin of Ḳūhistān. The region lost all importance and the geographers—like Abu 'l-Fidā'—only quote their predecessors of several centuries before. It is improbable that this is the district referred to by Marco Polo under the name of Tunocain, which Le Strange, *Lands*, 352 proposes to identify as Tūn-u Ḳā'in. During the following centuries the region must have very often been in a state of anarchy (cf. Idrīsī, tr. Jaubert, i, 430) when power was in the hands of chiefs of Arab origin. The Ṣafawids exercised some authority there, but after them, power lay in the hands of the *amīrs* of Ṭabas and of Ḳā'in. At this time, Ḳūhistān inclined towards Afghānistān rather than Persia, until the Ḳādjārs succeeded in bringing it under their sway towards the middle of the 19th century. The chiefs of the ruling families kept their positions as governors for the Shāh and received pompous titles from the Persian court. About 1900 the *amīrs* of Ḳā'in no longer lived in this town but in Bīrdjand; they claim descent from the Arab tribe of Khuzayma. Some members of this family also ruled Sīstān. The rulers of Ṭabas also governed at this time the district of Djunābād (chief town Djunayn).

The settled population of Ḳūhistān is of a very ancient stock; their houses are also of a very archaic type. Their dialect seems to offer few pecularities. Ivanov distinguishes in Ḳūhistān the dialect groups of Turshīz and Djunābād and that of Ḳā'in, Tūn and Bīrdjand. Many villages around Ḳā'in and Bīrdjand are inhabited exclusively by *sayyids*. In some places we also find descendants of the Ismāʿīlīs, who recognise the authority of the Agha Khān, e.g. at Ḳā'in and Bīrdjand. There are also small colonies of Bahā'īs, while the Sunnī Afghān element is relatively strong. The nomads are for the most part Arab Sunnīs, still speaking Arabic; they live along the main routes, and include the Khuzayma, from whom came the *amīrs* of Ḳā'in. A few Turkish tribes are found only in the north as far as Turbat-i Ḥaydarī. Finally, in the south there are Balūčīs, who move in summer towards Sīstān.

Ḳūhistān has never in its history contained any major urban centres comparable to those of northern and eastern Khurāsān; when Sykes was there in 1900, Ḳā'in had only *ca.* 4,000 inhabitants. This may be one reason why the region (with the exception of the more northerly part, around Zawzan, see KHWĀF) did not in earlier times produce such an abundance of *ʿulamā'* and scholars as the other cities of Khurāsān. However, Storey, *Persian literature*, i, 923, mentions a modern *Tadhkira-yi shuʿarā'-i Ḳā'ināt* by one Ḍiyā' al-Dīn Ḳā'inātī on some poets of Ḳā'ināt and Bīrdjand, and in mediaeval times we find Thaʿālibī mentioning poets with the *nisba* of "al-Ḳā'inī", e.g. the Abū Manṣūr Ḳāsim b. Ibrāhīm al-Ḳā'inī in *Tatimmat al-yatīma*, ed. Eghbal, ii, 45. Bīrdhand has in recent times been the most important town, even though it lies in a less fertile situation than the smaller Ḳā'in. Administratively, much of Ḳūhistān falls today within the *shahrastān* of Bīrdjand, in the 9th *ustān* or province of Khurāsān, and within this *shahrastān* or district there is *bakhsh* or sub-district of the same name (pop. in 1950, 43,4009) and a further *bakhsh* of Ḳā'in (pop. in 1950, 65,000). The products of the region include some cereals, such as wheat and barley, opium, silk and saffron, and there is carpet-weaving and camel-raising.

Melville, *The seismicity of Kuhistan, Iran*, in *Geogr. Jnal.*, cxliii/2 (1977), 179-99. See also KHWĀF, ṬABAS and TURSHĪZ.

2. The Arab geographers appear to have known two towns of the name Ḳūhistān in the province of Kirmān. One of them was called Ḳūhistān Abī Ghānim and was in the district of Djīruft, between this town and the Djabal al-Ḳufs (Muḳaddasī, 52, 461, 467; *Ḥudūd al-ʿālam*, tr. 65, 124, comm. 374-5; Yāḳūt, iv, 206; Le Strange, 318). The other Ḳūhistān was situated on the road from Sīrdjān to Bām, 6 *farsakh*s from the former town (Ibn Khuradādhbih, 66; Ḳudāma, 196; Muḳaddasī, 473; Le Strange, 311).

3. Ḳūhistān of Kābul in Afghānistān is a district to the north-east of the town of Kābul and includes the districts of Pandjshīr, Nidjzan, Tagan, etc. The population is composed of an element called Tādjiks,

who speak Persian and Pas̲h̲tō, and other elements called Ķūhistānī who speak Pas̲h̲aʾi (a Dardic dialect, see DARDIC and KĀFIR LANGUAGES) and Parāči (Iranian) (cf. *Imperial gazetteer of India*, xiv, 241).

4. The northern part of the native state of Swāt in the north-west of India is also called Ķūhistān. It is the mountainous region around the upper course of the river Swāt; it stretches eastwards as far as the Indus and westwards as far as Pand̲j̲kora so that a distinction is sometimes made between Ķūhistān of Swāt and Ķūhistān of Pand̲j̲ora. The people of the valleys (estimated to number 20,000) have suffered since the 9th/15th century from Afg̲h̲ān invasions. Under the rule of the Afg̲h̲āns they became very zealous Sunnī Muslims; the religious chiefs (*āk̲h̲und*) have had an enormous influence in the country. Another consequence of the Afg̲h̲ān invasions has been the expansion of Pas̲h̲tō all over the country. This language has gained ground at the expense of the old local dialects. The latter—to which the general name of Ķūhistānī is given—are very numerous and belong to the Dardic group which, according to the researchs of Morgenstierne, seems to belong to the Indian group of dialects. The principal dialects are: Gārwī (Swāt Kūh.), Tōrwālī (Swāt and Pand̲j̲kora Kūḥ.) and Mayyā (Indus Kūh.).

Bibliography: Biddulph, *Tribes of the Hindoo koosh*, Calcutta 1880; *Imperial Gazetteer of India*, xxiii, 183 ff. On the languages, see Grierson, *Linguistic survey of India*, viii/2, 507; G. Morgenstierne. *Report on a linguistic mission to Afghanistan*, Oslo 1926, *Institutet for sammenlignende Kulturforskning*, series C, 1-2; idem, in DARDIC and KĀFIR LANGUAGES.

5. Lastly, Ķūhistān is the name of a barren and mountainous region in the eastern part of the district of Karāčī. The population in 1901 was estimated at 12,877 (*Imperial gazetteer of India*, xv, 353). (J. H. KRAMERS*)

AL-**KUḤL**, traditionally translated as antimony sulphide (stibnite), is synonymous in the Arabic and Persian geographical sources with *it̲h̲mid* and *surma*. Its primary source was Iran, where the following places were noted for its production: in K̲h̲urāsān, Ṭūs (*Ḥudūd al-ʿālam*, ed. M. Sutūda, tr. and comm. V. Minorsky, § 23.11—*surma*), and Gūzgān (*Hudūd a-ʿālam*, § 23.51—*sang-i surma*); in Māzandarān, Sāmār near Sārī (*Ḥudūd al-ʿālam*, § 32.23—*surma*) and Ṭabaristān (Ibn Isfandiyār, *Taʾrīk̲h̲-i Ṭabaristān*, tr. E. G. Browne, 33—*surma*); and in D̲j̲ibāl province, Mt. Damāvand (Abū Dulaf, *al-Risāla al-t̲h̲āniyya*, ed. V. Minorsky, § 51—*kuḥl*) and Iṣfahān (Ibn Rusta, *al-Aʿlāḳ al-nafīsa*, 156—*it̲h̲mid*; al-Iṣṭakhrī, *Masālik al-mamālik*, 203; Ibn Ḥawḳal, *Ṣūrat al-arḍ*, ed. Kramers, 372; al-Muḳaddasī, *Aḥsan al-taḳāsīm*, 397; al-T̲h̲aʿālibī, *Laṭāʾif al-maʿārif*, ed. de Jong 110, tr. Bosworth, *The Book of curious and entertaining information*, Edinburgh 1968, 128; al-D̲j̲āḥiẓ, *al-Tabaṣṣur bi 'l-tid̲j̲āra*, ed. Ḥ. Ḥ. ʿAbd al-Wahhāb, in *RAAD*, xii (1932), 345—*kuhl*; al-Ḳazwīnī, *ʿAd̲j̲āʾib al-mak̲h̲lūḳāt*, ed. Wüstenfeld, ii, 210—*it̲h̲mid*). Modern geological surveys record only three sources of antimony in Iran—at Patyār (7 miles east of Anārak), at Turkmanī (25 miles south-east of Anārak), and at S̲h̲ūrāb (100 miles north-west of Bird̲j̲and) (G. Ladame, *Les ressources métallifères de l'Iran*, in *Schweizerische mineralogische und petrographische Mitteilungen*, xxv [1945], 189-91; J. V. Harrison, in *Cambridge history of Iran*, i, Cambridge 1968, 512-13, fig. 119). None of these, it should be noted, are near the sites listed above.

A study of the words *al-kuḥl*, *surma* and *it̲h̲mid* indicates that the substance was in fact only rarely antimony sulphide. *Al-kuḥl* was used in two different ways in mediaeval Arabic and Persian texts. First of all, it was used as a general term for any eye cosmetic. Such eye cosmetics were prepared from numerous different substances and would have had quite different colorations, as is made clear for example in the *Lapidary* of Pseudo-Aristotle (ed. J. Ruska, *Das Steinbuch des Aristoteles*, §§ 11, 12, 52) where turquoise, lapis lazuli and *tūtiyā* (zinc oxide) are mentioned as ingredients of *akḥāl*, and al-Ḳazwīnī and al-Dimas̲h̲ḳī also note a variety of stones and other substances which could be included (e.g. al-Ḳazwīnī, ii, 229-34). The word *kuḥl* was still used in this way in the last century—for example, Sanguinetti (*Quelques chapitres de médicine et de la thérapeutique arabe*, in *JA* [1866], 320-1) gives the constituents of three types of *kuḥl*—*kuḥl ag̲h̲bar*, *kuḥl aṣfar* and *kuḥl ʿazīz*, the latter being composed of eleven different substances.

Al-kuḥl was also used, however, to indicate a particular substance, as for example when al-Iṣṭakhrī records a mine of *al-kuḥl* at Iṣfahān, and an interesting story in this connection is related by al-T̲h̲aʿālibī (*loc. cit.*). He writes that al-Ḥad̲j̲d̲j̲ād̲j̲ is reported to have given one of his special followers the provincial governorship of Iṣfahān with the words, "I make you governor of the area of which the stone is *al-kuḥl*", and adds that Iṣfahān was talked of in these terms because the *kuḥl* stone there was of such excellent quality. *Al-kuḥl* in these instances was something more specific than eye cosmetics in general, i.e. it was a particular substance, mineral or metal.

The equating of *al-kuḥl* in this latter sense with *it̲h̲mid* and *surma* is evident from such passages as al-Ḳazwīnī, i, 210, and Abu 'l-Ḳāsim Kās̲h̲ānī, *ʿArāʾis al-d̲j̲awāhir wa-nafāʾis al-aṭāyib*, Tehran 1345/1966, 189, and the sources are unanimous in associating the substance with lead. This is the evidence of Pseudo-Aristotle, § 51 and al-Hamdānī, *Kitāb al-D̲j̲awharatayn al-ʿatīḳatayn*, ed. C. Toll, fols. 21a, 23a, the latter identifying *it̲h̲mid* with the ore from which silver came i.e. lead ore. Al-Hamdānī, it should be noted, had a great deal of first-hand experience of metallurgy. Equally confirmatory is the evidence of al-K̲h̲ʷārazmī, ed. E. Wiedemann, *Beiträge*, xxiv, in *SPMSE* (1911), 93, and Kās̲h̲ānī, 190, 344. It therefore seems reasonable to assert that the *kuḥl* mined at Iṣfahān was a lead mineral (Ibn Rusta, 157, says that Iṣfahān produced lead as well as *it̲h̲mid*), and to suggest that where *kuḥl* in the literary sources indicates a naturally-occurring substance as opposed to an artificially-made compound, it almost certainly refers to a lead mineral too. In this connection it should be noted that while it had generally been assumed that eye-paint in ancient Egypt had an antimony base, A. Lucas (*Ancient Egyptian materials and industries*, revised by J. R. Harris, 1962, 195-9) showed by analysis that it in fact consisted of galena, pyrolusite, brown ochre or malachite, and only in one instance, of antimony sulphide.

As a cosmetic, *al-kuḥl* was ground as fine as possible and then used by women to dye their eyebrows and eyelashes or the edges of the lids. The cosmetic was applied by means of a small probe or stick with a rounded end called a *mirwad*, and was kept in a small vessel called a *mukḥula* (E. W. Lane, *Manners and customs of the modern Egyptians*, 1954, 37-8); in mediaeval times, the sticks were commonly

of bronze and the vessels of glass, and a special object known in Khurāsān as *wasma-djūsh* was used for grinding the substance and pouring it into the narrow-necked vessels (for such an object, see G. Fehérvári, *Islamic metalwork in the Keir collection*, London 1976, no. 18, and numerous similar pieces elsewhere).

Al-kuḥl also had a specifically medical function as an eye unguent, particulars of which are to be found in Ibn al-Bayṭār and other such writers. From this function comes the idea of *al-kaḥḥāl*, ophthalmist [see ʿAYN].

Al-kuḥl is also the origin of our word alcohol. From a fine powder used to stain the eyelids, it came by extension to mean any fine impalpable powder produced by trituration or sublimation, and hence was applied to fluids of the idea of sublimation—an essence, quintessence or "spirit" obtained by distillation or rectification. Sublimation and the distillation of drugs was known to Khalaf b. ʿAbbās al-Zahrawī (Abulcasis) in the late 4th/10th century, but the more complicated process needed for the production of alcohol was probably introduced into the Islamic world from Europe, where it was first discovered in the 12th century. (For a description of the preparation of arak in 10th/16th century Mughal India, see Abu 'l-Faḍl ʿAllamī, *ʿĀʾin-i Akbari*, tr. H. Blochmann and H. S. Jarrett, Calcutta 1893, i, 69).

Bibliography: the continued publication of previously unknown scientific or semi-scientific texts such as those of al-Hamdānī and Abu 'l-Ḳāsim Kāshānī means that the works cited in the article on *al-kuḥl* in *EI*[1] have become outdated, but no detailed work on *al-kuḥl* has since been published. The reader is referred to E. O. Lippmann, *Entstehung und Ausbreitung der Alchemie*, Berlin 1919, and to the works of Wiedemann, *Beiträge* xxiv, 93, 99; xxv, 218-9; xl, 176, 186, in *SPMSE*, 1911, 1914, and H. E. Stapleton, *Chemistry in ʿIrāq and Persia in the tenth century*, in *Memoirs of the Asiatic Society in Bengal*, viii, no. 6, 352, 372; but is advisable to read them in conjunction with all the information now available in the Arabic or Persian texts cited above. Additional information is to be found in other geographical texts, in works on pharmacology, and in semi-scientific texts such as Naṣīr al-Dīn Ṭūsī, *Tansūkh-nāma-yi Īlkhānī*, Tehran 1348/1969. Much material is also to be found in *WKAS*, i, 73 f.

(E. WIEDEMANN - [J. W. ALLAN])

ḲUHRŪD, Arabic form of Persian Kōh-rūd "mountain river", a village in western Persia on the summer caravan route between Ḳāshān and Iṣfahān [*q.vv.*]. In mediaeval times it fell within the province of Djibāl, and Ḥamd Allāh Mustawfī, *Nuzhat al-ḳulūb*, tr. 184, places it some 8 *farsakhs* from Ḳāshān, sc. 27 miles/45 km. from the latter town; cf. also Schwarz, *Iran im Mittelalter*, 929 n. 16. Today, Ḳuhrūd falls administratively in the *bakhsh* of Ḳamṣar, in the *shahrastān* of Ḳāshān, in the second *ustān* or central province of Iran, see *Farhang-i djughrāfiyāʾ-yi Īrān*, iii, 218-19. It lies in the mountains on the slopes of a cultivated valley, and the agreeableness of its climate in summer has been commented upon by numerous European travellers, from Chardin onwards, who have passed through it. E. G. Browne was there in 1888 and collected specimens of the distinctive dialect of the Ḳuhrūd-Naṭanz district, see his *A year amongst the Persians*, Cambridge 1926, 203-8.

Ḳuhrūd is apparently unmentioned by the earlier Arab and Persian geographers, until Mustawfī (8th/14th century) comments upon it and upon the fact that the river of Ḳuhrūd supplied Ḳāshān with some of its water (*op. cit.*, tr. 72); this river was dammed in Ṣafawid times by the Band-i Ḳuhrūd in order to assure a supply for Ḳāshān during the summer months, see Browne, *op. cit.*, 202-3. Its monuments comprise a Ṣafawid caravanserai and two 8th/14th century mosques, one apparently the Shīʿī mosque and the other possibly that of the Sunnī villagers; for these, see O. Watson, *The Masjid-i ʿAlī, Quhrūd: an architectural and epigraphic survey*, in *Iran. Jnal. of the British Inst. of Persian Studies*, xii (1975), 59-74. The mountains of the Ḳuhrūd district produce lead and cobalt, and the village may accordingly have had connections with the great ceramics centre of Ḳāshān; see Hans Wulff, *The traditional crafts of Persia*, Cambridge, Mass. 1966, 163.

Bibliography: given in the article.

(C. E. BOSWORTH)

KŪKAWA, or **KŪKA**, capital of Bornū [*q.v.*] for much of the 19th century, situated at 12° 55′ N. and 13° 30′ E. It was founded about 1814 by al-Ḥādjdj Muḥammad al-Amīn b. Muḥammad al-Kānimī [see AL-KĀNEMĪ], better known as Shaykh, or Shehu, al-Kānimī. He was a Kanembu *mallam* [*q.v.*], who had established himself at Ngala, south of Lake Chad. In 1808 or 1809 Fulani forces, linked with the *djihād* of Usuman dan Fodio [*q.v.*], occupied and ravaged Birni Gazargamu [*q.v.*], then the capital of Bornū. The Bornū ruler, or *mai* [*q.v.*], called upon al-Kānimī's help. The city changed hands several times but, although eventually the Fulani were conclusively expelled, Gazargamu never became the capital again. Mai Dunama wandered about, earning the derisive title "*mai* of the calabash" (a significant item of luggage) for his much travelling. Al-Kānimī received the fief of Ngornu, northwest of Ngala but still far from Gazargamu, for services rendered. Dunama was deposed by his uncle, Muḥammad Ngileruma, who established a new capital, Birni Kafela, very near Ngornu. About 1813 al-Kānimī's power had so much grown that he was able to depose Muḥammad, and to reinstate Dunama, keeping however Kafela as the *mai*'s official capital. With Gazargamu abandoned, Kafela very much in the shadow of al-Kānimī, and al-Kānimī himself somewhat at odds with local leaders in his own fief of Ngornu, there was no obvious centre of power in Bornū. About 1814 al-Kānimī decided to leave Ngornu, and built a new town, Kūka, again somewhat to the northwest, nine miles from Lake Chad. The name comes from the Kanūri [*q.v.*] word for baobab (*Adansonia digitata*) tree, one of which was growing on or near the site of al-Kānimī's own future dwelling.

For the next thirty years, an uneasy balance existed between the legitimate dynasty at Kafela, and the *shehu*'s one at Kūka. In 1817 (Barth) or 1820 (Brenner) a Bagirmi [*q.v.*] force invaded Bornū, intending to oust al-Kānimī and restore to the *mai* his traditional powers; the plan failed and the *mai* was killed. Schultze (p. 257) mentions a sack of Kūka by the invaders at this time, but this is not confirmed in other sources. Al-Kānimī struck his own seal, dated 1819-20, but still continued to preserve a figurehead *mai*. Al-Kānimī died in 1837; the hitherto generally accepted date, 1835, seems almost certainly disproved by manuscript evidence. He was succeeded by his son ʿUmar [*q.v.*], under whom Kūka continued to become increasingly the seat of all real power. In 1846 Wadai [*q.v.*] was invaded,

with the intention of removing Shehu ʿUmar and re-establishing the *mai*. Kūka was partially destroyed, and for two months lay almost a desert; but again the plan miscarried. The *mai* was executed; after his son was killed in battle some months later, no new *mai* was appointed, ʿUmar openly asserting that sovereignty which he and his father had long enjoyed in fact. Kūka was now the official, as well as the actual, capital of Borno.

As, in the period after 1814, power came more and more to centre upon Kūka, the essential pattern of government—in essence, through fiefs ruled by courtiers—did not change, although there was greater centralisation than in the old days at Gazargamu. The Kūka court was characterised by relative informality, lack of splendour, and a certain religious simplicity, in contrast to the elaborate, and increasingly hollow, ceremonial at Kafela. Yūsuf b. ʿAbd al-Ḳādir, son of a former imam at Gazargamu, was appointed *imām* of the Kūka mosque, and presided over all religious festivals. Minor legal matters, such as divorce and inheritance, were handled by *ḳāḍīs* appointed by al-Kānimī; serious crimes and capital cases were referred to al-Kānimī himself, and his six principal companions. After 1846, ceremonial tended to increase, and the number of courtiers and noblemen grew larger. With the challenge from Kafela removed, and with an ever-larger number of people competing for wealth and rewards which were no longer expanding sufficiently rapidly, divisive forces appeared within Kūka itself; ʿUmar, a pious and aimable man, was also irresolute and weak, unable to maintain his father's firm control of the city and the state.

After the Wadai sack in 1846, Kūka was rebuilt, but a new town was added to the east, and into this quarter the political leaders moved. The *shehu*'s main palace was in the east town, although that in the west town was refurbished, and the *shehu* visited it from time to time, particularly at religious festivals. The west town, i.e. the original Kūka, became the residential area of non-titled families, and foreign merchants; it had the larger population. Each town was walled separately. (Kūkawa is a plural form: there were in fact two Kūka towns). The wall of the eastern town, in 1870, was crenellated, about 20 feet high, made of clay and gravel, with terraces on the inner side; during the rains, the upper and thinner part of the wall began to disintegrate, and goats grazed on the terraces. The space between the two towns was almost as densely built up as the towns themselves, and there were in addition many huts, farms and hamlets round about. Nachtigal, who arrived on 6 July 1870, estimated the double town as about 2 1/4 miles long and 1 mile broad. A *dendal*, or promenade (Barth called it "this high road of ambition"), a standard feature of Kanūri towns but here on a much extended scale, started at the west gate of the west town, and ran straight on, across the intervening space, and two-thirds of the way through the east town, until it came to the *shehu*'s main palace, which was distinguished by an upper storey and some towerlike elevations. Before the palace, a little to the north, a low minaret overlooked the boundary wall of a complex of houses and huts, identifying them as a mosque. The usual dwelling consisted of a considerable area, in which were huts of thatch, and cubical earthen buildings usually of one room; as much as three-quarters of the total area might be of courtyards and unroofed enclosures, including gardens and stable yards. The general architectural appearance of the city was dispiriting; the outer walls, at a distance, could hardly be distinguished from the surrounding ground, whilst within, the roads and paths were generally lined by the windowless walls of adjoining compounds. Some trees, and an unusually abundant bird life, refreshed the eye of the visitor.

Daily markets were held in various parts of Kūkawa, but the main market took place on Mondays, outside the westernmost gate. Although this was often very crowded, and shopping there difficult because of the press of customers, the people were generally orderly. Among the goods offered for sale were livestock (camels, horses (both riding and draft), cattle, donkeys, goats, sheep and fowls), cloth and clothing of all kinds, foodstuffs (various grains and meats, honey, milk, butter, dried fish, vegetables, fruit, natron), cooking and eating utensils, leather goods, basketware, carpentry and metalwork, weapons, even boats, firewood, fodder, charcoal, building materials (mats, poles, etc.), rope, and other commodities. Slaves formed an important element in market transactions, with prices for a *sedasi* (a boy measuring six spans from the ankle to the top of the head, aged 12 to 15) indicating the general tone of the slave market. Special slaves, such as eunuchs, dwarfs, deaf-mutes and concubines, were generally sold privately, as were the best quality horses, and not on the open market. Major imports from Europe and North Africa about 1870 were coins (both cheap and of luxury quality), women's ornaments, rosaries, aromatics, tarbushes, paper, guns, swords and sabres (although weapons were also manufactured locally), chain mail, needles, scissors, knives and razors; principal exports northwards were slaves, ivory and ostrich feathers. Barth in 1851 was very critical of the lack of local industry in Kūkawa; there seems to have been a considerable improvement by the early 1870s, when also a greater variety of goods is reported on the market, and the use of currency (cowries, strips of cloth, Maria Theresa dollars) seems to have won a wider acceptance. Trade with North Africa was at this time being inconvenienced by the extreme unreliability, in any commercial contracts, of most of the Kūkawa nobility. Kūkawa did not profit much from modern trade patterns developing to the south. In 1891 Charles MacIntosh, of the Royal Niger Company, visited the city in search of a trade treaty, but the North African community there persuaded the Shehu, Hāshim b. ʿUmar, to refuse his presents and send him away.

The population of Kūkawa was probably about 60,000 during its heyday. There were a considerable number of Ḳurʾānic scholars and teachers, and many blind beggars; *shurafāʾ* came from Morocco and the *ḥaramayn*, pious men from Egypt and Tunis, Timbuktu and Senegal, pilgrims from the western Sahara and the Hausa and Fulani countries, all more or less attracted by the reputation for open-handed generosity which Shehu ʿUmar in particular enjoyed.

The downfall of Kūkawa was at the hand of Rābiḥ [*q.v.*], a man of eastern Sudanese origin. Probably early in 1893, although precise dating of these events is extremely difficult, Rābiḥ and his army, moving westwards, occupied Logone, a vassal state under Bornū. In two battles, at Amja and Legarwa, the Bornū forces vainly tried to defeat Rābiḥ; after the second defeat, organised Bornū resistance collapsed. Shehu Hāshim had been present at the second battle, though taking no active part; he fled to Kūkawa, and abandoned it within a few days, at Rābiḥ's approach. Rābiḥ occupied the town, sometime in 1893, without a struggle. What hap-

pened next is uncertain; some authorities report the ruthless pillaging of the capital, with several thousands of people killed or captured, while others argue that the violence was much more restrained. Certainly an immense booty was captured. Readings from the Ķur'ān were among the festivities celebrating the victory. Shortly after the conquest, Rābiḥ decided to move the capital to Dikwa, an older town of strategic importance, where water supplies were better and grain more accessible. Kūkawa was partly demolished, and everything which could not be carried away was burnt. Only the tombs of the Shehus, where Rābiḥ himself had prayed, were respected.

In 1902, the British installed Bukar Garbai, a grandson of ʿUmar, as Shehu, first at Mongonu 17 miles south of Kūkawa, but with the explicit intention of reoccupying Kūkawa. Attempts to revitalise the desolate capital failed, and at the end of 1906 both the British administration and the traditional Bornū administration were definitively established at Maiduguri. In 1922 Kūkawa was reported to be no more than a mass of ruins, and a small hamlet. By 1975 it had so far recovered as to be a thriving little town, and an administrative District Headquarters. The graves of al-Kānimī, ʿUmar, and their two immediate successors are still revered, and a baobab tree, said to replace the one from which the town first took its name, is preserved as an historical monument.

Benton, English edn. first published 1913, reprinted London 1968; L. Brenner, *The shehus of Kukawa: a history of the al-Kanemi dynasty of Bornu*, Oxford 1973. (H. J. Fisher)

ĶUL, an old Turkish word which came, in Islamic times, to mean "slave boy, male slave", defined by Maḥmūd Kās͟hg͟harī, *Dīwān lug͟hāt al-Turk*, ed. Kilisli Rifʿat Bilge, i, 282, tr. Atalay, i, 336-7, as *ʿabd*. However, the original meaning of *ķul* in Orkhon Turkish was rather "servant, vassal, dependent" (the masculine counterpart of *kün* "female servant, etc.", the two words being linked in the Kültegin inscription, text references in Talât Tekin, *A grammar of Orkhon Turkish*, Bloomington, Ind. 1968, 347), since slavery in the Islamic juridical sense did not exist among the ancient Turks.

The word spread through the northern tier of the Islamic world as the Turks became Islamised and entered the Iranian lands and beyond, passing into Persian, Kurdish, Caucasian languages, etc., and used both in a religious sense "slave [of God]" and above all in military contexts, since Turks became so omnipresent as military slaves. Under the Ottomans, *ķullar* became the standard designation for the Janissaries [see YEÑI ČERI], and under the Ottomans and the Persian Ṣafawids alike, the latter with their Turkish, Georgian and other slave troops, we find the title *ķullar ag͟hasī* given to the commander-in-chief of the sovereign's slave forces [see G͟HULĀM, iv and ORDŪ]. An extension of the religious usage of the word may also be seen in such names, common in Ṣafawid Persia and in neighbouring states influenced by it, with *ķul* as a component, e.g. ʿAlī-ķulī, S͟hāh-ķulī, Yazdān-ķulī; see further LAĶAB v.

ĶUL MUṢṬAFĀ, called **ĶAYİKD͟JĪ**, 11th/17th century Turkish folk poet of Janissary origin. His nickname Ķayïkd͟jī ("The Boatman") seems to have originated from his association in his youth with the corsair, later admiral, Turg͟hud Re'īs [*q.v.*] in Algeria. His narrative or epic poems on contemporary important events became very popular in the army and at court, and his fame lies more in these than in his less attractive lyrics. Among his famous narrative poems, the most notable concern the assasination of ʿOt͟hmān II by the Janissaries; S͟hāh ʿAbbās's conquest of Bag͟hdād; Murād IV's siege of Bag͟hdād; the revolt of Abaza Ḥasan Pas͟ha, the governor of Aleppo; and particularly, the epic of Gend͟j ʿOt͟hmān, a young hero who is drowned in the Tigris during the siege of Bag͟hdād. Ķul Muṣṭafā's style and language are in the true tradition of folk poets, and are very little influenced by *dīwān* poetry.

ĶŪLA, a town in western Anatolia, classical Opsicum. It lies on the margin of a fertile plain, a few miles south of the upper course of the Gediz river and to the north of the main Manisa-Uşak road, in lat. 38°33′ north and long. 28°40′ east and at an altitude of 2,140 feet/652 m. it is in a volcanic area (classical Katakekaumene or Combusta), with the extinct volcano Karadevlit north-east of the town; hence many of the houses are built from dark basalt. There are numerous marble remains from classical times, but the citadel, apparently late mediaeval, is ruinous.

Ķūla came within the lands of the Turkmen *beylik* of the Germiyān-og͟hullarī [*q.v.*], and was conquered by Meḥmed Germiyān (*ca.* 741-63/1340-61), and after his son Süleymān S͟hāh Čelebi (*ca.* 765-90/1363-98) had given Kütahya and several others of his towns to the Ottoman Bāyezīd I Yïldïrïm as dowry for his daughter Dewlet K͟hātūn, he himself went to Ķūla to reside and died there. In the *Ṭas͟h wakfiyye* at Kütahya of Yaʿķūb Čelebi b. Süleymān S͟hāh (814/1411), the name of Ķūla is rendered as كولاى. In Ottoman times, Ķūla fell within the *sand͟jaķ* of Ṣaruk͟hān, whose capital was Manīsa [*q.v.*]; Ewliyā Čelebi mentions there 8 quarters, 2,100 households, 24 mosques, 3 baths, 6 caravanserais and 200 shops. In recent times, carpet-weaving has been a significant local craft, and it is now a centre for wine-making. Cuinet (*ca.* 1890) recorded 6,100 inhabitants, of whom 5,655 were Muslims and 345 Greeks, together with 30 mosques and two Greek Orthodox churches. In 1950, Ķūla's population was 8,600, whilst the *kaza* of which it was the chef-lieu had one of 38,242 and

was composed of 62 villages. It is now the chef-lieu of an *ilče* (formerly *kaza*) in the *il* (formerly *vilayet*) of Manisa. In 1975 the population was 10,807.

(C. E. Bosworth)

ḲŪLAM, the name given in mediaeval Arabic geographical and travel literature to the port of Quilon at the southern extremity of the Malabar coast of southwestern peninsular South India, in ancient and modern Kerala (lat. 8° 53′ N. and long. 76°36′ E.).

Quilon early became a centre of the St. Thomas Christians of South India, and is mentioned in a letter of the Nestorian Patriarch Īshūʿyāb of Adiabene (d. 660) to Simon, Metropolitan of Fārs, under the name of Colon and as lacking at that time a settled ministry (Assemanus, *Bibliotheca orientalis*, iii/2, Rome 1728, 437). The first mention of the place in the Islamic sources appears to be that of the *Akhbār al-Ṣīn wa 'l-Hind* [*q.v.* in Suppl.] (237/851), which mentions "Kūlam of Malay" (this latter component being generally written in later Arabic sources, e.g. Ibn Baṭṭūṭa, as "al-Malaybār", yielding the name "Malabar", possibly meaning in the local tongue "hilly coastland"). It describes Kūlam as a fortified point where Chinese junks plying towards Arabia had to pay a transit due of 1,000 *dirhams* per ship to the local ruler (J. Sauvaget, *Relation de la Chine et de l'Inde*, Paris 1948, text § 14, comm. 42-3, 69). Zakariyyāʾ b. Muḥammad al-Ḳazwīnī, in his *Āthār al-bilād* (Beirut 1380/1960, 55, 106), quotes Abū Dulaf al-Khazradjī [*q.v.*], sc. the latter's *First Risāla*, on Kūlam, and he and other sources mention such exports from it to the Islamic world as locally-produced porcelain (which was not, however, as fine and translucent as the genuine Chinese porcelain), pepper, cinnamon, ginger, teak, brazil-wood, indigo, etc. In regard to the important export of pepper, we sometimes find Arabic authors (e.g. Abu 'l-Fidā) referring to the whole Malabar coast as *Bilād al-fulful* "Land of pepper". See on the Arab trade to Kūlam and beyond in general, G. F. Hourani, *Arab seafaring in the Indian Ocean in ancient and early mediaeval times*, Princeton 1951, 70-4.

The Jewish traveller Benjamin of Tudela visited Quilon, as did several western ecclesiastical envoys to the Far East in the Mongol period, such as Odoric or Pordenone (translated in Sir Henry Yule, *Cathay and the way thither*[2], London 1915-16, ii, 129-30) and John of Monte Corvino; the latter mentions that at that time, i.e. the end of the 13th century, the Chinese, Christian and Jewish traders there were being pushed out by the Muslims. Around this time also, Marco Polo visited what he calls Coilum, describing it as an independent city-state (Book iii, ch. 22 = *The book of Ser Marco Polo*, tr. Yule and Cordier, London 1903, ii, 375-82; cf. P. Pelliot, *Notes on Marco Polo*, i, 399-402).

To Ibn Baṭṭūṭa (*Riḥla*, iv, 99-104, cf. Yule, *Cathay and the way thither*, iv, 79) we owe an especially valuable account of Kūlam in the first half of the 8th/14th century, with important information about its Muslim mercantile community. Whilst on his visit there, he stayed in the Ṣūfī *zāwiya* of Shaykh Fakhr al-Dīn Kāzarūnī, whose father was *shaykh* of another *zāwiya* in nearby Calicut/Kalikat [*q.v.* in Suppl.]. The whole body of Muslim merchants was called Ṣūliyyūn (sc. Cholia, a term used in South India to denote either Arab settlers or Muslim converts from the indigenous peoples, see Yule and Burnell, *Hobson-Jobson, a glossary of Anglo-Indian colloquial words and phrases*[2], London 1903, 207, s.v. *Choolia*), and these seem to have been largely composed of traders of Persian Shīʿī origin, the head merchant being ʿAlāʾ al-Dīn al-Āwadjī (i.e. from Āwa [*q.v.*] in northwestern Persia), and the *ḳāḍī* a man from Ḳazwīn. The Muslim community was, Ibn Baṭṭūṭa relates, prosperous and highly-respected. He names the local ruler as Tīrwarī, sc. Tiruvati of the indigenous Venad dynasty, and praises his impartial justice and his tolerance of the Muslims.

From the opening of the 16th century onwards, the history of Quilon is bound up with European economic and political penetration of South India, a process which soon became unfavourable to the earlier Muslim commercial supremacy along the Malabar coast. In December 1500 Pedro Alvarez Cabral was at Cochin, and received friendly delegations from the ruler of Kannanūr [*q.v.*] and from the Queen of Quilon (Portuguese Coilom), both of these potentates being anxious to secure Portuguese help against the powerful Muslim ruler in Calicut, the Zamorin. In 1502 Vasco da Gama made a treaty with the Queen of Quilon, who promised to load two Portuguese ships per year with pepper, and in the next year Albuquerque secured permission to open a factory there. Muslim opposition was strenuous; Portuguese ships were prevented from loading, and 1504 the Portuguese factor at Quilon was killed by them. In 1505 Don Francisco de Almeida was appointed the first Viceroy of All the Indies, and received instructions to erect four fortresses along the Malabar coast, including one at Quilon. In 1516 and 1520, further treaties were made between the ruler of Quilon and the Portuguese aimed at providing the latter with a monopoly of the export of pepper from there.

In 1651 the Dutch captured the fortress of Quilon from the Portuguese, and in 1659 the Dutch East Indian Company made a treaty with the Queen. In December 1661 the Admiral Rijklof van Goens appeared with a fleet at Quilon, since regained by the Portuguese, and occupied the fortress without opposition; he then proceeded in 1662 to reduce the fortresses of Cranganor and Cochin (see, for the whole of this period of the rise and fall of Portuguese influence at Quilon, F. C. Danvers, *The Portuguese in India, being a history of the rise and decline of their eastern empire*, London 1894, i, 88-9, 114, 118, 121, 336-7, ii, 325). But during the 17th century, the Dutch fortress at Quilon decayed from lack of cash and of profit in the trading operations there, and during the period of warfare between the British and the rulers of Mysore, Ḥaydar ʿAlī and Tīpū Sulṭān [*q.vv.*], in the later 18th century, these two rulers having in their expansionist phase extended Muslim political control into Malabar, the Dutch fortress of Cochin, together with its dependencies, including Quilon, surrendered to British troops (October 1795). During the middle years of the 18th century, the principality of Quilon had been absorbed by Travancore, and in British India, Quilon continued to fall within the native state of Travancore. It is now (since 1956) in the component state of Kerala in the Indian Union. According to the *Census of India 1961. vii. Kerala*, Quilon district had in 1961 a total population of 1,941,228 (Hindu 64 %, Christian 25 %, Muslim 11 %), and Quilon municipality alone 91,018 (1901 figure, 15,961).

AL-ĶULAYʿA (A.), "little castle", the diminutive of *al-ķalʿa* [*q.v.*], like this last used, in one way or another, as a place-name.

1. Muslim Spain

Students of the history and geography of Muslim Spain are familiar with *al-ķulayʿa* as the name of a number of small or relatively small places whose importance seems to have lain only or primarily in the military purpose they served. In Spanish Umayyad history it occurs as the name of at least three different places mentioned in connection with raids and campaigns. One was situated in the Asturian kingdom, another in the neighbourhood of Guadalajara, and yet another to the north-east of Cordova (Lévi-Provençal, *Hist. Esp. mus.*, i, 204; ii, 40, 282, 309 (map), 310). The exact location of the first two remains uncertain, but the third, which still bears its old name in Spanish guise, viz. Alcolea, is situated 10 km. or so on the main eastward road of Cordova.

As regards the Naṣrid kingdom of Granada, two places called *al-Ķulayʿa* are listed in their appropriate administrative divisions by Ibn al-Khaṭīb [*q.v.*]. Both are located in what is today Almería province. One—Alcolea—lies north of Berja on the main road to Laujar. In other parts of the Peninsula, the same hispanised name can be found in such compounds as Alcolea de Calatrava (Ciudad Real province), A. del Pinar and A. de las Peñas (Guadalajara prov.), A. de Cinca (Huesca prov.), A. del Río (Sevilla prov.; (?) *Ḥiṣn al-Ķulayʿa*, Ibn Khaldūn, *ʿIbar*, vii, 196), and A. del Tajo (Toledo prov.). Other Peninsular forms are Alcolecha (Alicante prov.) and Alcoletge (Lerida prov.). In Spanish and other European writings the name appears in various guises (Alcolaya, Alcolya, Alcoleia, Alculeiha, etc.). Finally, in Spain today there are a number of place-names which are most probably literal translations of *al-ķulayʿa* (Castilian diminutive: "castillejo"), e.g. Castillejo (Cáceres and Granada provs.), C. de Iniesta (Cuenca prov.), C. de Robledo (Soria prov.), etc.

2. North Africa

1. El-Goléa (the French spelling of al-Ķulayʿa, reflecting the local pronunciation with the usual voiced *ķāf* of nomadic vernaculars) is the name of an oasis town situated at the far eastern end of the great western Erg (*ʿirķ*; see map above, i, 365) of Saharan Algeria and lying, by road, 906 km. almost due south of Algiers on the parallel 30° 31′, and 320 km. south of Ghardāya [*q.v.*]—air distances are noticeably shorter—at a height of 391 metres. Although the most isolated of Algeria's larger oases, it is one of the most beautiful. In 1973 the *dāʾira* of El-Goléa had a population of 16,670.

The place owes its name to an old stronghold (*ķṣar*) built on the north side of a *gāra* (*ķāra*, pl. *ķūr*), i.e. a small, isolated flat-topped hill. This *gāra*, from which can be seen a vast expanse of desert, sandy to the west and stony to the east, is one of three forming something of a protective semi-circle into which the huge oasis nestles beneath. Below the *ķṣar* lies a town that has risen on old and new foundations: the old town, home of an original sedentary population living in mud houses similar in shape and size to the *tatas* of Mali, and the new, modern town, which owes its foundation to the French, but its felicitously harmonious architecture to the inspiration supplied by local tradition. The latter's mosque and market-place are the focal point of social, religious and economic life. From the outset this new town has accommodated administrative buildings. In 1938 it also witnessed the consecration of the first church in the Sahara.

Today the *ķṣar* is deserted and in ruins. With the establishment and eventual consolidation of French rule, the need for its use as a stronghold disappeared and gradually it came merely to supply the local nomads' needs for storage. Its last inhabitants dispersed throughout the oasis to form hamlet communities alongside various plantations. The remains of the stronghold's double walls still stand, and among the ruins a small, plain mosque can be seen where it has been the custom of local women to gather for Friday prayer. The remains of rock dwellings are also in evidence. Dotted around the foot of the *gāra* on which the *ķṣar* stands, as well as about the oasis generally, are the *ķubbas* of local holy men, amounting to between forty and fifty in all and of different shapes and sizes.

As a result of improvements in irrigation and drainage techniques first effected by the French, the oasis now covers more than 800 hectares and supports around 182,000 date-palms watered from artesian wells dug in the bed of the Wād Seggur. Fruit trees also abound, notably citrous and apricot varieties, and there are winter crops of cereals, beans and many other kinds of vegetable.

The inhabitants and frequenters of the oasis are, in the main, wholly or partly sedentarised nomads of the Shaʿanba sub-tribe Mawādhī; traders from the Mzab; negroes and *ḥarāṭīn* (sing. *ḥarṭānī* [*q.v.*]) from Twāt (Touat) and Grāra (Gourara). These last two groups account for about half the population and between them work the land in one capacity or another. Formerly there was also a Jewish element.

El-Goléa's early history is lost in legend. The old *ķṣar* is said to have been founded as Taurirt (Berb. "little castle") by the Zenata in the Middle Ages and to have then been taken by the Touareg. Its mediaeval origin may be well founded: Ibn Khaldūn mentions the existence of a seemingly not too dissimilar desert advance post inhabited by Matghāra Berbers and frequented in intensely hot weather by veiled nomads. It too was a *ķulayʿa*, viz. Kulayʿat Wāllan (on some European maps Gucléa). Be that as it may, the Shaʿanba in and around El Goléa are said, probably rightly, to have come from the region of the Matlīlī oasis, near Ghardāya, where there is still a branch of the Shaʿanba, and to have been in the carrying-trade there, to say nothing of brigandage, in the late 16th and early 17th centuries. Drifting south as population pressures grew, they made El-Goléa their centre and doubtless profited from its position on the route from the Mzab to Twāt

and Tidikelt. In the 17th century, according to al-ʿAyyashī, this evidently prosperous place was ruled, through a governor, by the sultan of Wārglā. Its first contact with Europe was with Duveyrier in 1859. General de Gallifet reached it in 1873, and in 1891 a permanent garrison was installed. The local Shaʿanba provided Laperrine with the first detachments of the famous *méharistes* with whose aid the central Sahara was brought under French control.

2. Koléa, a small town of 35,000 inhabitants lying 46 km., by road, west of Algiers. Situated on the landward side of the Sāḥil hills at a height of 130 metres, it offers a commanding view of the Mitidja plain. Dating from the Ottoman period, it is said to have been founded by Ḥasan Pasha, son of the corsair Khayr al-Dīn (Barbarossa) [*q.v.*], around 1550. What is certain is that it was peopled by Muslim refugees from Castile, Andalusia, and the kingdom of Valencia, for whom the excellent prospects offered by its fertile cultivable land were the main attraction. In the sources it is therefore referred to as "Col de Mudechares" (Mudechares being the Spanish *mudéjares* from Ar. *mudadjdjanūn*). In modern times Koléa's attraction has been the tomb and mosque of a holy man, Sīdī Mubārak, who lived in the 17th century. One of his descendants, Ibn ʿAllāl b. Mubārak (Ben Allal Ben Embarak), who fell in the cause of the Algerian rebel ʿAbd al-Ḳādir [*q.v.*] in 1843, is also buried there.

(J. D. LATHAM)

KULAYB B. RABĪʿA, a chief of the Banu Taghlib of the Islamic period, whose murder by his brother-in-law Djassās b. Murra al-Shaybānī was the cause of a long and bloody war between the two sister-tribes Taghlib and Bakr [*q.vv.*] which was known as "the war of Basūs" [*q.v.*]. His genealogy was: Kulayb b. Rabīʿa b. al-Ḥārith b. Murra b. Zuhayr b. Djusham (Wüstenfeld, *Geneal. Tabellen*, c. 22; Ibn al-Kalbī-Caskel, Tab. 164, where Murra is not mentioned). Kulayb's real name is said to have been Wāʾil, and the name of Kulayb ("little dog") to have given to him because of his habit of taking a small dog with him and making it bark by beating it in all the places which he wished to reserve as his own private property; the people who heard the barking of the dog refrained from using the place. This story, the point of which, however, eludes us, is evidently a later invention: the name Kulayb is frequently met with in Arab nomenclature and does not look like a surname.

Kulayb is represented as having all the characteristic traits of the tyrant, of which the independent and critical spirit of the Bedouins has always had a profound horror; he is said to have been proclaimed "king" (on the use of this title cf. Lammens, *Le berceau de l'Islam*, Rome 1914, 210) after the brilliant victory won at Khazāzā over the united Yemenī tribes and to have ruled not only over Taghlib but also over the Banū Shayban, the most important section of Bakr. After a short time, he is said to have abused his power and to have usurped the rights of hunting and of pasturage at the expense of his subjects (the usurpation of the *ḥimā* is the regular grievance of the Bedouins against "tyrants"; the same reproach was made against the caliph ʿUthmān). Indeed, it was because the she-camel Sarāb, belonging to a Tamīmī woman al-Basūs or to one of her clients of the tribe of Banū Djarm, trespassed upon the private property of Kulayb, that the latter put her to death (or killed its young one and injured the mother), and this act of violence was the cause of his murder by Djassās, whose mother was the sister of al-Basūs.

The details of the story are given in our sources with some variations, most of which are found as early as the work of Abū ʿUbayda who is, as is well known, the source of almost all our information on the *ayyām al-ʿArab* [*q.v.*]. Certain features, especially in the *K. al-Aghānī*, have been borrowed from Ibn al-Kalbī, and the account of al-Mufaḍḍal al-Ḍabbī has also been preserved. It is evident that we are no longer able to ascertain if the history of Kulayb (and in general that of the war against Taghlib and Bakr) contains a nucleus of historical truth along with a mass of features undoubtedly legendary. This is a problem which can only be solved in connection with the general question of the historical value of the whole of the traditions of the pre-Islamic period. Considered by itself, the episode of Kulayb has nothing improbable about it. We might be tempted to recognise in it a fairly clear memory of an attempt to form a political organisation among Taghlib and Bakr of a kind superior to the ordinary Bedouin tribes; the attempts, similar to that which gave the royal crown to the chiefs of the tribe of Kinda, must have been suggested by the example of the kingdom of the Lakhmids of al-Ḥīra, not far from which Taghlib and Bakr have their houses. The story of the tyranny and the death of Kulayb must have taken form at a very remote period; this is evident from the verses of ʿAbbās b. Mirdās and of al-Nābigha al-Djaʿdī (both contemporary with the beginning of Islam) given in our sources; in that of al-Nābigha in particular, the history of the killing of the camel is already told in detail. An allusion to the power of Kulayb is found as early as the *muʿallaḳa* of the Taghlibī ʿAmr b. Kulthūm (v. 65). We have, moreover, contemporary documentary evidence of the accounts relating to the fate of Kulayb in the numerous allusions contained in the elegies on his death, which were attributed to his brother Muhalhil (one of the earliest Arab poets; cf. Ibn Ḳutayba, *Shiʿr*, ed. De Goeje, 164-6; Ibn Sallām, *Ṭabaḳāt al-shuʿarāʾ*, ed. Hell, 13 lines 11-16 etc.), but naturally their authenticity is more than doubtful.

The story of the murder of Kulayb is developed in a quite arbitrary fashion in the romance cycle of the Banū Hilāl (cf. Mittwoch, *Proelia arabum paganorum*, Berlin 1899, 11).

(G. LEVI DELLA VIDA)

AL-KULAYNĪ (or AL-KULĪNĪ), **ABŪ DJAʿFAR MUḤAMMAD** B. YAʿḲŪB B. ISḤĀḲ AL-RĀZĪ, Imāmī traditionist. He originated from a village located 38 km. southwest of Rayy in the district of

Pas͟hāpūya whose Persian name Kolēn, with *imāla*, was Arabicised as Kulayn and Kulīn. His *nisba* is thus variously given in the sources as al-Kulaynī, al-Kulīnī, or, erroneously, al-Kalīnī.

Few facts are known about his life. Since his chief transmitters of Imāmī traditions were several scholars of Ḳumm, it is certain that he studied in that town for a prolonged time, most likely during the last decade of the 3rd century A.H. (903-13). He also transmitted from several scholars of Rayy, among them his maternal uncle Muḥammad b. ʿAlī al-Kulaynī al-Rāzī, known as ʿAlān, and al-Nad͟jās͟hī describes him as the *s͟hayk͟h* of the Imāmiyya in Rayy in his time. It is uncertain if it was in Naysābūr or elsewhere that he heard Muḥammad b. Ismāʿīl al-Naysābūrī, his transmitter of the traditions and views of the prominent Imāmī scholar al-Faḍl b. S͟hād͟hān of Naysābūr, whom he evidently held in high esteem. At an unknown date, perhaps in the first decade of the 4th century A.H. (913-23), he moved to Bag͟hdād where he lived and taught in the Darb al-Silsila near the Bāb al-Kūfa on the west bank of the Tigris. Here he completed his voluminous *Kitāb al-Kāfī*, on which he is said to have worked for twenty years. The book, though mostly a collection of traditions of the *Imāms*, was meant to be a guide to authoritative Imāmī doctrine in theology and *fiḳh*. Thus it is arranged according to subject matter and tends to contain only those traditions which the author considered as reflecting orthodox teaching. Only exceptionally are the views and elaborations of Imāmī scholars quoted, such as the elaborations of al-Faḍl b. S͟hād͟hān on the law of inheritance. The work is divided into the *uṣūl*, dealing mainly with theology, prophecy, the imāmate, and prayers; the *furūʿ*, dealing with *fiḳh*; and a final volume, entitled *K. al-Rawḍa*, containing miscellaneous traditions of mostly edifying or paraenetic character. His other works, all of which are lost, included a refutation of the Ḳarāmiṭa, a book on transmitters (*rid͟jāl*), a collection of letters of the Imāms, an anthology of poems about them, and a book on the interpretation of dreams. The date of his death is given as 328/939-40 or 329/940-1. The latter date, mentioned by al-Nad͟jās͟hī, is more likely to be correct, since al-Ṭūsī, who in his earlier *K. al-Fihrist* gives the year 328, in his later *K. al-Rid͟jāl* specifies S͟haʿbān 329/May 941. The funeral prayer was led by the Imāmī Ḥasanid Abū Ḳirāṭ Muḥammad b. D͟jaʿfar, and he was buried near the Bāb al-Kūfa.

The reputation of al-Kulaynī and his *K. al-Kāfī* appears to have been modest during his lifetime and for a century after his death. Ibn al-Nadīm (writing in 377/987-8) does not even mention him, and Aḥmad b. ʿAbdūn (d. 423/1030) observed that his tomb had become obliterated. The *K. al-Kāfī* was evidently not widely used in the Imāmī communities as an authoritative source of *fiḳh*. Though the S͟hayk͟h al-Mufīd (d. 413/1022) in Bag͟hdād referred to it as one "of the most important and useful books of the S͟hīʿa", his student the S͟harīf al-Murtaḍā (d. 436/1044) included al-Kulaynī in his general censure of the Imāmī traditionist school of Ḳumm and accused him of including numerous forged and rationally absurd traditions in the *K. al-Kāfī*. It seems to have been largely due to the influence of the S͟hayk͟h al-Ṭūsī (d. 460/1068), who praised al-Kulaynī and relied extensively on the *K. al-Kāfī* in his *fiḳh* works, that the latter gained popularity. The favour in which the *K. al-Kāfī* was held by the pro-Muʿtazilī Imāmī school of Bag͟hdād, in spite of the criticism of al-Murtaḍā, was partially based on al-Kulaynī's support of the theology of the anti-anthropomorphist wing within the school of Ḳumm which was later represented by Ibn Bābawayh al-Ṣadūḳ, the only scholar of Ḳumm whose works were preserved in large number, evidently because of their author's relative closeness to Muʿtazilī theological doctrines. The *K. al-Kāfī* soon came to be considered as one of the four canonical collections of traditions on which Imāmī *fiḳh* is to be based, and often as the most authoritative one among them. It reached the peak of its fame in the Ṣafawid and post-Ṣafawid age, when numerous commentaries, interpretations, glosses, studies of various aspects, Persian translations, and an abridgment of it were composed. A tomb of al-Kulaynī with a *ḳubba* was now shown on the east bank of the Tigris near the modern al-Maʾmūn bridge in Bag͟hdād, and has continued to attract large numbers of visitors until the present.

(W. Madelung)

ḲULD͟JA or G͟hULD͟JA, modern Ili or I-ning, a town in the fertile and mineral-rich upper valley of the Ili river [*q.v.*] in Central Asia. For the mediaeval history of the district in which modern Ḳuld͟ja lay, see ALMALÏG͟H.

The town of Ḳuld͟ja ("Old Ḳuld͟ja") was probably a new foundation in 1762 by the Chinese after their victory over the Kalmucks [see KALMUK] in 1759, and they named it Ning-yüan-chen. Two years later the town of Hoi-yüan-chen was founded as the headquarters of the Chinese governor-general (*dsandsün*) of Chinese Turkestan; this was known as "Great" or "New" Ḳuld͟ja. The Imperial government resettled in the largely depopulated region, amongst other peoples, 6,000 families of Muslim Turks from Kās͟hg͟haria, after the devastation of the latter province during the wars with the Kalmucks; these came to be called the Tarančis, "agriculturists". Also in the 18th century were settled there Chinese Muslims (probably, in fact, of mixed Chinese and Uyg͟hur Turkish blood) called the Dungans or T'ung-kan. In 1851 a trade treaty was made at Ḳuld͟ja between the advancing Russians and the Chinese, opening the upper Ili region to Russian traders, and in 1860 the Treaty of Peking between Russia and China gave both Russia and Britain the right to establish consulates in, amongst other places, Ḳuld͟ja. In 1862 W. Radlov visited both Old and New Ḳuld͟ja and described them fully in his *Aus Siberien*, Leipzig 1893, ii, 305 ff., 336 ff., see also his *Das Ili-Thal in Hoch Asien und seine Bewohner*, in *Petermann's Mittheilungen* (1866); a decade or so later, the American traveller E. Schuyler visited Old Ḳuld͟ja and its hinterland, see his *Turkistan, notes of a journey in Russian Turkistan, Khokand, Bukhara, and Khuldja*, London 1876, ii, 156-201.

Following a Dungan rebellion in Shen-si, which spread to Kan-su [see KANSU] and other Muslim

areas of western China proper in 1862, revolt also broke out amongst the Muslim population of northern Chinese Turkestan, sc. in the province of Dzungaria, amongst both Tarančis and Dungans, and in 1863 it spread to the Ḳuldja area. After hard fighting between the Chinese authorities and the rebels, New Ḳuldja was captured in 1865 by the rebels and completely razed; Schuyler, *op, cit.*, ii, 162-4, found the site utterly deserted apart from the one or two houses of Dungan squatters. The Russian consulate in Ḳuldja and a Russian factory in the area were destroyed in this strife. The Dungans and Tarančis now began to fight amongst themselves, and after much internecine warfare, power passed in 1867 to a Taranči leader who styled himself Sulṭān Aʿlā Khān or Abu 'l-Aʿlā (in Russian sources, often Abil-Oglya); after savage massacres perpetrated by the Tarančis, some 5,000 Dungans and others fled westwards into Russian territory for refuge. In 1867 also, Yaʿḳūb Beg [*q.v.*], a Khoḳandī by birth who had earlier fought against the Russians at the battle of Aḳ Masdjid [see KHOḲAND], established his power in Kāshgharia, sc. the southern part of Chinese Turkestan. Since Yaʿḳūb Beg was believed to be anti-Russian and received two diplomatic missions from British India, the appearance of an ostensibly hostile power in Central Asia disturbed Russia, and was a factor in the Russian decision to annex completely in 1875-6 the Khānate of Khoḳand [*q.v.*]. It further led to the Russian occupation in 1871 of Ḳuldja and the upper Ili basin, this being announced as a temporary measure, till China should re-establish her authority in Kāshgharia and Dzungaria. The local ruler Aʿlā Khān was deported to Russia, and lived out his life there as a state pensioner.

The Russians probably assumed that Yaʿḳūb Beg would never be dislodged from power and that the Ḳuldja district would eventually be permanently annexed. In fact, Yaʿḳūb Beg was defeated in 1876-7 by the Chinese forces and died in May 1877; his state collapsed totally and Chinese authority was restored in Eastern Turkestan. In 1879 negotiations began between the Chinese diplomat Chʾung-hu and the imperial Russian government, but the Treaty of Lividia made in that year was abortive, and negotiations dragged on for a considerable time, the retrocession of Ḳuldja being used as a bargaining counter for extracting concessions elsewhere, till in 1881 the Treaty of St. Petersburg was made, and in 1883 Ḳuldja was finally evacuated by Russia. Russia nevertheless retained trading privileges in the upper Ili valley, received an indemnity of 9 million dollars for the expenses of the Russian occupation, and acquired consulates at Ḳuldja and Kāshghar which in the ensuing decades gave her important influence in Chinese Turkestan, e.g. during the period of the Chinese Revolution 1911-12, when Chinese settlers in the Ḳuldja region were massacred by the Muslims and the Russian consular defence forces of troops enlarged. Chinese Turkestan was from 1882 onwards organised as a formal province of China under the name of Sin-kiang "New dominion". The population of [Old] Ḳuldja was estimated at 7,700 in 1872, of whom 4,100 were Muslims; two or three years later, Schuyler estimated the population of the town at 10,000, over half of whom were Tarančis. These estimates were made at a time when the whole region was in a devastated and depopulated condition, and by *ca.* 1900, the estimated population of Ḳuldja had risen to 30,000.

When the authority of the Manchu Imperial government in the Sin-kiang capital of Urumchi crumbled in 1911, a revolutionary government proclaimed its independence in the Ili region, but in 1912 the new Chinese governor of the whole province, Yang Tseng-hsin (1911-28) managed to conciliate the separatists and secure unification of the Ili and Sin-kiang regions (see R. Yang, *Sinkiang under the administration of governor Yang Tseng-hsin, 1911-1928*, in *Central Asiatic Jnal.*, vi [1961], 270-7). Yang weathered a further potential crisis in 1916-17, when thousands of Kazakhs fled from Tsarist Russian oppression into the Ili and Kāshgharia regions (*ibid.*, 305-8), and under his long tenure of power, the whole of Chinese Turkestan enjoyed an unwonted period of prosperity and firm government. He kept up good relations with Soviet Russia, and even after the Kuomintang's diplomatic break with Russia in 1927, the Russian consulates at Ḳuldja and in other towns remained open. His successor Chen Shu-jen followed a similar policy, and in a secret treaty of 1931 conceded to the Russians rights to commercial offices in Ḳuldja or Ili, Urumchi, etc.

These governors in the far west of China had been virtually autonomous, but in 1941 Chiang Kai-shek managed to extend the direct control of Chunking over Sin-kiang, with disquieting effects on the non-Chinese population elements there. Hence in November 1944 there was a rebellion of the Kazakh Turks in the Ili region, soon joined by the Uyghurs. An Eastern Turkestan Republic was proclaimed in Ḳuldja, independent of the Sin-kiang Chinese provincial government in Urumchi. The Kuomintang government in distant Chunking was unable to do more than come to a compromise with Aḥmad Djān's régime in Ḳuldja, but by the end of 1948 its influence in Sin-kiang was in any case declining perceptibly. In September 1949 representatives both of the Ḳuldja régime and the Urumchi one started negotiating with the Communists in Peking, and in December of that year a Communist Provincial People's government was established in Sin-kiang. The Communists eventually accorded to the province a certain autonomy, and in 1954 the Ḳuldja region was made into the Ili Kazakh Autonomous District of what in 1955 became the Sin-kiang Uighur Autonomous Region. Now, under the Chinese name of I-ning, Ḳuldja is one of the chief towns of that Region.

KULLIYYA (A. lit. "completeness"; Turkish: *fakülte*; Persian: *dānishkada*) acquired in the 19th century the technical meaning of faculty as a unit of teaching and learning, mostly at the university level, according to branches of learning.

Islamic education in *masdjid*, *madrasa* or *khānaḳāh* did not know of a division into *kulliyyāt*, which presupposes institutionalised specialisation. So it was only in 1930 that al-Azhar in Cairo was reorganised according to three *kulliyyāt* of higher studies: *uṣūl al-dīn*, *sharīʿa*, and *al-dirāsāt al-ʿarabiyya*. Nadjaf in ʿIrāq, as a centre of Shīʿī *Ithnā*

ʿas͟harī learning, had in 1963, besides a number of independent *madāris*, a *kulliyyat al-fiḳh* which was connected with the University of Bag͟hdād. When modern institutions of higher education were established beside the traditional Muslim ones in the 19th and 20th centuries, the latter underwent a number of innovations and reforms which were mostly imposed by the state authorities. In this way, the faculty system was introduced into the traditional Islamic teaching, either by a radical transformation of an existing old-established institution (e.g. at al-Azhar); or by integrating such an institution as a *kulliyyat al-s͟harīʿa* or a faculty of religious studies into a new modern state university (e.g. at al-Zaytūna in Tunis); or by establishing completely new religious institutions with a division into faculties, replacing older such institutions (e.g. the King Saʿūd Islamic University in Medina). By now, the faculty system has been introduced in nearly all Islamic institutions of higher education; sometimes such institutions have "modern" faculties side-by-side with those of the Islamic sciences. These institutions provide the education of religious leaders and they perform a function in the transmission and reformulation of Islamic thought. They may lead to a career in the judiciary, in institutional teaching or in less formal forms of instruction in Islam, both within and outside Muslim countries.

The non-religious modern (state) universities [see D̲J̲ĀMIʿA] and other institutions of higher education (*al-taʿlīm al-ʿālī*) have been organised according to the faculty system, as taken over from the West, since their establishment in the 20th and sometimes the 19th century. They come under the Ministry of Education, or in some cases the Ministry of Higher Education. These universities expanded greatly in number and size after the independence of the different countries, and they serve the modernisation and development of the societies of these countries by providing them with professional intellects, besides the general role of such institutions in the acquisition and transmission of knowledge. There is a direct link between the modernisation of a society and the expansion of its educational system, including higher education. The educational institutions undergo during the process the influence of those ideological forces which constitute, or at least accompany, the dynamic of the modernisation process. The planning of higher education has started in most countries according to the needs of these countries, following western models and resulting in the growth of faculties (*kulliyyāt*).

In Arab universities the following *kulliyyāt* have developed: *ādāb* (arts), *ḥuḳūḳ* (law), *ʿulūm* (sciences) and *ṭibb* (medicine), the first two of which are called *naẓarī* (theoretical), the latter two *ʿamalī* (practical). Then there are those of *tarbiya* (education, i.e. for teacher-training at secondary schools), *tid̲j̲āra* (commerce), *idāra* (administration), *handasa* (engineering), *zirāʿa* (agriculture), *ṣaydaliyya* (pharmacy), *ṭibb al-asnān* (dentistry) and *bayṭara* (veterinary medicine). In some cases there is a *kulliyyāt al-ʿulūm al-id̲j̲timāʿiyya* (social sciences), but mostly these disciplines are served by an institute instead of a faculty. Some universities, e.g. al-Azhar, have a *kulliyyat al-banāt* (women's faculty). In a number of cases, university faculties are the continuation of previously existing educational institutions which became part of the university once it had been founded.

The faculties have been organised in different countries according to French (especially for law faculties), British and American models, but they have developed on their own and adjusted to ministerial directives. The *kulliyyāt* constitute together a *d̲j̲āmiʿa*. Within the university, the *kulliyyāt* enjoy a relative independence; their deans have great authority; they often have their own *dalīl* (guide) besides the *taḳwīm* or *taḳrīr* (calendar) of the university. They mostly have their own library and may issue their own periodical. Generally speaking, the decision-making process is slow and the bureaucratic apparatus allows for little efficiency, apart from ever-recurring financial problems. Most programmes of study show an early specialisation, and the *kulliyyāt* or faculties tend to function as professional schools. Certain courses on history, culture and society may be made compulsory for all students. The degrees awarded are those of bachelor, master, specialised diplomas and doctorate. The faculties (*kulliyyāt*) are each subdivided into sections (*ḳusūm*, sing. *ḳism*), and specialised institutes may be attached to them. Nearly all teaching is done in the national language, and English and French are not well known; most universities have insufficient funds to obtain books for their libraries in these languages.

Given the great number of students enrolled, faculties like medicine and the sciences limit the admission of students according to the number of places available, taking into account the earlier marks received by applying students. There is evidently a job-market problem in most countries for those who obtain their bachelor degree, and even for those who finish graduate studies. A certain number of students are sent abroad or admitted for foreign scholarships to continue their studies or to specialise; a certain percentage of students, varying according to country, stays abroad. Faculty teachers, on the other hand, have a high teaching load and often take supplementary jobs besides; there is not only a lack of facilities for reading and research, but also in some cases a problem of intellectual independence.

As everywhere else, the *kulliyyāt* in Muslim countries are in transition and undergoing permanent re-organisation. The exact, natural and applied sciences have an immediate relevance for the modernisation of these countries. The social sciences, not always developed adequately, are sensitive to ideological considerations, but are pivotal for the interpretation of the present-day situation of the societies of these countries; this holds true for the teaching of history too. The tendency at all faculties is to spread knowledge imposed from above, and this knowledge often appears to be considered as a finite quantity, to be assimilated by memorisation. Consequently, little attention is paid to promoting the awakening of the available natural intelligence.

It would be difficult to interpret the *kulliyyāt*, and the institutions of higher education in general, apart from their social context and the function which they fulfil in societies with pressing needs and with many uncertainties. They play an important role, in particular in the construction of a modern society and in the cultural transformation of whole countries. This takes place at a time when the ideals of culture have changed greatly, not only in relation to the religious orientation of the traditional Islamic educational institutions, but also since the political independence of the countries under consideration.

(J. D. J. WAARDENBURG)

KÜLLIYYE (T.), in Ottoman usage the complex of buildings with varying purposes centred round a mosque. The concept of a *külliyye* was inherent in the earliest form of the mosque or *djāmiʿ* where one building housed the place of prayer and teaching as well as serving as a hostel [see EI¹, art. MASDJID]. Later, other services were incorporated under one foundation document, and each was housed in its own building within an enclosure. This did not preclude the foundation of hospitals, etc., as separate institutions, as in 7th/13th century Anatolia. The early grouping of a *külliyye* was often due to the contours of hillsides or the irregularities of the site donated, as with the royal foundations at Bursa in the 8th/14th centuries. In the late 9th/15th century, the great ordered *külliyye*s of the Ottoman dynasty were founded, in particular those of Bāyazīd II at Amasya and Edirne, the latter devoted to all aspects of medicine including the training of students. While each element of the foundation was separate, the buildings, their courts and parterres were conceived as an architectural whole.

The greatest of these *külliyye*s were built in Istanbul by Meḥemmed II Fātiḥ and Sülaymān I (Ḳānūnī). The latter incorporated seven *madrasa*s, four for each of the Sunnī law schools, a preparatory college and one for studying the *Ḥadīth* and a medical school. Besides these with their courts, latrines and two houses for teachers or *mudarrisūn* there was a school for boys, a chantry, a hostel with stables, a bath or *ḥammām*, the mausoleum of the sultan and that of his consort in a cemetery, rooms for mosque servants over gateways, a large kitchen and refectory with store-rooms attached, a wrestling ground, and in the vaults supporting the vast platform on which these many buildings were erected, there were ironsmiths, cafés, button shops and other workshops. The one pavilion lacking was the usual royal *ḳaṣr* with access to the *maḳṣūra* or royal lodge (*khünkār maḥfili*).

Each and all of the charitable services had to be staffed, and detailed foundation documents regulated every duty, item of diet or salary. Besides the administrative officers who came under the chief eunuch in the department of the harem at Ṭopkapl Sarāyl, there were religious officers and teachers, porters, chanters, grave diggers, servants responsible for maintenance, including the polishing of courtyards and window grilles, cooks, scullions, plumbers, lamp-lighters, a guard against the theft of oil for lamps, carpenters, masons and tilers responsible for the lead sheets covering well over 500 domes. The kitchens coped with the feeding of this company, as well as the students and travellers and the poor; the scraps were given to the dogs. All these services required a considerable supply of water, and the cost of laying pipes and rebuilding aqueducts exceeded that of building the foundation. The initial building costs and the endowment needed to maintain so vast a foundation were raised by public subscription, including the gift of various properties, ranging from entire estates to a mill or one cottage. The donors ranged from the ruler, who might assign the revenues of a part of the realm through office holders of greater and lesser rank, to the common people.

Bibliography: Two important early sources on the Ottoman *külliyye* (*külliye*) are the *Ḥadīḳat al-djewāmiʿ*, in von Hammer, *Histoire*, and Ewliyā Čelebi, *Seyāḥat-nāme*, Istanbul 1908-38. General works which refer to examples are many, and include K. A. C. Creswell, *The Muslim architecture of Egypt*, Oxford 1958; A. Gabriel, *Les monuments turcs d'Anatolie*, Paris 1931-4; idem, *Une capitale turque: Brousse (Bursa)*, Paris 1958; A. U. Pope, *A survey of Persian art*, London 1938; G. Goodwin, *A history of Ottoman architecture*, London 1971; O. Aslanapa, *Turkish art and architecture*, London 1972. See also works concerned with administrative history, such as Gibb and Bowen, *Islamic society and the West*, i/1-2; R. Mantran, *Istanbul dans la seconde moitié du XVIIe siècle*, Paris 1962 and idem, *La vie quotidienne à Constantinople au temps de Soliman le Magnifique et ses successeurs, XVᵉ et XVIIᵉ siècles*, Paris 1963. Ahmet Refik Altınay's researches into the orders-in-council are important and are published as *Hicrî onikinci asırda İstanbul hayatı*, Istanbul 1930; *Hicrî onbirinci asırda İstanbul hayatı*, Istanbul 1931, *Hicrî XIII. asırda İstanbul hayatı*, Istanbul 1932; and *16. asırda İstanbul hayatı*, Istanbul 1935. Two major works of O. Ergin are *Türk şehirlerinde imaret sistemi*, Istanbul 1939, and *Fatih imareti vakfiyesi*, Istanbul 1945. The journal *Vakıflar Dergisi*, published intermittently, is a scholarly source. In the first number, Ankara 1939, appeared H. Kunter, *Türk vakıflar ve vakfiyeleri*, and A. S. Unver, *Fatih külliyesine ait diğer muhim bir vesika*, and in No. ii, Ankara 1942, F. Köprülü published *L'institution du vakouf*, and S. Yaltakaya, *Kara Ahmed Paşa vakfiyesi*. (G. GOODWIN)

ḲUL-OGHLU (T.) "son of a slave", in Ottoman usage, more specifically the son of a Janissary, admitted to the pay-roll of the corps; for further information see YEÑI ČERI.

In the period of Turkish domination in Algeria and Tunisia, the word *ḳulughlī/kulughlī* and, with dissimilation, *ḳurughlī/kurughlī* (pl. *ḳulughlān/kulughlān*, *ḳurughlān/kurughlān/krāghel*; French *koulougli* and variants) denoted those elements of the population resulting from marriages of Turks with local women. They were fairly numerous at Tunis, Algiers and Tlemcen, and in the towns which had Turkish garrisons, such as Médea, Mostaganem, etc. In Algeria, they lived in special quarters, and were rather looked down upon by the urban population (*ḥaḍar*), who would not give them willingly their daughters in marriage. The rules of the *odjaḳ* [*q.v.*] did not allow them to rise to higher levels, and they often endured harassment from the authorities. A considerable number of them also became mingled with the rural population and took up agriculture, especially in Tunisia. After the conquest, those who lived in Algeria were the target for hostility from the tribes, and many of them enrolled in the locally-recruited bodies of troops. They subsequently be-

came merged within the general urban or rural populations. (ED.)

ḲULOGHLU, Turkish folk poet of the 11th/17th century. Hardly anything is known about his life. He seems to have belonged to the Janissary corps and to have flourished during the reigns of ʿOthmān II, Muṣṭafā I, Murād IV and Ibrāhīm, and to have found particular favour at the court of Murād IV. A contemporary of Ḳul Muṣṭafā and Kātibī, he was at his best in lyric and epic poems, the best known of which is his elegy for Murād IV. His poems, scattered in most of the 17th and 18th century anthologies of folk poets (*djönks*), have been collected and published by Sadettin Nüzhet Ergun.

KULTHŪM B. ʿIYĀḌ AL-ḲUSHAYRĪ, Ḳaysī notable [see ḲAYS] whom the Umayyad caliph Hishām b. ʿAbd al-Malik sent to the Maghrib, in Djumādā II 123/April-May 741, to avenge the bloody defeat which the Berbers, commanded by the successor of Maysara [*q.v.*], Khālid b. Ḥamīd/Ḥumayd al-Zanātī, had inflicted on the Arabs in the "battle of the nobles" (*ghazwat al-ashrāf*). Kulthūm left at the head of an army of 30,000 men, to which there were added contingents raised along the way, and he joined up with Ḥabīb b. Abī ʿUbayda al-Fihrī, the former companion of Mūsā b. Nuṣayr [*q.v.*], who was endeavouring to halt the progress of the Ṣufrī Khāridjites near Tlemcen. The clumsy conduct of the Syrian army and the arrogant attitude of the commander of the vanguard, Baldj b. Bishr [*q.v.*], who was Kulthūm's nephew, towards Ḥabīb hampered the conduct of operations. Khālid al-Zanātī, after retiring before the Arabs, gave battle to them near the Wādī Sabū (Oued Sebou). Ignoring Ḥabīb's sensible advice, Kulthūm sent to the front Baldj's cavalry, which succeeded after great efforts in piercing the Berber lines, but the latter reformed behind them and overwhelmed by their mass the caliphal troops which had taken up battle order too late. Ḥabīb and the other chiefs were killed.

Kulthūm fought with the greatest bravery, reciting verses of the Ḳurʾān to encourage the others, but finally he fell. One-third of the army was killed and a third taken prisoners (Dhu 'l-Ḥidjdja 123/Oct.-Nov. 741). Baldj's cavalry's only hope was to take refuge in Ceuta, whence after much suffering they were able to cross to Spain.

ḲULUMRIYA, the name given by the Arabs to the town of Coimbra, on the right bank of the Mondego River in central Portugal. The town still has some ruins from the Roman period, and was originally called Aeminium; but it took over the name of another important Roman town, Conimbriga, which lay 18 km. to the south and had been devastated and depopulated during the barbarian invasions. The episcopal see of Conimbriga was transferred to Aeminium in *ca.* 580-9, and the change of name took place towards the middle of the 7th century A.D. Although the usual Arabic form was Ḳulumriya, Ibn al-Ḳūṭiyya (4th/10th century) has that of Ḳulunbiriya (*Iftitāḥ*, 200). The occupying of the town is attributed to ʿAbd al-ʿAzīz b. Mūsā b. Nuṣayr, governor of al-Andalus 95-7/714-16. His lands, like those of Santarém to the south, appear to have been omitted from the conqueror's division of the territories, probably because of a treaty (cf. Lévi-Provençal, *Hist. Esp. mus.*, iii, 201-2).

The Arab geographers give descriptions of Ḳulumriya. Al-Rāzī states that it was an ancient town, well-fortified and with fertile surrounding estates where there were cornfields, olive groves and gardens. Al-Idrīsī (548/1154) says that the walls had three gates (one of which still exists, with the name of *almedina*), and mentions the mills along the Mondego vineyards and gardens and also the force of Christians living there. Al-Ḥimyarī repeats this information, and Yāḳūt gives a brief notice of the town.

Coimbra may have been the central town of a *kūra* or territorial district during its Islamic period. This last was very disturbed, for the town was coveted by the Christians who set afoot the *Reconquista* [see AL-ANDALUS and BURTUḲĀL]. In 264/878 the town was taken by Count Hermenegildo in Alfonso III's name, but al-Manṣūr recaptured it in 377/987 after having briefly occupied it two years previously. It was finally conquered by Ferdinand I in 456/1064 after a six-months' siege. He created the Mozarab Sisnandus Davidiz governor as a reward for his role here. The Coimbra district was one of the Mozarabs' most lively centres; as well as the facts described in e.g. the works of Gomez-Moreno and I. de Las Cagigas, P. da Cunha Serra (*Contribuição*, 35-6 and map II) has emphasised the role of the town's Mozarabs in the peopling of northern Portugal during the *Reconquista*. The presence of the Muslims in the area has left many traces, as its toponomy shows. From the 10th century onwards, Christian documents make a very clear distinction between what was in the *almedina* (the walled town and citadel) and what was in the *arrabalde* (< *rabaḍ*) outside the walls at that time.

AL-ḲULZUM, an ancient town and seaport on the Red Sea (A. *Baḥr al-Ḳulzum* [*q.v.*], *Baḥr al-Hind* or *Baḥr al-Ḥabasha*), now administratively in the province (*muḥāfaẓa*) of al-Suways. It appears to have been a fort as well as a town, and was,

perhaps, the spot where the troops destined to guard the sluices of the canal were stationed. It was called Castrum by Hierocles and Epiphanius; and κλύσμα (Clysma), or κλεῖσμα is first mentioned by Lucian. Ḳulzum is a corruption of the Greek name κλύσμα (in both Arabic and Greek almost always without the article; the Greek refers to the "sluice" at the mouth of the canal, which led from the Nile to the Red Sea). This canal, begun by Pharaoh Necho and finished by Darius of Persia, was later restored by Ptolemy II Philadelphos and by Trajan. In the Muslim period, when the construction of the canal was wrongly ascribed to Hadrian, labour was repeatedly spent on it.

ʿUmar b. al-Khaṭṭāb in 23/643-4 for example had it repaired to facilitate the transport of corn for Mecca from al-Fusṭāṭ to the Read Sea; it was called after him *Khalīdj Amīr al-Muʾminīn*. According to Abū Ṣāliḥ, its mouth was at al-Ḳulzum, according to al-Masʿūdī and others (more accurately) at *Dhunb* (*sic*; *dhanab*?) *al-Timsāḥ*, one mile from the town, where the Meccan pilgrims from Egypt crossed the canal by a large bridge. The caliph al-Manṣūr in 158/775 had it partly filled in, fearing an attack from his uncle Muḥammad b. ʿAbd Allāh, who had rebelled against him in Medina, so that in Abū Ṣāliḥ's time it ended at al-Sadīr at the entrance to the Wādī Ṭumīlāt. New but fruitless attempts to make it navigable again were made by the caliph Hārūn al-Rashīd, who is said to have abandoned the attempt out of fear of the Greeks. Henceforth the bulk of its water flowed into the Birkat al-Djubb till it was completely filled in (1899) for sanitary reasons.

The town of al-Ḳulzum owed its importance mainly to this canal, for according to the descriptions of the Arab geographers, it was a desolate and miserable site without water and vegetation; neither trees nor fruits could flourish there. However, it was useful as a source of salt which was transported to various parts of Egypt and Syria for sale, and al-Baghdādī reports that quarries for red flint were operated in its vicinity. In antiquity and in the early Muslim period its main importance was as a point of departure for shipping on the Red Sea, which consequently came to be most commonly known to the Arabs as *Baḥr al-Ḳulzum*. The corn ships of al-Fusṭāṭ after they had passed the canal sailed from here to al-Djār and Djidda. Of the Jewish merchants called al-Rādhāniyya, Ibn Khurradādhbih says that they came from the lands of the Franks to al-Faramāʾ; thence they carried their wares 35 *farsakhs* on camels to al-Ḳulzum, where they were loaded on ships which sailed to India and China. According to the same geographer, al-Ḳulzum with al-Ṭūr and Ayla formed a district of Egypt.

The country round al-Ḳulzum was inhabited at an early date by Arabs. They are already mentioned in the *Acta* of the hermit Sisoes (Coptic: *apa Djidjōi*). Sisoes was one of the three Coptic martyrs (the other two being ʿIṭānās and Pidjīmī) whose place of burial is known to have been in al-Ḳulzum. For seventy years the anchorite Yūḥannā al-Kaṣīr (John Kolobos, died *ca.* A.D. 409) lived in a cave which he had dug himself in the nearby Djabal Anṭwān, and was buried beside the graves of the three martyrs. Djabal Anṭwān was so named after St. Antony who went into retreat there from the importunities of the secular world. In the *History of* John Kolobos, Ḳulzūm (*sic*) appears for the first time in the Arabic Synaxarium as the name of the ancient Clysma.

When under the last ʿAbbāsid governor in Egypt, ʿAnbasa b. Isḥāḳ, the Budjā or Bedja [*q.v.*] rebelled in Nubia, invaded the Ṣaʿīd or Upper Egypt and laid waste many towns, al-Mutawakkil sent against them an army under Muḥammad b. ʿAbd Allāh al-Ḳummī which went from Ḳūṣ [*q.v.*] straight through the desert to the emerald mines, while seven ships with stores sailed from al-Ḳulzum to Ṣanga near ʿAydhāb and provided the victorious army from there with the necessary supplies.

In the autumn of 361/971, the Ḳarmaṭian leader Ḥasan b. Aḥmad on his campaign against the Fāṭimid Djawhar took the towns of al-Ḳulzum, al-Faramāʾ, and Tinnīs; after his defeat before Cairo (3 Rabīʿ I 361/24 December 971), he retired under cover of night via al-Ḳulzum to Arabia.

Reynald de Châtillon at the beginning of his naval expedition against the holy cities in the winter of 578/1182-3 sent two ships from Aden, which were to watch the citadel of al-Ḳulzum and prevent the garrison from procuring water. But soon afterwards the Ḥādjib Ḥusām al-Dīn Luʾluʾ built a fleet by order of Ṣalāḥ al-Dīn's brother al-Malik al-ʿĀdil, in al-Ḳulzum, which sailed for ʿAydhāb and put a sudden end to the desperate enterprise. When al-Dimashḳī includes al-Ḳulzum among the lands under al-Karak, this is perhaps a memory of these events of a century before.

In the time of al-Idrīsī, Yāḳūt and al-Dimashḳī, al-Ḳulzum was already a deserted town. Al-Maḳrīzī found among old documents in the palace of Cairo accounts of the expenditure on the civil and military administration of the town and district and concluded from them that it must once have been most flourishing. He quotes al-Ḳuḍāʿī as saying that the town was already ruinous in his day, and this presumably included the fortress (Ḳalʿat al-Ḳulzum) mentioned in several accounts. According to al-Idrīsī, the Bedouins had occupied and plundered it. The only water-supply he knew of in the vicinity was the well at al-Suways, which yielded only a scanty supply of brackish water. Al-Muḳaddasī (4th/10th century) already mentions al-Suways (i.e. Suez), which gradually took the place of al-Ḳulzum, a mile from it.

The name of al-Ḳulzum is still given to some heights to the north of Suez, Kōm al-Ḳulzum.

(E. Honigmann - [R. Y. Ebied])

ḲUM (Ar. Ḳumm, current Persian pronunciation G̲h̲om rather than Ḳum), a city of central Iran (Media in ancient times, later D̲j̲ibāl or ʿIrāḳ-i ad̲j̲am) situated in lat. 34°38′ N. and long. 50°58′ E., 150 km. to the south of Tehran. It is the capital of a *s̲h̲āhristān* of the Central Province (*Ustān-i markazī*) and the ninth city of Iran, with a population of 246,873 in 1976. Situated on the great north-west/south-east axis, which follows the foothills of the central Iranian range and skirts the fold of the Zagros, it lies at the junction of all the road and rail routes linking southern Iran with Tehran.

Geographical setting.

With a complex geological history (entirely post-Cretaceous terrain; late formation of mountains linked to volcanic activity; marine development of the site of Ḳum in the Oligo-Miocene period), the region is characterised by its uneven relief. As elsewhere in central Iran, the natural environment bears the marks of aridity and of the features associated with an inland continental setting (steppe vegetation, saline earth; see M. Bazin, *La vie rurale*, 5 ff.). To the south, the mountainous region of Ḳuhistān contains half-a-dozen peaks whose south-western elevation exceeds 3,000 m. Towards the north-west, other mountains separate Ḳuhistān from another dense range exceeding 3,000 m. in altitude in the region of Tafris̲h̲. The valley of the river Ḳum (Anārbār in antiquity) constitutes a pass crossing the mountainous region of the south. It clears the final barrier of the mountains through a broad gap and spreads a thick deposit of sediment on the plain where the city of Ḳum is situated. To the north-east, the plain is barred by hill-ranges of only moderate elevation (1,000 m.), dominated to the west by the Kūh-i Namak (Mountain of Salt); distorted in shape and dangerous of access, it has given rise to a whole cycle of legends (see Bazin, *op. laud.*, 8, n. 4). Further to the north, the relief rises, dominating the low-lying areas which are divided unequally between *das̲h̲t* and *kawīr*. Rivers of most irregular current flow into the basin of Ḥawḍ-i Sulṭān and the vast salt lake (*daryā-i namak*) of Masīla. Although meteorological data are incomplete, the temperatures are characterised by strong daily and annual fluctuations, and a high general average (18·4° over the period 1958-68, as calculated by M. Bazin, *op. laud.*, 13; the pioneering work of A. H. Adle, *Āb u hawā-yi Īrān*, Tehran 1339, 77, gives an average of 18·5°). The winter is not very cold, and the temperature in summer frequently exceeds 40°. Rainfall is sparse everywhere (less than 200 mm. below 1,500 m.) and very irregular. Prolonged droughts can be disastrous (there have been instances in 1869-72 and more recently in 1960-6). The strength of the river-currents is also most irregular and there are often catastrophic floods (Bazin, *op. laud.*, 14 ff.; Bémont, 180). The soil is in general unfavourable to agriculture, and the natural vegetation is very poor.

Socio-economic setting.

This hostile natural environment is inhabited by a population of great ethnic and linguistic diversity. Since the beginning of the 2nd/8th century, a number of significant Arab elements have been added to the original Persian nucleus. Among the groups of foreign origin are the K̲h̲alad̲j̲ [*q.v.*], who speak an archaic oriental Turkish and who arrived in the area at a very early stage (between the 11th and the 14th centuries). They have given their name to the mountains of K̲h̲alad̲j̲istān, to the east of Ḳum, the region where they are settled. There are considerable contrasts in the demographic evolution of this rural environment, where the density of population is generally below five inhabitants per square kilometre and where, in contrast to other regions of central Iran, the larger villages are mostly situated at high altitudes (Bazin, *op. laud.*, 23 ff.).

Agriculture depends primarily on irrigation by the traditional utilisation of water-courses (barrages, diversion channels) and of underground reserves (*ḳanāts* [*q.v.*]) as well as on modern techniques of developing fertility through wells of varying depths. The sharing of water among those exploiting it has given rise to a system of minute division which, in contrast to the practice elsewhere in Iran, operates without any particular supervision (Bazin, *op. laud.*, 39). In spite of the introduction of some modern methods of exploitation, agricultural techniques and systems are still archaic. Cereals (wheat, barley) give a rather mediocre yield. Summer crops (cotton, market-garden products including various kinds of melon and water-melon, pomegranates, figs, raisins, apricots, almonds, more recently opium, etc.) are mostly grown for sale. In general, agricultural production is inferior (Bazin, *op. cit.*, 40 ff.). In contrast to the situation prevailing elsewhere in Iran, before the implementation of land reform the bulk of the land belonged to urban middle class landlords and to peasant smallholders. The crown properties (*k̲h̲āliṣa* [*q.v.*]) which existed in the Ḳād̲j̲ār period were no longer represented in the region (Bazin, *op. laud.*, 55). The *waḳf* estates gifted to the sanctuary of Fāṭima al-Maʿṣūma continue to be decidedly less important than those of the sanctuary of Imām Riḍā at Mas̲h̲had (Bazin, *op. cit.*); for a comparison, see Fisher, 70, and on Mas̲h̲had, N. Hakami, *Le vaqf d'un lieu saint en Iran-Maşhad*, Mémoire de l'EPHE, Section vi, Paris 1975, 22 ff.). Traditional forms of ownership, exploitation and the sharing of crops are now being modified by the gradual implementation of land reform; a number of successful co-operatives have been created (Bazin, *op. cit.*, 57 ff.).

The relatively meagre agricultural yields are supplemented by ancillary activities: peasants and numerous nomadic and semi-nomadic groups practise stock-breeding (cattle, sheep, goats, camels); the crafts formerly practised (see below) have been replaced by the manufacture of carpets, introduced, at least as far as quality products are concerned, by merchants of Kās̲h̲ān in the nineteen-thirties (Bazin, *op. laud.*, 64 ff.; idem, *Qom, ville de pèlerinage*, 105 ff.; idem, *Le travail du tapis dans la région de Qom*). Numerous factors (including the religious and social conservatism of the population) have hindered the industrial development of the town and of the region, in spite of the discovery and exploitation of petroleum and natural gas in the folds of the Alburz and of Sarād̲j̲a (for a bibliography relating to the industry of the region: textiles, building materials, ceramics, flour-mills, petroleum, natural gas, etc., see M. Bazin, *Qom, ville de pèlerinage*, 109 ff.). The influence of Ḳum over the region has been to some extent artificially diminished to the advantage of the surrounding

s͟hāhristāns, especially those of Kās͟hān and Tafris͟h, the latter being a recent creation (*ibid.*, 124 ff.). In spite of the potential richness of the soil and attempts at modernisation, crop yields and the standard of living continue to be rather poor (M. Bazin, *La vie rurale*, 79 ff.; idem, with regard to nutrition, in *Studia Iranica*, ii [1973], 243-53).

Historical evolution.

Numerous signs testify to the occupation of the site of Ḳum in ancient times (M. Bazin, *La vie rurale*, 25 ff.). The remains of *čahār tāḳs* of the Sāsānid period are still visible in the region (A. Godard, *L'art de l'Iran*, Paris 1962, 232 ff.; M. Siroux, *Le site d'Atesh-Kouh pres de Delidjan*, in *Syria*, xliv [1967], 53-71). Excavations on the site of one of these, the Ḳalʿa-yi Duk͟htar, very close to Ḳum, have brought to light fragments of pottery of the type associated with Sialk II and III (5th and 4th millenia B.C.): see M. Siroux, *Le Kalʿè Duk͟htar de Ḳumm*, in *Āt͟hār-e Īrān*, iii, (1938), 113-20; R. Ghirshman, *Fouilles de Sialk*, Paris 1938, i, 91; L. Vanden Berghe, *Archéologie de l'Iran ancien*, Leiden 1959, 125. Similar remains have been discovered in K͟haladjistān (see M. Bahrami, in *Āmuzis͟h wa parwaris͟h*, x/4 [1940], 31-8). Two Seleucid columns are still to be found near Dilidjān (A. Godard, *op. laud.*, 149, 153, 164, and plate 88).

Ḳum is included among the *kūras* of Djibāl (Ibn K͟hurradād͟hbih, 20). Ibn al-Faḳīh (209 ff.) and other Arabic sources mention Sāsānid Ḳum in various contexts (see Faḳīhī, *Taʾrīk͟h-i mad͟hhab-i Ḳum*, 54 ff.). According to the *Taʾrīk͟h-i Ḳum*, 24, Alexander the Great destroyed Ḳum, and it was the Sāsānid Ḳubād I (488-531) who restored its prosperity and gave it administrative independence from Iṣfahān. Many of the *rustāḳs* of Ḳum mentioned in the *Taʾrīk͟h-i Ḳum* bear Iranian names, some of which are still in use today. A version of a Pahlavi text draws attention to the merits of the saffron of Ḳum (see J. M. Unvala, *The Pahlavi text "King Husraw and his boy"*, Paris 1924, 44, following al-T͟haʿālibī). In the *S͟hāh-namā* of Firdawsī, Ḳum is included among the towns belonging to the Pis͟hdādiyān and Kayānid kings (Faḳīhī, 55, etc.).

But in spite of the archaeological remains and the literary allusions to Ḳum in the ancient texts, as in the case of Kās͟hān, with which it is often associated (Ḳum and Kās͟hān together are said to have supplied 20,000 horsemen to the Sāsānid army at al-Ḳādisiyya: see Faḳīhī, 56, following Ibn Aʿt͟ham al-Kūfī), virtually nothing is known of the pre-Islamic town. According to the majority of Arabic sources (which often contain internal contradictions), the town was an Islamic foundation. According to the *Taʾrīk͟h-i Ḳum*, the As͟hʿarī Arabs of Kūfa, persecuted for their S͟hīʿī beliefs, came and established themselves in the region (where they were probably received by co-religionists), in 94/712-13, protected it from attacks by the Daylamīs, and ultimately built a wall around seven of the forty villages of the plain (240 ff.; on the non-As͟hʿarī Arabs who established themselves at Ḳum, see Faḳīhī, 43 ff.). This conglomeration presumably took its name from that of one of these villages, Ḳumīdān. But the author of the *Taʾrīk͟h-i Ḳum* follows al-Barḳī in preferring to derive the name Ḳum from *kūma*, a kind of hut, possibly the origin of Ḳumamaydān, which could have been contracted into Kūmaydān/Kumīdān (25; Houton-Schindler, 59). A derivation from Godman, pronounced Goman, is suggested by R. N. Frye (*The golden age of Persia*, London 1975, 11). Other fanciful etymologies (generally based on the Arabic imperative *ḳum* "rise up!") have also been proposed (see for example, Houtum-Schindler, 59 ff.). There are also numerous S͟hīʿī *ḥadīt͟hs* extolling the virtues of Ḳum as a place of refuge for believers etc. (*Taʾrīk͟h-i Ḳum*, 90 ff.; Faḳīhī, 75, 83 ff.); this latter attribute earned it in the course of time numerous honorific titles such as Dār al-Muʾminīn, Dār al-ʿIbāda, Dār al-Muwaḥḥidīn, Dār al-ʿIlm, K͟hāk Faradj etc. (Faḳīhī, 14).

This region, with its strong undercurrent of religious feeling (including Jewish and Christian associations; see Monneret de Villard, *Le leggende orientali sui magi evangelici*, Vatican 1952, 84 ff.) became one of the first bastions of S͟hīʿism (on the S͟hīʿī and non-S͟hīʿī groups at Ḳum, see Faḳīhī, 308 ff.). The Zoroastrian community, whose chief, Yazdānfad͟hār, had in an earlier period assisted the As͟hʿarī Arabs to settle in the region, was ultimately eliminated (sometimes brutally) or Islamised; it has been observed, however, that Zoroastrian fire-temples continued to be in use in the area until the 3rd/9th century, and perhaps even later (Monneret de Villard, 139). From the start, the inhabitants of Ḳum had a reputation for rebelliousness, for resistance to Sunnī governors and to the payment of the levy (for the collection of taxes by force under Hārūn al-Ras͟hīd; the destruction of the city's fortifications at the orders of al-Maʾmūn, who more than tripled the already excessive rate of *k͟harādj* exacted from the Ḳumīs; and a further punitive expedition ending in massacre in the reign of al-Muʿtazz, see Schwarz, 562). By contrast, a S͟hīʿī governor was accorded such co-operation that he was recalled by the caliph (Fisher, 56). Also to be noted are the conflicts between the people of Ḳum and the people of Iṣfahān, who were fanatical Sunnī (Faḳīhī, 222).

In the 3rd/9th century, the principal settlement was Manīdjān, one of the original "seven villages" or "seven fortresses" (Faḳīhī, 13, 58 ff.). In the 4th/10th century, Ḳum was described as a prosperous city, fortified with a rampart, with fields well-irrigated by means of canals, dams and pumping apparatus. The majority of the population was S͟hīʿī, ethnically Arab but Persian-speaking (Ibn Ḥawḳal, *K. Ṣūrat al-arḍ*, ed. Kramers, 370). There were frequent disputes between Ḳum and settlements lying up-stream (Taymara/Gulpāygān and Anār/Maḥallāt) regarding the distribution of the waters of the Anārbār. The flooding of this river was sometimes catastrophic (notably in 292/904-5, 1634, 1670, 1881, 1893: see Houtum-Schindler, 65 ff.; M. Bazin, *La vie rurale*, 33 ff.). With its many *ʿulamāʾ* (tradition tells of seventeen *tābiʿūn* and of hundreds of As͟hʿarī *ruwāt* (see Faḳīhī, 37 ff.; in the 3rd/9th century there were two hundred and sixty-six S͟hīʿī *ʿulamāʾ* and fourteen Sunnī *ʿulamāʾ*, *ibid.*, 309) and especially the family of the famous S͟hayk͟h Ṣadūḳ (Muḥammad b. ʿAlī b. Bābūya), Ḳum could boast of having preceeded Nadjaf as a great theological centre.

The prosperity of the city seems to have begun with its administrative independence from Iṣfahān in 189/804-5. In 201/816-17, Fāṭima al-Maʿṣūma went to visit her brother, the Eighth Imām, ʿAlī b. Mūsā al-Riḍā, at Ṭūs. She fell ill at Sāwa (a Sunnī town) and asked to be taken to Ḳum, where she died and was buried. Besides the town's reputation as a centre of theological education, it was this event which contributed most to its fame. The town expanded progressively from north-east to south-west in the direction of the tomb of Fāṭima, which ultimately

became its centre (Faḳīhī, 94 ff.). Patronised by the Būyids (Faḳīhī, 127 ff.), Ḳum was renowned in the Saldjūḳ period for its *madrasas*, for the sanctuary of Fāṭima (visited by Sunnīs as well as Shīʿīs), for its religious foundations, and also for its administrators and viziers (see J. Calmard, in *Le monde iranien et l'Islam*, Paris-Geneva 1971, i, 58 ff.) as well as for its many *ʿulamāʾ* and scholars, known by the *nisbas* of Ḳumī, Barḳī, Baravistānī, Ṭabrisī (from Ṭabris/Ṭafrish), etc. At the time of the Mongol conquest in 621/1224, its inhabitants were massacred, possibly at the instigation of the Sunnīs (see Faḳīhī, 223). Ḥamd Allāh Mustawfī described the town as being mostly in ruins in the 8th/14th century. It seems, however, that there was an attempt at reviving the region under the Īlkhāns, as evidenced by some important hydraulic constructions: the weighted dam at Sāwa (end of the 13th century) and the vaulted dam at Kebar, 25 km. to the south of Ḳum (see H. Goblot, *Kébar en Iran, sans doute le plus ancien des barrages-voûtes (1300 environ)*, in *Science Progrès (La Nature)*, Paris, February 1965, 50-6; the same, in *Arts et Manufactures*, Paris, June 1965, 43-9, April 1973, 15-20). Although travellers have drawn attention to the massacre perpetrated by Tīmūr, it seems that the Tīmūrids showed respect and favour to this holy city (we may note the mosque of Gawhar-Shād, wife of Shāh-Rukh, near the mausoleum of Fāṭima, and the fact that the sultan Muḥammad, son of Baysunghur, chose Ḳum as his capital in 846/1442: see Faḳīhī, 144-7). It was in any case from the 9th/14th century onwards that the town began to enjoy definite royal patronage. The Turkoman sultans Djahān-Shāh, Uzun Ḥasan, Yaʿḳūb, Murād and Alvand used it as a kind of winter capital for hunting, and this tradition was continued under the earlier Ṣafawids, Ismāʿīl I and Ṭahmāsp I (Fisher, 56 ff.; Faḳīhī, 147 ff.; on the *farmāns*, Turkomans charged with the appointment of an official (*mutawallī* of the sanctuary and *naḳīb* of the *sayyids*), see Mudarrisī Ṭabāṭabāʾī, in *Farhang-i Īrān-zamīn*, xix/1-4, 118-35).

But it was above all the result of the religious policy of Shāh ʿAbbās I—consisting in attracting pilgrims to the Shīʿī shrines of Iran (Mashhad and Ḳum) rather than to those of ʿIrāḳ, then controlled by the Ottomans—which endowed Ḳum with an unprecedented glamour. The sanctuary was embellished, and two of its four *ṣaḥns* were transformed into a *madrasa* with a hostel for pilgrims. Many *ʿulamāʾ* came to Ḳum to study, men such as Mullā Muḥsin Fayḍ, Mullā ʿAbd al-Razzāḳ Lāhidjī, Mullā Ṣadrā Shīrāzī, Ḳāḍī Saʿīd Ḳumī, etc. (Fisher, 57). Traditions extolling the sanctity of the soil of Ḳum became current, and to the hundreds of tombs of Imām-zādas (at the time Amīn Aḥmad Rāzī counted 444 of them) were added the tombs of thousands of the faithful. The descendants of Shāh ʿAbbās I were buried there, as were thirty-one other princes (M. Bazin, *Qom, ville de pèlerinage*, 84). No other Iranian city has such a vast number of tombs of *ʿulamāʾ*, of distinguished people or of simple believers, and the cemeteries extend over an enormous area.

In the 17th century, travellers described at length the merits of the town's craft-products (rapier and sabre blades, silks, cottons, glass, porcelain, porous white ceramics, etc.: see Bazin, *Qom*, 105). But at the same time it was a kind of land of exile for deposed aristocrats (Faḳīhī, 151), and insolvent debtors took refuge in the sanctuary (Gemelli Careri, ii, 74-5). Money was coined at Ḳum in the 3rd/9th and 4th/10th centuries, and it appears that the Ṣafawids and the Ḳādjārs sought to re-establish this tradition (Houtum-Schindler, 73; Faḳīhī, 39, 152 ff.).

After the terrible depression of the 18th century (pillage by the Afghāns, massacres perpetrated by Ibrāhīm Khān, brother of Nādir Shāh and by an Uzbek governor in the service of this sovereign: Faḳīhī, 224 ff.), the practice of building royal monuments was revived by the Ḳādjārs. The shrine of Fāṭima built by ʿAbbās I was embellished by Fatḥ ʿAlī Shāh who also built a *madrasa*. The vast "new court" (*ṣaḥn-i djadīd*) was constructed by Amīn al-Sulṭān, vizier of Nāṣir al-Dīn Shāh, in 1883. Around the "old court" (*ṣaḥn-i ʿatīḳ*) stand an octagonal monument containing the tombs of senior Ḳādjār dignitaries (Fatḥ ʿAlī Shāh, Muḥammad Shāh, his wife Mahd-i Awliyā, etc.) and the sanctuary library (1,000 manuscripts and 8,800 volumes) which also contains a museum. The Masdjid-i Aʿẓam, constructed on the orders of the Āyat Allāh Burūdjirdī (d. 1961), stands to the west of the sanctuary which includes other monuments (for a plan of the sanctuary, see Bazin, *Qom*, 91; Fisher, 58; a history of the monuments, including a description of their contemporary state, with plans and illustrations of inscriptions, documents, etc., is supplied by Mudarrisī Ṭabāṭabāʾī, *Turbat-i pākān*, 2 vols., Ḳum 2535/1976). The city-sanctuary today (1976) comprises fourteen large traditional *madrasas*, supervised by the Āyat Allāhs, four modern schools (Fisher, 23) as well as numerous private libraries, the most important being that of the Āyat Allāh Marʿashī Nadjafī (70,000 volumes including 15,000 manuscripts). After 1965, the sanctuary was administered by a *mutawallī* nominated by the Shāh (Fisher, 66). The revenues of the sanctuary and the annual number of pilgrims (about a million in 1970) are poor in comparison with those of Mashhad (four and a half million, including tourists, in 1352/1973-4). Nevertheless the spiritual role of Ḳum continues to be very important. Since 1340/1920, a modern Centre for Theological Education (*Ḥawḍa-yi ʿilmī*) has been established there (Fisher, 62 ff.). Three of the most eminent *mardjaʿ-i taḳlīd* (Gulpāygānī, Marʿashī Nadjafī, Sharīʿat Madārī) reside there (on the religious élite and the role of the *mardjaʿ-i taḳlīd*, see Fisher, 30 ff., and A. K. S. Lambton in *Studia Islamica*, xx [1964], 115-35).

The demographic evolution of the town—which, in spite of mistakes on the part of travellers, may be more or less traced from the 9th/15th century onwards—contributes to an understanding of the vicissitudes that have affected it:

20,000 houses in 1474 (Barbaro)
2,000 hearths in 1524 (Tenreiro)
2,000 hearths in 1565 (Mestre Afonso)
2,000 families in 1627 (Herbert)
15,000 houses in 1673 (Chardin)
50 houses (*sic*) in 1796 (Olivier)

(each hearth, house or family should represent five to six persons).

After 1850, the population fluctuated between 20,000 and 25,000 inhabitants (with a drop to 14,000 in 1874-5 on account of a famine; see A. K. S. Lambton, *Landlord and peasant*, 153, n. 3) rising to 35,000 in 1886-7. Since 1913 (30,000) the population has grown continuously (55,000 in 1937-8; 81,540 in 1947-8; 96,499 in 1956; 134,292 in 1966; and 246,873 in 1976).

Under the Ḳādjārs, Ḳum was a haven of refuge (*bast-nishīnī*) for political opponents of the régime. This opposition was particularly marked during the

events of the constitutional revolution of 1905-11. Under Riḍā Shāh (1925-41), the opposition of certain *ʿulamāʾ* was also manifested in various ways (Fisher, 62). There now exists a dichotomy between technocratic and religious power, and some influential *ʿulamāʾ* of Ḳum have encouraged their disciples to rebel: examples are Kāshānī, under Muṣaddiḳ, and Khumaynī, who was arrested on the 15th of Khurdād (5th of June) 1963 and exiled to Turkey, then to ʿIrāḳ (see H. Algar, in *Scholars, saints and Sufis*, ed. N. R. Keddie, Berkeley-Los Angeles 1972, 241 ff.); and riots involving "Muslim Marxists" on the 15th of Khurdād, 1975 (Fisher, 77 ff.). The troubles which convulsed the whole of Iran in 1978 began in Ḳum between the 7th and 9th of January 1978. In October 1978, Khumaynī took refuge in France, at Neauphle-le-Château, whence he led the opposition which caused the Shah's departure from Iran. He returned to Tehran (1 February 1979) and thence to Ḳum (1 March 1979). He still represents the most radical Islamic tendency; a steadfast though more moderate opposition had crystallised around other *ʿulamāʾ*, especially the *mardjaʿ-i taḳlīd* of Ḳum, Sharīʿat Madārī.

(J. CALMARD)

AL-ḲŪMĀ or **AL-ḲAWMĀ**, the name of one of the seven types of post-classical poetry [see KĀN WA-KĀN]. It was invented by the people of Baghdād, and is connected with the *saḥūr*, i.e. the last part of the night when, during the month of Ramaḍān, it is still permitted to eat and drink and to take meals at that time; it derives its name from the expression *ḳūmā li 'l-saḥūr* which the singers recite after each strophe of a *ramal* or *zadjal* in praise of the master of the house. Contrary to what is generally believed, it does not seem that *ḳūmā* is the imperative dual, "Arise, both of you!", but the singular *ḳūman* > *ḳūmā* "Arise!". This interpretation is justified by Ḳurʾān, XCVI, 15, *la-nasfaʿā bi 'l-nāṣiya* (for *la-nasfaʿan*), and better still, by a verse of ʿUmar b. Abī Rabīʿa (*Dīwān*, Cairo 1371/1952, 226, l. 4), where we have exactly *ḳūmā* for *ḳūman* "Arise!" as the rhymeword (cf. Ibn Ḳutayba, *Anwāʾ*, § 158; al-Masʿūdī, *Murūdj*, iii 340 = § 1317). The origin of this poetic genre is obscure, and it is probable that it existed before Ibn Nuḳṭa, who is said to have invented it to please the ʿAbbāsid caliph al-Nāṣir (575-622/1179-1225). At all events, the *ḳūmā*, which is always in Arabic colloquial, has only been cultivated in ʿIrāḳ, where it has been used to express various themes, such as those of love, of wine-drinking, of flower-description, etc.

Technically, there are two types of *ḳūmā*:

Type 1 is made up of strophes of four hemistichs,

of which three (the first, second and fourth) are the same in length and rhyme with each other, whilst the third is longer and does not rhyme with the rest.

hemistiches 1, 2, 4 { *mustafʿilun* / *mafāʿilun* / *mutāfaʿilun* } { *fāʿilān* / *faʿilān* / *faʿlān* / *faʿlun* }

hemistich 3 *mustafʿilun* { *fāʿilātun* / *faʿilātun* }

Type 2 is made up of three hemistiches of the same rhyme, but of increasing length—

hemistich 1 { *mustafʿilātun* / *mafāʿilātun* }

hemistich 2 *fāʿilātun, fāʿilātun*

hemistich 3 { *mustafʿilun, mustafʿilun, mustafʿilātun* / *mafāʿilun mafāʿilun* }

(M. BEN CHENEB - [CH. PELLAT])

ḲUMĀN, a Turkish people whose origin is connected with Central Asia. In all probability their forefathers are to be found in the people indicated by Marwazī (*Ṭabāʾiʿ al-ḥayawān*, ed. Minorsky, 18, § 3), as *s̲h̲ārī* (*sārī*), identical with the Yellow Uyghurs, who since about 850 A.D. were living to the east of the Tarim basin. This name is probably derived from their physiognomy, varying from that of the other Turkic peoples. At the beginning of the 11th century A.D. (*ca.* 1012-18), the Sārī left their homeland under the pressure of the Ḳūn [*q.v.*] who were migrating to the west before the Ḳitāy. This movement of peoples reached in the west also the regions of the Turkmens, who were driven away to new areas. In the newly-conquered regions to the north of the Sīr Daryā, close contact between the participants in this migration (the Sārī and the Ḳūn) and the Kīmāk and Ḳipčaḳ [*q.vv.*] tribes who were living there, led to the formation of a new tribal confederation. It is probable that about this time the Sārī (*sarī* = yellow) were given by other Turkic-speaking peoples the name *ḳumān*, derived from a root with similar meaning (*ḳū* = yellowish).

A few decades later the Ḳumān pressed forward to the west. Apart from their own name, various other names were mentioned in Western and Armenian sources (*polovci, polovcy, plauci, plavci, Valben, Valwen, Falones, Xarteš*, etc.), but semantically these terms ("yellow, pale, sallow, bright, clear") accord with the meaning of the name Ḳumān. Towards the middle of the 11th century A.D., the Ḳumān were living in the Dniepr region. In 1062 they started launching attacks against Kiev, and in 1078, together with the Pečenegs, against Byzantium. In 1085 they took part in the rebellion of the Bulghars, but in 1091 they were allies with emperor Alexius against the Pečenegs. Their raids against Hungary started in the same period. Hungarian historical sources mention them under the name Ḳūn (*cuni, chuni*), but it has not yet become clear whether these tribes can be put in direct relation with the above-mentioned Ḳūn, who probably were absorbed later by the Sārī (i.e. the Ḳumān). In 1094 and again in 1114 the Emperor Alexius waged two quite important wars against the Ḳumān, who were to be pushed back to the other side of the Danube. The Mongol invasion put an end to the control of the Ḳumān over the Pontic steppes, and after the final defeat in 1239, a part of them sought refuge in Bulgaria. Thus they played an important rôle in the history of Hungary, in that of the second reign of the Bulgarian Tsars and in that of Byzantium. The Ḳumān who had remained in the Pontus area were incorporated into the western part of the Mongol empire called Ḳīpčaḳ [see DAS̲H̲T-I ḲĪPČAḲ in Suppl.].

The most important document of the Ḳumān language is the *Codex Cumanicus* (14th century) a collection of texts brought together in South Russia by Italian and German missionaries. Some rudimentary remnants of the language are also found in Hungarian. Important references to their language are further present in loan-words of Ḳumān origin in Hungarian, Bulgarian and Rumanian, as well as in place-names in various regions of these countries.

(G. HAZAI)

ḲUMĀS̲H̲ (A. pl. *aḳmis̲h̲a*), in general sense, "cloth", but in a more particularised sense, "a Mamlūk garment". The term *ḳumās̲h̲* in the later Middle Ages commonly designated "cloth" or any "woven stuff" in general and was synonymous with the classical words *bazz* and *t̲h̲iyāb*. Abu 'l-Faḍl al-Dimas̲h̲ḳī (*ca.* 5/11th century) does not use the term at all in his handbook for merchants *K. al-Is̲h̲āra ilā maḥāsin al-tid̲j̲āra* (Cairo 1318), but the word is employed by the 4th/10th century geographer Ibn Ḥawkal in his *K. Ṣūrat al-arḍ* (BGA ii², ed. J. H. Kramers, Leiden 1938, 132). It rarely appears in the documents of the Cairo Geniza [*q.v.*] (for example, TS 16.298, ed. S. D. Goitein, *India book*, 190, l. 13; *al-ḳumās̲h̲ al-s̲h̲arb*—"fine linen stuff"). *Ḳumās̲h̲* does not seem to have come into common usage until Mamlūk times. Thereafter, it became the general word for fabric throughout the Middle East and is still current in most dialects, as well as in Persian and Turkish. It never seems to have been particularly common in the Mag̲h̲rib, although the Ḥafṣid Abū Zakariyāʾ (625-47/1228-49) is reported to have built a *sūḳ al-ḳumās̲h̲* in Tunis.

Under the Mamlūks, *ḳumās̲h̲* took on the specialised meaning of "dress uniform" although this sense is not found in any dictionary. A young Mamlūk was presented with his horse, a *ḳumās̲h̲*, and a sword upon his manumission and induction into the corps. Sulṭān al-Nāṣir Muḥammad b. Ḳalāwūn (693-741/1293-1341) is credited with introducing the *s̲h̲ās̲h̲ wa 'l-ḳumās̲h̲*, or "turban cloth and formal coat" of a Mamlūk warrior (Ibn Iyās, *Badāʾiʿ al-zuhūr fī waḳāʾiʿ al-duhūr*, Būlāḳ 1311, i, 173, ll. 15 f.). This dress uniform was also called *ḳumās̲h̲ al-k̲h̲idma* (service coat), *ḳumās̲h̲ al-rukūb*, and *ḳumās̲h̲ al-mawkib* (parade or processional coast). The Mamlūk *ḳumās̲h̲*

must have been a heavy garment. Mamlūk soldiers threw off their armour and *ḳumās͟h* when fleeing the battlefield (Mayer, *Mamluk costume*, 76, citing al-Yūnīnī), and the Sulṭān al-Malik al-As͟hraf Ḳāʾitbāy (872-901/1468-96) is reported to have abolished the obligation of wearing the *ḳumās͟h* for ordinary palace service (*k͟hidmat al-ḳaṣr*) as it was too hot for continual wear throughout most of the year in Egypt (Ibn Iyās, *op. cit.*, iii, ed. P. Kahle and M. Mostafa, Istanbul 1931, 322, l. 12). The less formal coat for everyday wear was called *ḳumās͟h al-d͟julūs*.

Ḳumās͟h (pl. *ḳumās͟hāt*) was also sometimes used in Mamlūk terminology as a synonym for *kanbūs͟h* or "caparison" of a horse (Ibn al-Furāt, *Taʾrīk͟h al-Duwal wa 'l-mulūk*, ed. Ḳ. Zurayḳ and N. Izzedin, Beirut 1942, ix, 247, ll. 9 f.).

B. Serjeant, *Islamic textiles: material for a history up to the Mongol conquest*, Beirut 1972. The best survey on the concept of *ḳumās͟h* as a form of attire is to be found in L. A. Mayer, *Mamluk costume*, Geneva 1952, 75-80.

(N. A. Stillmann)

al-**KUMAYT** b. **ZAYD** al-**ASADĪ**, Abu 'l-Mustahill, an Arab poet of Kūfa (60-126/680-743) who is not to be confused with two earlier and lesser known Asadīs, al-Kumayt b. Maʿrūf and al-Kumayt b. Thaʿlaba (see Ibn al-Kalbī-Caskel, *D͟jamhara*, ii, 373; Ibn Sallām, *Ṭabaḳāt*; al-Āmidī, *Muʾtalif*, no. 571; Ibn Ḥad͟jar, *Iṣāba*, nos. 7498 and 7499; etc.).

Al-Kumayt applied himself in an indirect fashion to the poetry and the language of the Bedouins, and he was acquainted with poets such as al-Farazdaḳ, Ruʾba b. al-ʿAd͟jd͟jād͟j and the K͟hārid͟jī al-Ṭirimmāḥ, whose hostility towards the Umayyads he shared; in contrast to the last-mentioned, he came under the influence of the S͟hīʿi tendencies of his native town and these had a decisive effect on the direction that his career was to take, inspiring him with violently pro-ʿAlid opinions. He is reckoned to have acquired a fairly extensive intellectual training, and he also possessed a talent for oratory which shows in his poems, to the extent that some critics regard them as speeches. At first a schoolteacher in a Kūfa mosque, he was pressed by his family, so at least tradition has it, to set his poetic gifts to work and to undertake a poetic career which nowadays would be called "committed". Henceforward he acquired distinction with the composition of verses in praise of the Ahl al-Bayt [*q.v.*] and of a series of poems, among which the best known are his long *Mud͟hahhaba* directed against the Yemenīs and his *Malḥama* in praise of the Ḳurays͟h. The chronology of his work is far from clear, and the outstanding incidents of his career cannot be dated with certainty. His celebrated conflicts with the governor K͟hālid b. ʿAbd Allāh al-Ḳasrī (105-20/723-38 [*q.v.*]) and the decision of His͟hām b. ʿAbd al-Malik (105-25/724-43) to have him put to death, have given rise to conflicting accounts which are difficult to reconcile and to romantic embellishments which are to be treated with caution. It was probably the *Mud͟hahhaba* which earned him the hostility of K͟hālid, at a time when the latter needed assurance of the loyalty of the South Arabian elements. By a circuitous procedure, the governor informed the caliph of the attitude of the poet, who was imprisoned; with the help of his wife, who had come to visit him, he succeeded in escaping disguised as a woman and, after a period of wandering, he finally obtained pardon from the caliph through the mediation of the prince Maslama b. His͟hām. On his return to Kūfa, he must have been gratified at the dismissal of K͟hālid (120/738); although his successor, Yūsuf b. ʿUmar al-T͟haḳafī [*q.v.*] was responsible, two years later (122/740), for the death of Zayd b. ʿAlī [*q.v.*], who had allowed himself to become involved in a S͟hīʿī revolt, al-Kumayt had no scruples about flattering him, although he did not succeed in deluding the Yemenī soldiers of his guard, who, on an occasion when he arrived to recite a poem, inflicted on him a mortal wound (126/743).

The renown of the poet, maintained by S͟hīʿī circles, rests fundamentally on the *Hās͟himiyyāt*, which have been the objects of a commentary by Abū Riyās͟h (d. 339/950 [*q.v.* in Suppl.]) and of a number of editions: of M. S͟hākir al-K͟hayyāṭ (Cairo 1321, 1331), of Muḥammad Maḥmūd al-Rāfiʿī (*S͟harḥ al-Hās͟himiyyāt*, Cairo n.d. [1928]), of ʿAbd al-Mutaʿāl al-Ṣaʿīdī, with a quite interesting commentary (*al-Kumayt b. Zayd al-Asadī, s͟hāʿir al-ʿaṣr al-marwānī wa-ḳaṣāʾiduh al-Hās͟himiyyāt*, Cairo n.d.), and most of all, of J. Horovitz, with a German translation (*Die Haschimijat des Kumait*, Leiden 1904). In spite of the title, the poet's praises are not aimed at all the Banū Hās͟him, but principally at the Prophet and at ʿAlī and his descendants. Some verses (i, 79, ii, 105 ff. of the Horovitz edition), in which mention is made of ʿAbbās and of his sons, were no doubt added in the ʿAbbāsid period, perhaps by the son of al-Kumayt, al-Mustahill, who was also a poet (see *Ag͟hānī*, index) and was concerned to perpetuate his father's memory. The *Hās͟himiyyāt* are composed, in the Horovitz edition, of four long *ḳaṣīdas* (103, 140, 133 and 111 verses), of two short *ḳaṣīdas* (33 and 20 verses), of one fragment of seven verses of which more than half constitutes an opening typical of the *ḳaṣīda*, and of four short pieces of six, two, two and two verses. In the long poems, al-Kumayt follows the framework of the *ḳaṣīda*, but with a short and not very conventional *nasīb*. In the *raḥīl*, he follows the classical tradition, and subsequently he produces lavish eulogies of the ʿAlids similar to those that were addressed to the Bedouin *sayyids*. He also borrows frequently from the Ḳurʾān, to such an extent that a scholar of Kūfa, Ibn Kunāsa [*q.v.*] was able to compose, in the 2nd/8th century, a *Kitāb Sariḳāt al-Kumayt min al-Ḳurʾān*. Some philologists and poets accuse him of plagiarism and inconsequence (see for example, al-Marzubānī, *Muwas͟hs͟hah*, 191-8) and do not judge him worthy, in spite of his antiquity, of figuring among the poets who serve as a "proof", a *ḥud͟jd͟ja* (cf. al-Bag͟hdādī who takes his *s͟hāhid* no. 16 from a poem of al-Kumayt). His compositions were on the other hand very highly regarded in S͟hīʿī circles, whose members probably did not hesitate to add to them verses or even whole sections of which he was not the author. For R. Blachère, "the simplicity of the language, the platitude of the arguments makes one think of a poetry of propaganda aimed at a public (possibly urban) immune to the lexicographic beauties of the desert poets." The language of al-Kumayt nevertheless does not lack refinement, but the artifi-

cial use of a badly-understood *gharīb* was a source of irritation to some of his contemporaries. In fact, the importance of the *Hāshimiyyāt*, insofar as they are entirely authentic, resides in the opinions and the sentiments current in the Shīʿī circles—or rather Zaydī circles, so it seems—of Kūfa which they reflect. Al-Kumayt, it is true, regards the first caliphs as usurpers (iv, 10), but he refrains from excommunicating them, even if they did wrong in not handing Fadak [*q.v.*] back to Fāṭima; ʿAlī is the *waṣī* of the Prophet, who bequeathed the *walāya* to him near the pool of Khumm (vi, 6, which seems to be the earliest evidence of this Shīʿī doctrine); it is to the ʿAlids alone that power belongs and it is they who will consolidate afresh the foundations of Islam which unworthy rulers have shaken. The poet's enthusiasm does not, however, run to the extent of leading him to take up arms in support of the ʿAlid cause, personified especially by Zayd b. ʿAlī, and his warfare is limited to virulent versified attacks on the ruling régime, although his convictions do not prevent him from addressing compliments to it, as is shown by the eulogies of Maslama and of Hishām himself, after his tirades had been pardoned. He recognises, besides, that in doing this, he had used *taḳiyya* [*q.v.*], in a verse (iv, 86) where this term, according to Goldziher (in *ZDMG*, lx, 219) is used for the first time in the sense which the Shīʿis give to it (Goldziher, in *ZA*, xxii [1909], cf. *Arabica*, vii/1 [1960], 11, also comments on the metempsychosis referred to in iii, vv. 39-40).

It is probable that Hishām would not have shown so much clemency if he had really known the content of the *Hāshimiyyāt*; these must in fact have been circulated surreptitiously, with or without the complicity of the local authorities. It seems clear, in fact, in spite of divergences in the traditions, that al-Kumayt owed his rebuffs to the *Mudhahhaba* alone. This poem of 300 verses, of which only a part has been preserved, is a riposte to a Kalbī poet referred to by the name al-Aʿwar, who had attacked Muḍar and, among them, the ʿAlids. In the *Hāshimiyyāt* there is no sign of any hostility towards the Yemenīs, and the poet had even lauded the Muhallabids in the person of Makhlad b. Yazīd b. al-Muhallab, which seems to prove that the section in which were enumerated the disreputable characteristics of the tribes of the Yemen is of a mainly occasional nature. Not only was this poem the primary cause of the assassination of al-Kumayt, but in addition, al-Masʿūdī (*Murūdj*, vi, 36-46 = §§ 2267-72) comes close to seeing here both a manifestation and a cause of the conflicts between the Northern and Southern Arabs which led to the fall of the Umayyads. This *Mudhahhaba* certainly enjoyed a dangerous renown among the tribes of Muḍar, since, at the beginning of the following century, another Shīʿī poet, Diʿbil al-Khuzāʿī [*q.v.*], still considered it advisable to refute it and to take up the defence of the Yemenīs in a *ḳaṣīda*, which is said to have comprised 600 verses, of which only 25 are now extant (see ʿAbd al-Karīm al-Ashtar, *Shiʿr Diʿbil*, Damascus 1384/1964, 193-7; idem, *Diʿbil b. ʿAlī al-Khuzāʿī*[2], Damascus 1967, index).

As for the *Malḥama*, preserved by Abū Zayd al-Kurashī (*Djamhara*, 187 ff.), it comprises 56 verses and contains general and personal observations and the eulogy of Ḳuraysh, that is, ultimately of the Umayyads.

The *Dīwān* of al-Kumayt, which must have contained 5,000 verses, has been the object—proof of the interest aroused by this poet—of a number of recensions by Ibn Kunāsa, Al-Aṣmaʿī, al-Sukkarī and Ibn al-Sikkīt (*Fihrist*, 158; Cairo ed., 225). It has been partially reconstituted by Dāwūd Sallūm, Baghdād 1969-70 (3 vols. without the *Hāshimiyyāt*).

In spite of the studies that have been devoted to him, the personality of this poet, who was capable of composing eulogies simultaneously to the ʿAlids and the Umayyads, remains inscrutable, even enigmatic, by reason of the meagre credit that may be accorded to the sources, Sunnī as well as Shīʿī; his versatility, even when justified by *taḳiyya*, is such as to throw doubt upon his sincerity and to advise the greatest caution in the use of his work.

(J. Horovitz - [Ch. Pellat])

KUMĪDJĪS, a people mentioned in the Arabic and Persian historical and geographical sources of the 4th/10th and 5th/11th centuries as dwelling in the Buttaman Mts. at the heads of the valleys running southwards through Khuttal and Čaghāniyān down to the course of the upper Oxus. The *Ḥudūd al-ʿālam* (372/982) describes them as professional brigands and as linked with a smaller group, the Kandjīna Turks. In fact, these two peoples must be remnants of some earlier waves of invaders from Inner Asia, left behind in the Pamir region, probably of the Hephthalites [see HAYĀṬILA], or even of the earlier Sakas; Ptolemy mentions a Saka tribe of Kōmēdai, and it is accordingly probable that the name of our people should be read as *Kumēdh-djīs. Sources like Gardīzī and Bayhaḳī mention the Kumīdjīs as marauders called in by warring factions during the decline of the Sāmānids (*e.g.* by Abū ʿAlī Čaghānī), and during the disintegration of Ghaznawid power in the west (*e.g.* by the incoming Ḳarakhānids); but with the opening of the Saldjūḳ period, they disappear from recorded history.

(C. E. Bosworth)

KUMIS, the Russian form of the Turkish *ḳïmïz* "fermented mare's milk", "koumiss", the staple drink of the steppe peoples of Eurasia from the earliest time. Herodotus refers to its manufacture by the Scyths and the Chinese sources to its use amongst the Ancient Turks and the Khitan. William of Rubruck, who calls it *cosmos*, describes in detail the production of this drink by the 13th-century Mongols: and we read in the *Secret history of the*

Mongols how the youthful Čingiz-Khān, fleeing from the Tayiči'ut, sought refuge in a tent "in which koumiss was churned all through the night till the dawn". In this, as in other respects, the Tīmūrids continued the practice of their Čingizid predecessors; and koumiss is prepared and drunk to this day by the nomads of North-Eastern Asia.

Bibliography: G. Doerfer, *Türkische und mongolische Elemente im Neupersischen*, iii, Wiesbaden 1967, 512-17 (No. 1529). (J. A. Boyle)

ḲŪMIS, the Arabic transcription of the Latin *comes*, a title which in al-Andalus denoted the person responsible to the state for the *mu'āhidūn* [*q.v.*] or Scriptuaries, or at least, for the Christian Mozarabs [*q.v.*]. According to A. Fattal, "les représentants religieux des *ḏimmīs* sont autorisés par le pouvoir, moyennant *waṣiyya*, a exercer leur autorité. Il semble bien que les Arabes de la conquête respectèrent tant l'organisation administrative que judiciaire, que religieuse des populations soumises". Certain capitulation documents (*'ahd*, *ṣulḥ*) [*q.v.*] expressly affirm this: "They shall not be forbidden the exercise of their religious cult and shall keep their own laws". This was the case in al-Andalus, as reflected in clauses 3-9 of the "treaty of Tūdmīr" [*q.v.*].

The first known *comes* was *Arṭubās ḳūmis al-Andalus wa-za'īm 'Adjam al-dhimma wa-mustakhridj kharādjihim li-umarā' al-muslimīn* (Ibn al-Khaṭīb, *Iḥāṭa*, 109), who advised the governor Abu 'l-Khaṭṭār to grant to the Syrians fiefs of income (Chalmeta, *Concesiones territoriales*, in *Cuadernos de Historia Hispania*, vi, 1975). According to Ibn al-Ḳūṭiyya, *Iftitāḥ*, 38, "he was the first to exercise *ḳimāsa* in Muslim Spain". We have therefore here a concentration in the person of the protector or defensor of extremely wide powers, embracing administrative, judicial and probably—to a certain degree—religious ones. At least, this is what one can deduce from the treatment as *serenissimo hominum catholicorum summo* which Alvaro of Cordova accords to the Count Romanus (*Corus*, 211), as does Ibn Khaldūn from Aṣbagh b. 'Abd Allāh. In this context, it would probably be correct to see in the confiscation of Ardobas's properties not only a "resumption of former crown domains" (*ṣafāyā al-mulūk*), but also an extraordinary impost (not paid in cash) of the same type as we find in the East (Fattal, *Le statut légal*, 220-4) or as that which probably cost the Count Ḥazmīr his life. The *ḳūmis* was equally responsible, as *mustakhridj*—which could be translated by the Latin *exceptor*—for the collecting of taxes on his co-religionists. As such, he had to levy not only the *kharādj* and *djizya*, but also all extraordinary imposts (*ma'āwin*, *maghārim*). This gave him a certain expertise and "vocation" as a professional tax-collector, and it explains the fact that we find under al-Ḥakam I a *ḳūmis* Rabī' in charge of all taxes, on *dhimmīs* and Muslims equally (Ibn al-Khaṭīb, *A'māl*, 15).

The *comes* was, then, a Christian, appointed by the state, but we do not know whether he was officially designated from above or nominated after proposal and election of his co-religionists. As an official, he had his subordinates. His powers made him the supreme judicial authority over his flock, by virtue of his röle as *za'īm* or head of the community. He was therefore by virtue of his office also *ḳāḍī al-'Adjam* or *ḳāḍī al-naṣārā*, whether in person, or by delegating his powers. Consequently, the meagre list of our "counts" should be completed by adding the list of *censores* or *iudices* (a hypothesis put forward, but not followed up, by Simonet, *Historia de los mozarabes*, 112).

The names of some *ḳawāmis* have come down to us. After Arṭubās, one should doubtless place a certain Alfonso, since the genealogy of 'Umar b. Ḥafṣūn given by Ibn Khaldūn (*'Ibar*, iv, 134). and Ibn 'Idhārī (*Bayān*, ii, 108), quoting Ibn Ḥayyān, gives him as the sixth descendant after a *ḳūmis* Adfunsh. Rabī' b. Theodulf, *mutawallī al-mu'āhidīn min al-naṣārā*, was not only the hated chief tax collector over the Cordovans, but also commander of the foreign palace guards of al-Ḥakam I, and ended up by being crucified (Ibn Ḥazm, *Djamhara*, 96). He was probably followed by the count (and physician) Romanus cited by Alvarus (*Corpus*, 211). St. Eulogius mentions one Isaac, a noble Cordovan who, before retiring to the monastery of Tabanos, had been *doctus lingua arabica, exceptoris rei publicae officio fungeretur* (*Corpus*, 402). Ḳūmis b. Antunyān, who served in 'Abd al-Raḥmān II's administration and was *kātib* to the *amīr* Muḥammad, and who is stigmatised by Alvaro and St. Eulogius as a hateful persecutor, *Ecclesiae publicanus... publicae rei exceptor*, should be included amongst the *comes* (and not amongst the "Gomez", as according to Simonet), because of (a) his function as *mustakhridj*, and (b) the fact that he seems to have been the official intermediary (much more than Recafred, metropolitan of Seville) between the state and the Mozarabs. With this authority, he transmitted the *amīr*'s commands, and consigned members of his flock to jail, when necessary, not as a state official, but as the leader and one responsible for the Christians under his jurisdiction. He presided over the council at Cordova in 852 which forbade the Mozarabs to seek voluntary martyrdom. The course of events shows that he had not only the backing of the whole state apparatus but also that of the majority of his community. The upper classes were unable to agree, and he reached the point of fearing for his life (Khushanī, *Ḳuḍāt*, 130-1; Ibn Ḥayyān, *Muḳtabas*, ii, 138, 142), but things did not go as far as his assassination, as frequently happened in the East (Fattal, *op. cit.*, 220-3). He must have been followed by the *comes* Servandus, who held power in *ca.* 853, according to Alvaro (*Corpus*, 214, 551, 554, 560, 581). Ibn Antunyān's son, also the *amīr*'s *kātib*, disappeared in 298/911 (*Bayān*, ii, 153). The Archpriest Cyprianus wrote in *ca.* 890 his *Epigrammas* for the *comes* Adulfus, and he also mentions a *comes* Guifredus (*Corpus*, 685-6). Ibn al-Ḳūṭiyya (*Iftitāḥ*, 5) cites his contemporary Abū Sa'īd *al-ḳūmis*, as well as the *ḳāḍī al-'Adjam* Ḥafṣ b. Albar, both of them descendants of Artobas. Ibn 'Idhārī (*Bayān*, ii, 142) records under the year 293/905 that "Ḥazmīr *al-ḳūmis* was imprisoned; he was tortured and underwent the torture of the iron boot until he died". It is likely that the *ḳāḍī al-naṣārā* of Cordova in 351/962, who acted as interpreter for Ordoño IV, was also the "*comes* of the Mozarabs". This was doubtless also the case with Aṣbagh b. 'Abd Allāh b. Nabīl, who was commissioned, in the name of the 'Āmirid 'Abd al-Malik, to arbitrate in the dispute over the tutelage of Alfonso V between the two counts, Sancho Garcia of Castile and Menendo Gonzalez of Léon. Aṣbagh must have been the successor of Mu'āwiya b. Lubb, who was *ḳūmis* in 361/971. According to Ibn Bashkuwāl (*Ṣila*, No. 443), there was in the time of the caliphate a little market in Cordova called the *suwayḳat al-ḳūmis*.

The fact that, in the course of the 4th/10th century, one finds more references to judges than to counts,

in contexts where one would expect the reverse, must indicate a lowering of the latter's status, who by then had lost many of his duties. It is hard to believe that Ibn Zaydūn, appointed by Abu 'l-Walīd Ibn Djahwar to "enquire into certain affairs of the dhimmis" (Ibn al-Abbār, *Iʿtāb al-kuttāb*, 212-13), can have had the title of *ḳūmis*. Indeed, if he had really fulfilled this role, it would have been indicative of a profound change, since Christians would have become subject to a Muslim and not to one of their co-religionists. It is very possible that Ibn al-Ḳallās, *kabīr al-muʿāhidīn* of Granada in 1125-6, at the time of Alfonso the Warrior's Andalusian expedition, was *comes* of the Mozarabs (*Iḥāṭa*, 113, 116). The disorders of the period of *fitna* [*q.v.*], conducive to rebellions, the emigration of native Christians to the kingdoms of the north, and the severities of the Almoravids and Almohads, explain the silence of our sources for the later periods.

The term *ḳūmis* was applied not only to the head of the Mozarabs, however, but also to the counts of the Christian kingdoms. Ibn Ḥayyān (*Muḳtabas*, v) says that Ordoño II rallied for warfare all his counts at the siege of Evora in 301/913. He gives this title to the counts of Alaba and Djallīḳiya, to the Banū Gūmis and Banū Anshūr, and cites by specific name Sandjo b. Gharsiya (Banbalūna), Fardhiland b. Ghundishalb (Ḳashtīliya), Barmundh b. Nuño (Shalamanka), Abu 'l-Mundhir (Gormaz), Fortūn b. Gharsiya known as Amāṭ *al-ḳūmis*, Rudhmīr *al-ḳūmis* alias Ibn Māmma Ṭūta, the counts Manyūra and Falīn, and above all, *al-Ḳumṭ ḳūmis Djarisha*. At the time of al-Ḥakam II (*Muḳtabas*, vi), the same author gives this title to Bon Filyo, Gundishalb b. Munyo, Esimeno b. Gharsiya and Ashraka b. ʿUmar b. Dāwūd. Ibn Khaldūn, in his chapter in the *K. al-ʿIbar* on the Christian kings of Spain, speaks of Fernan Gonzalez and Garcia Fernandez *ḳūmis Alaba wa 'l-Ḳilaʿ*, Menendo Gonzalez *ḳūmis Ghalisiya*, Henry of Burgundy, and the Banū Gūmis and Banū Fardhiland, as well as Alvar Fañez. Ibn Bassām spoke in *ca.* 1010 of the *ḳūmis* Raymund, lord of Barcelona. Speaking of events from the beginning of the 6th/12th century, Ibn Khaldūn uses *ḳumṭ*, *aḳmāṭ* for Raymond of Burgundy, Don Nuño (Gonzalez de Lara) and Henry of Trastamara. The *Vocabulista* attributed to R. Martí gives *ḳumṭ*, *aḳmāṭ* as the equivalent of *comes*; P. de Alcalá has *conde o condesa* = *cónd*, *aqnát*; whilst the *Fragmento . . . reyes nazaries* published by Müller and re-edited by Bustani-Quiros (Larache 1940) translates "count" by *kundī*.

ḲŪMIS, a small province of mediaeval Islamic Persia, lying to the south of the Alburz chain watershed and extending into the northern fringes of the Dasht-i Kavīr. Its western boundaries lay almost in the eastern rural districts of Ray, whilst on the east it marched with Khurāsān, with which it was indeed at times linked. It was bisected by the great Ray-Khurāsān highway, along which were situated the chief towns of Ḳūmis, from west to east Khuwār or Khawār (classical Χοαρηνή, modern Aradūn), Simnān [*q.v.*]. Dāmghān [*q.v.*], and Bisṭām [*q.v.*], whilst at its south-eastern extremity, out in the Great Desert, was the small town of Biyār [*q.v.* in Suppl.], modern Biyārdjumand. The administrative capital of Ḳūmis was Dāmghān, which is often accordingly called in the sources Madīnat Ḳūmis or Shahr-i Ḳūmis, according to a well-known toponomastic process (cf. the town of Bardasīr/Kirmān). The name Ḳūmis is obsolete today, and the lands making up the mediaeval province are included administratively in the *farmāndārī-yi kull* or governorate of Simnān and the *ustān* or province of Māzandarān. The present-day town of Shāhrūd, just to the south-west of Bisṭām, does not seem to have been in existence as such in mediaeval times.

The province was one of considerable importance in pre-Islamic times. In Greek sources it appears as Κωμισηνή, and in Armenian writers like Sebeos and Moses of Khoren as Komsh. H. W. Bailey, in *JRAS* (1970), 61-2, has suggested that the name derives from an Old Ir. root *ka-*, *kaur-*, conveying the idea of "hollowness", plus a passive or agental suffix, whence Komish "opened up, excavated place". Seleucus Nicator seized the satrapy of Parthia between 311 and 302 B.C., and it was allegedly he who founded the "city of a hundred gates", Hecatompylos, although it almost certainly existed before then; a legend retailed in the 8th century A.D. Middle Persian catalogue of the towns of Iran says that Ḳūmis "the five-towered" (*pandj-burg*) was built by the sorcerer Azh-i Dahāk, whilst from later Islamic times, Ḥamd Allāh Mustawfī, *Nuzha*, 161, tr. 157, attributes the building of Dāmghān to the hero Hūshang. Such classical authors as Strabo, Pliny, Ptolemy, etc. mention Hecatompylos as the royal city of the Parthians, and some of these sources give the distance of the city from the Caspian Gates (e.g. Strabo, 1260 *stadia*, and Pliny, 133 *milia passuum*; the consensus of modern opinion tends to identify the Caspian Gates with the Sar-Darrah defile through the Kūh-i Namak spur of the Alburz). But the site was never properly identified with any reasonable certainty, although it was thought that it probably lay somewhere between the towns of Dāmghān and Shāhrūd, until recently, however, Hansman and Stronach have examined and excavated the site of the modern spot called Shahr-i Ḳūmis, near Ḳūsha to the south-west of Dāmghān on the Simnān road. It seems that this very extensive site could well be the ancient Parthian capital, apparently largely abandoned around the middle of the 1st century B.C. when the Arsacids moved their winter capital to Ctesiphon. See A. D. Mordtmann, *Hekatompylos*, in *SB Bayer. Akad. der Wiss.*, Phil.-Hist. Cl. (1869), 497-536; Pauly-Wissowa, xii/2, cols. 2790-7, *s.v.* (Kiessling); Markwart-Messina, *A catalogue of the provincial capitals of Ērānshahr*, Rome 1931, 12, 55-6; R. N. Frye, *The heritage of Persia*, London 1962, 183-4; J. Hansman, *The problems of Qūmis*, in *JRAS* (1968), 111-39; idem and D. Stronach, *Excavations at Shahr-i Qumis*, 1967, in *JRAS* (1970), 29-62; idem, *A Sasanian repository at Shahr-i Qumis*, in *ibid.*, 142-55; S. Matheson, *Persia: an archaeological guide*[1], London 1972, 191-2.

In Sāsānid times, there seems to have been a refounding of Kōmish, perhaps by Yazdagird I (399-421) as a defensive post against the Turks and Hephthalites [see HAYĀṬILA] who were threatening the north-eastern frontiers of his kingdom. The region

retained its old connection with the Parthians through its being the home of the noble Parthian family of Mihrān, to whom belonged the Spahpat (Islamic form, Ispahbadh, [*q.v.*]) Pahlav, killed by Hormizd IV (579-90); in the next reign, Kōmish was the residence of the Spahpat of Khurāsān, Ķāren of Nihāwand [see ĶĀRINIDS for the subsequent history of this family]. There was there a highly-venerated fire-temple, described in Middle Persian sources of the early Islamic period as burning perpetually without fuel (whence, presumably, its N. Pers. name Khurishn < M. Pers. *a-xvarišn* "without food"), obviously a fire fed from some volcanic source or else from a natural seepage of petroleum. Towards the end of the Sāsānid period, however, the administrative centre of the province seems to have been transferred to the apparently new foundation of Dāmghān, which thereafter acquired in early Islamic times the name of [Madīnat] Ķūmis. It may have been that the old Kōmish of middle Sāsānid times had never been more than a frontier post, since no Sāsānid coins are known to have been minted there. See Marquart, *Ērānšahr*, 71-2; Markwart-Messina, *A catalogue of the provincial capitals of Ērānshahr*, 56-7; Hansman, *The problems of Qūmis*, 136-9.

At the time of the Arab conquest of Persia, the men of Ķūmis fought in the Sāsānid army at Nihāwand and at the defence of Ray, but the province offered no resistance to the Arabs thereafter. According to al-Balādhurī, *Futūḥ*, 318, Sulaymān b. ʿUmar al-Ḍabbī sent troops into Ķūmis, but according to al-Ṭabarī, i, 2656-7, the caliph ʿUmar sent an army under Suwayd b. Muķarrin in 22/643, and Ķūmis was thereafter used as a base for attacks on Gurgān and the Caspian region. As with Djibāl and Ray, it was Arab warriors from Kūfa who garrisoned the chief town of Dāmghān. Al-Ṭabarī further records, i, 2839, that the more northerly highway to Khurāsān was less used in these early decades than the one via Fārs and Kirmān, since Ķūmis was vulnerable to attacks by Daylamī and other mountain peoples of the Alburz; it was, so he says, the governor Ķutayba b. Muslim [*q.v.*] who first regularly used the Ķūmis route to Khurāsān and Transoxania (cf. C. E. Bosworth, *Sīstān under the Arabs, from the Islamic conquest to the rise of the Ṣaffārids (30-250/651-864)*, Rome 1968, 20). In fact, the governor ʿAbd Allāh b. ʿĀmir b. Kurayz [*q.v.*] had used that route in 31/652, according to al-Yaʿķūbī, *Taʾrīkh*, ii, 192. The region had meanwhile been disturbed by Khāridjī sectaries, involving the appearance there of the Azraķī leader ʿAbīda b. Hilāl al-Yashkurī in 77/696 with the remnants of Ķaṭarī b. al-Fudjāʾa's forces fleeing before the pursuing Umayyad army [see AZĀRIĶA and ĶAṬARĪ B. AL-FUDJĀʾA]. Also, soon after 127/744-5, Ķūmis, together with much of northern Persia, was occupied by the ʿAlid pretender ʿAbd Allāh b. Muʿāwiya [*q.v.*] (al-Ṭabarī, ii, 1880, 1976). Reform type *dirhams* were minted under the name Ķūmis from 91/710 onwards, but there do not seem to have been any Arab-Sāsānid coins minted there (cf. J. Walker, *A catalogue of the Muhammadan coins in the British Museum. i. Arab-Sassanian coins*, London 1941, pp. cxxxviii-cxxxix).

Administratively, Ķūmis was mostly linked during this period with Damāwand [*q.v.*] or Dumbāwand and with northwestern Persia in general; thus under the caliph Hishām, Ķūmis and Iṣfahān both formed part of the governorship of Ray (al-Yaʿķūbī, ii, 388), until in 164/780-1 under the early ʿAbbāsids Ķūmis was separated from Ray, according to al-Ṭabarī, iii, 503. Abū Muslim's troops early occupied Ķūmis in their march westwards during the ʿAbbāsid revolution, and some years later, in 137/754-5, it was briefly seized by the anti-ʿAbbāsid Persian rebel Sunbādh [*q.v.*]. In the 3rd/9th century, Ķūmis suffered several severe bouts of plague (e.g. in 242/856-7), and in 259/873 it was occupied temporarily by the ʿAlid al-Ḥasan b. Zayd b. Muḥammad [*q.v.*] in his expansionary wars outside his base of Ṭabaristān (al-Ṭabarī, iii, 1880). By the beginning of the 4th/10th century, Ķūmis had fallen away from caliphal control, and was disputed by various Daylamī and other adventurers contending, together with the major powers of the Būyids and Sāmānids, for mastery in northern Persia; at various times, Būyids, Sāmānids and Ziyārids controlled it, as the evidence of coins, principally bearing the mint-name of Dāmghān, shows (cf. E. von Zambaur, *Die Münzprägungen des Islams, zeitlich und örtlich geordnet*, i, Wiesbaden 1968, 115).

The geographers of this period give descriptions of the province, usually dealing with it town-by-town. They emphasise its fertility, with exports of its fruit, such as the famed *ķūmisī* and *bisṭāmī* apples, as far as ʿIrāķ, and the fame of its woollen, silk and goats' hair textiles and carpets (see e.g. al-Yaʿķūbī, *Buldān*, 276, tr. Wiet, 80; Abū Dulaf, *Second Risāla*, tr. Minorsky, *Abū-Dulaf Misʿar ibn Muhalhil's travels in Iran (circa A.D. 950)*, Cairo 1955, 56-8; Muķaddasī, 367; according to al-Djāḥiẓ's *K. al-Tabaṣṣur bi 'l-tidjāra*, Ķūmisī *ṭaylasān*s were the best procurable after those of Rūyān, Āmul and Egypt (cf. R. B. Serjeant, *Islamic textiles, material for a history up to the Mongol conquest*, Beirut 1972, 75, 80). The *Ḥudūd al-ʿālam*, tr. Minorsky, 135, § 32, comments on the bellicosity of the people of Ķūmis and Dāmghān, perhaps a reflection of their position, exposed to attacks along the Khurāsān highroad and from the Caspian region. Al-Muķaddasī, 353, 367-8, comments on the piety of the Ḥanafī inhabitants of Ķūmis and on the peculiarities of their Persian dialect, which he says is connected with that of Ṭabaristān and which seems to show archaic features. Various authorities give the tax-yield of the province, from the figures of Ibn Khurradādhbih (mid-3rd/9th century), 34, of 2,196,000 *dirhams* to those of al-Muķaddasī, 371, according to whom the *kharādj* of Ķūmis amounted to 1,196,000 *dirhams* plus 26,000 *dirhams* from Biyār [*q.v.* in Suppl.], this before Biyār was transferred administratively from Ķūmis by the Sāmānid *amīr* Naṣr b. Aḥmad (301-31/914-43) and linked with Nīshāpūr and Khurāsān.

From the beginning of the 5th/11th century, the name Ķūmis gradually drops out of usage, although Mustawfī (8th/14th century) still uses it in his *Nuzha*, 162-3, tr. 157-8, to denote the province; its last appearance on a coin appears to be on a Ziyārid *dirham* of 364/974-5 (Zambaur, *op. cit.*, 199).

(C. E. BOSWORTH)

ĶŪMIYA, one of the most important tribes of the Maghrib in the Middle Ages; they were at one time called Saṭfūra and were descended through Fātin from Mādghīs al-Abtar. Tradition says that the brothers of Ķūmiya, the eponymous ancestor of the tribe, were Lemāya and Maṭghara from whom were descended numerous families, some of whom still exist at the present day. The most important representatives of the Ķūmiya, who live in the north-

west of Algeria between Tlemcen and Areshḳūl (Rashgun) are the B. ʿĀbid, from whom was descended the first caliph of the Almohad dynasty, ʿAbd al-Muʾmin [*q.v.*], born at Tādjera between Humayn and Nedroma; the Nedroma who gave their name to an important town; the Saghāra, now represented by the Mātila, the Banū Hūl, of whom a section the Masīfa still exist. The Kūmiya showed themselves devoted to ʿAbd al-Muʾmin, who was one of them. They formed the second *djund* in the Almohad army; but they exhausted themselves in supplying the dynasty with soldiers for the wars in Spain and North Africa. Subjected to *kharādj* by the Zenāta. some of them joined another group, the Ūlhāṣa and formed the powerful confederation of Trāra in the north-west of Algeria.

Bibliography: R. Basset, *Nédromah et les Traras*, Paris 1901, and the writers there quoted.

(R. Basset)

ḲUM(M)Ī, Ḳāḍī Aḥmad Ibrāhīmī Ḥusaynī, Persian chronicler and chancery clerk (*munshī*), was born on 17 Rabīʿ I 953/18 May 1546 in Ḳum(m), the son of the *munshī* Sharaf al-Dīn Ḥusayn al-Ḥusaynī. In 964/1556-7 he went with his father to Mashhad at the court of the art-loving prince Ibrāhīm Mīrzā b. Bahrām Mīrzā b. Ismāʿīl I, where he was trained by well-known calligraphers. In 973/1566 he was a *munshī* at the court of Shāh Ṭahmāsp I, together with his father. At the instigation of Shāh Ismāʿīl II, he started composing in 984-5/1576-7 his chronicle *Khulāṣat al-tawārīkh*. From 984-8/1576-1580 he was employed at the chancellery of *mustawfī al-mamālik* Mīr Shāh Ghāzī, in 988/1580 as financial supervisor with Erdoghdī Khalīfa Takkalu and from 959/1581 onwards worked at the highest level of the financial administration by command of the highest authority. In 997/1589 he was at the residence of Shāh ʿAbbās I to whom he dedicated in 999/1591 his chronicle *Khulāṣat al-tawārīkh*. About his further life nothing is known; so far his works are the only sources for his life (see Minorsky, 1-12, Müller 3-7).

Ḳum(m)ī composed at least three works: 1. *Madjmaʿ* (or *Tadhkirat*) *al-shuʿarā-yi ʿAbbāsī*. The work has not been preserved but the author refers to it several times in his later works. According to these references the work must have been an anthology of at least six volumes in which among other things information was given about the lives of great scholars, scientists and poets.

2. *Khulāṣat al-tawārīkh*, a ch onicle in five volumes, of which the fifth volume only has been preserved. It describes at full length the history of the Ṣafawids from their origin to the first years of the reign of Shāh ʿAbbās I and was probably composed between 995/1587 and 1000/1592. It exists in five manuscripts. The first part of this volume, dealing with the early Ṣafawids, has been published, translated into German and annotated by E. Glassen, and the last part, in which the first years of Shāh ʿAbbās I are treated, by H. Müller. This chronicle is one of the most important sources of Ṣafawid history. Although the first part is highly dependent upon other known and unknown sources, the sections dealing with later times, witnessed by the author himself, give truly independent information. Together with Iskandar Beg Munshī's *ʿĀlamārā-yi ʿAbbāsī*, it may be considered as one of the two most important sources for the period of Shāh ʿAbbās I.

3. *Gulistān-i hunar*, a treatise on calligraphers and painters, composed *ca.* 1005/1597, exists in several incomplete manuscripts; it has been edited by A. S. Khʷānsārī, translated into Russian by B. N. Zakhoder and into English by V. Minorsky. The contents of this work, classified according to the various kinds of writing, are mainly based on earlier sources. There are however many important observations by the author himself on contemporary calligraphers, whom he had plenty opportunity to meet at the court of Ibrāhīm Mīrzā, at that time a flourishing centre for calligraphy.

For other works, possibly written by Ḳum(m)ī (*Muntakhab al-wuzarāʾ* and *Madjmaʿ al-khiyār*) see Müller, 8-10.

(H. Müller)

ḲUMR, the Arabic name for the Comoro Is., a group of four islands in the Indian Ocean at the northern exit of the Mozambique Channel, halfway between East Africa and northern Madagascar. The largest island of the archipelago is Grande Comore (in the local language: Ngazija; in the chronicles also: Hangazidja, Langazidja, al-Angazidja, Ḳum[u]r), with 1148 km² and *ca.* 120,000 inhabitants (1966); followed by Anjouan (Nzwani, Hinzwani; in older Portuguese and English sources: Johanna) with 424 km² and *ca.* 85,000 inhabitants; Mayotte (Mayuta, Ma[h]ore) with 374 km² and *ca.* 28,000 inhabitants; and Mohéli (Mwali; in older European sources Molaly, Mohilla etc.), with 290 km² and *ca.* 10,000 inhabitants. The capital of the islands is Moroni on Grande Comore. The islands are of volcanic origin (still active is the volcano Karthala, 2361 m, on Grande Comore) and consist mainly of basalt and tuff. The climate is tropical-maritime with the heaviest rainfalls from November to April. The natural vegetation is a dense rain-forest with rare varieties of wood, which, however, for the most part have been rooted out and replaced by plantations and savannas. Agricultural products of importance for export are coco palms, vanilla, coffee, pepper, aromatic plants (ylang-ylang), sisal and sugar-cane. Cattle-breeding and fishery are scarcely developed.

The population, which suffers from a very high birthrate (outside the islands, in Madagascar and

East Africa, there already live about 300,000 Comorians, cf. Guy, *Islam comorien*, 149), has developed from three different ethnic elements; (a) Bantus from East Africa, (b) Malayo-Indonesians who came via Madagascar, and (c) Arabs who immigrated directly from South Arabia (especially Ḥaḍramawt) or from Arab settlements in East Africa. The Comorian language is divided into two main dialects, the Shi-Ngazija and the Shi-Nzwani, and, at least from the phonetic point of view, seems to be related more to the Venda, a Bantu language spoken on the middle Limpopo river, than to Swahili (Heepe, *Die Komorendialekte*, 45). Like Swahili, which is well understood by most of the Comorians, it has incorporated many Arabic loanwords. While Arabic seems to have been used as the written language still in the last century, most of the recent chronicles and correspondence are written in the local language with Arabic letters. Arabic is taught in Ḳur'ān-schools but is understood only by a small minority. The Comorians are Sunnī Muslims of the Shāfiʿī rite, but many African animistic conceptions and magic practices have survived in popular belief (cf. Robineau, *Société*, 51, with further references). Al-Nawawī's *Minhādj al-ṭālibīn* is widely used and still serves as the theoretical base for Civil Law. The Shafiʿī law was widely respected by the French administration, but in many fields it is supplemented by the customary law (*ada*) which shows many matriarchal characteristics (e.g. law of succession). The Ṣūfī brotherhoods of the Shādhiliyya, Tidjāniyya, Rāfiʿiyya, Ḳādiriyya and ʿAlawiyya play a very important part in religious life (sc. Guy, *Islam comorien*, 145 ff.).

Local legendary tradition, as well as false identifications of place-names, have led some former historians (Gevrey, Grandidier, etc.) to fantastic speculations about the early relations between the Comoro Is. and the ancient Mediterranean world. Until now there seems to be only one hint which deserves some attention and which might establish such relations. Pliny gives as the name for an island, the location of which would fit well with one of the Comoro Is., Damnia, and Von Wissmann (art. *Zangenae*, in *Paulys Realencyclopädie*, Suppl.-Bd. xi [1968], 1339) may be right in identifying Damnia with Domoni, an old settlement on Anjouan and formerly used as name for the whole island. Arab geographers, including the pilots of the 15th and 16th century like Ibn Mādjid and Sulaymān al-Mahrī, used the name Ḳumr for Madagascar exclusively and cited, if they did at all, each of the islands by its proper name (cf. Tibbets, *Arab navigation in the Indian Ocean*, London 1971, 432). Local tradition starts the history of the islands with the legendary report (unknown on the Swahili coast) of the immigration of two families from the Arabian peninsula some years after the death of Solomon. But the first traditions which deserve more interest are those that speak of the arrival of Bantu-speaking people from East Africa to Grande Comore at an unknown date but in any case before the 14th century. One chronicle (Rotter, *Muslimische Inseln*, 24) calls them Wa-Mizi and Tungi; Mizi as a place-name was already known to Pliny (Von Wissmann, *Zangenae*, 1339) and corresponds with modern Kilwa Kisimani, while Tungi is identical with Tungui south of Cap Delgado. Since a group of former slaves in Anjouan bears the name Makwa (Robineau, *Islam*, 46; idem, *Société*, 34) which corresponds with the tribe Makua in the hinterland of Tungui, it is very likely that at least the greatest part of the Bantu element on the Comoro Is. came from the East African coast between Lindi and the mouth of the Limpopo River. This fits with the above-mentioned linguistic facts. At least on Anjouan these Africans were not the first inhabitants, but merged with an older population, now generally called Antalaotra, of Malayo-Indonesian race, which might have immigrated in the course of the first millenium (cf. Robineau, *Société*, 34) via Madagascar (former European sources often call them wrongly Bushmen, cf. Repiquet, *Sultanat*, 50).

The local tradition of Grande Comore and Anjouan has preserved the names of the ruling houses before the coming of the Shīrāzī (15th century). On Grande Comore the *ma-fey* (or *ma-fe* "chiefs", cf. Swahili *fu* and *fumu*) are said to have established and ruled the first eleven villages, before they were defeated by the *ma-beja* (cf. Swahili *wa-mbeja*) (Harries, *Swahili chronicle*, 12, 71). On Anjouan the *beja* are regarded as the oldest ruling class, which was replaced by chiefs who bore the title *fani* (Faurec, *L'Archipel*, 33). Although we must take for granted that at that time, i.e. in the first half of this millenium, Arab or Swahilised-Arab merchants were in contact with the islands, and some of them might have settled there, it is difficult to say, whether Islam was already wide-spread. It is noteworthy, however, that the last *fani*-rulers on Anjouan bore Arab names like ʿAlī and ʿĪsā.

The decisive turn in Comorian history was the arrival of the Shīrāzīs in the second half of the 15th or the beginning of the 16th century, who by fighting and intermarriage seized power on all four islands (the coming of the Shīrāzī clan with their ancestor Muḥammad b. ʿĪsā is described through the legend of the Seven Brothers which is also well-known in East Africa, cf. among others, Chittick, *Shirazi colonization*, 276; Trimingham, *Islam in East Africa*, 10 ff.) and became the real founders of Islamic culture on the islands (the first mosques were built by them at Tsaweni on Grande Comore, at Sima and Domoni on Anjouan, and at Chingoni on Mayotte, all in the middle of the 16th century).

In the following three centuries the political situation was marked by (i) very complicated internal dynastic struggles, (ii) the invasions of the Malagasy tribes, Sakalava and Betsimisaraka, and (iii) the growing political influence of the French and British in the area.

(i) Grande Comore was divided into eleven more or less independent territories (Bajini, La Dombe, Bambao, Hambu, Itsandra, Hamamvu, Mitsamihuli, Mbude, Mbaku, Washili, Hamahame) ruled by sultans who only seldom jointly recognised the supremacy (*utibe*) of one of them. Sulṭān Aḥmad (= Mwinye Mkuu) (1793-1875), the son of Shaykh Ngome from Pate in northern Swahili country, and of Mwana Mtiti, half-sister of a *sulṭāna* of Grande Comore (women rulers were not unusual, and the maternal line was often accorded higher prestige on all four islands) was the last really great personality who, at least for some years, managed to unify the islands, before he was defeated by Mūsā Fumu. The rivalry between Sulṭān Aḥmad's grandson Sayyid ʿAlī, the favourite of the French, and Mūsā Fumu (d. 1883 in prison), who was supported by the British and the Sultan of Zanzibar, marked the last years of independence. Against the will of most of the other sultans ʿAlī signed in 1886 a treaty of protectorate with France.—On Anjouan the political situation was characterised by the bipolarisation of the two main towns Domoni, which was made the capital by the Shīrāzīs after Sima, and Mutsamudu, which became the political and commercial centre from the

end of the 18th century onwards when power shifted from the clan (*ḳabīla*) of Āl Madwa to the clan of Āl Masīla (both names show their Ḥaḍramawtī origin, cf. B. G. Martin, *Migrations from the Hadramawt to East Africa*, in *Centre of Arabic Documentation, Research Bulletin*, Ibadan 1973). Continuous succession struggles in the first half of the 19th century were only ended by Sulṭān Sālim (1842-55), whose son Sulṭān ʿAbd Allāh III (1855-1890) put his island under French protection. Neither was Mayotte spared from dynastic rivalries within the Shīrāzī clan who ruled at Chingoni from the 16th century. In addition, the situation was complicated by the constant attempts of the sultans of Anjouan to bring Mayotte under their control. The last Shīrāzī sultan ceded his island in 1832 to the Malagasy nobleman of the Hova tribe Ramanetaka who already ruled on Mohéli. In 1835 or 1836 Ramanetaka was defeated by the Sakalava Dia-Ntsoli (= Andrian-Tsouli), and the island became nominally a possession of the sultan of Anjouan. The same Dia-Ntsoli, without the authorisation of the sultan of Anjouan, in 1841 presented the island to France. The smallest island Mohéli apparently was always dependent on Anjouan, until in 1830 the above-mentioned Ramanetaka (d. 1841) after having become a Muslim, appointed himself sultan of the island. One of his descendants signed the treaty of protection with France in 1886.

(ii) There seems to have been a more or less peaceful influx of Malagasy people to the islands throughout the centuries, but around the turn of the 19th century the nearly annual invasions of the Betsimisaraka and Sakalava threatened the political and cultural integrity of the islands. The main reason for these invasions, which caused heavy losses among the population and the destruction of whole settlements, was the search for slaves, although some groups had been summoned by the quarrelling sultans themselves. Only after the Anglo-Malagasy treaty of 1817 did the invasions gradually stop. In the following decade it was the political situation on Madagascar and the extension of the Hova state that drove large groups of Sakalava (under Dia-Ntsoli) and Betsimisaraka (under Ramanetaka) to the islands. They finally settled down on Mayotte and Mohéli.

(iii) The first contact with a European power was a short visit of the Portuguese on Grande Comore about 1505 which, however, left no permanent traces on the islands. In the first half of the 19th century when the British and the French disputed control of the Indian Ocean, the Comoro Is. also became involved. In taking possession of Mayotte in 1841, France tried to counterbalance the growing British influence on the other three islands (in 1833 the British had reinstalled Sultan ʿAbd Allāh II on Anjouan by force). Only after the British slowly withdrew from the Malagasy region after 1880 could France bring the other islands under its protection in 1886 (a process intensively studied by B. Dubins, *Political history*).

From 1914 till 1946 the whole archipelago was placed under the Gouvernement Général of Madagascar. On 6 July 1975 the Comoro Is. declared their independence, except for Mayotte, where on 11 April 1976 a referendum saw a large majority voting to become a *département outre-mer* of France.

ḲUMUḲ (variant: Ḳumiḳ) a people of the eastern Caucasus. The Ḳumuḳs belong to the Ḳipčaḳ Turkic ethnic group, along with the Noghay, Karačay and Balkar. They live north of the main chain of the Great Caucasus, on the northern, northeastern and eastern slopes of the Dāghistānian Caucasus between the foothills and the Caspian Sea, from Derbend to Adzhi-Su (near the lower Terek River). Although confined to a narrow strip of land in the south, they inhabit a wider area near the Terek in the north. The Ḳumuḳs are bordered by the Noghays in the north, the Avars [*q.v.*] and Darghins [*q.v.*] in the west, and Tabasarans and Azeris [*q.v.*] in the south. The major rivers in Ḳumuḳ territory are the Terek, Sulak, Shura, Ullu-Čai, Gamzi, Manas, Aksai and Gubden. The great majority of Ḳumuḳs are Sunnī Muslims of the Ḥanafī school, although some Ḳumuḳs of Derbend and Makhačḳala are "Twelver" Shīʿīs. The 1926 Soviet census lists 94,549 ethnic Ḳumuḳs, of which some 10,000 lived outside Dāghistān, and 94,909 Ḳumuḳ-speaking people. The 1959 Soviet census lists 134,967 ethnic Ḳumuḳs, and 132,303 Ḳumuḳ-speakers. (Due to the adoption of Russian as a primary language by Ḳumuḳ-speakers in the north, and Azeri by those in the south, the relative number of Ḳumuḳ-speaking people has declined, despite increasing numbers of

mountaineers using Ḳumuḳ as their primary language.)

The Ḳumuḳs inhabit eight districts of the Dāghistān ASSR: Baba-Yurt, Khasav-Yurt and Ḳizil-Yurt on the northern plains, and Buynaksk and Karabudakhkent in the eastern coastal plains. The "Southern Ḳumuḳs" (Ḳumuḳs of Kayakent) live in the Kayakent district and in the villages of Mağalis, Yangikent and Tumenler in the Ḳaytaḳ district. The Ḳumuḳs are also found in six settlements in the vicinity of Makhačḳala, and in the cities of Makhačḳala, Khasav-Yurt, Buynaksk, Izberbash and Derbend. A number of Ḳumuḳs live outside Dāghistān on the Noghay steppes in the Groznyi region, north of the Terek River, as well as in North Ossetia.

The ethnic origin of the Ḳumuḳs is complex and difficult to determine. They are probably a mixture of the indigenous Ibero-Caucasian tribes and various nomadic Turkic groups (Kuman-Polovtsi, Khazar, Ḳïpčaḳ, etc.) who were pushed into the lowlands from the North Caucasian steppes in the 11th-13th centuries, imposing their language on the inhabitants.

The formation of the Ḳumuḳ people began in the 7th century when the Khazars [q.v.] overran the plains of southern Russia and populated them with Turkic-speaking peoples. The indigenous Ibero-Caucasian population mixed with these Turkic peoples, especially the Ḳïpčaḳs [q.v.], and adopted their language. The Ḳumuḳ "nationality" appeared in the 13th century on the steppes of northern Dāghistān when successive waves of the Golden Horde pushed these Turkic-speaking peoples southwards. Their Islamisation began immediately, under the influence of the Golden Horde from the north and the Laks from the south, and was completed by the 14th century when the Golden Horde annexed northern Dāghistān. Prior to this, the people had been Christians, Jews and animists.

The first political organisation of the Ḳumuḳs was the feudal Shamkhalat, which united all the Ḳumuḳs as well as other northern and eastern Dāghistāni peoples. The Shamkhal originally resided in the mountains of the Lak (Ḳazi-Ḳumuḳ) region. When Shamkhal Čoban died in 986/1578, the Laks shook off the rule of his son Sulṭān-But, and the centre of government was shifted to Buynaksk. After 1050/1640, Tarku was the capital of the Shamkhalat. In the 16th century the Shamkhal ruled most of northern Dāghistān. The semi-independent states of Endirey, Aksaey, Kosteko, Bammatulah, Buinaksk, etc. were all headed by representatives of the Shamkhal of Tarku's family.

The Shamkhals acknowledged Persian sovereignty throughout their existence, in spite of their strong diplomatic ties with Russia in the late 16th century when Russia was attempting expansion into Dāghistān. The power of the Shamkhalat began to decline with the wars against the Kabardines and Georgians. It lost control of the area between the Terek and Sulak Rivers first, then the Darghin and Lak regions in the 17th century. However, the Russian expeditions of 1586, 1590 and 1604 were defeated by a joint Ḳumuḳ and Ottoman effort. Although the Shamkhals were formally vassals to the Moscow state, they remained close allies of the Ottomans from the late 16th till the late 18th centuries. In 1725 the Russians ended independent Shamkhal rule and the decline of the Ḳumuḳs was completed with the creation of the Mehtulin and Bammatulah Khānates. By 1765 the Shamkhalat was reduced to a 2,500 km² strip of land along the Caspian Sea.

Imām Manṣūr attempted to rally the feudal nobility of the Caucasus (especially among the Ḳumuḳs and Kabarda) against the Russians in the late 18th century, but failed. The Treaty of Gülistān (1813) formally ceded Dāghistān to Russia, but the Ḳumuḳs continued to be governed by the Shamkhals. After the Russians subdued the Murīd insurrection (1834-59) led by the Imām Shamīl [q.v.], the Ḳumuḳs and the other Dāghistāni peoples were incorporated into the Russian Empire. Native rule was supplanted by a Tsarist military administration.

A small Ḳumuḳ intelligentsia emerged in the early 20th century. They had been educated in the *Djadīd* [q.v.] schools on the borders of Dāghistān, and were among the first to be impregnated with socialist ideas. This small group was destined to provide the leadership for the national liberal movement (which was doomed to failure) during and after the Russian Revolution.

In 1917 the Ḳumuḳs played an important role in the North Caucasus peoples' move for independence. Motivated by their own political traditions and Turkic cultural influences, they favoured a "Turkic" consolidation of Dāghistān (as opposed to the "Islamic" consolidation favoured by conservative Dāghistānis), with linguistic unification based on Ḳumuḳ or Azeri. They sought to become part of the great Pan-Turkic movement centred on Bākū, Ḳāzān and the Crimea. Following a power struggle between the religious and conservative elements led by *Shaykh* Uzun Hağï and Imām Gotsinski and the socialists, the Soviet régime was established in the principal cities on the plain in April 1918. By September 1918, General Bičerahov's "White" army, equipped in Persia by the English, had crushed the Soviet forces. Soviet power was not re-established in Dāghistān until 1920 when the Eleventh Red Army defeated Denikin's White Army and drove the partisans of Imām Gotsinski back into the mountains.

The Ḳumuḳs had one of the most powerful, complete and complex feudal structures in Dāghistān before the Revolution. The ruling class consisted of the Shamkhal, *beks*, high nobility (*čanka*), middle nobles (*sala-uzden*), and religious leaders. The freemen (*uzden*), free serfs (*čagar*, organised into various groups (*dims*)), serfs bound to the land (*terkeme*, living in separate *aul*s and working the land), and house slaves (*kul*, a very small group) comprised the lower classes. The merchant class grew rapidly with the rise of industry and capitalism in the late 19th century, but the working class was never large, since most industry was domestically oriented.

The Ḳumuḳ language belongs to the Ḳïpčaḳ-Oghuz subgroup of the Ḳïpčaḳ group of Turkic languages, to which the Noghay and Ḳaračay-Balkar languages also belong. Ḳumuḳ has three dialects: Khaydak is strongly influenced by the Ibero-Caucasian languages and is used by the Meridional Ḳumuḳs; Buynaksk, and Khasav-yurt (or Aksay), which forms the basis of the literary language, developed with the Arabic script in the late 19th century. In 1927 a Latin alphabet replaced the Arabic, and Cyrillic script was adopted in 1938. Ḳumuḳ was the *lingua franca* of the Dāghistāni peoples. The first Dāghistāni Communists accepted this rôle for Ḳumuḳ in the 1920s, but Russian was later adopted as the official language. Although Avar has replaced Ḳumuḳ as an inter-tribal language, Ḳumuḳ remains the second or third language of certain Ibero-Caucasian peoples in north and central Dāghistān (Andi-Dido-Avar, Darghin, Lak). Article 78 of the *Constitution of the ASSR of Dāghistān*

names Ḳumuḳ as one of the nine official literary languages of Dāghistān.

The Ḳumuḳs are the only Dāghistān people having a true national literature which dates back to the early 19th century. These early works were generally local versions of heroic epics or adventure novels, and were often consigned to small pamphlets destined for public readings. Turkic-language publications from Ḳāzān, Adharbāydjān, the Crimea and Turkey satisfied the desire for other literature. Christian missionary publications of the early 19th century were instrumental in the development of a literary language. Written in a composite language of various Caucasian peoples, they were among the first written literature of the area.

Ḳumuḳ literature came under the influence of the Turkic modernist movement centred on Ḳāzān and Baghčesarāy in the second half of the 19th century, resulting in the nationalistic poetry of Yūsuf from Yakhay and Ayyûb from Djengutay. In 1883 the Ḳumuḳ ʿOsmānov Muḥammad (b. 1843) published an anthology of Ḳumuḳ and Noghay folklore and literary texts in St. Petersburg, where he was a member of the Faculty of Oriental Languages at the Academy of Sciences. The collection includes a letter in verse, dated 1872, from the revolutionary Ḳumuḳ poet Yirči Ḳazaḳ (1830-80), inviting Muḥammad Efendi, then a student at St. Petersburg, to return home. This letter is one of the oldest literary vestiges of the Ḳumuḳ language, and Yirči Ḳazaḳ is thus considered the founder of Ḳumuḳ literature.

Muḥammad Mīrzā Magarayef established a printing shop utilising Arabic script at Temir Khān-Shura at the beginning of the 20th century. By 1912 he had printed translations from Arabic and Ḳāzān Tatar and the poetry of Abū Sufyān in Ḳumuḳ. Nokhay Batīrmurzayev (1860-1919) wrote the first modern narrative works inspired by Ḳumuḳ contemporary life in 1906-7. His son Zainalabid (1897-1919) was the first Ḳumuḳ Bolshevik writer. Together they founded the political-literary society *Tañ čolpan* (*"The morning star"*) at Khasav-Yurt in 1916 to promote the development of modern Ḳumuḳ literature. With the assistance of poet and dramatist Temir Bulat Beybulatov and other Ḳumuḳ, Tat and Russian writers (including S. S. Kazbekov and H. O. Bulač), this organisation sponsored a nationalist, progressive review of the same name, first published at Temir Khān-Shura in August 1917. The Khasav-yurt dialect of Ḳumuḳ was adopted as their literary language.

Tañ čolpan was instrumental in reviving the Ḳumuḳ national consciousness. In actuality a radical nationalist organ, it professed to be apolitical and declined to choose between the socialist and nationalist positions. However, as a result of the first short-lived Soviet occupation of Dāghistān beginning in April 1918, *Tañ čolpan* adopted a pro-Bolshevik position. Publication ceased in July 1918.

Tañ čolpan was not the first Ḳumuḳ journal to appear. In 1913 the liberal nationalist Mīrzā Muḥammad Mavaraev of Temir Khān-Shura requested authorisation for a Ḳumuḳ journal entitled *Ḳumuḳ gazäti* ("The Ḳumuḳ journal"). This demand was rejected by the authorities, and the classical Arabic publication *Djarīdat Dāghistān* (published in 1915) notwithstanding, the first Ḳumuḳ publications did not appear until after the Revolution of February 1917. The journal *Musāvāt* ("Equality") was the first Ḳumuḳ periodical, published at Temir Khān-Shura in June 1917, under the editorship of Mavaraev.

This first period of Soviet domination witnessed the publication of a third Ḳumuḳ journal, *Iškči khalḳ* (*"The working people"*); it was edited by Zainalabid Batīrmurzayev and adhered to a Bolshevik position. The journal *Yoldash* also supported the development of a national Ḳumuḳ literature. The Ḳumuḳ press is currently represented by one republican organ published at Makhačkala, and several district organs (at Khasav-Yurt, Baba-Yurt, etc.).

The Ḳumuḳs possess a very rich Soviet literature. ʿAbd Allāh Muḥammadoghlu Magomedov (1869-1937) is considered the national poet of Dāghistān by the Soviets as a result of his pro-Communist writings in the post-Revolutionary years. The most celebrated Ḳumuḳ prose writer is Yûsuf Gereyef, whose satirical style was influenced by the Ādharbāydjānī poet Ṣābir. Other literary figures of note include poet, dramatist and author of children's books ʿĀlimpasha Salavatoghlu (1901-43), poets A. Beshirov and Kaiyan, poet-novelist ʿAbdul-Wahab Sulaymānoghlu (b. 1909), playwrights Ḥamīd Rustamov and Amīr Kurbanov (b. 1909), and novelist Anvar Agiev (b. 1913). The Ḳumuḳ poetess Inču Gadieva is the most renowned female Dāghistāni writer. In addition, many Russian authors have been translated into Ḳumuḳ (e.g. Tolstoy, Lermontov, etc.).

The Ḳumuḳs participate actively in the political life of Dāghistān. In 1924, Ḳumuḳs comprised 5.7% of the *profsoyuz* of the Dāghistān ASSR, and in 1927 there were 696 Ḳumuḳs in the Dāghistāni Communist Party.

The Ḳumuḳ educational system is less developed than that of the Avars; in 1948 there were eight Ḳumuḳ secondary schools (compared to 17 Avar); Karabudakhkent, Kayakent, Izberbash, Makhačḳala, Buynaksk, Khasav-Yurt, Baba-Yurt and Ḳizil-Yurt. Islam seems to remain a strong force among the Ḳumuḳs up to the present time.

Modernisation is changing the character of the traditional Ḳumuḳ economy. Agriculture and animal husbandry remain the basis of the rural activity, but mechanisation and collectivisation have made the large-scale production of cereals and cotton possible. The fishing and canning industries, as well as oil (at Kayakent), hydroelectric plants and other factories are evidence of advanced industrialisation in certain sectors. Nonetheless, traditional crafts are still pursued: woven woollen goods and carpets (villages of Kumtorkal, Kayakent, Upper and Lower Kazanishče), gold work (Irneli, Kafir-Kumukh, Sultan-Yañi-Yurt, etc.), wrought iron work (Verkhneye, Nizhneye, Kazanishče, Anderey-aul), and pottery (Verkhneye, Kazanishče).

The Ḳumuḳs, along with the Avars, Darghins, Laks and Lezgs, appear to be points of consolidation among the Dāghistāni peoples, destined to absorb certain small groups (although certainly not all). Of the nine official languages of Dāghistān, newspapers are only published in the languages of these five groups.

(W. Barthold - [David K. Kermani])

KUMŪN, "latency", a key-notion of speculative physics in early Muslim theology, especially in the system of al-Naẓẓām [*q.v.*].

The concept was derived from simple observations: blood is "hidden" in the body of man, oil in sesame, flour in wheat, butter in milk etc.; these substances can be made patent by certain procedures, such as grinding, churning etc. On the other hand, new substances can be produced by putting several ingredients together: pottery results from the "mixture" of clay, water, and fire, and these primary elements are "hidden" in it afterwards. On this empirical basis, where the term still had a rather non-technical meaning, al-Naẓẓām constructed a rather elaborate system which has not yet been the object of more thorough investigation. He did not follow the atomism of his teacher and uncle Abu 'l-Hud̲h̲ayl, who treated qualities as accidents which may be replaced by their contraries. For him, all natural qualities (with the exception of movement, understood in a very broad sense, as "all actions depending on man's will") were "bodies" inherent in other bodies: fire is not hot and luminous, but is composed of heat and luminosity. As such, fire may itself be considered an ingredient (*k̲h̲ilṭ*) of wood where it is "latent" until the wood is burnt. When it becomes manifest, other ingredients do so too: ashes, which consist of taste, colour, and dryness; smoke, which consists of taste, colour and smell; and water, which consists of humidity and a certain sound, i.e. the crackling produced in burning. In consequence of his "corporealism", al-Naẓẓām thus treated the qualities of an object and its constituent parts alike. It is possible that he differentiated between them insofar as the qualities form the ingredients of the primary elements which then make up for the more complex bodies; but we are not yet able to ascertain whether his theory implied such a hierarchy.

The "elements" (fire, water, etc.) are thus not simple themselves, but composed or, as al-Naẓẓām said, "joint" (*muzdawid̲j̲*). They may inhere in each other: water always contains fire, which may be activated through heating and then leaves it for the empyraean. The process can be recognised through the bubbling of the water; the particles of humidity which are dragged along the fire in its upward movement manifest themselves as vapour. Similarly, water normally contains earth which remains as a salty or limelike sediment in the kettle after evaporation. On the other hand, earth usually contains water; otherwise, it would not keep together (clay being normally given as an example). That fire and water may penetrate each other (*mudāk̲h̲ala*) without conflicting, is to be explained by the fact that they keep each other's balance; God has wisely calculated their proportions so that things do not explode by themselves (cf. al-K̲h̲ayyāṭ, *K. al-Intiṣār*, ed. Nader, Beirut 1957, § 18). Their equilibrium may even be used as a proof for the existence of a creator (*ibid.*, § 26). Only when this equilibrium of "hidden" contradictory ingredients is disturbed by external influence does disintegration ensue. When fire is brought close to wood, the fire latent in the wood gets the upper hand and destroys the coherent structure of its vessel. When somebody is bitten by a snake he dies not through the venom of the snake, but through the venom which he has in his own body and which is now reinforced. For the same reason the snake does not die from its own venom; here the venom is balanced by the right proportion of antidotes. When water freezes, this means that not only the cold which is latent in it has been enforced from outside, but also its "hidden" dryness; for ice is not only cold, but also dry. When it melts again, this process is thus not merely produced by heat, but also by humidity which was added from outside. When something wet becomes dry, it does not only lose humidity, but also weight; this shows that humidity contains "latent" weight, whereas heat does not.

Disintegration may be slow and imperceptible, as happens, e.g. with an oil lamp which burns down during the night, although it looks alike from one moment to the other. Disintegration may sometimes also be stopped. Wood must not lose all its fire at once; it may be transformed into charcoal which still contains part of it. Different species of the same genus may contain different proportions of the proper *ak̲h̲lāṭ*. Some kinds of wood are more inflammable because they contain more fire; for the same reason, some kinds of stone can be better used as a flint than other ones.

This advanced theory presupposes a rather intricate intellectual tradition and a widely-developed range of discussion. As a matter of fact, the word *kumūn* is already alluded to in a poem by Abū Nuwās, one generation before al-Naẓẓām (cf. *Dīwān*, ed. E. Wagner, i, 136, l. 6). Al-Naẓẓām took over his vocabulary (*kumūn* and *mudāk̲h̲ala*) and the basic structural assumptions of his system: his rejection of atomism and his definition of the body, from the S̲h̲īʿī theologian His̲h̲ām b. al-Ḥakam [*q.v.*], who had adopted them in his discussions with dualists, especially with Abū S̲h̲ākir al-Dayṣānī, whom he seems to have converted to Islam. Via the Dayṣāniyya and their spiritual ancestor Bardesanes (died 216 A.D.), we may trace some basic ideas back to Stoicism: a similar definition of body (σῶμα) and the concept of κρᾶσις δι' ὅλον (= *mudāk̲h̲ala*) or μῖξις (= *imtizād̲j̲*, *ik̲h̲tilāṭ*). In the Iranian environment this tradition was perhaps amalgamated with certain Indian ideas (the example of pottery is used in the Indian Samkhya; cf. W. Ruben, *Geschichte der indischen Philosophie*, Berlin 1954, 193). All dualist creeds understood the world as being in a stage of "mixture" (*gumēčišn*) between light and darkness. In a Syriac fragment of Bardesanes, the qualities (ποιότητες = *znayyā* or *ḥailē*) are called *muzzāgē*, "mixtures". But al-Naẓẓām did not simply imitate: he refuted the Manichaeans, as is shown by several passages in al-K̲h̲ayyāṭ's *K. al-Intiṣār*, and he attacked the Dayṣāniyya; he did not accept their axiom that light and darkness are at the bottom of every mixture (cf. al-D̲j̲āḥiẓ, *Ḥayawān*, v, 46, ll. 6 ff. etc.). He used the advantage of meeting them on common ground, but he seems to have developed quite individual ideas.

Inside Islam, there were certain affinities with the—rather vaguely definable—*aṣḥāb al-ṭabāʾiʿ* who believed that all things have a nature of their own which, once being created, no longer depends on God's will (and may as well be "hidden" in them, the *k̲h̲ilḳa* in al-Naẓẓām's terminology), and with the Muʿtazilī Muʿammar b. ʿAbbād (cf. H. Daiber, *Das theologisch-philosophische System des Muʿammar ibn ʿAbbād as-Sulamī*, Beirut 1975, 110 ff.). Opposition came from the *aṣḥāb al-aʿrāḍ*, the "accidentalists" or atomists whose ideas had been first expounded by

Ḍirār b. ʿAmr [*q.v.* in Suppl.], but also from apparently al-Aṣamm [*q.v.* in Suppl.], who, in spite of denying the accidents, did not think of qualities as "bodies". The critique used mainly three arguments: (a) nothing can take place in something smaller than itself (and fire is bigger than wood); (b) several things cannot be simultaneously in the same place (which would be the case if several qualities were "hidden" in one substance); and (c) if fire were hidden in wood, we should feel it when we touch the wood, or we should find it when we cleave it. Arguments (a) and (b) were already brought forth against the Stoics (e.g. by Alexander of Aphrodisias in his Περὶ μίξεως, ch. 5 ff.); (c) is found in Indian philosophy (cf. W. Ruben in *AO*, xiii (1935), 147). The discussion turned especially around (c); al-Naẓẓām objected that coldness balances the fire hidden in the wood; when the fire comes forth in burning, the coldness also leaves the wood immediately and enters the cold substances in its environments, i.e. water and earth, in a leap (*ṭafra*), without getting into contact with the things in between. This is why the ashes are not cold, in spite of the fact that the fire has left; the warmth found in it is not the warmth of the fire, but the warmth which was "hidden" in it and was activated by the fire. As the "accidentalists" recurred to Aristotelian tradition (visible in (a) and (b)), al-Naẓẓām also criticised Aristotle's model of physics.

The theory was eagerly defended by Naẓẓām's disciples. But already al-Djāḥiẓ did not conceal his scepticism (cf. the quotations in van Ess, *Das K. an-Nakṯ des Naẓẓām*, Göttingen 1972, 120). In the second half of the 3rd/9th century, it was apparently given up completely within the Muʿtazila. The future belonged to atomism.

Bibliography: The main source for Naẓẓām's ideas about *kumūn* is Djāḥiẓ, *Ḥayawān*, v, 6 ff. (partly tr. into Turkish by Nafiz Danışman, *Kelâm ilmine giriş*, Ankara 1955, 126 ff.). (J. van Ess)

ĶUN, Arabic orthography Ķūn, a Turkish tribe of Inner Asia known in the pre-Mongol period, but only in a shadowy fashion.

The earliest mention of the Ķun is in Bīrūnī's *K. al-Tafhīm* (420/1029), ed. R. R. Wright, London 1934, 145, and he places them in the Sixth Clime, in the territory of the eastern Turks between the Ķāy and the Khirkīz [see ķāyī and ķirgiz]. The tribe is not, however, mentioned in Bīrūnī's *al-Ķānūn al-Masʿūdī* (*pace* Pelliot, *À propos des Comans*, in *JA*, Ser. 11, Vol. xv [1920], 134-5). Nor are the Ķun given in Kāshgharī (who does however deal with the other two tribes mentioned in the *Tafhīm* as their neighbours), but there is an important section on them in Marwazī's *Ṭabāʾiʿ al-ḥayawān* (early 6th/12th century), see Minorsky, *Sharaf al-Dīn Ṭāhir Marvazi on China, the Turks and India*, London 1942, text li, tr. 29-30, comm. 95-102. This was adapted a century later by ʿAwfī in his *Djawāmiʿ al-ḥikāyāt*, section on the Turks, printed and tr. by Marquart in his *Über das Volkstum der Komanen*, in Bang and Marquart, *Osttürkische Dialektstudien*, in *Abh. G. W. Gött.*, Phil.-Hist. Kl., N.F. xiii/1 (Berlin 1914), 40-2, and used by him as the basis of a complex and convoluted commentary on the Ķun, *ibid.*, 42-77.

It seems that the Ķun were amongst the easternmost of the Turkish peoples, with their original homeland in eastern Mongolia and the fringes of Manchuria. It may be that the Ķun were the epigoni of the T'u-yü-hun to the north of the great northwards bend of the Huang-Ho or Yellow River; the resemblance of the name Ķun to that of the proto-Huns, the Hsiung-nu, etc., had already been noted by Marquart, *op. cit.*, 64-5, cf. also Sir Gerard Clauson, *Turkish and Mongolian studies*, London 1962, 12. According to Marwazī, the tribe had been converted in their homeland to Nestorian Christianity (by missionaries from the Ordos region?), but had been impelled to migrate far westwards by pressure on their pasture grounds from the Ķayi. The Ķun then moved into the land of the Shārī/Sārī (whose name Barthold, in Markwart, *Wehrot und Arang*, Leiden 1936, *34*, connected with the Turkish word *sarī* "yellow" and the Ķīpčaķ/Comans, the Russian *Polovtsi* "pallid, yellowish ones"; possibly, however, they should be linked rather with the Sarī Uyghur of Kansu [*q.v.*]), and eventually ended up in the Aral Sea-Ķīpčaķ Steppe area. This chain of migrations must have been set off after Bīrūnī's time, i.e. in the middle or later years of the 11th century. Minorsky was at first inclined to identify the Ķun with the Ķūrī/Fūrī (mentioned in the *Ḥudūd al-ʿālam*, § 14, tr. 97, cf. comm. 283-6, 311-12, a savage and bestial tribe living to the east of the Ķirgīz (i.e. apparently to the east and south of Lake Baikal, their name surviving in the present-day Khori tribe of the Buryats), but subsequently abandoned this equation when he found the clear orthography *Ķūn* in Marwazī. Earlier, Marquart had attempted to connect the Kun with the later Comans (in Magyar, Kún) of the South Russian-Western Siberian steppes [see ķīpčaķ], and this was later affirmed by J. Németh: that Ķun and Ķuman/Ķoman both stem from a Turkish adjective *ķū* < *kub* "yellowish, pale" (*Die Volksnamen* quman *und* qūn, in *KCsA*, iii [1941-3], 95-109).

At all events, the Ķun have left very little mark on the Islamic history of Central Asia; we do not know whether they were substantially Islamised before losing their identity in some larger steppe confederation, such as that of the Ķīpčaķ or the later Golden Horde. The only member of the Ķun to achieve mention in Islamic sources is the slave commander of the Saldjūķs Ekinči b. Ķočķar [*q.v.* in Suppl.], who was appointed governor of Khwārazm by Berk-Yaruķ in 490/1097; Minorsky plausibly surmised that he may have been Marwazī's informant for his section on the Ķun.

Bibliography: In addition to references in the article, see L. Rásonyi, *Les Turcs non-islamisés en Occident*, in *PTF*, iii, Wiesbaden 1970, 11-12 of offprint.
(C. E. Bosworth)

ĶUNĀ, Qena, a town in Upper Egypt, on the east bank of the Nile (population 40,000). It is the

capital of the province (*mudīriyya*) of the same name, which is divided into seven districts (*markaz*), namely: 1. Dishnā; 2. Isnā; 3. Ḳunā; 4. Ḳuṣayr; 5. Ḳūṣ; 6. Lukṣur; 7. Nadjʿ Ḥamādī. In 1897 the population of the province was 711,457, but by 1956 it was more than 1,100,000. In 1940 the town of Ḳunā and the village of al-Humaydāt and their dependencies were detached from the district of Ḳunā and made into a separate *maʾmūriyya*. The region produces cotton and cereals; in the town, cloth and sweet-stuffs are manufactured. But Ḳunā is especially noted for its porous pottery; the jars (*ḳulla*) which are made there are called *ballāṣ* from the name of a place a few miles to the south.

The Arabic name, written Iḳnā by some geographers and *Ḳūnā* in the Copto-Arab *scalae*, comes from the Coptic **ⲔⲰⲚⲎ** which gives rise to a play on the Greek καινή πόλις "new town", a name which did not last long as it is never found in the Byzantine period. The identity of this town with the Neapolis of Herodotus has been seriously urged; it is rather the modern Minshaʾa, the ancient Ptolemais. On the other hand, it has been conjectured with much probability that at the end of the 3rd century it received the name Maximianopolis.

In the first Arab period, the *kūra* of Ḳunā extended to the east of the Nile between that of Fāw on the north and Ḳifṭ in the south, in front of that of Dandara from which it was separated by the river. The first author to mention it, al-Yaʿḳūbī, gives a very unflattering description of the district: he says it is a little town rapidly going to ruin, deserted by its inhabitants who feared the raids of the Bedouin robbers and brigands. Therefore, when the new provincial divisions were made under al-Mustanṣir, it was Ḳūṣ which gave its name to the district (*ʿamal*) and became its capital. Ḳunā remained unimportant for some time, as Yāḳūt only gives it a brief note and Abu 'l-Fidā does not mention it.

Its prosperity was not long in beginning, owing to the tomb of the saint ʿAbd al-Raḥīm, which became an object of pilgrimage, while pious Muslims settled in its vicinity. Some years previously, Ibn Djubayr had mentioned Ḳunā as a pretty little town with houses of a dazzling whiteness; he makes special mention of the virtue of the women, who never appeared in the streets. After Ibn Baṭṭūṭa, al-Adfuwī gives us an account of the merits of ʿAbd al-Raḥīm; he describes the houses of the town as spacious and very high and mentions two *madrasas* in Ḳunā and a number of hospices (*ribāṭ*), Ibn Duḳmāḳ only copies al-Adfuwī. In the Turkish period, Ḳunā was the residence of a *Kāshif*, but it is only in modern times that it has assumed the administrative position which it owes to its present steadily-increasing prosperity.

The town, situated at the point where the Nile comes nearest to the Red Sea, had become the point of departure for caravans in the direction of Ḳuṣayr. This route took the place of the one used in the Middle Ages between Ḳūṣ and ʿAydhāb, which in turn succeeded the ancient Copto-Berenice road. The continual intercourse between Egypt and Arabia and India gave these roads great value; it is by this route that many of the Muslims of North Africa go to Mecca, and even during the Crusades, it was the only pilgrim road. In 1831-3 Muḥammad ʿAlī had the wells inspected on the Ḳunā-Ḳuṣayr road; some were deepened so that they would provide water at all seasons (cf. *L'Égypte moderne*, collection *L'Univers*, 164-6; Barron and Hurne, *Topography and geology of the East Desert of Egypt, Central Portion*, Cairo 1902).

The saint who is the object of Muslim veneration, ʿAbd al-Raḥīm b. Aḥmad b. Ḥadjdjūn, twelfth descendant of Djaʿfar al-Ṣādiḳ, was born in the environs of Ceuta in Morocco. After a journey to Mecca where he spent seven years, he settled in Ḳunā and died there on 9 Ṣafar 592/13 January 1196. Honoured during his life for his reputation for sanctity and asceticism, he has become one of the principal saints of Egypt, along with Aḥmad Badawī, Ibrāhīm Dasūḳī and Abu 'l-Ḥadjdjādj Aḳṣurī. At one time a pious formula used to be handed down which, if recited beside the tomb, hastened the realisation of a desire or brought about cures. According to some travellers, the pilgrims who came to Ḳunā made circuits (*ṭawāf*) of the tomb of ʿAbd al-Raḥīm similar to those made by the pilgrims at the Kaʿba (Adfuwī, *Ṭāliʿ saʿīd*, no. 231; Goldziher, *Muh. Studien*, ii, 315, Eng. tr. ii, 287; *RHR*, ii, 284; Gaudefroy-Demombynes, *Le pèlerinage à la Mekke*, 224). There were descendants of ʿAbd al-Raḥīm living in Egypt for two centuries; they were, in particular, jurists and professors (Adfuwī, nos. 29, 117, 129, 308, 402, 476, 533; al-Maḳrīzī, *Khiṭaṭ*, ii, 423).

ḲUNAYṬIRA [see ḲANṬARA].

ḲUNBI ṢĀLIḤ, an important cluster of ruins of mediaeval date, situated in lat. 15° 46′ N and long 7° 59′ W in Hodh (southern Mauretania), 330 km. N of Bamako, 95 km. WNW of Nara and 70 km. SSE of Timbédra. Most modern writers agree that it was the capital of the Sarakoli kingdom of Ghāna [*q.v.*] which dominated the southern part of the Western Sahara and the North Sudan from around the 6th century until *ca.* 1076.

The ruins are situated on a schistose plateau which is covered with thorn-bushes, and they stand between two seasonal pools. They extend for about 1,200 m. north to south and 800 m. east to west, but this does not include the scattered outbuildings and two extensive burial grounds. The one in the north-west covers an area 1,600 m. by 800 m. and contains a columned tomb with six chambers. The other in the south-east at Sohobi measures 700 m. by 400 m.

There are many mediaeval references in Arabic to Ghāna, from al-Fazārī (before 184/800) to Ibn Khaldūn, but local oral traditions do not mention this place name. In fact, it is not until the 17th century that the name Ḳunbi appears in the *Taʾrīkh al-Fattāsh*, which says: "The name [of the empire of Kayamaga] was Ḳunbi, and this Ḳunbi was a great city." The *Taʾrīkh al-Sūdān* specifically states that the capital of Kayamaga was Ghāna, but all the Sarakoli traditions about the Wagadu speak of Ḳunbi (Ch. Monteil, *Mélanges ethnologiques*, 390; A. Bathily, *B. IFAN B* [1975], 73; Wa Kamissoko, 1976, unpublished) as the residence of the serpent Bida. The persistance of the Sarakoli and Moorish tradition is best illustrated by the fact that in 1914

Bonnel de Mézières was driven directly from Walata to Ḳunbi when he expressed a desire to the marabouts to see the site of the capital of Gh̲āna.

Although the ruins of Ḳunbi were well known to Africans, Bonnel de Mézières in 1914 was the first European to see them. He then undertook some excavations there, and the results were published in 1920, but unfortunately none of the material which was brought back from the expedition can now be located; it cannot be found in the Musée de l'Homme, the Académie des Inscriptions et Belles Lettres or anywhere else. Later excavations have been made by M. Lazartigues (1939), P. Thomassey (1949-50) and R. Mauny and G. Szumowski (1951); the most recent excavations have been by J. Devisse, D. and S. Robert and their team (1972, 1975, 1976), but as yet these are not published. These excavations have revealed many schist-built houses with beautiful Arab-Berber architecture, which predates the Hispano-Moorish style. They contain carefully-made paving stones, wall-niches, stairways and stone beds. An imposing columned mosque is slowly being revealed on the Main Avenue which crosses the ruins from east to west. It has superimposed *miḥrābs* showing that at least two sanctuaries have stood on the same site. Material remains include stones with painted inscriptions of the *s̲h̲ahāda*, countless pieces of coarse pottery with some slip-decorated ware and even some glazed (Mediterranean) ware, tools and weapons in iron, objects in copper and glass and beads in stone and glass.

The north-east necropolis comprises a series of chambers for multiple Muslim burials; they are collective tombs for families or for people from the same Mag̲h̲ribī town or the same tribe. The most elaborate "columned tomb" is surrounded by six successive chambers, the last of which has a perimeter of 800 m.

The ruins show that this was an urban settlement with a high population density. The estimated population for the town at its peak is 15,000 to 20,000, which is an enormous figure for a Saharan town with a limited water supply (R. Mauny, *Tableau geogr.*, 482). Walls have been found at depths of up to 8 m., showing occupation levels over several centuries after the 8th century. The dates provided by carbon 14 analysis are: 828 ± 115 A.D.; 933 ± ? A.D.; 963 ± 114 A.D.; 1210 ± 121 A.D. This confirms what is already known of the history of the capital of Gh̲āna with which these ruins are to be identified, in the present writer's opinion, despite the hesitations of Ch. and V. Monteil (1951, 441-52; 1964, 58-62; 1968, 109-12), who are more inclined to follow al-Idrīsī (i, 2) in situating Gh̲āna "on the two banks of the river [Senegal]". However, their identification must be challenged, for al-Idrīsī made enormous errors in his work and, furthermore, no ruin of this importance has ever been found on the banks of the middle Senegal river. The evidence of oral traditions and what is written in the *Taʾrīk̲h̲s* all points to Ḳunbi as the correct site.

The irritating question remains to be resolved about the two places called Gh̲āna which al-Bakrī (460/1067-8) describes. The one was populated by Muslim merchants and had twelve mosques; the other was six miles away and was reserved for the king and his court. The present writer holds that Ḳunbi Ṣāliḥ should be identified with the town of the rich Arab-Berber merchants described by al-Bakrī. If this is so, where was the royal capital? New ideas about this problem have been suggested at a recent conference on the history of Mali, held at Bamako in February 1976. Traditions show that the royal residence was apparently at Kalaka (Karka, 23 km. south of Ḳunbi) and the royal stockyard at Ḳunbi Dyufi, a modern village 20 km. SSE of Ḳunbi Ṣāliḥ, which was in fact the merchants' town. The existence of a double or triple town can be understood because of the natural desire of the animistic kings to live apart from the Muslims and also because of the scarcity of water in the area. This is a potentially new field for archaeological investigation. Ḳunbi Ṣāliḥ is the most important ruined site in West Africa—with Tegadaoust (Awdag̲h̲ost?) running it a close second—and because of this, fresh excavations ought to be undertaken there.

AL-KUNDURĪ, ʿAmīd al-Mulk Abū Naṣr Muḥammad b. Manṣūr, vizier of the first Great Saldjūḳ, Ṭug̲h̲rïl Beg (447-55/1055-63). The *nisba* Kundurī may refer to one of two villages by the name of Kundur, one located in Ṭurayt̲h̲īt̲h̲ in Ḳūhistān, the other near Ḳazwīn; the reference may also be to the selling of *kundur* (frankincense).

The Great Saldjūḳs, Ṭug̲h̲rïl Beg, Alp Arslān and Maliks̲h̲āh, were served by two *wazīrs*: Kundurī, *wazīr* of Ṭug̲h̲rïl Beg, and the more famous Niẓām al-Mulk, *wazīr* of Alp Arslan and Maliks̲h̲āh. The main ambition of these two *wazīrs* was to manipulate power and influence through the sultans whom they served. Niẓām al-Mulk did this with consummate skill for three full decades, outmanoeuvring his

rivals, and always keeping a step ahead of them in their plots and intrigues against him. Kundurī was not as successful. In comparison with the magisterial politics of Niẓām al-Mulk, he appears as a bungling fool.

Kundurī's first ill-advised deed is recorded early in his career as Ṭughrïl Beg's minister. Sent by Ṭughrïl on a mission to contract a marriage for him, Kundurī contracted the marriage for himself instead; as punishment for this, Ṭughrïl had him castrated.

Kundurī's next ill-advised deed was to scheme against Ṭughrïl Beg in an effort to replace him with Anūshirwān, son of Khātūn, Ṭughrïl's wife. This plot against Ṭughrïl appears to have been mounted when Ṭughrïl was setting out to fight one of his rivals in Mawṣil, the Turkish general Arslān Basāsīrī [*q.v.*]. At his departure, noticing that he had a following of only 2,000 men, he reproached Kundurī, saying: "Why did you not inform me so that I could wait until all the men were assembled?" Again at Hamadhān, faced by the superior forces of Ibrāhīm Ināl, his half-brother, Ṭughrïl asked his wife Khātūn and Kundurī to come to his aid. Khātūn wanted to do so, but was convinced by Kundurī that their troops would fall into the hands of Ināl and that this would only serve to strengthen Ināl's forces and weaken hers as well as Ṭughrïl's. Kundurī then began to arrange for Anūshirwān to make a bid for the sultanate, and money was distributed among the troops for their allegiance (*bayʿa*). Kundurī, Khātūn and Anūshirwān contributed, as well as the caliph, the merchants and the high functionaries of Baghdād. But Kundurī's plan met with opposition from two of Ṭughrïl's generals, ʿUmar and Ināndjīl, who refused to recognise Anūshirwān. Then when Kundurī asked the caliph to proclaim Anūshirwān as sultan, he was told to defer the matter, and to see that the city was not deprived of troops to defend it against the menace of Basāsīrī. Khātūn also changed her mind and went to rejoin her husband. The sources are not expansive in their reports regarding this plot, but we later see both Kundurī and Anūshirwān in the service of Ṭughrïl Beg. They later fought against Basāsīrī and negociated the latter's delivery at the hands of the Mazyadid Dubays b. Ṣadaḳa, and their success here regained for them the confidence of the sultan.

After Ṭughrïl's death in 455/1063, Kundurī once again saw his opportunity to serve under a sultan whom he could manipulate. Ṭughrïl, before his death, had designated Sulaymān, son of his brother, Čaghrï Beg and brother of Alp Arslān. This choice may have been suggested by Kundurī. In any case, the succession to the sultanate had to be secured by eliminating all other pretenders. Alp Arslān was ready to oppose the choice of Ṭughrïl, and here he had to deal with Kundurī. From the beginning, Kundurī had the *khuṭba* in Rayy made in the name of Sulaymān. He then wrote a letter to Alp Arslān and, in threatening tones, told him to be content with the possession of Khurāsān. Alp Arslān marched on Rayy. Kundurī having now to face both Alp Arslān and Ḳutlumush, called on Alp Arslān to help him against Ḳutlumush, and made the *khuṭba* in Rayy in the name of Alp Arslān. Arriving at the palace of the sultanate in Rayy, Alp Arslān did not make known his true feelings towards Kundurī, and insisted on Kundurī remaining with him in the palace when the latter wanted to move, saying "My joy consists in having you beside me, how can you entertain the thought of going away from us?". This was the beginning of a cat-and-mouse game played with relish by Alp Arslān, who kept Kundurī until he had recovered all the wealth amassed by the *wazīr*, before finally putting him to death, having taxed him with crass ignorance for imagining that he could stand against three Saldjūḳ pretenders to the sultanate, meaning himself, Ḳāwurd [*q.v.*] and Ḳutlumush.

Kundurī's ambition had been to hold *de facto* power under a docile and malleable sultan, but his plans failed disastrously. He did, however, succeed in arranging the marriage between Ṭughrïl Beg and the daughter of the caliph al-Ḳāʾim, the negociations for which lasted for a period of three years (452-5/1060-3). Ṭughrïl had hoped to see a Saldjūḳ descendant assuming the ʿAbbāsid caliphate, but the marriage ended with his death and without issue. Kundurī's success in arranging the marriage, against the caliph's will, earned for him the enmity of al-Ḳāʾim who, on making the *khuṭba* in Alp Arslān's name in Baghdād (Rabīʿ II 456/March-April 1064) asked Alp Arslān to eliminate Kundurī.

Where Kundurī had failed, Niẓām al-Mulk succeeded. The difference between these two *wazīrs* consisted in the political acumen and consummate administrative skill of the latter as compared with the former's lack of perception and discrimination. Kundurī supported the Muʿtazilī movement, and was instrumental in having al-Ashʿarī cursed from the pulpits of Khurāsān by the order of Ṭughrïl Beg. In Baghdād, he earned the hatred of the Sunnīs by supporting the Shīʿīs. By contrast, Niẓām al-Mulk supported the Ashʿarīs, but was not averse to supporting *ʿulamāʾ* of other movements wherever these last had a strong following. Also, his establishing *awḳāf* for the *ʿulamāʾ*, in the form of *madrasas*, *masdjids* and *ribāṭs*, secured the support of the masses among their followers. Not the least among al-Kundurī's mistakes was his personal engagement in battle, whereas Niẓām al-Mulk remained a man who manipulated the pen, leaving the sword for those better suited to the battle field.

(G. MAKDISI)

ĶUNDUZ, the name of a river, a town and a modern province of Afghānistān.

1. The river is one of the two main left bank affluents in Afghānistan of the Oxus. It rises in the central region of the Hindū Kush [*q.v.*], with Bāmiyān in its catchment area, and flows for some 300 miles/480 km. until it reaches the Oxus just below where it receives its right-bank affluent the Wakhsh River. The different stretches of the river have varying names; thus the middle course, within which are situated the towns of Baghlān and Pul-i Khumrī, is called the Surkhāb or "Red River".

2. The town is situated in lat. 36°45′ N. and long 68°30′ E. at an altitude of 1,300 feet/400 m. in a region which has the general name of Ḳataghān. The surrounding countryside, centred on ancient Ḳunduz and the nearby modern town of Khānābād, is now fertile agricultural land (rice, fruits, etc.) and pastures, but was until very recently notoriously malarial and unhealthy. The town of Ḳunduz (presumably Pers. *kuhan-diz* "fortress") is not mentioned under this name by the mediaeval Islamic geographers, but it

fell within the province of Ṭuk͟hāristān [*q.v.*], and is very probably identical with, or situated close to, the important early Islamic town of Walwālid͟j or Walwālāz, originally a centre of the Hephthalites [see HAYĀṬILA] in their struggles with the invading Arabs in the 1st-2nd/7th-8th centuries, and then an administrative centre and mint town for northern Afg͟hānistān until Sald͟jūḳ times (cf. *Ḥudūd al-ʿālam*, comm. 340, and Le Strange, *The lands of the Eastern Caliphate*, 428); today, there are many ruins in the vicinity of Ḳunduz.

In the Tīmūrid period, Ḳunduz is frequently mentioned under this name. It figures in the campaigns of Ḥusayn Bayḳarā [see ḤUSAYN MĪRZĀ], e.g. in 901/1495-6, being until this time ruled by the rival Tīmūrid prince Maḥmūd Mīrzā b. Abī Saʿīd, d. 900/1495 (see Barthold, *Four studies on the history of Central Asia. iii. Mīr ʿAlī-Shīr*, Leiden 1962, 53, 62-3). It then passed for some years into the hands of Bābur, who during the years 916-20/1511-14 used it as a base for his unsuccessful attempts to conquer territory north of the Oxus in Ḥiṣār and Wak͟hsh (*Babūr-nāma*, tr. Beveridge, 45-8, 318, 345, 352 ff., and *passim*).

Northern Afg͟hānistān was by now becoming increasingly Turkicised by Özbeg and Turkmen groups, and in the period of the Ṣafawid-Özbeg rivalry, petty Özbeg principalities were established in towns like Balk͟h, K͟hulm and Ḳunduz. These submitted in 1164/1751 to Aḥmad S͟hāh Durrānī [*q.v.*], but in the early 19th century Mountstuart Elphinstone again found Ḳunduz under an independent Özbeg chieftain "Khauldaud Khaun", who had 15,000 men under his command (*An account of the kingdom of Caubul*[3], London 1839, ii, 200). A few decades later, in the years 1850-9, the Özbeg principalities of Balk͟h, K͟hulm, Ḳunduz, Maymana, Aḳča, etc. came into the orbit of Dūst Muḥammad [*q.v.*] of Kābul. Ḳunduz was visited by John Wood in the 1830s, who found it a miserable settlement of 500 to 600 mud huts of sedentaries plus reed huts and black tents of Özbeg nomads (*A journey to the source of the River Oxus*[2], London 1872, 137-8).

The present population of the Ḳunduz district is highly mixed, but includes a large proportion of Ozbegs, Turkmens and Kazakhs, plus some Pas͟htūns settled there in the present century by the Afg͟hān government, and some Arabic-speaking groups have been reported from the region (see G. Jarring, *On the distribution of Turk tribes in Afghanistan, an attempt at a preliminary classification*, in *Lunds Universitets Årsskrift*, N.F. Avd. i, Bd. 35, Nr. 5 (1939), 17-20). There is now an important amount of seasonal immigration from the Hindū Kus͟h mountain regions, the workers being attracted by the higher wages which can be earned in agricultural work.

Since the 1964 administrative re-organisation, Ḳunduz town has been the capital of a province of the same name, having been previously in the province of Ḳatag͟hān; the population of the town has been estimated (1969) at 40,000, and of the province at 415,000. It is now a centre for agricultural development schemes in the Oxus lowlands, and the local Turkish population also carries on carpet-weaving; moreover, it has an airfield, with regular flights connecting the town with Kābul.

ḲUNFUD͟H, ḲUNFAD͟H (A., fem. *ḳunfud͟ha*, pl. *ḳanāfid͟h*), a masc. noun preserved in all the Arabic dialects (Maghrib, *ḳenfūd/genfūd*, Middle East, *ḳenfūḍ*) which denotes, like its Hebrew counterpart, *ḳippod* (see Isaiah, xiv, 23, xxxiv, 11, and Zephaniah, ii, 14), both the hedgehog and the porcupine. These two small excavating mammals, externally fairly similar through the sharp, hairy spines covering their backs and flanks and through their nocturnal habits, are nevertheless quite different zoologically in their respective species, dimensions and food habits. But all the ancient authors, Greek and oriental, systematically included them in the same family, although the first is insectivorous and the second a rodent.

1. The hedgehog (Pers. *k͟hār pus͟ht*, Tkish. *kirpi*), of the Erinaceid family, comprises, in the Old World, some fifteen species spread from the Atlantic coasts to Manchuria and from the 60th parallel north to South Africa, with the exception of Madagascar, where it is not present. Thus in the Arab lands is found, at the side of the universal *Erinaceus europaeus*, the race *E. algirus* in the Mag͟hrib (nicknamed in Algeria *al-Ḥād͟jd͟j Aḥmad*, Berber *inisi/insi*, pl. *inisawen/insan*), *E. deserti* in the Sahara (Tamahaḳ, Hoggar *ekenisi/tekenisit*, pl. *ikenusay/tikenusay*, at G͟hāt *kensiin*, in Aïr *tikaneshit*), *E. albiventris* in Egypt and the Sudan, *E. aethiopicus* in Abyssinia, and *E. syriacus* and *auritus* in ʿIrāḳ, Syria, Lebanon, Palestine and Arabia. This unobtrusive, nocturnal traveller, with its rapid and jerky movements like a mechanical toy, is endowed with, as well as the generic names *ḳunfud͟h* and *anḳad* (this latter one shared with the tortoise), various bynames evoking its nocturnal habits (*ʿasʿas, dālid͟j, madlid͟j*), its scampering gait (*darrām, darrād͟j, mudad͟jd͟jid͟j, d͟hafīf, mazzāʿ*), and its spinyness (*ḥasīka, ḥiskik, ḥiskil, ḥarba, abū s͟hūkāt*); its sleeping or defensive attitude, involving its curling up into a ball like a chestnut-bur, cause it to have such names as *kabbābat al-s͟hūk, kubbwiba* "ball of spines" in Syria and, since one cannot then see its head any longer, once it is buried within its prickly suit of armour, it is called *ḳubaʿ/ḳubbāʿ*. The cry of the male hedgehog is a short sighing noise, whence its name *hinana* "whining, grizzling one". The hedgehog is considered as one of the most inoffensive and feeble of animals, as expressed in the old, assonantal and metathesising adage, *matā lam naḳḍi al-tulunna ak͟had͟hatnā 'l-lutunna* "when one does not do what is required, one becomes subject even to every gentle hedgehog".

2. The porcupine (Pers. *tas͟hī*, Tkish. *büyük kirpi*, in the Mag͟hrib *ḍorbān* through confusion with the classical *ẓaribān/ẓarbān* denoting the zoril, Berber *arwi*, Tamahaḳ, in Aïr and Adrar, *emerey/temereyt*, pl. *imereyen/timereyn*) is from the family of Hystricidae which comprises five genera and some fifteen species. It is present, with two geographical races which are the most universal (*Hystrix cristata* and *H. leucora*), in all Africa, the Near East, Iran, and from the East Indies to China; but in Arabia, it is present only in the southern half of the peninsula. It is three or four times larger than the hedgehog and always considered to be its big cousin, but this vegetarian is nevertheless distinguished from the former by al-D͟jāḥiẓ (*Ḥayawān*, vi, 461-2) under the

names *duldul/duldūl*, *shayham/shayẓam* and *nayṣ* (this last preserved as *niṣ/nis* in the Near East). This careful observer adds, in good faith, that the porcupine is to the hedgehog as the ox is to the buffalo [see DJĀMŪS in Suppl.] or the rat to the mouse. The long, horny, erectile and widely-spaced needles (*dhāt al-madārī*), which are its only defence, are at the base of the legend that it defends itself by hurling at the enemy these sharp-pointed darts although it only leaves them behind in the wounds caused by their immediate contact; without grudging it the by-name of *abū shūk*, that of *ḳabḳāb* is in no way justified, though it is given it in Syria, because it never in fact goes into a spiny "ball" and never curls up like the hedgehog. On the other hand, the motherly care with which the female porcupine surrounds her young, usually from two to four, is well-recognised; a touching and very ancient fable (see al-Damīrī, *Ḥayāt al-ḥayawān al-kubrā*, i, 337-8, ii, 57, 265-7, and in the same edition, al-Ḳazwīnī, *ʿAdjāʾib al-makhlūḳāt*, ii, 357-61) relates that the porcupine, when it has young, climbs up the vine-stems by night, pulls off the bunches of grapes and lets them fall, then comes down and rolls among its harvest and carries it off transfixed on its spines to its home territory, thus providing an ample diet of succulent grapes for its children.

3. Whether it is a case of the hedgehog or of the porcupine considered as a large hedgehog—and both of these are taken by the mediaeval Arab naturalists, together with the thorn-tail lizard [see ḌABB] and the jerboa (*yarbūʿ* [see FAʾR in Suppl.]), as "creeping beasts" (*aḥnāsh al-arḍ*, *ḥasharāt al-arḍ* (*Ḥayawān*, v, 283)—the *ḳunfudh*, through its nocturnal life and its innate distrustfulness, has given rise to such comparisons as *asrā min ḳunfudh* "travelling more often by night than a hedgehog" and *asmaʿ min ḳunfudh* ... *min duldul* "having sharper ears than a hedgehog ... porcupine"; whence a night racked by insomnia may be described as *laylat al-ḳunfudh*, *layl al-anḳad* "hedgehog's night". The mysteriousness of the gloom envelopping its journeyings summoned up in the fertile imagination of the Bedouin the image of dissimulation and calumny and, by a simple inversion of the construction of the two preceeding expressions, an "undercover" spy was called *ḳunfudh layl*, *anḳad layl* "night hedgehog" (*Ḥayawān*, iv, 166).

Like the Greeks, the Arabs, despite all this, well recognised the great value of the hedgehog as a destroyer of vermin and especially, against the venom of serpents, which they were considered to be immune from after having nibbled thyme bushes (*saʿtar*); for this reason, experienced men from certain tribes recommended that this valuable helper should not be killed, if the land abounded in vipers, and in particular, this was the order given to Ibn al-Ashʿath's army at the time of the expedition of 81/700 into Sidjistān, a region infested with these dangerous reptiles and a great producer of snake-charmers as well as the compounders of snake-bite antidote. The ancients had likewise observed in regard to the *ḳunfudh* an innate faculty for detecting the direction of winds (Aristotle, *Hist. anim.*, ii, 602, and *Ḥayawān*, iv, 229) prevalent at the orientation of the two entries of its burrow.

The flesh of the *ḳunfudh* (of both kinds) is succulent according to those who eat it, such as, in Europe, the gypsies. The Bedouins have always been fond of it, and in our time, the Touareg appreciate it in a stew or braised within the glowing embers after having wrapped it in a covering of clay. Although it formed a kind of game easily captured, in ancient Arabia the risk was never taken of killing it in the early hours of the night, because it could serve as the mount for some benevolent genie, and people preferred to pound it with a cudgel, by day, in chance encounters rather than mounting a regular hunt for it. At beginning of this present century, in the Maghrib and especially in Morocco, the capture of these two spiny creatures was one of the nocturnal activities of slimly-built adolescents of the equivocal class of kif smokers; slipping into the haunts of these animals, they would empty them of their occupants either with gloved hands in the case of the hedgehogs, or with a spear in the case of the porcupines, and groups of vagrants would have a feast of the *mashwī* of these victims (see L. Mercier, *La chasse et les sports chez les Arabes*, Paris 1927, 55-6). The long spines of the porcupine were used for the making of pretty, darkened cages for nightingales.

This ancient custom of eating the flesh of the *ḳunfudh* posed a question, as with the hyena [see ḌABUʿ in Suppl.], in early Islam, about the lawfulness of this practice. When the Prophet was asked about this, he is said merely to have relied laconically that such an animal was "ignoble" (*khabīth*), but he did not make a formal prohibition. Basing themselves on this vagueness, the Shāfiʿīs considered the *ḳunfudh* to be perfectly legal eating, whilst the Ḥanafīs and Ḥanbalīs formally excluded it from the category of permitted types of meat. As for the Mālikīs, they remained undecided on the question and depended on the decisions of local authorities, basing themselves on the customs and usages of the region; thus amongst the Berbers in the Maghrib, no objection is met with against making the *ḳunfudh* an article of diet.

The various anatomical parts of the *ḳunfudh* possessed, in the ancient therapeutic inventory, numerous specific qualities, notably that of the right eye, which, boiled in sesame oil and mixed with collyrium, caused nyctalopia or day-blindness; this formula was, it seems, used by rogues and nocturnal prowlers in order to facilitate their nefarious activities. Salted hedgehog flesh was beneficial for children suffering from urinary incontinence. At the present day, according to what the Touareg say, a porcupine-needle stuck in a camel's saddle prevents fatigue in the loins for the camelriders of the Sahara. Of a more practical kind is usage of a hedgehog skin, with its spines, as a muzzle for kids too inclined inconsiderately to suck their mothers' milk. The porcupine's quills are also used, moreover, for making little instruments and tools like needles for sewing, sticks for applying kohl, etc.

For some time past, the hedgehog, which is very easily domesticated, has been the domestic pet in numerous dwellings of the Saharan oases in order to rid them of cockroaches and other undesirable infestations; here we have a modest rehabilitation of the *ḳunfudh burḳa*, "hedgehog of the stony ground", a byname given metaphorically to an individual with unattractive features but where there is still a possibility of finding someone even less attractive.

From a similarity of appearance, the terms *ḳunfudh al-baḥr* or *shayham baḥrī* "sea hedgehog" denote the edible sea-urchin (*Echinus esculentus*), whilst in al-Ḍamīrī and al-Ḳazwīnī, *op. cit.*, the term *ḳunfudh baḥrī* is applied to the beaver.

AL-ḲUNFUḎHA, a port on the Red Sea coast of the Tihāma or lowland of the southern Ḥidjāz, situated in lat. 19°9′ N. and long. 41°04′ E. and at the mouth of the Wādī Ḳanawnā. It lies 210 miles south of Djidda or Djudda [*q.v.*] and 45 miles north of Ḥaly.

The town is in the form of a large rectangle enclosed by a wall, strengthened at several points by towers and pierced by three gates. Practically the only stone buildings are at the harbour, where is the bazaar with its one-storied warehouses in an irregular line, and the chief mosque and smaller mosques with low minarets. On a little island about a quarter of a mile away is a small castle which used to be the residence of the representative of the Sharīf of Mecca. The town was estimated in *ca.* 1920 to have a population of 10,000, but S. Langer in 1882 put it at only 2,000. The harbour, which is enclosed by a number of sandy islets and is only accessible to Arab vessels of medium size, has great disadvantages, notably that the boats cannot land there; until recent times, however, a certain number of pilgrims on the *ḥadjdj* have landed there and at al-Līth to the north by sailing craft. Trade and commerce are moderate: It exports the myrrh collected in ʿAsīr [*q.v.*] and also hides and honey; the harbour used to be frequented by slave-dealers who brought their Abyssinian slaves for sale here, but Britain's sharp control made slave smuggling practically impossible by the early 20th century. Trade with the interior is limited to the exchange of provisions and everyday necessities and is confined to modest bounds. The much more important harbour of Ḥudayda further south has long since attracted almost all the trade. The poverty of the inhabitants is revealed by the primitive huts, built of poles and thatch with gable roofs, which are typical of the whole coast plain. Of agricultural products, cotton and millet are grown in the district.

Al-Ḳunfudha is perhaps a very old settlement; in any case it is a district of great interest to classical students, the land of the Debae. Pliny's *regio Canauna* has been identified by A. Sprenger and B. Moritz with the Ḳanawnā mentioned by al-Ḥamdānī, but this town lies at the mouth of the Wādī of the same name. Gold, for which this region was celebrated in antiquity, is still found here; the Āl Khatārish still get gold from the streams. Al-Ḳunfudha, however, seems to have been the northern limit of this ancient gold area. The name appears to be comparatively modern. The Portuguese know it in the form Confutá. Niebuhr calls al-Ḳunfudha a large but badly-built town, In his day (1761) it derived a certain importance from the trade in coffee, because all the ships carrying coffee from Yemen to Djidda had to pay toll here to the Sharīf of Mecca, although the town was within the sphere of suzerainty of the *Imām* of Ṣanʿāʾ. It passed to the Sharīf, together with the whole strip of coast from Djidda to Haly which the Sharīf of Mecca won in *ca.* 1722, and even had a certain revival of prosperity when Muḥammad ʿAlī conquered the Sharīfs and made al-Ḳunfudha his base of operations for the campaign against Central Arabia and ʿAsīr. Soon after this, al-Ḳunfudha figured in the rebellion of the Georgian commander Meḥmed Agha Türkče Bilmez against Muḥammad ʿAlī's governor in the Ḥidjāz, Aḥmad Pasha (1832-3); Türkče Bilmez penetrated to al-Ḳunfudha, Abū ʿArīsh, Ḥudayda, and even to Mocha by 1833, before his revolt was quelled. It was only in 1870 that the Ottomans were able to revive Muḥammad ʿAlī's plans and al-Ḳunfudha became the base of operations against the tribes of the hill country of ʿAsīr, after the conquest of which in 1871, al-Ḳunfudha with its hinterland became a *ḳaḍāʾ* of the *sandjaḳ* of ʿAsīr. A certain degree of Ottoman control was now implanted, and al-Ḳunfudha was linked by telegraph with Djidda to the north and Luḥayya, Ḥudayda and Ṣanʿāʾ to the south. However, the district soon fell to the Sharīf Ḥusayn of Mecca's son ʿAbd Allāh at the time of the Arab Revolt, and in September 1916 both al-Ṭāʾif and al-Ḳunfudha were lost by the Turks; already in the previous year, the local ruler of adjacent ʿAsīr, Sayyid Muḥammad al-Idrīsī, had adhered to the Allied cause [see ʿASĪR]. In 1923-5 the whole of the Ḥidjāz was occupied by ʿAbd al-ʿAzīz b. Saʿūd, and al-Ḳunfudha henceforth has formed part of the Saʿūdī kingdom.

(A. Grohmann-[C. E. Bosworth])

ḲUNGRĀT, the name of first a Mongol and then a Türkmen tribe of Central Asia, and deriving its name from these last, a settlement on the lower Āmū Daryā or Oxus, modern Kungrad.

The Mongol tribe of Ḳonḳīrat/Ḳonḳurat or Onggirat (spelt Ḳ.n.ḳūrāt in Djuwaynī, Ungrat in Marco Polo) seems to have lived in the extreme east of Mongolia, towards the Khinggan Mts. in a district called Ābdjiya-Küteger. The tribe gave its allegiance to Čingiz in his struggle against Ong Khān [see ČINGIZ KHĀN], and had the privilege of supplying the Khāns with wives; thus Čingiz's wife Börte Fudjin, mother of his five principal sons, was from the Ḳonḳīrat, as were wives of Djoči and Orda. Cf. P. Pelliot and L. Hambis, trs., *Histoire des campagnes de Gengis Khan: Cheng-wou ta'in-tcheng lou*, i, Leiden 1951, 402-9; Pelliot, *Notes on Marco Polo*, Paris 1959-63, ii, 869-70, No. 375; Djuwaynī-Boyle, i, 38, ii, 585; J. A. Boyle, *The successors of Genghis Khan*, New York-London 1971, 17, 97.

The tribal name was carried westwards in the mass movement of peoples during the Mongol invasions, and elements of the Mongol Ḳonḳīrat doubtless mingled with and were eventually absorbed into Turkish tribes of the Turkestan steppes. Hence in recent times Ḳungrāt has been noted as a tribal name amonst both the Özbegs and the Ḳara Ḳalpaḳs of the

region to the south of the Aral Sea (M. A. Czaplicka, *The Turks of Central Asia in history and at the present day*, London 1918, 38, 40). In the 18th century the Özbeg Ḳungrāt played a dominant role in the Khānate of Khīwa. When the ʿArabshāhid line of Khāns of Khīwa became extinct at the end of the 17th century, real power was exercised in the Khānate by Ḳungrāt military chiefs who held the title of Inaḳ [*q.v.* in Suppl.]. In the early 19th century, these Inaḳs came themselves to assume the title of Khān and ruled in Khīwa until the period of the Russian protectorate [see KHWĀRAZM]. The tribal name was given to a settlement in the delta or "island" area of the Oxus mouth, on the road between Khodja-ili and the Aral Sea shores; during the later 18th century, until 1226/1811 and the time of Muḥammad Raḥīm Khān of Khīwa (1221-41/1806-26), this district centred on Ḳungrāt was in effect an independent principality (see Barthold, *Turkestan down to the Mongol invasion*[3], 151, and idem, *Histoire des Turcs d'Asie Centrale*, 192).

In 1858 a Russian military steamer sailed up the Oxus delta, alarming the inhabitants of Ḳungrāt, and the town was an important strategic point in the Russian expeditions of 1873 under General Kaufmann and directed against Khīwa; it formed the concentration-point for the naval force from the Aral Sea and the land forces from Orenburg and from Manghïshlāḳ (see E. Schuyler, *Turkistan, notes of a journey in Russian Turkestan, Khokand, Bukhara, and Kuldja*, London 1876, i, 107, ii, 331, 336, 346-8). Kungrad is now a town in the Kara Kalpak ASSR; see on it *BSE*[2], xxiv, 53.

ḲŪNKA, variant forms Ḳūnḳa, Kūnka, Kūnkā, Kunka, the Arabic name for the modern town of Cuenca, administrative centre of the province of the same name in Castile, Spain, situated near the confluence of the Júcar and Huécar Rivers at an altitude of 922 m. at the point where the Mancha becomes a mountain chain. According to al-Idrīsī, Ḳūnḳa was "a small, ancient town, surrounded by a wall, and lacking a suburb". Al-ʿUdhrī mentions it among the 20 stages of the route connecting Cordova and Saragossa. Al-Idrīsī mentions Cuenca in his division of al-Andalus into 26 *iḳlīms*, but gives it the title of a *kūra*. Al-ʿUmarī makes it the eleventh province of Spain, comprising the towns of "Orihuela, Cuenca, Elche and Denia, as well as numerous strongholds". Yāḳūt makes it part of the *aʿmāl* of Santaver, and Ibn Ṣāḥib al-Ṣalāt, who was there in 567/1172, has left a description of it.

During the period of the *mulūk al-ṭawāʾif*, various political and economic factors reinforced the strategic importance of Cuenca. Previously, from 151/768 to 160/777, it had been part of the region shaken by the rebellion of Shaḳyā al-Fāṭimī. It had then passed to the Dhu 'l-Nūnids [*q.v.*], and in 295/908 had been divided among the three sons of Mūsā, who in these strongholds of the frontier zone, were virtually independent of the central government. At the beginning of the 5th/11th century, Cuenca belonged to Ismāʿīl b. Dhī 'l-Nūn, who proclaimed his independence in the *ṭāʾifa* of Toledo. Later, we find Ibn al-Faradj, who distinguished himself in military campaigns, as *wālī* of Cuenca for the Dhu 'l-Nūnids. Whilst al-Mutawakkil b. al-Afṭas temporarily occupied Toledo (472/1079), al-Ḳādir took refuge in Cuenca. In the following year, Sancho Ramirez and Aḥmad b. Hūd besieged the town, which bought them off with a sum of money. After Alfonso VI's capture of Toledo (478/1085), Cuenca passed under Castilian rule and was included in the famous "dot de la mora Zaida". Alfonso probably kept the Muslim structure of the town, requiring a tribute, according to the homilies of the Mozarab Count Sisnando. In 490/1097, whilst Cuenca was being protected by Alvar Fañez's army, the Almoravids led by Muḥammad b. ʿĀʾisha raided the district, and after the victory of Uclés (501/1108) occupied the town; but in 531/1137 the populace rose against the Almoravid garrison and felt the sting of Tāshfīn b. ʿAlī's sword. Ibn Mardanīsh [*q.v.*] made over to the Christians lands near Cuenca, but the latter retreated before the Almohad caliph Abū Yaʿḳūb, who in 567/1172 found the town sunk in decay, with only 700 inhabitants. It was besieged by Alfonso VIII, helped by Alfonso II of Aragon, and surrendered on 21 September 1177 after a seven months' siege, without the Almohads being able to protect it. Abu Yaʿḳūb tried to regain it in 1194 and burnt its standing crops in 1197. After the conquest of Cuenca, the Castilian king made grants to the military orders of Santiago and Calatrava, and the town was soon organised as a *Concejo*, whilst retaining some of its older organisations and structures, such as the office of *almotacen* (*muḥtasib* [see ḤISBA]). The *Fuero* offered commercial concessions to the Mudéjares. The second bishop of Cuenca was a Mozarab from Toledo, Saint Julian. There remained a mosque, "lindante con el monasterio de Ntra. Sra. de la Contemplacion" until the 15th century. During the period of the harrying of the Moriscos, Cuenca was the seat of a tribunal of the Inquisition.

The local economy of Cuenca flourished greatly during the 4th/10th century, with textile and ivory-carving crafts, and there were salt pans and silver and iron ore mines in the vicinity. Also, wood cut in the Serranía was sent down the Júcar to the Mediterranean shores.

ḲUNṢUL [see consul].

KUNTA (sometimes pluralised as Kanāta), a highly ramified Arabic-speaking tribe widely dispersed over the southern Sahara from Tagānit in Mauritania to the Adrar-n-Ifoghas in eastern Mali and beyond. Their own genealogies claim descent from ʿUḳba b. Nāfiʿ al-Fihrī [*q.v.*], to whom they attribute a series of exploits in and beyond ancient G͟hāna as far as Takrūr. According to the so-called *Taʾrīk͟h Kunta* (tr. in I. Hamet, *Notice sur les Kounta*), Sīdī ʿAlī, a descendant of ʿUḳba, married the daughter of Muḥammad b. Kunta b. Zazam (or Zam), chief of the Id Oukal (Ibdūkal/Abdūkal) fraction of the Lamtūna Berbers, allegedly in the early 9th/15th century. Their son, Muḥammad, married into another Lamtūna group, the Tād͟jakānt, as did also his son Aḥmad al-Bakkāʾī. It is from the latter's three sons that all the branches of the Kunta derive. Thus, even by their own accounts, the Arab element in Kunta stock would appear small, and, significantly, their eponym is Berber. Their *zawāyā* (non-warrior) status, too, is indicative of Berber origin and, like most such groups in the western Sahara, they probably acquired an Arab pedigree along with the Arabic language during the period of Ḥassāniyya ascendancy in the 9th-10th/15th-16th centuries.

The period from the mid-10th/16th century, when Aḥmad al-Bakkāʾī's son Sīdī ʿUmar al-S͟hayk͟h is said to have died, until the early 12th/18th century seems to mark the emergence of the Kunta as a distinct and relatively large tribe, their numbers no doubt being augmented by the acquisition and eventual integration of tributaries and slaves. They appear to have roamed over a wide area from the Hodh (al-Ḥawḍ) in the south to al-Sāḳiya al-Ḥamrāʾ in the north and Tuwāt in the east. Some members settled in Walāta and in a village in Tuwāt known as Zāwiyat Kunta where Sīdī ʿUmar's son, Sīdī al-Muk͟htār al-S͟hayk͟h, is said to have been buried.

In the early 12th/18th century a rift occurred. The clans descended from Sīdī Muḥammad al-Ṣag͟hīr b. Aḥmad al-Bakkāʾī hived off to roam the western Sahara from the banks of the River Senegal to al-Sāḳiya al-Ḥamrāʾ (the Kunta al-Ḳibla), while those descended from Sīdī ʿUmar al-S͟hayk͟h combined pastoralism with commerce, establishing a network of camps and trading posts from the Wādī Darʿa through Tuwāt and the Azawād region north of the Middle Niger to Timbuktu in the west and Katsina in the east.

Among the latter, the Awlād Sīdī al-Wāfī established a position of pre-eminence in the second half of the 12th/18th century, due to the role of their leader Sīdī al-Muk͟htār al-Kabīr b. Aḥmad b. Abī Bakr (1142-1226/1729-1811), who combined qualities of sanctity with political astuteness and commercial acumen. In *ca.* 1167/1753-4 he established his camp at al-Ḥilla in Azawād, which rapidly became a centre of study and of the propagation of the Ḳādiriyya Order. It is from the sub-order which he established, the Muk͟htāriyya, that most of the Ḳādiriyya

groups in West Africa derive their affiliation. Sīdī al-Mukhtār's role as a Ṣūfī leader and his prestige as a scholar enabled him to mediate between warring Arab and Tuareg tribes in the area and to heal the rift between the eastern and western Kunta. His far-ranging missionary tours (*siyāḥa*) in the Sahara, and his *zāwiya* at al-Ḥilla, which received disciples from distant areas, were supported by income from participation in the salt trade from Taoudeni to the Niger and the trade in tobacco from Tuwāt to Timbuktu.

His teachings, born of his Ṣūfī outlook as well as the position of his clan as a *zawāyā* group, emphasised leniency, the overlooking of faults and the winning of hearts through "*djihād* of the tongue" rather than "*djihād* of the sword", though when ʿUthmān b. Fūdī [*q.v.*] initiated a militant *djihād* in 1218/1804-5, he expressed his approval of it. He proclaimed himself the sole "regenerator" (*mudjaddid*) of the 13th century of the *hidjra* (1200 = 1786), though for earlier centuries he named a multiplicity of regenerators in different spheres of endeavour such as *fiḳh*, *ḥadīth*, *siyāsa*, *zuhd* etc. (cf. the view of Ibn Kathīr reported by al-Suyūṭī, *Risāla fī man yabʿath Allāh li-hādhihiʾ 'l-umma ʿalā raʾs kull miʾa*, ms. Leiden, 2409², f. 6). Over sixty works are attributed to him, including several series of *adjwiba*, as well as a great deal of poetry. None has so far been published and manuscript copies are scattered over private libraries in Timbuktu and the southern Sahara and in such public collections as the Bibliothèque Générale et Archives, Rabat, and the Bibliothèque Nationale, Paris.

His son, Sīdī Muḥammad (*ca.* 1178-1241/1765-1826), inherited his position as leader of the Ḳādiriyya-Mukhtāriyya and was himself a prolific author. His *Taʾrīkh Kunta* (properly called *al-Risāla al-Ghallāwiyya*) has already been mentioned, and his *Kitāb al-Ṭarāʾif wa 'l-talāʾid*, ostensibly a hagiographical work on his father and mother, has been abstracted by Ismael Hamet in his *Littérature arabe saharienne*, in *RMM*, xii (1910), 196-213, 380-405. It contains an annotated *silsila* for the Ḳādiriyya-Mukhtāriyya, in which the names of al-Suyūṭī, ʿAbd al-Raḥmān al-Thaʿālibī and Ibn ʿArabī appear as successive links, thus invalidating it as an historical document, but no doubt enhancing the spiritual prestige of the order in the eyes of its members. The *wird* of the Mukhtāriyya was widely propagated in southern Mauritania by an outstanding pupil of Sīdī Muḥammad, Shaykh Sīdiyya (1190-1284/1776-1868) of the Awlād Abyayri from his *zāwiya* in Būtilimīt.

On Sīdī Muḥammad's death, leadership of the Awlād Sīdī al-Wāfī and direction of the Mukhtāriyya passed to his eldest son Shaykh Sīdī al-Mukhtār al-Ṣaghīr (1204-64/1790-1847). He was instrumental in saving Timbuktu from the worst excesses of the Fulbe forces of Aḥmadu Lobbo [*q.v.*] and eventually driving them from the city. His brother, and successor to both his political and spiritual role, Aḥmad al-Bakkāʾī (*ca.* 1217-81/1803-65) negotiated a pact with the Fulbe in 1846 at Muḥammad's request and himself came to settle in Timbuktu, gaining sufficient moral authority there to be able to act as protector for the explorer Heinrich Barth, an open Christian, in 1853. Al-Bakkāʾī wrote numerous poems and *rasāʾil*, some addressed to the Fulbe rulers of Māsina, others attacking the claims of the Tidjāniyya order.

In the closing years of the 19th century, two grandsons of Sīdī Muḥammad distinguished themselves by their attitudes to French penetration of the central southern Sahara: Zayn al-ʿĀbidīn b. Muḥammad al-Kuntī (b. 1848), who declared a *djihād* against the French after their occupation of Timbuktu in 1894 and whose continued challenge to French authority remained a menace in the first two decades of the 20th century; and Sīdī Bāy b. Sīdī ʿUmar (b. 1865), a scholar and man of saintly repute who took up residence in the Adrar-n-Ifoghas and encouraged both the Ifoghas and Ahoggar Tuareg to avoid conflict with the French. Several copies of his *Nawāzil*, as yet unstudied, are preserved in the Institut des Sciences Humaines, Niamey, Rép. du Niger.

The spiritual influence of the Kunta in the 12th-13th/18th-19th centuries was far-reaching. The two major Fulbe leaders, Shaykh ʿUthmān b. Fūdī and Shaykh Aḥmadu Lobbo, both received and propagated the *wird* of the Mukhtāriyya, though in both Hausaland and Māsina the Tidjāniyya gained ground rapidly from the mid-19th century. A list of the main groups of West African Muslims attached to the Order or branching from it may be found in P. Marty, *Études*, i, 140-1 (see Bibl.).

Bibliography: For the Kunta view of their own history, see Sīdī Muḥammad b. al-Mukhtār al-Kuntī, *Taʾrīkh Kunta* (= *al-Risāla al-Ghallāwiyya*), tr. I. Hamet in *RMM*, xv (1911), 302-18, and as *Notice sur les Kounta*, in *Mission Cortier 1908-1909-1910*, Paris 1914, 263-88, summarised in Shaykh Sīdiyya Bābā, *History of the Western Ṣanhāja*, in H. T. Norris, *Saharan myth and saga*, Oxford 1972, 195-200; and idem, *K. al-Ṭarāʾif wa 'l-talāʾid bi-karāmāt al-shaykhayn al-wālida wa 'l-wālid*, ms. Bibl. Nat. Paris, 5511. A critical study of early Kunta history has been made by T. Whitcomb in his doctoral thesis *The origin and emergence of the tribe of Kunta: a contribution to the history of the Western Sahara between the Almoravid period and the seventeenth century*, University of London, 1979; see also idem, *New evidence on the origins of the Kunta*, in *BSOAS*, xxxviii (1975), 103-23, 403-17. Further biographical material on Sīdī al-Mukhtār al-Kabīr is to be found in Muḥammad ʿAbd Allāh al-Bartilī, *Fatḥ al-Shakūr fī maʿrifat aʿyān ʿulamāʾ al-Takrūr*, ms Bibl. de l'Inst. de France, 2406/118, f. 23, which includes a list of his writings; Muḥammad Bello, *Infāḳ al-maysūr fī taʾrīkh bilād al-Takrūr*, Cairo 1964, 220-2; Aḥmad al-Amīn al-Shinkīṭī, *al-Wasīṭ fī tarādjim udabāʾ Shinḳīṭ*, 3rd ed., Cairo 1370/1961, 361, also 494, 506-7, 509-10, for Kunta struggles in Mauritania. On Aḥmad al-Bakkāʾī, see H. Barth, *Travels and discoveries in North and Central Africa*, New York 1857-9, repr. London 1965, iii, *passim*; on Sīdī Bāy, see Cortier, *D'une rive à l'autre du Sahara*, Paris 1908, 286-9, H. T. Norris, *The Tuaregs: their Islamic legacy and its diffusion in the Sahel*, Warminster 1975, 168-71, and other material on the Kunta, *passim*. A list of titles of works by Kunta authors is given in W. A. Brown, *The Bakkāʾiyya books of Timbuktu*, in *Research Bull., Centre of Arabic Documentation*, Ibadan, iii/1 (1967), 40-4, and ms. listings appear in C. C. Stewart, *Notes on North and West African manuscript material relating to the Qādiriyya ṭarīqa*, in *ibid.*, iv (1968), 1-25; see also L. Massignon, *Une bibliothèque saharienne*, in *RMM*, viii (1909), 409 ff. The fullest study of Sīdī al-Mukhtār's life and teachings is in A. A. Batran, *Sīdī al-Mukhtār al-Kuntī and the recrudescence of Islām in the Western Sahara and the Middle Niger, c. 1750-1811*, unpublished Ph.D. thesis, University of Birmingham, 1971; also idem, *The Qādiriyya-Mukhtāriyya brotherhood in West Africa and the concept of taṣawwuf in the writings of Sīdī al-Mukhtār al-*

Kuntī (*1729-1811*), in *Trans-African J. of Hist.* (Nairobi), iv/1-2 (1974), 41-70. For the influence of the Kunta *shaykhs* on Shaykh Sīdiyya, see C. C. Stewart, *Islam and social order in Mauritania*, Oxford 1973, 34-53. A history of the eastern Kunta and their *shaykhs* is given in P. Marty, *Études sur l'Islam et les tribus du Soudan*, i, Paris 1920, 1-175, and their contemporary situation is described in J. Genevière, *Les Kounta et leurs activités commerciales*, in *BIFAN*, xii (1950), 1111-27. See also Brockelmann, S I, 894; Muḥammed b. Muḥammad Makhlūf, *Shadjarat al-nūr al-zakiyya*, Cairo 1349/1930-1, 377; Cne G. Salvy, *Les Kounta du Sud Marocain*, in *Travaux de l'Inst. de Rech. Sahariennes*, vii (1951), 166-86; Kaḥḥāla, iv, 198.

(J. O. Hunwick)

ḲUNŪT (A.), a technical term of Islamic religion, with various meanings, regarding the fundamental signification of which there is no unanimity among the lexicographers. "Refraining from speaking", "prayer during the *ṣalāt*", "humility and recognition that one's relation to Allāh is that of a creature to his creator", "standing"—these are the usual dictionary definitions which are also found in the commentaries on different verses of the Ḳur'ān where *ḳunūt* or derivatives from the root *ḳ-n-t* occur. There is hardly one of these for which the context provides a rigid definition of the meaning (see II, 110, 239; III, 15, 38; IV, 38; VI, 121; XXX, 25; XXXIII, 31, 35; XXXIX, 12; LXVI, 5, 12).

The *ḥadīth* gives more definite contexts. "The best *ṣalāt* is a long *ḳunūt*" (e.g. Muslim, *ṣalāt al-musāfirīn*, trad. 164, 165, *bāb afḍal al-ṣalāt ṭūl al-ḳunūt*; al-Tirmidhī, *Ṣalāt*, *bāb* 168). Here, in the unanimous opinion of all the commentators (see al-Nawawī on the passage), *ḳunūt* means "standing". In the well-known *ḥadīth*: "alike to the fighter on the path of Allāh is he who fasts, who stands, who *ḳānit bi-āyāt Allāh*" (Muslim, *Imāra*, trad. 110), *ḳānit* has obviously the meaning of "to recite standing" (cf. Abu Dāwūd, *Shahr Ramaḍān*, *bāb* 9: "And he who recites 100 verses of the Ḳur'ān standing is enrolled among the *ḳānitūn*"). *Ḳunūt*, however, usually seems to be connected in meaning with *du'ā'*, e.g. in the oft-quoted tradition which tells how Muḥammad in the *ṣalāt al-ṣubḥ* appealed to Allāh for a month against the tribe of Ri'l and Dhakwān, as they had slain the *ḳurrā'* at Bi'r Ma'ūna (*Witr*, *bāb* 7); in this case the meaning is certain from the explanation *yad'ū 'alā* (al-Bukhārī, *Witr*, *bāb* 7; *Djihād*, *āb* 184). In the parallel tradition, idem, *Maghāzī*, *bāb* 28, trad. 3, there is added "and till then we were wont to perform the *ḳunūt*". Some sources (see Goldziher, *Zauberelemente*, 323) add that this was in the month of Ramaḍān.

The rite also appears in parallel traditions in a more precise form; it is said that the *ḳunūt* took place in the *ṣalāt al-fadjr* (al-Bukhārī, *Da'awāt*, *bāb* 59) after the *rukū'* (idem, *Witr*, *bāb* 7). It is still more precisely defined in a *ḥadīth* in al-Nasā'ī, *Taṭbīḳ*, *bāb* 32: "... that he heard how the Prophet when he raised his head after the first *rak'a* at the *ṣalāt al-ṣubḥ*, said: "O Allāh, curse this and that man (i.e. some of the *munāfiḳūn*); thereupon Allāh revealed: "It does not concern thee whether He turns to them with favour or punishes them" (III, 123). The following is another example of *ḳunūt*: "When the messenger of Allāh lifted his head after the second *rak'a* at the *ṣalāt al-ṣubḥ*, he said: "O Allāh, save Walīd b. Abī Walīd and Salima b. Hishām and 'Ayyāsh b. Abī Rabī'a and the weak ones in Mecca. O Allāh, tread heavily on Muḍar and send them years of famine, like the years of Joseph" (al-Nasā'ī, *Taṭbīḳ*, *bāb* 28). According to another tradition, which also goes back to Abū Hurayra (al-Bukhārī, *Adhān*, *bāb* 126), the *ḳunūt* consisted of prayers and blessings for the Muslims and curses upon the unbelievers.

We are also told that the *ḳunūt* was regularly performed at the morning and evening *ṣalāt* (*subḥ* and *maghrib*; al-Tirmidhī, *Ṣalāt*, *bāb* 177; al-Nasā'ī, *Taṭbīḳ*, *bāb* 30). Al-Tirmidhī gives the following note on this tradition: "The learned differ in their views about the *ḳunūt* at the *ṣalāt al-fadjr*. Some of the scholars of the *Ṣaḥāba* and later generations advocate this *ḳunūt*, such as Mālik and al-Shāfi'ī". Aḥmad [b. Ḥanbal] and Isḥāḳ say: "There is no *ḳunūt* uttered at the *ṣalāt al-fadjr* except in case of a calamity, which affects the Muslims as a body". In such a case the *Imām* has to pray for the Muslim armies. *Ẓuhr* and *'ishā'* are also mentioned as *ṣalāt*s into which the *ḳunūt* was inserted (al-Bukhārī, *Adhān*, *bāb* 126; al-Nasā'ī, *Taṭbīḳ*, *bāb* 29).

There is further a difference of opinion as to where, in the *ṣalāt*, the *ḳunūt* should be inserted. 'Āṣim is said to have asked Anas b. Mālik about the *ḳunūt*. Anas replied: "The *ḳunūt* took place ..." I asked: "Before or after the *rukū'*?" He replied: "Before the *rukū'*". I said: "But I have been told on your authority, after the *rukū'*". Anas replied: "Then they lied. The apostle of Allāh only uttered the *ḳunūt* prayer after the *rukū'* for a month. I think, after he ..., etc." (here follows the story of Bi'r Ma'ūna, see above, Bukhārī, *Witr*, *bāb* 7). It is even said that the *ḳunūt* is a *bid'a*. Abu Mālik al-Ashdja' records a tradition on the authority of his father, that the latter had performed the *ṣalāt* under the direction of Muḥammad, Abū Bakr, 'Umar, 'Uthmān and 'Alī and that none of these uttered the *ḳunūt* prayer. He adds "it is therefore also a *bid'a*, my son" (al-Nasā'ī, *Taṭbīḳ*, *bāb* 33).

Nevertheless, it continued to be known as the name of the prayer (*du'ā'*) at the *ṣalāt*. In the books of tradition a formula is given for the *ḳunūt al-witr* (it occurs often and in different forms, though it is not always called *ḳunūt* but is given names like *du'ā'*, etc.): "O Allāh, lead me amongst those whom Thou guidest, and pardon me among those whom Thou pardonest, and care for me among those for whom Thou carest and bless me with what Thou distributest, and protect me from the evil that Thou has decided upon; for Thou decidest and none decides about Thee. Disgrace will never come upon him for whom Thou carest. Thou art blessed and exalted, O our Lord" (al-Tirmidhī, *Witr*, *bāb* 10). The same formula is found as an element in the *ṣalāt* in al-Nawawī, *Minhādj*, ed. van den Berg, i, 83, 455-6; cf. Lane, *Lexicon*, s.v. *ḳ-n-t*, who gives another formula.

KUNYA (A.), patronymic, an onomastic element composed of Abū (m.) "father" or Umm (f.) "mother" plus a name. We have here a metonymic designation corresponding to a general tendency among primitive peoples to consider an individual's name as taboo and not to pronounce it unless exceptionally (see J. G. Frazer, *The golden bough*, ch. xxii). The *kunya* was therefore accordingly the name which should be used, but in historical times, the original intention here was forgotten, and al-Djāḥiẓ (see *JA* [1967], 70, 82), far from seeing here any

connection with sympathetic magic, counts the *kunya* amongst the claims to glory of the Arabs and, seeing only one aspect of the reality, stresses the honour attaching to it. Nevertheless, it is certain that the use of the *kunya* was not wholly honorific, since it gave the possibility of citing a person whose name, for various reasons, including certain rather humilating ones (e.g. in regard to an enemy), one did not wish to pronounce. In any case, usage was such that the *kunya* sometimes came to predominate over the *ism* [*q.v.*] or name proper, to such an extent that the *ism* of certain personalities cannot be established with certainty, has been forgotten or may even never have existed (see e.g. Abū Ṭālib, Abū Lahab, etc.)

In principle, Abū or Umm is followed by the eldest son's name, and this usage is based on the value which Semitic peoples placed upon their children, and above all their sons. This again points to the importance placed on the punctilious performance of funeral rites, a duty that was incumbent upon the eldest son in particular. There is negative evidence of the connection between the *kunya* and funeral rites from the facts that slaves, as a rule, had no patronymic and that, unless they had been received into the *familia*, they were buried without ceremonies.

However, the *kunya* can be composed of the name of a younger son or even of a daughter, but again, this does not necessarily correspond to reality, and since it is given to a child, the latter might well have no issue of its own throughout his life. The giving of a *kunya* can in effect act as an expression of the hope that its nearer will have a son and will give him a determined name. Several *kunya*s are traditionally attached to certain names (the *ism* [*q.v.*]) by custom or in order to show respect for a precedent; an Ibrāhīm is often called Abū Isḥāḳ or Abū Yaʿḳūb, and a ʿUmar, Abū Ḥafṣ. Contrariwise, in principle it is forbidden to take Muḥammad's *kunya*, Abu 'l-Ḳāsim, in conformity with the *ḥadīth*, *tasammaw bi-smī wa-lā taktanū bi-kunyatī* "take my name [sc. Muḥammad], but not my *kunya*"; however, this prohibition was considered null and void at the Prophet's death, and it became regarded as sufficient to avoid the coupling of Abu 'l-Ḳāsim Muḥammad. The one and the same person might have more than one *kunya* (e.g. ʿUthmān b. ʿAffān had three, Abū ʿAmr, Abū ʿAbd Allāh and Abu Laylā), and cases are cited of warriors who had one for use in times of peace and one for times of war (e.g. ʿĀmir b. al-Ṭufayl and Ḳaṭarī [*q.vv.*]; see al-Djāḥiẓ, *Bayān*, i, 342). On the other hand, the *kunya* may be purely metaphorical and allude to some desired quality, like Abu 'l-Faḍl "father of merit" or Abu 'l-Khayr "father of goodness", etc. In certain cases, it may be a sobriquet based on some personal feature or characteristic, e.g. Abu 'l-Dawānīḳ "father of farthings", given to the ʿAbbāsid caliph al-Manṣūr, renowned for his meanness, or Abū Hurayra "father of the little cat, kitten", allegedly given this *kunya* because of his love of cats. The *kunya* not unfrequently may have a pejorative sense, as in Abū Djahl "father of ignorance", or point to some physical pecularity, as in Abū Shāma "the man with a birth-mark". In this way, Abū loses its original sense completely and becomes a synonym for *dhū* "the man with . . .".

The *kunya* is also applied, from an early period, to certain animals, e.g. Abū Fāris "lion", Umm ʿĀmir "hyena", Abū Sulaymān "cock", and to all sorts of things which are in some degree personified, e.g. monuments like Abu 'l-Hawl "the Sphinx", and toponyms, e.g. Abū Ḳubays, a mountain. Furthermore, the ancient usage of the words *abū* or *umm* with the sense of *dhū/dhāt* called forth a proliferation, especially obvious in the dialects, of expressive appellations including some term which usually marks out a peculiarity of the person or animal or thing in question, either in a humorous way (*abū liḥya/bū laḥya* "bearded person"; *bū khemsa*, in North Africa, "colonel" with five rank stripes, etc.) or in an euphemistic one (*abu 'l-baṣīr* "blind person", etc.). Some compound expressions of this kind are particularly applied to some plants and their fruit (*abū zaʿḳa* "nux vomica" because of its bitterness (*zaʿḳa*); *abū farwa* "chestnut", from the husk which resembles a fur; etc.), but mainly to certain animals (*abū misalla* or *abū minḳār* or *umm minḳār* "woodcock", with its long beak; *umm arbaʿ wa-arbaʿīn* "centipede"; *abu 'l-waththāb* "flea", from its habit of jumping; etc.).

The *kunya* became very early an onomastic element charged with expressiveness, in such a way that it had a caritative value and could be employed in special circumstances outside the sphere of private life. The warrior who advanced against enemy armies to challenge an enemy to single combat would call himself by his *kunya*, and it was by this name that the tribe would appeal to its champion for help (see Ḳays b. al-Khaṭīm, *Dīwān*, ed. Kowalski, fragment 4, v. 38). In official relationships, the caliph sometimes marked out one of his courtiers for special favour by publicly addressing him by his *kunya* and not by his name or *ism*, but after the 5th/11th century, protocol forbade such familiarity (Mez, *The renaissance of Islam*, Eng. tr. 136-7). Similarly, in correspondence emanating from the chancery, the *kunya* of the addressee was used when the sender wished to honour him (see al-Ḳalḳashandī, *Ṣubḥ*, v, 430-7).

At the present day, the usage of the *kunya* has disappeared, and the term is sometimes used, in official contexts, together with the *laḳab* [*q.v.*], to denote a family name; but one should remark that a number of patronymics adopted after the setting-up of a civil government in Arabic-speaking countries stem from former *kunya*s and that the nom-de-guerre of several Palestinian fighters is precisely a *kunya*.

(A. J. Wensinck*)

KUR, the largest river in the Caucasus (according to Ḥamd Allāh Mustawfī Ḳazwīnī, 200 *farsakhs* = nearly 800 miles in length). The Kur, known as Cyrus to the Greeks; Nahr al-Kurr to the Arabs; Kura to the Russians (said to be derived from *a-kuara*, "river", in the Abkhāzī tongue); and Mtkvari to the Georgians (said to be derived from *mdinaré*, "river" in the Kartlian dialect), rises in Georgia south of Ardahani (west of Ḳārṣ in the Poso district), and flows northwards to Akhaltzikhé, where it turns east (see map in V. Minorksy, *A History of Sharvān and Darband in the 10th-11th centuries*, Cambridge 1958, 174). For the rest of its course it maintains a generally west-east alignment, bisecting the city of Tiflis [*q.v.*]. The Kur, 240 feet wide in places, is navigable only by rafts in its upper course, "but lower, 150 miles before the Caspian, large sailing boats may ply, drawing up to 3 ft. of water" (W. E. D. Allen, *A history of the Georgian people*,

London 1971, 8). The navigation of the Kur has only once played a part in political history, at the time of the destruction of the town of Bardhaʿa [*q.v.*] by the Rūs in 332/943-4. Some 100 miles west of the Caspian Sea [see BAḤR AL-KHAZAR], the Kur is joined by the river Aras [*q.v.*], and the "united waters find a double mouth along the sandy foreshore of the Caspian" (Allen, *loc. sit.*) in the Gushtāsfī district. Just east of the confluence with the Aras, the Kur is crossed by a bridge at Djawād. In Islamic times, the Kur formed the boundary between the province of Ḳarābāgh or Arrān [*q.vv.*], and the regions of Shīrwān [*q.v.*] and Georgia [see AL-KURDJ].

Bibliography: Given in the article.

(W. BARTHOLD - [R. M. SAVORY])

AL-KURA, the sphere.

1. The sphere itself. The Arabs studied the properties of the sphere, following Euclid, Archimedes and Theodosius. They also dealt with certain principles of spherical trigonometry, which form the foundations for astronomical theory, the principle of the transversal (*shakl al-ḳaṭṭāʿ*), the principle of the four magnitudes (*al-shakl al-mughnī*) and the principle of the shadow, i.e. of the tangent (*al-shakl al-ẓillī*) following Menelaus and Ptolemy. (On the translations cf. M. Steinschneider in *ZDMG*, i [1896], 161 ff.; the mathematical principles are discussed by H. Bürger and K. Kohl, *Axel Bjørnbo Thābits Werk über den Transversalensatz*, in *Abhandl. zur Gesch. der Naturwissenschaft und Medizin* [1924], part 7, pp. 1-91; references are given there to the earlier literature also).

2. *al-Kura dhāt al-kursī* (the globe mounted on a stand) is used in two senses:

(a) The globe of the heavens (instead of *al-kura* we also find *al-bayḍa*, the egg, in this sense, e.g. in *Mafātīḥ al-ʿulūm*, 235, in al-Battanī, *Opus astronomicum*, ed. C. A. Nallino, 1913, i, 138; cf. E. Wiedemann, *Beitr. iii*, in *SBPMS Erlg.*, xxvii, [1905], 239 ff.). The constellations are painted on a globe. It is placed in a ring which stands on 3 or 4 legs Such globes have been prepared and described. perhaps as early as by Hipparchus, at any rate by Ptolemy. Ptolemy's description is given in the Arabic translations of the *Almagest* and in separate treatises. One such globe, erroneously ascribed to Ptolemy, was seen in Cairo in 435/1043-4 by Ibn al-Sandbadī (cf. Ibn al-Ḳifṭī, 440). The globes were made of wood covered with paper or with different metals. Hollow globes could also be made of metal, which were then fastened to wooden spheres. ʿAlam al-Dīn Ḳayṣar al-Taʿāsīf used a gilt wooden globe (Abu 'l-Fidāʾ, *Annales*, ed. Reiske, iv. 497; H. Suter, *Mathematiker*, no. 358). The making of such globes and the errors that occur in them were fully discussed by al-Bīrūnī (*Beitrage zur Gesch. der Mathematik, etc.*, in *Abhandl. zur Gesch. der Naturwiss. und Medizin*, part 4 [1922], 79-93; cf. also H. Schnell, *ibid.*, in a later part).

The astronomical instrument prepared by al-Idrīsī for King Roger of Sicily was apparently an armillary sphere.

(b) *al-Kura dhāt al-kursī* is also an arrangement by which one follows the movements of the heavens. The horizontal ring is directed to the horizon; it is notched at right angles in two opposite points, a meridian ring is placed in the notches and allowed to go to its lowest position in a groove. The globe itself turns round an axis which is placed in round holes at two opposite points on the meridian ring. Divisions are marked on the horizon and on the meridian ring. By turning the meridian ring in its grooves, the axis of the globe can be inclined at will to the horizon and the instrument can thus be used for all latitudes. A quadrant with divisions which can be placed on the globe enables many kinds of measurements to be taken. With this globe, the magnitudes of importance in astronomy, *al-ṭāliʿ*, *al-maṭāliʿ*, the props of the earth etc., can be obtained.

The oldest Arabic work on the subject is by Ḳusṭā b. Lūḳā [*q.v.*] and exists in Arabic in several editions, e.g. that of al-Marrākushī; it may go back to classical originals, as is probable in view of the author's relation to the Greeks. It was also translated into Latin, and into Spanish by Alfonso of Castile (*Libros del Saber*, i).

If the globe is left out and a series of other rings is added to the horizon and meridian rings, which correspond to circles in the heavens, we get the armillary sphere (*ālat dhāt al-ḥalaḳ*), the instrument with the rings with which the ancients, the Arabs and notably Alfonso of Castile, occupied themselves a great deal.

Bibliography: B. Dorn, *Drei astronomische Instrumente*, in *Mėms. de l'Acad. impériale des Sciences de St. Petersbourg*, series 7, vol. ix, no. 1 31; L. Am. Sedillot, *Mém. sur les instruments astronomiques des Arabes*, in *Mémoires présentés par divers savants à l'Acad. R. des Inscriptions*, etc., Paris 1844, series 1, vol. i, 1-229; F. Nolte, *Über die Armillarsphäre*, in *Abhandl. zur Gesch. der Naturwissensch., etc.*, part 2, 1-50. Nolte also gives the earlier literature.

3. *al-Kura al-muḥarriḳa*, the burning-glass (lit. the strongly-burning globe). Even the ancients knew the property possessed by rock crystal and glass globes of concentrating sunlight falling upon them on one point and setting alight an inflammable material there. But we find no indications that any scholar of antiquity studied the theory of this phenomenon. Ibn al-Haytham and Kamāl al-Dīn al-Fārisī [*q.vv.*] investigated this theory very brilliantly. Ibn al-Haytham starts from the values, given in a table of Ptolemy's and collected by himself also, of the angle of incidence, angle of divergence and angle of refraction of a ray of light falling on a smooth surface of glass, and investigates the path of the rays when they strike the surface of the globe at different distances from the axis drawn between the sun and the centre of the ball. It is proved that after refraction they all meet on the opposite surface of the globe in a little section from which they emerge with their direction altered. They cut the axis at different distances from the ball: the majority, however, meet at a point distant less than half the radius of the ball, and this is the burning point. If drawings are placed in the cone of rays formed by the rays coming from it, for example a red circular surface with a black ring upon, it and this is looked at through the front of the ball, remarkable figures are seen; these were also studied very fully by Ibn al-Haytham and Kamāl al-Dīn; they were able even then to reach the same results as Schellbach at a later date.

Wiedemann, *Beitr. xix, Über die Brechung des Lichtes in Kugeln nach Ibn al-Haitam und Kamāl al-Dīn al-Fārisī*, in *SBPMS Erlg.*, xlii (1910), 15-58; cf. also the references in the article ḲAWS ḲUZAḤ.

(E. WIEDEMANN)

KŪRA, a term designating, in the geographers and in official documents, an administrative unit within a province. It was felt as being a loan

word, certain authors giving it an Iranian origin, although a Greek origin (from χώρα) seems more likely. The exact definition of a *kūra* varies according to authors. Thus Ibn Khurradādhbih enumerates, in the same region, that of Ḥimṣ in Syria, *kūras* and *iḳlīms* at the same time, so that in this case, the two terms seem to be equivalent [see IḲLĪM]. But most of the geographers reserve the term *iḳlīm* for a region or province, call the districts *kūras*, and distinguish within these districts cantons called *tassūdjs* or *rustāḳs*; this is distinguished in particular by Ibn al-Faḳīh (*passim*, and tr. Massé, *Abrégé*, index) and al-Muḳaddasī (*passim* and tr. Miquel, index). Usually, the *kūra* has a chef-lieu which is often called a *ḳaṣaba*.

According to Yāḳūt, the *kūra* is the equivalent of the Persian *istān*, with the *istān* comprising several *rustāḳs*, the *rustāḳ* several *tassūdjs*, and the *tassūdj* several villages; thus Nāʾīn is a *tassūdj* belonging to the *rustāḳ* of Yazd, which comes within the *istān* of Iṣṭakhr, in the province of Fārs (W. Juwaideh, *The introductory chapter of Yāqūt's Muʿjam al-Buldān*, Leiden 1959, 56-8).

In mediaeval documents relating to Syria, acts of sale or *waḳfs*, the following classification is found: a *kūra* like that forming the Ghūṭa of Damascus comprises cantons (*iḳlīm*) which themselves contain villages (*ḳarya*) (see J. Sourdel-Thomine and D. Sourdel, *Trois actes de vente damascains du début du IVe/Xe siècle*, in *JESHO*, viii [1965], esp. 169 and n. 4, and also *Biens fonciers constitués waqf en Syrie fāṭimide*, in *JESHO*, xv [1972], 289-91). This usage of the term *iḳlīm* is apparently peculiar to Syria and Upper Mesopotamia, according to Ḥamza al-Iṣfahānī and Yaḳūt (Juwaideh, *op. cit.*, 39-40). It is further used thus in al-Andalus, which is explicable by the influence of Syrian practices in that country.

In al-Andalus, a simple province of the original Islamic empire, there existed, as elsewhere, administrative divisions called *kūras*, of which certain ones were, in origin, "militarised zones", i.e. they held contingents of soldiers who were maintained on the revenues of land grants; these divisions were therefore termed *kūra mudjannada* (Lévi-Provençal, *Hist. Esp. Mus.*, iii, 47-53).

(D. SOURDEL)

ḲURʿA (A.), in a technical sense designates rhapsodomancy. It is an Islamic divinatory procedure, analogous to bibliomancy; but in current usage the term refers to the drawing of lots, whatever form this may take, and this has been used following the Ḳurʾānic prohibition of *istiḳsām* [*q.v.*] and of *maysir* [*q.v.*], the two principal cleromantic techniques of pagan Arabia.

I. In the usual sense of "the drawing of lots", the term *ḳurʿa*, originally applied to "a wineskin with broad base and narrow neck" (*TA*, v, 453, l. 23) which probably served as a receptacle for the shaking of the lots, is still used in the present day in the sense of choosing and electing by lot or by vote. Monks choose among the novices those to whom they propose to give the habit, by *ḳurʿa* (the lots used being grains of wheat for "yes" and grains of barley for "no"). The polling station for legislative elections (*intikhābāt*) is called *maktab al-iḳtirāʿ*. In Ottoman Turkish circles, *ḳurʿa* was practised in the recruitment of conscripts, whence comes the expression *ḳurʿaya girmek* signifying "to reach the age of military service". A. Musil notes that in Arabia Petraea, the term *ḳurʿa* refers to a ball serving the function of a lottery ticket, made out of strips of paper bearing the names of the parties which are rolled in a ball of clay or wax and which are drawn out by persons who were not present during the inscription of the names or the rolling of the balls (*Arabia Petraea*, iii, 294).

The permanence of this usage is attested by the fact that the Prophet used to "draw lots" (*ḳāraʿa*) in order to decide which of his wives could accompany him in his travels (al-Ṭabarī, i, 1519), a procedure that he also used for the distribution of loot taken in raids (Ibn Saʿd, ii/l, 78, 82, 83), and also by the fact that a chieftain chosen by the drawing of lots was called *maḳrūʿ* (*TA*, *loc. cit.*, l, 8).

The legitimacy of recourse to *ḳurʿa* was acknowledged at a very early stage through imitation of the Prophet. *Ḥadīth* describes a number of cases where the latter resorted to *ḳurʿa* for a solution to questions of distribution (cf. al-Bukhārī, *Shahādāt*; al-Kasṭallānī, iv, 416 ff.).

In certain cases, where any decision is liable to appear unjust to one party or the other, the judge may resort to *ḳurʿa* (cf. al-Marghīnānī, *Hidāya*, Calcutta 1818, 813-14; tr. Hamilton, 2nd ed. London 1870, 565-6). Of the eleven cases of *ḳurʿa* listed in the *Minhādj al-ṭālibīn* (ed. Van den Berg, i, 119-20, 324; ii, 328, 404-5; iii, 99-100, 461-2) only two are considered impermissible.

II. In this list there is confusion between the drawing of lots and rhapsodomancy. On the latter, opinions vary as to its legitimacy. While al-Ḳasṭallānī, in his commentary on al-Bukhārī, concedes its legitimacy, following the Ḥanbalī Ibn Baṭṭa (d. 387/997), other authors like Abū Bakr Muḥammad b. al-ʿArabī (d. 543/1148), in *Aḥkām al-Ḳurʾān*, Abū Bakr Muḥammad al-Ṭurṭūshī (d. 520-5/1126-31) and Shihāb al-Dīn Abu ʾl-ʿAbbās al-Ḳarafī (d. 684/1405), quoted by al-Damīrī, *Ḥayāt al-ḥayawān* (ed. Būlāḳ 1284/1867), ii, 119, oppose the use of the Ḳurʾān for *faʾl* [*q.v.*]. Ibn al-Ḥādjdj (d. 737/1336) expands on this prohibition in a chapter entitled *Karāhat akhdh al-faʾl min al-muṣḥaf* (cf. *Madkhal*, i, 878).

Of what does Islamic rhapsodomancy consist? Like bibliomancy, it is a divinatory procedure involving the interpretation of verses or parts of verses or prophetic words encountered by chance on opening the Ḳurʾān or the *Ṣaḥīḥ* of al-Bukhārī. This practice is attested as early as the Umayyad period and the beginning of the ʿAbbāsid period (cf. accounts relating to the end of the Umayyad caliph al-Walīd II, d. 126/744, and to that of Abū Djaʿfar al-Manṣūr, d. 158/775, in al-Damīrī, ii, 119; Fahd, *Divination*, 215).

This consulting of the two most venerated books in Islam takes place in various forms, as the rhapsodomantic writings that are available to us bear witness:

(1) *Ḳurʿat al-Imām Djaʿfar b. Abī Ṭālib* or *Djaʿfariyya* (ms. Aya Sofya 1999, fols. 2-18b, 21.2 × 16 cm., a fine illuminated *naskhī* text dating from 907/1501), containing rhapsodomantic interpretations of Ḳurʾānic verses. Patronage of this art, propagated by the Shīʿa, is attributed to Djaʿfar, the Prophet's cousin, killed at the battle of Muʾta, in 8/629, because at the time of departure, one of his companions, ʿAbd Allāh b. Rawāḥa, drew a rhapsodomantic conclusion from a Ḳurʾānic verse relating to Hell (Ḳurʾān, XIX, 71) enunciated by the Prophet, and had a presentiment of the death of Djaʿfar.

(2) *al-Ḳurʿa al-Maʾmūniyya*, attributed to Yaʿḳūb b. Isḥāḳ al-Kindī (d. after 256/870), containing, in the form of tables, 144 questions, followed by 144 chapters, each comprising 12 answers; cf. ms. Aya Sofya 1999, 3, fols. 59-138a: *al-Ḳurʿa al-mubāraka*

al-Maʾmūniyya, a copy dating from 700/1300-1. The same *madjmūʿa* (fols. 19a-58a) contains an opuscule entitled *al-Ḳurʿa al-Dawazdhhamradj* (= *maʿrifat istikhrādj al-ḍamīr*) by an anonymous author, but an essay bearing an analogous title (*K. al-dawʾir-hamradj*) in the Library of the University of Istanbul (A 6292, 79 fols., 19 × 13 cm., a poor *naskhī* text from 1179/1765), carries the name of al-Kindī.

Two other works of *ḳurʿa* are attributed to al-Maʾmūn (d. 218/833): *Ḳurʿa li-ikhrādj al-faʾl wa 'l-ḍamīr* (Cairo ms. 7612, dating from 1058/1648) and *Ḳurʿa li 'l-Maʾmūn* (Cairo ms. 7613). These differ from the above and contain at the end some rhapsodomantic poems attributed to various authors.

(3) *al-Ḳurʿa al-Djawhariyya* (ms. Saray, Ahmet, III 1600, 1, fols. 1a-23b, 36.5 × 18 cm., *naskhī*, n.d.) marks a perceptible evolution in the practice of rhapsodomancy. In fact, the use of Ḳurʾānic verses interpreted according to the method of *taʾwīl* or allegorical exegesis, is supplemented by arithmomantic procedures (*ḥisāb al-djummal* or *ḥisāb al-nīm*), which play a part in *djafr* [*q.v.*] and in *ʿilm al-ḥurūf* [*q.v.*] *wa 'l-asmāʾ*. This consists, in the event, of combining the four consonants of the word *djawhar* *djdjw*, *djdjh*, *djdjr*, *djrh*, etc.). Each paragraph contains a prose interpretation of the combination, followed by another in verse, introduced by the formula *ḳāla al-rādjiz*.

In the *Ḳurʿat ḥurūf al-muʿdjam* (ms. Köprülü Fazil P. 164, fols. 57a-65b, 18 × 14 cm., *naskhī*, n.d.), the letters are arranged according to the *abdjad*, on three horizontal lines:

ʾ b dj d h w z ḥ ṭ y
k l m n s ʿ f ṣ
ḳ r sh t th kh dh ḍ ẓ gh

The inquirer selects one of these letters at random and is referred to the paragraph where the meaning of this letter is explained in verse (cf. the examples in Flügel, *Loosbücher*, 59-70).

In the *Ḳurʿat Dāniyāl*, it is numbers, formulated in two phrases, which serve as the *ḳurʿā*. These phrases are arranged in the following manner:

Ḳāraʿtu anā aḥad	*Ḳāraʿta anta aḥad*
Ḳāraʿtu anā ithnayn	*Ḳāraʿta anta ithnayn*
Ḳāraʿtu anā thalāth	*Ḳāraʿta anta thalāth*
Ḳāraʿtu anā ithnayn	*Ḳāraʿta anta aḥad, etc.*

The meaning of these formulae is explained, as in the essay discussed above, in the form of verses introduced by *ḳāla al-rādjiz* (cf. ms. AS 523, fols. 95a-103a, 26 × 17 cm., *naskhī* from 840/1436-7). In the *Fihrist*, 314, a similar essay is attributed to Daniel, to Iskandar Dhu 'l-Ḳarnayn (with arrows), to Pythagoras (cf. P. Tannery, *Notices sur des fragments d'onomatomancie arithmétique*, in *Notices et Extraits*, xxxi/2 [1886], 231-60 = *Mémoires scientifiques*, ix, 17-50), to Ibn al-Murtaḥil and to the Christians.

The greatest degree of complexity attained by this type of *ḳurʿa* appears in three works which al-Bīrūnī (d. 440/1048) claims that he translated (from Hindustani?) bearing the following titles: *al-Ḳurʿa al-muṣarriḥa bi 'l-ʿawāḳib* ("The *ḳurʿa* which gives clear indications of consequences"), *al-Ḳurʿa al-muthammana li'stinbāt al-ḍamāʾir al-mukhammana* ("The eightfold *ḳurʿa* for the discovery of inner thoughts in the mind") and *Sharḥ mazāmīr al-ḳurʿa al-muthammana* ("Commentary of the reeds of the eightfold *ḳurʿa*") (cf. al-Bīrūnī, *Chronologie orientalischer Völker*, ed. Sachau, Leipzig 1976, Introd., p. xlv).

(4) Too complicated for popular usage, these *ḳurʿas* have yielded place to a series of much simpler *ḳurʿas*, based essentially on the drawing of lots, such as *ḳurʿat al-anbiyāʾ*, consisting of looking for the answer to the question that one poses in the name of the Prophet on whom the finger falls; *Ḳurʿat al-ṭuyūr* (*ṭayr* to be taken here in the broad sense of "fortune", good or bad) which draws a conclusion from every omen presenting itself at the moment of consultation, including the flight of birds; *ḳurʿa maymūna* ("The *ḳurʿa* crowned with success"), etc. (cf. refs. in *Divination*, 218, n. 4). Thus the term *ḳurʿa* acquires a generic sense and serves to designate various forms of divination by lot (such as *Ḳurʿat al-raml*, *Ḳurʿat li-ikhrādj al-faʾl wa 'l-ḍāmir*, etc.).

ḲURAMA, according to Radloff (*Versuch eines Wörterbuches der Türk-Dialecte*, St. Petersburg 1899, ii, 924) "a Turkish tribe in Turkistan"; the same authority gives the Kirgiz (i.e. Ḳazaḳ) word *ḳurama* (from *ḳura*, "to sew together pieces of cloth") with the meaning "a blanket made of pieces of cloth sewn together". In another passage (*Aus Sibirien*², Leipzig 1893, i, 225) Radloff himself says that the Kurama are "a mixed people of Özbegs and Kirgiz" and their name comes from the fact, asserted by the Kirgiz, that "they are made up of patches from many tribes" (*kura* to "patch together"). He further says that the Kurama are "a settled tribe" between Tashkent and Khodjand, to be more accurate, on the river Angren (a corruption of Āhengerān) south of Tashkent. In Russian sources we find it stated as early as 1875 that the Kurama first arose in the 18th century. But as early as 1045/1635 in the description of the wars between the Ḳazaḳ and Özbegs on the Angren we find the "leaders of the Kurama" (*sardārān-i Ḳūramā*) mentioned (Maḥmūd b. Walī, *Baḥr al-asrār*, India Office ms. 575, f. 119a).

Under the rule of the Khāns of Khoḳand in the 19th century, the word Kurama is used not only as an ethnographic but also as a geographical term and the name of an administrative division. The road from Khoḳand to Tashkent over the Kendir-Dawan pass was called the Kurama road (*Rāh-i Ḳūrama*, e.g. in the *Taʾrikh-i Shāhrukhī*, ed. Pantusov, Kazan 1885, 238). The Kurama were ruled by a Beg who lived in the fortress of Kercuči (in the written language Kīrāwčī; on Russian maps also Kelyaučī). This use of the word Kurama was retained for some time under Imperial Russian rule. In the division of the territory (*oblast*) of Sīr-Daryā into districts (*uʾezd*), what later (after 1880) became known as the "district of Tashkent" was called the "district of Kurama" (*Kuraminskiy uʾezd*). The centre of government of the district was intended to be the little town of Toy-Tübe founded in the reign of Madali Khān (1822-42; cf. KHOḲAND); but the district headman (*uʾezniy načal'nik*) actually lived at Küylük on the Čirčik. Under Russian as under Khoḳand rule, the district of Kurama was of considerable economic importance as a centre of rice-growing. Russian

ethnographers put the Kurama in a class by themselves as descendants of nomads (Kirgiz, i.e. Ḳazaḳ) who have become agriculturists (Sarts, *q.v.*). In spite of the adoption of the Sart mode of life, the Kurama never quite lost their particular characteristics inherited from their nomadic ancestors.

This could still be seen in the early 20th century. Unlike the Sarts, the Kurama lived, like the Ḳazaḳ, in yurts; their wives, as with the Ḳazaḳ, were unveiled. In other respects, however, the Kurama had advanced further from their nomadic ancestors than they had at the beginning of Russian rule. At that time, Radloff and other observers could still distinguish among them the division into families. According to Radloff there were five of these Djulayr, Telău (this name is still borne by a village inhabited by the Kurama), Tama, Djagalbayli and Tarakli. This division is now quite lost; where traces of it still exist, marriages between members of one family are no longer—as among the Ḳazaḳ—considered illegal. The fact that the Kurama are a mixed people can still be recognised; besides the mixture of different stocks among them there has been, according to Zarubın, a mixture of different social ranks. The Kurama themselves do not use this name, although they do with the addition of another ethnic (Kirgiz-Kurama, Sart-Kurama). The number of the Kurama in the district of Tashkent (formerly Kurama) was in 1917 52,335; in 1920 49,697. There were further some 9,330 Kurama in the district of Khodjand. The word with the meaning of "mixed people" is also found in the area where Turkoman languages are spoken, but these Kurama have no connection with those on the Angren.

AL-ḲURʾĀN (A.), the Muslim scripture, containing the revelations recited by Muḥammad and preserved in a fixed, written form.

OUTLINE OF THE ARTICLE

1. ETYMOLOGY AND SYNONYMS

a. Derivation and Ḳurʾānic usage. The earliest attested usage of the term *ḳurʾān* is in the Ḳurʾān itself, where it occurs about 70 times with a variety of meanings. Most Western scholars have now accepted the view developed by F. Schwally (*Gesch. des Qor.*, i, 33 f.) and others that *ḳurʾān* is derived from the Syriac *ḳeryānā*, "scripture reading, lesson", as used in Christian liturgy (see for example the 6th century Syriac mss., Brit. Museum, Add. 14, 432, e.g. *ḳeryānā d-yôm bāʿawātā*, "lection for the Day of Supplications", fol. 43b). See also J. Wellhausen, *ZDMG*, lxvii (1913), 634; J. Horovitz, *Isl.*, xiii (1923), 67; *Foreign vocab.*, 233 f.; Bell-Watt, 136 f. (for works abbreviated in this article, see *Bibl.*). The majority view among Muslim authorities has been that *ḳurʾān* is simply the verbal noun from *ḳaraʾa*, "he read" or "he recited". Both views find some support in the Ḳurʾān, where the verb *ḳaraʾa* does occur, but not as frequently as the usual term for reading or reciting, *talā*. In early Kûfic manuscripts we find *ḳurān* without the *hamza*, causing some authorities such as Ḳatāda and Abû ʿUbayda to derive it from *ḳarana*, "he put together" or "he bound together" (see *Gesch. des Qor.*, i, 31 f.). Against this view it should be noted that the omission of the *hamza* was a characteristic of Meccan speech and early Kûfic Ḳurʾānic script, and that the term *ḳurʾān* is closely related to the verb *ḳaraʾa* in Ḳurʾānic usage. The soundest conclusion seems to be that the term *ḳurʾān* originated in the Ḳurʾān itself to represent the Syriac *ḳeryānā*, but was based on an Arabic *maṣdar* form (*fuʿlān*) from *ḳaraʾa*.

The verb *ḳaraʾa* occurs in the Ḳurʾān 17 times, usually meaning "recite", but occasionally "read (aloud?)". Where it clearly means "recite", it is always the Ḳurʾān that is recited, usually by Muḥammad (XVI, 98, XVII, 45, 106, etc.). But in one of the earliest contexts it is God who recited the revelation to Muḥammad: "When we recite it, follow its recitation" (LXXV, 18), and in one of the latest contexts (LXXIII, 20) it is the believers (see below). *Ḳaraʾa* means "read" in four or five verses, always with "book" (*kitāb*). In XVII, 93, Muḥammad is challenged by some unbelievers to ascend to heaven and bring down a book they can read for themselves. Three passages (XVII, 14, 71, and LXIX, 19) refer to the record books to be read at the Last Judgment, and one (X, 94) refers to some of Muḥammad's contemporaries—probably Jews and Christians—as "those who have been reciting [or reading] the Book" before him. Rudi Paret (*Übersetzung, ad locc.*) is no doubt correct in seeing in the Ḳurʾān different nuances in the meaning of *ḳaraʾa*, which he translates as *lesen, verlesen, rezitieren*, and *vortragen*. But there may not be as much variation in the Ḳurʾānic usage of this verb as these terms suggest, since where it

means "recite" it could be interpreted "recite (the Ḳur'ān) from written notes", and where it means "read" it could be interpreted "read aloud".

Most occurrences of the term *ḳur'ān* in the Muslim scripture date from a period of about ten years beginning when Muḥammad began to perform the *ṣalāt* publicly and ending around the time of the battle of Badr in 624. It is impossible to date the contexts precisely or determine their exact chronological order, but the general development of the Ḳur'ānic usage of *ḳur'ān* is fairly clear. (Unless otherwise indicated, all statements on dating in this article are the present writer's own conclusions. In most cases these analyses tend to support the conclusions reached by Richard Bell, who also dated individual pericopes rather than entire *sūras*—see section 5 below.)

(1) Among the earliest meanings of *ḳur'ān* is "act of reciting", seen in two passages where God addresses Muḥammad: "Ours is it to put it together and [Ours is] its *ḳur'ān*. When We recite it follow its *ḳur'ān*" (LXXV, 17 f.), and "Observe the *ṣalāt* at the sinking of the sun until the darkening of the night, and [observe] the *ḳur'ān* at the dawn; surely the *ḳur'ān* at the dawn is well attested" (XVII, 78). This last verse provides useful insight into the relationship between the *ṣalāt* and the *ḳur'ān* at the time when both were just being instituted. (2) In some verses *ḳur'ān* means "an individual passage recited [by Muḥammad]". In LXXII, 1 f. the Prophet is informed that "a number of the jinn listened, and said: 'Verily, we have heard a *ḳur'ān*, a wonder, which guides to rectitude, so we have believed in it'." See also X, 61, XIII, 31, and cf. X, 15. (3) In a large majority of contexts, dating mostly from the late Meccan and very early Medinan years, *ḳur'ān*, usually with the definite article, has a complex meaning involving several elements. It is the "revelation" (*tanzīl*) sent down by God upon Muḥammad (XX, 2 ff., LXXVI, 23, etc.). It is sent down at intervals (XVII, 106, XXV, 32), and in some contexts it appears to be something in God's possession that is larger than what has so far been "sent down": "What We send down of *al-ḳur'ān* is a healing and mercy to the believers" (XVII, 82). In other contexts *al-ḳur'ān* refers to a collection of revelations in Muḥammad's possession, which he is commanded to recite (XXVII, 91 f.; cf. XVI, 98, XVII, 45). Its liturgical setting is seen in a number of passages, such as VII, 204: "So when *al-ḳur'ān* is recited [by Muḥammad], listen to it and keep silent" and LXXXIV, 20 f.: "Then what ails them, that they believe not, and when *al-ḳur'ān* is recited to them they do not bow?" Specific references to other Muslims reciting parts of *al-ḳur'ān* occur only in one or two Medinan passages, such as LXXIII, 20, where the believers are told to recite during the night vigil only as much of *al-ḳur'ān* as is convenient or easy (*mā tayassar*) for them. (4) In a number of contexts that appear to be early Medinan, dating from before LXXIII, 20, the *ḳur'ān* (sometimes without the definite article) is said to be an Arabic version of "the Book" (*al-kitāb*): "By the clear Book. Behold We have made it an Arabic *ḳur'ān*" (XLIII, 2 f.; see also XII, 1 f., XLI, 2 f., and other verses quoted below). The closest the Ḳur'ān comes to using the term *al-ḳur'ān* with its present meaning as the name of the Muslim scripture is where it is mentioned with the Torah and the Gospel in IX, 111, in a construction that suggests three parallel scriptures. But it must be remembered that the revelation was not yet complete, and the final scripture was not compiled until after Muḥammad's death.

b. Synonyms in the Ḳur'ān. The meaning of the term *ḳur'ān* and the origin of the Muslim scripture cannot be understood fully without taking into consideration the Ḳur'ānic usage of several other closely related terms, especially *āya*, *kitāb*, and *sūra*, but also *dhikr*, *mathānī*, *ḥikma*, and others. Each of these terms has its own distinct, basic meaning in the Ḳur'ān, but in some contexts their usages converge with that of *ḳur'ān*.

The basic meaning of *āya*, like the related Hebrew *ōth* and the Syriac *āthā*, is "sign", in the sense of a token of some unseen reality or truth. Its derivation is uncertain. It would most naturally come from *'-w-h*, corresponding with the Hebrew *'āwāh*, but such a root does not exist in Arabic, and the Arabic form would be difficult to explain as a borrowing from Hebrew or Syriac (see *Foreign vocab.*, 72 f.). *Āya* and its plural *āyāt* occur in the Ḳur'ān almost 400 times, most frequently in reference to natural phenomena that confirm God's power and bounty and call for gratitude from man. These are the so-called "sign-passages", discussed below in 7.b. In other contexts *āya* refers to some extraordinary event or miracle that confirms the truth of the message of a prophet. Then in late Meccan or possibly very early Medinan passages, probably in response to the continuing demands for a miracle from Muḥammad, *āya* takes on a new meaning—"revealed message". And finally in a number of Medinan passages *āya* comes to be used for the basic unit of revelation. Later Muslim scholars interpreted *āya* in these passages to mean "verse", but the Ḳur'ān gives no indication as to the length of these units of revelation, except that in some contexts they are said to be parts of the *ḳur'ān*, the *kitāb*, and possibly of a *sūra*.

Kitāb, literally "book, writing", occurring 255 times in the singular and six times in the plural (*kutub*), is among the most difficult terms in the Ḳur'ān to interpret. Only rarely does it refer to some everyday type of writing, e.g. a letter sent by Solomon to the Queen of Sheba (XXVII, 28 f.), and a document of manumission (XXIV, 33). Sometimes it refers to a record of men's deeds (XVII, 71, XVIII, 49, XXXIX, 69, etc.), events that have been prescribed (XVII, 58, XXXV, 11, etc.), or God's knowledge (VI, 59, X, 61, XI, 6, etc.). The commentators tend to interpret these passages as referring to actual celestial books, a view also adopted by most Western writers on the topic. A. Jeffery (*The Qur'ān as scripture*, in *MW*, XL [1950], 47-50) saw references to the ancient Near Eastern Record Book, Book of Decrees, and Inventory Book, while G. Widengren (*Muḥammad, the apostle of God, and his ascension*, 1955, 115-22) argued that these passages referred to a single "Heavenly Book". There is no conclusive evidence in the Ḳur'ān for either view, and there are serious problems with any literal interpretation of these verses, all of which could just as well be taken as metaphorical references to God's knowledge and decrees. A similar interpretation is possible for those verses usually regarded as referring to the heavenly original of the Ḳur'ān, e.g., "Indeed it is a noble *ḳur'ān* in a treasured *kitāb* touched only by the purified" (LVI, 77-9), "Nay, it is a glorious *ḳur'ān* in a preserved tablet" (LXXXV, 21 f.), and "By the clear *kitāb*. Behold We have made it an Arabic *ḳur'ān* . . . it is in the *umm al-kitāb* with Us" (XLIII, 1-4; cf. III, 7, and XIII, 39, which are even more ambiguous). There is in fact no clear indication in these verses or anywhere in the Ḳur'ān of a heavenly original or archetype of the Muslim scripture. This concept has been read into the text by the

later commentators. By far the most frequent usage of *kitāb* in the Ḳur'ān is in reference to God's revelation to Muḥammad and to certain religious communities that existed before and during his time, especially the Jews and Christians, who are called "the people of the Book" (*ahl al-kitāb*). This complex series of ideas involving the Ḳur'ān, the Book, Muḥammad, and the People of the Book is discussed in more detail in section 2 below.

The term *sūra*, occurring in the Ḳur'ān nine times in the singular and once in the plural (*suwar*), seems to be derived from the Syriac *ṣūrṭā*, *sūrthā*, "scripture, scripture reading" (*Gesch. des Qor.*, i, 31; *Foreign vocab.*, 180-2). In the Ḳur'ān *sūra* refers to a unit of revelation and could be translated "scripture" or "revelation". Several verses mention a *sūra* being "sent down" (IX, 64, 86, 124, 127, XLVII, 20, etc.), in contexts that are similar to some Ḳur'ānic usages of *āya*, *ḳur'ān*, and *kitāb*. And Muḥammad's opponents, who are dissatisfied with what he has been reciting, are challenged to "produce a *sūra* like it" (II, 23, X, 38) or "ten *suwar* like it" (XI, 13). Cf. XXVIII, 49, where the challenge is to produce a *kitāb* from God. The Ḳur'ān gives no indication as to how long these units of revelation were. They were most likely only parts of the present *sūras*.

The Ḳur'ānic usages of *ḳur'ān*, *āya*, *kitāb*, and *sūra* converge at the following points: (1) *Ḳur'ān*, *āya*, and *sūra* are each used sometimes for the basic unit of revelation, a pericope consisting most likely of several verses (e.g. X, 61, II, 106, and X, 38, respectively), and *kitāb* may have the same meaning in XXVIII, 49, and a few other places. (2) *Ḳur'ān* (e.g. XXXIV, 31) and *kitāb* (e.g. II, 89, VI, 92, 155, VII, 2) sometimes mean "a scripture", and *sūra* may have this meaning in XXIV, 1. (3) Occasionally *ḳur'ān* and *kitāb* are used for the revelation of God as a whole, only part of which has been sent down, e.g. XVII, 82, quoted above, and XXXV, 31: "And what We have revealed to you [Muḥammad] of the *kitāb* is the truth, confirming what was before it". (4) Usually, however, there is a distinction. *Kitāb*, when referring to the revelation, usually means the "Book of God", the revelation as a whole, while *ḳur'ān* usually means that part of the revelation that has been sent down to Muḥammad, e.g. X, 37: "This *ḳur'ān* is . . . a distinct setting forth of the *kitāb* in which there is no doubt" and XII, 1 f.: "These are the *āyāt* of the clear *kitāb*. Verily We have sent it down as an Arabic *ḳur'ān*".

Other technical terms used in the Ḳur'ān for the revelation being sent down to Muḥammad include the following. (1) Three nouns from the verb *d̲h̲akara*, "to remember, to mention", are used for the revelation in the sense of a reminder or warning: *tad̲h̲kira* in LXXIII, 19, LXXVI, 29, etc.; *d̲h̲ikrā* in VI, 90, XI, 120, etc.; and *d̲h̲ikr* in the formula, "It is nothing but a *d̲h̲ikr* to the worlds", at the end of the *sūras* XXXVIII, LXVIII, LXXXI, etc., in the introductory formula to XXXVIII where it is connected with *al-ḳur'ān*, and in VII, 63, 69, etc. (2) The term *mat̲h̲ānī* has puzzled Muslim commentators and given rise to several theories among Western interpreters of the Ḳur'ān. Even if it is a derivative of the Hebrew *mis̲h̲nāh* (*Koran. Untersuchungen*, 26-8) or the Syriac or Aramaic *mat̲h̲nit̲h̲ā* (*Gesch. des Qor.*, i, 114-16), the term *mat̲h̲ānī* must have been influenced by the Arabic *t̲h̲anā*, "to double, repeat"; cf. *mat̲h̲nā*, "by twos", in IV, 3, XXXIV, 46, and XXXV, 1. Thus it is probably best translated as "repetitions" (Bell, *Trans.*, 247; Blachère, *Trad.*, 290). But it refers to the revelation sent down to Muḥammad: "We have given thee seven of the *mat̲h̲ānī* and the wondrous *ḳur'ān*" (XV, 87), and "God has sent down the best of accounts, in agreement with itself, *mat̲h̲ānī* at which the skins of those who fear their Lord do creep" (XXXIX, 23). The commentators usually take the "seven *mat̲h̲ānī*" to be the seven verses of the Fātiḥa [*q.v.*]. A more likely interpretation is that this term refers to the punishment-stories (see 6.d and 7.d below), which Bell suggested may have once formed a collection separate from the Ḳur'ān (Bell-Watt, 134f., 143f.). For the literature, see *Foreign vocab.*, 257 f., and Paret, *Kommentar*, 279f. (3) *Ḥikma*, "wisdom", probably from the Aramaic *ḥek̲h̲mā*, is used in several Medinan passages for the revelation or part of it. God sends down the *kitāb* and the *ḥikma* to Muḥammad (II, 231, IV, 113, etc.). Muḥammad recites the *āyāt*, and teaches the *kitāb* and the *ḥikma* (LXII, 2). And the *āyāt* and the *ḥikma* are recited in the Muslims' homes (XXXIII, 34). These verses should probably be interpreted in the light of IV, 105, where it is said that Muḥammad is to judge (*taḥkum*) mankind on the basis of the Book sent down to him. For the literature, see *Foreign vocab.*, 111, and Paret, *Kommentar*, 68. The term *ḳur'ān* as the name of the Muslim scripture acquired connotations of these terms and others used for the revelation "sent down" to Muḥammad; see also Bell-Watt, 145-7, and Paret, *Kommentar*, 19, on *furḳān*.

2. Muḥammad and the Ḳur'ān

The Muslim scripture and Muḥammad's prophetic experience are so closely linked that one cannot be fully understood without the other. The orthodox view of the dramatic form of the Ḳur'ān is that God is the speaker throughout, Muḥammad is the recipient, and Gabriel is the intermediary agent of revelation—regardless of who may appear to be the speaker and addressee. An analysis of the text shows that the situation is considerably more complex than this. In what appear to be the oldest parts of the Ḳur'ān, the speaker and the source of the revelation are not indicated. In some passages (XCI, 1-10, CI, CII, CIII, etc.) there is not even any indication that the message is from a deity (on this, cf. Muir, *Mohammed*, 39 ff.), and in some (LXXXI, 15-21, LXXXIV, 16-19, XCII, 14-21, etc.) Muḥammad seems to be the speaker. In the earliest passages that mention Muḥammad's God, he is not named but is spoken of in the third person, usually as "my Lord", "your Lord", etc. (LI, 1-23, LII, 1-16, LXXIV, 1-10, LXXX, 1-32, LXXXIV, 1-19, LXXXVIII, 1-22, XCVI, 1-8, etc.). From LIII, 10, LXXXI, 23, and other verses it is clear that Muḥammad had visions of God, and at least in the Meccan years it was the voice of God himself, and not some intermediary, that Muḥammad heard. In the earliest passages to indicate the source of the revelation, God is the speaker and the direct source, e.g., "We shall cast upon thee [Muḥammad] a mighty word" (LXXIII, 5) and "We shall cause thee to recite without forgetting" (LXXXVII, 6). And a number of late Meccan and early Medinan passages speak of God reciting the *āyāt*, the *ḳur'ān*, and the *kitāb* to Muḥammad (II, 252, III, 108, XLV, 6, etc.).

But during the same period a series of passages have the effect of elevating God from direct revelation. This is done in two ways: the message is said to be brought down by certain intermediaries, and it is connected in some way with "the Book" (*al-kitāb*). Both of these concepts occur in XLII, 51 ff., where it is explicitly denied that God speaks directly to Muḥammad: "It is not fitting that God should

speak to any mortal except by inspiration (*waḥy*), or from behind a veil, or by sending a messenger to inspire whatever He wills .... Thus have We inspired you [Muḥammad] with a spirit of Our bidding (*rūḥ^an min amrinā*); you did not know [before] what the Book and faith were". The role of this spirit as the agent of revelation is seen more clearly in XXVI, 192 f.: "Surely it is the revelation of the Lord of all beings, brought down by the faithful spirit (*al-rūḥ al-amīn*)" and XVI, 102: "The spirit of holiness (*rūḥ al-ḳudus*) has brought it down from your Lord in truth". Then in the fairly early Medinan passage, II, 97, the agent of revelation for the first and only time in the Ḳur'ān is said to be Gabriel. On the basis of this verse and a number of *ḥadīth* accounts, the commentators have identified the "spirit" in the earlier passages as Gabriel, and have placed Gabriel at the very beginning of Muḥammad's ministry as the agent of revelation. Also, contrary to popular belief, Gabriel is never identified in the Ḳur'ān as one of the angels, and the angels are never said to be agents of revelation (XVI, 2, comes the closest). The angels may be the speakers in a few passages such as XIX, 64 ff. and XXXVII, 161-6, just as Muḥammad or Abraham is sometimes the speaker; but there is no need to interpret the plural "we" as referring to the angels in the numerous passages that also refer to God in the third person. On the "say" passages, in which Muḥammad is sometimes the speaker, see 7.c below.

The Ḳur'ān also speaks of Muḥammad's human informants, at first in contexts involving accusations made against the Prophet by his opponents: "The unbelievers say: 'This is nothing but a fraud [Muḥammad] has devised, and others have helped him with it' ... 'Tales of the ancients he has written down; they are recited to him morning and evening'" (XXV, 4f.). Except for the element of fraud, the Ḳur'ān does not deny what is reported in this passage. The response given in XVI, 103, to a similar charge seems to concede that Muḥammad had a foreign informant: "We know very well that they are saying: 'It is only a mortal who is teaching him'. But the language of him whom they suggest is foreign, and this is clear Arabic speech". Here again the accusation is not denied; there is simply insistence that the actual wording of the Ḳur'ān did not come from the informant. Several Medinan passages give the impression that Muḥammad actively sought information from the scriptures of the Jews, since they are condemned for concealing their Book from him. Some mention written copies that were shown to Muḥammad or his followers, e.g. VI, 91: "the Book Moses brought ... you have put on parchments you show, but you hide much of it". Others such as II, 79, accuse the Jews of writing out passages of their own and then saying "This is from God". See also II, 77, 140, 174, III, 71, and V, 15. In these passages it is not difficult to see Muḥammad receiving stories and other information from various informants, including Jews and Christians, and then in moments of inspiration reworking the material into its Ḳur'ānic form. Such a view, although considered unorthodox today, is not inconsistent with some reports found in the *ḥadīth* collections and other early Muslim sources.

This raises the question of the relationship between the Ḳur'ān and the scriptures of the Jews and Christians. Meccan and very early Medinan parts of the Ḳur'ān speak of a single revelation or Book, sometimes called the Book of God (*kitāb Allāh*), and specify those to whom it had been "given" previously: the prophets (II, 213), the seed of Abraham (XXIX, 27, LVII, 25 f., etc.), the Children of Israel (XL, 53, XLV, 16), Moses (II, 53, 87, VI, 154, etc.), John the Baptist (XIX, 12) and Jesus (XIX, 30, etc.). In II, 101 and III, 23 (cf. III, 93) the *kitāb Allāh* is specifically identified with the scriptures of the *ahl al-kitāb*, "people of the Book". This expression, which occurs over thirty times (II, 105, 109, III, 64 f., IV, 123, 153, etc.—all Medinan), is often interpreted as "the people who have a scripture". But it more likely means "the people who have (previously) been given the Book of God", since it is synonymous with the Ḳur'ānic expressions *alladhīna ūtū 'l-kitāb*, "those who have been given the Book", in II, 101, 144, 145, III, 19 f., IV, 131, etc., and *alladhīna ātaynāhumu 'l-kitāb*, "those to whom We have given the Book", in II, 121, VI, 20, 114, XIII, 36, etc. The often-discussed term *ummiyyūn* (II, 78, III, 20, 75, LXII, 2) seems to be the antithesis of these three expressions, thus meaning "those who have not been given the Book previously". And this is almost certainly the sense of the singular, *ummī*, which is applied to Muḥammad in VII, 157 f. That is, instead of sending to the Arabs and the world a missionary from among those who had already been given the Book (the *ahl al-kitāb*), God chose to send a prophet, Muḥammad, from among those who previously had not been given the Book (*al-nabī al-ummī*). There is no basis in the Ḳur'ān for the traditional view that *ummī* means "illiterate" (see UMMĪ; *Gesch. des Qor.* i, 14-17; Bell-Watt, 33 f.; and Blachère, *Introd.*, 6-12). After the so-called "break with the Jews" in Medina around the time of the battle of Badr, the Book came to be distinguished from the Torah and the Gospel (III, 48, V, 110, etc.) and identified more closely with the revelation being sent down to Muḥammad (see, e.g., the Medinan formulas, XII, 1 f., XLI, 3, XLIII, 2 f., etc.). And the expression "those who have been given the Book" became "those who have been given a portion (*naṣīb*) of the Book" (III, 23, IV, 44, 51, etc.). About the same time the plural "scriptures" (*kutub*) was introduced in two credal statements in II, 285 and IV, 136 (cf. LXVI, 12, XCVIII, 3).

In late Meccan and early Medinan passages Muḥammad is said to have been challenged to produce a book the people could read for themselves (e.g. XVII, 93), and his followers complained that they did not have a scripture like those of the Jews and Christians (VI, 155 ff.), The establishment of an independent, Muslim community in Medina, distinct from the *ahl al-kitāb*, was marked by the granting of a separate Islamic scripture that was to serve as a criterion (cf. *furḳān*) for confirming the truth of previous scriptures (III, 3, IV, 105, V, 48, etc.). The evidence seems to indicate that Muḥammad began to compile a written scripture some time in the early Medinan years, but that the responsibilities of leading the rapidly growing Muslim community forced him to leave the task unfinished (see Bell-Watt, 141-4). That Muḥammad participated in and directed the task of preparing a written scripture seems certain. This is to some extent supported by the *ḥadīth*, where we are told that he dictated to scribes and instructed them on how to arrange the revelations, sometimes inserting a new passage into an older one (al-Bukhārī, *Faḍā'il al-Ḳur'ān*, *bāb* 2 f., Abū Dāwūd, *Ṣalāt*, *bāb* 2, Ibn Sa'd, iii/2, 59). The Prophet most likely did not do the actual writing and editing himself, especially in Medina where he had scribes to perform these menial tasks (*Gesch. des Qor.*, i, 46f.). But it is not unlikely that Muḥammad did occasionally write out the revelations himself (see e.g. XXV, 4-6, quoted in part above, and Bell-Watt, 36, on this passage). The task

of preparing the written scripture included some revision and alteration of earlier revelations (see Bell-Watt, 89-101). The Ḳur'ān itself acknowledges that changes were made in the revelation: "For whatever *āya* We abrogate or cause [you, i.e. Muḥammad] to forget, We bring [another that is] better or like it" (II, 106), and "When We substitute one *āya* for another—and God knows best what He is sending down—they say: 'You [Muḥammad] are a mere forger'" (XVI, 101). A similar verse, XXII, 52, gives another explanation for changes in the revelation: "We have never sent any messenger or prophet before you [Muḥammad], but Satan cast [something] into his thoughts when he was yearning [for a message from God]. But God abrogates what Satan casts in, and then God adjusts his *āyāt*". These verses seem to be responses to complaints or accusations about changes in the revelation. The Ḳur'ān gives three explanations: that Muḥammad sometimes forgot parts, that Satan inserted something into the revelation, and that God simply replaced some parts with others as good or better. The term *āya* in these passages came to be interpreted as "verse", but the Ḳur'ān gives no indication as to the length of these units of revelation that were withdrawn and replaced by others.

In his commentary on XXII, 52, and in his *Annales* (i, 1192 f.), al-Ṭabarī records several versions of a curious story in which Muḥammad is said to have recited the two short verses, "These are the exalted ones (*al-gharānīḳ* = cranes), Whose intercession is to be hoped for", just after LIII, 19 f., which mention the Arabian goddesses, al-Lāt, al-ʿUzzā, and Manāt [*q.vv.*]. The Ḳuraysh [*q.v.*], who were in the mosque listening to Muḥammad, then prostrated with the Muslims at the *sadjda* at the end of the *sūra*, and some of Muḥammad's followers who immigrated to Abyssinia to avoid persecution returned to Mecca. But before they arrived, Gabriel informed Muḥammad that these two verses had been inserted into the revelation by Satan. God then revealed XXII, 52, to comfort Muḥammad, and then LIII, 21-7, to abrogate the two *gharānīḳ* verses. Hostility between Muḥammad and the Ḳuraysh resumed, and the immigrants had to arrange for protection before re-entering Mecca. This story of the "Satanic verses" has been accepted as historical by most Western writers who mention it, since they find it unthinkable that it could have been invented (e.g. *Gesch. des Qor.*, i, 101-3; Watt, *Mecca*, 103; A. Guillaume, *Islam*, 189 f.). Although there could be some historical basis for the story, in its present form it is certainly a later, exegetical fabrication. Sūra LIII, 1-20 and the end of the *sūra* are not a unity, as is claimed by the story; XXII, 52, is later than LIII, 21-7, and is almost certainly Medinan (see Bell, *Trans.*, 316, 322); and several details of the story—the mosque, the *sadjda*, and others not mentioned in the short summary above—do not belong to a Meccan setting. Caetani (*Annali*, i, 279-81) and J. Burton ("*Those are the high-flying cranes*", in *JSS*, xv [1970], 246-65) have argued against the historicity of the story on other grounds, Caetani on the basis of weak *isnāds*. Burton concluded that the story was invented by jurists so that XXII, 52, could serve as a Ḳur'ānic proof-text for their abrogation theories.

3. History of the Ḳur'ān after 632

The history of the text and the recitation of the Ḳur'ān after the death of Muḥammad in 632 is still far from clear. The development of the canon involved three main stages, each of which is difficult to reconstruct and date: the collection and arrangement of the text from oral and written sources, the establishment of the final consonantal text, and the process by which several readings, i.e., different ways of vocalising the text, came to be accepted as canonical or "revealed". According to the orthodox view, the Ḳur'ān was perfectly preserved in oral form from the beginning and was written down during Muḥammad's lifetime or shortly thereafter when it was "collected" and arranged for the first time by his Companions. The complete consonantal text is believed to have been established during the reign of the third caliph, ʿUthmān (644-56), and the final vocalised text in the early 4th/10th century. Most Western scholars have accepted the main points of this traditional view. But there are problems here. In addition to the usual difficulties of evaluating Muslim sources that were regulated by the science of *ḥadīth*, the task of reconstructing the history of the Ḳur'ān is further complicated by the fact that the classical literature records thousands of textual variants, which, however, are not found in any extant manuscripts known to Western scholars. Several valuable works on the history of the Ḳur'ān were written during the 4th/10th century (see below), but later Muslim scholars, with just a few exceptions, have shown little interest in the problem of reconstructing the history of the canon. The basic European works continue to be the second edition of Th. Nöldeke's *Geschichte des Qorāns*, especially Part II, *Die Sammlung des Qorāns* (1919), ed. and revised by F. Schwally, and Part III, *Die Geschichte des Korantexts* (1938), by G. Bergsträsser and O. Pretzl, and A. Jeffery's *Materials for the history of the text of the Qur'ān* (1937).

a. The "collection" of the Ḳur'ān. The most widely accepted story of the "first collection" of the Ḳur'ān places an official, written copy of the entire text in the reign of the first caliph, Abū Bakr (632-4), thus within two years of the Prophet's death. According to the dominant version of this story (al-Bukhārī, *Faḍā'il al-Ḳur'ān*, *bāb* 3; Ibn Ḥadjar, *Fatḥ al-bārī*, ix, 9), ʿUmar b. al-Khaṭṭāb [*q.v.*] became concerned that so many Ḳur'ān reciters (*ḳurrā'* [*q.v.*]) had been killed at the battle of al-Yamāma. So he suggested to the caliph that a complete, written text of the Ḳur'ān be prepared so none of the revelation would be lost. Abū Bakr hesitated, saying "How dare I do something the Prophet did not do?", but ʿUmar convinced him of the need. Abū Bakr then sent for Zayd b. Thābit [*q.v.*], one of the Prophet's secretaries, and said: "You are a wise young man, and we trust you. And you used to write down the revelations for the Prophet, so go and find [all the fragments of] the Ḳur'ān and assemble it together". Zayd also hesitated, saying "How dare I do something the Prophet did not do?" But Abū Bakr convinced him of the need, and Zayd collected all the fragments of the Ḳur'ān "whether written on palm branches or thin stones or preserved in the hearts of men", and he wrote it out on "sheets" (*ṣuḥuf*) of equal size and gave them to Abū Bakr. When ʿUmar became caliph in 634 he acquired the "sheets", and on his death they passed to his daughter, Ḥafṣa, a widow of the Prophet.

This story makes several key points, either explicitly or by implication, that would be of considerable significance for our understanding of the history of the Ḳur'ān if they could be accepted: that Muḥammad did not leave a complete written text, that nothing of the Ḳur'ān was lost, that it was preserved primarily in oral form and that any written fragments were on crude materials, that the first

official recension, authorised by the first caliph, was also the first complete collection, etc. Muslim tradition came to accept this story as a historical account, and these points as facts. But there are serious problems with this account. For one thing, most of the key points in this story are contradicted by alternative accounts in the canonical *ḥadīth* collections and other early Muslim sources (see Wensinck, *Handbook*, 131; *Gesch. des Qor.*, ii, 15-18; Burton, *Collection*, 120-8). According to one *ḥadīth*, ʿUmar once asked about a verse and was told that it had been in the possession of someone who was killed at Yamāma, so he gave the command and the Ḳur'ān was collected, and "ʿUmar was the first to collect the Ḳur'ān" (*Maṣāḥif*, 10; *Itḳān*, i, 58). Other accounts say that Abū Bakr began the collection and ʿUmar completed it, or that Abū Bakr was the first to collect the Ḳur'ān on sheets (*ṣuḥuf*), while ʿUmar was the first to collect the Ḳur'ān into a single volume (*muṣḥaf*). Others say ʿUmar ordered the compilation, but died before it was completed (Ibn Saʿd, iii/1, 212). In fact, each of the first four caliphs is reported to have been the first person to collect the Ḳur'ān (*Maṣāḥif*, 10; *Itḳān*, i, 57-9). And several alternative accounts state explicitly that no official collection of the Ḳur'ān existed prior to ʿUthmān's. Caetani (*Annali*, ii/1, 713) and Schwally (*Gesch. des Qor.*, ii, 20) have questioned the significance of the al-Yamāma battles as an occasion for an official collection of the Ḳur'ān, pointing out that very few men distinguished for their knowledge of the Ḳur'ān are mentioned in the lists of those who died there (Schwally found two). Even more significant is the fact that there is no evidence that the alleged collection under Abū Bakr was ever accepted as authoritative. Finally, this story fails to acknowledge the role of written copies of parts of the Ḳur'ān left by Muḥammad. These important documents for the history of the Ḳur'ān, alluded to in the statement that Zayd "used to write down the revelations for the Prophet", must have played a significant role in the preparation of an official text. There are thus sufficient grounds for rejecting the historicity of this story, the most likely purposes of which were to obscure Muḥammad's role in the preparation of a written Ḳur'ān, to reduce ʿUthmān's role in establishing an official text, and to attempt to establish the priority of the ʿUthmānic text over those of the (pre-ʿUthmānic) Companion codices. All three purposes would be accomplished by establishing the belief that the first official collection of the Ḳur'ān was prepared during the short reign of Abū Bakr and served as the basis for ʿUthmān's rescension. See *Gesch. des Qor.*, ii, 11-27; Bell-Watt, 40-2; Blachère, *Introd.*, 27-34; also Burton, *Collection*, 117-37 (on Burton's view, see below).

The accounts of the collection of the Ḳur'ān under ʿUthmān assert that the final consonantal text was established during the last half of his reign, or about twenty years after Muḥammad's death. According to the dominant version (al-Bukhārī, *loc. cit.*; *Maṣāḥif*, 18 f.; *Itḳān*, i, 58 f.; *Fatḥ al-bārī*, ix, 14 f.; *Gesch. des Qor.*, ii, 47-50), the occasion for the final collection of the Ḳur'ān was a dispute between Muslim forces from ʿIrāḳ and Syria over the correct way of reciting it during communal prayers while on an expedition to Armenia and Ādharbāydjān. The general, Ḥudhayfa b. al-Yaman, reported this problem to the caliph and asked him to establish a unified text. ʿUthmān obtained the "sheets" from Ḥafṣa and appointed a commission consisting of Zayd b. Thābit and three prominent Meccans, and instructed them to copy the sheets into several volumes following the dialect of Ḳuraysh, the main tribe of Mecca. When the task was finished ʿUthmān kept one copy in Medina and sent others to Kūfa, Baṣra, Damascus, and, according to some accounts, Mecca (*Gesch. des Qor.*, ii, 112 f.), with an order that all other copies of the Ḳur'ān were to be destroyed. This was done everywhere except in Kūfa, where Ibn Masʿūd and his followers refused. The details differ in various versions of this story (*ibid.*, 50-4), mainly on the number and identity of the commissioners and the cities that received official copies.

This second collection story stands up to critical analysis no better than the first. Western scholars now accept the view argued by Schwally (*ibid.*, 57-62) and others that the Ḳur'ān is not in the dialect of the Ḳuraysh (see 6.a below). If this is so, one of the two main points of the story is discredited, and it is difficult to see what role the commission might have played. Schwally also showed (54-7) that those named in the various accounts are unlikely candidates for such a commission appointed by ʿUthmān, and he gave good reasons for doubting that the caliph would have ordered all extant copies of the Ḳur'ān to be destroyed. It also seems unlikely that differences in the way the Ḳur'ān was recited during the daily prayers would have caused serious dissension among Muslim forces involved in the initial conquests. These parts of the story all hint of a later historical setting. The Ḥafṣa element seems to be simply a device for tying the two collection stories together, while establishing an authoritative chain of custody for an official text going back almost to the time of the death of the Prophet, and explaining why this official text was not generally known (see Bell-Watt, 41 f.). For several alternative accounts that give completely different reasons and circumstances for ʿUthmān's order for an authorised text, see Burton, *Collection*, 138-59.

We thus have before us another story whose particulars cannot be accepted. But this does not mean necessarily that the story has no historical basis at all. The unanimity with which an official text is attributed to ʿUthmān, in the face of a lack of convincing evidence to the contrary, leads most Western scholars to accept one central point of this story: that the Ḳur'ān we have today, at least in terms of the number and arrangement of the *sūras* and the basic structure of the consonantal text, goes back to the time of ʿUthmān, under whose authority the official text was produced. This was, however, certainly not a *textus receptus ne varietur*, even in terms of its consonantal form (see below). Most Western scholars also accept one other element of the story: that Zayd played some role in establishing the ʿUthmānic text. Just what that role might have been is difficult to say; alternative accounts give several possibilities (see Burton, *Collection*, 117-26, 141-6, 150, 165-7, etc.). Burton contends that both collection stories are completely fictitious and that Zayd's prominence in the various accounts is due solely to the fact that he had been a young secretary to the Prophet and an early Ḳur'ān specialist who happened also to be one of the latest surviving Companions, dying *ca.* 45/665 (*Collection*, 120-4, 228, etc.). Burton has raised serious doubts about the role of Zayd in establishing the official text, and he has shown that the sciences of *ḥadīth* and *fiḳh* influenced the proliferation of Ḳur'ān collection stories; but he has not demonstrated the likelihood of his main contention, that the collection stories were fabricated by later jurists to provide support for their abrogation theories by hiding the fact that the final text of the

Ḳur'ān was produced, not by ʿUthmān, but by the Prophet himself.

b. Variant readings and Companion codices. The ʿUthmānic text tradition was only one of several that existed during the first four centuries A.H. The general view is that ʿUthmān canonised the Medinan text tradition and that this one was most likely the closest to the original revelation. Other text traditions, attributed to several Companions of the Prophet, are said to have flourished in Kūfa, Baṣra and Syria. The sources speak sometimes of various "readings" (*ḳirā'āt*, sing. *ḳirā'a*), i.e. different ways of reading or reciting the text, sometimes of "codices" (*maṣāḥif*, sing. *muṣḥaf*). On the usage of these two terms, see ḲIRĀ'A and *Materials*, 13 f. A number of works on the "disagreement of the codices" (*ikhtilāf al-maṣāḥif*) are said to have been written by Muslim scholars of the first four centuries. Ibn al-Nadīm lists eleven such works (*Fihrist*, 16; tr. Dodge, 79, which is incomplete), including the *K. Ikhtilāf maṣāḥif al-Shām wa 'l-Ḥidjāz wa 'l-ʿIrāḳ* by Ibn ʿĀmir al-Yaḥṣubī (d. 118/736), *K. Ikhtilāf maṣāḥif ahl al-Madīna wa-ahl al-Kūfa wa-ahl al-Baṣra* by al-Kisā'ī (d. 189/805), *K. Ikhtilāf ahl al-Kūfa wa 'l-Baṣra wa 'l-Shām fi 'l-maṣāḥif* by Abū Zakariyā al-Farrā' (d. 207/822), *K. Ikhtilāf al-maṣāḥif wa-djamʿ al-ḳirā'āt* by al-Madā'inī (d. *ca.* 231/845), and three works each called simply *K. al-Maṣāḥif* by Ibn Abī Dāwūd (d. 316/928), Ibn al-Anbarī (d. 328/939), and Ibn Ashta al-Iṣfahānī (d. 360/970). Of these works, most of which have not survived, the last two seem to have been the most complete and the most highly regarded by later scholars. The shorter and somewhat earlier work by Ibn Abī Dāwūd, son of the famous traditionist, was edited by A. Jeffery and published with his *Materials*, which lists several thousand variants taken from over thirty "main sources" (see 17 f.), including the classical commentaries by al-Ṭabarī, al-Zamakhsharī, al-Bayḍāwī, and al-Rāzī, and various works on *ḳirā'āt*, *shawādhdh*, *gharīb al-Ḳur'ān*, grammar, etc., including the *Maʿānī* by al-Farrā' (d. 207/822), the *Mukhtaṣar* by Ibn Khālawayh (d. 370/979), and the *Muḥtasab* by Ibn Djinnī (d. 392/1002) (see *Bibl.*). The comments made by al-Ṭabarī (d. 311/923) on variants (e.g. on XXIII, 106) show that the text of the Ḳur'ān was not fixed *ne varietur* in his day.

Most often mentioned in the sources are the "readings" or "codices" of Ibn Masʿūd, Ubayy, and Abū Mūsā, said to have been dominant in Kūfa, Syria and Baṣra respectively. All three codices are said to have been begun during Muḥammad's lifetime. ʿAbd Allāh b. Masʿūd [see IBN MASʿŪD] (d. *ca.* 33/653), an early convert who became a personal servant to Muḥammad and accompanied him on many major occasions, is reported to have learned some seventy *sūras* directly from the Prophet, who appointed him as one of the first teachers of Ḳur'ān recitation (Ibn Saʿd, iii/1, 107). Later he was appointed to an administrative post in Kūfa by the caliph ʿUmar, and there he became a leading authority on the Ḳur'ān and *ḥadīth*. Ibn Masʿūd is consistently reported to have refused to destroy his copy of the Ḳur'ān or stop teaching it when the ʿUthmānic recension was made official. Also, there are reports that many Muslims in Kūfa continued to follow his reading for some time after his death, thus dividing the community there. Ubayy b. Kaʿb [*q.v.*] (d. 18/639 or 29/649 or later), a Medinan Muslim who served as a secretary for the Prophet, seems to have been even more prominent as a Ḳur'ān specialist than Ibn Masʿūd during Muḥammad's lifetime. There are reports that he was responsible for retaining verbatim certain important revelations, apparently on legal matters, which from time to time the Prophet asked him to recite. Ubayy appears frequently and in a variety of roles in the various collection stories. For instance, the "sheets" of Ubayy are sometimes mentioned instead of those of Ḥafṣa, and he sometimes appears in place of Zayd, dictating the Ḳur'ān to a corps of scribes (see *Materials*, 114; Burton, *Collection*, 124 ff.). The accounts saying that when the ʿUthmānic text was made official, Ubayy destroyed his codex while Ibn Masʿūd refused to do so may be examples of historical telescoping, meaning that the people of Syria (possibly over a period of many years) gave up their distinctive reading (i.e. that of Ubayy), while the people of Kūfa refused to give up theirs (i.e. that of Ibn Masʿūd). This would explain the later dates sometimes given for Ubayy's death and the conflicting reports regarding his role in compiling the official text. Abū Mūsā ʿAbd Allāh al-Ashʿarī [*q.v.*] (d. 42/662 or later) was a Yemenite famed for his eloquent recitation of the Ḳur'ān. His codex is said to have been accepted in Baṣra, where he served as governor under ʿUmar, and there are reports that his reading continued to be remembered and studied there for some time after ʿUthmān's text was made official. According to one account, when the messenger from ʿUthmān delivered the Baṣra copy of the new standard text, Abū Mūsā said to his followers: "Whatever you find in my codex that is not in his, do not remove it; but whatever you find missing [in mine], write it in" (*Maṣāḥif*, 13). This is consistent with other reports saying Abū Mūsā's codex was large and that it contained the two extra *sūras* of Ubayy's codex (see below) and other verses not found in other codices (*Materials*, 209-11).

In addition to these three codices, two of which are discussed in more detail below, Jeffery classified as "primary" the codices attributed to twelve other Companions of the Prophet: the second and fourth caliphs, ʿUmar and ʿAlī; three of Muḥammad's widows, Ḥafṣa bint ʿUmar, ʿĀ'isha bint Abī Bakr, and Umm Salama; four whose readings seem to have been variations of the Medinan text tradition, Zayd b. Thābit, ʿAbd Allāh b. ʿAbbās, Anas b. Mālik, and ʿAbd Allāh b. al-Zubayr; and three others, Sālim the Client of Abū Ḥudhayfa, ʿUbayd b. ʿUmayr, and Ibn ʿAmr b. al-ʿĀṣ. ʿAlī b. Abī Ṭālib [*q.v.*] (d. 40/661), cousin and son-in-law of Muḥammad, is often said to have been the first to collect the Ḳur'ān after the Prophet's death (e.g. *Fihrist*, 28; tr. Dodge, 62 f.). He is reported to have arranged the *sūras* in some sort of chronological order, e.g. XCVI, LXXIV, LXVIII, LXXIII, etc., and to have given up his codex to be burned when ʿUthmān's text was made official. ʿAbd Allāh b. ʿAbbās [*q.v.*] (d. *ca.* 68/688), also a cousin of Muḥammad, later gained fame as the doyen of early Ḳur'ān exegetes. He is said to have included in his codex the two extra *sūras* of Ubayy's text (see below), and several later scholars are said to have taken their readings from him. Sālim b. Muʿḳib (d. 12/633), sometimes called Sālim b. Maʿḳil (*Gesch. des Qor.*, ii, 11, 20, etc.), one of the Ḳur'ān reciters killed in the battle of Yamāma, was one of four to whom Muḥammad is reported to have advised his followers to turn for guidance concerning the Ḳur'ān. ʿUbayd b. ʿUmayr (d. 74/693) was an early Ḳur'ān reciter in Mecca; his codex may have been the basis for the Meccan text tradition, which seems not to have been as strong as those of Kūfa, Baṣra and Damascus (or Syria). Compared with the large number of variants attributed to Ibn Masʿūd

and Ubayy, relatively few are mentioned in the literature for these other codices. Jeffery also collected variants attributed to a number of Muslims of the second generation: al-Aswad b. Yazīd, ʿAlḳama, Ḥaṭṭān, Saʿīd b. Dj̲ubayr, Ṭalḥa, ʿIkrima, Mud̲j̲āhid, ʿAṭāʾ b. Rabāḥ, al-Rabīʿ b. al-K̲h̲ut̲h̲aym, al-Aʿmas̲h̲, Dj̲aʿfar al-Ṣādiḳ, Ṣāliḥ b. Ḳaysān, and al-Ḥārit̲h̲ b. Suwayd. More variants are attributed to some of these "secondary codices" than to most of the "primary" ones. In some cases, Jeffery was able to determine the primary codex from which a secondary one was derived.

Ibn Masʿūd's codex is said to have differed from the ʿUt̲h̲mānic text in several important respects. The sources are fairly consistent in saying it did not contain the *Fātiḥa* and the two charms that became *sūras* I, CXIII, and CXIV of the ʿUt̲h̲mānic text (see 4.a below). Variants in the *Fātiḥa* are, however, attributed to Ibn Masʿūd (*Materials*, 25), and Ibn al-Nadīm reported in 377/987 that he saw a number of Ibn Masʿūd Ḳurʾān manuscripts and that one that was about 200 years old included the *Fātiḥa* (*Fihrist*, 26; Dodge tr., 57 f.). Of the many variants attributed to Ibn Masʿūd (see *Gesch. des Qor.*, iii, 60-83; *Materials*, 25-113), some involve only different vowels with the same consonantal text, and some are purely orthographic, e.g. Ibn Masʿūd is said to have written *kulla mā* as two words rather than one in a number of places. But the vast majority of variants listed by Bergsträsser and Jeffery for Ibn Masʿūd involve differences in the consonantal text that would also show up in recitation. Of these, many may be regarded as explanatory glosses on the ʿUt̲h̲mānic text; but in some cases it is the ʿUt̲h̲mānic text that seems to contain an "expansion" or "improvement", sometimes apparently for theological reasons (see *Materials*, 17). Among the most questionable of the variants attributed to Ibn Masʿūd are the "S̲h̲īʿa readings", e.g. in V, 67, XXIV, 35, XXVI, 215, XXXIII, 25, 33, 56, XLII, 23, XLVII, 29, LVI, 10, LIX, 7, LX, 3, LXXV, 17-19 (see *ibid.*, 40, 65, 68, etc.). More difficult to evaluate are the numerous "synonym variants", as for example the following found in Sūra XXV, where, instead of the ʿUt̲h̲mānic terms given in parentheses, Ibn Masʿūd is reported to have read *d̲j̲aʿala*, "makes, brings about", in verse 48: "and He it is Who sends (*arsala*) the winds"; *li-nuns̲h̲ira*, "give life", in 49: "that We may give life (*li-nuḥyiya*) thereby to a dead land"; *ḳuṣūr*, "castles", in 61: "Blessed is He Who has placed in the heavens constellations (*burūd̲j̲*)"; *yatafakkara*, "ponder, consider", in 62: "for him who desires to remember (*yad̲h̲d̲h̲akkara*)"; and *al-d̲j̲anna*, "the Garden, Paradise", in 75: "They will be awarded the high place (*al-g̲h̲urfa*) inasmuch as they were steadfast". Just as frequent are cases where an entire phrase is different, e.g. Ibn Masʿūd's reading in III, 39: "Then Gabriel called to him, 'O Zachariah' ", instead of the ʿUt̲h̲mānic reading, "Then the angels called to him as he stood praying in the sanctuary". Some variants may have significance for the early history of Islam or the history of the Ḳurʾān, e.g. Ibn Masʿūd's well-known reading *al-ḥanīfiyya*, "the way of the Ḥanīfs" [*q.v.*] instead of *al-islām* in III, 19: "Behold, the [true] religion (*dīn*) of God is Islam", and the fact that he is said to have included the *basmala* at the beginning of Sūra IX (see 4.c below). Also, the order of the *sūras* in Ibn Masʿūd's codex is said to have differed considerably from that of the ʿUt̲h̲mānic text. Two slightly different, incomplete lists are recorded, the earlier one by Ibn al-Nadīm (*Fihrist*, 26; Dodge tr., 53-7) and a later one by al-Suyūṭī (*Itḳān*, i, 64). The missing *sūras* in each list are included in the other, and it is possible to reconstruct a single list. The principle of arranging the *sūras* in order of descending length is followed more closely than in the ʿUt̲h̲mānic text, but there is still considerable variation from this criterion (see Bauer, *Anordnung der Suren*, Table IV). Following the assumption that the longer *sūras* were not put together until the ʿUt̲h̲mānic text was compiled, some scholars have concluded that the Ibn Masʿūd lists are "post-ʿUt̲h̲mānic" and have little validity (e.g. *Materials*, 23 f.). But if most of the *sūras* were written down and put into approximately their final form during Muḥammad's lifetime, then there would be no strong reason for rejecting the validity of these reports outright.

Ubayy's codex seems according to the extant evidence to have been less important than Ibn Masʿūd's. It appears not to have been the source of any secondary codices, and very few unique variants are attributed to it. Most variants attributed to Ubayy are attributed also to either Ibn Masʿūd or Ibn ʿAbbās. Probably the best known feature of Ubayy's codex is that it is said to have included two short *sūras* not in the ʿUt̲h̲mānic and Ibn Masʿūd texts, Sūrat al-K̲h̲alʿ, with three verses, and Sūrat al-Ḥafd, with six (see *Materials*, 180 f.). The order of *sūras* in Ubayy's codex is said to have differed from that of ʿUt̲h̲mān's and Ibn Masʿūd's, and again we have two slightly different lists (*Fihrist*, 27; Dodge tr., 58-61; and *Itḳān*, i, 64). These lists are, however, less complete and less reliable than those given for Ibn Masʿūd, and some *sūras* are difficult to identify. Dodge (60) is probably correct in identifying *al-nabī* as Sūra LXVI, and Jeffery (*Materials*, 115) is no doubt mistaken in saying it is Sūra LXV. But Dodge is certainly wrong in reading *al-dīn* (one of the titles for Sūra CVII—see Paret, *Kommentar*, 554) as *al-tīn* (the title of Sūra XCV), and in failing to recognise Ubayy's two famous extra *sūras* mentioned above. Ibn al-Nadīm states at the end of his list in the *Fihrist* that Ubayy's codex contained 116 *sūras*, and he reports that his source of information, al-Faḍl b. S̲h̲ād̲h̲ān, saw a copy of an Ubayy codex in a village near Baṣra in the middle of the 3rd century A.H.

Western scholarship has not reached a consensus on what value this mass of allegedly pre-ʿUt̲h̲mānic variants has for our knowledge of the history of the Ḳurʾān. Confidence in the variants declined during the 1930s as they were being collected and analysed. Bergsträsser (*Gesch. des Qor.*, ii, 77-83, 92-6) still gave a fairly positive appraisal, but Jeffery (*Materials*, 16) wrote: "With the increase of material one feels less inclined to venture on such a judgment of value", a view that came to be shared by O. Pretzl. Then after the project to prepare a critical edition of the Ḳurʾān came to a halt, A. Fischer (*Isl.*, xxviii [1948], 5) concluded that most of the allegedly pre-ʿUt̲h̲mānic variants were later attempts by philologers to emend the ʿUt̲h̲mānic text. Recently J. Burton (*Collection*, 199-212, etc.) and J. Wansbrough (*Quranic studies*, 44-6, 202-7, etc.) have concluded that, not just some, but all of the accounts about Companion codices, metropolitan codices, and individual variants were fabricated by later Muslim jurists and philologers; but they reach opposite conclusions on the reason for this hoax. Burton argues that the Companion codices were invented in order to provide a setting for the ʿUt̲h̲mān collection story, which in turn was invented to hide the fact that Muḥammad himself had already collected and edited the final edition of the Ḳurʾān (211 f., 239 f.). Wansbrough, on the other

hand, asserts that the collection stories and the accounts of the Companion codices arose in order to give ancient authority for a text that was not even compiled until the 3rd/9th century or later. He claims, without providing any convincing evidence, that the text of the Ḳur'ān was so fluid that the multiple accounts (e.g. of the punishment-stories) represent "variant traditions" of different metropolitan centres (Kūfa, Baṣra, Medina, etc.). Each writer has stressed a valid point, i.e., that Muḥammad played a larger role in compiling and editing the Ḳur'ān than is admitted by the traditional accounts (Burton), and that as late as the 3rd/9th century a consonantal *textus receptus ne varietur* still had not been achieved (Wansbrough). But both writers seem to have overstated their cases. Neither has given convincing reasons for his own hypothesis, or for the shared assertion that the Muslim accounts should be rejected altogether.

c. Establishment of the canonical text and readings. Historically, it is better to speak of the ʿUthmānic text and the oral tradition that accompanied it as evolving gradually over a period of about three centuries. The process by which this text came to prevail over its rivals and then became the foundation for several sets of accepted or "canonical" readings is far from clear, and the issues involved are complex. They include the difficult task of reconstructing the stages in the development of Ḳur'ānic orthography, the relationship between the written text and the oral tradition, and the tension between a critical evaluation of the historical evidence and the orthodox views on the Ḳur'ān.

From the beginning there were variations in the copies of the ʿUthmānic text. Even the official copies of the Medina standard codex (*al-imām*) sent to the main centres are said not to have been identical. Bergsträsser (*Gesch. des Qor.*, iii, 6-19) lists and discusses a number of variations in the Medina, Damascus, Baṣra, Kūfa and Mecca copies of the ʿUthmānic text, reported in the *Muḳniʿ* of Abū ʿAmr al-Dānī (d. 444/1052) and in other works. E.g. the Damascus copy is said to have had *wa-bi 'l-zubur* and *wa-bi 'l-kitāb* instead of *wa 'l-zubur* and *wa 'l-kitāb* in III, 184, and *minkum* instead of *minhum* in XL, 21; and the Kūfa copy is said to have had *ʿamilat* instead of *ʿamilat-hu* in XXXVI, 35, and *aw an* (which occurs in the Egyptian standard edition) instead of *wa 'an* in XL, 26. These differences are of course minor, but they do involve changes in the consonantal forms. Such variations can best be explained as resulting from carelessness on the part of the scribes or lack of concern for exact uniformity among the authorities.

Deficiencies in the Arabic script used in the earliest copies of the Ḳur'ān led to further differences, in the oral tradition as well as the text tradition. During the first Islamic century, Arabic was written in a so-called *scriptio defectiva* in which only the consonants were given, and in several instances the same form was used for two or more consonants, e.g. *d* and *dh*, *ḥ* and *kh*, and even very different phonemes such as *r* and *z*, and in some positions *b*, *t*, *th*, *n*, and *y*. Since no diacritical points or vowel signs were included, the vocalisation was moreover left to the reader. This meant that even when there was agreement on the consonants, some verbs could be read as active or passive, some nouns could be read with different case endings, and some forms could be read as either nouns or verbs. The lists compiled by Jeffery in his *Materials* contain many examples of canonical and non-canonical variants based on forms that are indistinguishable in the *scriptio defectiva* of early Ḳur'ān manuscripts. In most cases the meaning is affected very little, as for example whether *kabīr* or *kathīr* is read in II, 219 (the latter was read by Ibn Masʿūd and two of the Seven, Ḥamza and al-Kisā'ī—see below), or *ḥadab*, "mound", or *djadath*, "tomb", is read in XXI, 96 (the latter was read by Ibn Masʿūd and others). In some instances the alteration of a case ending or some other slight change in the vowelling does significantly affect the meaning (see KHAṬṬ and Zwettler, *Oral tradition*, 122 ff.).

During the Umayyad period (41-132/661-750) the ʿUthmānic text tradition became more and more diverse, and new readings arose combining elements of the ʿUthmānic and Companion oral and text traditions, especially those of Ibn Masʿūd and Ubayy. By early ʿAbbāsid times there was such a confusion of readings that it became impossible to distinguish ʿUthmānic from non-ʿUthmānic ones, or to recover with confidence the "original" ʿUthmānic text. Some order was brought to this confusion by the establishment of a *scriptio plena*, a fully vowelled and pointed text. Muslim accounts of the introduction of this improved script are unreliable because they vary so much and are not consistent with palaeographical evidence (Blachère, *Introd.*, 78-90). A popular view is that al-Ḥadjdjādj was responsible for introducing vowel signs and dots for the consonants when he was governor of ʿIrāḳ (74-95/694-714). But Ḳur'ān manuscripts from the first three or four Islamic centuries show that a *scriptio plena* came to be accepted very slowly. Dots of different colours or in different positions (above, below, and beside the consonants) were used to indicate the three short vowels in some fairly early manuscripts, and in some, but not all, later ones. Strokes or dots for distinguishing consonants, as well as other signs for doubled consonants, pauses, and even the finer points of recitation, were introduced later (see KHAṬṬ, *Gesch. des Qor.*, iii, 19-57 and N. Abbott, *Rise of the North Arabic script*, 17-44; on the difficulty of dating these early manuscripts, see A. Grohmann, *The problem of dating early Qur'āns*, in *Isl.*, xxxiii [1958], 213-31).

By the early 4th/10th century the improved Arabic script was widely, although not universally, accepted by Ḳur'ān scholars. One result of the general use of the more precise script was that the differences in the texts became more pronounced, and this caused heated disputes as to which reading was the correct one. Another result was that it became possible for the authorities to enforce a greater measure of uniformity. The central figure in what became the most important Ḳur'ān reform since the time of ʿUthmān was Abū Bakr b. Mudjāhid (d. 324/936). His aim was to restrict the number of acceptable readings, accept only those based on a fairly uniform consonantal text, renounce the attempts of some scholars to achieve absolute uniformity (something which he realised was impossible), and at least ameliorate if not bring to an end the rivalry among scholars, each of whom claimed to possess the one correct reading. With a stroke of genius he chose seven well-known Ḳur'ān teachers of the 2nd/8th century and declared that their readings all had divine authority, which the others lacked. He based this on the popular *ḥadīth* in which the Prophet says the Ḳur'ān was revealed to him in "seven *aḥruf*" (al-Bukhārī, *Faḍā'il al-Ḳur'ān*, *bāb* 4; Muslim, *Ṣalāt al-musāfirīn*, trads. 270-4, etc.). The meaning of this expression in the *ḥadīth* is uncertain, the term *aḥruf* being the plural of *ḥarf*, "letter" (see *Gesch. des Qor.*, i, 48-51, iii, 106 f.). Ibn Mudjāhid interpreted the ex-

pression to mean "seven readings". His view, worked out in a book called *al-Ḳirā'āt al-sab'a*, "The Seven Readings", came at just the right time. It was adopted by the *wazīrs* Ibn Muḳla and 'Alī b. 'Īsā [*q.vv.*] and made official in the year 322/934 when the scholar Ibn Miḳsam was forced to retract his view that the consonantal text could be read in any manner that was grammatically correct. The following year another Ḳur'ān scholar, Ibn Shanabūdh [*q.v.*], was similarly condemned and forced to renounce his view that it was permissible to use the readings of Ibn Mas'ūd and Ubayy.

Selecting several rival systems and declaring them equally authoritative was of course the same method used elsewhere by Muslims to avert endless disputes, e.g. the four Sunnī legal schools. But Ibn Mudjāhid's system of seven readings was not completely arbitrary. Strong Ḳur'ān traditions existed in Kūfa, Baṣra, Medina and Damascus; and Mecca also had its own tradition. Kūfa stood out above the others as the leading centre for Ḳur'ān studies and the seat of several rival traditions. So Ibn Mudjāhid selected one reading each for Medina, Mecca, Baṣra and Damascus—those of Nāfi' (d. 169/785), Ibn Kathīr (d. 120/737), Abū 'Amr (d. 154/770), and Ibn 'Āmir (d. 118/736), respectively—and three for Kūfa, those of 'Āṣim (d. 127/744), Ḥamza (d. 156/772), and al-Kisā'ī (d. 189/804). His attempt to limit the number of canonical readings to seven was not acceptable to all, and there was strong support for alternative readings in most of the five cities. Eventually scholars began to speak of the Ten readings, and even the Fourteen. The most widely accepted of these, the so-called "three after the seven" are the readings of Abū Ja'far (d. 130/747), Ya'ḳūb al-Ḥaḍramī (d. 205/820), and Khalaf (d. 229/843). Among the "four after the ten", two deserve special notice, the readings of the famous al-Ḥasan al-Baṣrī (d. 110/728) and al-A'mash (d. 148/765), of Baṣra and Kūfa respectively. For each of the Ten, two slightly different "versions" (sing. *riwāya*) came to be accepted according to scholars of a generation or two later, e.g. the "versions" of Warsh (d. 197/812) and Ḳālūn (d. 220/835) for the reading (*ḳirā'a*) of Nāfi', those of Ḥafṣ (d. 190/805) and Shu'ba (d. 194/809) for 'Āṣim, and those of Khalaf (mentioned above) and Khallād (d. 220/835) for Ḥamza. For complete lists and discussion of this development, see *Gesch. des Qor.*, iii, 169-90, and Blachère, *Introd.*, 116-35.

During the 5th/11th century the exclusive authority of the Seven began to prevail, and several works were written on them, e.g., the *K. al-Taysīr* by al-Dānī (d. 444/1053) (see *Bibl.*), which replaced Ibn Mudjāhid's work. The seven came to be followed exclusively in public readings, while the others continued to be used in Ḳur'ān commentaries and works on philology, grammar, etc. The Ḳur'ān readers (*ḳurrā'*), who maintained a lively tradition, continued at least a scholarly interest in the "three after the seven", and further refinements were made in all of the Ten readings. Two "ways" (*ṭuruḳ*, sing. *ṭarīḳ*) of reciting each "version" (*riwāya*) came to be accepted, and then two more "ways" for each *ṭarīḳ*, making altogether eighty "ways" of reciting ten "readings". See Labib as-Said, *The recited Koran*, Princeton 1975, including a complete list of the eighty, 127-30; on the readings, see KIRĀ'A, and on methods of reciting, TADJWĪD.

At the present, only two "versions" are in general use, that of Ḥafṣ *'an* 'Āṣim, which for centuries has been followed in most regions and in 1924 was given a kind of official sanction by being adopted in the Egyptian standard edition of the Ḳur'ān, and that of Warsh *'an* Nāfi', followed in parts of Africa other than Egypt. The latter was used by the Yemenite scholar al-Shawkānī (d. 1250/1834), in the manuscript of his Ḳur'ān commentary (see *Bibl.*), but in the printed edition the Ḥafṣ *'an* 'Āṣim reading was substituted. The Egyptian standard edition is now regarded as the best of the Ḳur'ān so far available, although it was based on oral tradition and late *ḳirā'āt* literature and is not always consistent with the oldest and best sources (see G. Bergsträsser, *Koranlesung in Kairo*, in *Isl.*, xx [1932], and O. Pretzl, "Anmerkungen" to *Orthographie und Punktierung des Korans*, 1932).

The history of the text of the Ḳur'ān is yet to be written. One aspect of this task is a thorough analysis of the relationship between the Seven or the Ten and all the other readings, including the Companion codices. Until such an analysis is undertaken it will not be possible to give a final evaluation of the sources. The variants found in the "four after the ten" often involve a consonantal text that differs from that of the majority among the Ten (i.e., the "'Uthmānic text"), and they sometimes have completely different words—see, e.g., the references to the readings of al-Ḥasan al-Baṣrī and al-A'mash in *Materials*, especially in the listings for Ibn Mas'ūd and Ubayy. A rough survey of Jeffery's lists shows that Ibn Mas'ūd's variants agree fairly frequently with those of two of the Seven from Kūfa, Ḥamza and al-Kisā'ī, as is to be expected, and even more frequently with those of al-Ḥasan and al-A'mash (the latter was also a Kūfan reader). Ubayy's variants agree fairly frequently with those of two others among the Seven, Ibn Kathīr and Abū 'Amr (from Mecca and Baṣra), and also with those of al-Ḥasan and al-A'mash, but somewhat surprisingly not with those of Ibn 'Āmir, the only reader from Damascus among the Fourteen. This important aspect of the history of the Ḳur'ān deserves a thorough scientific study, preferably with the use of a computer. On the question of the completeness and authenticity of the Ḳur'ān, see Bell-Watt, 50-6; for a clear statement and defence of the modern orthodox position, Labib as-Said, *op. cit.*, 19-41.

4. STRUCTURE

a. The *sūras* and their names. The Ḳur'ān consists of 114 sections of widely varying length and form called *sūras*, which are divided into a number of verses (*āyāt*), ranging from three to 286 or 287. As shown above, the terms *sūra* and *āya* both occur within the text of the Ḳur'ān, but it is not certain that either has its present meaning there, i.e., refers to the present *sūras* and verses. *Sūra* is sometimes translated "chapter", but this is misleading. The first *sūra*, *al-Fātiḥa*, "The Opening" [*q.v.*], is a prayer, and the last two, known as *al-mu'awwidhatān*, "the two [*sūras*] of taking refuge", are charms or incantations. These three serve as a kind of introduction and two-part conclusion to the Ḳur'ān. Except for a few other very short *sūras* near the end (e.g. CIX, CXI, CXII), very few treat a single topic (XII, on the story of Joseph, and LXXI, on Noah, are notable exceptions) or otherwise appear to be structured entities (e.g. XXVI and LV). Most of the *sūras* consist of several segments or pericopes that are only loosely connected, often with little or no apparent connection of thought. Some short *sūras* (e.g. CIII, CVIII) seem to be isolated fragments; and it is not unlikely that some of the present *sūras* or parts of them were once joined with others. For instance,

Ubayy b. Kaʿb and other early authorities are reported to have regarded CV and CVI as a single *sūra* (see *Itḳān*, i, 186 f.; *Materials*, 179; Birkeland, *The Lord guideth*, 100-30).

After the *Fātiḥa*, the *sūra*s are arranged roughly in order of descending length, beginning with "The Cow" (II), with over 700 lines (60 pages) in a modern printed copy of the Egyptian standard edition, and ending with several *sūra*s with just two or three lines. Actually, the *sūra* called "Abundance" (CVIII), mentioned above as a possible fragment, has the distinction of being the shortest, having only ten words. The length of the *sūra*s was only one of several factors affecting the arrangement of the Ḳur'ān. If the *sūra*s were exactly in order of length, the first thirty would be: II, IV, III, VII, VI, V, IX, XI, XVI, X, XII, XVII, XVIII, XXVI, XXVIII, XX, XXIV, XXXIII, XXII, VIII, XXI, XL, XXXIX, XXVII, XXIII, XXXVII, XIX, XXV, XLIII, and XXXIV. Note that Sūra VIII (which is 20th in order of length) and XIII, XIV, and XV (not in this list) are much too short for their positions, while XXXIX, XL, and XLIII are too long. The explanation for these last two groups is clear: XIII, XIV, and XV begin with the "mysterious letters" *al(m)r* and were kept with the other *alr sūras*, X-XII, while XL and XLIII begin with *ḥm* and were kept with the other *ḥm sūras*, a group to which XXXIX also belongs (see 4.d below). Other factors that influenced the order of the *sūra*s include their dates, main topics, and introductions. For instance, LVII-LXVI are a group of Medinan *sūra*s kept together in spite of varying lengths (see also their introductory formulas); X-XV, besides being *alr sūra*s, all feature prophet stories and are named after prophets, except for XIII, which has *almr*; and XXXIV and XXXV begin with the same formula, as do LXV and LXVI, and several groups of *sūra*s with the same mysterious letters (see below); cf. also LXXIII and LXXIV, LXXXV and LXXXVI, and others that begin with oaths. For complete lists of the *sūra*s and their relative lengths, see Bell-Watt, 206-12, and Bauer, *Anordnung der Suren* (see *Bibl.*).

Muslim writers normally refer to the *sūra*s by their names rather than their numbers. Since the names were not established during Muḥammad's lifetime and did not come to be regarded as parts of the text, most *sūra*s came to be known by more than one name. The Egyptian standard edition has had a considerable impact in establishing uniform names, and most of the alternative ones are no longer used. Notable exceptions are the continued use by Indo-Pakistani writers (and also Pickthall's translation of the names *Banī Isrā'īl* for Sūra XVII, *al-malā'ika* for XXXV, *al-mu'min* for XL, *al-taṭfīf* for LXXXIII, *al-ins̲h̲irāḥ* for XCIV, *al-zilzāl* for XCIX, and most also use *ḥā'mīm* for XLI, *al-dahr* for LXXVI, and *al-lahab* for CXI. Flügel and thus Bell and other European writers use *al-malā'ika* for XXXV, *al-mu'min* for XL, *alam nas̲h̲raḥ* for XCIV, and *tabbat* for CXI. A complete list of the *sūra* names and abbreviations found most often in the literature on the Ḳur'ān is given in Paret, *Kommentar*, 551-9. Most of the *sūra* names do not indicate the subject-matter, as would normally be expected of a title. Instead they are taken from a key term or catchword that would identify the *sūra* for those who had them memorised, showing that the names arose within the oral rather than the written tradition.

The *sūra* names used in the Egyptian standard edition can be classified as follows: (1) Just over half of the *sūra*s take their names from key words at or near the beginning of the *sūras*. The method most often used is to name the *sūra* for the first rhyme-word, i.e., the last word of the first verse. This is done in 30 *sūras*: XX**, XXIII, XXX, XXXVI**, LII*, LIV, LVI, LXIX*, LXXIII-V, LXXXIII, LXXXV-VIII, LXXXIX*, XC, XCIII*, XCVII-VIII, CI*, CII, CIII*, CV-VI, CVIII-IX and CXIII-XIV. In the eight marked with asterisks, the first rhyme-word is also the first word of the *sūra*, a method used in 14 other *sūras*: XXXVII, XXXVIII**, L**, LI, LIII, LV, LXVIII, LXXVII, LXXIX, LXXX, XCI-II, XCV and C. The four marked with two asterisks are named for their mysterious letters. A further 18 are named for other key words in the first or second verse: VIII, XXV, XXXV, XLI, XLVII-VIII, LIX, LXIII, LXVII, LXX-LXXII, LXXVI, LXXVIII, XCVI, XCIX, CIX and CX. (2) In about one-third of the *sūra*s the name is a key term or catchword that occurs elsewhere in the *sūra*. In 16 of these this is the only occurrence of the term in the Ḳur'ān (given here without the definite article): Cow in II, 67-71; Table, V, 112-14; Heights, VII, 46-8; Ḥid̲j̲r, XV, 80; Bee, XVI, 68; Cave, XVIII, 9 ff.; Poets, XXVI, 224; Ant, XXVII, 18; Spider, XXIX, 41; Luḳmān, XXXI, 12 f.; Troops, XXXIX, 71-3; Counsel, XLII, 38; Hobbling, XLV, 28; Sand-dunes, XLVI, 21; Apartments, XLIX, 4; and Mutual Fraud, LXIV, 9 (some first-word and first rhyme-word names listed above are also only occurrences). Only two of the narrative *sūras* are named for a key term in the *sūra* that designates the single theme: Joseph (XII) and Noah (LXXI). Twelve are named for a key term that designates one of several themes or stories: Family of ʿImrān (III), Women (IV), Jonah (X), Hūd (XI), Abraham (XIV), Mary (XIX), Pilgrimage (XXII), Confederates (XXXIII), Sheba (XXXIV), and three listed above—Ḥid̲j̲r, Cave, and Luḳmān. Seven are named for other striking terms that occur also in other *sūras*: Cattle (VI), Thunder (XIII), Light (XXIV), Ornaments (XLIII), Smoke (XLIV), Iron (LVII) and Ranks (LXI). (3) The names of 14 *sūras* do not occur in these *sūras*, and most do not occur anywhere in the Ḳur'ān. Most of these names are based on verbs that do occur, usually near the beginning of the *sūra*: Night Journey (XVII), Prostration (XXXII), Disputer (LVIII), Woman Tested (LX), Congregation (LXII), Divorce* (LXV), Prohibition (LXVI), Veiling (LXXXI), Splitting (LXXXII), Rending (LXXXIV), and Expanding (XCIV). The names of the other three were chosen to indicate the function of the *sūra*, The Opening (I), or the main theme, Prophets* (XXI) and Unity (of God) (CXII). Only the two terms with asterisks occur elsewhere in the Ḳur'ān. On the names and abbreviations used for the *sūras*, see Paret, *Kommentar*, 545-50.

b. The verses. Like the *sūras*, the verses vary considerably in length and style. In some *sūras*, which tend to be short and early, the verses are short and often rhythmic. Sometimes there even seems to be an element of metre (LXXIV, 1-7, XCI, 1-10; cf. XCIX, CIV), but this is caused by the repetition of certain grammatical forms and not by an effort to carry through a strict metre of either syllables or stresses. These short, rhythmic verses are often also difficult to translate or interpret because of their use of rare terms, symbolism, metaphor, and other "poetic" features. Most longer *sūras*, and some short Medinan ones (e.g. LX, LXV), have longer, more prosaic verses, often with short statements or formulas attached to the ends in order to provide the rhyme. The one feature that all the verses have in

common is that they end in an irregular rhyme or assonance (discussed in 6.c below). Because of the rhyme the verses form the most natural divisions of the text, and yet we cannot be certain where some verses originally ended. Verse divisions are not indicated in the oldest manuscripts, and they vary somewhat when they are marked, possibly reflecting differences in the early oral tradition that go back to revisions made in the text during the Prophet's lifetime. There is clear evidence that the rhyme and the verse divisions were altered in some *sūras*, where passages originally in one rhyme were inserted into passages in another rhyme (see Bell-Watt, 89 ff.). But the main reason for the variation in the verse divisions is that the rhyme or assonance is usually formed by certain grammatical forms and endings that occur frequently in Arabic, and thus within many of the longer verses.

Several different systems of verse division and numbering arose within the Muslim community. In his English translation M. Pickthall followed an Indian text tradition in which VI, 73 of the Egyptian standard text is divided into two verses, so that 74-165 become 75-166, XVIII, 18 is divided so that 19-110 become 20-111, and XXXVI, 34 and 35 are combined so that 36-83 become 35-82. The editors of the 1976 Festival edition (see *Bibl.*) adopted the Egyptian verse divisions and numbering throughout. Even where the verse divisions are the same, there are variations in the numbering in various Muslim editions of the Arabic text and translations, depending on whether or not the *basmala* and the mysterious letters are counted. The Egyptian standard edition counts the *basmala* (see below) as verse 1 only in the *Fātiḥa*, and is inconsistent in counting the mysterious letters, counting them as a separate verse (verse 1) in *sūras* II, III, VII, XIX, XX, XXVI, XXVIII, XXX, XXXI, XXXII, XXXVI and XL-XLVI, except that in XLII *ḥm* and *ʿsḳ* are counted as two verses. In all other cases the mysterious letters are regarded as the beginning of verse 1. Pickthall counted these letters as a separate verse in the same *sūras* as in the Egyptian edition and also in X and XXXVIII. Some Indo-Pakistani Arabic texts and translations of the Ḳur'ān, e.g., those of Pir Salahaddin, M. Zafrulla Khan and M. G. Farīd, always count the *basmala* as verse 1.

The Arabic text of the Ḳur'ān most widely used in the West until recently is that of Gustav Flügel (1834), which does not follow any one Oriental text tradition. In an effort to establish an improved text, Flügel made many changes in the verse divisions, altering the numbering in slightly over half the *sūras*. The verse divisions and numbering are the same in the Egyptian and Flügel editions only in *sūras* XV, XLVIII-IX, LI-II, LIV, LIX-LXX, LXXIII, LXXV-VII, LXXIX, LXXXI-VIII, XC-XCVII, XCIX, C, CII-V and CVII-XIV. The Flügel text never counts the *basmala* as a verse, and never counts the mysterious letters as a separate verse, but always as the beginning of verse 1. The English translations by R. Bell and A. J. Arberry follow the Flügel numbering. The Italian translation by A. Bausani and the English by A. H. Siddiqui follow the Egyptian numbering, as does Yusuf Ali, usually but not always. The German translation by R. Paret and the French by R. Blachère give both numberings, Paret giving the Egyptian first, Blachère the Flügel first. For a complete list of the differences in these two numbering systems and a table for converting the Flügel numbers to Egyptian, see Bell-Watt, 202 f. The standard work on the various Islamic numbering systems is A. Spitaler, *Die Verszählung des Koran nach islamischer Überlieferung*, Munich 1935.

c. The *basmala*. At the beginning of each *sūra* except IX stands the *basmala*, the formula, *bismi 'llāhi 'l-raḥmāni 'l-raḥīm*, which can be interpreted or translated at least three ways: "In the name of God, the Merciful, the Compassionate" (e.g., Bell, Arberry); "In the name of God, the compassionate Merciful (One)" (cf. Blachère); or "In the name of the merciful and compassionate God" (cf. Paret). This formula occurs one other time in the Ḳur'ān, in XXVII, 30, as the opening of Solomon's letter to the queen of Sheba. The elements of the *basmala* also occur separately: *bismi 'llāh* (without the *alif* in *bismi*, as in the *basmala*) occurs once, in XI, 41, and the twin attributes, *al-raḥmān al-raḥīm*, occur together four more times, in I, 3, II, 163, XLI, 2 and LIX, 22. It may be significant that whenever these attributes appear together, including in I, 1 and XXVII, 30, *al-raḥīm* always serves as a rhymeword. *Al-raḥmān*, always with the definite article, occurs within the text 57 times altogether—i.e. counting I, 1, but not the other occurrences of the *basmala* at the head of the *sūras*. *Al-raḥīm* occurs 33 times with the definite article, and frequently without. The fact that the last two terms of the *basmala* occur together elsewhere in the Ḳur'ān following the same pattern as many other pairs of divine attributes (see 6.c below) suggests that the first of the three interpretations given above is the best (cf. Jomier, *Le nom divin "al-Raḥmān" dans le Coran* [see *Bibl.*]).

On the origin of the *basmala* and its placement at the head of the *sūras* there is difference of opinion. Some Muslims believe that this formula was part of the revelation and was included at the head of the *sūras* from the beginning. Textual evidence within the Ḳur'ān, supported by other early historical evidence, suggests that this is not the case. "Allāh" in the *basmala* is clearly the preferred name for God, and *al-raḥmān* and *al-raḥīm*, according to their Ḳur'ānic usage, are either names or epithets for God. Yet these names are conspicuously absent in earlier parts of the Ḳur'ān, where Muḥammad's Lord is referred to as *rabb*, "Lord", and the Ḳur'ānic formula that occurs during this early period is *bi 'smi rabbika*, "in the name of thy Lord", occuring in LVI, 74, 96, LXIX, 52, and XCVI, 1 (in this formula *bi 'smi* has the *alif*). Then, possibly as much as two years or even more after the beginning of Muḥammad's public ministry, the names al-Raḥmān and Allāh were introduced into the revelation. For a while the name al-Raḥmān was preferred; see, e.g., XIII, 30, XXV, 60 and sixteen times in XIX. Ḳur'ānic evidence supports the testimony of early Muslim scholars who report that the Meccans refused to accept al-Raḥmān as the name of God, while they did know Allāh as a type of "High God" (see W. M. Watt, *Belief in a "High God"*, in *JSS*, xvi [1971], 35-40). The next stage in this development is seen in XVII, 110, a key verse that says Muslims may use either name, Allāh or al-Raḥmān; but the effect of this verse was to replace al-Raḥmān with Allāh as the primary or preferred name for God, as is seen in XIII, 16, XXXIV, 24 and many other verses that parallel the earlier al-Raḥmān contexts. After the revelation of XVII, 110 the term *al-raḥmān* seldom if ever occurs in the Ḳur'ān alone, and it loses its significance as a proper name for God, partly by being connected with *al-raḥīm* and the Arabic root *r-ḥ-m*. Further evidence for the conclusions stated here are given in Welch, *Allāh and other supernatural beings* (see *Bibl.*); on the foreign origin of *al-raḥmān* and its

use in Arabia as a proper name for God before and during the time of Muḥammad, see *Gesch. des Qor.*, i, 112 f.; Horovitz, *Jewish proper names*, 57-9; *Foreign vocab.*, 140 f.; and BASMALA.

The evidence seems to indicate that the *basmala* came into use as a result of this controversy over divine names, probably a short time after the revelation of XVII, 110. It is possible that the *basmala* was formed from existing Ḳur'ānic expressions, i.e. *bismi 'llāh* in XI, 41 and *al-raḥmān al-raḥīm* in what is now I, 3; but it seems much more likely that the *Fātiḥa* and all Ḳur'ānic occurrences of these twin attributes date from after XVII, 110. It also seems likely that the *basmala* was not originally part of the Fātiḥa; note that the Ḳur'ān scholars of Medina, Baṣra, and Syria did not count it as a verse in the *Fātiḥa*, and that this *sūra* without the *basmala* is often referred to as *al-ḥamd*, which may have been its original title [see BASMALA]. As soon as the *basmala* came into use, Muḥammad no doubt used it to introduce each recitation of a portion of the Ḳur'ān. Since many *sūras* contain passages from different periods (see 5.c below), Muḥammad must have recited the *basmala* before many segments that are now in the middle of the *sūras*. Only when the *sūras* reached their final, written form, in some cases after Muḥammad's death, was the *basmala* placed at the beginning of each *sūra* as we have it today.

d. The mysterious letters. At the beginning of 29 *sūras* just after the *basmala* stands a letter or group of letters called in Arabic *fawātiḥ al-suwar*, "the openers of the *sūras*", *awā'il al-suwar*, "the beginnings of the *sūras*", *al-ḥurūf al-muḳaṭṭaʿāt*, "the disconnected letters", etc., but generally referred to in European languages as "the mysterious letters". They are recited as letters of the alphabet, and for 14 centuries they have intrigued and baffled Muslim scholars. Some saw them as abbreviations, e.g. *alr* for *al-raḥmān*, *alm* for *al-raḥīm*, *ḥm* for *al-raḥmān al-raḥīm*, *ṣ* for *ṣādi yā muḥammad*, *ys* for *yā sayyid al-mursalīn*, etc. ʿIkrima and others relate from Ibn ʿAbbās the view that *alr*, *ḥm*, and *n* together stand for *al-raḥmān* (*Itḳān*, ii, 9). Others concluded that the letters are not abbreviations, but offered a variety of alternative explanations, that they are sounds meant to arouse the attention of the Prophet or to captivate his audience so they would be more attentive, mystical signs with symbolic meaning based on the numerical value of the Arabic letters, (written) signs of separation (*fawāṣil*) between the *sūras*, simply Arabic letters attesting that the revelation is in the familiar language of the people, etc. Al-Suyūṭī (*ibid.*, 10) mentions, for instance, a tradition related by Ibn Isḥāḳ on the authority of Ibn ʿAbbās in which a group of Jews tell Muḥammad that the numerical value of the letters would indicate the number of years his community would last. At first they heard him recite *alm* (1 + 30 + 40 = 71), and said it would last 71 years. Then they heard *almṣ* (1 + 30 + 40 + 60) suggesting 131 years, then *alr* (1 + 30 + 200) or 231 years, and then *almr* or 271 years. In the end they concluded that the matter was ambiguous. Al-Suyūṭī discusses these and many other possibilities (*ibid.*, 8-13) and concludes that the *fawātiḥ* are simply mysterious letters or symbols known fully only to God. Later Muslim scholars have tended to accept this view, although the abbreviation theory has remained popular. A few modern Muslims have put forward new variations of mediaeval suggestions, e.g. Hashim Amir Ali (see *Bibl.*) argues that all of the groups of letters, not just some of them, are vocatives addressed to the Prophet, and ʿAlī Nāṣūḥ al-Ṭāhir (see *Bibl.*) proposes that the numerical value of the letters represents the number of verses in the "original" (in most cases, Meccan) versions of the *sūras* or groups of *sūras* concerned. Citing the same examples as al-Suyūṭī (but not always the same values), al-Ṭāhir says, for instance, that Sūra VII, which has 205 verses and begins with *almṣ* (1 + 30 + 40 + 90 = 161), originally consisted of only the first 161 verses. In other cases he has to combine various groups of *sūras* in order to obtain the required number of verses. Thus, adding the 111 verses of XII and the "120 Meccan verses" of XI gives him 231, the value of the letters *alr* which occur at the beginning of these two *sūras* (and also X, XIV, and XV, which he does not mention). Sūra XIII, with *almr* (1 + 30 + 40 + 200 = 271), he argues has 40 Meccan verse which when added to the 231 of XI and XII gives the required 271. In response, it is sufficient to note that no *sūra* with the letters now has the same number of verses as the value of the letters, and in no case does al-Ṭāhir's suggested number of original or Meccan verses agree with the view given in the Egyptian standard edition, much less a critical view of the chronology of the *sūras* involved. This theory is a prime example of the way arbitrary speculation has been applied to these letters.

A number of Western scholars have taken up the challenge to explain these letters since the publication of Th. Nöldeke's *Geschichte des Qorāns* in 1860. Nöldeke suggested (215 f.) that they are the initials or monograms of the owners of the manuscripts used by Zayd when he first compiled the Ḳur'ān, e.g. *alr*[*z*] for al-Zubayr, *almr* for al-Mughīra and *ḥm* for ʿAbd al-Raḥmān. These monograms, he said, got into the text by accident when later Muslims no longer knew their meaning. This view was widely accepted for a while in Europe and was taken up again and defended in 1901 by H. Hirschfeld (*New researches*, 141-3) who however regarded each letter as the initial of a different owner, *r*[*z*] for al-Zubayr, *m* for al-Mughīra, *ḥ* for Ḥudhayfa, etc. Hirschfeld's reason for rejecting the view that the letters went back to Muḥammad was that if they did "he must have had an important share in the arrangement of the *sūras*, and this would contradict all we know of the compilation of the Qorân" (141). But by the time Hirschfeld's book was published, Nöldeke had reversed his position, on the basis of a brief but insightful discussion on the subject by O. Loth (*Tabari's Korancommentar*, in *ZDMG*, xxxv [1881], 603 f.). According to Loth, the letters occur only in "late Meccan and early Medinan *sūras*" when Muḥammad was "drawing near to Judaism", and in some cases the beginning verses contain an allusion to the letters (i.e. "these are the signs (*āyāt*) of the Book"). He concluded that the letters are Cabalistic symbols standing for certain key words and phrases in the *sūras* before which they stand. Loth's arguments were sufficient to cause Nöldeke to abandon his earlier view and conclude that the letters are part of the revelation, having however no special meaning other than as mystical allusions to the heavenly Book (*Orientalische Skizzen*, 1892, 50 f., also stated in *Ency. Brit.*, 9th ed., xvi, 597 f.). F. Schwally, in a perceptive survey of the literature up to 1919 (*Gesch. des Qor.*, ii, 68-78), wisely rejected Loth's abbreviation suggestions as being too arbitrary (73), while commending him on his main argument (73-5). Schwally could not, however, accept Nöldeke's later view, calling it "doubtful" and insisting that "the symbols are still somehow connected with the redaction of the *sūras*" (76). Leaving open the

possibility that the letters are part of the revelation, Schwally made the following important statement: "If Muḥammad was indeed the originator of the symbols, then he must also have been the editor of the ciphered *sūras*. This would indeed contradict earlier prevailing views, but would agree with our earlier statements that the Prophet relied on secretaries to whom he dictated his revelations, that already his object was to produce a special book of revelation, and that the manner in which pieces from various periods but of similar content are strung together in certain *sūras* produces the impression that this editing originates from the Prophet himself" (77). Schwally was thus a harbinger of the work of Bell in the 1930s.

In the meanwhile, two more attempts were made to follow up on Loth's version of the abbreviation theory. In 1921 Hans Bauer (*Anordnung der Suren*) provided statistical evidence for Schwally's first point, that the letters are connected with the redaction of the *sūras*, but failed to follow up on the second. Instead, he offered an unconvincing list of catchwords for which the letters are said to be old abbreviations: *ys* for *yasʿā*, "he who runs", in XXXVI, 20; *ṣ* for *ṣāfināt*, "chargers", in XXXVIII, 31; *ḳ* for *ḳarīnuhu*, "he who is at his side", in L, 23 and 27, etc. For the groups of *sūras* with the same letters he sought some "inner or outer connection among the *sūras*", and suggested that *ṭs(m)* in XXVI-VIII stood for *ṭūr sīnīn*, "Mount Sinai", and Moses, and that *alm* stood for *al-mat̲h̲ānī* (see 1.b above). Independently E. Goossens proposed a similar view in a 1923 *Isl.* article (see *Bibl.*), that the letters are abbreviations for discarded *sūra* titles: *ḳ* for *ḳurʾān*, *n* for *al-nūn*, "the fish", or *d̲h̲u 'l-nūn*, one of Jonah's titles, etc. The *alr sūras*, now named after individual messengers, he said once formed a *sūra*-group called *al-rusul*, "the messengers", and the *alm sūras* formed a similar group called *al-mat̲h̲al*, "the parable". His most innovative suggestion was that some letters are remnants of titles that were discarded or abbreviated when some *sūras* were rearranged, e.g. *ys* (XXXVI) is the remnant of *al-yās* or *al-yāsīn* (two names for Elias in XXXVII, 123, 130), the title of an earlier *sūra* consisting of XXXVI + XXXVII, 12-182, and *ṣ* (XXXVIII) is the remnant of *al-ṣāffāt* (the first word and title of what is now XXXVII), the title of an earlier *sūra* consisting of XXXVII, 1-11 + XXXVIII. Bauer and Goossens inspired another abbreviation theory, that of Morris Seale (see *Bibl.*) who suggested that the letters served as mnemonics of the contents of the *sūras* involved. Seale accepted Bauer's Mount Sinai and Moses for *ṭs(m)* and Goossens' *al-rusul* for *alr*, but preferred *al-mawʿiẓa*, "admonition", for *alm* and *Yūnus* (Jonah) for *ys*. The diversity of these proposals and the fact that several alternative suggestions are often equally plausible demonstrate the futility of this approach, which also fails to respond to some of the textual evidence. In the end, what Schwally said of Loth's abbreviation suggestions applies also to those of Bauer, Goossens, and Seale.

James A. Bellamy in a 1973 *JAOS* article (see *Bibl.*) has proposed an abbreviation theory that attempts to avoid the arbitrariness of the others. Starting with the views recorded by the classical commentators that *alr*, *alm*, *almr*, *ḥm*, and *n* (letters that occur at the beginning of all but ten of the affected *sūras*) are abbreviations for *al-raḥmān* or *al-raḥīm* or both, Bellamy proposes that these letters stand for these terms in the *basmala*, and that all the other mysterious letters are also abbreviations for this formula. In order to accomplish this he suggests a number of emendations, so that *ṭ* and *k* > *ba*, *ṣ* and *ḳ* > *m*, *y* > *b*, and *ʿ* > *bs* or *s*. Thus with the change of only one letter, *ṭsm*, *ṭs*, *ṭh*, *ys*, *almṣ*, *ṣ*, and *ḳ*, become *basm*, *bas*, *bah*, *bs*, *almm*, *m*, and *m*, all suitable abbreviations for the *basmala*. This leaves only *ḥmʿsḳ* and *khyʿṣ*, which with two and four changes respectively become *ḥm bsm* and *bah bsm*. Bellamy suggests that when the *basmala* was first introduced (in the "middle and late Meccan" *sūras*) it was abbreviated variously by the Prophet's scribes at the beginning of these 29 *sūras*, and that the later compilers, failing to recognise these abbreviations, gave them a permanent place in the text by writing the *basmala* out in full just before them. Most of Bellamy's suggested emendations are indeed plausible, but his theory as a whole is not consistent with some of the textual evidence (e.g. the letters are almost certainly not Meccan, but Medinan), does not answer some crucial questions (e.g. the relationship of the letters to their immediate contexts), and is based on several very unlikely assumptions (e.g. that a new formula was abbreviated a dozen different ways by unknown scribes in Mecca who died without revealing their meaning, that the well-known scribes in Medina knew nothing about the abbreviations, etc.).

Any solution to the puzzle of the mysterious letters must provide a reasonable theory that is consistent with all of the textual evidence, and the place to begin is the immediate contexts of the letters, which provide some important clues. The following list gives the *sūra* number, the position the *sūra* would have if all the *sūras* (except the Fātiḥa) were arranged exactly according to length (based on Bauer, *op. cit.*, Table II; see also Bell-Watt, 206-12, for the length of each *sūra*), the letters, and the opening formula or phrase:

2 (2)	*alm*	That is the Book, wherein is no doubt
3 (4)	*alm*	... He has sent down on thee the Book
7 (5)	*almṣ*	A Book sent down to thee
10 (11)	*alr*	Those are the signs of the Wise Book
11 (10)	*alr*	A Book whose signs are made clear
12 (12)	*alr*	Those are the signs of the clear Book; We have sent it down as an Arabic Ḳurʾān
13 (34)	*almr*	Those are the signs of the Book
14 (33)	*alr*	A Book We have sent down to thee
15 (41)	*alr*	Those are the signs of the Book and a clear Ḳurʾān
19 (29)	*khyʿṣ*	Mention of thy Lord's mercy to His servant Zechariah
20 (17)	*ṭh*	We have sent down the Ḳurʾān upon thee
26 (15)	*ṭsm*	Those are the signs of the clear Book
27 (25)	*ṭs*	Those are the signs of the Ḳurʾān and a clear Book
28 (16)	*ṭsm*	Those are the signs of the clear Book
29 (27)	*alm*	Do the people reckon that they ... will not be tried?
30 (36)	*alm*	The Romans have been vanquished
31 (46)	*alm*	Those are the signs of the wise Book
32 (54)	*alm*	The sending down of the Book wherein is no doubt
36 (40)	*ys*	By the wise Ḳurʾān ... the sending down of the Almighty
38 (39)	*ṣ*	By the Ḳurʾān, containing the remembrance
40 (23)	*ḥm*	The sending down of the Book is from God the Almighty
41 (37)	*ḥm*	A sending down from the Merciful, the Compassionate. A Book whose signs

	have been distinguished as an Arabic Ḳur'ān.
42 (35) *ḥmʿsḳ*	So reveals to thee and to those before thee God, the Almighty
43 (31) *ḥm*	By the clear Book. Behold, We have made it an Arabic Ḳur'ān
44 (55) *ḥm*	By the clear Book. We have sent it down in a blessed night
45 (47) *ḥm*	The sending down of the Book is from God, the Almighty
46 (42) *ḥm*	The sending down of the Book is from God, the Almighty
50 (52) *ḳ*	By the glorious Ḳur'ān
68 (62) *n*	By the Pen and what they inscribe

Two points, stressed by Schwally, Bauer, Loth and others but largely disregarded by all the abbreviation theories, stand out in this list: the mysterious letters influenced the final arrangement of the Ḳur'ān, and they are closely related to the introductory formulas and to the Book. Groups of *sūra*s with the same letters but with widely varying lengths have been kept together even though this violates the principle of arranging the *sūra*s according to length. This suggests that separate collections of *sūra*s with the same letters existed at the time of the compilation of the Ḳur'ān and that the redactors were hesitant to break them up. The most likely reason for this hesitancy is that they regarded the letters as part of the revelation, and the groups of *sūra*s as going back to the Prophet. In nearly every case the letters are followed immediately by a reference to some form of the revelation, usually a distinctive revelation formula or oath that mentions the Book or the Ḳur'ān or both (XXIX and XXX being obvious exceptions). In III this formula occurs in verse 2, which Schwally (*Gesch. des Qor.*, ii, 75) says was probably the original beginning of the *sūra*. In XIX a Book formula, "Mention in the Book Mary (Abraham, etc.)", introduces five other accounts (verses 16, 41, 51, etc.), but what appears to be an older formula is retained at the beginning of the first (verse 2). The close connection between the mysterious letters and the Book is proved by the fact that, although many *sūra*s begin with formulas or oaths, only one other *sūra* opens with the same type of revelation formula, namely, XXXIX, which belongs with the *ḥm sūras*. It begins exactly the same as three of them (XL, XLV and XLVI), it shares the same themes, and it is placed with them despite its length (see Bauer, Table II). Ubayy and others are in fact said to have read *ḥm* at the beginning of this *sūra* (*Materials*, 160). Revelation is mentioned in a few other *sūra* introductions, but they are different, e.g. XVIII and XXV begin with praise formulas (*al-ḥamdu li 'llāh* and *tabāraka*), XCVII with a *wa-mā adrāka* formula (see 7a below) and LV mentions *al-ḳur'ān* in verse 2, but is in a completely different style. There is also some correlation between specific formulas and groups of *sūra*s with the same mysterious letters, e.g. the *ṭsm sūra*s have the same formula, three of the *ḥm sūra*s have the same formula, and four with unique letters (*ys*, *ṣ*, *ḳ*, and *n*) begin with oaths.

Whether or not Loth is correct in saying that several of the introductory formulas contain allusions to the mysterious letters, there is other evidence that these letters are part of the revelation and were recited as separate letters from the beginning. For one thing, most of the groups of letters when recited as letters of the alphabet introduce the rhyme of their respective *sūra*s. The 17 *sūra*s with groups of letters ending in *īm*, *īn*, or *ūn* (i.e. six with *alif lām mīm*, six with *ḥā' mīm*, two with *ṭā' sīn mīm*, and one each with *ṭā' sīn*, *yā' sīn*, and *nūn*) all have this rhyme, with one partial exception. Sūra XX, on the other hand, with *ṭā' hā'*, has the *ā* rhyme (in verses 1-24); XXXVIII, with *ṣād*, has the rhyme *āḳ*, *āṣ*, etc.; XI, with *alif lām rā'*, has *īr*, *ūr* in verses 1-5; and XIII, with *alif lām mīm rā'*, and XLII, with *ḥā' mīm*, *ʿayn sīn ḳāf*, both have *īn*, *ūn* in verses 1-5, and then change to *āb*, *ār* and *il*, *ir*, respectively. The correspondence is not exact, and there are exceptions, but this close relationship between the letters and the rhyme or assonance of the *sūra*s must be more than a coincidence.

Another striking fact that must be more than coincidental is that the mysterious letters represent every consonantal form in Arabic, while no form occurs for more than one letter. Thus we have *y* but no *b*, *t*, or *th*; *ḥ* but no *dj* or *kh*; *r* but no *z*; *s* but no *sh*; *ṣ* but no *ḍ*; *ṭ* but no *ẓ*; *ʿ* but no *gh*; *ḳ* but no *f* or *w*; and *k* but no *d* or *dh*—along with each of the forms that represent only one letter, *'*, *l*, *m*, *n*, and *h* (note that in Kūfic Arabic *w* was written like *ḳ* and *f*, and *d* and *dh* were written like *k*, except that letters were not attached to the ends of *w*, *d*, and *dh*). The most reasonable explanation of the fact that these 14 letters, and no others, occur is that they were intended to represent the Arabic alphabet. If this is so, then the statements in the introductory formulas saying that the revelation was being sent down as a "clear Book" (*kitāb mubīn*) in Arabic take on new significance; other passages (XVI, 103, XXVI, 195) speak of the revelation being in "plain Arabic speech" (*lisān ʿarabī mubīn*). The fact that the literature on variant readings does not record differences in the way the 14 consonantal forms were recited seems to indicate that there was a strong oral tradition supporting the mysterious letters.

A number of questions still remain, but the evidence seems to support Loth, the later Nöldeke, Schwally, Bell, and Alan Jones (see *Bibl.*) in regarding the mysterious letters as part of the revelation. Moreover, Bell seems to have been correct in seeing the letters and the introductory formulas as part of the early Medinan revisions adapting the *sūra*s for inclusion in the written scripture Muḥammad was preparing. It is not unlikely that the *sūra*s with the letters are the ones Muḥammad prepared for the Book. The letters are significant for understanding the history of the text, and the chronology of the text is important for understanding the letters.

5. Chronology of the Text

The Ḳur'ān responds constantly and often explicitly to Muḥammad's historical situation, giving encouragement in times of persecution, answering questions from his followers and opponents, commenting on current events, etc. Major doctrines and regulations for the Muslim community, which are never stated systematically in the Ḳur'ān, are introduced gradually and in stages that are not always clear. There are apparent contradictions and inconsistencies in the presentation of both the beliefs and the regulations, and the latter are sometimes altered to fit new situations. Thus it is essential to know the approximate dates or historical settings of some passages, and at least the chronological order of others, if they are to be understood fully. This problem was recognised by early Muslim scholars who devoted much attention to it in the first few centuries, until a fairly rigid system of dating was established and given the imprimatur of orthodoxy. In modern times the study of the chronology of the Ḳur'ān has been almost exclusively a domain of

Western scholars, who have not however been able to reach a consensus on a dating system, or even on the possibility of establishing one.

a. Historical references and allusions in the Ḳur'ān. The Ḳur'ān mentions specifically or alludes to a number of historical events in the life of Muḥammad and his contemporaries, but it gives no dates or other indications as to exactly when these events occurred. In most cases, the specific occasions alluded to and the dates of the passages involved cannot be determined. This is especially true for the period before the Hid̲j̲ra in 622, for which there are only a few references to dateable historical events, and even if the events could be identified with certainty this would be of little help in dating the passages that refer to them, e.g. XXX, 2-5, mentions a military defeat of the Byzantines, presumably their loss of Jerusalem to the Persians in 614 (cf. also CV, believed to refer to a military expedition against Mecca in the middle years of the 6th century). There are many allusions to Muḥammad's personal situation in Mecca (e.g. the persecution he suffered, accusations made by his opponents, his early life and orphanhood) and to specific practices of the Meccans, but the passages that contain these allusions cannot be dated with any precision. It is only in the Medinan period that we have a number of passages that can be dated fairly precisely on the basis of references or allusions to specific historical events that can be dated from other sources. For instance, the battle of Badr (spring 624) and the battle of Ḥunayn (early 630) are mentioned by name in III, 123, and IX, 25, respectively. The change of the *ḳibla* [*q.v.*] (direction one faces when performing the ritual prayer) from Jerusalem to Mecca in late 623 or early 624 is discussed in II, 162-50. The adoption of the ancient pilgrimage rituals about the time of the battle of Badr is discussed in II, 158, 198, V, 95 ff., etc., where the Kaʿba, al-Ṣafā and al-Marwa (two ancient holy places in Mecca), Mount ʿArafāt, and al-Mas̲h̲ʿar al-Ḥarām (the sanctuary in Muzdalifa) are all mentioned by name. Muḥammad's adopted son, Zayd (b. Ḥārit̲h̲a), is mentioned by name in XXXIII, 37 in connection with an episode that occurred in the spring of 627. And many other events are alluded to, although not by name: the battle of Uḥud (625) in III, 155-74; the expulsion of the Jewish tribe of al-Naḍīr (625) in LIX, 2-5; the Day of the Trench (627) in XXXIII, 9-27; the expedition to K̲h̲aybar (628) in XLVIII, 15; the expedition to Tabūk (630) in IX, 29-35, etc. All Ḳur'ānic dating systems, Muslim and non-Muslim, take these historical references and allusions in Medinan contexts as their starting-point.

b. Traditional Muslim dating. During the early Islamic centuries a number of passages in the Ḳur'ān came to be connected with stories that arose in the attempts to reconstruct the life of the Prophet, especially for the period in Mecca before the Hid̲j̲ra: LIII, 1-18, and LXXX, 15-29, came to be interpreted as Muḥammad's call visions, while XCIV came to be associated with a story about the miraculous opening of his breast and purification of his heart, XCVI and LXXIV with his call to public prophethood, XVII, 1, with his Night Journey, etc. (see, e.g., al-Ṭabarī and al-Zamak̲h̲s̲h̲arī, *ad locc.*; for the European literature, Paret, *Kommentar*, 460 f., 513-15, 493 and 295 f.). Other passages came to be connected with certain events in the life of the Muslim community: XIX is said to have been recited to the Negus of Abyssinia by Muḥammad's followers who were forced to emigrate from Mecca to escape persecution around 615; and a written copy of XX is said to have been involved in the conversion of ʿUmar at about the same time. Early Ḳur'ān scholars also attempted to identify and explain vague allusions in the Ḳur'ān, e.g. they explained that the blind man alluded to in LXXX was a certain ʿAbd Allāh b. Umm Maktūm, and that the man involved in a divorce dispute in LVIII was Aws b. al-Ṣāmit. And episodes related to IX, 40, XXIV, 11-20, XXXIII, 37-40, LXVI, 3-5, CXI, 1-5, and many others were similarly explained. From these stories and explanations there arose a separate genre of Islamic literature called *asbāb al-nuzūl*, "the occasions of the revelation", the prime example being a work of the same title by al-Wāḥidī (d. 468/1075-6). This literature does not attempt to provide a complete system for dating the various parts of the Ḳur'ān, and only a small proportion of the text is treated. Also, there are a number of inconsistencies, e.g. whether XCVI or LXXIV was the "first revelation" (see *Itḳān*, i, 23 f.). Some of the stories and other explanations found in this literature and in the Ḳur'ān commentaries are obviously legendary, and in some cases the process by which these accounts came to be attached to Ḳur'ānic passages can be reconstructed (see, e.g., H. Birkeland, *The legend of the opening of Muhammad's breast*, Oslo 1955, and *The Lord guideth*, Oslo 1956, 38-55). Others probably have some historical validity, but there is often good reason to suspect elaborate embellishment. These accounts—historical, semi-historical, and legendary—came to be accepted, often without discrimination, as the basis for the traditional Muslim dating of the Ḳur'ān.

The adoption of the Ḳur'ān as a primary source for Islamic law played an important role in the establishment of a chronological order for the text. Rather than attempting to explain away the inconsistencies in passages giving regulations for the Muslim community, Ḳur'ān scholars and jurists came to acknowledge the differences, while arguing that the latest verse on any subject "abrogated" all earlier verses that contradicted it. A classic example involves the Ḳur'ānic teaching or regulation on drinking wine, where V, 90, which has a strong statement against the practice, came to be interpreted as a prohibition, abrogating II, 219, and IV, 43, which appear to allow it. This theory or doctrine of abrogation (*nask̲h̲*) has only limited support in the Ḳur'ān itself, since the verses on which it is based, especially II, 106, involve passages that are no longer in the Ḳur'ān. But a number of treatises on the subject influenced the development of the traditional dating of the Ḳur'ān by establishing a widespread belief in the chronological order of certain groups of isolated verses. Eventually, long lists of "abrogating and abrogated (verses)" (*al-nāsik̲h̲ wa 'l-mansūk̲h̲*) were drawn up, as jurists and others, in efforts to support their own views, sought out all possible inconsistencies and claimed that the "earlier" verses involved had been abrogated. See NASK̲H̲ and TAFSĪR; *Itḳān*, ii, 20-7; Bell-Watt, 86-9; Burton, *Collection*, 46-104.

The task of dating parts of the Ḳur'ān and determining its chronological order was further complicated by the assumption that the present *sūras* were the original units of revelation, i.e. that except for a few verses in some *sūras*, each *sūra* was revealed all at once or during a short period of time before the next *sūra* was begun. This assumption led to the practice of designating each *sūra* as "Meccan" or "Medinan" (i.e. revealed before or after the Hid̲j̲ra) and to attempts to determine the exact chronological order of all the *sūras* as wholes—rather than dealing with

separate parts as in the *asbāb al-nuzūl* and *al-nāsikh wa 'l-mansūkh* literature. But al-Suyūṭī's lists of *sūras* attributed to Ibn ʿAbbās (d. *ca.* 68/688), Ḳatāda b. Diʿāma (d. *ca.* 112/730), and others show that the schools of these early Ḳur'ān scholars could not agree even on whether some *sūras* were "Meccan" or "Medinan", much less on their exact chronological order (*Itḳān*, i, 10 f.). Al-Bayḍāwī (d. 716/1316) classified the *sūras* as "Meccan", "Medinan", or "disputed", and included 17 in this last category: XIII, XLVII, LV, LVII, LXI, LXIV, LXXXIII, XCV, XCVII-C, CII, CVII and CXII-CXIV. The lists given by al-Suyūṭī show that there was also difference of opinion on six others: XLIX, LXII-LXIII, LXXVII, LXXXIX and XCII. The chronological order attributed to Ibn ʿAbbās (*ibid.*) came to be widely accepted, and with a few changes was adopted by the editors of the Egyptian standard edition of the Ḳur'ān (1322/1924), who indicated in the heading to each *sūra* the *sūra* revealed just before it and any verses that belong to a different period. Thus the heading for XIV reads: "Sūra of Abraham, Meccan, except verses 28 and 29 which are Medinan; it has 52 verses; it was revealed after Sūra of Noah".

The Egyptian standard edition gives the following chronological order of the *sūras*, with the verses said to date from a different period given in parentheses: XCVI, LXVIII (17-33, 48-50 Med.), LXXIII (10 f., 20 Med.), LXXIV, I, CXI, LXXXI, LXXXVII, XCII, LXXXIX, XCIII, XCIV, CIII, C, CVIII, CII, CVII, CIX, CV, CXIII, CXIV, CXII, LIII, LXXX, XCVII, XCI, LXXXV, CVI, CI, LXXV, CIV, LXXVII (48 Med.), L (38 Med.), XC, LXXXVI, LIV (54-6 Med.), XXXVIII, VII (163-70 Med.), LXXII, XXXVI (45 Med.), XXV (68-70 Med.), XXXV, XIX (58, 71 Med.), XX (130 f. Med.), LVI (71 f. Med.), XXVI (197, 224-7 Med.), XXVII, XXVIII (52-5 Med., 85 during Hidjra), XVII (26, 32 f., 57, 73-80 Med.), X (40, 94-6 Med.), XI (12, 17, 114 Med.), XII (1-3, 7 Med.), XV, VI (20, 23, 91, 114, 141, 151-3 Med.), XXXVII, XXXI (27-9 Med.), XXXIV (6 Med.), XXXIX (52-4 Med.), XL (56 f. Med.), XLI, XLII (23-5, 27 Med.), XLIII (54 Med.), XLIV, XLV (14 Med.), XLVI (10, 15, 35 Med.), LI, LXXXVIII, XVIII (28, 83-101 Med.), XVI (126-8 Med.), LXXI, XIV (28 f. Med.), XXI, XXIII, XXXII (16-20 Med.), LII, LXVII, LXX, LXXVIII, LXXIX, LXXXII, LXXXIV, XXX (17 Med.), XXIX (1-11 Med.), LXXXIII—Hidjra—II (281 later), VIII (30-6 Mec.), III, XXXIII, LX, IV, XCIX, LVII, XLVII (13 during Hidjra), XIII, LV, LXXVI, LXV, XCVIII, LIX, XXIV, XXII, LXIII, LVIII, XLIX, LXVI, LXIV, LXI, LXII, XLVIII, V, IX (128 f. Mec.), CX. Sūra II is the only one said to have an addition later in the same period. Sūras VIII, XLVII, and IX, all Medinan, are the only ones said to have earlier verses inserted into later *sūras*. Of the 86 Meccan *sūras*, 33 are said to have some Medinan verses. The traditional dating seen here is based on three assumptions: (1) that the present *sūras* were the original units of revelation, (2) that it is possible to determine their chronological order, and (3) that Tradition (including the *ḥadīth*, *sīra*, *asbāb al-nuzūl*, *al-nāsikh wa 'l-mansūkh*, and *tafsīr bi 'l-ma'thūr* literature) provides a valid basis for dating the *sūras*.

c. Modern Western dating. Since the mid-19th century, Western scholars have been applying critical methods to the Ḳur'ān in varying degrees, and have proposed a variety of dating systems. The one that has gained the most acceptance is that of what might be called the Four-period School, founded by Gustav Weil in his *Historisch-kritische Einleitung in der Koran* (1844, 1878). Weil reassessed the dating of the Ḳur'ān and offered his own chronological order of the *sūras* using three criteria: (1) references to historical events known from other sources, (2) the character of the revelation as reflecting Muḥammad's changing situation and roles, and (3) the outward appearance or form of the revelation (1st ed., 54 f.). His most notable contribution was his division of the "Meccan *sūras*" into three groups, thus establishing altogether four periods of revelation, with the dividing points at about the time of the emigration to Abyssinia (*ca.* 615), Muḥammad's return from al-Ṭā'if (*ca.* 620), and the Hidjra (September 622). Weil's four-period dating system and his three criteria were then adopted, with some changes in the order of the *sūras*, by Th. Nöldeke in 1860 and F. Schwally in 1909 in their monumental *Gesch. des Qor.*, and then by R. Blachère in his *Introd.* (1947, 1959) and translation, *Le Coran* (1949-50, 1966). In the 1st ed. of his translation, Blachère arranged the *sūras* in what he took to be their chronological order; in the 2nd ed. the *sūras* were put in the traditional order (this 2nd ed. was meant for a wider public; but Blachère may also have felt, after deeper acquaintanceship with Bell's work, that it was not possible to arrange the *sūras* in an exact chronological order). In order to show the similarities and differences among the three versions of this four-period system, and to facilitate a comparison of this system with the traditional dating, the three European versions are all given below. The few verses in some *sūras* that are said to date from a different period are not indicated here, except where Blachère divided two *sūras* in the first edition of his translation.

The *sūras* of the First or Early Meccan Period tend to be short, with short, rhythmic verses. They often begin with a series of *kāhin*-style oaths, and the language is said to be full of "poetic imagery and power". Assuming a progressive deterioration of style, Weil placed in the First Period the *sūras* he felt have the most exalted poetic style, along with others that share the same themes and general style. The chronological order of the *sūras* of the First Period according to the three versions is as follows:
Weil: 96, 74, 73, 106, 111, 53, 81, 68, 87, 92, 89, 93, 94, 103, 100, 108, 102, 107, 109, 105, 113, 114, 112, 80, 97, 91, 85, 90, 95, 101, 75, 104, 77, 86, 70, 78, 79, 82, 84, 56, 88, 52, 69, 83, 99.
Nöldeke: 96, 74, 111, 106, 108, 104, 107, 102, 105, 92, 90, 94, 93, 97, 86, 91, 80, 68, 87, 95, 103, 85, 73, 101, 99, 82, 81, 53, 84, 100, 79, 77, 78, 88, 89, 75, 83, 69, 51, 52, 56, 70, 55, 112, 109, 113, 114, 1.
Blachère: 96^{1-5}, 74^{1-7}, 106, 93, 94, 103, 91, 107, 86, 95, 99, 101, 100, 92, 82, 87, 80, 81, 84, 79, 88, 52, 56, 69, 77, 78, 75, 55, 97, 53, 102, 96^{6-19}, 70, 73, 76, 83, 74^{8-55}, 111, 108, 104, 90, 105, 89, 112, 109, 1, 113, 114.

The *sūras* of the Second or Middle Meccan Period are longer and "more prosaic", but still with "poetic" qualities. In style they are said to form a transition between the *sūras* of the First and Third periods. The signs of God in nature and the divine attributes such as mercy (*raḥma*) are emphasised, and God is often called the Merciful One (*al-raḥmān*). There are vivid descriptions of paradise and the hellfire, and here too the punishment-stories are introduced. The *sūras* of the Second Period are (italics = Nöldeke only; parentheses = Blachère only):
Weil: 1, 51, 36, 50, 54, 44, 19, 20, 21, 23, 25, 26, 67, 37, 38, 43, 71, 55, 15, 76.

Nöldeke and Blachère: (51), 54, (68), 37, 71, 76, 44, 50, 20, 26, 15, 19, 38, 36, 43, 72, 67, 23, 21, 25, 17, 27, 18.

The *sūra*s of the Third or Late Meccan Period are even longer and "more prosaic", and Weil says the "poetic power" has been lost altogether. The revelation often takes the form of sermons or speeches, and the prophet stories and punishment-stories are retold in more and more detail. Nöldeke emphasises changes in vocabulary, but similarity of form, in Late Meccan and Medinan *sūras*. The *sūra*s of the Third Period are:

Weil: 7, 72, 35, 27, 28, 17, 10, 11, 12, 6, 31, 34, 39, 40, 32, 42, 45, 46, 18, 16, 14, 41, 30, 29, 13, 64.
Nöldeke and Blachère: 32, 41, 45, (17), 16, 30, 11, 14, 12, 40, 28, 39, 29, 31, 42, 10, 34, 35, 7, 46, 6, 13.

The Medinan *sūra*s and their chronological order are determined by the subject matter of these revelations that reflect Muḥammad's growing political power and the general development of events in Medina after the Hid̲j̲ra. New themes and key terms are said to help distinguish these *sūra*s from certain Late Meccan ones. The Medinan *sūra*s are:

Weil: 2, 98, 62, 65, 22, 4, 8, 47, 57, 3, 59, 24, 63, 33, 48, 110, 61, 60, 58, 49, 66, 9, 5.
Nöldeke and Blachère: 2, 98, 64, 62, 8, 47, 3, 61, 57, 4, 65, 59, 33, 63, 24, 58, 22, 48, 66, 60, 110, 49, 9, 5.

Here we see a combination of excessive dependence on traditional Muslim dating and on matters of form and style, e.g. in Weil's First Period the first 34 *sūra*s, with just a few exceptions, are in almost exactly the same order as in the traditional Muslim dating (cf. the Egyptian list above). Weil then closed this period with eleven *sūra*s that have the same "poetic style", but are dated considerably later by Muslims (note the exact order of LXX-LXXXIV). Nöldeke then accepted all of Weil's First Period *sūra*s, and added three more (I, LI, LV); and Blachère accepted all of Nöldeke's except for two (LI, LXVIII), and added one (LXXVI)—these differences involve mainly the dividing points between the periods. Also, the traditional stories involving certain *sūra*s—Muḥammad's call (XCVI, LXXIV), an incident involving Muḥammad's uncle, ʿAbd al-ʿUzzā (CXI), the emigration to Abyssinia (XIX, XX), etc.—seem to have been accepted as historical. But the Tradition, especially on the Meccan period, is not this trustworthy. Weil, Nöldeke, and Blachère have accepted the three assumptions of the traditional Muslim dating stated above; their four-period system is essentially little more than a European variation of the traditional dating. On the question of style, it is true that there were changes through the years; but there is no reason to assume that all *sūra*s with the same style belong to the same period. The Four-period School have not demonstrated the validity of the historical framework or the development of ideas and key terms assumed by their system, which has been widely accepted in the West with much more confidence than is justified. It should be emphasised, however, that this system is often used by others in a rigid way not intended by its founders (Weil and Nöldeke), e.g. giving the exact chronological order of several verses, or the exact number of occurrences of a term in each period. Schwally in particular emphasised that the order proposed by Nöldeke was only approximate.

Three other dating systems were proposed by Europeans within a span of ten years around the turn of the 20th century. That of H. Grimme, presented in his *Mohammed* (1892-5), ii, 25 ff., was basically a variation of Nöldeke's, with more emphasis on stages in the development of doctrinal themes. Grimme's analysis of groups of ideas that occur together in the Ḳur'ān was useful, but his view of the overall sequence of ideas (monotheism, resurrection, the Last Day, etc.) was not widely accepted, and has since been discredited. Sir William Muir, in his *The Coran: its composition and teaching* (1896), 43-7, offered an arrangement of the *sūra*s in six periods (five Meccan and one Medinan). His most significant and innovative suggestion was that the first period in the composition of the Ḳur'ān comprised eighteen short *sūra*s, which he called "rhapsodies", dating from before Muḥammad's call: CIII, C, XCIX, XCI, CVI, I, CI, XCV, CII, CIV, LXXXII, XCII, CV, LXXXIX, XC, XCIII, XCIV and CVIII. Muir pointed out that none of these is in the form of a message from a deity. His second period has four *sūra*s (XCVI, CXIII, LXXIV, CXI) treating "the opening of Muḥammad's ministry", presumably *ca.* 610. The other dividing points are the beginning of Muḥammad's public ministry (*ca.* 613), the Abyssinian emigration (*ca.* 615), the Year of Sorrow (*ca.* 619), and the Hid̲j̲ra. Muir is no doubt correct in dating some *sūra*s before XCVI and LXXIV, but I and others he lists are almost certainly later. In general, the criticisms stated above of the four-period system apply also to Muir's. In 1902 H. Hirschfeld, in his *New researches* (see *Bibl.*), proposed a chronological arrangement of the Ḳur'ān based on the character or function of individual passages. After the "first proclamation", XCVI, 1-5, Hirschfeld's arrangement also has six periods, in which the revelations are classified as "confirmatory" (LXXXVII, LXVIII, 1-33, XCII, LXIX, 40-52, etc.), "declamatory" (LXXXI, LXXXII, LXXXIV, etc.), "narrative" (LXVIII, 34-52, LI, XXVI, 1-220, LIV, etc.), "descriptive" (LXXIX, 27-46, LXXI, LV, etc.), "legislative" (VI, 1-73, XCIII, 9-11, XXV, 63-72, etc.), and Medinan, grouped together but discussed separately as those up to the battle of Badr, political speeches, revelations on Muḥammad's domestic affairs, and preparations for the Pilgrimage to Mecca. This system has a number of obvious flaws, but Hirschfeld's work was valuable for its preliminary analysis of Ḳur'ānic literary types and its recognition of the fact that in dating parts of the Ḳur'ān we must deal with individual pericopes rather than entire *sūra*s.

This insight became a guiding principle in the most elaborate attempt so far to identify and date the original units of revelation, Richard Bell's *The Qur'ān, translated, with a critical re-arrangement of the surahs*, 2 vols. (1937-9). Over a decade earlier he became convinced that Nöldeke's dating was inadequate (*ibid.*, 689 f.). Bell's verse-by-verse analysis of the entire Ḳur'ān led him to conclude that the *sūra*s are far more complex than is assumed by the traditional Muslim and European dating, that the revelations underwent considerable revision, including expansion, replacement of older passages with new material, changes in the rhyme, etc., that this revision involved written documents and was done during Muḥammad's lifetime under his supervision, and that the material for most of the *sūra*s was compiled, but not put into its final form, under Muḥammad's supervision. Bell did not present a rigid dating system, but concluded "provisionally" (vi f.) that the composition of the Ḳur'ān fell into three main periods: an early one from which only some sign-passages and exhortations to worship God survive; a "Ḳur'ān period", covering the latter part of the Meccan period and the first year or two in

Medina, during which Muḥammad's task was to produce a *ḳur'ān*, a collection of lessons for liturgical use; and a "Book period", beginning about the end of the year 2 A.H., during which Muḥammad began to produce a written scripture. According to Bell, the present Ḳur'ān is not to be divided into these three periods, since a number of sign-passages were incorporated into the liturgical *ḳur'ān*, and in Medina this collection of oral materials was revised to form part of the Book. Bell attempted to date some Medinan passages fairly precisely—"early Medinan, revised after Badr", "shortly after Uḥud", "year VII", etc. But for most passages he gave very general and often tentative suggestions, especially for the Meccan material, e.g. "early, revised in Mecca (?), "Meccan, with Medinan additions", and very often "Meccan" and "late Meccan or early Medinan". A survey of Bell's provisional dating of the individual passages shows that he regarded fewer than twenty *sūras* as being probably completely Meccan: L, LIII, LV, LXIX, LXXV, LXXIX, LXXX, LXXXII, LXXXVI, LXXXVIII-LXXXIX, XCI-XCIII, XCV-XCVI, XCIX, CIV and CXIII, all of which are said to have material from different dates. Of the other short *sūras*, some of which he regarded as possible unities, Bell said CII, CV, CXII and CXIV seem to be Medinan; I, XCIV, CIII and CVI-CVIII could be either Meccan or Medinan; and on C, CI, CIX and CXI he gave no opinion. He regarded as completely Medinan the same 24 *sūras* said to be Medinan by Nöldeke, but saw them as having significant amounts of material from several different dates, thus making it impossible to put the *sūras* as wholes in chronological order. This leaves exactly half of the *sūras* (57) which Bell regarded as having significant amounts of material from both before and after the Hidjra: 33 said to be mostly Meccan, with Medinan revisions and additions—VI, VII, XII, XIII, XV, XVII, XVIII, XXI, XXV-XXVI, XXXIV, XXXVI-XXXVIII, XLI, XLIV, LI-LII, LIV, LVI, LXVIII, LXX-LXXIV, LXXVI-LXXVIII, LXXXI, LXXXIV, LXXXVII and XC; and 24 said to be mostly Medinan, with some Meccan passages, or based on Meccan material—X, XI, XIV, XVI, XIX, XX, XXIII, XXVII-XXXII, XXXV, XXXIX, XL, XLII-XLIII, XLV-XLVI, LXVII, LXXXIII, LXXXV and XCVII. He thus distinguished between dates of original revelation (or earliest recitation) and dates of later editing and composition during Muḥammad's lifetime. The fact that he indicated breaks in the text and identified older components, e.g. Meccan passages in *sūras* that were completed in Medina, does not mean he failed to recognise that some longer *sūras* (e.g. XII, XIX, XXVI) and many shorter ones (e.g. LXXXVII, CIV) are carefully composed, unified works in their final form.

Bell's analysis of the Ḳur'ān has often been misunderstood or ignored by later writers, partly because the extensive notes to his translation, giving the arguments for his reconstructions, were never published. Nor has any thorough study and critique of Bell's work yet appeared. The review articles by J. E. Merill and W. M. Watt (see *Bibl.*) and Watt's remarks in Bell-Watt (113 f., 101-7, 137-41, etc.) are useful introductions. Watt has expressed reservations about Bell's hypothesis on the disjointedness of the Ḳur'ān. Bell suggested that when some passages were being revised Muḥammad instructed the scribes to write the new versions on the backs of the sheets on which the verses being replaced were written, and that the later editors, not wanting to discard any of the revelation, inserted the old verses just before or after the new ones. E.g. II, 185, was written on the back of 184, 186 (on fasting), II, 196, on the back of 197-9 (on the Pilgrimage), XXIV, 2-9, on the back of 10-18 (on fornication), and XVIII, 6-9 (a new introduction to the story of the Seven Sleepers), on the back of 10-12, which was replaced by a longer version of the story in 13-21a. In other cases the scribes simply used the backs of sheets on which older, discarded material was written, e.g. IV, 11-14, on the back of 2-10, IV, 19-21, on the back of 15-18, and VII, 3-5, on the back of 6 9. This hypothesis provides a feasible explanation and solution to textual problems in some cases, but not in others. It now seems that Bell was sometimes too quick to designate a passage as "discarded" material or a "scrap" that got into the Ḳur'ān by mistake; and he seems to have failed to recognise some literary forms, e.g. the *wa-mā adrāka* formula (see 7.a below). But it must be remembered that Bell was a pioneer in this field, and that he attempted to locate all possible breaks in the text, acknowledging that many of his suggestions were uncertain or tentative and that some would be proved untenable by later research. On the whole, his dating and reconstructions have been supported by later studies, e.g. K. Wagtendonk, *Fasting in the Koran* (Leiden 1968), 47-81, on II, 183 ff.; see also Welch, *Allah and other supernatural beings* (see *Bibl.*) on the emergence of the doctrine of *tawḥīd*, and idem, in W. M. Watt and A. T. Welch, *Der Islam*, i (Stuttgart 1980), 264-71, 300-3, on the origin and early development of the *ṣalāt* and *zakāt*. Careful studies of a number of passages and topics are needed before a final judgment of Bell's work can be made.

There is room for disagreement on specifics, but there can now be little doubt that Schwally was correct in concluding that passages from different dates were put together to form the present *sūras*, that written documents were involved, and that this revision was done under Muḥammad's supervision (*Gesch. des Qor.*, i, 45 ff., ii, 1 f., 77, etc.). Furthermore, Bell seems to have been right in his main conclusions, which went beyond Schwally's position. Most *sūras* have significant amounts of material from different dates, and nearly all of the longer *sūras* with Meccan material were revised or expanded in Medina, so that we can no longer speak of "middle Meccan" or "late Meccan" *sūras*. We can speak with more confidence of "early Meccan" *sūras*, although we cannot be certain as to which ones belong to this group. And we can speak of "Medinan *sūras*", i.e. those that are made up completely of Medinan material (of various dates). It is not possible to put the *sūras* as wholes in chronological order, or to determine the exact order of the passages on any major teaching—the creation, God and other supernatural beings, the nature and destiny of man, etc. This does not mean that nothing can be said on the development of ideas in the Ḳur'ān. On the major teachings and other subjects on which the Ḳur'ān has much to say, it is possible to reconstruct the sequence of the main stages of development, and sometimes the approximate dates of these stages. It now seems certain that the most important single turning point in the development of the Muslim scripture was not the Hidjra, dividing the Ḳur'ān into "Meccan" and "Medinan" *sūras*, but a series of events surrounding the battle of Badr and Muḥammad's so-called "break with the Jews". Late Meccan and very early Medinan material is difficult to distinguish; there are many passages that could just as well date from Muḥam-

mad's last year in Mecca or his first in Medina.

6. Language and Style

a. Language of the Ḳur'ān. Most mediaeval Muslim scholars believed that the Ḳur'ān was in the spoken language of the Prophet, the dialect of the Ḳuraysh, which was also the language of the "Classical Arabic" poetry of Muḥammad's day. It was assumed that the Ḳuraysh and the classical poets retained the pure language of the Bedouins (*al-aʿrāb*). Support for this view, more a theological doctrine than a linguistic theory, was found in the Ḳur'ān in the statements that the revelation was in "clear Arabic speech" (*lisān ʿarabī mubīn*) (XVI, 103, XXVI, 195; cf. XLI, 44), which came to be interpreted as "pure Arabic". This Ḳuraysh dialect theory was attacked by Karl Vollers in a series of well-documented articles beginning in 1894 and culminating in his classic *Volkssprache und Schriftsprache im alten Arabien* (1906), in which he argues that the Ḳur'ān was first recited by Muḥammad in a colloquial Arabic without case-endings (*iʿrāb*) (thus distinguishing it from the Classical Arabic of the poets), that the language of the Ḳur'ān as we now have it was a fabrication of later philologists who attempted to put the revelations into Classical Arabic, and that the original language of the Ḳur'ān survives only in a few orthographic peculiarities (e.g. the omission of the *alif* in some words) and in the non-canonical readings. Voller's theory gave rise to much discussion of the language of the Ḳur'ān, but it found little support outside of Germany, except for several articles by Paul Kahle (e.g. *The Arabic readers of the Koran*, in *JNES*, viii [1949], 65-71), who presented evidence to show that at least during the 2nd century the Ḳur'ān was indeed recited without *iʿrāb*, a characteristic of colloquial Arabic. Kahle's arguments also failed to convince others, and the earlier refutations of Vollers' thesis given in a lengthy review by R. Geyer (*Göttinger gelehrte Anzeigen*, clxxi [1909], 10-56) and by Nöldeke (*Neue Beiträge*, 1-5) have been generally accepted (on the views of Vollers, Kahle, Geyer, and Nöldeke, see Zwettler, *Oral tradition*, 112-30). Nöldeke (*loc. cit.*) and Schwally (*Gesch. des Qor.*, ii, 59) argued that the language of the Ḳur'ān was not the spoken language of any tribe, but was a somewhat artificial *Hochsprache* that was understood throughout the Ḥidjāz. On the other side, it has come to be generally agreed that the Classical Arabic of the poetry of Muḥammad's time was not the spoken language of the poets or the dialect of any one tribe, but a literary language that was understood by all the tribes. This language has come to be called the "poetic *koinē*" or the *ʿarabiyya*. In the late 1940s three European writers, H. Fleisch, R. Blachère, and C. Rabin, reached the conclusion, apparently independently, that the language of the Ḳur'ān, far from being the spoken dialect of the Ḳuraysh or a *Hochsprache* of the entire Ḥidjāz, was simply the "poetic *koinē*" of the Classical Arabic poetry, with some adaptation to the Meccan speech, e.g. the omission of the *hamza* (for references and discussion, see C. Rabin, *The beginnings of Classical Arabic*, in *Stud. Isl.*, iv [1955]. 19-37, and Zwettler, *Oral tradition*, 130-72). This view has been accepted by most Western Arabists. One notable exception is J. Wansbrough (*Quranic studies*, 85-118) who rejects the *koinē* or *ʿarabiyya* concept, without offering any clear alternative. He asserts that very little can be known about the text of the Ḳur'ān or about Classical Arabic prior to the "literary stabilisation" of both in the 3rd/9th century. There is nothing in the Ḳur'ānic usage of *ʿarabī* and its cognate forms to support the suggestion of J. Fück (*ʿArabīya*, Berlin 1950, 1-5) that *ʿarabī* in the expression "clear Arabic speech" refers to the *ʿarabiyya*, the literary language of the Bedouins.

b. Foreign vocabulary. The earliest exegetes recognised and discussed freely a large number of non-Arabic words in the Ḳur'ān, and Tradition credits Ibn ʿAbbās and his school with having a special interest in seeking their origin and meaning. Then when the dogma of the eternity and perfection of the Ḳur'ān was elaborated (see 8. below) some jurists and theologians, such as al-Shāfiʿī (d. 205/820), came to believe that it was in pure Arabic and thus denied that any of its vocabulary was borrowed from other languages. But prominent philologists such as Abū ʿUbayd (d. 224/838) continued to argue that the Ḳur'ān contained foreign words. Al-Ṭabarī (d. 311/923) and others, attempting to reconcile the two views, asserted that the alleged foreign elements in the Ḳur'ān were simply words that Arabic and other languages had in common. ʿAbd al-Raḥmān al-Thaʿālibī (d. 873/1468) explained in his *Kitāb al-Djawāhir* (Algiers 1905, i, 17) that these words came into Arabic through the ancient Arabs' contacts with other languages in foreign travel and commercial affairs, but that they had been thoroughly Arabised by the time of the Prophet. Other writers seem to have freed themselves altogether from religious considerations, e.g. al-Suyūṭī (d. 911/1505), who gave special attention to foreign loan-words in the Ḳur'ān. In his *Itḳān* he has a chapter on words that are not in the language of the Ḥidjāz (i, 133-5) and another on words that are not in the language of the Arabs (135-41). In a separate treatise, the *Mutawakkilī* (ed. and tr. Wm. Y. Bell, Cairo 1924), he classifies a large number of terms as words borrowed from Ethiopic, Persian, Greek, Indian, Syriac, Hebrew, Nabataean, Coptic, Turkish, Negro, and Berber (for a discussion of these, see *Foreign vocab.*, 12-32). Jeffery indicates surprise that al-Suyūṭī was able to gather from the older authorities so many words "whose Arabic origin to us is obvious, but which they regarded as foreign", and he says that some of these are simply rare Arabic words, while others are variant forms used in the Ḳur'ān to establish the rhyme. He then concludes that the foreign elements in the Ḳur'ānic vocabulary are of three distant types: (1) words that are entirely non-Arabic and cannot possibly be traced to Arabic roots, e.g. *istabraḳ* (silk brocade), *zandjabīl* (ginger), *firdaws* (paradise); (2) Semitic words that, although their triliteral root is found in Arabic, occur in the Ḳur'ān in a sense used in another language but not in Arabic, e.g. *fāṭir* (creator), *ṣawāmiʿ* (cloisters), *darasa* (to study [the scriptures] earnestly); and (3) words that are genuinely Arabic and commonly used, but are used in the Ḳur'ān with technical or theological meanings influenced by other languages, e.g. *nūr*, "light", used in the sense of "religion"; *rūḥ*, "spirit", and especially *rūḥ al-ḳudus*, "the spirit of holiness"; and *kalima*, "a word", when used of Jesus (*ibid.*, 39 f.). Jeffery then discusses about 275 words, other than proper names, that have been regarded as foreign, and he summarises the views of earlier European scholars as to their origin, and sometimes gives his own views. For the Arabic and European literature on this topic, see *ibid.*, xi-xix, to which should be added two studies by L. Kopf, *Religious influences on medieval Arabic philology*, in *Stud. Isl.*, v (1956), esp. 40-5, and *The treatment of foreign words in mediaeval Arabic lexicology*, in *Scripta Hierosolymitana*, ix (1961), 191-205 (both reprinted

in Kopf, *Studies in Arabic and Hebrew lexicography*, Jerusalem 1976) and other works cited by him.

c. Rhymes and refrains. A distinctive feature of Ḳurʾānic style, closely related to its oral nature and liturgical function, is that it is all rhymed or assonanced prose. There is no attempt to produce the strict rhyme of Arabic poetry (see Zwettler, *Oral tradition*, 103-10). Some short *sūras*, and segments of longer *sūras*, do have a fairly consistent rhyme if the short inflectional vowels at the ends of the verses are disregarded. For instance, the three verses of CVIII end in *-ar*, the four verses of CXII end in *-ad*, CV has *-īl* except for the last verse with *-ūl*, CXI has *-ab* except for the last verse with *-ad*, and the 55 verses of LIV end in *r* (or *rr*) preceded by a short vowel. But in most *sūras* there is a loose rhyme or assonance formed by common grammatical endings and word forms. By far the most frequent assonance in the Ḳurʾān is *-ūn/-īn* (considered interchangeable), which is formed by the plural endings of nouns and verbs. And even this form, which occurs frequently in Arabic, is often varied with words ending with one of these vowels but a different consonant. The feminine singular endings *-at* and *-hā* occur in CIX, XLVII, XCI and XCIX; the dual ending *-ān* occurs in LV; the accusative ending *-an* occurs in XVIII, LXXII, and C; and the form *-ā(l)*, a long *a* followed by a variable consonant, occurs in parts of longer *sūras* such as II, III, XIV, XXXVIII and XL. On the various rhyme forms in the Ḳurʾān (technically known as *faʿīl, fiʿʿāl, fāʿilat, ifʿāl, tafʿīl*, etc.), see *Itḳān*, ii, 96-105, and F. R. Müller, *Untersuchungen zur Reimprosa im Koran* (Bonn 1969), who presents a systematic compilation of the evidence that peculiarities in Ḳurʾānic style and vocabulary were brought about by the imposition of rhyme.

The whole of the Ḳurʾān is often said to be in *sad̲j̲ʿ*, the rhythmic, rhymed utterance of the *kāhin* (soothsayer) [*q.v.*], which, like the Ḳurʾān, does not have a fixed metre or proper rhyme and is thus distinct from both poetry and prose. But those who have insisted that the Ḳurʾān is not in *sad̲j̲ʿ* seem on the whole to be on sounder ground (see *Gesch. des Qor.*, i, 36 ff.; Blachère, *Litt.*, 212; Zwettler, *Oral tradition*, 157 ff.). Some of the shorter *sūras* do have short, rhythmic, rhymed verses of the *sad̲j̲ʿ* type, often beginning with oaths, e.g. XC to XCIII (see 7.a below); and parts of a few somewhat longer *sūras*, e.g. the beginning of LXXV and LXXXII-LXXXV can be described as being "*sad̲j̲ʿ*-like". But most *sūras* have longer, prosaic verses that are simply made to fit a loose rhyme or assonance pattern. In some a distinctive, fairly consistent rhyme is formed by words that are integral to a context and its meaning, giving the impression of being carefully constructed compositions, e.g. XVIII-XX. But in others, especially some of the *sūras* that are completely Medinan, the rhyme is formed by set formulas that are attached loosely to the ends of the verses, often with little or no connection of thought with the contexts. For instance, in II, the longest *sūra* in the Ḳurʾān, the rhyme in about three-fourths of the 286 verses is formed by divine epithets, aphorisms, and other formulas that often have little relevance for the meaning of the narrative. In verses 127-268 double divine epithets occur over 30 times, e.g. God is *samīʿ ʿalīm* (Hearer, Knower) occurs seven times; *ʿazīz ḥakīm* (Mighty, Wise), six times; *g̲h̲afūr raḥīm* (Forgiving, Compassionate), six times, etc. Theological aphorisms occur even more often, and some are repeated several times: "God is not heedless of the things you do", in verses 74, 140, 144, 149, etc.; "God sees the things you do", in 110, 233, 237, 265, etc.; "God has knowledge of everything", in 29, 231, 282; and "God is powerful over everything", in 20, 106, 259 and 284, etc.

A special type of rhyme-formula that occurs in a number of *sūras* is the refrain, i.e. an entire verse or more repeated verbatim at more or less regular intervals. The most striking example is the rhetorical question, "Then which of the benefits of your Lord will you two deny?", which occurs as LV, 13, 16, 18 and 21 and then almost every other verse to the end of the *sūra* in verse 78. A similar refrain, "Woe is that day to those who deny it!", occurs in LXXVII, 15, 19, 24, 28, 34, 37, 40, 45, 47 and 49. In both of these cases the refrain has little connection with the meaning of the other verses, and it is difficult to tell whether the latter should be read as an introduction (see Bell, *Trans.*, 627 f.) or a conclusion (e.g., Arberry trans., ii, 318 f.) to the ten segments ranging in length from two to five verses. Each of the seven punishment-stories in XXVI ends with the two verses, "Lo, in that is a sign, but most of them have not believed" and "But, lo, thy Lord is the Sublime, the Compassionate", which appear to be separate refrains, the latter being later. Four punishment-stories in LIV end with "We have made the Ḳurʾān as the Reminder (*d̲h̲ikr*), but is there anyone who takes heed?", and the first three also have what appears to be an earlier refrain, "Of what nature, then, was My punishment and My warning?" Similar formulas occur frequently in the Ḳurʾān, but usually not as refrains. On internal rhymes and the possibility that there are strophes within the Ḳurʾān, see Bell-Watt, 70-5.

d. Schematic form and multiple accounts. The last two examples of refrains occur in stories that also share another characteristic of Ḳurʾānic style, schematic form, i.e. the repetition of certain verses, or formulas that are woven into the narrative in a regular pattern in different stories presented together as a group. A good example of one type of schematic form occurs in XXVI, where five punishment-stories have the same five-verse introduction, as well as the refrains mentioned above and other repeated verses. The introduction of the first story reads: "The people of Noah denied the envoys. / When their brother Noah said to them: 'Will you not show piety? / Lo, I am to you a faithful messenger. / So show piety towards God, and obey me. / I ask you for no reward for it; my reward rests only upon the Lord of the worlds' ". The only difference in the five-verse introductions of the other four accounts is the name of the people (the tribes of ʿĀd, T̲h̲amūd, etc.) and the prophet (Hūd, Ṣāliḥ, Lot, etc.). Another type of schematic form occurs in the Sūra VII versions of the same five punishment-stories, where about two-thirds of the Noah story is repeated in the Hūd story (a smaller percentage is repeated in the others), but the repeated parts are interspersed with statements, phrases, and individual words that are distinctive to each story. To show the first stage in the development of this group of schematic accounts, the Noah story is given here with the elements that also occur in the Hūd story put in italics: "We sent Noah to his people, and *he said 'O my people, serve God. There is no god for you other than He.* Verily I fear for you the punishment of a mighty day'. *Said the nobility of his people: 'Verily we think you are in* manifest error'. *He said 'O my people, there is no* error *in me; I am but a messenger from the Lord of the worlds. I deliver to you the messages of my Lord, and* give you *sincere* advice; I have knowledge from

God which you have not. *Does it astonish you that a reminder from your Lord should come to you upon a man from among yourselves, in order that he may warn* you and that you may show piety? Perhaps mercy will be shown you'. But they denied him; *so We rescued him and those with him* in the ark, and We drowned *those who denied Our signs*. Verily they were a blind people." Part of the Noah story and other parts of the Hūd story are then repeated in the Ṣāliḥ, Lot, and Shuʿayb stories. Other groups of parallel accounts in the Ḳurʿān have one of these two types of schematic form. The extent of the repetition in these parallel accounts has important implications for understanding their nature and purpose, e.g. they are not intended as historical accounts.

These groups of punishment-stories also illustrate another feature of the Ḳur'ān: the complex development of its multiple accounts and their changing relationships with other accounts. Many stories are repeated in different versions in two or more *sūras*, and these multiple accounts of the same story differ not only in length and details, but also in their purpose and their relationship to other stories. For instance, different versions of the punishment-stories or brief references to them occur in 16 different *sūras*. Longer versions of the Noah, Hūd, Ṣāliḥ, and Lot stories occur in LIV, XXVI, VII and XI; the first three also occur in XXV, LI and LIII; they are referred to in IX, XIV and XXIX; and they occur separately in still other *sūras*. There are two different Lot punishment stories: the first occurs in LIV, XXVI and VII (mentioned above) and also in XXVII and XXXVII; the second, involving the visit of celestial messengers, occurs in XI and XV. Then in XXIX both appear together separated by a brief version of an Abraham story, which also occurs in earlier, longer versions in LI, XV and XI. On the punishment-stories, see 7.d below, Bell-Watt, 127-35, and bibliography given there. A similar development can be seen in the creation stories: the story of (the fallen angel?) Iblīs occurs as a complete, independent story in XV and XXXVIII and is repeated in shorter versions in XVII and XVIII; then it occurs with an account of the temptation and fall of Adam in VII, XX, and finally II. In the last two the Iblīs story is reduced to a single verse, and in II these two story segments are preceded by the only Ḳur'ānic version of a third creation story, about God consulting the angels before creating man. A third example, of a somewhat different type, involves the two parallel accounts of the miraculous births and childhood of John (the Baptist) and Jesus in XIX, 2-34 and III, 38-51. In XIX the stories of John and Jesus are the first two in a series of separate accounts; in III they are woven together as part of a longer account that begins with the birth and early life of Mary. Among the significant patterns seen in the development of these and other multiple accounts in the Ḳur'ān is that the earlier groups of stories tend to be ahistorical in their arrangement, e.g. in XXVI we have Moses, Abraham, Noah, Hūd, Ṣāliḥ, Lot, and then Shuʿayb (who came to be identified with Jethro, the father-in-law of Moses), while the later versions are put in "historical order", e.g. in XI we have Noah, Hūd, Ṣāliḥ, Abraham, Lot, Shuʿayb, and Moses. The ahistorical groups are typical of what Bell calls the Ḳur'ān period, while the "historical" ones reflect the Book period, where we see stories combined to form longer multi-episodic narratives that constitute the beginning of a Muslim sacred history going back to the creation.

7. Literary forms and Major Themes

The nature and arrangement of the Ḳur'ān make it difficult to classify its literary forms or systematise its main themes. Any attempt to classify the parts of the Ḳur'ān according to the standard literary types—myth, legend, saga, short story, parable, etc.—very soon founders. A few examples can be given for each of these types, but altogether they comprise a very small percentage of the text. Also, they have been adapted so much to conform to the style and message of the Ḳur'ān that they have little significance as distinct types. Bell has argued that since the Ḳur'ān disclaims that Muḥammad was a poet and since his function as a prophet was to convey messages from God to his contemporaries, we should seek "didactic rather than poetic or artistic forms" (Bell-Watt, 75). This is true, except that only parts of the Ḳur'ān can be described as "didactic" in purpose. Other parts are hortatory, rhetorical, legislative, etc., and some parts addressed to Muḥammad and his family can only be described as personal (Bell questioned whether some of these, e.g. CXI and parts of LXVI, were "intended for publication"). Thus it seems best to discuss the literary forms of the Ḳur'ān in terms of its own distinctive types of material. What follows is not a complete, systematic classification, but brief descriptions of the main literary forms found in the Ḳur'ān, which at the same time provide summaries of some of its major themes.

a. Oaths and related forms. An interesting variety of oaths and related forms occur in the shorter *sūras*, usually at the beginning. The assumption that most (but certainly not all) of these oaths are among the earliest parts of the Ḳur'ān seems to be justified. Some oaths that are cryptic and difficult to interpret or translate are generally thought to be typical of the ancient Arabian soothsayer utterances. In other cases, the oath form has simply been used to convey Ḳur'ānic (and sometimes Biblical) themes. The oath form that occurs most often consists of one or more verses beginning with *wa*, "By", followed by a noun in the genitive case, and ending with one or more verses beginning with an asseverative particle, usually *inna* but sometimes *ḳad*, both meaning "verily, surely". A fairly typical example occurs at the beginning of XCII: "By the night when it veils, / By the day when it shines out in splendour, / By what created the male and the female, / Verily your course is diverse" (Bell tr.). Here the first three verses begin with *wa*, and the assertion closing the oath begins with *inna*. Sometimes the intervening verses between the opening *wa* verse and the closing *inna* begin with *fa-* instead of *wa*, as in XXXVII, 1-4: "By those who dress the ranks, / By those who scare by shouting, / By those who recite the warning, / Verily your God is One" (Bell). The *wa* and the *fa-* in the intervening verses can be interpreted as conjunctions (see, e.g., Arberry's tr. of these two passages), but this seems to weaken the impact of the oath. Some *wa*/*inna* oaths have only two elements (e.g. XXXVI, 2 ff., CIII, 1 ff.), while others have several, including additional *inna* assertions, e.g. LI begins with a six-verse oath, the verses beginning with *wa*, *fa-*, *fa-*, *fa-*, *inna-mā*, *wa-inna*; and C has *wa*, *fa-*, *fa-*, *fa-*, *fa-*, *inna*, *wa-inna*, *wa-inna* (other variations occur in XLIII, XLIV, LII, LIII, etc.). A fairly typical example of a *wa*/*ḳad* oath occurs at the beginning of XCV: "By the fig and the olive, / By Mount Sinai, / By this land secure, / Surely We have created man most beautifully erect" (Bell)—with *wa*, *wa*, *wa*, *la-ḳad*. The ten-verse oath at the beginning

of XCI, the longest in the Ḳur'ān is also of this type, with *wa, wa, wa, wa, wa, wa, wa, fa-, ḳad, wa-ḳad* (the *wa* before the asseverative particles in these examples is the conjunction "and"). Other types of oaths also occur in the Ḳur'ān, e.g. the stronger *lā uḳsimu bi-*, "No! I swear by", oath, at the beginning of LXXV: "No! I swear by the Day of Resurrection", also in LXXV, 2, XC, 1, and within other *sūras*.

Related to the Ḳur'ānic oaths are several other formulaic usages that are typical of soothsayer or prophetic utterances. One is the *idhā*, "When", passage, which has the same force, if not the same meaning, as an oath. A good example occurs at the beginning of LXXXII: "When the heaven shall be rent, / When the stars shall be scattered, / When the seas shall be made to boil up, / When the graves shall be ransacked, / A soul shall know what it has sent forward, and what kept back" (Bell). The longest "when" passage is LXXXI, 1-14, culminating in "A soul shall know what it has presented". See also LVI, 1 ff., LXXXIV, 1 ff., XCIX, etc. Other passages, especially at the beginning of some of the other shorter *sūras*, feature rhetorical questions, such as "Have you seen him who denies the Judgment?" (CVII, 1 ff.; cf. XCIV, CV), or a modified type of curse or threat, such as "Woe to every maligner, scoffer, / Who gathers wealth and counts it over . . ." (CIV, 1 ff.; cf. LXXXIII, 1 ff., 10 ff., CVII, 4 ff., etc. and a different type in CXI). This last example of a "Woe" (*wayl*) passage continues with another distinctive Ḳur'ānic form, consisting of at least three verses the second of which is the rhetorical question *wa-mā adrāka mā* ———?, "And what has let you know what ——— is?"; see XCVII, 1 ff., CI, 1 ff., CIV, 4 ff., and LXXXVI, 1 ff., which begins with an oath.

The fact that the Ḳur'ān itself affirms that Muḥammad was accused of being a soothsayer (*kāhin*) suggests that his contemporaries saw a similarity between what he recited and what they heard from the soothsayers. Bell identified five passages in the Ḳur'ān as having "*kāhin*-form": XXXVII, 1-4, LI, 1-6, and C, 1-6, mentioned above, and also LXXVII, 1-7, and LXXIX, 1-14. But most of the Ḳur'ānic oaths and related forms are more in the nature of prophetic than soothsayer utterances.

b. Sign-passages. Meccan and early Medinan parts of the Ḳur'ān often speak of certain phenomena of nature and human life as "signs" (*āyāt*) of God's omnipotence and benevolence towards man, calling for gratitude and worship of Him alone. Most often mentioned are the creation of the heavens and the earth, the creation or procreation of man, the shining of the sun, moon, and stars, the alteration of day and night, the sending of the rain, and the permanence and stability of nature. Thunder, lightning, fire, and other natural phenomena are also mentioned, as are human understanding and relationships, the variety of languages and colours, hearing, sight, etc. The "sign-passages" treating these themes have no distinctive form, but are recognised by their content. An example of an early sign-passage is seen in LXXX, 24-32: "Let man look at his food; / Lo, We have poured out water in showers, / Then have broken up the earth in cracks, / And have caused to sprout up in it grain, / And grapes and green shoots, / And olives and palms, / And orchards luxuriant, / And fruits and herbage ——— / A provision for you and for your flocks" (Bell). See also XXIII, 17-22, 78-80, LXXVIII, 6-16. An example of a late, more structured sign-passage is XXX, 20-5, which begins: "And of His signs is that He created you of dust; then lo, you are mortals, all scattered abroad. / And of His signs is that He created for you of your own species spouses that you may dwell with them, and has set love and mercy between you. Surely in that are signs (*āyāt*) for those who consider. / And of His signs is the creation of the heavens and the earth and the variety of your tongues and hues. Surely in that are signs for all living beings". The next three verses also begin with "And of His signs is . . .", and the first two of these end with "Surely in that are signs for those who ———" ("hear" in verse 23; "understand" in 24). A similar sign-passage in XVI, 10-18, begins: "It is He who sends down to you out of heaven water of which you have to drink, . . . / And thereby He brings forth for you crops, and olives, and palms, and vines, and all manner of fruit. Surely in that is a sign (*āya*) for those who reflect". And a similar formula closes the next two verses. These last two examples are typical of most sign-passages in consisting of separate sign-verses grouped together in no particular order; but they are somewhat unusual in having set introductory phrases and concluding formulas (cf. VI, 97-9, XIII, 2-4, XVI, 65, 67, 69, 79, XXXVI, 33, 37, 41, XLI, 37, 39, XLV, 3-5). The singular, *āya*, is used occasionally in sign-passages, either with one verse treating one sign (as in XVI, 11, quoted above; also XVI, 13, 65, 67, etc.), or with two or more verses treating a single sign (XVI, 10 f., 68 f., etc.). The plural, *āyāt*, occurs much more often, usually with two or more signs mentioned in a single verse (as in XXX, 20-2, quoted above; also X, 6, 67, XIII, 3 f., XXX, 23 f., etc.). This analysis provides no clue as to how *āya* came to mean "verse". In many sign-passages that are otherwise like those cited above the term "sign" does not occur (e.g. VI, 141 f., XIII, 12-15, XVI, 3-8, 80 f., XXX, 48-51, XXXII, 4-9). On the other hand, the term "sign" occurs many times in contexts that are not "sign-passages". See 1.b above and Bell-Watt, 121-7.

c. Say-passages. Scattered throughout the Ḳur'ān are a number of passages in which the main element is a short statement or question introduced by the imperative verb, "Say", usually the singular, *ḳul*, but occasionally the plural, *ḳūlū*. Most say-passages, i.e. the immediate contexts in which the say-statements occur, have two main parts: (1) a statement or question indicating the setting, and (2) the say-statement, which is sometimes followed by a comment or two on 1 or 2. The setting statement occasionally involves Muḥammad's followers, but usually is a report of something said or done by the unbelievers. One frequently occurring form is "They say: . . . Say: . . .", e.g. X, 20: "They say: 'If only a sign had been sent down to him from his Lord'. Say: 'The unseen belongs to God' " (see also II, 80, 91, 93, 111, 135, etc.). Sometimes the setting statement has two or more parts, and the say-statement either has two or more parts or is followed by one or more comments. A good example of this more complex form is seen in X, 18: "They serve apart from God what neither injures them nor profits them, and they say: 'These are our intercessors with God'. Say: 'Will you inform God of what He knows not either in the heavens or in the earth?' Glory be to Him, and exalted be He far from what they associate with Him!" Here the setting statement has two parts, involving something the unbelievers do and something they say; and the say-statement, a rhetorical question, is followed by a praise formula (cf. II, 80-2). In X, 68 f. a praise formula, "Glory be to Him", and

a comment on the setting statement come between the "They say" and "Say" elements. Another common form is "They will ask you [Muḥammad] ... Say: ...", e.g. II, 220: "They will ask you about the orphans. Say: 'To set right their affairs is good'." Sometimes one *ḳul* introduces a question, and a second one gives an answer, e.g. VI, 12: "Say: 'To whom belongs what is in the heavens and the earth?' Say: 'To God ...'" (also VI, 63 f., 71, etc.). Some say-statements are formulas that can be classified as maxims or slogans, e.g. "To God belongs the East and the West" (II, 142), "The guidance of God is the guidance" (II, 120, III, 73, VI, 71), "God guides to the truth" (X, 35), "Those who invent falsehood about God will not prosper" (X, 69), and "Intercession belongs to God alone" (XXXIX, 44), and some of these (e.g. the first two mentioned here) occur elsewhere in the Ḳur'ān. On maxims and slogans, see Bell-Watt, 75-7. Others are credal statements, e.g. II, 136: "Say (*ḳūlū*): "We believe in God and what has been revealed to us and what was revealed to Abraham ... and what Moses and Jesus received ... and to Him we have surrendered'" (cf. XXIX, 46). Still others are prayers, e.g. III, 26 f.: "Say (*ḳul*): 'O God, owner of sovereignty, Thou givest sovereignty to whom Thou wilt, and seizest sovereignty from whom Thou wilt ... Thou bringest forth the living from the dead, and the dead from the living; Thou providest for whom Thou wilt without reckoning'." This last example is unlike the say-passages described above, since it is not preceded by a setting statement. Thus it is best classified with a second group of say-statements, some of which are in the first person singular and seem to be spoken by Muḥammad, e.g. a group of four in LXXII, 20-8, beginning: "Say: 'I call only upon my Lord, and I do not associate with Him anyone'. / Say: 'Surely I possess no power over you, either for hurt or for rectitude'" (Arberry); see also XXXIV, 36, 39, 46-50, CIX, etc. Other isolated say-statements occur in LXVII, 23 f., 28-30, CXII-XIV, etc., the first of these being two short say-statements in the form of the sign-passages. Say-passages and separate say-statements are often grouped together, e.g. VI, 11-19, 56-8, 63-6, 161-4, and the groups mentioned above.

d. Narratives. If the term "narrative" is taken in the broader sense to include any story or description of actual or fictional events, then many parts of the Ḳur'ān can be classified as narratives. There is virtually no historical narrative, even though as mentioned above (see 5.a) there are many references and allusions to historical events. Most Ḳur'ānic narratives are versions of traditional stories found in other Near Eastern cultures, which have been adapted to conform to the world-view and teachings of the Ḳur'ān. Several versions of ancient Near Eastern myths and many mythic motifs occur. The creation of the world in six days and the Throne from which the universe is controlled are mentioned several times, as in VII, 54: "Verily your Lord is God, who created the heavens and the earth in six days, then seated Himself upon the Throne causing the night to cover the day" and the well-known "Throne verse", II, 255: "God, there is no god but He, the Living, the Eternal. Slumber overtakes Him not nor sleep .... His Throne extends over the heavens and the earth, and He is never weary of preserving them" (cf. X, 3, XXV, 59, XXXII, 4, and on the Throne, IX, 129, XIII, 2, XX, 5, XXI, 22, etc.). But there is no six-day creation story, and no account of what was created on each day (a partial explanation is given in XLI, 9-12; see Paret, *Kommentar*, 433). The seven heavens are mentioned (XVII, 44, XXIII, 86, etc.), as is the Trumpet that signals the Last Day (VI, 73, XVIII, 99, XX, 102, etc.), but there are no stories or complete descriptions. Brief accounts of the fall of Iblīs (Lucifer?), the fall of man, and the naming of the animals (not so specified) do occur (II, 30-9, VII, 11-25, XV, 28-44, XVII, 61-5, XX, 115-26, etc.). There are several versions of the ancient Near Eastern shooting-star myth (XV, 16-18, XXXVII, 6-10, etc.), and several accounts of Noah and the Flood (XI, 36-48, XXV, 37, XXIX, 14 f., LIV, 9-17). which however is not a world-wide deluge.

The prophet stories, some of which are also punishment-stories, make up the largest category of Ḳur'ānic narratives. The longest single story, which could be classified as a "short story", is that of Joseph, taking up nearly all 111 verses of Sūra XII. It follows the Biblical account more closely than do most Ḳur'ānic stories, and it shows evidence of revision, including what appear to be two introductions. There are two parallel accounts of the births of John (the Baptist) and Jesus, III, 33-51 and XIX, 1-36, which have some significant differences in details, reflecting the development of ideas in the Ḳur'ān. Both accounts have elements from apocryphal Christian writings and oral tradition, e.g. Mary's stay in a convent or temple until the time of the conception of Jesus, and his miracles of speaking from the cradle and forming a bird out of clay that became alive when he breathed on it. Abraham, Moses, and Solomon have major roles in Ḳur'ānic narrative in that there are several different stories about each, as well as several versions of some stories. Also, there are non-Biblical stories about each of these three: Abraham destroying the idols of his people (XXI, 51-72, etc.) and building the Kaʿba in Mecca (II, 122-9, etc.), Moses and his servant on a journey (XVIII, 60-82), and Solomon building the Temple with the jinn and demons (XXXIV, 12-14, XXXVIII, 36-40) and dealing with his army of jinn, men, and birds (XXVII, 15-21). There are also stories about Adam and Noah (mentioned above) and Lot, Ishmael, David, Elijah, Jonah, and Job; and several others are mentioned, including Isaac, Jacob, Elisha, Aaron (in some Moses stories), Saul, Ezra, and Haman, who however is an associate of the Pharaoh. The heroes of these stories are generally referred to as "messengers" (*rusul*, sing. *rasūl*), but sometimes as "envoys" (*mursalūn*, sing. *mursal*) or "prophets" (*nabiyyūn*, sing. *nabī*). The latter seems to occur only in Medinan passages and is applied specifically only to Muḥammad and certain "messengers" mentioned above from the Hebrew and Christian traditions, while the other two terms occur earlier and have broader usages. But in later parts of the Ḳur'ān *rasūl* and *nabī* are synonymous, although not exactly interchangeable. Note, for instance, the consistent usage, "God and His Messenger", but "the Prophet", for Muḥammad throughout XXXIII. This no doubt explains why *rusul* occurs in the credal statements in II, 285 and IV, 136, which require belief in "His angels, His books, and His messengers (*rusulihi*)", while *al-nabiyyīn* occurs in II, 177, which requires belief in "the angels, the Book, and the prophets". Among the non-Biblical characters, the most prominent are Hūd, Ṣāliḥ, and S͟huʿayb (see below), but there are also stories about Luḳmān, an Arabian sage (XXXI, 12-19), and D͟hu 'l-Ḳarnayn, generally regarded as Alexander the Great (XVIII, 83-98), and brief references to D͟hu 'l-Kifl and Idrīs (XIX, 56, XXI, 85, XXXVIII, 48), sometimes said to be Elijah and Enoch. The story of the Men of the Cave (XVIII,

10-26) is usually identified with the legend of the Seven Sleepers of Ephesus. On these stories, see the commentaries and Paret, *Kommentar*, *ad locc.*

Several forms are used indiscriminately for introducing prophet stories and some of the stories about non-Biblical characters, e.g. "Recite to them the story (*naba'*) of ..." (V, 27, VII, 175, X, 71, XXVI, 69; cf. XVIII, 27, XXIX, 45); "We recite to you [Muḥammad] part of the story (*naba'*) of ..." (XXVIII, 3; cf. III, 58); "Has there come to you the story (*ḥadīth*) of ... ?" (XX, 9, LI, 24, LXXIX, 15, etc.); "Has there come to you the story (*naba'*) of ... ?" (IX, 70, XIV, 9, XXXVIII, 21, etc.); and "Mention in the Book ..." (XIX, 16, 41, 51, 54, 56). All of these are addressed to Muḥammad. Far more frequent are two simple forms, *idh ḳāla*, "(Recall) when ——— said", said of Moses (V, 20, XIV, 6, XVIII, 60, XXVII, 7, etc.), Abraham (VI, 74, XIV, 35, etc.), Joseph (XII, 4), God (V, 110, 116, XV, 28, XVII, 61, XVIII, 50, etc.), and others, and *wa-laḳad arsalnā*, "And We sent", said of Noah (XI, 25, XXIII, 23, XXIX, 14, etc.; cf. VII, 59), Moses (XI, 96, XIV, 5, etc.; cf. XXIII, 45), and others. Cf. *wa-laḳad ātaynā*, "And We gave" (e.g. "And We gave Moses the Book") in XVII, 101, XXI, 48, 51, XXXI, 12, XXXIV, 10, etc.

One special type of Ḳur'ānic narrative that made up a major part of the revelation during the Meccan years is the punishment-story, discussed above for its use of refrains and schematic form in some versions. Five punishment-stories stand out from the others, those of Noah, Hūd and the tribe of ʿĀd, Ṣāliḥ and the tribe of Thamūd, Lot, and Shuʿayb and the people of Midian. And two others are prominent in some *sūras*, the story of Moses and the drowning of Pharaoh's army, and the story of Arabham rejecting the idols of his people. These seven occur together in XXVI, 10-191, and are mentioned together in XXII, 42-4. Fairly complete versions of some of these stories also occur in VII, 59-93 (all but Abraham and Moses), XI, 25-95 (all but Moses), XXXVII, 75-148 (only the Biblical ones), and LIV, 9-42 (all but Abraham and Shuʿayb). Shorter versions of some of these seven and references to these and some others (Jonah, the people of Sheba, the men of al-Rass, and the people of Tubbaʿ) occur in IX, 70, XIV, 9, XXI, 48-77, XXIII, 23-48, XXV, 35-40, XXVII, 7-58, L, 12-14, LI, 24-46, LIII, 50-5, LXIX, 4-10, and LXXXIX, 6-14. The "men of al-Ḥidjr" in XV, 80-4, are probably the tribe of Thamūd; the "men of the Grove" (XV, 78 f., XXVI, 176-91, etc.) seem to be identical with the people of Midian [see MADYAN SHUʿAYB]; and "the subverted (cities)" (*al-mu'tafikāt*) are most likely Sodom and Gomorrah, the cities of Lot. Thus these three are apparently variations of three of the seven. Most Western scholars have accepted the view of A. Sprenger (*Leben*, i, 462) and J. Horovitz (*Koranische Untersuchungen*, 26-8) that the term *mathānī* in XV, 87 and XXXIX, 23 (see 1.b above) refers to the seven most prominent punishment-stories, since the first verse says "seven of the *mathānī* and the mighty *ḳur'ān*" have been sent down to Muḥammad by God, and the second describes the Book sent down to Muḥammad as having *mathānī* "at which the skins of those who fear their Lord do creep". See Paret, *Kommentar*, 279 f., and Bell-Watt, 134 f.

The Ḳur'ān also contains some parables, the longest and clearest one being the parable of the Blighted Garden in LXVIII, 17-33. Others include the parable of the man with two gardens (XVIII, 32-44), the good and corrupt trees (XIV, 24-7), and the unbelieving town (XXXVI, 13-32). Several other brief parables are little more than expanded similes, e.g. the fire at night in II, 17, the downpour in II, 19, the slave in XVI, 75, the dumb man in XVI, 76, the water and vegetation in XVIII, 45, the light of God in XXIV, 35, the master and his slaves in XXX, 28, and the slave with several masters in XXXIX, 29 (see Bell-Watt, 81). These parables have no standard form; some are introduced by the statement addressed to Muḥammad: "And coin for them a parable" (*wa 'ḍrib lahum mathalan*), e.g. XVIII, 32, 45, XXXVI, 13, others by the statement: "God has coined a parable" (*ḍaraba 'llāhu mathalan*), e.g. XIV, 24, XVI, 75, 76, 112, XXXIX, 29, LXVI, 10.

e. Regulations. The Ḳur'ān provides detailed regulations on some aspects of the conduct of the Muslim community, and general instructions on others. No complete code of conduct or list of required duties is presented; each issue is treated separately, usually in several different places. The main religious duties are introduced in stages, and there are inconsistencies in some of the requirements. What follows are some examples that illustrate the nature and form of the various Ḳur'ānic regulations, beginning with four that later became Pillars of Islam.

On the prayer ritual (*ṣalāt*): "Observe thou [Muḥammad] the Prayer (*aḳimi 'l-ṣalāt*) at the two ends of the day and the neighbouring parts of the night" (XI, 114; cf. XVII, 78 f.); "Remember the Prayers (*ṣalawāt*), including the middle Prayer, and stand [in worship] to God reverently" (II, 238); "so recite what is convenient of it [the Ḳur'ān], and observe the Prayer (*aḳimū 'l-ṣalāt*), and pay the Zakāt, and lend to God a good loan" (LXXIII, 20); "verily the Prayer has become for the believers a thing prescribed for stated times" (IV, 103). On almsgiving (*zakāt, ṣadaḳa*): "If you give alms (*ṣadaḳāt*) publicly it is well, but if you conceal it and give to the poor it is better for you" (II, 271); "Observe the Prayer, pay the *zakāt* (*ātū 'l-zakāt*), and obey the Messenger" (XXIV, 56); "The alms (*ṣadaḳāt*) are for the poor and the destitute, for the agents employed therein, for those whose hearts are to be won over, for the ransom of slaves, for the relief of debtors, for expenditure in the way of God, and for the follower of the way—an ordinance (*farīḍa*) from God" (IX, 60). On fasting (*ṣiyām, ṣawm*): "O believers, fasting is prescribed for you (*kutiba ʿalaykum*) as it was for those before you ... [during] the month of Ramaḍān ... It is allowable for you on the night of the fast to go in to your wives ... and eat and drink until so much of the dawn appears that a white thread may be distinguished from a black; then keep the fast completely until night" (II, 183-7). On the Pilgrimage (*ḥadjdj, ʿumra*): "Fulfil the pilgrimage (*ḥadjdj*) and the visitation (*ʿumra*) unto God. ... If anyone of you is sick or suffering from an injury to the head, then a compensation (*fidya*) by way of fasting or almsgiving (*ṣadaḳa*) or pious observance" (II, 196); "Ṣafā and Marwa are among the manifestations of God. ... It is no fault (*djunāḥ*) if anyone makes the circuit of them" (II, 158).

These four religious duties are required of all Muslims only in Medinan passages dating from around the time of the battle of Badr or later. The *ṣalāt* is mentioned in Meccan or early Medinan passages, but is required only of Muḥammad, with the imperative verb in the singular, *aḳimi 'l-ṣalāt* (XI, 114, XVII, 78, XXIX, 45, XXX, 31, etc.). The term *zakāt* in Meccan passages (XVIII, 81, XIX, 13) means "purity". Passages that are late Meccan or early Medinan say that earlier prophets instituted the

ṣalāt and the *zakāt* (X, 87, XIV, 40, XIX, 30 f., 54 f., XX, 14, XXI, 73, etc.), or recommend them to the Muslims as signs of piety (II, 177, XXVII, 1-4, etc.). Then in passages dating from the year 2 A.H. and later these two practices are required of Muslims, with the imperative verbs in the plural, *aḳīmū 'l-ṣalāt* and *ātū 'l-zakāt* (II, 43, IV, 77, 103, IX, 11, XXII, 78, XXIV, 56, LVIII, 13, LXXIII, 20, etc.). The Muslim fast was introduced in two or probably three stages in the Ḳur'ān (see Wagtendonk, *Fasting in the Koran*, 41-127), and the pilgrimage was adopted as a Muslim ritual probably before Badr, but was not practised as such until the last years of Muḥammad's life.

The form used most frequently for introducing and stressing regulations for the Muslim community is the plural imperative verb, seen several times in the examples given above and often elsewhere involving a variety of practices, e.g.: "O believers, when you stand up for the Prayer, wash your faces and your hands up to the elbows, and wipe your heads and your feet up to the ankles" (V, 6); "O believers, show piety towards God and abandon the usury that remains if you are believers" (II, 278); "O believers, when you contract a debt with another for a stated term, write it down" (II, 282); "Fight in the way of God those who fight you, but do not provoke hostility" (II, 190); "Contribute in the way of God; hand not yourselves over to destruction, but do well" (II, 195). Sometimes negative commands are given, as in VI, 151: "Come, let me repeat what your Lord has forbidden you: do not associate anything with Him . . . do not kill your children because of poverty —do not draw near indecencies . . . do not kill the person whom God has made forbidden except with justification"; cf. XVII, 22-39. The expression *kutiba ʿalaykum*, "prescribed for you is", seen in II, 183, above on fasting, also occurs elsewhere, e.g. "O believers, retaliation in the matter of the slain is prescribed for you, the free for the free, the slave for the slave, the female for the female; so if anyone is forgiven anything by his [injured] brother, let him follow it with what is reputable, and pay with kindness" (II, 178), and "Prescribed for you, when death draws nigh to one of you, and he has goods to leave, is the making of a testament in favour of parent and relatives reputable—a duty resting upon those who show piety" (II, 180). And an expression having the opposite meaning, *ḥurrimat ʿalaykum*, "forbidden to you is", also occurs, e.g. in IV, 23, and V, 3. Other forms and many other regulations occur, especially in the *sūras* that are completely Medinan. Some of these passages can be classified as commandments or divine legislation; others are more in the nature of religious instruction or exhortation.

f. Liturgical forms. While all of the Ḳur'ān is recited in liturgical settings, only some parts are distinctly liturgical in form. By far the most important part of the Ḳur'ān for use in worship is the opening *sūra*, the *Fātiḥa*, a seven-verse prayer recited at least twice in each performance of the *ṣalāt*. Whether or not the *Fātiḥa* [*q.v.*] was considered to be part of the Ḳur'ān during Muḥammad's lifetime is uncertain. Prayers might seem out of place in a text in which God is the speaker, but others also occur, the best example being the prayer at the end of Sūra II: "O our Lord, take us not to task if we forget, or make a mistake; O our Lord, lay not upon us a task such as Thou didst lay on those before us . . . Pardon us and forgive us, and have mercy upon us; Thou art our patron; so help us against the people of unbelievers" (Bell). Some prayers are also included within narratives, e.g. Abraham's prayer in XIV, 35-41. Exaltations, in which God is praised in the third person, occur more frequently; the best known of these is the "Throne verse", II, 255, mentioned in 7.d above for its mythic motif. The divine epithets mentioned in 6.c above as rhyme phrases are also a type of praise formula, which however do not give the impression of being liturgical. Praise forms that do seem to have a liturgical purpose occur at the beginning of several Medinan *sūras*. A *sabbaḥa li 'llāh* formula, "Magnifies God (*sabbaḥa li 'llāh*) all that is in the heavens and the earth", occurs at the beginning of LVII, LIX, LXI, LXII and LXIV, three of which continue with "He is the Almighty, the All-wise". These five *sūras* date mainly from the middle Medinan years, after the completion of the *sūras* that begin with revelation formulas and the mysterious letters (see 4.d above). The liturgical setting of the *sabbaḥa li 'llāh sūras* is suggested by their introductions and conclusions. One might conjecture that the Friday prayer service was the occasion for the first recitation of these *sūras* (see LXII, 9-11), and possibly also those with the revelation formulas. Other praise formulas, which may or may not have specifically liturgical functions within the Ḳur'ān, include: the *taḥmīd*, i.e. *al-ḥamdu li 'llāh*, "Praise be to God", at the beginning of I, VI, XVIII, XXXIV and XXXV, and in VII, 43, X, 10, XVII, 111, etc.; the *tasbīḥ*, i.e. *subḥāna 'llāh*, "Glory be to God", occurring with variations in XVII, 1, 93, 108, XXVIII, 68, XXXVI, 36, XXXVII, 180-2, XLIII, 82, etc.; and *tabāraka 'llāh*, "Blessed be God", occurring with variations in VII, 54, XXIII, 14, XXV, 1, 10, 61, XL, 64, XLIII, 85, LV, 78 and LXVII, 1.

Others: The Ḳur'ān contains other distinctive literary forms and themes that can be mentioned only briefly here. Especially important in Meccan parts of the Ḳur'ān are a large number of dramatic scenes, usually involving death, the Last Judgment, the pleasures of paradise (*al-d̲j̲anna* = the garden), and the tortures of the hellfire (see the O'Shaughnessy arts. in *Bibl.*). Dramatic scenes constitute the main Ḳur'ānic form for treating these subjects, which are nowhere fully or systematically explained, and they also occur frequently in narratives, reflecting the oral qualities of these Meccan parts of the Ḳur'ān (see Bell-Watt, 80 f.). There are also many addresses on a variety of topics. Most Meccan ones treat theological topics—the signs of God, messages of earlier prophets, etc.—and thus can be classified as sermons. Early Medinan ones are often addressed to the Jews, either as the Children of Israel or the People of the Book. Later Medinan ones, usually addressed "O believers", but sometimes "O children of Adam" or "O people", treat specific legal, political, and military matters as well as general religious, moral, and social themes. Another special type of material found in both Meccan and Medinan parts of the Ḳur'ān involves Muḥammad's personal situation. Many Meccan passages addressed to Muḥammad bring comfort and encouragement in times of persecution, instructions on religious practices, etc. Some Medinan ones, addressed "O Prophet", give special marriage and divorce regulations. Others are addressed to Muḥammad's wives or otherwise treat his family problems (see *sūras* XXIV, XXXIII, LXVI).

8. The Ḳur'ān in Muslim Life and Thought

For Muslims the Ḳur'ān is much more than scripture or sacred literature in the usual Western sense. Its primary significance for the vast majority through the centuries has been in its oral form, the form in

which it first appeared, as the "recitation" (*ḳur'ān*) chanted by Muḥammad to his followers over a period of about twenty years (on its liturgical function during Muḥammad's lifetime, see VII, 203-6, LXXIII, 20, LXXXIV, 20 f., etc.). The revelations were memorised by some of Muḥammad's followers during his lifetime, and the oral tradition that was thus established has had a continuous history ever since, in some ways independent of, and superior to, the written Ḳur'ān. During the early centuries when the written Ḳur'ān was limited to the *scriptio defectiva* of the period (see 3.c above), the oral tradition established itself as the standard by which the written text was to be judged. Even when the Egyptian "standard edition" was prepared in the early 1920s, it was the oral tradition and its supporting *ḳirā'āt* literature (rather than early Ḳur'ān mss.) that served as the authority for determining the written text. Through the centuries the oral tradition of the entire Ḳur'ān has been maintained by the professional reciters (*ḳurrā'*) (on Ḳur'ān reciters in Egypt, see M. Berger, *Islam in Egypt today*, Cambridge 1970, 11-13, 37-43, and for the oral tradition in general, Labīb al-Said, *The recited Koran*, see *Bibl.*), while all Muslims memorise parts of the Ḳur'ān for use in the daily prayers. Until recently, the significance of the recited Ḳur'ān has seldom been fully appreciated in the West.

The Ḳur'ān also had a central role in the theological debates of the early centuries, and it has continued to be one of the most controversial issues in Islamic theology. Since the Ḳur'ān was held to consist of messages brought from God to Muḥammad by Gabriel, and since God is the "speaker" in these messages, it was natural for Muslims to think of it as God's speech (*kalām*). About the time of Hārūn al-Rashīd, theologians began to discuss whether or not the Ḳur'ān was created. Among those who maintained that it was were the Mu'tazila, including some who had positions at the court of al-Ma'mūn. Convinced by their arguments, and also thinking that adoption of the doctrine would be politically beneficial, al-Ma'mūn in 218/833 established the *miḥna* [*q.v.*] or "inquisition", in which most leading officials were obliged to profess publicly that the Ḳur'ān was created. Nearly all submitted but a few refused, notably Aḥmad b. Ḥanbal (d. 241/855) [*q.v.*]. In 234/848, shortly after the accession of al-Mutawakkil, the *miḥna* was abandoned, probably because its political results were disappointing. Up through the time of the *miḥna* the issue seems to have been whether the Ḳur'ān was the actual speech of God or was created. Those who accepted the latter view, arguing that God "has never spoken and does not speak", were called by their opponents the Djahmiyya [*q.v.*—see also Watt, *Formative period*, 143-8]. Then Ibn Ḥanbal argued that the Ḳur'ān is part of God's knowledge (*'ilm*), and after the *miḥna* he accepted the expression "uncreated" (*ghayr makhlūḳ*) as a description of the Ḳur'ān. This led to the formulation of the doctrine that it is eternal (*ḳadīm*), argued for by al-Ash'arī (d. 323/935) [*q.v.*] and others. Although this became the standard Sunnī view (see, e.g. the 4th/10th century Ḥanafī creed called by Wensinck *Fiḳh Akbar II*, art. 3), it has not been accepted by all. The Ḥanbalī theologian Ibn Taymiyya (d. 728/1328) [*q.v.*], for instance, disavowed this view, arguing that the question of the eternity or temporality of the Ḳur'ān was not an issue before the time of Ibn Ḥanbal, and that in affirming the uncreatedness of the Ḳur'ān the "pious ancestors", including Ibn Ḥanbal, never meant to assert its eternity. It should also be noted that even the expression *ghayr makhlūḳ* does not occur in Muslim creeds until after the *miḥna* (see, e.g. Wensinck, *Muslim Creed*, 103 f., 127, 189) and that the early discussions and creeds do not mention the Ḳur'ānic expression "preserved tablet" (*lawḥ maḥfūẓ*) [see LAWḤ] in LXXXV, 22, and "mother of the Book" (*umm al-kitāb*) in III, 7, which only later came to be interpreted as referring to a heavenly archetype of the Ḳur'ān in support of the doctrine of its eternity. See W. Madelung, *The origins of the controversy concerning the creation of the Koran*, in *Orientalia Hispanica*, Leiden 1974, i, 504-25; W. M. Watt, *Early discussions about the Qur'ān*, in *MW*, xl (1950), 27-40, 96-105; idem, *Formative period*, 178 f., 242-5, 280-5, 293; J. Bouman, *The doctrine of 'Abd al-Djabbār on the Qur'ān as the created word of Allāh*, in *Verbum*, the H. W. Obbink *Festschrift*, Utrecht 1964, 67-86; H. Stieglecker, *Die Glaubenslehren des Islam*, Munich 1962, 75-89. For an outline of the views of the various schools on the Ḳur'ān as the *kalām Allāh*, see KALĀM.

Parallel to the development of the doctrine of the eternity of the Ḳur'ān there also arose the dogma of its inimitability (*i'djāz*) [*q.v.*]. From the beginning, the Ḳur'ān had been seen as a "sign" (*āya*) or "proof" (*burhān*) of Muḥammad's prophethood. This belief took a more precise form in the teaching that each prophet was given a verifying miracle (*mu'djiza*), and that the Ḳur'ān was Muḥammad's; the term *i'djāz*, it should be noted, still had not received its technical meaning as late as the time of Aḥmad b. Ḥanbal (see Tor Andrae, *Die Person Muhammad in Lehre und Glaube*, Uppsala 1917, 101). Early discussion of the *i'djāz* of the Ḳur'ān centred around the concept of *taḥaddī* or "challenge", based largely on several verses of the Ḳur'ān (II, 23, X, 38, XI, 13, XVII, 88, etc.). The failure of Muḥammad's contemporaries to take up the challenge to produce even one *sūra* like those he recited was taken as proof that it was impossible. This argument was then supplemented by the concept of *ṣarfa* (lit. "turning away"), meaning that God prevented the competent from taking up the challenge. In one of the earliest treatises devoted solely to *i'djāz*, 'Alī b. 'Īsā al-Rummānī (d. 384/944) mentioned both of these arguments along with several others, involving the eloquence of the Ḳur'ān, its prophecies of future events, its establishment of new literary forms and style that surpass all others, etc. Ḥamd b. Muḥammad al-Khaṭṭābī (d. 388/998) in his *al-Bayān fī i'djāz al-Ḳur'ān* (see *Bibl.*) stressed the rhetorical eloquence of the Ḳur'ān, and al-Bāḳillānī (d. 403/1013) in the most famous work on the subject (see *Bibl.*) rejected the *ṣarfa* argument and compiled what he regarded as empirical evidence of the Ḳur'ān's superior style. He also argued that since Muḥammad was illiterate, he could not have read other scriptures or written down stories told by human informants, and thus Ḳur'ānic reports of past events and prophecies of future events are further proof of the miracle of the Ḳur'ān and its divine source. For summaries of the development of these views see *Itḳān*, ii, 116-25; Abdul Aleem, *I'jazu'l-Qur'an*, in *IC*, vii (1933), 64-82, 215-33; J. Bouman, *Le conflit autor du Coran et la solution d'al-Bāqillānī*, Amsterdam 1959; H. Stieglecker, *op. cit.*, 371-408; and art. I'DJĀZ. The standard modern work on the subject is that of Muṣṭafā Ṣādiḳ al-Rāfi'ī (see *Bibl.*).

The doctrines of the eternity and perfection or inimitability of the Ḳur'ān contributed to its extensive influence throughout Islamic life and culture.

It became the first "source" (*aṣl*) of Islamic law, the *Sharīʿa*, which also came to be regarded as eternal (cf. the Torah in Jewish belief). Its grammar became standard for later Arabic, which replaced other languages across the Near East and North Africa (among Christians and Jews as well as Muslims), and its script came to be adopted in Persian, Turkish, Urdu, and other languages. Verses of the Ḳur'ān became the main subject of Islamic calligraphy and one of the main decorative motifs of Islamic religious art and architecture, as a substitute for statues and pictorial representation. At the same time, these two doctrines have been the strongest factor working against the acceptance of critical studies of the Ḳur'ān within the modern Muslim community. In the early centuries, Muslim scholars studied the Ḳur'ān as literature and as a historical source, analysing its grammar, style, poetic imagery, etc., and attempting to determine its chronology, development of ideas, and historical settings. But the widespread acceptance of belief in the eternity and *iʿdjāz* of the Ḳur'ān has made modern Muslims loath to accept methods of historical and literary criticism that have proved so fruitful in the study of other scriptures. To a certain extent this is understandable to Christians, since the development of the doctrines of the eternity and *iʿdjāz* of the Ḳur'ān is parallel to the development of the doctrine of the Trinity, and the closest analogue in Christian belief to the role of the Ḳur'ān in Muslim belief is not the Bible, but Christ. Thus the difficulty Muslims have in adopting a critical approach to the Ḳur'ān is comparable to the difficulty many Christians have in accepting a critical view of the life of Jesus (e.g. regarding his virgin birth and resurrection). But this should not prevent critical analyses of the Ḳur'ān, which is after all still a literary work of supreme importance and an invaluable historical document.

Bibliography: (besides works cited in full in the text and those in the list of standard abbreviations): *al-Muṣḥaf al-sharīf*, or *al-Ḳur'ān al-karīm*, Cairo 1344/1924, the "Egyptian standard edition" of the Ḳur'ān; ʿAbd al-Bāḳī, *al-Muʿdjam al-mufahras li-alfāẓ al-Ḳur'ān al-karīm*, Cairo 1364/1945, new ed. 1388/1968, concordance to the Egyptian standard ed.; *Corani textus arabicus* and *Concordantiae corani arabicae*, ed. 9. TRANSLATION OF THE ḲUR'ĀN

a. The orthodox doctrine concerning translation. In the time of Muḥammad it is certain that nobody had considered the possibility that the Ḳur'ān might be translated either as a whole or in part into a foreign language. It was revealed expressly as an "Arabic Ḳur'ān" (Sûra XII, 2; XX, 113; XXXIX, 28; XLI, 3; XLII, 7; XLIII, 3), in "clear Arabic language" (XVI, 103; XXVI, 195; cf. XLVI, 12), that the Prophet through it might "warn the capital (i.e., Mecca) and the people in its surroundings" (VI, 92; XLII, 7). It was not originally intended for non-Arabs. It was only as a result of the spread of the Arabic-Islamic conquests that the sphere of influence of the Ḳur'ān was extended to territories outside the Arabic-speaking world. The Persians and other non-Arabs who embraced Islam were obliged, in the same way as their genuinely Arab fellow-believers, to recite in the ritual prayer the Fātiḥa and several other texts from the Ḳur'ān. The question thus arose whether they should be permitted to recite the texts in question in their native language instead of in Arabic. In so far as Muslims from the non-Arabic-speaking territories were interested in getting to know not only the texts used in the prayers, but also other parts of the Ḳur'ān, or the whole of the Ḳur'ān, there arose the further question whether this might be achieved with the help of a translation.

The theologians and jurists who had to decide on this matter in general adopted a rigorous attitude. With regard to the recitation of the Fātiḥa in the ritual prayer, the Mālikis, Shāfi'is and Ḥanbalis insisted that the text must be spoken in Arabic. In a case where the person praying could not recite the Fātiḥa in Arabic, he must substitute for it another passage from the Ḳur'ān, or observe a silent pause, or repeat the name of God for the same length of time. On the other hand it is reported that Abū Ḥanīfa had originally declared that the recital of the Fātiḥa in Persian was permitted without reservation; he later restricted this concession to those worshippers who were unable to speak Arabic. This then became the general rule for the Ḥanafi school. In similar circumstances other non-Arabic languages besides Persian might be employed.

As for the production and use of translations of the whole of the Ḳur'ān, the attitude of the scholars was that a "translation" of the Ḳur'ān in the true sense of the word was not possible. They based their attitude mainly on the argument that the wording of the Ḳur'ān is a miracle (*mu'djiza*) incapable of imitation by man. This characteristic would be invalidated in a translation into a foreign language, since this would be made by man. Furthermore, the scholars maintained that a translation of the Ḳur'ān which was both literal and at the same time true to the meaning was not possible. They conceded, however, that a so-called translation (*tardjama*) in the sense of a commentary (*tafsīr*) might be used, on the assumption that the text of the original was not superseded by this. Thus manuscripts of the Ḳur'ān might be provided with an interlinear (quasi-)translation. In more recent times this was extended to the printing of the translation (as a commentary) beside the Arabic text. This is the practice which remains usual for translations made by Muslims.

The question whether in the ritual prayer texts from the Ḳur'ān may be recited in a non-Arabic language and whether the production and use of translations of the Ḳur'ān should be permitted became once again acute when in Turkey in the nineteen-twenties the authorities proceeded to "nationalise" the ritual prayers and to publish Turkish translations of the Ḳur'ān not accompanied by the Arabic original. Authoritative theologians found themselves induced once again to explain and to justify the orthodox standpoint by reference to earlier authorities.

The first statements were mainly of a polemical and negative nature. In the course of time, however, there prevailed a more eirenical judgement on the matter. Thus the Ḥanafi scholar of al-Azhar, Muḥammad Muṣṭafā al-Marāghī, in a thorough investigation first published in 1932, adopted the attitude that for a Muslim without a knowledge of Arabic the recital of the Ḳur'ānic texts prescribed for the prayer in an appropriate translation was absolutely obligatory (*wādjib*). The important thing in the prayer is the meaning of the text, not the character of the *i'djāz*. The true sense is, however, transmitted through a translation. Furthermore, it is not realistic to require the great mass of Muslims from the non-Arabic-speaking territories to learn Arabic on account of the Ḳur'ān. It is much more desirable and indispensable (according to Maḥmūd Shaltūt, even obligatory) for them to use translations, quite apart from their use in the prayer. The thesis that the Ḳur'ān in translation ceases to be the Word of God (*kalām Allāh*) is, according to Marāghī, valid only with reservations. The translation does not simply represent human speech (*kalām al-nās*), for although it does not contain the Word of God literally, yet its content consists of the meaning of God's Word.

b. Translations into specific languages. The Ḳur'ān has been translated into most of the languages of Asia and Europe, and into some African ones. A Persian translation is said to have been made during the time of the Orthodox Caliphs by Salmān al-Fārisī, a Companion of the Prophet; one into Berber in 127/744-5; and a Sindhi one in 270/883-4; but none of these survives.

1. Persian and Turkish. One of the oldest surviving works in the Persian language is the translation of the large Arabic *tafsīr* of Ṭabarī (d. Bag̲h̲dād 310/923), which was made for Abū Ṣāliḥ Manṣūr b. Nūḥ, Sāmānid ruler of Transoxania and K̲h̲urāsān (350-66/961-76). The precise date is not recorded, but the Persian preface explains how it came to be made. Abū Ṣāliḥ, after questioning his *ʿulamā'* about the legality of translation of the Holy Book into Persian, decreed that this should be done by learned men from the cities of this realm. Several MSS. are mentioned by Storey, the earliest, at Rāmpūr, being dated *ca.* 600/1203-4. There is a Persian translation in Roman characters in the Vatican.

Possibly not much later is the Persian text, translation and commentary, copied (and perhaps composed) by one Muḥammad b. Abi 'l-Fatḥ in 628/1231, which is preserved at Cambridge and described by E. G. Browne.

Storey lists 48 dated translations and commentaries, and in an appendix, 74 titled or quasi-titled commentaries, as well as a selection of 8 miscellaneous unidentified commentaries and specimens of the numerous anonymous translations to be found in Persian, Indian and other MS. collections, and some lithographs.

The Bregel-Bors̲h̲čevsky Russian translation of Storey (*Persidskaya literatura*, Moscow 1972) records earlier MSS. of the Ṭabarī translation (Bursa 562/1166-7 and end of 6th/12th century), as well as some 250 other translations and commentaries.

The Persian translation of Ṭabarī's commentary was the basis for the first Turkish version, which Togan regards as its contemporary, but which Inan places in the first half of the 5th/11th century.

There are said to be over 70 translations into Turkish made from at least the 4th/11th century onwards, existing in many hundreds of MSS. in public and private collections, and these have frequently been printed. These are in various forms of the Turkic languages, Eastern and Western, and in the Uyg̲h̲ur and Arabic scripts and in Roman characters, with at least four transliterations into Modern Turkish of the Arabic text.

Hamidullah, *Kur'an-i Kerîm tarihi ve türkçc tercümeler bibliyografyası*, Istanbul 1965.

2. Indo-Pakistani languages. Of the many Urdu versions, the earliest are said to have been made by S̲h̲āh ʿAbd al-Ḳādir [*q.v.*] and S̲h̲āh Rafīʿ al-Dīn, each of them an uncle of the celebrated preacher and scholar Muḥammad Ismāʿīl S̲h̲ahīd [see ismāʿīl s̲h̲ahīd]. The British Museum Hindustani catalogue lists innumerable examples, including versions made by Christians and printed in Roman characters. Details may also be found in the bibliographies of the And̲j̲uman-i taraḳḳī-yi Urdū Pākistān (i, Karachi 1961) and of ʿAbd al-Sattār Chaudharī (1974).

In the other Indo-Aryan and Dravidian languages, there are versions in Assamese, Bengali (innumerable; a 1908 version by Rev. Wm. Goldsack of 1908 is illustrated in *MW*, v (1915), 254-5), Gujarati, Hindi, Kashmiri, Marathi, Oriya, Panjabi (often combined with a Persian version and the Arabic text), Pashto, Sanskrit (Chauvin, x), Sindhi (surveyed by A. M. Schimmel in *Oriens*, xvi (1963), 224-43), Sinhalese; and in the Dravidian languages, Malayalam, Tamil and Telegu.

3. South-East Asian. There are many translations into Malay and Indonesian mentioned in the catalogues and bibliographies, and into other Indonesian languages (Sundanese, Javanese, Macassarese and Buginese). A Burmese version with the Arabic text, by one Ḥād̲j̲d̲j̲ī Nūr al-Dīn known as Ḥād̲j̲d̲j̲ī Lū, published in 1938, may be found in the British Library (*BM. Arab. cat.*, 2nd suppl.), while Tinker mentions that a project to translate the Ḳur'ān into

that language was initiated by U Nu while Prime Minister in 1955. Two translations into Thai (one with Arabic text) of 1968 and 1971 are in the Wason Library at Cornell University.

Bibliography: *Catalogus van de Bibl. v. het Kon. Inst. v. Taal-, Land- en Volkenk.* and suppls.; Ockeloen, *Catalogus van boeken en tijdschriften uitgegeven in Ned. Oost-Indië*, 1870 (-1953); H. Tinker, art. BURMA.

4. Far Eastern (Chinese and Japanese). Several 19th and 20th century works contain selections in Chinese, sometimes with commentary. A MS. believed to date from about 1800 in the School of Oriental and African Studies, London University, gives "pieces from the Koran and prayers transcribed from the Arabic original in Chinese sounds". Translation into Chinese was recommended by Sakuma, a Japanese businessman and convert to Islam who, in 1925, founded the progressive but short-lived newspaper *Mu kiang*. Another source says that in that same year a complete translation was under consideration by the International Muslim Association. The British Museum has a *Kuo-yü ku-lan ching*, with commentary translated from English versions by Shih Tzu-chou and others (Taipei 1958).

Japanese versions by Toshihiko Izutsu and Tanaka Shiro were published in several editions in the nineteen-fifties, sixties and seventies.

Bibliography: *Un commentaire chinois du Coran*, in *RMM*, iv (1908), 540-7; I. Mason, *Notes on Chinese Mohammadan literature*, in *J. North China Branch RAS*, lvi (1925), 172-215; R. A. Syrdal, *Christ in the Chinese Koran*, in *MW*, xxvii (1937), 72-83.

5. Non-Islamic Near Eastern Languages. Three manuscripts of Hebrew translations exist (in Oxford, Cambridge and the Library of Congress), the first two made from the Italian of Arrivabene, the third from the Dutch of Glazemaker. All of these predate the translation of Hermann (Ḥayyim) Reckendorf, Leipzig 1857, made direct from the Arabic. Two further translations have since appeared: by Joseph Joel Rivlin (Tel Aviv 1936-41, 1963²) and by Aharon Ben-Shemesh (Ramath Gan 1971).

Quotations from the Ḳur'ān, in Syriac, appear in a polemical work against Jews, Nestorians and Muslims by the West Syrian writer Barsalībī (d. 1171), which exists in a manuscript now in the John Rylands University Library in Manchester, and in another in the Harvard University Semitic Museum. It is doubtful if a complete Syriac translation ever existed.

In the Bhopal State Library is to be found a Ḳur'ān in classical Armenian, translated from the Latin by Stephanos of Ilov, a monk of Echmiadzin. This MS., in a "simply perfect calligraphy", lacks title-page and date but is thought to be of the first half of the 17th century. A printed translation, with a life of Muḥammad, by Leron Larēnc', made from the French versions of Savary and Kasimirski, was published in Istanbul (pt. 3 in 1912).

A Georgian version (Tiflis 1906) is in the Wardrop Collection in the Bodleian Library.

Bibliography: M. M. Weinstein, *A Hebrew Qur'ān manuscript*, in *Studies in bibliography and booklore* (Cincinnati), x (1971-2), 19-43; A. Mingana, *An ancient Syriac translation of the Ḳur'ān*, in *Bull. John Rylands Libr.*, ix (1925), 188-235, and repr.; J. Rendel Harris, *The new text of the Ḳur'ān*, *ibid.*, x (1926), 219-22; Mesrob J. Seth, *A manuscript Koran in Classical Armenian*, in *JASB*, N.S. xix (1929), 291-4.

6. African languages. There are three translations of the Ḳur'ān into Swahili: Christian, Aḥmadī and Sunnī Shāfi'ī. The earliest, made by Godfrey Dale, a missionary with the Universities Mission for Central Africa, was published by the S.P.C.K. in London in 1923. It contains over 700 *maelozo* (explanatory comments or notes) by Dale or his colleague, G. W. Broomfield.

The Aḥmadī version (Nairobi 1953, 1971²) was made by Shaykh Mubārak Aḥmadī, chief missionary of the Aḥmadiyya Muslim Mission in East Africa, while the Sunnī Shāfi'ī version, by Shaykh 'Abd Allah Ṣāliḥ al-Fārsī, was published in fascicules between 1956 and 1962 at Zanzibar, in a one-volume edition in Bangalore (1949), and by the Islamic Foundation at Nairobi in 1956.

Other African-language versions exist in Yoruba (Rev. M. S. Cole, Lagos 1924), Ganda (Uganda Aḥmadiyya Muslim Mission, 1965) and Amharic (Artistic Press, Addis Ababa, 1961). Possible versions in Berber are discussed by Henri Basset, see *Bibl.*

Bibliography: H. Basset, *Essai sur la littérature des Berbères*, Algiers 1920, 63-4; G. Dale, *A Swahili translation of the Koran*, in *MW*, xiv (1924), 5-9; V. Monteil, *Un Coran ahmadi en Swahili*, in *Bull. IFAN*, xxix, B (1967), 479-95; J. D. Holway, *The Qur'ān in Swahili; three translations*, in *MW*, lxi (1971), 102-10.

7. European languages. The Latin paraphrase made by Robert of Ketton at the behest of Peter the Venerable, abbot of Cluny, and completed in 1143, exists in the autograph of the translator in the Bibliothèque de l'Arsenal in Paris. Robert is said to have been "always liable to heighten or exaggerate a harmless text to give it a nasty or licentious sting, or to prefer an improbable but unpleasant interpretation of the meaning to a likely but normal and decent one" (N. Daniel, *Islam and the West, the making of an image*, Edinburgh 1960, see Index, s.v. Ketton). The work of Robert formed the basis for several mediaeval versions, but was apparently unknown to another early translator, Marc of Toledo. It was recopied in the 17th century by Dominicus Germanus, whose work exists in Montpelier, the Escurial and elsewhere, and was published in the Cluniac corpus, together with various other works of Christian propaganda, by Theodor Bibliander (Buchmann) in three editions at Basel in 1543, and one at Zürich in 1550 containing a preface by Martin Luther.

The first translation in a modern European language was the Italian version of Andrea Arrivabene, published in 1547. Though its author claims that it is made directly from the Arabic, it is clearly a translation or paraphrase of Robert of Ketton's text as published by Bibliander. Arrivabene's version was used for the first German translation made by Solomon Schweigger, preacher at the Frauenkirche in Nürnberg, which in turn formed the basis of the first Dutch translation, made anonymously and issued in 1641.

The first French version by André du Ryer, "Sieur de la Garde Malezais", came out in a great many editions between 1647 and 1775. All editions contain a "summary of the religion of the Turks" and other documents. This gave rise to the first Koran in English by Alexander Ross, and also fathered versions in Dutch (by Glazemaker), German (Lange) and Russian (Postnikov and Veryovkin).

The second Latin version was made directly from the Arabic text by Ludovico Marraci (or Marracci), published first in 1698 and secondly, with additions and annotations, by Reineccius in 1721. It was translated into German by Nerreter.

The 18th century brought translations made directly from an Arabic original by Sale into English (first published in 1734), Savary (French, 1751) and Boysen (German, 1773). Sale's version was in vogue in the English-speaking world for nearly two centuries: his renowned preliminary discourse, based, according to Nallino, on Marracci and Edward Pococke senior, was translated into several European languages. It was even translated into Arabic by Protestant missionaries in Egypt.

Savary's version was, according to Chauvin, evidently made from the Latin of Marracci: it bears the distinction of having been published in Mecca in A.H. 1165 (or so the title-page of one edition states!). Kasimirski, whose translation has also had a long run, and indeed like that of Savary, is still being republished in our own time, was requested by Pauthier to revise Savary. He preferred, however, to make a new translation directly from the Arabic while consulting the works of Marracci and Sale.

Throughout the 19th century, the translations were normally made without remove from the Arabic. In the 20th century, the first English versions made by Muslims appear, and the Aḥmadiyya movement began to issue the Ḳur'ān text with translations into European and even African languages. In recent times translations have been made by many of the most prominent Arabists and Islamic scholars into all the main languages of Europe, undeterred by the dictum of A. Fischer that only second or third-grade scholars dared to undertake this task.

Conspectus of European Language Versions:
Afrikaans. Anon. 1950. M. A. Baker, 1961.
Bulgarian. Lica, 1902-5. Tomov and Skulov, *ca.* 1930. (*MW*, xxiii [1933], 189-90.)

(J. D. Pearson)

AL-KŪRĀNĪ, Ibrāhīm b. al-S̲h̲ahrazūrī al-Ḥasan S̲h̲ahrānī, al-Madanī (1023-1101/1615-90), scholar and mystic, born in S̲h̲ahrazūr in the mountains of Kurdistān on the frontiers of Persia. He studied first in Turkey, then in Persia, ʿIrāḳ, Syria and Egypt before settling in Medina. In one of his works, *Masālik al-abrār ilā ḥadīt̲h̲ al-nabī al-muk̲h̲tār* (Ms. Dār al-Kutub, Cairo, Ṭalʿat ff. 55-6), he refers to a period of 3 months at the Azhar in 1061/1650, where he studied with S̲h̲ayk̲h̲ Nūr al-Dīn ʿAlī b. ʿAlī al-S̲h̲abrāmallisī, *Imām* of the Azhar until 1087/1677, the whole *Taysīr fi 'l-ḳirā'āt al-sabʿ*

attributed to al-Ḳurṭubī, and with Shaykh ʿAbd al-Raḥmān Shiḥādha al-Yamanī the *Ṭayyibat al-nashr fi 'l-ḳirā'āt al-ʿashr* of al-Djazarī up to Sūra IV, 41, *fa-kayfa idhā dji'nā min kulli ummatin bi-shahīdin*, after which he travelled to Baghdād where he spent a year and a half. He was a member of several *ṭuruḳ*, the most important among them being the Naḳshbandiyya. In Medina, he was a student of al-Kushāshī and succeeded him as head of his *ṭarīḳa* on the former's death in 1071/1661.

He was a prolific author in various of the Islamic disciplines, and wrote on *fiḳh*, *tawḥīd* and *taṣawwuf*. He was one of the last great exponents of the school of Ibn ʿArabī, and is of particular interest because of his use of the techniques of scholastic theology in his *Itḥāf al-dhakī bi-sharḥ al-tuḥfa al-mursala ilā 'l-nabī* (edition in preparation) in order to explain and defend the monistic tradition of Ibn ʿArabī. Yet despite his commitment to the Ibn ʿArabī tradition, he was by nature a conciliator, arguing that it was preferable to reconcile two opposing points of view than to choose one of them or the other. This did not save him from condemnation by the followers of al-Sanūsī in Fās for his Ḳadariyya learnings on the question of *kasb*, and for Muʿtazilī influence in his views on the material character of non-being as well as for his views on the faith of Pharaoh, and his assertion of the historicity of and explanation of the so-called "Satanic verses" allegedly interpolated into Ḳur'ān, LIII, 21.

Other Moroccans, however, thought highly of him and of his humility and learning. He was esteemed by foreign students in the Ḥidjāz and was well-known among Indian scholars. He had an important influence on the development of Islam in the region now known as Indonesia because of his special relationship with the Achehnese ʿAbd al-Ra'ūf of Singkel [*q.v.*] and with succeeding generations of Javan students referred to in the *Fawā'id al-irtiḥāl wa-natā'idj al-safar* of Muṣṭafā al-Ḥamwī (Ms. Dār al-Kutub, *Ta'rīkh* 1093, ff. 166-7). His association with ʿAbd al-Ra'ūf was particularly close. They were friends in Medina, they corresponded across the Indian Ocean for thirty years after ʿAbd al-Ra'ūf returned to Acheh in 1071/1661, and ʿAbd al-Ra'ūf made renderings of some of his works in Malay.

The number of works attributed to him ranges from forty-two (Brockelmann, s.v.) to over a hundred, only two of which have been published, sc. *al-Lumʿa al-saniya* and *al-Amam li-īḳāẓ al-himam* (see *Bibl.*). The former is a brief treatise on the "Satanic verses", for which some of the Moroccans condemned him; the latter is a most interesting and important work, setting out in detail his intellectual credentials as a teacher.

KURĀNĪ, Gurānī, Shams al-Dīn [see gurānī].

KURAYBIYYA or, more commonly, Karibiyya is the name of a subsect of the Kaysāniyya [*q.v.*] derived from its otherwise unknown leader Abū, more rarely Ibn Karib (or Kurayb, Karnab) al-Ḍarīr.

The heresiographical sources are agreed that Abū Karib denied the death of Muḥammad b. al-Ḥanafiyya, the *Imām* and *Mahdī* of the Kaysāniyya. It is thus evident that he was active immediately after the death of Ibn al-Ḥanafiyya in 81/700 and probably played a major rôle in promoting Messianic ideas about him among the Kaysāniyya. The sources disagree, however, in regard to other points of his teaching. The Muʿtazilī and Sunnī sources attribute to him the belief that Muḥammad b. al-Ḥanafiyya was alive hidden in the mountains of Raḍwā near Medina, guarded by a lion on his right and a leopard on his left and provided with food in the morning and the evening, until the time of his reappearance. Some of Abū Karib's followers held that Ibn al-Ḥanafiyya was punished by God with confinement in the Djabal Raḍwā because of his voluntary submission to the caliph ʿAbd al-Malik. In the account of these sources, Abū Karib appears as the founder of what became the mainstream of the Kaysāniyya expecting the return of Muḥammad b. al-Ḥanafiyya, and whose views were later expressed in the poetry of Kuthayyir [*q.v.*] and al-Sayyid al-Ḥimyarī [*q.v.*].

According to the Shīʿī sources, on the other hand, Abū Karib and his followers asserted that the place where Muḥammad b. al-Ḥanafiyya was concealed could not be known and they were distinct from those who believed that he was hiding in the mountains of Raḍwā. They maintained that ʿAlī had named him the *Mahdī*. Abū Ḥātim al-Rāzī adds to this that Abū Karib considered Ibn al-Ḥanafiyya the immediate successor of ʿAlī in the imāmate and opposed those who upheld the imāmate of al-Ḥasan and al-Ḥusayn before him. This view was in conflict with the position of the majority of the Kaysāniyya, expressed in verses by Kuthayyir, that the three sons of ʿAlī were consecutively *Imām*s and al-Maḳdisī, representing the Muʿtazilī account, expressly states that Abū Karib (Ibn Karnab) considered al-Ḥasan as the *Imām* after ʿAlī. According to al-Nawbakhtī, the extremist Shīʿī Ḥamza b. ʿUmāra al-Barbarī of Medina was originally a follower of Abū (Ibn) Karib, and among Ḥamza's early supporters in Kūfa were Bayān b. Samʿān [*q.v.*] and Ṣā'id al-Nahdī. The Karibiyya and all its extremist offshoots claimed that they would return to life at the time of the reappearance of Muḥammad b. al-Ḥanafiyya. According to the account of the Muʿtazilī Abu 'l-Ḳāsim al-Balkhī, on the other hand, the doctrine of return (*radjʿa*) was first taught by Ḥayyān al-Sarrādj who, in contrast to Abū Karib, believed that Muḥammad b. al-Ḥanafiyya had died and would return to life. While there is no external evidence supporting either of the two groups of sources, the Shīʿī sources, providing more specific details, appear to be generally better informed.

Montgomery Watt, *The formative period of Islamic thought*, Edinburgh 1973, 47-9; Wadād al-Ḳāḍī, *al-Kaysāniyya fi 'l-taʾrīkh wa 'l-adab*, Beirut 1974, 172 f. (W. MADELUNG)

ḲURAYSH, the tribe inhabiting Mecca in the time of Muḥammad and to which he belonged; the name, which may be a nickname, is mostly (e.g. Ibn Hishām, 61) said to come from *taḳarrush*, "a coming together, association"; but it is also possible (cf. Ṭabarī, i, 1104) that it is the diminutive of *ḳirsh*, "shark", and it could then be a totemic name like Kalb, etc. (A man called Ḳuraysh, other than Fihr, is mentioned in *Nasab Ḳuraysh*, 12.7-9.) The tribe is taken to consist of the descendants of Fihr, and he himself is sometimes spoken of as Ḳuraysh; but the name is mostly used only of the tribe, which is reckoned among the "northern Arabs" (cf. ʿADNĀN and AL-ʿARAB, DJAZĪRAT, vi, p. 544b). The ancestry of Fihr is given as: b. Mālik b. al-Naḍr b. Kināna b. Khuzayma b. Mudrika b. Ilyās b. Muḍar b. Nizār b. Maʿadd b. ʿAdnān. The following table shows the main subdivisions of Ḳuraysh (for a fuller version, cf. Watt, *Muhammad at Mecca*, 7); an asterisk indicates those commonly spoken of as "clans" in Muḥammad's time.

- Fihr
  - Muḥārib
  - al-Ḥārith*
  - Ghālib
    - Luʾayy
      - ʿĀmir*
        - Muʾays
        - Ḥisl
        - Nizār
      - Kaʿb
        - ʿAdī*
        - Huṣayṣ
          - ʿAmr
            - Sahm*
            - Djumaḥ*
        - Murra
          - Taym*
          - Yaḳaẓa
            - Makhzūm*
          - Kilāb
            - Zuhra*
            - Ḳuṣayy
              - ʿAbd (Ḳuṣayy)
              - ʿAbd al-Dār*
              - ʿAbd Manāf
                - ʿAbd Shams*
                  - Umayya
                  - Rabīʿa
                - Nawfal*
                - Hāshim*
                - al-Muṭṭalib*
              - ʿAbd al-ʿUzzā
                - Asad*
    - al-Adram

Fihr is said to have been the leader of men of Kināna, Khuzayma and other tribes in fighting to defend the Kaʿba against an attack by Yamanī tribes, but the sanctuary and various privileges connected with it remained in the hands of the tribe of Khuzāʿa. There was probably little, if any, permanent settlement at Mecca at this period. The descendants of Fihr lived in scattered groups among their relatives of Kināna. A change came about through Ḳuṣayy [*q.v.*], in the sixth generation from Fihr. He collected together the scattered groups of his kinsmen of Ḳuraysh (and this may be the occasion of their receiving the name), and, with help from certain men of Kināna and Ḳuḍāʿa (normally resident in Syria), he wrested the possession of the sanctuary from Khuzāʿa and became virtual ruler of Mecca. He is also said to have assigned quarters of Mecca to the various groups of Ḳuraysh; those in the area round the Kaʿba were known as the Ḳuraysh of the Biṭāḥ, and included all the descendants of Kaʿb b. Luʾayy, and perhaps some others, while those on the outskirts were the Ḳuraysh of al-Ẓawāhir. In so far as this assignment of quarters implied permanent settlement, it must have been made possible by the development of trade. Certainly by 600 A.D. the leading men of Ḳuraysh were prosperous merchants who had obtained something like a monopoly of the trade between the Indian Ocean and East Africa on the one hand and the Mediterranean on the other. They organised caravans which went to the Yaman in winter and to Gaza and Damascus in summer, and they were involved in mining and other activities along these routes. Victory in the war of the Fidjār [*q.v.*] against Hawāzin and Thaḳīf brought the routes of the Nadjd under Ḳuraysh. In particular, they gained control of the trade of the town of al-Ṭāʾif, which for a time had been a rival. Since al-Ṭāʾif [*q.v.*] was much higher and cooler than Mecca, many Ḳuraysh acquired estates there. They had also stations in other parts of Arabia. The Ḳuraysh

became renowned for their *ḥilm* [*q.v.*] "steadiness" or "absence of hotheadedness", and in practice this meant that they placed business interests first and maintained a measure of unity despite their rivalries.

On the death of Ḳuṣayy (probably in the first half of the 6th century A.D.), his powers and rights passed to ʿAbd al-Dār, but after a time he was challenged by ʿAbd Manāf, and this led to a division of Ḳuraysh into two rival groups. ʿAbd al-Dār was supported by Makhzūm, Sahm, Djumaḥ and ʿAdī, and these were known as the Aḥlāf or Confederates. The opposing party, known as the Muṭayyabūn, the Perfumed, consisted of ʿAbd Manāf, Asad, Zuhra, Taym and al-Ḥārith b. Fihr. It is impossible to know how long these groups remained effective. There is a reference to Muṭayyabūn in a letter from Muḥammad to some men of Khuzāʿa written in 8 A.H. (al-Wāḳidī, ed. Marsden Jones, ii, 750). Long before this, however, about 605 A.D. (*Munammaḳ*, 46), the Muṭayyabūn had been replaced by a new confederacy, the Ḥilf al-Fuḍūl [*q.v.*] (exact meaning uncertain), which consisted of Hāshim, al-Muṭṭalib, Asad, Zuhra, Taym and perhaps al-Ḥārith b. Fihr. The essential change here is that ʿAbd Manāf has split into four parts, of whom two, Hāshim and al-Muṭṭalib, have remained with their former allies, while the other two, ʿAbd Shams and Nawfal, have abandoned them. This may mean that ʿAbd Shams and Nawfal had become strong through commercial succes. It is clear that ʿAbd Shams, though not fully identified with the Aḥlāf, had developed close business relations with them. In all the stories of the pre-Islamic period there is admittedly a legendary element, but the main outline of events appears to be roughly correct, even if most of the dating is uncertain.

A man did not cease to belong to his clan when he became a Muslim, and in many of the events of Muḥammad's career, and of the period up to 132/750, the influence of old rivalries or alliances can be seen. As late as the reign of Muʿāwiya I, an appeal against injustice was made by al-Ḥusayn b. ʿAlī (of Hāshim) to the Ḥilf al-Fuḍūl, and was given a whole-hearted response from men of Taym, Zuhra and Asad (Ibn Hishām, 86 f.). The leaders of the revolt defeated at the Battle of the Camel in 656 were from Taym and Asad. Of course, there were changes in the relative power and wealth of the clans. The clan of ʿAbd Shams rose to pre-eminence through the Umayyad dynasty, since Umayya was a son of ʿAbd Shams; and the early Shīʿis and then the ʿAbbāsids represented their old rivals, Hāshim. Under the first four caliphs and the Umayyads, men of Ḳuraysh played a very important role in the organisation and administration of the empire, and without their skills in these fields the empire would probably not have endured.

On the death of Muḥammad, the Anṣār wanted one of them to be head of the community of Muslims, but they were persuaded by ʿUmar to accept Abū Bakr as *khalīfa*, on the grounds that only a Ḳurashī could hold together the federation. There are indications that the Anṣār continued to feel strongly about this point for some decades (cf. Watt in *MW*, xlii (1952), 161, 164). A *ḥadīth* came to be generally accepted, however, that "the *imāms* are from Ḳuraysh" (e.g. Ibn Ḥanbal, *Musnad*, iii, 129, 183; iv, 421; cf. T. W. Arnold, *The caliphate*, Oxford 1924, 47). The Qurʾānic verse IX, 100/101 was also quoted in support. When the Sunnī theory of the caliphate was formulated, it was generally insisted that the caliph or *imām* should be from Ḳuraysh (e.g. Ibn Abī Yaʿlā, *Ṭabaḳāt al-Ḥanābila*, Cairo 1952, i, 26, 34; ii, 21; al-Māwardī, *Aḥkām*, 5; Ibn Khaldūn, *Muḳaddima*, i, 350-4; Eng. tr., i, 396-401). A few scholars, however (e.g. Ḍirār b. ʿAmr), held otherwise, and most of the Khawāridj considered that a pious and upright man of any origin could be *imām* (al-Ashʿarī, *Maḳālāt*, 461 f.; al-Baghdādī, *Uṣūl al-dīn*, Istanbul 1928, 275-7; etc.). This matter caused a little difficulty in more recent times when the caliphate was claimed by Mughal emperors and Ottoman sultans, but most *ʿulamāʾ* found a way of circumventing the difficulty (Arnold, *Caliphate*, 162, 175).

The geographer al-Hamdānī (d. 334/945) mentions small groups of Ḳuraysh in various parts of Arabia, possibly remnants of trading stations (ed. D. H. Müller, 119, 122, 165, 194, 258); while al-Yaʿḳūbī (d. 284/897) reports a group of Ḳuraysh near Ṣaydāʾ in the Lebanon (*Buldān*, Leiden 1892, 327). At the present day there are many Ḳuraysh living as Bedouin in the neighbourhood of Mecca, while in Mecca itself the key of the Kaʿba is held by a clan of Ḳuraysh called Shayba.

The *nisba* is Ḳurashī, but this was not much used in the heartlands of the caliphate in the early centuries; if any *nisba* was used it was mostly that from a clan. After a time, some men seem to have prided themselves in descent from Ḳuraysh. The following are some examples: one in ʿIrāḳ, 7/13th century; six in Egypt and Syria, 8/14th, 9/15th, 11/17th, 12/18th centuries; two in North Africa, 7/13th and 9/15th centuries (*GAL*, ii, 110, 111, 112, 449; *GAL* S, i, 298 foot, 537, No. 20, 609; ii, 58; Ibn Khaldūn, Eng. tr., iii, 126n.). In Pakistan, etc. it is common at the present time in the form Qoreshi.

ḲURAYSH B. BADRĀN [see ʿUḲAYL, Banū —]

ḲURAYYĀT AL-MILḤ, a group of villages in the extreme northwest of Saʿūdī Arabia, in the northern section of the NW-SE depression of Wādī al-Sirḥān (approx. long. 37° 40' E. and lat. 31° 25' N.). The largest settlements, (though none are larger than 2,000 inhabitants) are Ithra, al-Ḳarḳar, Manwā, Ghaṭṭī, Kāf, and an-Nabk, which is the administrative centre and residence of the local *Amīr*, who now reports to Mecca, but at the time of Euting's visit (1301/1883) reported to the *Amīr* of Ḥāʾil. Until the consolidation of the House of Ibn Saʿūd's power, the villages were frequently under dispute between the Shammar and Ruwāla Bedouins, to whose leaders the inhabitants of Ḳurayyāt al-Milḥ had to pay tribute. Aside from some meagre oasis agriculture (chiefly dates, alfalfa, and a little grain in good years), the principal income was derived from the caravan trade, particularly during the pilgrimage season, but most importantly from the area's extensive salt pans, which have been intensively mined for several centuries; hence its collective name of "Salt Villages". The salt was traded southeastwards to al-Djawf, Sakāka, and Ḥāʾil, and northwards to Jordan and Syria. By the mid-20th century the drilling of deep water wells and the spread of industrialisation had allowed a greater diversification of agriculture and employment for

cash wages, so that the villages were much less dependent on trade and salt production.

Reputedly Nabataean, but certainly pre-Islamic ruins, pottery, and inscriptions attest to the antiquity of settled life in this area.

Euting, *Tagebuch einer Reise in Inner-Arabien*, i, Leiden 1896; Department of Antiquities and Museums, Ministry of Education, Kingdom of Saudi Arabia, *An introduction to Saudi Arabian antiquities*, al-Riyāḍ 1395/1975. (F. S. VIDAL)

ḲURAYẒA, BANŪ, one of the three main Jewish tribes of Ya<u>th</u>rib (Medina), with lands towards the south-east of the oasis. As in the case of the other Jewish groups, it is not known whether they were descended from refugees of Hebrew stock or from Arabs who had adopted Judaism. They adhered firmly to the Jewish religion, but at the same time had adopted many Arab practices and had intermarried with Arabs. According to a genealogy given by al-Samhūdī, Ḳurayẓa, Hadl and ʿAmr were sons of al-<u>Kh</u>azra<u>dj</u> b. al-Ṣarīḥ, who was descended from Aaron (though only eight intermediate names are given). The related tribe of al-Naḍīr was said to be al-Naḍīr b. al-Naḥḥām b. al-<u>Kh</u>azra<u>dj</u> b. al-Ṣarīḥ. Ḳurayẓa and al-Naḍīr, with the related groups, after their settlement in Ya<u>th</u>rib developed agriculture (palms and cereals) and dominated politically the previous Arab inhabitants. The Jews lost their dominant position, however, after the coming of al-Aws and al-<u>Kh</u>azra<u>dj</u>, though they appear to have retained a measure of independence. Both Ḳurayẓa and al-Naḍīr supported al-Aws at the battle of Buʿāth [*q.v.*]. At the time of the Hi<u>dj</u>ra, the two most important men of Ḳurayẓa appear to have been al-Zabīr b. Bāṭā b. Wahb and Kaʿb b. Asad; each of these had an *uṭum* or fort. These and fifteen others are named as hostile to Muḥammad (Ibn Hi<u>sh</u>ām, 352). Ḳurayẓa are said to have had two assemblies (*ma<u>dj</u>lisān*), those of Banū Kaʿb b. Ḳurayẓa and Banū ʿAmr b. Ḳurayẓa (*ibid.*, 691 foot, 711).

It is reported that at the Hi<u>dj</u>ra, Kaʿb b. Asad, acting on behalf of Ḳurayẓa, made an agreement (*ʿahd*) with Muḥammad, and that later during the siege of Medina (the <u>Kh</u>andaḳ) he was persuaded by Ḥuyayy b. A<u>kh</u>ṭab of al-Naḍīr to break it, and the actual document was torn up by Ḥuyayy (Ibn Hi<u>sh</u>ām, 352, 674; al-Wāḳidī, 456). This report is open to grave doubt, however. Ibn Isḥāḳ does not name his sources. Al-Wāḳidī has two: one is a grandson of Kaʿb b. Mālik of Salima, a clan hostile to the Jews; and the other is Muḥammad b. Kaʿb (d. 117-20/735-8), the son of a boy of Ḳurayẓa, who was sold as a slave when they surrendered and later became a Muslim. Both these sources may be suspected of bias against Ḳurayẓa; and it is therefore probable that there was no special agreement between Muḥammad and Ḳurayẓa. It is virtually certain, however, that Muḥammad had a general agreement with the Jews that they were not to support an enemy against him (al-Wāḳidī, 176); and something like this was probably implicit in his alliance with the Arab clans of Medina, since the Jewish clans were allied to one or other of the Arab clans. The Constitution of Medina as given by Ibn Hi<u>sh</u>ām (341-4) does not mention Ḳurayẓa or al-Naḍīr or Ḳaynuḳāʿ by name; but its present form almost certainly dates from after the execution of the men of Ḳurayẓa, and these Jewish groups were probably mentioned in an earlier version.

The question of an agreement affects the moral judgement on Muḥammad's treatment of Ḳurayẓa. During the siege of Medina (<u>Dh</u>u 'l-Kaʿda 5/April 627), Muḥammad became anxious about their conduct and sent some of the leading Muslims to talk to them; the result was disquieting. Though Ḳurayẓa does not appear to have committed any overt hostile act, they had probably been involved in negotiations with the enemy. On this ground, as soon as the besiegers withdrew, Muḥammad attacked Ḳurayẓa and besieged them in their forts (*āṭām*) for twenty-five nights. After negotiations they agreed to surrender unconditionally. Saʿd b. Muʿā<u>dh</u>, chief of the clan of ʿAbd al-A<u>sh</u>hal, with whom they had an alliance, was brought to give judgement on them. He decreed that all the men (who numbered between 600 and 900) were to be put to death and all the women and children sold as slaves. This decree was carried out (recently, W. N. Arafat in *JRAS* [1976], 100-7, has maintained that by no means all the adult males were killed, but his argument is not entirely convincing). Three young men of the clan of Hadl, who had been with Ḳurayẓa in the strongholds, slipped out before the surrender and professed Islam. One or two other also escaped. As part of his share of the booty, Muḥammad received one of the women, Rayḥāna, and married her as a concubine, though she is said to have become a Muslim. Muḥammad b. Kaʿb al-Ḳuraẓī (mentioned above) gained distinction as a scholar.

ḲURBA [see ḲARĀBA]

ḲURBĀN, sacrifice, sacrificial victim. The word goes back to the Hebrew *ḳorbān*, perhaps through the intermediary of the Aramaic (cf. Mingana, *Syriac influence on the style of the Ḳur'ān*, in *Bulletin of the John Rylands Library*, xi (1927), 85; S. Fränkel, *De vocabulis in . . . corano peregrinis*, 20). The language of the Ḳur'ān, as is well known, shows a preference for religious technical terms ending in *-ān* and some of them are not always used with their original significations. This is true of *ḳurbān*, which occurs three times in the Ḳur'ān. In sūras III, 179 and V, 30 it obviously means sacrifice. In sūra XLVI, 27, however, we read: "Did those help them, whom they had taken for *ḳurbān* as gods to the exclusion of Allāh!" Here the word must be more or less synonymous with "gods". Probably it has a meaning which is connected with the Arabic *ḳ-r-b* (see below); the commentators take the same view and the word is explained as "mediators" [see <u>SH</u>AFĀʿA].

The word hardly seems to occur in classical *ḥadi<u>th</u>*. The *Lisān* mentions two traditions which are striking enough: "The characteristic of the community (i.e. the Muslims) lies in the fact that their *ḳurbān* is their blood", i.e. that instead of sacrifice they have offered the blood of their martyrs. And the other: "The *ṣalāt* is the sacrifice of every pious man". We may suppose there are apologetic tendencies in both traditions.

The term also came to be applied in Muslim ritual

to the killing of an animal on the 10th Dhu 'l-Ḥidjdja and the whole celebration on this and the following *tashrīḳ* days is called *ʿĪd al-Ḳurbān* [cf. ʿĪD AL-AḌḤĀ] in Turkish-speaking countries *Ḳurbān-bayramî* (cf. BAYRAM).

In Christian-Arabic the word means the eucharist; cf. G. Graf, *Verzeichnis arabischer kirklicher Termini*[2] (= CSCO, 147), Louvain 1954: the consecrated elements, especially the host; *ʿĪd al-Ḳurbān* = feast of Corpus Christi.

In conclusion it should be pointed out that there seems to be a genuine Arabic word *ḳurbān*, plur. *ḳarābīn*, which means the courtiers and councillors in immediate attendance on a king; the word probably comes directly from *ḳ-r-b* "to be near".

Bibliography: Given in the article.

(A. J. WENSINCK)

KURBUḲA, properly KÜR-BUGHA (T. "stout-hearted bull, stallion") ABŪ SAʿĪD ḲIWĀM AL-DAWLA, Turkish commander of the Saldjūḳ period and lord of al-Mawṣil.

In the war waged by Tutush b. Alp Arslan, Berk-yaruḳ's uncle [*q.v.*], against the two rebellious governors Aḳ Sonḳor and Būzān, which ended with the capture and execution of these two, the *amīr* Kurbuḳa, who had been sent to their help by Berk-yaruḳ, was also taken prisoner. After Tutush had fallen in Ṣafar 488/February 1095 (cf. BARKYĀRŪḲ), Kurbuḳa was released by his son Riḍwān, and with his brother Altūntāsh collected a band of adventurers and occupied Ḥarrān. Muḥammad b. Muslim b. Ḳuraysh lord of Naṣībīn then applied to him for help against his brother ʿAlī, who had been appointed governor of al-Mawṣil by Tutush; Kurbuḳa made an alliance with Muḥammad, but had him murdered after he had seized Niṣībīn and set out against al-Mawṣil, which ʿAlī had to surrender after a long siege (Dhu 'l-Ḳaʿda 489/Oct.-Nov. 1096). After the capture of al-Mawṣil he disposed of his troublesome brother Altuntash and occupied al-Raḥba. In 491/1098 Berk-yaruḳ sent him with a large army to retake Anṭākiya [*q.v.*], which had just been conquered by the Christians. Edessa, which had also just been taken from the Muslims, was besieged by Kurbuḳa on the way, but he had to give up the siege and soon afterwards appeared before Anṭākiya. When the Christians made a bold sortie against the besiegers, he inflicted a disastrous defeat on them in spite of their superior numbers; Kurbuḳa's own conduct is said to have contributed towards the disaster, as his arrogance irritated his commanders so that they only awaited a favourable opportunity to abandon him. In the battle between Berk-yaruḳ and his brother Muḥammad in Radjab 492/May-June 1100, which ended in the defeat of the former, Kurbuḳa commanded Berk-yaruḳ's left wing. In the following year he was sent to Ādharbāydjān. Here he conquered the greater part of the country, but when he was nearing the town of Khūy or Khoī [*q.v.*], he fell ill and could not continue the campaign. He died in Dhu 'l-Ḳaʿda 492/Aug.-Sept. 1102, after appointing Sonḳordja his successor.

(K. V. ZETTERSTÉEN*)

ḲŪRČI (from the Mongolian *ḳorči*, "an archer", from *ḳor*, "quiver"; *Tadhkirat al-mulūk*, translated and explained by V. Minorsky, London 1943, 32, n. 2), a military term with a variety of different meanings: "he who bears arms, the sword, chief huntsman" (Pavet de Courteille, *Dict. turc. or.*, 425; "armourer, sword-cutler, troop of cavalry, captain of the watch; leader of a patrol, commandant of a fort, gendarmerie in charge of a city's security" (Sulaymān Bukhārī, *Lughat-i Čaghatāy ve Türkī ʿOthmānī*, Istanbul 1298/1880-1, 233), "sentry, sentinel, guard, inspector" (Vambery, *Čaghataische Sprachstudien*, 316).

In Ṣafawid usage, *ḳūrčī* denoted a member of the Turcoman tribal cavalry which formed the basis of Ṣafawid military power, and in this sense was therefore synonymous with *ḳizil-bāsh* [*q.v.*]. The *ḳūrčīs* were clearly distinguished from non-*ḳizil-bāsh* units, which were termed *lashkar-i umarāʾ*; *sipāhiyān*; etc. *Ḳūrčīs* with special functions were denoted by special titles (see index to Minorsky, *op. cit.*, under *qūrchī*; for additional titles, see index to Iskandar Beg Munshī, *Tārīkh-i ʿĀlam-ārā-yi ʿAbbāsī*, ii, Tehran 1335/1956, 1219-20); some of these titles (e.g. *ḳūrčī-yi tarkash*, "*ḳūrčī* of the quiver"; *ḳūrčī-yi shamshīr*, "*ḳūrčī* of the sword"; *ḳūrčī-yi tīr-u-kamān*, "*ḳūrčī* of the bow and arrow"), appear to denote ranks, but their relative importance is not certain. *Ḳūrčīs* constituted the royal bodyguard, in this capacity sometimes being specially designated *ḳūrčīyān-i khāṣṣa-yi shāhī* (*Tārīkh-i ʿĀlam-ārā-yi ʿAbbāsī*, i, 99), or *ḳūrčiyān-i ʿiẓām-i shāhī* (*ibid.*, i, 47).

The commander of the *ḳūrčīs* was called *ḳūrčībāshī*. This office is first mentioned in the Ṣafawid chronicles in 911/1505-6, and seems from the first to have been distinct from the office of the *amīr al-umarāʾ* (R. M. Savory, *The principal offices of the Ṣafawid state during the reign of Ismāʿīl I (907-30/1501-24)*, in *BSOAS*, xxiii [1960], 101). At first overshadowed by the *amīr al-umarāʾ*, the *ḳūrčībāshī* became one of the most important officers of state under Ṭahmāsp, Ismāʿīl II and Sulṭān Muḥammad Shāh [*q. vv*], wielding great authority in both military and political affairs. It is noteworthy that for a period of forty years (*ca.* 955-95/1548-87), nearly all the *ḳūrčībāshīs* were drawn from the Afshār tribe. With the accession of ʿAbbās I [*q.v.*], the importance of the *ḳūrčībāshī* declined *pari passu* with that of the *ḳūrčīs* themselves, but he still "carried great weight in public affairs" (Minorsky, *op. cit.*, 117).

Bibliography: In addition to the references in the text, see R. M. Savory, *The principal offices of the Ṣafawid state during the reign of Ṭahmāsp I (930-34/1524-76)*, in *BSOAS*, xxiv (1961), 79; G. Doerfer, *Türkische und Mongolische Elemente im Neupersischen*. i. *Mongolische Elemente im Neupersischen*, Wiesbaden 1943, 427-32, contains an excellent discussion of the various meanings of *ḳūr* and *ḳūrčī*, with full textual references.

(R. M. SAVORY)

KURD ʿALĪ, MUḤAMMAD FARĪD, Syrian journalist, scholar and man of letters, was born in Damascus in 1876, of a father of Kurdish origin and a Čerkes mother. From an early age, he showed an interest in nature and in books, and it was reading which, combined with his innate curiosity and gifts of observation, made the greatest contribution to his intellectual development. Already bilingual in Turkish and Arabic, he learnt French from the Lazarist Fathers of Damascus, and this enable him to acquire, thanks to assiduous reading of books and periodicals a knowledge, extensive for his time, of Western civilisation, and in particular, of French literature. He perfected his Arabic-Islamic education as a pupil of some distinguished masters: Ṭāhir al-

Djazāʾirī, Muḥammad Mubārak and Salīm al-Bukhārī. In 1897 he joined the staff of the first Arabic newspaper of Damascus, *al-Shām*, and at the same time collaborated in the Egyptian review *al-Muḳtaṭaf*. He also attempted to translate some French novels into Arabic. Four years later he decided to visit Paris, but while passing through Cairo he was detained there by the friends whom he had made by his collaboration in *al-Muḳtaṭaf* and he thus had the opportunity of becoming acquainted with the celebrities of the age, most notably with Muḥammad ʿAbduh [*q.v.*], whose lectures at al-Azhar he attended. Obliged to leave Egypt because of an epidemic, Kurd ʿAlī returned to Damascus, but the atmosphere there seemed to him so oppressive that he soon returned to Cairo, where he stayed until 1908; during this second stay, he collaborated in editing *al-Ẓāhir*, *al-Musāmarāt*, and *al-Muʾayyad*, and founded the review *al-Muḳtabas*, a periodical which was always very close to his heart; after three years of publication in Cairo, *al-Muḳtabas* was transferred in 1908 to Damascus and continued to appear for a further six years, until the time when the Ottoman authorities, irritated by Kurd ʿAlī's frankness, forbade its publication.

At the end of 1908, Kurd ʿAlī succeeded in realising the dream which he had first cherished eight years before and, passing this time through Lebanon, went to France and spent a year there; in the course of this visit, for which he had been preparing himself for a long time, he observed the people of the country and their way of life, visited the principal libraries, attended, theatrical performances and took a special interest in the Académie Française. Returning to Damascus via Istanbul, he continued to edit his review and then, at the end of the year 1913, undertook a second journey to Europe; he went first to Italy, where he had the good fortune to install himself in the library of prince Leone Caetani, whose *Annali dell'Islam* had revealed to him a method of working to which the Orient was not yet accustomed; it was here that he assembled much of the documentation which he required for the composition of a definitive history of Syria, the *Khiṭaṭ al-Shām*, a monumental work which is still the most complete study of this vast subject. In 1921-2, a third journey took him to the countries of western Europe, and it was on his return that he wrote the *Gharāʾib al-Gharb*, a *riḥla* [*q.v.*], published in 1923, based on notes taken in the course of his three journeys and reflections inspired by his observations. Immediately after the Great War, he had been appointed general secretary of the Committee for Public Education and it was in this capacity that he considered the creation of an organisation responsible for purifying and enriching the Arabic language, publishing texts and encouraging the literary and intellectual activity of his country. On 8 June 1919, he obtained authorisation to transform the *Dīwān al-Maʿārif*, which had been founded a few months earlier, into an Arab Academy [see MADJMAʿ ʿILMĪ. 1. Arab countries]; he was thus able to put into effect the project of which he had been inspired, ten years previously, by his visit to the Académie Française. The career of Kurd ʿAlī was henceforward inseparable from the activity of his Academy, to which he devoted the greater part of his time and over which he presided until his death, on 2 April 1953; the only intervals in his work with the Academy were his two terms of office as Minister of Public Education and his third journey to Europe.

Kurd ʿAlī was of a witty and playful nature; a great conversationalist, he loved to joke and play with words, and his style is an accurate reflection of his personality. He left an abundant corpus which included, apart from the thousands of pages of articles published in the review in which he collaborated at the start of his career, in *al-Muḳtabas* and in the *Madjallat al-Madjmaʿ al-ʿIlmī al-ʿArabī* (*MMIA*), editions of texts and original works of a historical or literary nature. He was largely responsible for making known the "epistles" of Ibn al-Muḳaffaʿ, of ʿAbd al-Ḥamīd, of Ibn al-Mudabbir [*q.vv.*]., etc. in his *Rasāʾil al-bulaghāʾ*, Cairo 1908, 1913, 1946, and he enriched the Arab Academy Publications with the *Sīrat Ibn Ṭūlūn* of al-Balawī (1939), the *al-Mustadjād min faʿalat al-adjwād* of al-Tanūkhī (1946), the *Taʾrīkh ḥukamāʾ al-Islām* of al-Bayhaḳī)1946), the *Kitāb al-Ashriba* of Ibn Ḳutayba (1947), and the *al-Bayzara* of Kushādjim (1953).

Among his original works, mention should be made of his contribution to literary history and criticism: *Umarāʾ al-bayān*, Cairo 1937, and *Kunūz al-adjdād*, Damascus 1950. Apart from the *Gharāʾib al-Gharb* of 1923 and the *Khiṭaṭ al-Shām*, Damascus 1925 (6 vols.), his major work, Kurd ʿAlī collected in *al-Ḳadīm wa 'l-ḥadīth*, Cairo 1925, a large number of the articles published in *al-Ẓāhir*, *al-Muʾayyad* and *al-Muḳtabas* and added an account of his travels in the Ḥidjāz and Palestine. In addition, he pleaded the cause of Arab-Islamic culture in *al-Islām wa 'l-ḥaḍāra al-ʿarabiyya*, Cairo 1934 (2 vols.), published a critical study of the morals and customs of the Orient in *Aḳwālunā wa-afʿālunā*, in Cairo 1946, devoted a monograph to the oasis of Damascus, *Ghūṭat Dimashḳ*, Cairo 1949, and finally published four volumes of memoirs, *Mudhakkirāt*, Damascus 1948-51.

Bibliography: Apart from the biographical data given at the end of the *Khiṭaṭ al-Shām* and of his *Memoirs*, see Brockelmann, S III, 430-4; S. Dahhān, in *MMIA*, xxx/2, 211-52; idem, in *Mélanges Massignon*, i, 379-94; idem and H. Laoust, *L'oeuvre de l'Académie arabe de Damas, 1921-1951*, in *BEO*, xiii (1949-51), 161-219. (CH. PELLAT)

i. — General Introduction

The Kurds, an Iranian people of the Near East, live at the junction of more or less laicised Turkey, Shīʿi Iran, Arab and Sunnī ʿIrāḳ and North Syria,- and Soviet Transcaucasia. The economic and strategic importance of this land, Kurdistān, is undeniable. Since the end of the First World War, the Kurdish people, like all the rest of their neighbours, have undergone considerable transformations as much in the political order as in the economic, social and cultural domain. Many works have been published, a few in every country, on these different problems. Some excellent general bibliographies exist: F. B. Rostopčin, *Bibliografiya po kurdskoy probleme*, in *Revol. Vostok*, 1933/3-4 (19-20), 292-326, 5 (21), 159-73; O. Vil'čevskiy, *Bibliografičevskii obzor zarubežnukh kurdskikh pečatnukh izdaniy v XX stolety*, in *Iranskie Yaziki*, i, Moscow-Leningrad 1945, 147-81; M. B. Rudenko, *Opisanie Kurdskikh rukopisey Leningradskikh sobraniy*, in *Izdat. Vost. Lit.*, Moscow 1961; N. A. Aleksanian, *Bibliografiya k'tēbēd k'ördiēye Sovetie*, Erevan 1962, in Kurdish and Russian; J. S. Muaelian, *Bibliografiya po kurdovedeniyu*, in *Izdat. Vost. Lit.* 1963; C. J. Edmonds, *A bibliography of Southern Kurdish, 1920-1936*, in *JRCAS*, xxiv (1937), 487-97; idem, *A bibliography of Southern Kurdish, 1937-1944*, in *JRCAS*, xxxii (1945), 185-91; D. N. MacKenzie, *A bibliography of Southern Kurdish, 1945-1955*, in *JRCAS*, lxiv (1957), 31-7; E. R. McCarus, *Kurdish language studies*, in *MEJ* (Summer 1960), 325-35; P. ii. — The Kurds and their Country: Kurdistān

A. The territorial extent of Kurdistān. If the ethnic term "Kurd" is of ancient usage, for it is known since the Arab conquest if one does not wish to go further back (cf. below, *Origins*), it seems that, historically, the name Kurdistān or "land of the Kurds" dates from the time of Sultan Sandjar (d. 552/1157), the last great Saldjūḳid, who created a province with its capital called Bahār, to the north-east of Hamadān. This province, situated between Ādharbāydjān and Luristān, included the regions of Hamadān, Dīnawar, Kirmānshāh and Senna, to the east of the Zagros and to the west of Shahrazūr and Khuftiyān, on the Zāb. The whole numbered 16 cantons, enumerated by Ḥamd Allāh Mustawfī (d. 750/1349), in his *Nuzhat al-ḳulūb* (ed. Le Strange, 108; ed. Tehran 1957, 127). The nominal extent of Kurdistān varied however throughout the centuries. Sharaf al-Dīn, in his *Sharaf-nāma* (1596), does not hesitate to include the Lurs in Kurdistān, in chs. 3 and 4 of his 1st Book, as do all the Arab historians, who include everything in the province they call al-Djibāl [*q.v.*], cf. V. Barthold, *Istoriko-geografičeskiy obzor Irana*, St. Petersburg 1903, 138. For his part, the Turkish traveller Ewliyā Čelebi (d. *ca.* 1093/1682), in his *Siyāḥat-nāme*, iv, 74-5, enumerates the 9 *wilāyet*s which formed Kurdistān in his time: Erzurum, Van, Hakkāri, Diyārbakr, Djazīra, ʿAmādiya, Mawṣil, Shahrazūr and Ardalān, and which required 17 days to traverse.

But the rivalries between the Ottoman sultans and the Shāhs of Persia broke up this unity. In the 17th century the Turkish administration gave no more than 3 *liwā*'s to the *eyālet* of Kurdistān: Darsīm, Mush and Diyārbakr. In the same way, in Iran in the 16th century, Hamadān and Luristān were detached from Kurdistān and the name was reserved for the region of Ardalān with Sinna as its capital. Today, Iran is the only country to recognise a province by the name of Kurdistān. Everywhere else, Kurdistān has been banished from the language of the administration and the geographical atlases. In Turkey one speaks of Eastern Anatolia; in ʿIrāḳ, of the provinces of the north; in Syria, of the province of Djazīra (Ghassemlou, 14).

B. The ethnic and geographical extent of Kurdistān. From the above, it is clear that the historical and then political extent of Kurdistān does not coincide with its actual ethnic extent. So the frontiers within each of the countries concerned must be defined more or less approximately.

In Turkey, the Kurds inhabit the whole of the eastern region of the country. According to Trotter (1878), the limit of their extent to the north was the line Divriği—Erzurum—Kars. In the region of Erzurum they are found especially to the east and the south-east. The Kurds also occupy the western slopes of Ararat, the districts of Kağizman and Tuzluca. On the west they extend in a wide belt beyond the course of the Euphrates (Ritter, xi, 144), and, in the region of Sivas, in the districts of Kangāl and Divriği. Equally, the whole region includes areas to the east and south-east of these limits. Some quite important colonies of Kurds are even found in Cilicia, to the south of Ankara, in Heymana and in the large towns of Istanbul, Ankara and Izmir. In brief, it may be said that if Turkey is at present divided administratively into 67 *ils* or provinces, Turkish Kurdistān numbers at least 17 of them almost totally: in the north-east, the provinces of Erzincan, Erzurum and Kars; in the centre, going from west to east and from north to south, the provinces of Malatya, Tunceli, Elaziğ, Bingöl, Muş, Karaköse (Ağri), then Adiyaman, Diyarbakir, Siirt, Bitlis and Van; finally, the southern provinces of Urfa, Mardin and Çölamerik (Hakkāri). The Kurds of Turkey are also linked on the east with their brothers from Iran.

The latter inhabit the north-west of Iran. Firstly in the provinces of Western Ādharbāydjān, to the east of Lake Riḍāʾiyya (Urmiya), the districts of Makū, Kotur, Shahpur, and to the south of the lake, Mahābād (ex-Sabla); in the province of Ardalān, called the province of Kurdistān, whose capital is Senna or Sanandadj, the districts of Bukan, Saḳḳiz, Sardasht, Bana, Bidjar (Garrus), Meriwān and

Hawramān; in the province of Kirmānshāh, Ḳaṣr-i Shīrīn. There are furthermore isolated groups of Kurds in Khurāsān, at Budjnurd and in Fārs and Kirmān, not to mention the numerous Kurds who live in the cities such as Tabrīz and the outskirts of Tehran (Brugsch, *Reise*, ii, 496). Much further to the east and outside Iran, an important Kurdish tribe is to be found in Balūčistān.

In ʿIrāḳ, the Kurds occupy the north and north-east of the country in the *liwā*ʾs or provinces of Duhok, recently detached from the province of Mawṣil, the *nāḥiya*s or districts of Zakho, Mazuri Djēr, ʿAmādiya and ʿAkra. Left outside their administration are Sindjār and Shaykhān, peopled by the Yazīdīs [*q.v.*]; the *liwā*ʾs of Kirkūk, Arbīl and Sulaymānī (entirely Kurdish) and, in the *liwā*ʾ of Diyālā, the *nāḥiya*s of Khānaḳīn and Mandali, where they are neighbours of the Kurds of Iran to the west of the Zagros. The Kurds are equally numerous in Baghdād and Mawṣil.

In Syria, they constitute three distinct belts, in the north of the country and to the south of the highway which forms a frontier and where they are in direct contact with their compatriots in Turkey. A belt of 40 km. width, in the Kurd Dāgh; a group (60 × 40 km.), to the east of the Euphrates where the river enters Syria near Djarablus; and finally, a belt of 250 km. in length by 30 km. in depth in the Djazīra, between the Khābūr, a tributary of the Euphrates and the Tigris, with Raʾs al-ʿAyn, Darbisiyya, ʿAmūda, Kamishlī, Andivar and Dērik. In this "duck's beak", the Kurds of ʿIrāḳ and those of Turkey are juxtaposed (Rondot, 80). The Syrian towns of Damascus, Ḥamāt and Aleppo count many thousands of Kurds.

Some still exist in Soviet Transcaucasia. In the Republic of Armenia, 35 villages in the *rayons* of Aparan, Basargečar, Huktemberia, Talin and Ečmiadzin; in the Republic of Ādharbāydjān, 25 villages in the *rayons* of Kelbadjan, Latchin and Kubatli (Aristova, 47-8, 64). There are numbers of Kurds living in Erevan, Baku and, in the Republic of Georgia, Tbilisi or Tiflis.

The imprecise limits of the frontiers of Kurdistān hardly allow an exact appreciation of the area. The *Encyclopaedia Britannica* estimates the length of Kurdistān at 600 miles and its breadth at 150 miles. The *Ḳāmūs al-ʿālam*, Istanbul 1896, which naturally is only concerned with the Kurdish *wilāyet*s of the Ottoman Empire, sets its length at 900 km. and its breadth between 100 and 200 km. At present, the different provinces of Kurdistān cover around 190,000 km² in Turkey, 125,000 km² in Iran, 65,000 km² in ʿIrāḳ, and 12,000 km² in Syria. The total area of Kurdistān can then be estimated at approximately 392,000 km².

While there are many Kurds who live outside ethnic Kurdistān, there are numerous non-Kurds who live in Kurdistān. In Turkey, there are some Turks everywhere, but also, in the north, some Ossetes and some Tcherkesses, and in the south some predominantly Syriac or Jacobite Christians (Cl. Dauphin, *Situation actuelle des communautés chrétiennes du Ṭūr ʿAbdīn (Turquie orientale)*, in *Proche Orient Chrétien*, Jerusalem, xxii/2-3 (1972), 323-7). The Armenians have in fact completely disappeared. In Iran to the west of Lake Riḍāʾiyya and in ʿIrāḳ in the region of Duhok-Zakho and Kirkūk, some Nestorians and Chaldaeans are to be encountered, together with, in the towns, a few rare Armenians. The Jews, at one time relatively numerous, have all emigrated since 1948 (W. J. Fischel, *The Jews of Kurdistan a hundred years ago, a traveler's record*, in *Jewish Social Studies*, vi [1944], 195-226; I. Ben-Zvi, *The exiled and the redeemed host in Assyria*, in *The Jewish Publication Society of America*, Philadephia 1957). In Kirkūk one finds some Turcomans (I. C. Vanly, *Le Kurdistan irakien*, 342-3).

C. Numerical extent of the Kurds. As the Kurds are not ordinarily registered as such in the censuses of the population carried out by the different states where the Kurds are resident, it is impossible to have exact statistics of the total population of Kurdistān. Besides, statistics require delicate handling, and they risk being manipulated for political motives. Cf. for ʿIrāḳ, M. Durra, 1st ed. 1963, 210 and 2nd ed. 1966, 225; for Turkey, E. Esenkova, 1967, 29. Here are a few examples, whose divergences, which show the complexity of the question, may undoubtedly be explained by the fact that their authors do not apply the same criteria of ethnic adherence, religion and language. Hence the elimination of the Lurs. Account must also be taken of demographic progression, which works in favour of the Kurds, a fact which is at times equally forgotten. Here are a few figures, in thousands, supplied by: (1) B. Nikitine, *Les Kurdes*, 1956, 42; (2) S. I. Brouk, *L'ethnographie*, 1958, 30; (3) A. Ghassemlou, *Kurdistan*, 1965, 23; (4) I. C. Vanly, *Le Kurdistan irakien*, 1970, 30; (5) C. J. Edmonds, *Kurdish nationalism*, in *Journal Cont. Hist.* vi/1 (1971), 92:

	1	2	3	4	5
Turkey	4,500	2,500	4,900	6,600	3,200
Iran	1,500	1,800	3,300	4,250	1,800
ʿIrāḳ	500	900	1,550	2,000	1,550
Syria	500	300	250	500	320
Transcaucasia	250	—	160	150	80
Total	7,250	5,500	10,160	13,500	6,950

(cf. Edmonds, 92 n. 1).

D. The geography of Kurdistān

1. *Physical aspect*

Kurdistān is in its entirety a country of high mountains. Its skeleton, in its Turkish part, is constituted by the different chains of the Eastern Taurus. These chains begin to take shape from the shores of the Mediterranean at the latitude of the Gulf of Alexandretta, and radiate at first towards the north-east. To the north of Maraş, they form a fork whose northern line pivots away from the Engirek Dağ and Nuruhak Dağ (3,090 m.), continues by the Akra Dağı, joins the chains of Mounts Munzur (3,088 m.), Mercan and Kargaparazı (3,388 m.), then curves in and crosses the mountainous chain of the Araxes and finally ends in the Ararat system.

From our point of departure a second chain, very clearly a crescent in shape, begins to the south of Malatya, continues by the mountains of Maden, the ridges of Haçres (2,689 m.) and Sasun (2, 590 m.) to the south of Muş, pursues its curve to the south of Lake Van, via Mounts Bitlis and Hakâri (3.630 m.), with the Cilo Dağı which culminates in Mount Reşko (4,170 m.).

Between these two lines is situated what is called the Armenian plateau, whose altitude comes down no lower than 1,500 to 1,000 m. Furthermore, some parallel chains on the northern border maintain quite a high level, such as the Çakmak Mountains and, to the south of Erzurum, the volcanic system of Palendöken Dağı (3,124 m.), to the south of which the combination of Mounts Bingöl, Şerafettin and,

further to the west, the heights of Tunceli, constitute this natural fortress of Dersim. In this mass of crystalline rocks the Euphrates has hollowed out deep canyons, and the mountains with steep slopes clothe these inaccessible sites in fantastic shapes. But beautiful fertile plains extend to the north of Malatya (915 m.) to the south-east of Elaziğ (1,020 m.) and to the north of Muş (1,500 m.). All along this Anatolian scar frequent tremors shake the region and claim numerous victims. We may recall the earthquakes of Erzincan in 1939 which killed 25,000 and those, less murderous meanwhile, of Varto in 1966 and Bingöl and Genc in 1971.

To the south of the curve of the Taurus spread the vast flat regions of Adiyaman, Urfa (550 m.) and Diyarbakir (650 m.) which descend abruptly towards Mesopotamia with contours of 3,000 metres, always allowing for certain land movements, such as the volcanic cone of Karacadağ (1,915 m.) and the chain of Ṭūr ʿĀbidīn, which extends from Mardin (1,130 m.) and meets on the east with the much higher massifs of Herakol (2,943 m.) and Mount Cudi (2,089 m. [see DJŪDĪ]).

To the extreme east and more to the north is the supporting point for the Great Ararat or Ağrı Dağ (5,165 m.) and the Small Ararat (3,925 m.) perhaps considered as the pivot of a new system of mountains. Indeed, from this centre seem to radiate several points which, on one side, encircle Lake Van, with to the north the chain of the immense sulphur-spring which is the Tendurek (3,313 m.) and that of the Ala Dağ (3,255 m.); to the east, the Kuh Dağ (2,850 m.), the Mengene (3,610 m.) and the Ispiriz Dağ (3,537 m.) and to the south the Vaviran Dağ (3,550 m.) and the chain of Satak. Let us note, apart from the two Ararats whose structure is due to very ancient volcanic eruptions, two famous volcanoes on the shores of Lake Van: to the north, the Sipan (about 4,434 m.) and especially Mount Nemrut (Nimrūd), whose highest peak has an altitude of 3,140 m. and whose crater has a diameter of 6,400 m. with an interior lake of fresh water at a height of 2,552 m. All this region to the south of Lake Van, which is itself at an altitude of 1,720 m., is in its entirety the highest part of the Kurdish-inhabited area of Turkey.

Elsewhere, other chains of mountains are connected with Ararat; these are clearly oriented north-south, lying between Lake Van and that of Urmia and also separating Turkish Kurdistān from its Iranian part. After having rejoined the almost inaccessible node of the Harki-Oramar country, they slant towards the south-west and also form this *chaîne magistrale* of the Zagros which, in a set of parallel lines, makes up for a good part, the portions of Kurdistān, the eastern faces being situated in Iran and the western faces in ʿIrāḳ. As C. J. Edmonds remarks, it is not always easy to give a name known by all to designate the different chains, for their names vary with the informants, according to whom they are situated on such-or-such a slope, or close to a better-known peak, pass, village or the tomb of a famous saint.

We have, in Iran, some chains which lie, oriented north-west to south-east, with multiple ramifications and parallel series. Let us note in passing some of the highest summits: the Dalenpar (3,748 m.) at the intersection of the three frontiers: Turkish, ʿIrāḳī and Iranian; the Spiraz, the Ḳandīl or Kogiz (3,782 m.) the Galala (3,364 m.), further to the east the Čehel Če<u>sh</u>me ("at the forty springs") (3,416 m.) a real rampart of water of Iranian Kurdistān, and further to the south, the chain of Hawramān (3,216 m.) and that of Cilo, whose average height is 3,500 m., up to the mountains of Luristān and the Pu<u>sh</u>t-i Kūh.

On the ʿIrāḳī side, to the south of the Turkish frontier, in the extension of the chains of the Cudi Dağ, Seman Dağ and Cilo Dağ, but at the same time in a graduated descent towards the Mesopotamian plains, between the Tigris and the Great Zāb, are the Bē<u>kh</u>ayr, Metina and Gara chains and, approaching the Iranian frontier, beyond the Zāb, Mounts Ser-i Korawa (3,603 m.), Dolare<u>sh</u> (3,449 m.), and <u>Kh</u>u-warabtē (3,168 m.). In this region of Bradost, if the frontier chains are still high, e.g. Mount Halgurd (4,013 m.), they tend to become lower as they approach the plains. Also, Mount Handrīn to the south-east of Rawāndiz [*q.v.*] is no more than 2,793 metres. As soon as one crosses the Little Zāb, the chains stretch out in parallels from the dorsal column of the Zagros. The line Kurakad<u>j</u>aw-Go<u>dj</u>ar-Kurkur-Asis includes further numerous peaks between 2,950 and 1,960 metres high. A second line Azmir-Ḳarasird is yet lower, between 1,870 and 1,608 m. high, with however, to the north-west of Sulaymāniyya, the remarkable ridged upthrust of the Pira Magrun (3,183 m.). A last parallel chain Bingird-Beranan is still several hundreds of metres lower (between 1,739 and 1,477 m.). Further to the west, the long chain of the Kara Dağ, from 1,378 to 2,017 metres, with multiple passes, henceforth separates the high country from the plains which now extend without an obstacle towards Altun Köprü, Kirkūk and Ṭawḳ, to be bordered and limited further to the west by the Ḥamrīn Mts. (1,640 m.) which, oriented transversely south-east to north-west, traverse the Diyāla, the Sirwān and finally the Tigris, quite near to where the Little Zāb flows out.

Let us further note, although the new administrative division of ʿIrāḳ leaves it outside Kurdistān, the <u>Dj</u>abal Sin<u>dj</u>ār, where the Yazīdīs, who are themselves really Kurds, live. This chain, 60 km. in length and 15 km. in width and lying at an altitude of approximately 1,600 m., is situated in Mesopotamia to the west of Mosul and at the same latitude.

If Kurdistān is a country of very uneven relief, it is no less generously watered by numbers of clear springs and many watercourses and actual rivers.

Let us first note the Araxes or Aras whose source is clearly in Kurdistān in the plateau of Bingöl, with a thousand lakes, between the Tigris and Euphrates, but in contrast to these two rivers which are directed towards the south-west, it flows first towards the north, bends towards the east and passes into Soviet Armenia.

The two great Biblical rivers traverse Kurdistān in particular. The Euphrates [see AL-FURĀT] is formed by two principal branches which enclose a vast Kurdish region. The northern branch, the Kara Su (450 km. long) is made up at its source of numerous springs which come from the Dümlü Dağ; then it flows in the plain of Erzurum where it receives the springs which rise in the Çoruh Dağ, directs itself westward in narrow gorges, waters Erzincan, slants towards the south and follows a capricious course which snakes in every sense. It waters Kemah, passes by Kemaliye, and runs into mountains on all sides which block its passage, to rejoin a little to the south of the Eğil the southern branch or Murat Su (659 km. long). This last has its source to the noth of Lake Van, at the foot of the volcanic Mounts Ala Dağ and Tendürek; the Murat Su climbs up again a little to the north, passes by Diyadin and Karaköse, turns off again to the south and waters Tutak and Malazgirt.

Then, always following its sinuous course, it passes to the north of Muş, waters Genc, Palu and Pertek, finally joining the northern branch to the north of Keban. Thereafter the two branches form the Euphrates properly so-called. Although the only important tributary on the right bank of the Kara Su is the Tohma Su (194 km. long), which flows into it to the north of Malatya and then runs outside Kurdistān, the Murat Su has numerous tributaries which, like the Peri Su (235 km. long), with their subtributaries, literally criss-cross Kurdistan; no area is very far from a watercourse.

The Tigris [see DIDJLA], the other great river of the region (1,718 km. long), waters Kurdistān in its upper course. It has its source in the region of Lake Hazar to the north of the Maden Mts., waters for 300 km. of Turkish Kurdistān the towns famous in Kurdish history, sc. Ergani, Diyarbakir, Hasankeyf and Cizre/Djazīra. There are numerous tributaries, all on the left bank: Anbar, Batman, Gurza and especially Botan (226 km.), fertilise the land. It passes the ʿIrāḳī frontier at Pēsh Khābūr, where its tributary the Khābūr [*q.v.*] joins it, and whose sub-tributary the Hazil waters Zakho. There then develops a complete network of beautiful streams, all tributaries of the Tigris and which are actual rivers. First of all the Great Zāb (392 km. long), which rises in Turkey in Mergene Dağı between Lakes Van and Riḍāʾiyya. It waters Culamerik/Djulamarg, then in ʿIrāḳ the regions of Zibar and Barzan and, by one of its offshoots, the highly picturesque town of Rawāndiz. It joins the Tigris 45 km. south of Mawṣil. The Little Zāb (400 km. long) has its source in Iran, near Lāhīdjān, a land of lakes. Its tributaries are numerous in Persia as well as in ʿIrāḳ. After having watered Taktak and Altun Köprü, it joins the Tigris. On its lower course, at Dukan, an enormous dam was completed in 1958 with a capacity of 7 billion m³ of water, which stretches over 50 km.² Its aim is firstly to regulate the flow of the Tigris, subject to catastrophic floods, but also to irrigate about 250,000 hectares. A hydro-electric plant with a capacity of 200,000 kilowatts is of importance in the region of Čamčamāl and will give the Kurdish provinces of ʿIrāḳ self-sufficiency in energy. The ʿAdhaym (230 km. long) rising in the locality of Bazyan, with its various ramifications, waters Kirkūk, Daḳūḳ Tuz and Khurmatu, and traverses the Ḥamrīn Mts., hurling itself into the Tigris 30 km. south of Baghdād. Finally, there is the Diyāla (386 km. long) which rises in the mountains of the ʿIrāḳī-Iranian frontier; its principal source in ʿIrāḳ is the Tandjaru which waters the plain of Shahrazūr, and in Iran the Sirwān rising in Luristān. After Derbend-i Khān, where a great dam has been constructed which is intended to serve for irrigation in ʿIrāḳ, these two branches constitute the Diyāla, which flows into the Tigris south of Baghdad.

Iranian Kurdistān is also traversed by numerous streams of which several rise in the Čihil Česhme, a great massif of 2,085 m. height in the Mukri country. Let us note only the Ḳîzîl Uzun, whose various ramifications water all the Ardalān counry, not to mention the Djagatu (240 km.) and the Tatahu which both flow into Lake Riḍāʾiyya.

As with the mountains, the streams which run through Kurdistān may change their names according to the region traversed. Many watercourses, moreover, take their name very simply from the principal locality that they traverse.

There are also several lakes in Kurdistān, of which the largest is Lake Van. Situated at an altitude of 1,700 m., it has an area of 3,700 km.² Its salt waters are due to a volcanic barrier which deposits on its banks carbonate and soda sulphate. Only one kind of fish is caught there, a sort of large bleak with changing colours. To the north of Lake Van is Lake Nazik and to the north-east of Van is Lake Ercek. Further to the north is Lake Balik lying to the east of Karaköse. At the sources of the Tigris to the north-west of Maden is the Hazar Gölü, quite deep and with an area of about 50 km.² Its waters are salt and eels are caught there. In Iran one may cite Lake Urmia with a Kurdish population bordering it. It is larger than Lake Van (5,700 km.²), 130 km. long and 40 km. wide in places; it is more salt than the Dead Sea, and no fish can live there. Not far from there and to the south are two small lakes, the Shor Göl and the Daryāče-i Kopi. At the ʿIrāḳī frontier to the west of Mari Van and south-east of Pendjwin is Lake Zrêbar. In ʿIrāḳī Kurdistān there are no lakes at all.

Because of its altitude, the climate of Kurdistān is harsh. Snow covers the high summits for many months of the year. Precipitation is variable according to the regions. In the plains, rainfall varies between 200 and 400 mm. a year, although it may reach between 700 and 2,000 and even 3,000 mm. on the plateaux between the different chains of mountains. But in the valleys of central Kurdistān, the climate is continental and even arid, and there are sometimes several months without a drop of water.

The temperature also undergoes quite large variations. At Karaköse in the north it may fall to —30°-35°C. in winter and rise in the south in summer to +35°-40°C. at Kirmānshāh (Ghassemlou, 15). In Iranian Kurdistān, where a dry continental climate rules, the range may vary between —22°C. and +32°C. In general, the eastern slopes of the Zagros are more favoured than the western slopes. At Senna we have —15° in January and +35° in July; at Khāniḳīn, +2° in January and +41.8° in July; at Kirkūk, + 14.5° and +43°C. Further to the west, we find, in January and July respectively, at Malatya —1°, 5° and +26.5°; at Urfa, +4.5° and +32°, at Diyarbakir +2.5° and +31°; and at Van, —3.5° and +22.5°.

2. *The living landscape and habitat*

Harsh as Kurdistān may be, it is far from being a desert; its mountains are covered with pasture and vegetation, and its valleys with forests and meadows which, in spring, are dotted with multicoloured flowers. There are also 10 million hectares of forests in Turkish Kurdistān, 4 million in Iran and 1,720,000 in ʿIrāḳī Kurdistān, of which 50 km.² are firs. The oak, of which more than 15 kinds can be counted, is the most widespread species up to an altitude of 2,700 m.; then there are the firs and other conifers. Moreover, the forests are not always very dense and often have the appearance of scrub with many stands of junipers. The plane tree, willow and especially the poplar, flourish by the waters.

In the mountains, high mountain-pastures stretch over many kilometres and provide pasturage for herds of goats and sheep. In places, edible wild plants grow, sought after by shepherds and simple folk for their medicinal properties and carefully collected by old women. In spring, flowers cover in abundance the smallest corner of earth, whose richness of colours literally stupefies and whose perfumes intoxicate the passersby. All this flora is familiar to us, for the species of Europe are found there and travellers do not fail to record the names (see e.g. C. J. Rich, i, 284; Bishop, i, 290-1, 343, ii, 12, 14, 115;

Lynch, i, 181, 190-1, ii, 208, 248, 253, 268, 269, 303, 362, 369, 239, 241, 242, 382; Freya Stark, 257, 273, 330; Hamilton, 141-3; Balsan, *passim*, etc.).

Only a part of the arable Kurdish lands is covered by cultivation and crops. If, in Turkey, there are 25 million hectares of cultivable lands, only 30% are cultivated, of which one-third lies fallow each year (Esenkova, 108). In Iranian Kurdistān, out of 5 million hectares of cultivable lands, 24% are cultivated and 16% lie fallow (Ghassemlou, 90). In the various districts of ʿIrāķī Kurdistān, of an arable area of about 8 million hectares, one-quarter is cultivated (Khosbak, 43). Despite this, the cultivation of cerals in Kurdistan plays a good part in the economy of the respective countries: 15% in Turkey; 35% in Iran; in ʿIrāķ, 50% for corn and 15% for barley (Ghassemlou, 89, n. 6). Les us add here the cultivation of rice, which supplies ʿIrāķ with one-third of its production. Apart from this cultivation of foodstuffs, cotton and the newly-introduced sugar-beet give a good yield. The best tobacco of Turkey and ʿIrāķ is cultivated in Kurdistān which, for ʿIrāķ, supplies almost all of its needs (Khosbak, 45; Durra, 1963, 226, 1966, 245). If the vine grows a little everywhere in Turkey, ʿIrāķ and Iran, it only flourishes in Kurdistān on sunny slopes; there are 12 million stands in ʿIrāķ (Vernier, 468) and the kinds of grapes are numerous and varied (see the names in *Hawar*, no. 34, 8; Wahby, *Dictionnaire*, 148). Some are reserved for the preparation of raisins used so much for food. Fruit trees also abound in Kurdistān: pomegranates, peaches, apples, figs, apricots and centenarian walnuts. Market-gardens are developed around the villages and even in the mountains where the Kurd, an ingenious gardener, constructs terraces supported by small walls in order not to lose any parcel of arable land. Of the vegetables in general use in the west, the onion, for example, so much appreciated by all the Kurds, is especially cultivated, and certain vegetables such as watermelons, cucumbers, melons, aubergines, corn on the cob, capsicums, etc., without forgetting the lettuce, held in abhorrence by the Yazīdīs.

Wild animals are far from having disappeared in Kurdistān. There were still lions at the beginning of the 19th century; if they no longer exist, the *piling*, a kind of leopard, survives. Bears are plentiful in Nebirnao to the south of Van, where they have "a table served from June to September" (Balsan, 229); the wild boar also abounds at Bingöl (1,200 shot in 3 months in 1939 (*ibid.*, 90-1), and 55 killed in a single round-up in 1963 at Barzan. Wolves, jackals, foxes and hyenas often approach the villages. But there are other animals called wild which are neither carnivores nor predators, but which are hunted either for their meat, such as the ibexes, or for pleasure, such as hares and rabbits. One also finds porcupines, which are edible according to the Christians of the region, agile squirrels, and martens and sables sought for their fur. So it is not surprising that the Kurd is a born hunter. Birds are also plentiful. The high mountains shelter the majestic eagles; streams and watering places attract ducks, teal and snipe. In 1972, 500,000 spent the winter on Lake Riḍāʾiyya, nourishing themselves there on the small crustaceans which abound there, and at the same time Lake Van housed numerous colonies of pelicans (J. Vieillard, in *Le Monde*, 13 January 1973). Nightingales, storks and cranes are also found in the Kurdish countryside, as much as in the songs of Kurdistān. Doves and pigeons frequent in thousands the innumerable grottoes and caves of the mountains. Partridges and quails are choice game. Fish abound in the streams of fresh and crystalline waters. But it is not always easy to identify them and give them a name. A large fish is caught in the Zāb, called by the Christians "Tobias's fish", which is two metres long and whose flesh is excellent. One may see a photograph of it in Hamilton (between pp. 32-3). Apart from these pleasanter creatures, one must beware of the snakes, small but venomous, such as vipers, and of the yellow or black scorpions whose sting can be deadly, especially for the very young, although the numerous lizards, geckoes or varans and the chameleons are harmless, as are the tortoises. But in spring, flies, mosquitos and fleas are dreadful and constitute a real plague. The bee also stings, but produces a very tasty wild honey.

Apart from these creatures, who live wild, there are in Kurdistān many animals which have been domesticated and have been raised for profit since the earliest antiquity (cf. Ch. A. Reed, *Animal domestication in the Prehistoric Near East*, in R. J. Braidwood, B. Hove, etc. *Prehistoric investigations in Iraqi Kurdistan*, Chicago 1960, 119-45). Indeed, Kurdistān is a land of stock-breeding: sheep, goats, cows and buffaloes supply milk, butter, cheese and meat, skins, fleeces, guts, horns etc. of which the leather and wool serve to make clothes, shoes, felts, etc. and provide an obvious economic yield. In 1957, in the Kurdish regions of Turkey, there were 7,662,332 sheep; 4,176,016 goats, one-quarter of all Turkish stock-breeding, and 2,240,825 cows, one-sixth. There are also many buffaloes (Balsan, 128). In the Kurdish provinces of ʿIrāķ there are 1,674,912 sheep or two-thirds of the ʿIrāķī breeding stock, 2,234,238 goats (two-thirds), 226,858 cows (one-third) and 4,287 buffaloes (one tenth). Apart from the large-scale breeding of the nomads (half the production in Iran; Stauffer, 291), each household has its small herd of a few animals, sheep or goats, four to eight (*ibid.*, 290). The Kurdish villages of ʿIrāķ studied by Barth (19) are richer. Each house also possesses a few chickens. There are different breeds of sheep with fat tails and goats with long hair, carefully watched by shepherds expert in their craft. Other animals indispensable in everyday life are also reared. Among the Kurds of ʿIrāķ are found 22,289 horses (one-seventh), 52,336 mules, almost the whole production, 130,804 donkeys (one-third; Khosbak, 52). Also, let us not forget the Kurdish sheepdogs, a strong, imposing and redoubtable breed (Balsan, 236). Naturally, no pigs or rabbits [see ARNAB in Suppl.] are reared in Kurdistān.

The interior of the soil in Kurdistān is no less rich in minerals than its surface in vegetation and animals. But until now, its resources have been very little exploited. Quite abundant supplies of coal have been discovered in the region of Maden, Kiği, Kemah and Harput, where it has been exploited (several thousand metric tons in 1970), but not at Zak͟ho in ʿIrāķī Kurdistān. Near Sulaymānī limestone is extracted and, at Sar Çinar, a cement works has been producing since 1958, 350 metric tons of cement a day. Deposits of rock-salt can be exploited at Sind͟jār, S͟hayk͟hān and Tuz-K͟hurmatu. Sulphur is found in the province of Senna, at ʿAmādiyya, and a Polish group plan to extract 250,000 metric tons of it a year at Mis͟hrak in the north of ʿIrāķī Kurdistān. Iron is not lacking in Kurdistān, and is mined (1,600,000 tonnes in 1960 at Maden). But very rich, easily exploitable deposits of iron ore are found in the region of Rawāndiz and Sulaymānī. Copper exploited (32,000 t.) at Erganī,

Diyarbakir and Palu, is also to be encountered in the region of ʿAkra. Chromium is found in the region of Barzan and at Diyarbakir, where it is extracted (270,000 t. annually). There is lead at Keban, Elaziğ and Maku, gold at Yergü and to the south of Kirmān<u>sh</u>āh, and also silver at Kemah. At Kirkūk, the reserves of salts allow the manufacture of caustic soda and chloride. But it is petrol which is the chief riches of Kurdistān. The petrol of Kirkūk gushes forth in the midst of Kurdish territory and represents a good part of the ʿIrāḳī production (83 million t. in 1970). The same applies to the petrol of Batman in the Siirt region and the oil-fields of Karaçok in northern Syria. Natural gas is abundant and sulphurless in the region of Čamčamāl.

3. *The human aspect*

This region which the Kurds occupy today has been inhabited since the most ancient antiquity, e.g. Berda Balka, the cave of Hazar Merd of the Mousterian period, not far from Sulaymānī or that of <u>Sh</u>anidar, near Rawāndiz, where the first Palaeolithic human skeleton in ʿIrāḳ was discovered. <u>D</u>jarmo, in the valley of Čamčamāl, may be the most ancient village in the Near East, for it was probably one of the centres where man cultivated for the first time various species of barley and corn, according to excavations of a team of researchers of the University of Chicago (cf. Braidwood, Hove etc., *Prehistoric investigations in Iraqi Kurdistan*). Today, the Kurd is settled throughout the land and has established numbers of villages there.

Originally, he was content to occupy the innumerable refuges, shelters under rocks and numerous caves, some of which are difficult of access and very picturesque with stalagmites and stalactites (Edmonds, 235), and which sometimes extend deep under the mountain. These caves always serve, on occasion, to shelter the herds, but sometimes peasants are still to be encountered living in them. Numerous legends circulate about some of these caves where treasures are said to be hidden and where the passing of djinn and ifrits is mentioned (Edmonds, 206-7, 246, 332, 368-9; Hamilton, chs. xiv-xv). Certainly, the nomadic Kurds, on the verge of extinction, and the seminomads live under their black tent, which should not be confused with the tent of the Bedouin Arab, the *kibitka* of the Mongols, the *yurt* of the Samoyeds and the *kote* of the Lapps (cf. C. G. Feilberg, *La tente noire*, Copenhagen 1944, 81-6; Bishop, i, 373; Lescot, 144-5; and <u>KH</u>AYMA). It is formed from a great awning made of woven strips of goats' hair 50 × 60 cm. wide. The poles which hold it up are 2.50 by 3 m. in height; their number varies according to the size of the tent, i.e. according to the importance of its owner. There are no ridge poles. Reed partitions separate the corner of the women and provisions from the part of the tent where the men and visitors stay. All the furniture consists of a few mats, cushions and some carpets in the chiefs' tents. But the Kurdish peasant lives in rough houses. The construction materials are ordinarily unfired bricks in the plains, but fired ones at Sulaymānī, for example, or rough stones, in the mountains joined together with mud. The walls are 2 by 2.50 m. high. In the rough stone walls are sometimes inserted poorly-hewn beams to make them stronger. Inside, niches are arranged in the walls to serve as cupboards.

The walls are roughcast with mud and sometimes whitened with lime. The door is of massive wood. There is no window on the exterior, but these exist looking out on the courtyard, with protective bars. Simple little lanterns light the place, when the door cannot be left open. The floor is of beaten earth. In the centre the hearth (*tendur*) is covered in winter by the *kursī*, a kind of wooden bench with a covering on which all the family warm themselves in the coldest regions. A hole in the roof serves as a chimney. Along the walls runs a broad bank of earth where people sit during the day and where they sleep at night on mats, felts or mattresses. The terrace is made of poplar trunks spaced 50 cm. apart and covered with branches, leaves and dried grass and a thick bed of hard-pressed earth. If the room is too wide (more than 3 m.), poles hold up the beams and roof battens. For the water to run off, the terrace extends beyond the retaining walls or gutters for a metre, e.g. at Sulaymānī, facilitating the running off of rainwater. In any case, a roller is always to be found on the terrace in order to press it down after downpours. One climbs up by a ladder or outside staircase. The house of the plain, where there is space, has a courtyard and a building principally composed of a rectangular living room, lengthened by a corner reserved for the animals. A solid annexe building serves as a kitchen and store for household utensils, tools and work implements. There is no cellar or attic, often not even latrines. In the mountain houses the stable is often in the courtyard, as are the annexes. The living room is situated above with, at the bottom, a small corner for the provisions. Often there is also a small veranda or loggia facing south. The terrace is the favourite place for the women, who perform their many daily occupations there. (For descriptions, plans, photos or drawings of different Kurdish dwellings, see: in <u>D</u>jazīra, R. Montagne, 53-66; at Sin<u>dj</u>ār, R. Lescot, 146-7; at Sulaymānī, Edmonds, 90-3; again at Sulaymānī and at the village of Topzaya and Belkha, H. H. Hansen, 21-43; and in Iranian Kurdistān, Bishop, i, 88, ii, 191, M. Mokri, 89-91. See also Leach, 49; T. F. Aristova, 95, 97, 99 for Transcaucasia.) Naturally, man does not live isolated in his house, but in a group. Villages have grown up, and the Kurd, a man of the earth, lives more in the village than in the towns. Like all villages in the world, and especially those in mountainous countries, the position is chosen in relation to the sun and to water, a stream or spring. So it must be oriented to be at once well-exposed to the sun and sheltered from the wind, following the axis of the mountain chains. Exposure to the north is avoided. The south, the direction of Mecca (Mokri, 81), is preferred to the east. The importance of the village depends on their proximity to places of passage (mountain passes and bridges) and also on sufficient cultivable lands and pasturages. Many villages are built on a slope, the roof of the higher houses forming a terrace for the houses below, and this occurs in all the regions of Kurdistān, e.g. at ʿAkra, Barzin<u>dj</u>a and <u>Sh</u>ār-i Hawramān. It is not rare to sight on a neighbouring peak some ruins of an old castle, a trace of the past glory of a local magnate vanished for centuries. Such as it is, the Kurdish village has a rather pleasing and sympathetic appearance, precisely because of the water, gardens and trees.

The Kurdish villages are closer to one another or more dispersed, according to whether the region is more or less exposed to hazards. In the whole of the 17 provinces of Turkey with all or a high proportion of Kurdish population, according to the official census of 1960, 8,817 villages were counted, of which 395 had less than 100 inhabitants, 513 from 101 to 500, 1891 from 501 to 1000, 372 from 1,001 to 2,000 and only 39 with more than 2,000 inhabitants.

Three provinces of Muş, Hakâri and Van can be taken as criteria for appreciation:

	Area in km²	Inhabitants	Density in km	Number of cantons	Number of villages
Muş	8,195	167,638	20	15	368
Hakâri	9,532	67,766	7	12	133
Van	18,619	211,034	11	21	557

Thus the villages are more or less dispersed. They are also unequally populated, as the table below shows:

Inhabitants	less than 100	101-500	500-1000	1000-2000	+2000
Muş	9	280	64	14	1
Hakâri	5	84	40	5	0
Van	39	456	51	11	0

This average of small villages from 500 to 300 inhabitants is found in ʿIrāḳī Kurdistān, in the region of Rawāndiz (Barth, ii) and in other regions; 300 inhabitants is also the average of the Kurdish villages of Iran.

Altitude is also a very important factor in the establishment of the Kurdish village. By examining the snow contours on Hütteroth's map, e.g. to the south of Lake Van in the region of Hakâri precisely, it may be ascertained that the villages are relatively very numerous between 1,000 m. and 1,500 m., quite numerous between 1,500 and 2,000 m., rare between 2,000 and 2,500 m. and that they disappear altogether above 2,500 m., apart from pasturing camps or *zozān*. Some agreable summer dwellings are found in the middle altitudes. Thus in ʿIrāḳī Kurdistān, in the province of Duhok, we have Zawitha, at 1,422 m. in the midst of vast fir woods, Suwaretuka, at 1,675 m. among cypresses and maples, Sersing, at 1,046 m. with gushing springs, Sulav, at 1,150 m., and its waterfalls, Ser ʿAmādiyya, at 1,905 m; in the province of Sulaymāni: Ser Činar, with great plane trees, as its name indicates; in the province of Arbil, Ṣalāḥ al-Dīn, at 1,090 m., Shaḳlawa, at 565 m. with luxuriant orchards at the foot of Saffin, Gali ʿAlī Bag, at the same altitude with a great waterfall, and especially Ḥādjdjī ʿUmrān, at 1,780 m., very fresh in summer and a ski resort in winter. In the province of Hakâri, the high peaks of Cilo Dağ, which are between 3,500 and 4,000 m., have for some time attracted foreign mountaineers (cf. B. Amy, *La montagne des autres. Alpinisme en pays kurde*, 1972, with maps, photos and bibliographies of the last expeditions).

The smaller the village, the more its comfort is reduced. This is the case also in Turkish Kurdistān, where more than half of the villages do not have drinking water, a mill, a school, a *čāyāna* (or cafe) or a special house for guests. The lighting there is primitive, the hygiene deficient. The wells are near the latrines when these last exist. In winter, in view of the lack of means of communication, hundreds of villages are isolated from the rest of the world (E. Esenkova, 55-7). It is the same in the Kurdish villages of ʿIrāḳ, where electricity and running water only exist in 22 of them among the hundreds that are to be counted in the provinces of Sulaymānī, Arbil, Kirkūk (Khosbak, 56-7). For a population estimated at 8,766,000 in 1962, in 1970 for the whole of ʿIrāḳ there were only 150 hospitals, 987 dispensaries and 18,256 beds with 2,890 doctors and 1,771 nurses (Ministry of Information, *L'Irak va de l'avant*). The same situation applies in Turkish Kurdistān. In 1967, there were 12,275 doctors in Turkey, but only 2,500 for the whole of Anatolia, with a total of 60,196 beds, of which nearly half were for the towns of Istanbul, Ankara and Izmir alone. Malaria affects especially the Kurdish provinces of Diyarbakir, Siirt, and Hakâri (E. Esenkova, 87-8). In ʿIrāḳī Kurdistān, malaria, which was the cause of a quarter of the mortality in ʿIrāḳ (Dr. A. Ghalib, *Malaria and malaria in Iraq*, Baghdād 1944) has been practically eliminated since the campaign of the WHO in 1954-6 (cf. J. Manevy, *Il est quatre heures docteur Malaria*, in *Réalités*, no. 122, March 1956, 48-55). In Iranian Kurdistān, there are only 250 to 300 hospital beds = 1 for 10,000 persons (Ghassemlou, 32).

To move from one village to another, to enter into more or less intimate social relations of family, friendship, tribe or commerce, the Kurd follows either the paths or tracks which link the villages or else the larger motor roads of commercial or strategic value which have been constructed by the interested governments. In the mountains, the mule tracks of tenfollow either the stream which runs at the bottom of the valley, passing from one side to the other or the flank of the mountain, often precipitous and hazardous. They rise steeply to reach the mountain passes, at times quite high, e.g. in ʿIrāḳī Kurdistān, Paykuli, 1,000 m. and Sagirma, 1,700 m. To cross the streams, one fords them or uses trail-bridges or *keleks* [*q.v.*] at a fixed point, where the river is wider and the current less swift, or bridges. The Kurdish bridges are still rudimentary today and sometimes dangerous, being made of ropes and lianas (Layard, 1970, 166; Bishop, ii, 114) or else of tree trunks (Wigram, 288; Hamilton, 96). On the more important roads, the ancient bridges are of stone, hump-backed with one or several arches. Today, some modern iron bridges replace at many points these primitive bridges which are often, in any case, no more than foot bridges (Hamilton, 192). Many legends are attached to these ancient bridges (Edmonds, 201, 212, 247). In the plains, especially in Turkish Kurdistān, there are still many simple earth tracks only usable in the good season. But some modern metalled, tarred and macadamised roads have also been built. The roads through the mountains are often real works of art.

ʿIrāḳī Kurdistān is now furrowed with numbers of fine roads which facilitate human relations. In ʿIrāḳ, some roads or good tracks link Mawṣil to Zakho, ʿAmādiyya, Arbil and ʿAkra. From Arbil one goes to Harīr and Rawāndiz and also to Kirkūk and then Sulaymānī. In Turkey, one road goes from Malatya to Elaziğ, Tunceli, Erzincan, Askala, Erzurum, and Kars. From Elaziğ a branch goes off tor Bingöl, Muş and Tatvan, and another towards Diyarbakir, Mardin and Nüseybin. From Diyarbakir, one may branch off for Silvan and Siirt, or Silvan in the direction of Bitlis, Tatvan and Van, by the road or by steamer on the lake.

Few railways cross Kurdistān. In Turkey one may pick out the line Erzincan-Erzurum-Kars, towards Armenia; the line Malatya-Elaziğ-Genı-Muş-Tatvan-Van by ferry in the direction of Tabriz; and the line Malatya-Sivrece-Maden-Erganı-Diyarbakir-Batman, towards Siirt. The Orient Express from Istanbul goes to Aleppo, skirts the Kurdish populations of the Turko-Syrian frontier, and reaches Mawṣil and Baghdād. In ʿIrāḳī Kurdistān, a single narrow-

gauge railway goes from Baghdād to Kirkūk (320 km.).

Several military routes fan out from the airports situated in Kurdistān. The most important are in Turkey: Erzurum, Kars, Karaköse (Ağrı), Elaziğ, Malatya, Van and Diyarbakir; in ʿIrāḳ: Mawṣil, Kirkūk, Semel, Ser ʿAmādiyya and Bamerni; in north Syria: Kamishlī; in Iran, Sanandadj, Kirmānshāh and Riḍāʾiyya.

E. An anthropological profile of Kurdistān. Situated as it is at the crossroads of populations as different as the Turkish, Persian, Caucasian and Arab peoples and in very intimate relations with most of them, does the Kurdish people possess characteristics such that it may be distinguished very clearly from the others? The question can legitimately be posed, and many scholars have tried to distinguish the anthropological aspects which would allow this process of discrimination. It is evidently not a matter of searching for a Kurdish race, since this notion of race can scarcely be applied to humans, although some important genetic differences are ascertainable between more or less homogenous populations possessing such-or-such characteristic blood-group (Ruffié, 1972). Anthropological researches on the Kurds began more than a century ago with E. Duhousset (1863) and N. V. Khanikoff (1866). They have been carried out in all the regions of Kurdistān.

In Iran, first of all by the authors cited, then by M. Houssay (1887); in Transcaucasia by E. Chantre (1880, 1890) and Pantukhoff (1891); in Turkey in the valleys between the Euphrates and the Tigris (G. Pisson, 1892), to the south of the Black Sea at Karakus, at Nemrut Dağ, to the west of Lake Van, and at Zencirli (von Luschan, 1922); in Syria, at Damascus (Ariëns Kappers, 1931). The Yazīdīs of the Caucasus were studied by Eliseyev in 1887 and in 1900 by Ivanovski; those of Sindjār and Shaykhān by Field (1934), as well as the Kurds of ʿIrāḳ, of Zakho, Rawāndiz, ʿAkra, Kirkūk and Sulaymānī; these latter studies were not published until 1951 and 1952. All these researches are only in fact sample surveys, given the relatively restricted number of individuals examined (some hundreds or more out of several thousands of inhabitants) and of the really scientific measures obtained. Some travellers have in their turn made certain records and added some typical photographs. Despite all this, and because the observations concerning the Kurds are of different regions, the results obtained do not always coincide perfectly. There has been an attempt to make an anthropological classification of them (A. Bashmakoff). The Western Kurds (von Luschan) have been distinguished from the Eastern and Southern Kurds. The former are of a blond, blue-eyed, dolichocephalic type. The others are of a brown, black-eyed, brachycephalic type. The one group consider themselves of the same race as the Turks (Sekban, Inan) or the Iranians (Modi), the others regard themselves as close to the Arabs or Armenians. Certain photographs of Mark Sykes (321, 342, 373, 424-5, 427, 429) of Lynch (ii, 4-5) or of Soubrier (112, 113, 144, 160, 172) reveal at first sight types among the Kurds: Arab, Jew, Biblical, Nestorian and Turkoman. It is this which H. Field confirms and expresses in a more scientific fashion in the photographs of 162 individuals out of 598 examined, where he personally discovers Armenoid types (48), Balkan (12), Modified Mediterranean (36), Eur-Anatolian (38), pure or mixed Iranian (4), Alpinoid (12), Mongoloid (1) and Negroid (1). The proportions are not exactly the same among the 235 Yazīdīs examined, and the comparison with the Assyrians, the Shammar and Ṣulubba Arabs or the Turkomans also studied by the author is interesting. The resemblances encountered are no doubt to be explained by intermarriage. But this does not prevent E. Duhousset (1863) from recognising in the Kurdish people a rare homogeneity with respect to its type and, for his part, Ariëns Kappers (1931) admits that the Kurds, despite their anthropological differences, constitute a truly distinct race. Thus we can, in summarising the studies of H. Field, present as follows the portrait of the Kurd of ʿIrāḳ: "The Kurd is of medium height (1.66 m.) with a relatively long body and short limbs. The forehead is wide and the head wide and round. The brachycephalics predominate. The height of the face is medium. The nose is quite often convex. The Kurd is more hirsute than the Arab. His hair, rather wavy and pliant, is normally dark brown and the eyes black. But blond hair and blue eyes are also to be encountered, especially in the western regions. The colour of the skin is more clear than that of the Arabs, but less fine than that of the Assyrians. The teeth are normal and well-placed. The musculature is good, as is the health, in general, of those who have been observed" (Th. Bois, 18).

Despite everything, these anthropological researches on the Kurds are too fragmentary and uncertain for us to be able to conclude from them what may be the origin of this people. It is indispensable here to combine the study of the language with that of the history.

Bibliography: Maps. No complete scientific map of Kurdistān exists, The *Carte du Kurdistan* 1/4,000,000, Cairo 1943, aims especially "to give a graphic representation of that which the Kurds occupy in the Middle East"; a *Note* of 12 pp. which accompanies it is intended to explain it and to justify the different data. *Die Kurden, Volke ohne Staat*, 1/1,500,000; ed. Die Aktuelle Landkarte, no. 224, Munich 1966, clear and simplified, does not indicate the relief at all. For Turkey, the old maps of H. Kiepert, 1892, or better *Türkiye*, 1/2,000,000 of Faik Sebri, Istanbul 1948, *La carte de l'Asie orientale* 1/2,000,000 of the Troupes du Levant, Beirut 1939, or that of the War Office and Air Ministry, London 1961-2, 1/1,000,000, sheets NJ37 Erzurum, NJ38 Tabriz and NI38 Baghdad, of series 1301, GSGS, cover the whole of Kurdistān. More or less elaborate maps are often to be found in the different accounts of journeys. So much the more to be appreciated are the precise and detailed maps in the book and many articles of C. J. Edmonds.

Albums. To illustrate all this: M. Zikmund and J. Hanzeika, *Kurdistan, country of insurrection, legends and hope*, Artia, Czechoslovakia 1962; K. Dettmann, *Vertraue der Pranke ... Löwe die Heiligen werden dir nicht helfen*, Hamburg 1966.

iii. — HISTORY

A. Origins and Pre-Islamic history.

The classification of the Kurds among the Iranian nations is based mainly on linguistic and historical data and does not prejudice the fact there is a complexity of ethnical elements incorporated in them. The type of the latter varies visibly from place to place. It is probable that the expansion of the Kurd element took place from east (Western Persia) to west (Central Kurdistān) but there is nothing to have prevented the existence in Central Kurdistān, before the coming of the Kurds, of a nationality of different origin but bearing a similar name (Ḳardū) which later amalgamated with the Iranian Kurds.

On two Sumerian inscriptions dating from about 2,000 B.C., Thureau-Dangin (*Revue d'Assyriologie*, v, 99; vi, 67) found a country *Kar-da-ka* mentioned (in which word the initial is *k* and not *ḳ* and the function of the element *ka* is uncertain). This country was beside the "people of Su" (cf. *ZA*, xxxv, 230 n. 3), which G. R. Driver located south of Lake Van; there is an old fortress Sūy in the region of Bidlīs (*Sharafnāma*, i, 146). A thousand years later Tiglath Pileser waged war on the people called Ḳur-ṭi-e in the mountains of Azu, which Driver (in *JRAS* [1923], 400) identifies with the modern Ḥazō (Sāsūn). The reading Ḳur-ṭi-e is not certain, however.

Herodotus in the 5th century B.C. mentions no name like this, but, according to him (iii, 93), the thirteenth nome of the Achaemenid empire included next to the Armenians a Πακτυική which Nöldeke (*Gramm. d. neusyrischen Spr.*, Leipzig 1868, p. xviii) and Kiepert (*Alt. Geogr.*, § 81) have connected with the name of Bokhtān (= Bohtān).

The retreat of the Ten Thousand described by Xenophon (401-400 B.C.) made famous the name of the Karduchoi (Καρδοῦχοι) whose country lay to the east of the Kentritēs (Bohtān). From this time onwards we continually find the name on the left bank of the Tigris near Mount Djūdī [*q.v.*]. In classical authors, the country became Corduene (on the numerous forms of this name, probably produced by the difficulty of reproducing the Semitic *ḳ*, cf. Driver, *op. cit.*). In Aramaic the district was called Beth-Ḳardū and the present town of Djazīrat Ibn ʿUmar, Gazartā of Ḳardū. The Armenians had the name Korduḏh, the Arabs (Balādhurī, 176; Ṭabarī, iii, 610) Baḳardā (Ḳardai). According to Yāḳūt (iv, 56), who relies on the authority of Ibn al-Athīr, the canton of Bāḳardā formed part of Djazīrat Ibn ʿUmar, contained two hundred villages (al-Thamānīn,

Djūdī, Fīrūz-Shābūr) and was situated on the left bank of the Tigris opposite Bāzabdā on the right bank (cf. the full analysis of the texts in M. Hartmann, *Bohtan*, 33-5). Later, the name, which was only applied to the district, disappears from Muslim terminology and is replaced by Djazīrat Ibn ʿUmar, Bohtān, etc. To the Armenians and Arabs the territory of Ḳardū in the strict sense had a very limited application. We do not know the exact frontiers of the province of Corduene; its three towns, Sareisa, Satalka and Pinaka (= Finīk) lay on the Tigris, but the statement of Strabo (ix, 12, 4) is remarkable; according to this, the term Γορδυαῖα ὄρη was sometimes applied to the mountains between the modern Diyārbakr and Mūsh.

Now, who were the Καρδοῦχοι whose name undoubtedly survived in the later names (the termination -χοι must represent the Armenian plural in -*kh*, which is perhaps explained by the fact that the Greeks learned this name from an Armenian)? According to Xenophon (iv, 3, 1), the Karduchoi recognised neither the authority of King Artaxerxes nor that of Armenia. When in the 1st century B.C. Corduene was conquered by Tigranes II, he had its king Zarbienus executed. In 115 A.D. the king of Corduene was called Manisarus. According to Hübschmann, *Die altarmenische Ortsnamen*, 239, and *Armenische Grammatik*, i/2, 518-20, the province of Corduene was only superficially Armenicised.

There is nothing really surprising in finding at the time of Xenophon an Iranian tribe settled to the north of the Tigris, but we have nothing but the evidence of the name from which to judge the ethnology of the Karduchoi. The name has Semitic analogies (Akkad., Assyr. *ḳardu*, "strong", "hero", *ḳarādu* "to be strong"); on the other hand, there is a certain consonantal resemblance with the name of a people Khaldī, better known under the Assyrian form Urarṭu/Urashṭu, in Hebrew Ararat, among the Greeks Αλαρόδιοι, Χάλδοι and sometimes Χαλδαῖοι. This people appeared in Armenia towards the end of the 9th century B.C. and afterwards established a powerful kingdom in the region of Lake Vān which lasted until the beginning of the 6th century. C. F. Lehmann-Haupt, *Mater. z. älter. Gesch. Armeniens*, Göttingen 1907, 123, sees in them Khaldī immigrants from the west; E. Meyer, *Gesch. des Altertums*, i/2, Stuttgart 1913, § 474, seeks their original home on the central Araxes. As a result of the arrival of the Armenians, towards the 7th century, the Khaldī were dispersed and driven towards the mountains (*Cyropaedia*, iii, 1-3). But their name survived in the toponymy of the region north of Lake Van (the Byzantine theme Χαλδία near Trebizond, the town of Khilāṭ = Akhlāṭ, etc.; cf. Belck and Lehmann, in *ZA*, ix [1894], 84; de Goeje, in *ibid.*, x [1895], 100; Streck, in *ibid.*, xiv [1899], 112). Parallels for the name *Khaldi* have been sought on the other side of the Caucasus: the Georgians are called *Kharthveli* or *kharth-ul-i* (in Svanian *khyard*; in Mingrelian, *khort-u*); cf. N. Adontz, *Armenia v epokhu Iustiniana*, St. Petersburg 1908, 398.

Whether we identify the Ḳardū as Semites or as an indigenous people, it is certain that the land of the ancient Karduchoi is at the present day one of the principle centres of the Kurds. It has therefore been concluded that the Karduchoi were identical with the Kurds, and this view was still considered axiomatic at the beginning of the 20th century; cf. *Grundriss d. Iran. Phil.*, ii, 464. Going a step further, the Kurds were directly connected with the Χάλδοι; Reiske in his commentary on Constantine Porphyrogenitus, *De ceremoniis*, B. 13 (713, 11) said "Chaldi et Kordi vel Curti, Gordyaei iidem". A similar opinion is expressed in the title of P. Lerch's work, *Recherches sur les Kurdes iraniens et sur leurs ancêtres, les Chaldéens septentrionaux* (St. Petersburg 1856).

A new turn was given to the problem by the researches of M. Hartmann, Nöldeke and Weissbach, who showed the philological necessity of distinguishing between the stems *Kurd* and *Ḳardū*. These scholars at the same time proposed to recognise the Kurds in the Κύρτιοι, Cyrtii, mentioned by classical writers in Media and Persia (Strabo, xi, 13, 3, and xv, 3, 1). This hypothesis is confirmed by the presence in Fārs of numerous Kurdish tribes in the Sāsānid period (cf. *Kārnāmak-i Artakhshīr-i Pāpakān*, tr. Nöldeke, Göttingen 1879, 37, 48, and the testimony of Arab writers).

The justifiable distinction between the names *Kurd* and *Ḳardū* does not, however, decide the important question, how the Cyrtii (= Iranian Kurds) came to colonise lands west of the Zagros, the country of the ancient Ḳardū, and the mountains of the Anti-Taurus as far as northern Syria. The problem still requires careful research. In the first place, the Median and Persian conquests must have brought about considerable displacements of the Iranian peoples. We have an example in the migrations of a part of the Asagartiya whose original home was in Sīstān. In the Assyrian period we find these Sagartians in Media (*Zikirtu* or *Zakruti*, cf. Streck, in *ZA*, xiv [1899], 146) and in the time of Darius (Bihistūn inscr. 2, 90) their capital was already in the Assyrian plain at Arbela, where Darius had their chief Čitrantakhma executed, whose portrait on the rock of Bīsutūn suggests a Kurdish type (L. W. King, *The sculptures of Behistan*, London 1907). Between 220 and 171 B.C. we find Cyrtii mercenaries taking part in the wars between Rome, the Seleucids and the kings of Pergamon (Livy, xlii, 58, 13; xxxvii, 40, 9; Polybius, v, 52, 5; cf. Weissbach in Pauly-Wissowa², s.v. *Cyrtii*, and A. J. Reinach, *Les mercenaires de Pergame*, in *Revue Archéologique* [1909], 115-19). A very interesting state of transition is seen from the Armenian *Geography* of the 7th century, in the case of the province of Korčēkh (according to Adontz, *Armenia*, 418, Korčēkh is from **kortič-aikh* where *kortič* means "Kurd", as *atrpatič* means "inhabitant of Atropatene"). In the time of Faustus Byzantinus (4th century) Korčēkh was only a canton near Salmās [*q.v.*]. As a province, Korčēkh stretched from Djūlāmerg to Djazīrat Ibn ʿUmar and included the following cantons: Kordukh, the three Kordrikh (Kordikh), Aituankh, Aigaṛkh, Motholaukh (Otholaukh), Orsiraukh (Orisankh), Karathunikh (Saraponikh), Čahuk and Little Albak (Hartmann, *Bohtan*, 93; Hübschmann, *Die altarmenische Ortsnamen*, 255-9).

We see the changes that were gradually brought about. Of the three districts, Kordukh, Kordikh and Tmorikh, which Faustus mentions in place of the ancient Corduene, Kordukh had become a mere canton of Korčēkh and Tmorikh disappeared altogether to the advantage of Kordrikh (Kordikh), of which simply upper, middle and lower cantons were distinguished.

Hübschmann *op. cit.*, 385), confines himself to distinguishing between the Kordrikh (Kordikh) of the Κόρτιοι, but in general the linguistic distinction established by M. Hartmann and Nöldeke does not preclude the existence of hybrid and corrupt forms (M. Hartmann, *Bohtan*, 92: "es gingen wohl schon früh die Namen durcheinander"). Nöldeke even

distinguishes a third group of names: Aramaic Ḳartēwāyē (Arabic Ḳartāwiya?), meaning the true Kurds; cf. G. Hoffmann, *Auszüge aus syrischen Akten persischer Martyren*, Leipzig 1880, 207, n. 1639.

We thus find that about the period of the Arab conquest a single ethnic term *Kurd* (plur. *Akrād*) was beginning to be applied to an amalgamation of Iranian or iranicised tribes. Among the latter, some were autochthonous (the Ḳardū; the Tmorikh/Ṭamurāyē in the district of which Alḳī = Elk was the capital; the Χοθαῖται [= al-Khuwaythiyya] in the canton of Khoyt of Sāsūn, the Orṭāyē [= al-Arṭān] in the bend of the Euphrates); some were Semites (cf. the popular genealogies of the Kurd tribes) and some probably Armenian (it is said that the Mamakān tribe is of Mamikonian origin).

In the 20th century, the existence of an Iranian non-Kurdish element among the Kurds has been definitely established (the Gūrān-Zāzā groupe). In several districts a social stratification based on the political domination of newcomers has been established (at Sulaymāniyya [*q.v.*], at Sāwdj-Bulāḳ [*q.v.*] and at Ḳotūr, where we find remnants of the Küresinli [?] in subjection to the Shakāk). Systematic investigation may discover traces of ancient peoples overlaid by a Kurdish element giving an appearance of unity.

Genealogies and popular etymologies. The Muslim sources and Kurdish traditions do not help us to solve the problem of the origin of the Kurds. Masʿūdī (*Murūdj*, iii, 251) already speaks of their descent from those Persians who escaped from the tyrant Ḍaḥḥāk. This legend is best known from the version of the *Shāh-nāma* (Macan, i, 27-8; Mohl, i, 71; Vullers, i, 36, verses 29-38). In 1812 Morier (*Second journey*, 357) mentions the celebration at Damāwand (on 31 August) of a festival commemorating the delivery of Persia from the tyranny of Daḥḥāḳ, known as the *ʿAyd-i Kurdī*, "The Kurd festival". On the other hand, the Kurds sought Arab genealogies for themselves. Some (*Murūdj*, iii, 253) claimed as their ancestor Rabīʿa b. Nizār b. Maʿadd, others Muḍar b. Nizār, both eponyms of the districts of Diyār Rabīʿa (Mawṣil) and Diyār Muḍar (Raḳḳa). They said that the Kurds had separated from the Arab stock as a result of feuds with the Ghassānids, and, having retired to the mountains, intermingled with strangers and forgot their mother tongue. Of more interest is a series of ancestors among whom we find Kurd b. Mard (cf. οἱ Μαρδοί the neighbours of the Kurds) b. Ṣaʿṣaʿa b. Ḥarb b. Ḥawāzin (Masʿūdī, *ibid.*, and *Tanbīh*, 88-91: Kurd b. Isfandiyādh b. Manūshahr; Ibn Ḥawḳal, 185-7: Kurd b. Mard b. ʿAmr). All these genealogies may contain a few grains of historical fact (iranicisation of Semites, intermingling of the tribes of the Zagros and of Fārs).

Nor is there any lack of popular etymologies. The attempt has been made (*Murūdj*, iii, 249) to connect the name with the Arabic root *karrada*; the Kurds would thus be the children of young slaves and the demon Djasad ("driven out" by Solomon). Very frequently (cf. Driver, in *JRAS* [1923], 403) the name *Kurd* is connected with the Persian word *gurd* ("hero"), although this root really had a *g* in Pahlavī and goes back to the root *var* "to protect" (Horn, *Neuper. Etymol.*, 200).

In later times, the names of tribes were often explained by those of their eponyms. The *Sharaf-nāma*, i, 158, makes all the Kurds (the Badjnawī and Bokhtī tribes) come from Badjan and Bokht; the former of these names may be connected with that of Basn-āw, a tributary of the Tigris (Andreas, in Hartmann, 131), while the second recalls the Πακτυϊκή of Herodotus, or the "dragon-king" (Kurd?) Haftān-Bokht killed by Artakhshīr-i Pāpakān; cf. Nöldeke, *Gesch. der Perser und Araber*, 11 According to another legend, especially popular in the north and west, the Kurds were at one time divided into two branches, Milān and Zilān, the former coming from Arabia and the latter from the east; the Zilān were regarded as an inferior race (cf. P. M. Sykes, in *Jnal. R. Anthropological Inst.*, xxxviii [1908], 470).

B. The Islamic period up to 1920.

We have detailed notices of the Kurds from the time of the Arab conquest onwards. During the five first centuries of the Hidjra, the Kurds frequently played a considerable part in events and often took the initiative in them. Several Kurd dynasties arose at this time. Waves of Turk and Mongol invaders seem to have submerged the Kurds from the 6th to the 10th century A.D. But the period of the wars between the Ottoman Sulṭāns and the Ṣafawid Shāhs produced a state of affairs in Kurdistān favourable for the growth of a feudal system, of which a faithful

picture is given in the *Sharaf-nāma* (1003/1596). The Turco-Persian frontier became gradually stabilised and the Persians fell back behind the wall of the Zagros and its northern extension. Then Turkey began the work of strengthening the authority of the central power within her eastern provinces. Towards the end of the 19th century the last Kurdish principalities disappeared in Turkish territory (Hakkārī, Bidlīs, Sulaymāniyya) and in Persia (Ardalān). But the great tribes still exist, and their cadres assure the preservation of the Kurdish element with its social and ethical peculiarities. Ḳādjār Persia hardly ever interfered in the domestic affairs of her Kurdish tribes, while in the late Ottoman period Turkey tried to use the Kurds as a political support for the central authority. Sometimes the Kurds were overwhelmed with favours, and sometimes they had to resist attempts to abolish the remnants of their ancient autonomy. Several risings of the Kurds took place in the 19th century, and towards the beginning of the 20th century a Kurd movement added one more element to the nationalist agitations within the Turkish empire. The revolution of 1908 drew the Kurds into politics; newspapers, magazines and Kurd societies began to multiply. During the First World War of 1914-18 the idea of an autonomous Kurdistān was first mooted by the Western Powers, but the plan was only partially and temporarily realised in so far as the part of the old *wilāyet* of Mawṣil attached to the new state of ʿIrāḳ was concerned.

The Kurds after the Arab conquest. We shall find it useful to begin by collecting the information given by Arab authors regarding the distribution of the Kurd tribes.

The term Kurdistān being unknown before the time of the Saldjūḳs, information regarding the Kurds is usually to be found in the Arab authors under such heads as Zawzān, Khilāṭ, Armīniya, Ādharbāydjān, Djibāl, Fārs, etc. (cf. Driver, *The dispersion of the Kurds in ancient times*, in *JRAS* [1926], 563-72).

Masʿūdī (about 332/943) and Iṣṭakhrī (340/951) are the first to give systematic information about the Kurds. In the *Murūdj al-dhahab* (iii, 253) Masʿūdī enumerates the following tribes: at Dīnawar and Hamadhān: Shuhdjān; at Kangawar: Mādjurdān; in Ādharbāydjān (so the text should be emended): Hadhbānī and Sarāt (probably Shurāt = Khāridjīs [*q.v.*]; cf. the story of Daysam below); in Djibāl: Shādandjān, Lazba (Lurrī?), Mādandjān, Mazdānakān, Bārisān, Khālī (Djalālī), Djābārḳi, Djāwānī and Mustakān; in Syria: Dabābila etc.; at Mawṣil and Djūdī the Christian Kurds: al-Yaʿḳūbiyya ("Jacobites") and the Djurḳān (Djurughān). To this list, the *Tanbīh* of the same author (88-91) only adds Bāzindjān (cf. Iṣṭakhrī, 115), Nashawira, Būdhīkān and Kīkān (at the present day found near Marʿash), but he gives a list of the places where there were Kurds: the *rumūm* (*zumūm*?) of Fārs, Kirmān, Sidjistān, Khurāsān (Iṣṭakhrī, 282: a Kurd village in the canton of Asadābād), Iṣfāhān (a section of the Bāzandjān tribe and a flourishing town described as Kurd, Yaʿḳūbī, 275; Iṣṭakhrī, 125), Djibāl, notably Māh Kūfa, Māh Baṣra, Māh Sabadhān (Māsabadhān) and the two Īghārs (i.e. Karadj Abī Dulaf and Burdj), Hamadhān, Shahrizūr, with its dependencies Darābād and Ṣamghān (Zimkān), Ādharbāydjān, Armenia (at Dwīn on the Araxes the Kurds lived in houses built of clay and of stone; Muḳaddasī, 277), Arrān (one of the gates of Bardhaʿa was called Bāb al-Akrād and Ibn Miskawayh says that at the invasion of the Rūs in 332/942 the local governor had Kurds under his command), Baylaḳān, Bāb al-Abwāb (Darband), al-Djazīra, Syria and al-Thughūr (i.e. the line of fortresses along the Cilician frontier).

Iṣṭakhrī, 98, particularly mentions five *rumūm* in Fārs, this term being applied to districts over which the Kurds were distributed (in spite of de Goeje, *BGA*, iv, 250, it is preferable to keep the reading *ramm-rumūm* [from Persian *ramm*, "flock", "crowd"] for it is improbable that *zoma* could have given a plural *zumūm*). Each *ramm* had its town, its Kurd chief in charge of the *kharādj* and responsible for public safety. These *rumūm* were: 1. Djilūya, or Rāmidjān, bordered by Iṣfahān and Khūzistān; 2. Lawālidjān, between Shīrāz and the Persian Gulf; Dīwān, in the *kūra* of Sābūr; 4. Kāriyān in the direction of Kirmān; 5. Shāhriyār, alongside of Iṣfāhān also called Bāzandjān after the principal tribe, a part of which had been transferred to the province of Iṣfāhān. As a supplement to the list of *rumūm*, Iṣṭakhrī, 114, gives a list of 33 nomad tribes (*ḥayy*, plur. *aḥyāʾ*) of Fārs, based on the records of the *dīwān al-ṣadaḳāt* and reproduced by Ibn Ḥawḳal, 185-7 and Muḳaddasī, 446: Kirmānī, Rāmānī, Mudaththir, Muḥammad b. Bashar, Baḳīlī (Muḳaddasī: Thaʿlabī), Bundādhmahrī, Muḥammad b. Isḥāḳ, Sabāḥī, Isḥāḳī, Adharkānī, Shahrakī, Ṭahmādahnī, Zabādī, Shahrawī, Bundādakī, Khusrawī, Zandjī, Ṣafarī, Shahyārī, Mihrakī, Mubārakī, Ishtāmharī, Shāhūnī, Furātī, Salmūnī, Ṣīrī, Āzāddokhtī, Barāzdokhtī, Muṭallābī, Mamālī, Shāhkānī, Kadjtī, Djalīlī, in all 500,000 families living in tents.

The *Fārs-nāma* (*ca.* 500/1107) says (168) that the Kurds of the old large *ramm* of Djilūya, Dhīwān, Lawālidjān, Kāriyān and Bāzandjān, who formed the most brilliant element in the old army of Fārs, all perished in the wars at the time of the introduction of Islam, with the exception of a single ʿAlak, who became a Muslim and left descendants. Other Kurds were transferred from Iṣfahān to Fārs by ʿAḍud al-Dawla. It is difficult to admit that 500,000 (?) families of Kurds were exterminated, but we must recognise the possibility of regrouping among the tribes of Fārs and of their denationalisation. The old *ramm* of Djilūya (Kūh-Gilū) is now inhabited by Lurs; we do not know how long they have been there. For the rest, Iṣṭakhrī's list mentions a tribe al-Lurriya (variant: Lazba?) among the Kurds of Fārs. On the other hand the *Fārs-nāma* distinguishes from the Kurds the Shabānkāra [*q.v.*] clans, who had become very powerful in Fārs at the time of the last Būyids. The *Masālik al-abṣār* of al-ʿUmarī speaks of the Shabānkāra under a separate heading, and the *Sharaf-nāma* does not mention them among the Kurd dynasties. One of their clans, however (Rāmānī), bears the name of one of the "Kurd" tribes of Iṣṭakhrī. Everything then suggests that the Kurds of Fārs differed considerably from the tribes of Kurdistān (cf. SHŪL and LUR).

The term al-Zawzān, which corresponds broadly to central Kurdistān (*zozān* in Kurdish "summer pasturages"), is not well defined. According to Ibn Ḥawḳal, 250, the king of al-Zawzān was called al-Dayrānī (= Deranikʿ, Armenian king of Vaspurakān). Muḳaddasī, 137, regards Zawzān as a *nāḥiya* of Djazīrat Ibn ʿUmar. Later this region, which had a mixed Kurd and Christian population, became extended in area. According to Ibn al-Athīr (in Yāḳūt, ii, 257), al-Zawzān began at two days' journey from Mawṣil and stretched to the borders of Khilāṭ; on the Ādharbāydjān side it extended to Salmās. Many strong places belonged to the Bashnawī and Bokhtī Kurds; the former held Barḳā, Bashīr [and Fanak];

to the latter belonged: Djurdhaḳīl (Gurgīl), the residence of their *malik* Atil (*Sharaf-nāma*, i, 117: Nash Atil?), ʿAllūs, Bāz al-ḥamrā. To the lords of Mawṣil (the Zangids) belonged Alḳī (= Elk), Arwakh, Bakhawkha (= Bekūkī in Barwārī), Barkho, Kingawar (?), Nīrwa (east of Akr?) and Khawshab. The text of Yāḳūt is not very certain; in any case, the reference here may be to Kurd strongholds gradually annexed by the Ḥamdānids and the Zangids (see below).

The Kurds under the caliphs and Būyids. Masʿūdī (*Murūdj*, iii, 249) has preserved traditions from the pre-Islamic period of feuds between the Arab princes of Ghassān [*q.v.*] and the Kurds. The Muslim Arabs came into contact with the Kurds after the occupation of Takrīt and Ḥulwān in 16/637. Saʿd b. Abī Waḳḳāṣ marched on Mawṣil, where the districts with a Kurd population were occupied (al-Mardj Bā-Nuhadhrā, Bā-ʿAdhrā, Ḥibtūn, Dāsin etc.); cf. Ibn al-Athīr, *al-Kāmil*, ii, 408. The conquest of the region was completed by ʿIyāḍ b. Ghanm and ʿUtba (Balādhurī, *Futūḥ al-buldān*, 331). The Baṭrīḳ of al-Zawzān in 19/640 obtained confirmation of his authority on payment of *kharādj* (*Futūḥ* 176). In Susiana in 18/639 the Arabs fought against the Kurds, who had taken up the cause of al-Hurmuzān, Persian governor of Ahwāz (*Kāmil*, ii, 425). In Fārs, likewise, the Kurds supported the Persians in 23/642 at the defence of Fasā and Darābdjird (*ibid.*, iii, 32). ʿUmar had to send several expeditions against the Kurds of Ahwāz (*Futūḥ*, 382, 389; *Kāmil*, iii, 37). On the other hand, in the reign of ʿUmar the Kurds invaded the region of the central Karkhā (Ṣaymara, Māsabadhān), the language of which was still Persian in the time of Yaʿḳūbī (*Buldān*, 236). The Arabs had reached Shahrizūr before Islam (Ibn al-Faḳīh, 130), but the final occupation of Shahrizūr, Dārabādh and Ṣamghān in 22/643 was only achieved after bloody fighting (*Futūḥ*, 334; *Kāmil*, iii, 29). In the south, Abū Mūsā al-Ashʿarī [*q.v.*], governor of Baṣra, had to put down risings of the Kurds at Bērūdh and Balasdjān in 25/645, but the Kurds, forcibly converted to Islām, apostatised en masse (*Kāmil*, ii, 66, 76). Under the caliph ʿAlī, the Kurds, along with the Persians and Christians, took part in the rebellion of al-Khirrīt [*q.v.*] near Ahwāz and in Fārs, but the chief was defeated at Rām-Hurmuz (*ibid.*, iii, 309).

Al-Mukhtār, who had seized Armenia and Ādharbāydjān in the reign of the Umayyad caliph ʿAbd al-Malik, appointed in 66/685 a governor at Ḥulwān whose task was to fight the Kurds (*Kāmil*, iv, 187), but the death of al-Mukhtār prevented the plan from being carried out. Under the same caliph the rebel ʿAbd al-Raḥmān b. al-Ashʿath [see IBN AL-ASHʿATH] made an alliance in 83/702 with the Kurds of Sābūr in Fārs (*ibid.*, iv, 352). In 90/708 the Kurds ravaged Fārs and were punished by al-Ḥadjdjādj. In 129/746 the Kurds of Sābūr resisted the ally of the Khāridjīs, Sulaymān, who had rebelled against the caliph Marwān II and had besieged Sābūr (*ibid.*, iv, 387, 341; v, 283). The caliph Marwān himself was the son of a Kurdish slave-girl (Ṭabarī, iii, 51) whose blue eyes and fair complexion he had inherited (Sir William Muir, *The caliphate, its rise, decline and fall*, London 1891, 429).

Under the ʿAbbāsid caliph al-Manṣūr, the invasion of Armenia by the Khazars in 147/764 resulted in numerous risings. A few years later the Kurds (*intishār al-Akrād*) are again mentioned in connection with the rising at Mawṣil and its repercussions in Hamadān (*Kāmil*, v, 448; vi, 9). Djaʿfar, son of al-Manṣūr, was the son of a Kurdish slave-girl (Ṭabarī, iii, 442).

In the reign of al-Muʿtaṣim, a Kurd rebellion is mentioned under 225/839; it broke out in the district of Mawṣil, led by Djaʿfar b. Fahardjis, a scion of a noble Kurd family. Defeated at Bābaghēsh, Djaʿfar took refuge in the mountains of Dāsin, where he defeated the troops of the caliph. A new army commanded by the Turk Aytākh [*q.v.* in Suppl.] put an end to the rebellion (*Kāmil*, vi, 360-1). A Kurd rising broke out in 231/845 in the regions of Iṣfahān, Djibāl and Fārs; it was speedily suppressed by the Turk general Waṣīf.

The Kurds of Mawṣil in 252/866 joined the Khāridjī Musāwir, who had seized Mawṣil. In 262/875 they played a considerable part in the Zandjī slave-revolt (cf. Nöldeke, *A servile war in the East*, in *Sketches from eastern history*, Edinburgh-London 1892, 146-75) led by an ʿAlid Khāridjī (?) ʿAlī Muḥammad, called al-Khabīth, and in the rising of Yaʿḳūb al-Ṣaffār, founder of the Ṣaffārid dynasty [*q.v.*]. At Ahwāz, Yaʿḳūb appointed a Kurd lieutenant, Muḥammad ʿUbayd Allāh b. Hazārmard, who, cherishing ambitious plans, engaged in secret negotations with al-Khabīth. With reinforcements sent by the latter, Muḥammad marched on Sūs, but was defeated by Aḥmad b. Laythūya; the latter, also a Kurd and commander of the Kurd levies, had been sent by the caliph to put down Yaʿḳūb's rising (Ibn Khallikān, *Wafayāt*, ed. de Slane, iv, 304-8). When Aḥmad had departed, Muḥammad, after securing from al-Khabīth further reinforcements consisting partly of Kurds, seized Shustar where, according to the arrangement he was to have had the *khutba* read in the name of al-Khabīth, but instead he did it in the names of the caliph al-Muʿtamid and his adversary Yaʿḳūb al-Ṣaffār. His Zandjī allies deserted Muḥammad, and Shustar was reoccupied by Ibn Laythūya. Muḥamnad retired to Rām-Hurmuz, but he was dislodged from it by al-Khabīth's generals. As a result of difficulties with the Dārnān Kurds, Muḥammad again sought the help of al-Khabīth. The latter sent him troops, which Muḥammad sent into battle but suddenly left them in the lurch and attacked them. To avoid a breach with al-Khabīth, Muḥammad agreed to proclaim him caliph. The death of Yaʿḳūb (265/879) and of al-Khabīth (270/883) put an end to these exploits (*Kāmil*, vii, 264).

About 281/894 the Kurds were among the partisans of the Arab Ḥamdān b. Ḥamdūn (cf. ḤAMDĀNIDS) when he established himself in Mawṣil. The Kurd rebellion raised in 284/897 by Abū Laylā did not last long (*ibid.*, vii, 325, 337). In 293/906 the Hadhbānī Kurds led by their chief Muḥammad b. Bilāl laid waste the region of Niniveh. ʿAbd Allāh b. Ḥamdān, the new governor of Mawṣil, pursued them, but suffered a reverse at Maʿṭūba. With reinforcements sent by the caliph he resumed next year the pursuit of 5,000 Hadhbānī families. The Kurds began negotiations to gain time and retired to Ādharbāydjān. ʿAbd Allāh returned to Mawṣil and with new troops set out once more against the Hadhbānīs, who had entrenched themselves at Djabal al-Salaḳ (probably Lāhīdjān, cf. SĀWDJ-BULĀḲ). The Hadhbānīs were forced to surrender, and their pacification was followed by that of the Ḥumaydī tribe and of the people of Djabal Dāsin (*ibid.*, vii, 371). In the reign of the caliph al-Muḳtadir, the Kurds plundered the environs of Mawṣil but were punished by the Ḥamdānid government; the Djalālī tribe put up a particularly stubborn resistance (*ibid.*, viii, 118). Under the year 337/943 Ibn Miskawayh, *Tadjārib al-umam*, GMS, vi, 105, speaks of the expedition of the Ḥamdānid Ḥusayn against Ādharbāydjān; on this occasion he

had as an ally Djaʿfar b. Shakkūya, chief of the Hadhbānīs who were settled at Salmās.

About this time, Daysam b. Ibrāhīm appeared on the scene, and his adventurous life is closely associated with the Kurds. He himself was the son of an Arab by a Kurd woman. His followers were Kurds with the exception of a small body of Daylamīs. Daysam was a Khāridjī. He seized Ādharbāydjān after Yūsuf b. Abi 'l-Sādj and in 327/938 used his Kurds to drive out Lashkārī b. Mardī, one of the lieutenants of the Ziyārid Wushmagīr. But the Musāfirid Marzubān, a noted Shīʿī, succeeded in taking Ādharbāydjān from Daisam and the latter took refuge with his friend Ḥādjīk b. al-Dayrānī (the Armenian king of Vaspurakan Khačik or Gaghik, son of Deranikʿ). Then the people of Tabrīz appealed to Daysam, but again he suffered a reverse and with the consent of the Musāfirids fell back to Ṭārum. In 337/948-9, Marzubān was made prisoner by the Būyid Rukn al-Dawla, who sent a representative to Ādharbāydjān. Marzubān's brother Wahsūdān then thought of Daysam, to whom his Kurds had remained faithful, and sent him against Rukn al-Dawla's representative. Daysam was defeated, but held out in Ardabīl and Bardhaʿa. When Marzubān returned from his captivity, Daysam had to take refuge first in Armenia and then in Baghdād, where the Būyid Muʿizz al-Dawla treated him generously. As his friends were urging him to return to Ādharbāydjān, he went to the Ḥamdānids of Mawṣil and Syria to ask for assistance. In the absence of Marzubān, Daysam returned to Salmās in 344/955-6, where he had the *khuṭba* read in the name of Sayf al-Dawla of Syria. Once more driven out by Marzubān, Daysam sought refuge with his Armenian friends, Ibn al-Dayrānī (Deranikʿ b. Khačik) had to hand him over to Marzubān, much against his will. Daysam was blinded and died in prison in 345/956-7 (*Tadjārib*, ed. Amedroz, i, 345; ii, 148-51; *Kāmil*, viii, 289, 361, 375-7).

During Marzubān's captivity, in Rayy, several independent governors set themselves up in the northwest of Persia. One of them (about 340/951) was Muḥammad Shaddād b. Ḳarṭū of the Rawwādī tribe, out of which later sprang the great dynasty of the Ayyūbids. The principal fiefs of the Shaddādids were Dabīl and Gandja. The Shaddādids were allies of the Byzantines and of the Saldjūḳs. In 465/1072 Abū Suwār bought Ānī for his young son Manūče. From this time onwards, the dynasty was divided into two branches: that of Gandja and that of Ānī. In 1124, Ānī was taken by the Georgians but between 520/1126 and 557/1161 and again from 1165 to 1174, Ānī was again held by the Shaddādids. The Shaddādids were enlightened princes and left a number of remarkable buildings. Cf. the articles ARRĀN, DWĪN, GANDJA and SHADDĀD; the Armenian bibliography in Lynch, *Armenia*, i, 363-7; cf. also Barthold in the appendix to his Russian translation of Lane Poole's *Muhammadan dynasties*, St. Petersburg 1899, 294; Barthold, *Pers. nadpis' na ... mečeti Manūče*, Aniyskaya Seriya, No. 5; N. Y. Marr, *Eshče o slove "čelebi"*, in *ZVOIRAO*, xx (1911), 120; E. D. Ross, *On three Muhammadan dynasties*, in *Asia Major*, ii (1925), 215.

In 349/960 a pretender appeared in Ādharbāydjān He was called Isḥāḳ b. ʿĪsā, and was supported by Faḍl, chief of the Ḳaḥṭānī (?) Kurds, while his asversary, the Musāfirid Djastān b. Marzubān relied on Hadhbānī support. Isḥāḳ was soon disposed of (*Tadjārib*, ii, 179). The Kurds and the Daylamīs also played a considerable part in the quarrels between Djastān and his brother Nāṣir al-Dawla and between Ibrāhīm b. Marzubān and his cousin Ismāʿīl b. Wahsūdān (*Tadjārib*, ii, 219, 229; Kāmil, viii, 420-3).

About 348/959, the second Kurd dynasty arose in al-Djibāl (Zambaur, Manuel, 211) founded by Ḥasanwayh (Ḥasanūya) b. Ḥasan [*q.v.*; cf. also the *Sharaf-nāma*, i, 20-3], chief of the Barzīkānī (Barzīnī) tribe, who had assisted the Būyid Rukn al-Dawla on his expedition to Khurasān. Rukn al-Dawla showed great tolerance to the Kurds, and when someone complained to him of their excesses he used to say: "Even the Kurds must live" (*Tadjārib*, ii, 281). Ibn al-Athīr (viii, 519) praises the noble character of Ḥasanwayh, his prudent policy and the purity of his morals. When Ḥasanwayh died in 369/979, in his capital Sarmādj (south of Bīsutūn), ʿAḍud al-Dawla overran his possessions (Hamadān, Dīnawar, Nihāwand) to bring them under his authority, but in the end he granted investiture to Badr b. Ḥasanwayh (369-405/979-1014), who remained loyal to ʿAḍud al-Dawla and even fought against his own brothers who had taken the side of the rebel Fakhr al-Dawla. The caliph gave Badr the title of *Nāṣir al-Dīn wa 'l-Dawla*. The historians give an extremely favourable verdict on Badr; he had his tribe educated, distributed taxation fairly and protected the peasants (Rūdhrāwarī, in *Eclipse*, iii, 287-99, 327; Hilāl b. Muḥassin, in *ibid.*, iii, 429, 449-54; ʿUtbī, *Kitāb-i Yamīnī*, tr. Reynolds, 424). Badr's successor Ẓāhir (Ṭāhir?) only reigned a year and in 406/1015 was driven out by the Būyid Shams al-Dawla. Ḥasanwayh's uncle Wandād, chief of the ʿAyshiyya section, died in 349/960, his brother Abu 'l-Ghanāʾim died in 350/961, and a little later his son Abū Sālim Daysam, the last of this collateral branch, was dispossessed of his castles (Ḳasān or Ḳasnān [Ḳaslān? near Bābā Yādigār on the Zohāb], Ghānimābād, etc.).

ʿAḍud al-Dawla had to deal with the Kurds on several occasions, but he was much more severe with them than his father Rukn al-Dawla. In 368/978 the Kurd Ibn Bādūya with the help of the Ḥamdānid Abū Taghlib [*q.v.* in Suppl.] became an independent ruler at Ardamusht (= Kawāshī near Djabal-Djūdī, Yāḳūt, i, 199), but soon allowed himself to be seduced by the promises of ʿAḍud al-Dawla (*Tadjārib*, ii, 392). In 369/979 the latter sent an expedition against the Kurds of Shahrizūr whom he wished to separate from the Banū Shaybān Bedouins, who had business and matrimonial ties with them. The town of Shahrizūr was occupied, and the Arabs went back to the desert (*Tadjārib*, ii, 398; *Kāmil*, viii, 516).

Another expedition was sent in 370/980 against the Hakkārī Kurds, who were besieged and surrendered, relying on a promise that their lives would be spared. But the leader of the expedition crucified them along the side of the road for five *farsakhs* between Maʿalthāyā and Mawṣil (*Kāmil*, viii, 521).

Even in the lifetime of ʿAḍud al-Dawla, the Ḥumaydī chief, Abū ʿAbd Allāh Ḥusayn b. Dushandj (or Abū Shudjāʿ Bādh b. Dustāk), known as Bādh, had attained considerable notoriety. At first a shepherd, he gradually rose to be lord of Ardjīsh, Āmid and Mayyāfāriḳīn. A rising in Niṣībīn brought him into conflict with Ṣamṣām al-Dawla. Bādh defeated the latter's forces at Bā-Djulāʾiya (on the Khābūr al-Ḥusayniyya in the canton of Kawāshī = Ardamusht), seized Mawṣil and was planning a march on Baghdād to end Būyid rule when he was defeated by Ṣamṣām al-Dawla. He fell back on Mayyāfāriḳīn and, by an arrangement with the captain of the army sent against him, secured possession of Diyārbakr and the western part of Ṭūr

ʿĀbidīn (374/984). Bādh did not relinquish his designs on Mawṣil and in 379/990, having collected a large number of Bashnawī Kurds, encamped under the walls of this town and engaged in negotiations with its inhabitants. But the Ḥamdānid princes, who had just regained possession of their hereditary fief, secured the help of the Banū ʿUḳayl Arabs and attacked the invader. An accident put Bādh *hors de combat* and he was slain. His body was crucified, but the people of Mawṣil obtained his burial with the usual rites because he had fought against the unbelievers (*Kāmil*, ix, 25, 27, 38, 49; Rūdhrāwarī, iii, 83-4, 176-8; Abu 'l-Faradj, *Mukhtaṣar al-duwal*, ed. Pococke, 321-3).

In 380-90/990-1000, Ṣamṣām al-Dawla made an attempt to improve his position and with this object, made an alliance with Fūlād b. Mundhir, who was supported by the Kurd cavalry mobilised at Shīrāz. After the failure of the enterprise he sought refuge with the Kurds, but the latter betrayed him and he took refuge with Fakhr al-Dawla, who was notorious for his hatred of the Kurds (Rūdhrāwarī, iii, 184; on Ibn Fūlād, see ʿUtbī, *op. cit.*, 424-5).

The Kurd dynasty of the Marwānids (Zambaur, 136; Bosworth, *The Islamic dynasties*, 53-4) is closely connected with Bādh. After the defeat at Mawṣil, Abū ʿAlī b. Marwān b. Dustāk, the son of Bādh's sister and his ally, withdrew to Ḥiṣn Kayfā [*q.v.*] where Bādh's Daylamī wife lived. He married her and took one of the strongholds that had belonged to Bādh. He twice took prisoner Abū ʿAbd Allāh al-Ḥamdānī who had defeated Bādh, but treated him generously. Ibn Marwān established himself in Diyārbakr and by his conciliatory attitude won the sympathy of the inhabitants. The Marwānids reigned from 380/990 to 489/1096. Their power extended not only over Diyārbakr (Āmid, Arzān, Mayyāfāriḳīn, Ḥiṣn Kayfā) but also to Khilāṭ, Malāzgird, Ardjīsh and the canton to the northeast of Lake Vān. In the west they held Urfa for a time. Abū ʿAlī Ḥasan in 381/991 invaded Syria and took it from the Byzantine Emperor Basil II. He was killed in 387/997 by the people of Diyārbakr, who had rebelled. His brother Abū Manṣūr Mumahhid al-Dawla, who after the death of Bādh had seized Mayyāfāriḳīn, reigned there till 402/1011 (Abu 'l-Fidāʾ, *Annales moslemici*, ed. Reiske, ii, 569). His brother Abū Naṣr Aḥmad (Ibn Khallikān, i, 157-8) succeeded him and reigned from 402/1011-12 to 453/1061. In 416/1025 he seized Urfa, but the Byzantines re-established their power in 422/1031 (Abu 'l-Faradj, 342). He earned the reputation of being a just and enlightened ruler, and able, though given to pleasure. In 442/1050 Abū Naṣr had to pay homage to the Saldjūḳ Ṭughril Beg. His son and successor Abu 'l-Ḳāsim Naṣr, called Niẓām al-Dawla (453-72/1061-79), shared the power with his brother Saʿīd (d. in 257/1065. He added to his possessions Ḥarrān, Suwaydā, etc. His successor was Manṣūr b. Saʿīd, who nominally reigned from 472-89/1079-96, but by 478/1085 the Saldjūḳ general Fakhr al-Dawla b. Djahīr [see DJAHĪR, BANŪ] had taken almost the whole of his lands, which were placed under the authority of the Atābeg of Mawṣil (Abu 'l-Fidāʾ, iii, 77-9, 87, 121, 125, 249). On the Marwānids, cf. the special study by H. F. Amedroz, in *JRAS* (1903), 123-54.

On the eve of the Turkish invasions, we find frequent reference to exploits and expeditions of the Kurds. In the reign of the caliph al-Ḳādir (381-422/991-1031), the historians record the exploit of the Kurd Aḥmad b. al-Ḍaḥḥāk, who killed the Emperor Basil II's general and thus stopped the Byzantine advance (Rūdhrāwarī, iii, 247). Between 366/976-7 and 388/998 the Kurds took part in the struggle between the Būyids and the Ziyārids for the possession of Djurdjān (ʿUtbī, tr. Reynolds, 298-302; Ibn Isfandiyār, abridged tr. E. G. Browne, 226-8). A few years later we find Maḥmūd of Ghazna using Kurds against the Ḳarakhānids (ʿUtbī, 336).

The Kurds took part in the civil wars of the Būyids, in the struggle of the Banū ʿUḳayl for the possession of Mawṣil, etc. In 411/1020 they fought against the Turkish troops who mutinied in Ḥamadān. In 415-20/1024-9 we find them fighting in Fārs and Khūzistān against the last Būyid, Abū Kālidjār (*Kāmil*, ix, 100, 134, 226, 232, 239, 247, 249, 265; Hilāl b. Muḥassin, iii, 348, 376, 381). Thus the Kurdish element was exhausting itself in continual fighting when the Turkish hordes arrived who were destined to modify radically the ethnical aspect of the Near East.

The Turkish conquest. When in 420/1029 the Ghuzz precursors of the Saldjūḳs reached Rayy, Tāsh Farrāsh, the Turkish general of the Ghaznawids, went to meet them with 3,000 horsemen including a number of Kurds. The leader of the Kurds, being captured by the Ghuzz, sent a message to his men to cease fighting. This caused a tumult and Tāsh was killed (*Kāmil*, ix, 268). In the same year the Ghuzz reached Marāgha and executed many Hadhbānī Kurds. The Kurds made an alliance with the ruler of Ādharbāydjān (Wahsūdān II) and the Ghuzz had to retreat. Another body of Ghuzz, after a raid into Armenia, returned to Urmia and the lands of Abu 'l-Haydjāʾ Hadhbānī; the Kurds attacked the Ghuzz but suffered a defeat. In 432/1041 the Musāfirid Wahsūdān II b. Mamlān massacred a large number of Ghuzz at Tabrīz; the Ghuzz of Urmia went into Hakkārī, a dependency of Mawṣil, and ravaged the country, but while they were involved in the mountains the Kurds attacked them, killed 1,500 men and took many prisoners and much booty (*Kāmil*, ix, 270-2).

On the approach of Ṭughril Beg's troops, the Ghuzz took fright and pushed onwards. Kurdish guides led them through al-Zawzān to the Djazīra. One section of the Ghuzz under Manṣūr b. Ghuzoghlī remained to the east of the Djazīra, while the other under Būḳā marched on Diyārbakr, and going on pillaged the districts of Ḳardū, Bāzabdā, Ḥusayniyya (Yāḳūt, ii, 270: a town between Mawṣil and Djazīra) and Fēshābūr. The Marwānid Sulaymān b. Naṣr al-Dawla, ruler of Djazīra, persuaded the Ghuzz to wait till the spring before traversing his lands to join the other Ghuzz who had settled in Syria. Then by a ruse he seized Manṣūr, and with the help of the Bashnawī Kurds of Finīk, pursued the Ghuzz. But the latter did not cease their depredations; they ravaged the district of Diyārbakr and seized Mawṣil (*Kāmil*, ix, 272-3).

Meanwhile, the dynasty of the Ḥasanwayhids had perished and the power in Djibāl had passed to a new family the Banū ʿAnnāz (see Zambaur, 212, and ʿANNĀZIDS. The *Sharaf-nāma*, i, 22, has ʿAyyār), which is often called that of Abu 'l-Shawk. Previously in 340/951 during a Turkish rising in Hamadān, the Būyid Muʿizz al-Dawla had had recourse to the services of Ibn Abi 'l-Shawk, chief of Ḥulwān (*Tadjārib*, ii, 2). The real founder of the dynasty seems to have been Abu 'l-Fatḥ Muḥammad b. ʿAnnāz (*Kāmil*, ix, 158) who ruled 380-401/990-1011. His son Abū 'l-Shawk slew the last of the Ḥasanwayhids, Ẓāhir (Ṭāhir) in 406/1015-16. The possessions of the Banū ʿAnnāz included Shahrizūr, Kirmānshāh (occupied in 431/1039-40; *Kāmil*, ix, 300, 316),

Bīlawār, Ṣamghān, Daḳūḳa and Khuftidhakān. In 437, Ṭughril sent his brother Ibrāhīm Yināl to pacify Djibāl. Ibrāhīm drove the Kākūyid Garshāsp out of Hamadān and he sought refuge with the Djūzkān Kurds. At Kirmānshāh there was a garrison of Abu 'l-Shawk's composed of Daylamīs and Shādjandjān Kurds. Kirmānshāh was occupied and Abū Shawk died in 438/1046 at Sirwān. Ibrāhīm took Ṣamīrān (Shamirān? Ṣaymara?) and subjugated the Djuzkān. Saʿdī, son of Abu 'l-Shawk submitted to the Saldjūḳs. The dynasty lasted till 520/1116 (Münedjdjim-bashī).

The defeat of the Emperor Romanus IV at Malāzgird (463/1071) delivered all Armenia into the hands of Alp Arslān. Under the Great Saldjūḳs there arose in Fārs the turbulent dynasty of the Shabānkāra [*q.v.*], but it is very doubtful if this dynasty, the fortunes of which can be traced from 421/1030 to 756/1355, was strictly Kurdish (cf. above). On the other hand, the small Kurd dynasties were ruthlessly wiped out in favour of Turks. In 493/1100 the last Marwānid disappeared in the region of Khilāṭ, where the Turk Suḳmān Ḳuṭbī founded the dynasty of the Shāh Armans which lasted a century until the coming of the Ayyūbids. Under the date 495/1101 Ibn al-Athīr (x, 238) mentions the killing of two thousand Kurds of Surkhāb b. Badr, a scion of the Banū ʿAnnāz, by the Turkomans of Salghūr Ḳarabulī. Other Turkomans later took all the lands of Surkhāb except Shahrizūr, Daḳūḳa and Khuftidhakān. In spite of these crushing blows, the Kurds are often mentioned in the 5th/11th and 6th/12th centuries. In his struggle with Ḳāwurd of Kirmān, Malik Shāh employed Kurdish and Arab forces, whom he later rewarded with fiefs at Kirmān (*Kāmil*, x, 53), where there were already colonies of Kurds (cf. Masʿūdī, *Tanbīh*, 88; Ibn Khallikān, i, 516). Raids of Kurds took place at Dudjayl, Mārdīn etc. in 496/1103, 498/1105 and 503/1109-10. In Muḥammad b. Malik Shāh's campaign against Syria (504/1110) there took part the lord of Marāgha, Aḥmadīl b. Wahsūdhān, a Kurd of the tribe of Rawwādī (cf. *Kāmil*, x, 391) and the "Shāh of Armenia" Suḳmān. The campaign was a fiasco, and the Kurds left to lay siege to the Turk Suḳmān (*Recueil des hist. des Croisades, docum. orientaux*, iii, 542, 599).

During this period we often find the Kurds mentioned in Syria, where they came into contact with the Franks (cf. Derenbourg, *Ousāma b. Munḳidh*). Under Sandjar the province of Kurdistān was formed out of the western part of Djibāl. Sulaymān, the nephew of Sandjar, became its ruler with Bahār (to the north-east of Hamadān) as its capital. The province was in a flourishing state. In the reign of Sandjar also the Kurds took part in the troubles of 513/1119. In 516/1122 a punitive expedition passed through the Hakkārī, Zawzān and Bashnawī districts (*Kāmil*, x, 374, 377, 426), but shortly afterwards the Kurds seized the stronghold of the Christian patriarch at Ṭūr ʿĀbidīn (Assemani, *Bibl. or.*, ii, 221).

The Atābaks of Mawṣil. The Atābaks, the immediate neighbours of central Kurdistān, played an important part there. ʿImād al-Dīn al-Zangī several times invaded Kurd territory. In 528/1134 he took Ṭanza (on the left bank of the Bokhtān) and to punish the Ḥumaydīs, who had supported the caliph Mustarshid when he was besieging Mawṣil, seized their fortresses, al-ʿAḳr, Shūsh, etc. (Shams al-Dīn, in *Recueil*, iii, 666-7; Ibn al-Athīr, *al-Atābakiya*, in *ibid.*, ii, 87). Abu 'l-Haydjā', lord of Arbīl, Āshib, etc., submitted to Zangī (was he perhaps a Hakkārī? At this period this tribe lived south of the territory which now bears its name; cf. Hoffmann, *Auszüge*, 203). After the death of Abi 'l-Haydjā', Zangī intervened in the quarrels among his successors, seized Āshib and dismantled its defences; the fort of Djalāb received the name of ʿAmādiya (= ʿImādiya, in honour of ʿImād al-Dīn). In 534/1139 Zangī took Shahrizūr from Ḳifdjāḳ b. Arslān Tāsh the Turkoman. In 537/1142 he sent a new expedition against the Hakkārī and took the fortress of al-Shaʿbānī (= Āshib?), which he rebuilt. In 538/1143-4 Īrūn and Khīzān were taken (Shams al-Dīn, in *Recueil*, iii, 685). ʿAlī, lord of al-Rābiya (cf. *Sharaf-nāma*, i, 284, Rābiya-bulāk?), Faraḥ and Alḳa (Elk?) joined Zangī of his own accord. The last expedition of Zangī was against the Bashnawī of Fanak (Finīk), but the siege of this town was raised on the death of the Atābak in 541/1146: (Ibn al-Athīr, *al-Atābakiyya*, in *Recueil*, ii, 86, 114, 129, 188). Karādja Tādjna, *muḳṭaʿ* (?) of Hakkārī, who was sent in 547/1152-3 by the Atābak of Mawṣil against the Atābak of Ādharbāydjān, seems to have been a Turk foreign to the tribe.

Later, after the death of Ṣalāḥ al-Dīn (589/1193), the Zangids consolidated their position in central Kurdistān. In 607/1211 ʿImād al-Dīn, a younger son of Arslān Shāh Zangī, received as a fief the strongholds of the Ḥumaydīs (ʿAḳr and Shūsh). In 615/1218 the same prince seized ʿAmādiya and "the remainder of the fortresses of the Hakkārī and Zawzān" which were ceded to him by Muẓaffar al-Dīn Kökbürī of Arbīl (Abu 'l-Faradj, 433, 438). It must have been these events that caused the Hakkārī to be driven back towards the lands at the sources of the Great Zāb.

The Artuḳids [*q.v.*], Atābaks of Diyārbakır, several times came into conflict with the Kurds (Abu 'l-Fidā', iii, 583; Usāma, i, 321). The ʿAbbāsid caliphs, freeing themselves from the tutelage of their protectors, negotiated with the Kurds (cf. the case of ʿĪsā Ḥumaydī in 528/1134, and *Kāmil*, xi, 7, 188) and sought to weaken the Turks. In 581/1185 under the caliph al-Nāṣir, a minor incident resulted in a war between the Kurds and the Turkomans (*Kāmil*, iii, 342) which extended over a vast area (Syria, Diyārbakır, Djazīra, Mawṣil, Shahrizūr, Khilāṭ and Ādharbāydjān). Two years later the rivals stopped fighting in order to join against the Christians of Armenia, Assyria, Mesopotamia, Syria and Cappadocia, but new feuds soon broke out between the Kurds and Turkomans. After many fierce battles, the Kurds fought their way back into Cilicia. The Turks practically exterminated the Kurds of Cilicia and Syria. As the Kurds on leaving their old homes had entrusted their goods to their Christian neighbours, and as the Christians concealed some Kurds, the Turks finally fell upon the Christians at Thelmuzen(?) and Arabthil (= Arabgir?) (Michael the Syrian, in *Recueil, doc. armen.*, 395).

The Ayyūbids. The Kurdish origins of this remarkable dynasty are well-established (*Sharaf-nāma*, i, 55-82). The Armenian historian Hayton (Hethum) says on this point: "Postea vero Sarraceni amiserunt dominium Egipti et Medi, qui Cordins vulgariter dicebantur, regni Egipti dominium occupaverunt", *Recueil, docs. arm.*, ii, 225, 343). The grandfather of Ṣalāḥ al-Dīn Shādhī b. Marwān was a Rawādī Kurd (Rāwadī, Rawanda, a clan of the Hadhbānī) of Dwīn [*q.v.*]; see Minorsky, *Prehistory of Saladin*, in *Studies in Caucasian history*, London 1953, 107-57.

The important fact is that it was from Dwīn that the Shaddādī dynasty had come, the memories of which must have been still alive in the time of Shādhī Ayyūb [see AYYŪBIDS] and Shīrkūh [*q.v.*], son

of Shādhī, were born in the old home (the village of Adjdanakān). Ṣalāḥ al-Dīn [q.v.] was born at Takrīt, but Kurd traditions were certainly familiar to him through his father and uncle. The persistence of Iranian names in the Ayyūbid family is significant. Nevertheless, the scene of the main activities of the dynasty was Egypt and Syria. The families of the old Saldjūḳ Atābaks, even when they became vassals of the Ayyūbids, continued to rule in Diyārbakr (Artuḳids), Mawṣil (Zangids) and Arbīl (the Begteginids, at first deputies of the Zangids). By the treaty of 585/1187 with ʿIzz al-Dīn Zangī, Ṣalāḥ al-Dīn annexed only Aleppo and Shahrizūr (Ibn al-Athīr, *al-Atābakiyya*, in *Recueil*, ii, 334; *Kāmil*, xi, 340; Bahāʾ al-Dīn, in *Recueil*, iii, 85). In 585/1189 Ṣalāḥ al-Dīn gave Shahrizūr to his *mamlūk* Keshtoghdī (?), a relative of Yaʿḳūb b. Ḳifdjāḳ. The only independent way by which the Ayyūbids penetrated into Kurdistān was that of Khilāṭ. This district was at first conquered by Taḳī al-Dīn in 587/1191 (*Kāmil*, xii, 40), but it was only after the death of Ṣalāḥ al-Dīn that his nephew al-Malik al-Awḥad Nadjm al-Dīn Ayyūb installed himself there in 604/1207. Later, Khilāṭ passed to his brother Ashraf, who assumed the title "Shāh Arman", and finally to the third brother Muẓaffar who ruled there till 642/1244. The peace of this fief was several times broken by invasions of Georgians, of the Khʷārazm-Shāh and of the Mongols. The Georgian troops who were operating round Khilāṭ at this time were commanded by the Armenian princes Zakaré and Iwané, whose genealogies make them descendants of the *Khel Babirakān*, i.e. of the Kurd tribe of Bāpīrakān; cf. Marr in *ZVOIRAO*, xx (1911), 120.

The Ayyūbid forces were composed mainly of Turks, but the Kurdish element was by no means negligible. In 583/1187 Ṣalāḥ al-Dīn addressed an appeal for a holy war to the Kurds on the upper Tigris. The Djazīra forces were disbanded in 584/1188, but the Diyārbakr detachments and particular tribes are often mentioned. These Kurds were sometimes on bad terms with the Turkomans (Bahāʾ al-Dīn, in *Recueill*, iii, 86, 313, 381).

Kurds were numerous in the civil and military service of the Ayyūbids, but very often they acted against the dynasty's interests. When Shīrkūh died, there were Kurds who opposed the appointment of Ṣalāḥ al-Dīn as his successor (Ibn Khallikān, iv, 494).

An important part was played by the family of Abu 'l-Haydjāʾ [Hadhbānī], hereditary chief of Arbīl (?). He directed the defence of ʿAkkā against the Crusaders and was appointed *isfahsālār* of the army and governor of Jerusalem. In 592/1196 he was transferred to Baghdād: he conducted an expedition against Hamadān and died at Daḳūḳa. His nephew Ḳuṭb al-Dīn built the Ḳuṭbiyya *madrasa* in Cairo. Another Kurd, of the tribe of Hakkārī, Sayf al-Dīn b. Aḥmad al-Mashṭūb, succeeded Abu 'l-Haydjāʾ at ʿAkkā. His descendants had exciting careers; his son Aḥmad ended his days in the prison of Ḥarrān; his grandson, the Ḳāḍī ʿImād al-Dīn plotted against al-Kāmil and had to go into exile.

The Khʷārazm-Shāh Djalāl al-Dīn. In 614/1217 the Kurds of Zagros inflicted a defeat on the troops of the Khʷārazm-Shāh sent from Hamadān to Baghdād. Djalāl al-Dīn's operation against Khilāṭ (623-6/1226-9) disorganised the life of the country, and the Kurds were decimated by famine (*Kāmil*, xii, 207, 308). Defeated and pursued by the Mongols, Djalāl al-Dīn took refuge among the Kurds of Diyārbakr and in 628/1231 was killed, probably by one of them (Djuwaynī, ed. Muḥammad Ḳazwīnī, ii, 190; *Kāmil*, xii, 325; d'Ohsson, *Histoire des Mongols*, iii, 62). In 634/1237 again the remnants of the Khʷārazm hordes traversed and plundered the region of Kharpūt (Abu 'l-Faradj, 477). After the death of Djalāl al-Dīn, the Mongols laid waste the region of Diyārbakr and Khilāṭ. Another horde had descended from Marāgha on Arbīl; this latter region was three times invaded. In 645/1245, Shahrizūr was laid waste and in 650/1252 Diyārbakr.

The Mongol Īlkhāns. The Kurds are rarely mentioned under the Īlkhāns. As these rulers—at first pagans and later Muslims—were on good terms with the Christians, and the latter had sufficient causes of complaint against their Muslim neighbours, the Kurds so recently involved in the wars of the Ayyūbids had to remain confined to their mountains and to hope for success for the enemies of the Mongols.

The province of "Kurdistān" formed in the time of the Saldjūḳs, the capital of which was Bahār (near Hamadān), was conquered by Malik b. Tūdān, father of the celebrated Amīr Čoban. Leaving Hamadān in 655/1257, Hūlāgū marched on Baghdād. At Kirmānshāh the Mongols began to murder and plunder (Rashīd al-Dīn, ed. Quatremère, 225, 255, 267). Before the capture of Baghdād, Hūlāgū sent troops to take Arbīl. The governor of this stronghold, Tādj al-Dīn Ṣalāba (cf. Rashīd al-Dīn, ed. Blochet, 261), submitted to the Mongols, but the Kurd garrison refused to follow his example. Arbīl was taken with the help of the Atābak of Mawṣil, Badr al-Dīn Luʾluʾ (d'Ohsson, iii, 256). The taking of Baghdād resulted in the depopulation of Shahrizūr [q.v.], and its Kurd inhabitants, according to Shihāb al-Dīn al-ʿUmarī, left for Syria and Egypt (cf. d'Ohsson, *op. cit.*, iii, 309, 330, 337). An echo of these events is found in the appearance in Algeria of two Kurd tribes: Lawēn and Babīn (Ibn Khaldūn, *Hist. des Berbères*, tr. de Slane, ii, 461, iii, 413).

Returning to Ādharbāydjān, Hūlāgū set out for Syria in 657/1259. In the Hakkārī country, the Mongols put all the Kurds they found to the sword (Rashīd al-Dīn, ed. Quatremère, 328). Djazīra, Diyārbakr, Mayyāfāriḳīn (held by the Ayyūbid al-Malik al-Kāmil Nāṣir al-Dīn) and Mārdīn were taken in succession. After the death of the Atābak Badr al-Dīn Luʾluʾ, who had remained faithful to Hūlāgū, his son Ṣāliḥ went over to the side of Baybars, Sulṭān of Egypt, and received confirmation of his investiture from him. The Kurds around Mawṣil at once fell upon the Christians. The garrison of Mawṣil consisting of Kurds, Turkomans and Shūls, courageously resisted the Mongols.

In Syria also the Kurds threw in their lot with the Mamlūks. In his letter to the Khān Berke, Baybars boasts of the number of his troops, who were Turks, Kurds and Arabs (d'Ohsson, iii, 385). In the time of Abaḳa, the Armenian Hayton tells how after an invasion of Egyptian troops (before 677/1278) the Kurds took 5,000 houses of Kurds (Gordins) living in northern Syria (*Recueil, docs. armén.*, ii, 179). But after the defeat of the Mongols in 680/1281, a body of Muslim troops, made up of Turkomans and Kurds, laid waste Cilicia. The rare cases in which Kurds are found allied to the Mongols were generally in distant Fārs. Under Öldjeytü there were Kurds in the troops that invaded Gīlān in 706/1306-7. A little later a Kurd, Mūsā, who had proclaimed himself the *mahdī* of the Shīʿīs, was executed by Öldjeytü. In 712/1312-13 Badr al-Dīn, the Kurd lord of Raḥba, resisted the Mongols.

The Kurd provinces were governed by the Mongol *amīrs*. The fighting in Arbīl never ceased. The

"Ḳayači", Christian highlanders, forming part of the Mongol army and stationed in Arbīl, brought a charge against their chief Zayn al-Dīn Bālū and came into conflict with the Kurds, whom the Arabs supported. Incidents began in 696/1297 but the situation came to a height in 710/1310. With great difficulty, the Mongols drove the Christians out of the citadel. The Mongols had summoned the Kurds to help them in the siege, but their *amīrs*, who were friendly with the Christians, wanted to use the Kurds to prevent the massacre of the Christians by the Arabs. The massacre took place, but the Kurds had no share in it (*Histoire de Mar Jabalaha III*, tr. J. B. Chabot, Paris 1895, 152-77).

The country between Marāgha and Arbīl was a kind of high road for the Mongol armies; at this time the country south of Lake Urmia was still for the most part occupied by Turks and Mongols (cf. SĀWDJ-BULĀḲ).

The capital of the province of "Kurdistān" under Öldjeytü was moved from Bahār to Sulṭānābād (of Čamčamāl). The extent to which the province had suffered may be judged from the statement of the Ḥamd Allāh Mustawfī's *Nuzhat al-ḳulūb* (ed. Le Strange, 107), according to which its revenues were reduced to one-tenth of what they were under the Saldjūḳs.

When the Īlkhāns had disappeared, two families of Mongol chiefs of the tribes of Sulduz [*q.v.*] and Djalāyir [*q.v.*] became rivals for power. By virtue of the division of the fiefs between "the two Ḥasans" (in 738/1338), (Persian) Kurdistān and Khūzistān returned to the children of the *amīr* Akrandj or Akrash (?). In 784-5/1382-3 the Djalāyir Bāyazīd carved a fief for himself out of Persian Kurdistān and ʿIrāḳ ʿAdjamī (Zambaur, *Manuel*, 253, and d'Ohsson, iv, 747).

Table of the Kurd tribes in the time of the Mamlūk Sulṭāns. The Mongol conquest had completely eclipsed the political part played by the Kurd tribes, but in Egypt, where the Mamlūk Sulṭāns were cherishing secret plans against the Īlkhāns, much interest was taken in the fate of this Muslim element. The *Masālik al-abṣār* of Shihāb al-Dīn al-ʿUmarī (d. 749/1348) shows how exactly the chancelleries of the Mamlūk Sulṭāns were informed about Kurd affairs. According to al-ʿUmarī, there were Kurds near al-ʿIrāḳ and al-Diyār al-ʿArab and in Syria and Yemen. The mountain country (al-Djibāl) inhabited by the Kurds began near Hamadān and ended in Cilicia (*bilād al-Takfūr*); to the west of the Tigris the Kurds of al-Djazīra and Mārdīn were at the mercy of all their neighbours. At Mārdīn, however, a certain Ibrāhīm al-ʿArs Bālū (?) had shortly before then proclaimed himself independent and had attained considerable power. The author then gives a list of twenty tribes living between Hamadān and the part of al-Djazīra that lies between Mawṣil and Kawār (cf. Kēwar in the *Sharaf-nāma*):

1. The Gūrānī, who were warriors and agriculturists (*djund wa-raʿiyya*).

2. The Gilālī (cf. the mountain called Galāla among the Sohrān; *Sharaf-nāma*, i, 286, and Rich, *Narrative*, i, 123: *Ghellali*). A portion of this tribe migrated to Syria. Their prince Sharaf al-Dīn was governor of Arbīl under the Mongols, but was killed by a Mongol.

3. The Zangalī (Zangana?).

4. The Kūsa and the Mabir (??) of Shahrizūr [*q.v.*] migrated to Syria and Egypt.

5. The Sabūlī (Sutūnī?), lived in Shahrizūr and Ushnū. Near them lived the Ḳartāwī (? cf. Hoffmann, *Auszüge*, 207).

6. The Ḥasnānī (Khushnāwī?), several thousand in number, divided into three branches, one of which living at Karkār alongside of the Ḳartāwi (?) levied tolls on the pass Darband-i Karabolī (the defile of the Little Zāb; cf. Hoffmann, *op. cit.*, 263).

7. Near Karḥīn (= Kirkūk?) and Daḳūḳ lived a tribe of 700 men.

8. A tribe living "between two mountains" (*bayn al-djabalayn*) on the territory of Arbīl in winter sought the good graces of the Mongols, and in summer assisted the invasions of Egyptian troops.

9. The Māzandjān [?] to the number of 500 lived near Arbīl and Māzandjān, Nērwa and Bēkhma (these two latter cantons are situated on the Great Zāb east of ʿAḳr). The chiefs of Māzandjān also ruled the related tribe of the Ḥumaydī (of which there were 1,000 men). The chief of the Māzandjān called Kak had received the title Mubāriz al-Dīn from the ʿAbbāsids. The Mongols divided his lands into two and Kak remained *nāʾib* of Arbīl. He was dispossessed for a time under Arghūn, but according to the *Ṣubḥ al-aʿshā* of al-Ḳalḳashandī, his sons and his grandsons retained their fief (ʿAḳr and Shūsh).

10. Near Tell Ḥaftūn was the land of the numerous Sohrī tribe (Sohrān).

11. Their neighbours were the Zarzārī ("children of gold"). They also possessed Malāzgird (= Rūbār-i Barāzgird) and Rustāḳ (the southern part of Shamdīnān).

12. The Djūlāmerg, of Umayyad origin, numbered 3,000 men.

13. The Kurds of the district of Markawān (read Margawar) were allies of their Djūlāmergī and Zarzārī neighbours.

14. Near Djūlāmerg was the canton of Gawār.

15. Near Djūlāmerg beside ʿAḳr and ʿAmādiya was the canton of Zibārī inhabited by 500 men.

16. The Hakkārī lived at ʿAmādiya and numbered 4,000 men.

17. Near the Hakkārī beside Mardj were the Djabal al-ʿAmrānī and the cave of Kahf Dāwūd where lived the Besītkī (??).

18. Near Djūlāmerg towards Mawṣil lived the Bokhtī, rivals of the Ḥumaydī.

19. The Dāsinī had been very numerous, but their chief Badr al-Dīn came down to more accessible country and there were no more than 1,000 Dāsini in the province of Mawṣil; 500 Dāsini lived at ʿAḳr.

20. The Dumbūlī (?) inhabited the high mountains.

To this information given by the *Masālik*, the *Ṣubḥ al-aʿshā*, basing itself on *al-Tathḳīf* composed by Taḳī al-Dīn Ibn Nāẓir al-Djaysh about 748/1347, adds a list of 25 Kurd chiefs with whom the chancelleries of Cairo were in correspondence.

Tīmūr and the Turkoman dynasties. After the Mongols, the rival Turkoman dynasties extended their power over Kurdistān. This period, of which little is yet accurately known, was of considerable importance for the Kurds. The Ḳara Ḳoyunlu dynasties penetrated into the heart of Kurdistān, involved the Kurd tribes in political and religious quarrels (cf. the extremist Shīʿa of the Ḳara Ḳoyunlu) and provoked considerable movements of the population: it was at this period that the Mukrī Kurds seized the country south of the Lake of Urmia [cf. SĀWDJ-BULĀḲ]. In contrast to this, the conquest by Tīmūr which temporarily swept aside the Ḳara Ḳoyunlu had only a transitory character.

Many incidents in the history of Ḥiṣn Kayfā and Djazīra between 796-897/1393-1491 are recorded in the Syriac Chronicle (written at Haytam) published

by Behnsch, *Rerum seculo XV in Mesopotamia gestarum liber*, Breslau 1838.

Tīmūr had to deal with the Kurds in his campaigns of 796/1394 and 803/1400-1. After overrunning Baghdād and Diyārbakr, Tīmūr attacked Djazīra, which was destroyed. The dependencies of Djazīra were likewise conquered. Tīmūr next crossed the mountains separating Diyārbakr from Mūsh and gave a favourable reception to Sharaf al-Dīn of Bidlīs "renowned for his kindness and justness throughout all Kurdistān". In 803/1400-1 Tīmūr returned from Baghdād to Ādharbāydjān and on the way was attacked by the Kurds.

After the death of Tīmūr, Ḳara Yūsuf Ḳara Koyunlu [see ḲARĀ ḲOYUNLU] returned to Kurdistān and sought refuge at first with Shams al-Dīn of Bidlīs. He gave him his daughter and with his assistance re-established his power. In 820/1417 Ḳara Yūsuf by a *nishān* confirmed the princes of Bidlīs in their possessions. When in 824/1421, Shāhrukh, son of Tīmūr, arrived in Armenia, homage was done to him by Shams al-Dīn of Bidlīs, Malik Muḥammad Hakkārī, Malik Khalīl of Ḥiṣn Kayfā, the *amīrs* of Khīzān, etc. The Kurds of Khoy also remained loyal to Shāhrukh's governor (*Maṭla' al-sa'dayn*, in, *Notices et extraits*, xiv, 153).

The Aḳ Ḳoyunlu [*q.v.*] (the Bayandur dynasty) whose principal centre was in Diyārbakr, conducted a systematic policy of exterminating the great Kurd families (*Sharaf-nāma*, i, 164: *istiṣāl-i khānawādahā-yi Kurdistān*), and in general they persecuted tribes who had compromised themselves by their attachment to the Ḳara Ḳoyunlu, like the great tribe of Čamishgezek. Uzun Ḥasan's generals Ṣūfī Khalīl and 'Arab Shāh conquered Hakkārī, which was later taken for a brief period by the Dumbulī tribe from Boltān. In 875/1470 (cf. Behnsch, *op. cit.*, 14) Djazīra passed entirely into the power of the Aḳ Ḳoyunlu, who appointed their own governor Čalabī Beg, whose merits are recognised even by the *Sharaf-nāma*, i, 123. The Aḳ Ḳoyunlu general Sulaymān b. Bīzan drove out of Bidlīs the Ibrāhīm Khān who was later put to death by Ya'ḳūb b. Uzun Ḥasan.

The Ṣafawid Shāhs and the Ottoman Sulṭāns. Shāh Ismā'īl had invaded Armenia at the beginning of his war with the Aḳ Ḳoyunlu. After the battle of Sharūr (907/1502) he won all the country between Baghdād and Mar'ash. Ismā'īl I's policy with regard to the Kurds did not differ from that of the Aḳ Ḳoyunlu. Like the latter, the Shāh relied on the Turkoman tribes, but being a zealous extreme Shī'ī (cf. KHAṬĀ'ĪĪ in *EI*[1]) he was still more predisposed against the Sunnī Kurds. When eleven Kurd chiefs presented themselves at Khoy to pay homage, Ismā'īl imprisoned most of them and appointed in their stead governors chosen from the Ḳïzïl-bash tribes.

Henceforth, for about three centuries Kurdistān became the arena for the struggle between the Ottoman Sulṭāns and the Shāhs of Persia. The defeat of Čāldirān [*q.v.*] (920/1514) was a terrible blow to the prestige of the new Persian dynasty. In spite of the temporary successes of the successors of Shāh Ismā'īl, their conquests never attained the importance of his early victories and Persian territory west of the Zagros melted away. Ismā'īl's attempt to thrust Persian governors upon the Kurds was a marked contrast to the Ottoman policy instituted by the able Ḥakīm Idrīs, himself a Kurd, which aimed at giving Kurdistān a feudal organisation securing the predominance of the Kurd nobility.

The battle of Čāldirān deeply affected Kurdistān. Malik Khalīl (*Sharaf-nāma*, i, 155), the dispossessed prince of Ḥiṣn Kayfā, had regained possession of Si'ird and was trying to regain his hereditary fief. Muḥammad Beg of Ṣāṣūn was fighting against the Persians. Aḥmad Beg of Mayyāfāriḳīn, Ḳāsim Beg of Agīl, Djamshīd Beg of Pālū, had declared in favour of the Ottomans. The governor of Djazīra had succeeded in repulsing the Persians from Mawṣil. Sa'īd Beg Sohrān had taken Arbīl and Kirkūk. Some twenty other chiefs were wavering in their loyalty to the Persians. A personal visit by Idrīs to all these chiefs won 25 of them over to the Sulṭān.

Whem Selīm had left Tabrīz, Ismā'īl sent reinforcements to Diyārbakır and Ḥiṣn Kayfā. Idrīs summoned to his flag the Kurd levies and defeated Kurd Beg, a former Persian governor of Kurdistān. The Kurds of Diyārbakır resisted the Persian attack until help arrived from Bïyïḳlï Meḥmed Pasha. Bïyïḳlï and Idrīs met at Ḥiṣn Kayfā and defeated the Persians. Then, reinforced by 5,000 Kurds (from 'Amādiya?), the Turks relieved Diyārbakır and took Mārdīn, except for the citadel which remained in Persian hands. The Persian commander then executed a successful diversion from Baghdād and Kirkūk and the people of Mārdīn drove out the Kurds and invited the Persians to re-occupy the town. The two armies met on the Niṣībīn-Urfa road. The Persians were defeated, and Bïyïḳlï forced Sulaymān Khān, who was still at Mārdīn, to surrender. The occupation of Niṣībīn, Dārā, Mayyāfāriḳīn, Diyārbakır and Sindjār followed and Idrīs completed the administrative organisation of the *sandjaḳ*. In the province of Diyārbakır eleven *sandjaḳs* were put under Turkish officials and eight under Kurds (*Akrād beyligi*). The *wālīs* confirmed the investitures of the new begs, but the latter were always chosen from the same family. Five hereditary *ḥukūmats* (*Kurd ḥukūmeti*) retained their dynasties with the transmission of power direct from father to son (cf. Tischendorf, *Das Lehnwesen in d. moslem. Staaten*, Leipzig 1872, chs. ii and iv, quoting 'Ayn-i 'Alī Mü'edhdhin-zāde who wrote at the beginning of the 11th/17th century). A similar system was later applied throughout Kurdistān from Malāṭiya to Bāyazīd and Shahrizūr (cf. below the *Sharaf-nāma*, and the very interesting remarks of Ewliyā Čelebi, iv, 176-80, 271-316, on the 37 *sandjaḳs* joined to Vān by the law of Sulaymān I and the order of march of the local army). Only the province of Kirmānshāh remained to the Persians. Idrīs was liberally rewarded and the *firmāns* of investiture were sent him with the spaces left blank for him to fill in the names of the recipients (von Hammer, *GOR*[2], i, 749).

In 936/1530 Shāh Ṭahmāsp recovered Baghdād from Dhu 'l-Faḳār, a Kurd of the tribe of Mūṣlū (Moṣullu?). A long series of wars began again. Sulṭān Sulaymān led armies against Persia in 1533, 1534, 1535, 1548, 1553 and 1554. In this last year the Baghdād troops conquered the Kurds of Belḳās and Shahrizūr while the Persians were occupied in Georgia (von Hammer, *op. cit.*, ii, 236).

By the peace of 999/1590 'Abbās I had to cede to the Turks the western provinces, including Ādharbāydjān, Shahrizūr and Luristān (*ibid.*, ii, 559) but in 1010/1061 fighting was resumed and by the peace of 1021/1612 Persia regained possession of the lost provinces, except Shahrizūr (*ibid.*, ii, 745). Shāh 'Abbās transported 15,000 Kurds to the frontier of Khurāsān to serve as a bulwark against the Turkomans.

Towards the end of the reign of Shāh 'Abbās, Turkish efforts were concentrated on Baghdād.

During Ḥāfiẓ Pas͟ha's first campaign (1012/1623) his army included the Kurdistān troops. The Kurds fought bravely. The Persians, having defeated the attackers, sent punitive columns to Mārdīn. After the death of S͟hāh ʿAbbās, the grand vizier K͟hosrew Pas͟ha [*q.v.*] advanced on Bag͟hdād in 1039/1629. Sayyid K͟hān of ʿAmādiya, Mīra Beg Sohrān and the mixed Kurdi-Arab tribe of Bād͟jilān took the side of K͟hosrew Pas͟ha, while Aḥmad K͟hān Ardalān threatened the Turkish flank. K͟hosrew Pas͟ha advanced as far as Sinna [*q.v.*] and Hamadān. On their way back, the Turks defeated at Čamčamāl and Dartang a Persian force. Bag͟hdād still held out, and when K͟hosrew Pas͟ha had retired, Aḥmad K͟hān Ardalān reoccupied S͟hahrizūr (von Hammer, *op. cit.*, iii, 17, 23, 49, 86, 93). Not till 1048/1638 did Murād IV finally take Bag͟hdād, and in the next year the treaty was signed with Persia which *grosso modo* fixed the Turco-Persian frontier down to the 19th century (*Taʾrīk͟h-i Naʿīmā*, i, 686). Persia was now completely behind the Zagros chain.

The great struggle between the Ṣafawīs and Ottomans made the Kurds conscious of their political importance. The *S͟haraf-nāma* has preserved for us an accurate picture of the feudal life of the Kurd tribes and principalities at the height of its development about 1005/1596.

S͟haraf-nāma. This book by the chief of Bidlīs, S͟haraf al-Dīn [see BIDLĪSĪ], finished in 1005/1596, occupies an exceptional place among the sources for Kurdish history. The history of the Kurds in the strict sense (vol. i. in Véliaminof-Zernof's edition) is divided into four parts (*ṣaḥīfa*): the first of these deals with those Kurd dynasties which have actually enjoyed the privilege of royalty (*salṭanat*); the second with those whose members have sometimes had coins struck and the *k͟huṭba* recited in their name; the third enumerates the families of hereditary governors (*ḥukkām*) and the fourth is devoted to a detailed history of the chiefs of Bidlīs. Part i. gives five dynasties, the Marwānids [*q.v.*] of Diyārbakr and D͟jazīra, the Ḥasanwayhids [*q.v.*] of Dinawar and S͟hahrizūr; the Faḍlūyids of the Great Lur [see LUR-I BUZURG], the princes of little Lur [see LUR-I KŪČIK] and the Ayyūbids [*q.v.*].

As the distinction between the second and third class of princes is rather subtle and the order in which S͟haraf al-Dīn enumerates the dynasties is quite arbitrary, it is better to arrange these dynasties according to the geographical position of the fiefs, taking D͟jazīrat ibn ʿUmar as the centre. This list will be followed by that of the Kurd tribes in Persia. The fiefs of the second class (including Bidlīs) will be marked with an asterisk (*).

S͟haraf al-Dīn distinguished as far as possible between the tribes and the families of their chiefs, and it is necessary always to bear in mind the bases of feudal organisation in Kurdistān. Chiefs of varied origins rule the Kurdish, Kurdicised and Christian tribes, with the help of warlike Kurd tribes (*ʿas͟hīrat*), which are sometimes settled, sometimes nomad or rather semi-nomad.

Group A. Between D͟jazīra and Darsim:

1. The chiefs of D͟jazīra* claimed Umayyad origin, but gave as their ancestor K͟hālid b. al-Walīd. In such confused genealogies we have a combination of memories of the Kurd alliances of the Umayyads with the local cult of the descendants of the famous general K͟hālid b. al-Walīd [*q.v*], whose tombs are shown near Siʿird (Hartmann, *Bohtān*, 19, 124). These chiefs were at first Yazīdīs and only later became converted to be orthodox Sunnīs. After the death of Sulaymān b. K͟hālid his three sons divided his possessions: D͟jazīra fell to Mīr ʿAbd al-ʿAzīz, Gurgīl to Mīr Ḥād͟jd͟jī Beg and Finīk to Mīr Abdāl. These three branches each kept their own fiefs in later times.

The *S͟haraf-nāma* refers to the possessions of this family as *wilāyet-i Bok͟htī* (i, 320), and enumerates in detail but without system the 14 *nāḥiyas* forming this important fief: Gurgīl, Arwak͟h, Pirūz, Bādān and Ṭanzē (Kalhūk) occupied by the tribe Kārsī; Finīk; Tūr, Haytam (Hethum) and S͟hāk͟h inhabited by the Christians; Nīs͟h Atil; Arams͟hāt the tribe of which (Brāspī) is the chief among those of Bok͟ht; Kēwar or Ḳamīz (?); Dayr-dih which belongs to Ṭanzē.

In spite of the careful study by M. Hartmann, *Bohtān*, in *Mitteil. d. Vorderasiat. Gesell.* (1896), No. 2, and (1897), No. 1, 1-163, the localisation of some of these places is not quite certain.

The fief of D͟jazīrat Ibn ʿUmar lay between the right bank of the Bohtān and the Tigris. It did not include the sources of the Bohtān. Towards the east, the neighbours of the Bok͟htī were the Sindiyān (cf. under ʿAmādiya) settled on the K͟hābūr.

2. The ancestors of the rulers of K͟hīzān, Isbāyerd (Sparhet, Ispert; in Ewliyā Čelebi: Isbaʿird) and Muks (Mukus) were three brothers who came from Balīd͟jān (K͟hnis) in the time of the Sald͟jūḳs *S͟haraf-nāma*, i, 217). The tribe of the principal fief was Namīran; this fief lay along the right bank tributaries of the Bohtān and stretched as far as Marwānān.

3. S͟hīrwān (on the right bank of the Bohtān below K͟hizān and north-east of Siʿird). The ancestors of the "S͟hīrawī" chiefs were in the services of the Ayyūbids and came to S͟hīrwān at the same time as the "Malikān" to Ḥiṣn Kayfā. The S͟hīrawī played even the rôle of viziers by the Malikān (*op. cit.*, i 155). The capital of S͟hīrwān was Kufrā. The other dependencies were Āwīl, S͟habistān (also called, Garni = Kirnik?) and Īrūn.

Bidlīs. The Rozagī (Rozagī) tribe is said to have taken its name from the fact that 24 clans, assembled one day (*rūzī*) in the village of Ṭāb in the canton of K͟hoyt (now the *ḳaḍāʾ* of Modkī west of Bidlīs), and formed a confederation which later became divided into two sections: Bilbāsī and Ḳawālīsī. S͟haraf al-Dīn (i, 361) enumerates the 24 (read 25) clans of Rūzagī, of which five were old settlers and the others newcomers: Bilbāsī (10 clans) and Ḳawālīsī (10 clans).

The Rūzagī took Bidlīs and Ḥāzo (Ṣāṣūn) from the Georgian king Tāvīt (David the Curopalatus, 984-1001?). Later they brought from Ak͟hlāṭ two brothers of Sāsānid origin. One became chief at Bidlīs and the other at Ṣāṣūn. 18 chiefs of the line of Ḍiyāʾ al-Dīn had ruled at Bidlīs before 1005/1596. The only interruptions took place under the Sald͟jūḳs (534-76/1139-80) under the Aḳ Ḳoyunlu (871-900/1467-95), under S͟hāh Ismāʿīl (913-20?/1507-14?) and between 941/1534-5 and 986/1578. In this last year Sulṭān Sulaymān wanted to exchange the hereditary fief of Amīr S͟hams al-Dīn for that of Malāṭiya. S͟hams al-Dīn had to leave Bidlīs, but fearing new intrigues, went to the court of S͟hāh Ṭahmāsp, who treated him with generosity. S͟hams al-Dīn died in Persia in 965/1558. His son S͟haraf al-Dīn, born in exile in 940/1533-4, was carefully educated at the court (the S͟hāh even had him taught painting). He ruled several Persian provinces in succession, and was appointed chief of all the Persian Kurds. After the accession to the throne of Ismāʿīl II, S͟haraf al-Dīn fell under suspicion

and was sent to Nakhčuwān. From there he succeeded in reaching Vān and received from Murād I investiture for Bidlīs, to which Mūsh was added in 991/1583. For the year 1065/1655 Ewliyā Čelebi (iv, 81-121) gives us a detailed description of Bidlīs. The last prince of Bidlīs, Sharaf Beg, was dispossessed by the Turks in 1849 (Lynch, *Armenia*, ii, 149).

The rulers of Ṣāṣūn (Ḥāzo) were called ʿIzzīn from their ancestor ʿIzz al-Dīn, brother of Ḍiyāʾ al-Dīn of Bidlīs. The *ʿashīrats* of Ṣāṣūn were at first Shīrawī, Bābūsī, Sūsānī and Ṭamūkī. The Rūzakī [see BIDLĪS] arrived afterwards; later, after the annexation of Arzan the clans of that district Khālidī, Dayr Mughānī, ʿAzīzān, who had at first belonged to Ḥiṣn Kayfā, came to join those of Ṣāṣūn.

6. The Suwaydī chiefs claimed a Barmakī origin. Their ancestors were adopted by the Suwaydī tribe. The hereditary fief of the Suwaydī was Gandj (this should be read for *Kīkh* in Véliaminof-Zernof, i, 260).

7. The Pāzūkī tribe, which Sharaf al-Dīn places among the tribes of Persia (i, 328), is said to have been of Suwaydī origin. According to the *Sharaf-nāma*, i, 328, it had no definite religion and showed signs of heresy (*rafḍ wa-ilḥād*). The tribe was divided into two branches, Khālid-beglu and Sheker-beglu, and one was under the Amīrs of Bidlīs. Khālid received as fiefs Khnis, Malāzgird and the canton of Uhkān (?) of Mūsh. They grew so pround that they thought of proclaiming their independence. After the battle of Čāldirān, the Suwaydī dispossessed the Pāzūkī from many of their fiefs (*ibid.*, i, 257). In the time of Shāh Tahmāsp, Ḳilīdj Beg, appointed chief of the Pāzūkī, received Zagam (near Tiflis). Later, Pāzūkī were transferred to Alashkert, where the tribe increased.

8. The Mirdāsī chiefs (*Mirdesī* in the *Selīm-nāma*) claimed to be descended from the ʿAbbāsids. Their ancestor was a religious leader who came from Hakkārī to Agīl and whose disciples the Mirdāsī became. The tribe themselves said they were of Arab origin, being Banū Kilāb from around Aleppo, who migrated about 420/1029 as a result of troubles with the Fāṭimids [see KILĀB B. RABĪʿA and MIRDĀSIDS]. The main one of the three branches, the Bulduḳānī, lived at Agīl; it maintained good relations with the Aḳ Ḳoyunlu, but under Shāh Ismāʿīl, Agīl was occupied by the Persians. Of the two other branches of the Mirdāsī, one ruled at Pālū, at Bāghin (below Kighī) and at Kharpūt, and the other first at Bardandj and later at Djarmūk (south of Arghanamaʿdan).

9. The rulers of Čamishgezek claimed to be of ʿAbbāsid descent, but their names rather show a Turkish origin (Saldjūḳ). Their *ʿashīrat* was called Malkīshī (Malik-Shāhī?). There were about 1,000 hearths of Malkīshī in the Persian service (in Persia?). The lands of the Malkīshī were so numerous that the name *Kurdistān* had become synonymous with Čamishzezek (*Sharaf-nāma*, i, 163). They kept them in the Mongol period, under Tīmūr and Ḳara Yūsuf, but the Aḳ Ḳoyunlu did all they could to weaken the tribes faithful to the Ḳara Ḳoyunlu and sent the Turkish tribe to Kharbandalu against Čamishgezek. Shaykh Ḥasan drove out the Kharbandalu and submitted to Shāh Ismāʿīl. The latter put a Persian governor in his place. Selīm I restored the hereditary *amīr* Pīr Ḥusayn.

Group B. Between Djazīra and Kilis:

10. Ḥasan-kayf* [cf. ḤIṢN KAYFĀ]. The local chiefs (*malikān*) claimed to be of Ayyūbid descent, which seems very probable. Their ancestor was alleged to have received the fief of Ḥiṣn Kayfā from the ruler of Mardīn. The first chief mentioned by the *Sharaf-nāma* is Malik Sulaymān who died in 736/1335. The Aḳ Ḳoyunlu seized Ḥiṣn Kayfā, but Malik Khalīl, who had taken refuge in Ḥamā, later regained possession of his fief. At a later date the Ottomans dispossessed the sons of Malik Khalīl. Among the dependencies of Ḥiṣn Kayfā, the *Sharaf-nāma* mentions Siʿird, Bishēri, Ṭūr (which sometimes figures among the possessions of Djazīra, cf. *ibid.*, 117, 127, 157) and Arzan.

11. Sulaymānī, rulers of Marwānid origin (i.e. from the later branch of the Umayyads) established themselves at first at Khūkh in the canton of Ghazālī (between the Ḳulp and the Baṭmān Ṣu before they join) and gradually captured many strongholds and territory as far as the Tigris. They ruled a powerful confederation of tribes, the majority of which were nomads and in summer moved to the Ala Tagh (Niphates). The chief of these tribes was Banūkī, but the more enterprising was Basiyān, 1,000 families of which migrated to Bāyazīd under their chief Shāhsawār. A number of these tribes professed Yazīdī doctrines. The Sulaymānī lived on bad terms with their neighbours of Ṣāṣūn. They were divided into two branches, that of Ḳulp and Baṭmān and that of Mayyāfāriḳīn.

12. Zraḳī (the modern pronunciation attested by Addai Scher, in *JA* [1910], 119-39); according to Sharaf-al-Dīn, Zraḳī is a contraction of the Arabic Azraḳī. The ancestor of the family, who was an Arab holy man from Syria of ʿAlid origin, arrived in Mārdīn in the time of Artuḳ (d. 516/1122; Abu 'l-Faradj, *Mukhtaṣar*, 379). The family formed connections by marriage with the Artuḳids and later with the Aḳ Ḳoyunlu. There were four branches of Zraḳī, the principal branches being those of Tardjīl (west of the Baṭmān Ṣu) and ʿAtāḳ. The two other branches were that of Darzīnī (an old Christian convent Dayr Zīr?) and that of Kurdikān (between Diyārbakr and Mayyāfāriḳīn), the latter descendants of the marriage of a Zraḳī chief and a gipsy woman (*dukhtar-i kābulī*).

13. Kilīs. The ruling dynasty believed it was related to those of Hakkārī and ʿAmādiya. Their ancestor Mand (Mantashā) had rendered services to the Ayyūbids, who gave him the canton of Ḳuṣayr (near Antioch). He united under his rule the Yazīdīs of Ḳusayr and those living between Ḥamā and Marʿash, as well as the Kurds of Djōm and Kilīs. Under the Mamlūk Sulṭāns and under Selīm I, disputes broke out between the Yazīdīs (Shaykh ʿIzz al-Dīn) and the family of Mand, which ended in favour of the latter; but the hereditary rights of this north Syrian fief do not seem to have been on a very solid basis.

Group C. Between Djazīra and Khoy:

14. Hakkārī* [see HAKKĀRĪ and SHAMDĪNĀN]. Sharaf al-Dīn does not seem to know the old quarters of the tribe around ʿAmādiya from which the Zangid Atābegs had driven them northwards. The *amīrs* claimed to be of ʿAbbāsid descent.

The first *amīr* mentioned in the *Sharaf-nāma* is ʿIzz al-Dīn Shīr (probably simply an arabicisation of the name Yazdān-Shir) who held out against Tīmūr in 789/1387 in the fortress of Vān. Under the Aḳ Ḳoyunlu, the tribe of Dambulī (of Djazīra) took possessions of Hakkarī, but the Christians of Diz (*Āsūrī* = Nestorians) went to Egypt to bring back the scion of the ancient family Asad al-Dīn Zarrīn Čang ("Golden arm"). The restored dynasty received the name of Shambō (M. Garzoni, *Grammatica della*

lingua kurda, Rome 1787, 4: *Sciambò*). In the time of Ismāʿīl I, the Shambo chiefs lived in the castle of Bāy (in Shamdīnān); a member of the family ruled at Vostān (southwest of Vān), but the possession of the *nāḥiya* of Kawāsh west of Vostān was disputed with the Hakkārī by the Rūzakī. Hakkārī rule extended to Albāḳ in the north. The last representative of the Hakkārī house, Nūr Allāh Beg, was dispossessed by the Ottomans after the rebellion of Badr Khān Beg of Bokhtān, and in 1845, Ḥalīme Khānim surrendered Bash-ḳalʿa to the Turks. The tribe of Pinyānish (*ibid.*, i, 97, 100) which still exists is mentioned as living near the Hakkārī.

15. The Maḥmūdī fief lies north of Hakkārī on the rivers which feed the lakes of Vān and Arčak. The rulers (Marwānids or ʿAbbāsids of Bokhtan), who originally professed the Yazīdī faith (*Sharaf-nāma*, i, 307) settled there in the Ḳara Ḳoyunlu period and soon came into conflict with the Hakkārī and Dumbulī.

16. The Dumbulī are a tribe of Bokhtān (*Sharaf-nāma*, i, 118, 310: *Dumbul-i Bokht*, which for long remained Yazīdī). The Dumbulī later came into Ādharbāydjān where they received as a fief Sukmanābād (Sögmānābād) north-west of Khoy (now Zūrawā). Under the Aḳ Ḳoyunlu, the Dumbulī had seized the castle of Bāy (in Shamdīnān) and a part of, Hakkārī (*ibid.*, i, 193). To their *odjaḳ* of Sukmanābād Shāh Ṭahmāsp added Khoy. Under Sulṭān Sulaymān, the Dumbulī received Ḳoṭur and Bārgīrī; later they annexed Abaghā, Sulaymān-Sarāy (the modern Sarāy) and Čāldirān. Zayn al-ʿĀbidīn Shirwānī in his *Bustān al-siyāḥa* (beginning of the 19th century) says that all the Dumbulī are Shīʿīs (cf. the allusion in the *Sharaf-nāma*, i, 312) and speak Turkish (!).

17. Brādost. The ruling family was of Gūrān [*q.v.*] or Ḥasanwayhid descent. Its lands lay west of Urmia. One branch ruled at Ṣomāy [*q.v.*]; another at Tergewer and at Ḳalʿa Dāwūd. The remnants of the Brādost tribe now live south of Shamdinān on the Rūbār-i Brādost (a tributary of the Great Zāb, the sources of which lie west of Ushnū).

18. Ustūnī. The chapter, which is wanting in the manuscripts, must certainly refer to the first dynasty of Shamdīnān, whose headquarters were Sutūnī in the *nāḥiya* of Harkīk [see SHAMDĪNĀN].

19. The history of the Zarzā (cf. the Zar-zarī of Shihāb al-Dīn al-ʿUmarī) announced in the preface to the Sharaf-nāma is lacking in the text.

20. Tarzā. The paragraph is lacking in the manuscripts and we know nothing of the tribe.

Group D. South of Hakkārī:

21. ʿAmādiya* [*q.v.*]. We have seen that the town of ʿAmādiya was built on the site of an ancient castle under ʿImād al-Dīn Zangī (521-41/1127-46). The local dynasty of Bahdīnān mentioned in the *Sharaf-nāma* seems to have settled in the country after the end of the Zangids (7th-8th/13th-14th centuries). The chiefs of ʿAmādiya were known for their fervour in religious studies. The *Sharaf-nāma* gives their names for the Tīmūrid period. Later (under Ismāʿīl I), the Bahdīnān annexed the Zakho district inhabited by the Sindī and Sulaymānī which had at one time formed a separate fief (*wilāyat-i Sindiyān*). In this way the fief of Bahdīnān incorporated the greater part of the mountainous country north of Mawṣil (Mount Gāra, etc.).

22. Ṭasinī (Dāsinī). The chapter dealing with this important Yazīdī tribe is lacking in the manuscripts, but in the text we find a reference which shows that the *amīr* s of ʿAmādiya took Dohūk from the *sandjaḳ-i Tāsinī* (i, 109) and that in 941/1534 Sulṭān Selīm I gave the *sandjaḳ* of Arbīl and the whole *wilāyat* of Sohrān to Ḥusayn Beg Dāsenī, a Yazīdī chief which provoked a bloody war with the Sohrān (i, 274-7). The latter ended by regaining their patrimony and Ḥusayn Beg was executed at Istanbul. On the region called Dāsen, cf. Hoffmann, *Auszüge*, 202-7.

23. Sohrān ("the red ones"), descendants of Kalūs, an Arab shepherd of Baghdād who had fled to the village of Hūdiyān in the *nāḥiya* of Āwān (in the Sohrān territory). His son was proclaimed Amīr of Balakān (east of Rawāndiz) and seized the castle of Āwān. The capital of Sohrān, which was embellished by their buildings (Rich, *Narrative*, i, 157) was Ḥarīr (on a tributary of the Great Zāb below Rawāndiz). The Sohrān were still a powerful tribe about 1005/1596-7, but later succumbed to attacks of neighbours and the Bābān (*Narrative*, i, 157) benefited by their decline.

24. Bābān. This name is really applied to several successive dynasties. Their principal fief lay south of the little Zāb and had as its capital Shāri-Bāzēr, but in 1199/1784 the Bābān built a new capital Sulaymāniyya [*q.v.* for details].

25. Mukrī, who now occupy the region south of Lake Urmia [for details see SĀWDJ-BULĀḲ] had broken off from the tribe of Bābān.

26. Bāna. The Ikhtiyār al-Dīn chiefs bore this name because they had adopted Islām of their own free will (*ikhtiyār*) (for details see SĀWDJ-BULĀḲ].

27. Ardalān: see the articles, ARDALĀN, SHAHRAZŪR,, SINNA, SĪSAR.

28. Gāl-Bāghī (*Sharaf-nāma*, ii, suppl. 36-45; the addition is dated 1092/1681. Their chief ʿAbbās Agha of the Turkish tribe of Ustādjalu received a "spring of water" in Marīwān [cf. SINNA] from Bīgebeg Ardalān (900-42/1495-1535]. ʿAbbās Āghā later settled at Bilāwar, a former fief of the Kalhur. His followers were recruited from different tribes. Shāh Ṭahmāsp confirmed him in his rule over Bilāwar and the "Twelve Oymāḳ".

Later, the Porte gave ʿAlī Khān Gālbāghī the *sandjaḳ* consisting of Kirind, Shaykhān, Čakarān (?), Khorkhora, Zend, etc., while Yār Allāh received the *timar* of Erekle (?), Rangrazān and Sahbānān (?).

29. Kalhur (Kalhurr). The chiefs claimed to be descended from Gūdarz, son of Gīw, in the Persian epic. The *ʿashīrat* of the Kalhur is called Gūrān (i, 317) but some manuscripts talk of "Kalhur and Gūrān" (*Sharaf-nāma*, ii, suppl. 6). There were three branches of the Kalhur; those of Palangān [cf. SINNA], Dartang and Māhī-dasht [cf. KIRMĀNSHĀH].

The possessions of the chiefs of Darna and Dartang (now Ridjāb in the district of Zohāb) according to Sharaf al-Dīn, i, 319, corresponded to the older Ḥulwān [*q.v.*]. About 1005/1596-7, the power of Ḳubād Beg stretched from Dīnawar and Bilāwar to Baghdād. Māhīdasht and Bīlāwar (south of the Murwārī pass) formed the patrimony (*odjaḳ*) of the third branch of the Kalhurs. The Māhīdasht branch was nomadic. All this perhaps explains the scantiness of the information given by Rashīd al-Dīn. The Gūrān now keep their old patrimony, but the Kalhur tribe occupies the region south of the great Baghdād-Kirmānshāh road.

Group E. The Persian Kurds:

The plan of the section (*firḳa*) of the *Sharaf-nāma* devoted to the *Akrād-i Īrān* is not very clear. The author was writing at a time when the Perso-Turkish frontier was not settled.

The principal tribes of Persia were three in number: Siyāh Manṣūr, Čiganī and Zangana. Their eponyms were three brothers who came from Luristān or "Gūrān and Ardalān". Besides those tribes and the lesser ones mentioned by Sharaf al-Dīn, there were 24 tribes (*yirmi dört*) of Ḳarābāgh [*q.v.*] (in Transcaucasia), about 3,000 men under one ruler, and the Gīl tribe in Khurāsān without counting tribes of minor importance.

The tribe of Siyāh Manṣūr. In the time of Shāh Ṭahmāsp its chief had become *Amīr al-umarā'* of all the Kurds in Persia (over 24 tribes).

A part of the Čiganī emigrated to Gharčistān.

The tribe of Zangana (Zengene) distinguished itself in al-ʿIrāḳ and Khurāsān.

From 1650 to 1730. "Great Kurdistān", as it has been described by Sharaf al-Dīn, and in so far as it consisted of a series of autonomous Kurd chieftainships, had been already reduced in size by the introduction of Turkish rule in the *sandjaḳs* of Diyārbakr and Vān. Not only did the treaty of 1049/1639 put an end to the Persian expansion westwards, but Turkey during the reign of the Ṣafawid epigoni succeeded in re-occupying the western provinces of Persia as well as Transcaucasia (von Hammer, *GOR*², iv, 235). Practically all the Kurds in this way were reunited under Ottoman rule. Having no longer cause to fear the Persians, the Turks systematically undertook the task of centralisation.

As early as the reign of Murād IV, we find Malik Aḥmad Pasha, appointed governor-general of Diyārbakr in 1048/1638, making an expedition against the Yazīdīs of Sindjār. Later (1065/1655), the same Pasha after his transfer to Vān subdued all the Kurds in this region.

In 1076/1666 a Kurd, the son of a *shaykh*, declared himself the *Mahdī*, but was captured by the rulers of Mawṣil and ʿAmādiya. The affair ended harmlessly by Sulṭān Meḥemmed IV taking the *soi-disant Mahdī* into his personal service (von Hammer, iii, 589).

In the reign of the feeble Shāh Ḥusayn, the Kurds of al-ʿIrāḳ in 1131/1719 besieged Hamadān and carried their depredations up to the capital itself. In 1134/1722 by order of Shāh Ṭahmāsp II an attempt to retake Iṣfahān, which had been occupied by the Afghāns, was made by the Kurd chief Fandun (Feridūn ?), but it was confined to an attack on the Armenian quarter. The Afghāns drove off Fandun who went back to his lands and submitted to the Turks (J. Hanway, *A Historical account of the British trade*, London 1753, iii). Fortune deserted the Ṣafawids. Even ʿAbbās Ḳulī Khān Ardalān submitted to Ḥasan Pashā (von Hammer, iv, 211; cf. however, *RMM*, xlix, 87). His example was followed by the chiefs of Djawānrūd, Darna, Djāf, Harsīn and finally by the *sipahsālār* ʿAlī Mardān Bakhtiyārī [Faylī ?] (von Hammer, iv, 227).

The Afghāns. During the bloody and transitory period of Afghān rule in Iṣfahān, Ashraf defeated the Turks (battle of Andjīdān in 1138/1726), who had in their ranks 20,000 Kurds under Bebek Sulaymān-oghlu (Sulaymān Bābān ?). The Turks attributed their defeat to the conduct of the Kurds, upon whom Ashraf had lavished promises; indeed, shortly before some of the Kurds had gone over to the Afghāns. In spite of his initial success, in the next year 1140/1727 Ashraf had to repurchase his sovereign rights by ceding to the Turks the whole of western Persia, including the Kurd and Lur cantons.

Nādir Shāh. Towards the end of the reign of Sulṭān Aḥmad III, affairs began to change. By the treaty of 1144/1732 the Persians regained their western provinces, and soon Nādir invaded Ottoman territory and advanced up to the gates of Baghdād. The Turks tried in vain to check his advance with Kurdish troops until in 1146/1733 Topal ʿOthmān Pasha appeared on the scene with Kurd reinforcements which he had raised in Mawṣil. Nādir was defeated. In 1147/1734, he operated with success in the Caucasus and took Tiflīs, which had a garrison of 6,000 Kurds. By the peace of 1149/1736 the old frontiers of 1049/1639 were restored. In 1743, Nādir again invaded Turkish territory, but in spite of Kurd and Arab help was driven back to Sinna where he was finally defeated (von Hammer, iv, 317, 398-9).

Nādir was not popular with the Kurds, although there is an epic poem in the Gūrānī dialect on his struggle with Topal ʿOthmān Pāshā. Among the Ardalān, Nādir replaced Subḥān Verdī Khān by his brother, which provoked a popular rising (*RMM*, xlix, 88). In 1137/1727 during a revolt of the Turkomans, the Kurds of Khurāsān (Čamishgezek and Ḳaračorlu) refused their help to Nādir, who punished them and transported them to Mashhad. Nādir was assassinated in 1160/1747, while on his way to punish once more the Kurd rebels of Khurāsān (Jones, *Histoire de Nādir*, London 1770, 118-20). The Kurds (Dumbulī, etc.) played their part in the anarchy which followed the death of Nādir, but the Porte refrained from intervention.

The Zand dynasty. After the death of Nādir Shāh, Karīm Khān Zand [*q.v.*], one of the best rulers Persia has ever had, ruled the greater part of the country. The Zand were a Kurdish tribe of secondary importance (*Sharaf-nāma*, i, 323) living between Hamadān and Malāyir in the district formerly called Īghār. Under Nādir they had been transported to Khurāsān, but after his death they went back to their old homes (*Ta'rīkh-i Zandiyya*, ed. Beer, pp. xi, xviii). With the death of Luṭf ʿAlī Khān in 1209/1794, the dynasty came to an end. The Zand tribe was certainly too weak to be a serious support to the dynasty, but Karīm Khān, like his predecessors, had brought several Kurd tribes from Kurdistān to Shīrāz (Aḥmadāwand, *RMM*, xxxviii; Kōrūnī, who live in a particular quarter in Shīrāz, O. Mann, *Die Tājik Mundarten d. Provinz Fars*, Berlin 1909, p. xxix).

The Ḳādjārs. On the death of Agha Muḥammad Shāh Ḳādjār (1211/1797), Ṣādiḳ Khān Shaḳāḳī seized the crown jewels and for some time tried to gain the throne (*The dynasty of the Kajars*, tr. Sir Harford Jones Brydges, London 1833, 20, 27, 32, 37, 50, 78, 106; R. G. Watson, *A history of Persia*, London 1866, 107, 115, 125). In 1221/1805 the Persians had intervened on behalf of ʿAbd al-Raḥmān Pasha of Sulaymāniyya (cf. Rich, *Narrative*, i, 384; Watson, *op. cit.*, 155, and the Mukrī Kurd song in the collection made by O. Mann, No. xvi). In 1236/1821, as a result of troubles caused by the Kurd tribes of Ḥaydarānlu and Sipkān, the Persians invaded Turkish territory as far as Bidlīs and Mūsh; at the same time they advanced as far as Sherābān near Baghdād by the Kirmānshāh road. The peace of 1238/1823 signed at Erzerūn restored the frontier of 1049/1639, but the Persians refused to evacuate the district of Zohāb peopled by Kurds. The fate of Sulaymāniyya remained in suspense. A new war was about to break out in 1842 when Great Britain and Russia intervened to mediate, and in 1246/1847 a new treaty was signed at Erzerūm by which Zohāb was to be divided into two parts, while Persia gave up all claim to Sulaymā-

niyya in favour of Turkey. During 1848-52, a mixed commission composed of representatives of four powers went over the frontier, but the attitude of the Ottoman delegate Darwīsh Pasha prevented an agreement being reached. Darwīsh Pasha not only had the canton of Ḳotūr occupied by soldiers, but in a secret memoir (published at Istanbul in 1286/1869 and 1321/1903) developed the thesis that all the Kurd cantons south and west of Lake Urmia belonged to Turkey.

Turkey in the 19th century. In 1826, the governor of Sīwās, Rashīd Meḥmed Pasha, was given the task of pacifying the Kurds and installing Turkish governors in Kurdistān. About 1830 a great Kurd rising broke out in several places. Its leaders were Badr Khān and Saʿīd Beg, Ismāʿīl Beg and Muḥammad Pasha of Rawāndiz. About 1820 (1830?) he had declared himself independent and attacked the tribes of Khushnāw; in 1831 he seized Arbīl, Altun Köprü, Koy-Sandjaḳ and Rāniya. The following year he extended his power towards Mawṣil; at Alḳosh 172 Christians were put to death. ʿAkra, Zībar and ʿAmādiya were next taken. In 1833 the troops of Rawāndiz penetrated as far as Zakho and Djazīra to re-establish Badr Khān in power there. The Yazīdīs were severely punished on several occasions. Their chief ʿAlī, who refused to become a convert to Islām, was executed (cf. the popular ballad commemorating this event, *JA* [1910] 134-6), and a whole body of Yazīdīs were massacred on the hill of Ḳoyundjiḳ. In 1835 Ottoman troops were sent against Rashīd Meḥmed Pasha from Baghdād, Mawṣil and Sīwās, and in 1836 the Mīr of Rawāndiz was captured by a ruse. Risings and their suppressions continued for several years longer (cf. Poujoulat, *Voyages*, i, 373; Moltke, *Briefe*, Berlin 1841, 259-84).

The defeat at Nizīb (1839) inflicted on the Ottomans by the Egyptians released new troubles in Kurdistān. In 1843 began the rising of Nūr Allāh Beg of Hakkārī and of Badr Khān of Djazīra. The Nestorians of Hakkārī had lodged a complaint in Mawṣil against the oppressions of Nūr Allāh Beg. In reply, the latter laid waste the Nestorian canton of Barwārī. The massacres went on for several years and the number of victims is said to have reached 10,000. The powers made representations at Constantinople, and in 1847 a large army under ʿOthmān Pasha attacked the Kurds. Badr Khān and Nūr Allāh, defeated in several battles, surrendered and were deported from Kurdistān (cf. Sir H. Layard, *Nineveh*, vii; *Revue de l'Orient chrétien* [1900] v, 649-53; Addai Scher, in *JA* [1910], *loc. cit.*; on Kurd-Nestorian affairs in general see: A. Grant, *The Nestorians*, New York 1841; G. P. Badger, *The Nestorians*, London 1852; J. Perkins, *A residence of 8 years in Persia among the Nestorian Christians*, New York 1852; C. Sandreczki, *Reise nach Mosul und durch Kurdistan und Urumia*, Stuttgart 1857; Riley, *Christians and Kurds*, in *The Contemporary Review* [Sept. 1889]; F. N. Heazell and J. Margoliouth, *Kurds and Christians*, London 1913; W. A. and E. T. A. W. Wigram, *The cradle of mankind*, London 1914; W. W. Rockwell, *The pitiful plight of the Assyrian Christians in Persia and Kurdistan*, New York 1916; H. C. Luke, *Mosul and its minorities*, London 1925).

The Russo-Turkish Wars. In 1804-5, the Russians came into contact with the Kurds and this new influence soon made itself felt. The Russo-Turkish wars of 1828-9, 1853-8, 1877-8, each had far-reaching effects in Kurdistān (the question has been specially studied by Averianov, *Kurdī v voinakh Rossii*, Tiflis 1900). As early as 1829 the Russians had raised a Kurd regiment. As a result of the expatriation of Christians, the Kurds after the war began to spread considerably farther north and west. During the Crimean campaign, the Russians raised two Kurd regiments. On the other hand, when the Turkish troops had left for the north, a considerable rising was stirred up in Bohtān by the popular Yazdān Shīr, nephew and a former rival of Badr Khān.

The war of 1877-8 was at once followed by a rising among the Hakkārī Kurds of Bahdīnān and Bohtān directed by the sons of Badr Khān and later by the rebellion under Shaykh ʿUbayd Allāh of the Naḳshbandī order. The Kurd invaders in 1880 ravaged the Persian districts of Urmia, Sāwdj-Bulāḳ, Miyāndoāb and Marāgha and threatened Tabrīz itself. The chief victims were Shīʿīs. Russia sent a detachment of troops to protect the Araxes frontier. Persia mobilised considerable forces including the Mākū [*q.v.*] cavalry. Turkey, which had barely finished the war with Russia, endeavoured to avoid complications. Finally, the Shaykh returned to Shamdīnān, whence he was sent to Istanbul. He soon escaped from the capital, and via the Caucasus returned to Shamdīnān, but he was again captured and in 1883 died in Mecca.

The *Ḥamīdiyya* troops. The weakening of Turkey after 1878, art. 61 of the treaty of Berlin securing for the Armenians reforms and security against the Kurds and Circassians, the stubborn reaction of the Ottoman government against reforms, and from 1885 the development of the Armenian revolutionary movement with branches in Russia, Switzerland and London, brought complications into the hitherto quite peaceable relations of Kurds and Armenians, in as much as the latter had hitherto submitted to the authority of the Kurd feudal chiefs. About 1891 Shākir Pasha, later appointed to bring into operation the reforms in Anatolia, conceived the idea of creating irregular Kurd regiments, like those of Russian Cossacks. The object of the reform was to train the Kurds and attach them to the Ottoman government. The attempt was not considered satisfactory, for later the *Ḥamīdiyya* levies were transformed into regulars (*Khafīf suwārī*). The creation of the *Ḥamīdiyya* in any case, by the part given to the Kurds and the ambitions aroused, made a considerable stir. There was even bloodshed between the tribes.

Armeno-Kurd relations. At the same time, relations between the Armenians and the Kurds (these "brothers of land and water" according to a phrase recorded by the European consuls) were changing for the worse. The summer of 1894 was marked by bloody encounters at Ṣāṣūn which ended by the devastation of five villages and the whole of the canton of Talori (Dalvorikh) inhabited by Armenians. The events at Ṣāṣūn were the first of a long series of Armenian demonstrations and their sanguinary suppressions, in which the Kurds took an active part. In 1895 an attempt at a rising had been made among the Hakkārī Kurds, but was speedily suppressed; it was not directed against the Christians. From the beginning of the 20th century to the World War, the relations between Armenians and Kurds seem to have been fairly peaceful. On the question in general, see Abovian, *Kurdī*, in the *Kavkaz* newspaper, Tiflis 1848, Nos. 46, 47, 49, 50, 51 (where the "father of Armenian literature" gives a very sympathetic picture of the Kurd character); Creagh, *Armenians, Koords and Turks*, London 1880; A. S. Zelenoy, *Zapiska k karte raspredeleniya armiansk.*

naseleniya, in *Zapis. Kavkaz. Otd. Geogr. Obshč.* (Tiflis 1895), xviii; A. Vambéry, *Armenier u. Kurden*, in *Deutsche Rundschau* (1890), lxxxvi, 216-31; Rohrbach, *Armenier u. Kurden*, in *Verhand. d. Gesell. Erdkunde* (Berlin 1900), 128-33; Baron L. de Contenson, *Chrétiens et musulmans, voyages et études*, Paris 1901; H. B. Lynch, *Armenia, passim*; Mayevski, *Opisaniye Vanskago i Bitlis vilayetov*, Tiflis 1904 (the authoritative work); N. Y. Marr, *Yeshče o slove "čelebi"*, in *ZVOIRAO*, xx (1910); Zarzecki (consul of France at Vān), *La question kurdo-arménienne*, in *La Revue de Paris*, 15 April 1914, and the diplomatic correspondence, publ. in the "Livres jaunes", the "Blue books" and the Russian "Orange book" of 1914.

The 20th century. At the beginning of the 20th century a new figure appeared on the Kurd horizon outside of the usual centres of Kurd movements: Ibrāhīm Pasha b. Maḥmūd b. Timawī b. Ayyūb, chief of the Millī (Milān) tribe in the canton of Shariwērān (between Diyārbakr and Aleppo). Ibrāhīm Pasha had made himself an almost independent position. When the constitution of 1908 was proclaimed, he openly rebelled and retired to the mountains of ʿAbd al-ʿAzīz where he was killed (M. Wiedemann, *Ibrahim Pascha's Glück und Ende*, in *Asien*, viii, 1909, 34-7, 52-4, and Sir Mark Sykes, *The caliphs' last heritage*, 317-27).

A considerable agitation was aroused among the Kurds when the question of the Turco-Persian frontier was re-opened. After the check to the Russians in the Far East (Russo-Japanese War), Turkey in 1905 occupied the disputed cantons of Urmia and Sāwdj-Bulāḳ inhabited by the Kurds. The latter were drawn into the very complicated political game. Turkish occupation only ceased at the beginning of the Balkan War (in October 1912), but only to make room for Russian troops sent into the districts of Khoy and Urmia. Scions of noble Kurd families travelled in Russia. On 17 November 1913 a protocol of delimitation was signed at Istanbul and just before the World War, a Four-Power Commission (Turkey, Persia, Britain and Russia) succeeded in settling the frontier of the disputed regions by re-establishing generally the *status quo* of the beginning of the 19th century (cf. Minorsky, *Turetsko-perisdsk. razgraničeniye*, in *Izvestia Russ. Geogr. Obshč.*, Petrograd, lii [1916], 351-92).

The War of 1914-18. In the course of the war from 1914 to 1918, the Kurds were between two fires. On the activities of Ismāʿīl Agha Simko, see SHAKĀK. On the inter-allied plans (March 1916) regarding Kurdistān, cf the documents in *Razdel Aziatskoi Turtsii*, Moscow 1924, 185-7, 225.

After 1917-18, the situation was radically changed. Kurd committees were formed everywhere (cf. Driver, *Report on Kurdistan*, Mount Carmel, Palestine 1919; this publication is in the British Museum). Sharīf Pasha assumed the role of Kurd representative in Paris and on 22 March 1919 and 1 March 1920 presented to the Peace Conference two memoirs on Kurd claims with a map of "Kurdistan intégral" (cf. *L'Asie francaise*, No. 175, 1919, 192-3). At the same time, on 20 December 1919, an arrangement was reached between Sharīf Pasha and the Armenian representatives, and the two parties made conjointly declarations to the conference (cf. the text of the agreement in the newspaper *Peyām-i Ṣabāḥ*, Istanbul, 24 Feb. 1920; cf. also *Le Temps*, Paris, 10 March 1920). The Treaty of Sèvres of 10 August 1920 having created Armenia (Arts. 88-93) out of the four *wilāyets* (of Trebizond, Erzerūm, Vān and Bidlīs), provided in articles 62-4 for "a local autonomy for the land where the Kurd element predominates, lying east of the Euphrates, to the south of the frontier of Armenia and to the north of the frontier of Turkey with Syria and Mesopotamia". If the Kurd population within the limits mentioned showed to the Council of the League of Nations "that a majority of the population of these regions desires to be independent of Turkey and if the Council then thinks that this population is fit for independence", Turkey agreed to conform to the recommendation, and in this case the Allied Powers would raise no objection to the voluntary adhesion to this "independent Kurd state" of the Kurds living in the *wilāyet* of Mawṣil. As a result of later events, the Kurd question reduced itself to the fate of the Kurds in the *wilāyet* of Mawṣil. The Turkish representatives held that "the Kurds differed in nothing from the Turks and that although speaking different languages, these two peoples formed a single bloc as regards race, faith and customs" (Conference at Lausanne, speech of ʿIṣmet Pasha at the meeting of 23 Jan. 1923). By the decision of the Council of the League of Nations on 16 December 1925, the *wilāyet* of Mawṣil was allotted to ʿIrāḳ, buth with a stipulation reserving to the Kurds the fulfilment of their desires, notably that "officials of Kurd race should be appointed for the government of their country, for the administration of justice and for teaching in the schools and that the Kurd language should be the official language of all these services".

During the long negotiations concerning Mawṣil, serious troubles broke out in the region of Kharpūt and Diyārbakr as a result of the insurrection of Shaykh Saʿīd Naḳshbandī. Shaykh Saʿīd was captured on 16 April 1925 and executed at Diyārbakr. After the settlement of the Mawṣil question, the Turkish government in Ankara enforced a policy, the tendency of which was to eliminate from Kurdistān feudal and tribal influences; cf. Gentizon, *L'insurrection kurde*, in *La Revue de Paris*, 15 Oct. 1925.

Bibliography: A history of the Kurds, the preliminaries of which have been outlined above would necessitate a great deal of preparatory work and research in Arabic, Persian, Armenian, Aramaic and Georgian sources. A systematic ransacking of sources like the *Selīm-nāma* of Ḥakīm Idrīs and his son Abu 'l-Faḍl and the *Taʾrīkh-i ʿĀlam-ārā-yi ʿAbbāsī* would yield a rich reward. The basis of our knowledge of Kurd history is certainly the *Sharaf-nāma* (down to 1005/1596). The text was published (mainly from a manuscript collated by the editor himself) by Veliaminof-Zernof, *Scheref-nameh*, i (history of the Kurds), St. Petersburg 1860; ii (variants of volume i, and general history of Turkey and Persia from the beginning of the Ottoman dynasty to 1005/1596), St. Petersburg 1862. New editions of it exist by M. ʿA. ʿAwnī, Cairo 1931, and by M. A. ʿAbbāsī, Tehran 1343/1965; Arabic translations by M. J. Bendi Rojbayani, with copious notes and comments, Baghdād 1372/1953; M. ʿA. ʿAwnī and Yaḥyā al-Khashshāb, Cairo 1958-62, 2 vols.; a Russian translation by E. I. Vasil'eva, i, Moscow 1967; the French translation by F.-B. Charmoy, *Cheref-nâmah ou fastes de la nation kurde*, in 2 volumes and four parts, St. Petersburg 1868-75, includes commentaries (including a translation of the relevant chapters in the *Djihān-numā* of Ḥādjdjī Khalīfa), but is now in many respects out-of-date and lacks an index. Cf. also the works of H. Barb, *Über die Kurden-*

Chronik von Scheref; *Geschichtliche Skizze d. 33 verschiedenen kurdischen Fürstengeschlechter*; *Geschichte v. 5 Kurden-Dynastien*; *Gesch. v. weiteren Kurden-Dynastien*; *Geschichte d. kurdischen Fürstenherrschaft in Bidlis*, which appeared respectively in *SB Ak. Wien*, x (1853), 258-76; xxii (1857), 3-28; xxviii (1858), 3-54; xxxi (1859); xxxii (1859), 145-50. The lost history of Kurdistān by Muḥammad Efendi Shahrazūrī (d. 1073/1662 at Medina, cf. *Tādj al-ʿarūs*, s.v. *Kurd*), had not come to light by 1927. For the histories of the house of Ardalān, cf. SINNA, where should be added the history (to 1254/1834) of Khusraw b. Muḥammad b. Minūčihr, cf. E. Blochet, *Catalogue des manuscrits persans de la Bibl. Nationale*, i, 305, No. 498. On the *Risālat Ansāb al-Akrād*, belonging to the Asiatic Museum of Petrograd, cf. Romaskevič in *Mélanges Asiatique*, new ser., Petrograd 1918, 392. The newspaper *Zār-i Kurmāndjī* (of Rawāndiz) published in Kurdish a short history *Ghunča-yi Bahāristān* (1926) and announced the early publication of the *Taʾrīkh-i Kurdān* of Zayn al-ʿĀbidīn Beg. General information on Kurd history will be found in G. Campanile, *Storia della regione di Kurdistan e delle sette di religione ivi existenti*, Naples 1818; E. Quatremère, *Notice sur le Masālik al-abṣār*, in *Notices et extraits*, xiii, 1838; C. Rich, *Narrative of a residence in Koordistan*, London 1836 (cf. (V. MINORSKY)

C. From 1920 to the present day.

The First World War (1914-18) led to many political upheavals in the Near and Middle East. The Arab countries (Syria, Lebanon, Palestine, Jordan and ʿIrāḳ) were detached from the Ottoman Empire. The sultanate was abolished in 1922, the republic proclaimed in Turkey on 23 October and the caliphate suppressed on 3 March 1924. Finally, the Council of the League of Nations assigned to ʿIrāḳ the *wilāyet* of Mawṣil on 26 December 1925. For his part, General Riḍā Khān overthrew in Persia the Ḳādjār dynasty and founded the Pahlavī dynasty on 23 October 1925. These rectifications of frontiers resulted in rendering still more complicated the situation of the Kurds who, instead of living under only two governments, the Ottoman Empire and the Persian Empire, were henceforth to find themselves divided between five different countries: Turkey, Iran, ʿIrāḳ, with some quite important minorities in Syria and several colonies in the lands of Soviet Transcaucasia, sc. Armenia, Georgia and Ādharbaydjān. From now on, their destiny would evolve differently, according to the different states which sheltered them.

Vanly, *Le Kurdistan irakien, étude de la revolution de 1961*, Neuchâtel 1970 (Bibl., 390-414).

In TURKEY, from after the First World War and during the long negotiations concerning Mawṣil, some Kurdish nationalists, disillusioned at seeing their hopes of an independent Kurdistān vanish, a Kurdistān foreseen by the Treaty of Sèvres (10 August 1920) but suppressed by the Treaty of Lausanne (24 June 1923), provoked troubles. Shaykh Saʿīd Naḳshbandī of Piran led a rebellion in the regions of Urfa, Severek and Diyarbakir, either through religious fanaticism and respect for the caliphate (Gentizon) or at the alleged instigation of Britain (Muṣṭafā Kemāl). The Shaykh was soon made a prisoner, judged by the Tribunals of Independence (April-June 1925) and hanged at Diyarbakir with 53 other insurgents. The whole trial was followed by the Turkish newspaper *Vaḳit*, from 20 April 1341/1925 to the 28 June, insisting upon the nationalist character of the movement. The failure of the attempt forced the leaders who had escaped to seek refuge abroad.

On 3 October 1927, the Kurdish National League

Hoyboun ("Independence") was constituted by the fusion of all the old committees or associations. Iḥsān Nūrī Pasha of Bitlis was nominated commander-in-chief and a civil administration was established. Some conversations even took place with the representatives of the Turkish government in September 1928 at Shaykh-i Köprü with the promise of a general amnesty for those who had been compromised. The few Kurds who came forward were massacred. After that, the revolt of Ağri Dağ (Ararat) (1930-2) broke out in the spring. Well-organised militarily, the Kurdish troops, who were supported by the tribes in the region of Diyarbakir, achieved some spectacular successes, but ended by succumbing under the blows of a Turkish army, 45,000 men strong and supplied with modern equipment in artillery and aircraft. The Second International, in its session at Zurich, published a resolution of its executive in favour of the Kurdish people (Vol. vii, no. 60, 30 August 1930). The attitude of the Soviets at the time has been interpreted differently by Agabekoff, in his *Mémoires*, published in French in 1930, and by M. A. Kondkarian in the Russian newspaper of Paris, *Dni*, of 31 August 1930, the former speaking of a Soviet activity among the Kurds themselves and led from Tauris by a certain Minossian who represented the G.P.U. there, and the latter asserting to the contrary that the Turks found an aid and complete assistance from the Russian Bolsheviks outside. From 1931 to 1934, some periodic convulsions were felt at Menemen, Erzurum, Diyarbakir, and, in a series of articles of the *Hakimiyet-i Milli*, Burhan Assaf Bey denounces Armeno-Kurdish intrigues. Soon a Turkish law was promulgated on 5 May 1932 which established a plan destined to organise an actual deportation of Kurds to the interior of Turkey. This law, however, was only to be applied after the visit of the Shah of Iran to Ankara in the summer of 1934. But henceforth, officially there were no longer Kurds in Turkey. All the inhabitants of the eastern provinces were from now on regarded as "mountain Turks".

This psychological error and the assimilation of the Kurds by force were to trigger off in 1937-8 a new revolt, as its centre, the mountainous region of Darsim, inhabited by the Zaza Kurds. It was Sayyid Riḍā, *shaykh* of the Nakshbandī brotherhood, who headed it. This revolt was the most terrible for the Kurds, for it was suppressed with the utmost harshness by the Turks. After having hanged the *shaykh* and ten of his companions at al-ʿAzīz on 15 November 1937, the Turks erased Darsim from the map and replaced this ill-fated name with that of Tunceli. The Kurds disappeared from the official vocabulary, and the region remained under martial law until 1946.

After this, there was no more armed uprising in Turkey. Kurdistān stayed calm throughout the Second World War, during which Turkey moreover remained neutral. There followed a certain softening of the régime for the Kurdish regions. Meanwhile, intellectuals were always strictly watched; 49 of them were even arrested in December 1959 and accused of separatism. The military coup d'état of the 27 May 1960 was followed by a new more liberal constitution. Despite some declarations by official personages (cited in the Swedish journal *Dagens Nyheter*, 16 November 1960; cf. *C.E.K.* Paris, no. 12, 8), some articles on Kurdistān and the Kurds were able to appear in the Turkish press and, between 1965 and 1968, some bilingual, Turko-Kurdish journals: *Dicle Ferat* and *Deng*, a Kurdish grammar, a Kurdo-Turkish dictionary, a play *Birîna reş* "The black wound", and the long classical poem *Mem-o-Zin* saw the light of day. But soon everywhere the journals were forbidden, published works confiscated and their authors prosecuted. In addition, to avoid all possible contamination by events in ʿIrāḳī Kurdistān, which had been in revolt for several years, a presidential decree of 25 January 1967 and published in the official journal no. 12,527 of 14 February 1967 declared: "It is illegal and forbidden to introduce the country and to distribute, under whatsoever form, every publication, record or tape registered of foreign origin and in the Kurdish language". Some virulent articles against the Kurds appeared in the Turkish nationalist review *Ötüken* (no. 40, April 1967, no. 42, June 1967; cited in Vanly, *Kurdistan irakien*, 298-300). It was this which led to a retort by the associations of Kurdish students of 19 Kurdish towns, protesting that such an attitude was contrary to art. 12 of the Constitution and art. 37 and 44 of the Treaty of Lausanne (1923). In April 1970, brutal police operations in the town of Silvan, in the province of Diyarbakir, provoked the condemnation of the Kurdish students and of liberal Turks (cf. *Milliyet*, June-July 1970), as well as the question, on 24 July 1970, in the House, of a Kurdish deputy, Mehmet Ali Aybar, an old president of the Labour Party of Turkey (TIP). The Fourth Congress of the TIP (29-31 October 1970), in a resolution, recognised the right of existence of the Kurdish people in Turkey (Vanly, *Survey*, 51-4). More than the ethnic and political side, it seems that from now on the economic and social question must play a role in the solution of the Kurdish problem in Turkey (Rambout, 23-44; Nikitine, 196-8; J. Blau, 35-40; Ghassemlou, 50-62; Arfa, 33-46).

Vanly, *Survey of the national question of Turkish Kurdistan with historical background*, n.p. 1972.

In IRAN, the situation of the Kurds has always been different from that which they experienced in Turkey. Indeed, the Iranian government often insists on the affinities, as much racial as historic, which unite the two peoples. But this does not prevent political and social malaises appearing from time to time, and conflicts, often latent, sometimes bloody, must be recorded. Already during the Great War, the province of Ādharbaydjān in northern Persia had been troubled by the movements of the Turkish or Russian armies on this territory. The chief of the Shakāk, Ismāʿīl Agha Simko, profited from it to attempt to carve out for himself a small Kurdish state of which he intended to assume the leadership. He also succeeded in uniting under his command the Kurdish tribes of the north of the country, achieving several victories over the Turks, the Assyrians and the Iranian troops, changing camp according to the circumstances. He also became the only authority of the region, to the west of Lake Urmiya, finally to be assassinated at Ushnu by the Iranians on the 21 June 1930 (Arfa, 48-54), in the same manner in which he had murdered the Assyrian Patriarch, Mar Shimun Benjamin, on the 3 March 1918 (Joseph, 140-1).

For his part, further to the south, in the province of Kurdistān, Sālār al-Dawla Ḳādjār, related by marriage to the great Kurdish families of Sanandadji, rose in revolt, but was defeated. Some Kurdish chiefs refused to be disarmed, and it was not until 1930 that Djaʿfar Sulṭān surrendered (Arfa, 64-7; Ghassemlou, 73-5).

But the Second World War was also bound to have a great influence on Kurdish nationalism in Iran. Indeed, the occupation of the provinces of the north and west of the country by the Soviet and British troops (25 August 1941), followed by the abdication of Riḍā Shāh (16 September 1941) favoured, by the enfeeblement of the central power, the movements of emancipation, and, for several months, the Iranian army had to confront harshly Hama Rashīd Khān of Bāneh who, aided by numerous neighbouring tribes, had made himself master of the Sardasht-Bāneh-Marivān region in the summer of 1942 (Arfa, 67-70). But this was only the prelude to a real independence movement. First of all, the Kurds profited from the situation to form (September 1942) in the no-man's-land where central authority had disappeared an organisation *Komelat jiyanī Kurdistan* "Committee for the Life (Resurrection) of Kurdistan" (Eagleton, 34). This nationalist but quite conservative committee was composed of city intellectuals and of petits bourgeois from Mahābād, the ancient Sāwdj-Bulāḳ [*q.vv.*], but to which the religious *shaykhs* and chiefs of tribes soon rallied. Soon Ḳāḍī (Kazi) Muḥammad, from a family of rich notables and a jurist himself, adhered to it in his turn (October 1944) and after the end of the war, all these judged the occasion favourable and proclaimed on the 22 January 1946 the Kurdish Republic of Mahābād, in the heart of the autonomous Republic of Ādharbaydjān, which had been established at Tabrīz. In fact, Ḳāḍī Muḥammad wished rather for internal autonomy within the framework of the Iranian empire. This small state, with its limited area, to the west and south of Lake Urmia, was well-organised; schools and hospitals were opened, classical books and reviews in the Kurdish language were published, attempts were made to promote the development of agriculture, commerce, industry and hygiene. A small army was constituted of tribal elements with four generals, among them Mollā Muṣṭafā Barzānī, who came from ʿIrāḳ with his well-equipped contingent of armed men. But on the departure from the Iranian territories of the Russian army (May 1946), who had helped the autonomous republic of Ādharbaydjān, the government of Tehran was to recover the dissident provinces of the north of the country. Ḳāḍī Muḥammad surrendered, but was hanged at dawn on 31 March 1947 together with several other chiefs. The Kurdish Republic of Mahābād had lasted eleven months. But this event had a great repercussion among all the Kurds (Arfa, 70-102; Ghassemlou, 76-82; Rambout, 94-108 and especially Eagleton, *passim*). Then, in September 1950 and February 1956, for economic reasons, the tribe of Djavānrūdī was taken to task by the troops of the Shāh and harshly repressed, on the pretext that it refused to pay its taxes, give up its arms and devote itself to the cultivation of *ḥashīsh*. According to Rondot (*Vie intel.*, 1956, 107-9), the efficacy of the intervention of the Iranian troops was the first positive result of the Baghdād Pact (1955). Since these last backwashes, the Iranian government, by constructive social reforms, attempted to gain the sympathy and even the help of its numerous Kurdish population. It published at Tehran, from May 1959 to May 1963, the weekly *Kurdistān*, in which literature, religion, sciences, history and even politics were competently treated. Later on the ʿIrāḳī government accused that of Tehran of having aided, materially and morally, the insurrection movement of the Kurds in ʿIrāḳ. But this political attitude has in no way changed the distrustful position of the Iranian authorities with regard to its own Kurds.

In ʿIRĀḲ, the period from the end of the First World War to the revolution of 1958 saw the foundation of the new ʿIrāḳī state and the establishment of the Hāshimite monarchy. The British who, at San Remo (1 May 1920) were to receive from the League of Nations a mandate over ʿIrāḳ and Palestine, were charged with organising the land which they had already occupied militarily. Few among them knew the Kurds and their problems, which rendered their task difficult. In December 1918, Major Noel installed at Sulaymānī Maḥmūd Barzandjī (1880-1956) as governor, *ḥukmdār*, with authority over the Kurdish tribes situated between the Great Zāb and the Diyālā. At the end of six months, Shaykh Maḥmūd proclaimed the independence of Kurdistān (end of May 1919), and the British army had to intervene to

overcome him. Wounded at the battle of Bazyan (17 June 1919), Maḥmūd was taken prisoner and condemned to death, but, with his sentence commuted, was sent into exile to India. Meanwhile, several British officers had been assassinated at Zak͟ho, ʿAmādiyya and ʿAkra. Major Soane governed instead of the *s͟hayk͟h*, and calm soon returned. Difficulties arose with the installation as king in Bag͟hdād (23 August 1921) of the Amīr Fayṣal of Arabia, who had been chased from Damascus by the French, and the intention of attaching to the ʿIrāḳī crown the *wilāyet* of Mawṣil, which the Turks continued to claim and which the Kurds wanted to organise for their own profit. The recent Treaty of Sèvres (10 August 1920) recognised in effect the right of the Kurds to independence. Since agitation did not cease to spread over the whole of Kurdistān, S͟hayk͟h Maḥmūd was recalled to Sulaymāniyya (September 1922) and was no longer content with the title of *ḥukmdār*, but proclaimed himself king of the whole of Kurdistān (November). He set up a government of eight members, issued postage and fiscal stamps, levied taxes on tobacco and published a newspaper *Roj-i Kurdistan* "The sun of Kurdistan" which gives many details of all these events (Edmonds, *A Kurdish newspaper: Rhozh-i Kurdistan*, in *JRCAS*, xii [1925]). On 24 December 1922, His Britannic Majesty's government and the government of ʿIrāḳ recognised "the right of the Kurds living within the frontiers of Iraq to establish a Kurdish government within these frontiers, in the hope that the different Kurdish elements would reach agreement as soon as possible on the form to give to this government and the extent of its frontiers, and that they would send to Baghdad some responsible delegates to discuss their economic and political relations with His Britannic Majesty's government and the government of Iraq" (Edmonds, *Kurds, Turks and Arabs*, 312; Rambout, 58-9). But there were soon frictions between King Maḥmūd and his British protectors, as well as with some Kurds who envied his authority. His intrigues with the Turks also triggered off raids by the R.A.F., who forced him to take refuge at Sardas͟h (3 March 1923), where he published a newspaper, *Bangē haqq* "The call of truth". He stayed there until 1930, the year which saw the end of the British mandate.

This new political régime did not help the situation of the Kurds of ʿIrāḳ much, for the ʿIrāḳī government wanted immediately to withdraw from the Kurdish regions the local Kurdish officials in order to install Arabs and to suppress the teaching of the Kurdish language in the administrations of the north. Whence a malaise which degenerated into open revolt when ʿIrāḳī soldiers opened fire on the civil population of Sulaymāniyya (6 September 1930). S͟hayk͟h Maḥmūd once more headed the movement. The ʿIrāḳī army was incapable of bringing it to an end (September 1930-April 1931), and asked for the intervention of the R.A.F. This was very severely criticised by a number of Britons, and especially in a Note of General H. C. Dobbs, former High Commissioner at Bag͟hdād; Maḥmūd was sent into house arrest in Bag͟hdād. In 1931, S͟hayk͟h Aḥmad of Barzān, a less balanced personage, as Longrigg says (86, 103), quarrelled with a neighbouring Kurdish chief. In order to restore calm, the government undertook a winter campaign which also necessitated the intervention of the R.A.F. (cf. Mumford and Wilson, *The Crisis* ...). There was a new uprising in 1933-4, and S͟hayk͟h Aḥmad and his young brother Mollā Muṣṭafā, who had helped him militarily, were forced to reside at Kirkūk and then at Sulaymāniyya. In 1941, during the abortive insurrectional adventure of Ras͟hīd ʿAlī Gaylānī and the "Golden cadre", S͟hayk͟h Maḥmūd, who had profited from it to escape from Bag͟hdād, had tried to raise a levy of Kurdish troops to help the British (Longrigg, 295). In 1943, Mollā Muṣṭafā Barzānī, in residence at Sulaymāniyya, unhappy with the food supplies and the social conditions of his supporters, succeeded in escaping as far as his territory of Barzān, accompanied by S͟hayk͟h Laṭīf, son of S͟hayk͟h Maḥmūd, and raised the standard of the revolt. A Kurd, Mad͟jīd Muṣṭafā, named as Minister of State, intervened to settle the affair. Barzānī surrendered on condition that the Kurdish districts would be better provisioned, that Kurdish and non-Arab officials would be sent there, and finally that schools and hospitals would be opened in Kurdistān. These conditions, accepted by Nūrī Saʿīd, the Prime Minister, who even foresaw the establishment of an entirely Kurdish *liwāʾ* (Longrigg, 325), were not agreed by the regent ʿAbd al-Ilāh and, in the spring of 1945, the revolt broke out more fiercely. This time it was more serious. The Kurds achieved several spectacular victories, while the army underwent heavy losses. Once again the R.A.F. came to play its role of saviour of ʿIrāḳ and the Hās͟himite monarchy. At the end of August, the operation was completed. Mollā Muṣṭafā withdrew to Iran with a party of his troops and his plunder (Rambout, 74-80). Four of his officers who had had faith in governmental promises of amnesty, Muṣṭafā K͟hushnavē, ʿIzzat ʿAbd al-ʿAzīz, Muḥammad Maḥmūd and K͟hayr Allāh ʿAbd al-Karīm, were tried and executed on 19 June 1947.

After these events determined by force, all that remained for the Kurdish nationalists of ʿIrāḳ was to go underground, and this is what they did. They founded the Democratic Party of Kurdistan (D.P.K.) with leftist tendencies, and published two bulletins *Azadi* "Liberty" and *Rizgari* "Liberation". In its second issue (October 1946), the latter extolled an Armeno-Kurdish Union. At the same period, Colonel Elphinston, chief of the Intelligence Service in the Levant, asked himself if these efforts were not going to lead to the constituting of a Republic of the Soviet Union with an Armeno-Kurdish character. In any case, the calm returned, the Kurds profited from the liberty which had been left them to work with more ardour in the cultural domain. Literary reviews saw the light of day. Collections of poetry and articles on the history of Kurdistan and famous Kurds of the past were published. Sulaymāniyya became a very active cultural centre and a lively seat of Kurdish nationalism.

ʿIrāḳī Kurdistān since the proclamation of the ʿIrāḳī Republic (14 July 1958) until 1970 underwent many vicissitudes. This Republic aroused the enthusiasm of the Kurds who, with the other political parties, had participated in the overthrow of the Hāshimite monarchy. For the first time in history, the (provisional) Constitution of the state proclaimed in effect, "the Arabs and Kurds are associated in this nation". The Constitution guaranteed their national rights within the heart of the ʿIrāḳī entity (art. 3) (cf. *Orient*, no. 7 (3rd quarter 1958), 191-9). For his part, General ʿAbd al-Karīm Ḳāsim [*q.v.*] reinstated the Kurdish officials suspended in 1947 and authorised (2 September 1958) Mollā Muṣṭafā, who had taken refuge in the Soviet Union since this date, to return to ʿIrāḳ. He received him there with joy on the 7 October 1958, while his companions in exile returned in April 1959. Ḳāsim gave him a personal guard and a house in Baghdād and, for some time, made him his counsellor to whom he paid attention. The Kurdish Democratic Party, which had prepared itself in secret for the great day and, from April 1959 published its weekly newspaper *Xebat* "Struggle", was authorised to appear. The Kurdish reviews and newspapers prospered, and from now on had a political aspect no longer simply a literary one. But this state of euphoria was not to last much longer, and the struggle of the Kurds for liberty broke out again and lasted ten years, interrupted by arrests and by more and more terrible reprisals. Four periods may be distinguished here:

Difficulties—as much external as internal—were not lacking for the "Faithful Leader". His see-saw politics ended by his setting everyone against him. The Kurds themselves, impatient to see him fulfil the promises which were late in coming, ended up by taking up arms against his dictatorial régime. Naturally, Mollā Muṣṭafā headed the movement (9 September 1961). This uprising was in no way tribal, for it was truly all the ʿIrāḳī Kurds, peasants and townsfolk, intellectuals and feudalists, who formed a bloc against Ḳāsim. The riposte was terrible: a strict economic blockade to starve the north of the country; massive bombardments with napalm, burning villages and harvests and shooting women, old men and children as well as combatants, but which only electrified the courage of the Kurds who, in March 1962, were the uncontested masters of all the ʿIrāḳī north, with the exception of the cities where the government troops were garrisoned. The losses of the army quickly rendered this war in the finest colonialist style unpopular. The soldiers deserted or went over to the enemy; business and commerce were reduced to nothing. A coup d'état was afoot, and the Kurds—without whom nothing could be done—were kept well-informed. At dawn of 8 February 1963, Ḳāsim disappeared tragically from the political scene and, from the next day, the Kurds declared the ceasefire. The Baath (Baʿth) took power in Baghdād. But when the Kurds reminded the new government of their neutrality, they were met with excuses. However, negotiations were embarked on and, on the 24 April 1963, the Kurds even presented a detailed *Memorandum* in which they expressed their desiderata (*Orient*, no. 26 (2nd quarter 1963), 207-11). Meanwhile, once it considered itself quite strong, the Baʿthist government imprisoned the Kurdish deputies, issued an ultimatum (10 June 1963) and the same day resumed hostilities with an increased violence. As in the interval, the Baʿth had also assumed power in Damascus, the Syrians lent assistance to their ʿIrāḳī friends by sending aircraft and the Yarmūk Brigade. The Kurds had soon eliminated the latter. They multiplied their ambushes, seized military posts and convoys of munitions and took prisoners by hundreds. The ʿIrāḳī army, beaten and humiliated, then brought in the "National Guard", aid of the Baʿthist government, whose atrocities against the communists and all the opponents of the régime aroused universal reprobation. By a new coup d'état, aided by the army, General ʿAbd al-Salām ʿĀrif ousted the Baʿth and took all power into his own hands (18 November 1963). Military actions did not continue any the less. Barzānī launched an appeal to the International Red Cross (September 1963; Vanly, 319-21), and the Kurds addressed themselves to the Pope on the occasion of his journey to the Holy Land (2 January 1964; *L'Orient*, Beirut, no. 5240 (4 January 1964); complete text in *C.E.K.* no. 30, 82-8; cf. Mauries, 95, 96).

With a view to finally settling the Kurdish problem, Field-Marshal ʿĀrif negociated a ceasefire (10 February 1964) which Mollā Muṣṭafā accepted without even consulting the political bureau of the D.P.K. The Kurds who, as much as the ʿIrāḳīs, needed a breathing space, profited from it to make known to the outside world the true situation, thanks to foreign journalists who came to visit them; they renewed their provisions in livestock and munitions. The ʿIrāḳī government, occupied with still-born projects of Arab unity, left things to settle down, persuaded that in the end everything would be settled through weariness. Nothing came of it and the Kurds, disillusioned at seeing that no-one was seriously occupied with their demands, after October 1964 resolved to organise in effect their internal autonomy. They nominated administrative officials at all levels, levied dues and taxes, meted out justice in their tribunals. Naturally too, their troops were better-and-better equipped and trained. For the Sixth Congress of the D.P.K. (1-7 July 1964), the general state of the revolution (9-10 October 1964) as well as the new organisation of the Party and Constitution (17 October), cf. Vanly, 227-44 and texts: Constitution, 375-6, Administrative Law, 376-7. On the military organisation, *ibid.*, 244-8; Pradier, 210-23.

But the ceasefire of February was bound to provoke a serious crisis in the heart of the Kurdish insurrectional movement between Barzānī and the political bureau of the D.P.K., which in a brochure published on the 19 April, *L'accord ʿĀrif-Barzānī, une paix ou une capitulation?* accused him of having by this accord betrayed the objectives of the revolution. There was even a bloody engagement at Mawat, on 17 July, between antagonistic groups. At the Sixth Congress, 14 out of the 17 members of the political bureau were excluded from the party, among them Ibrāhīm Aḥmad and Djalāl Talabānī, and took refuge in Iran. This crisis due to differences of view between theoreticians and realists, despite its miseries, did not have any repercussions on the later military

events (cf. Vanly, 218-25; Pradier, 203-9, Viennot, 95-111; Arfa, 149-52).

But the ambiguity of the situation between Kurds and ʿIrāḳīs was bound soon to be dissipated. On 10 May 1964, the ʿIrāḳī government promulgated a new provisional Constitution which passed over in silence the rights of the Kurds explicitly recognised in the 3rd art. of the Constitution of 1958. This would not do for the Kurds who, for their part, had not disarmed their troops. The spring offensive was launched on the 4th March 1965 by almost the entire ʿIrāḳī army (infantry, armour, aircraft) with at its head General ʿAbd al-Raḥmān ʿĀrif, brother of the President. It began by achieving some local successes (March-May), but in summer (June-September) some murderous combats developed in the chain of Safīn. The small town of Pend̲j̲wīn, which had been destroyed, was occupied by the ʿIrāḳīs. Throughout this period, while the Kurds used artillery for the first time, the ʿIrāḳīs used toxic gases, but suffered heavy losses (4,194 killed, 2,201 wounded, 12 tanks destroyed and 5 aircraft shot down). Egypt helped ʿIrāḳ (*Le Monde*, 23 October). The winter campaign (22 December 1965-end February 1966) was resumed with intensity. On 1st January 1966, Barzānī sent a Memorandum to the U.N.O. (text in Vanly, 378-9). On 13 April 1966, Marshal ʿAbd al-Salām ʿĀrif was killed in a helicopter accident. His brother, the general, was chosen to replace him as head of state. The same day as this death a new offensive began to liquidate definitively the rebellion. This campaign, which lasted from 12 April to 15 June, was particularly notable in May for the battle of Rawāndiz or Hendrin, the "Kurdish Verdun", as an eye-witness called it, R. Mauriès (171-213), and was transformed into a rout for the ʿIrāḳīs who, despite intensive use of napalm, lost 1,056 killed, 476 wounded, 600 mercenaries, the "cavaliers of Saladin" were put out of action and an enormous booty taken. The Kurds for their part only had to lament 38 killed and 85 wounded. Despite proclamations of victory, after a new ceasefire demanded from the 15 June by the government, an accord negociated by the Prime Minister Bazzāz (d. 28/6/73) was signed on 29 June 1966 (Vanly, 379; Viennot, thesis, ii, 189-92). Some secret clauses recognised in effect a certain autonomy for the Kurds of ʿIrāḳ; ʿĀrif made a visit to Barzānī (28 October) to try to reach agreement with him, for the ʿIrāḳī General Staff, unhappy with the "Bazzāz plan" did everything to torpedo it. Again, things dragged on for a long time. But the war of 5-11 June 1967 was bound to have its counter-effect in several Arab lands, as also in ʿIrāḳ, where a new coup d'état (17 July 1967) saw General Aḥmad Ḥasan al-Bakr install himself as President of the Republic, followed by a second coup d'état (30 July 1968) in which al-Bakr took over all power and re-established the Baʿt̲h̲ist dictatorship, whose "National Guard" in 1963 had hardly left behind good memories. While the Kurds maintained their material and moral potential and made a great effort in the field of primary instruction by opening 300 schools in 1968, the government flirted with the Kurdish dissidents, created an (Arabic language) University at Sulaymāniyya and the new administrative division (*liwāʾ*) of Duhok among the Kurds, but nevertheless prepared to resume hostilities. These, preceded by several skirmishes, began in April around Koy-Sand̲j̲aḳ. The ʿIrāḳī troops had to abandon the towns of Kala-Diza, Pend̲j̲wīn and Čwarta, and then attacked in June the peasant population of Arbīl, Ḥalabd̲j̲a and Badīnān, spraying the harvests with napalm and sulphuric acid. In July, cholera broke out at Kala-Diza. In August there was the massacre of Dakan, at S̲h̲ayk̲h̲ān. In January (5 January 1970, *L'Express* mentioned that between September and December 1969, the Kurds had stopped the ʿIrāḳī offensive outright; 151 aircraft had been shot down during the last six months. Also in January 1970, the Baʿt̲h̲ist régime opened negociations with Barzānī and the executive bureau. A Kurdish delegation, headed by Dr. Maḥmūd ʿUt̲h̲mān, went to Baghdad and, on the 11 March, an accord on 15 points was signed at Nawperdan, in Kurdistān, between the two parties, which put an end to a war of nine years (text in *Kurdish facts*, February-March 1970). The Kurds obtained their internal autonomy and the Vice-Presidency of the Republic. The Kurdish language became the second official language of ʿIrāḳ (Arabic text in *al-D̲j̲umhūriyya*, Baghdad no. 704, of 12 March 1970; English text in *Kurdish facts*, February-March 1970; German text, Nebez, *Kurdistan*, 232-5). Five Kurds were named as ministers, the amnesty was declared on both sides. Great festivities celebrated the event. However, all the problems were not solved. There was an attempt against Mollā Muṣṭafā (29 September 1971), troubles at Sind̲j̲ār (summer 1972) and controversies over the attribution of the territories of Kirkūk after the nationalisation of the I.P.C. (1st June 1972). In June 1973, an *Appel en faveur du Kurdistan irakien* for the application of the accord of 11 March 1970, emanated from combined groups and from Black Africa (*Le Monde*, 15 June 1973).

Viennot), *Le mouvement national kurde*, in *Orient*, 32-3 (4th quarter 1964, 1st quarter 1965), 29-120; idem, *Documents pour servir a l'histoire du mouvement national du peuple kurde en Irak*, in *ibid.*, 353-402; I. C. Vanly, *Le Kurdistan irakien, entité nationale. Étude de la révolution de 1961*, Neuchâtel 1970; J. Nebez, *Kurdistan und seine Revolution*, Munich 1972; C. J. Edmonds, *The Kurdish war in Iraq: the constitutional background*, in *The World today*, 24/12 (Dec. 1968), 512-20; idem, *The Kurdish War in Iraq: a plan for peace*, in *JRCAS*, liv/1 (1967), 10-23; *The Kurdish national struggle in Iraq*, in *ibid.*, lviii/2 (1971), 147-158; E. O'Ballance, *The Kurdish revolt, 1961-1970*, London 1973.

The Kurds of Syria and Lebanon, apart from some great families and their entirely arabised dependants, such as the Barazī of Ḥamāt, the beys of ʿAkkār, the D̲j̲umblāṭ Druze chiefs (D̲j̲ān Bulād "soul of steel"), have preserved their original characters, although some may often have been settled for several centuries and, in every case, well before the establishment of the French mandate. They posed practically no political problem to the mandatory

power and were able to develop freely a very lively cultural movement. They had a large share in the economic prosperity of the Djazīra (Rondot, *Les Kurdes de Syrie*, 94, 99 and passim; A. Muʿawwad, *al-Akrād fī Lubnān wa-Sūriyā*, Beirut 1945). But difficulties of a political order arose under the various régimes after 1957 and the plan for the "Arab Belt" (1963). Then, on the pretext of agrarian reform, the lands of the peasants were confiscated, and 120,000 Kurds forfeited their Syrian nationality, also loosing the right to become civil servants, to send their children to state schools and to be admitted to the public hospitals. All Kurdish books and music were forbidden. The names of villages were changed to give them Arab names and to settle Arabs there instead and expel Kurds (I. C. Vanly, *Le problème kurde en Syrie*, 1968 (cf. Muḥammad Ṭālib Hilāl, *Dirāsa ʿan muḥāfaẓat al-Djazīra min al-nawāḥī al-ḳawmiyya al-idjtimāʿiyya al-siyāsiyya*, 1963, ed. I. C. Vanly, and 1968); idem, *La persécution du peuple kurde par la dictature du Baas en Syrie*, Amsterdam, October 1968.

(Th. Bois)

iv. — Kurdish Society

The social and economic life of Kurdistan is strongly structured. If a small part of the Kurdish people still leads a nomadic life, its great majority is now sedentarised in numerous villages, but "it survives as well today, and in the countryside Kurdish society is essentially tribal" (Edmonds, 12), as always among nomads. But in the detribalised villages the organisation of the group comes under the influence of the government administration, landlords and religious leaders. This leads to a certain number of transformations of fundamental structures at present clearly evolving in Kurdish society, family, tribe and landlord, which we are going to examine first before considering the religious impact, then drawing attention to the social customs which are attached to them.

A. The fundamental structures of Kurdish society.

1. *The Kurdish family.*

The normal Kurdish family consists of a cell or household composed of the father, mother and children. This household, founded on marriage, is ordinarily monogamous and not patriarchal. Marriage is essential. In Kurdistān there are no old bachelors or spinsters, and also no celibacy nor free love at all. Prostitution does not exist in the small Kurdish villages of ʿIrāḳ or Iran. Adultery is practically unknown because too dangerous. People marry young, the boys at 20, the girls at 12. But in the towns, and since the young Kurds prolong their studies, marriage is delayed. Cousins frequently marry one another. The agnatic cousin is preferred and has rights over his cousin. This way of doing things has many advantages, for the father of the bride knows his nephew better; who, himself, is more in a position to protect the girl. Moreover, in the case of tribal conflicts, especially in the past, this would make one rifle more. At the same time, the marriage portion is diminished. To renounce his cousin, the agnatic cousin will exact the price of his renunciation. If not, he will be able to abduct the girl or even to shoot her as well as her parents (Daghestani, 22-3). So abduction is not therefore unknown, with all its risks (ʿAḳrāwī, 130; Daghestani, 17). Marriage can also be conducted by the exchange of sisters, *berdêlî* (Avdal, 222; Daghestani, 3). In this case, the marriage portion is not exacted and only the costs of the wedding feast remain. Marriage can also be conducted between people who are not related, but there is a preference for the same village or the same tribe, more than for a stranger, so that marriage is always endogamous in the broad sense. Barth (61) was able to ascertain a much greater frequency of marriage between cousins in the tribal populations (57%) than in the non-tribal populations (17%). Hence the importance of knowing lineage and names well (cf. genealogical table: Leach, 63; Barth, 31; Hansen, 116). Among the Yazīdīs and the Ahl-i Ḥaḳḳ strict endogamy is obligatory between some families (Avdal; Mokri, 44). The marriage portion, except in the cases cited, is exacted everywhere (Daghestani, 28; Leach, 44-5; Hansen, 123-4) and is not necessarily considered by the interested parties as being a sale, as it is often seen in the West. On the contrary, they like it as an appreciation of their value. This marriage portion, which varies according to the regions and especially the social situation of the family, is paid in kind, livestock, lands, a mill, etc., or in cash, of which the sum varies enormously, and its high sum may at times cause the aspirant to despair. Despite the critics, even among the Soviet Kurds, it has not completely disappeared. Cf. on this subject some poems translated in *Machriq*, 1958. The virginity of the girl before marriage must not be in doubt and proof must be given on the night of the wedding and kept for a year at least (Nikitine, 109, 115; Hansen, 13-4; Mokri, 68).

Polygamy exists legally as much among the Muslim Kurds as among the Yazīdīs. Horizontal or simultaneous polygamy was very frequent in the past, and was still so in the 19th century. The chiefs of tribes did not always keep to the four legitimate wives authorised by the Ḳurʾān. Ibrāhīm Pasha, founder of Sulaymāniyya, had 40 wives (Campanile, 107); the great Bedir Khān had 14 and 99 children. At his death, 21 boys and 21 girls remained to him. These customs are now ended. In the past, polygamy was a luxury and a sign of power; today it is sometimes an economic need. It can still be encountered in the urban poorly-educated milieu (Hansen, 138), but also in the peasant milieu (Barth, 25). In any case, where it is found, it does not exceed 2% in the Kurd Dagh (Daghestani, 79), 4% in ʿIrāḳ (Barth, 24), and there are never more than two wives. Among themselves, they are called *hewî*. In Turkey and among the Soviet Kurds, polygamy is forbidden by the civil law. But vertical or successive polygamy always exists, thanks to divorce or repudiation, for three *ṭalāḳ*s suffice for a husband to be able to repudiate a wife who no longer pleases him in order to marry another. Also, the *shaykh* of Shadala at 70 had been married 19 times (Hansen, 138), and similarly old Ibrāhīm, *agha* of the Dizai (Hay, 43). The wife can also be repudiated because of sterility or the impossibility of bringing male infants into the world. In this case, she may remain with her husband. If she is repudiated for other reasons, she returns to her father and has few chances of remarrying. A woman guilty or even simply suspected of adultery will not only be repudiated, but will run a high risk of death, which her own father or brother or one of his parents will be entitled to inflict on her. The children of the repudiated wife remain with their father. The widow remains in the house of the father or brother of her husband (Barth, 29). The levirate is practised at times, and a little everywhere (Daghestani, 99; Avdal, 221; Barth, 29; Edmonds, 348; Hansen, 136), not as a rule of law, but for convenience. In the Kurdish family, the husband has great authority,

but the wife also has her word to say. Speaking of the situation of the two spouses, Mrs. Hansen (117) finds that of the woman inferior to that of the man in the humble villages, equal in the village aristocracy and the educated urban milieu, but superior in the uneducated urban milieu.

The birth of a child is always desired, even if a son is not necessarily preferred to a daughter. Also, the children are numerous but decimated by a fairly severe infant mortality. The children are always welltreated, but without excessive refinement, for life is harsh. The name is given at birth and ordinarily by the women (Nikitine, 106), but at times by the mollah (Barth, 112; Hansen, 108). This name is often that of an Islamic personage or a hero of history or national legend, or it may well be one of the virtues which one wishes to see possessed by the newborn, or the name of a flower, fruit, animal with qualities appreciated by everyone. Hypocoristic forms of the name are very widespread. Some names possess at the same time the desinence *o* of the masculine and the desinence *e* of the feminine. But curiously, the masculine forms are used to address individuals who are not noble, while the feminine forms are reserved for personages of distinguished birth (Celadet Bedir Khan, *Grammaire* 98). On names, diminutives, surnames, see Edmonds, 42.

Circumcision, *sinet*, is practised a few days after the birth, either by a specialist *sinetker* or by a simple barber (Barth, 112; Nikitine, 106). In some places, the ceremony may be carried out later, when the child is 5 or 7 years old and often with several children at the same time. The chief or notable whose son has to be circumcised organises a small festivity, and offers a meal to the families concerned (Barth, 112).

2. *Tribal organisation.*

(a) *Listings of the Kurdish tribes.*

A fundamental element of Kurdish society is without dispute the tribe. We possess at present the nomenclature of all the Kurdish tribes. In 1826 Lerch already made a good summary of the Kurds of Turkey (63-87), the Russian territories (88-9) and the Persian territories (92-121). Jaba (1860) specified some numbers of them (1-8 of the Kurdish text). A map of their habitat in Transcaucasia was published at Tiflis by E. Kondratenko (1896) and Col. Kartsov (1897). In 1908 Sir Mark Sykes recorded 305 names of Kurdish tribes of the Ottoman Empire, and G. R. Driver (1919) drew up Sykes' list differently and added the Kurdish tribes of southern Kurdistān (ʿIrāḳ) and those which remain outside the Kurdistān foreseen after the Great War (19-74). But the different political events which have occurred since then have led to many changes in the distribution and situation of the Kurdish tribes. In the Kurdish edition of his *History of Kurdistan* (1931), M. A. Zakī draws up a complete table of all the tribes (319-98, Arabic tr. [1939], 373-468 with map). The Kurdish tribes of Syria were counted by the French services of the Levant in 1930 (5th part, 137-90), and with more care and exactitude by P. Rondot in 1939. The lists published in Kurdish in *Roja nû* of the Kurdish tribes of ʿIrāḳ (No. 66,14—January 1946) and those of Iran (No. 68,4 of February 1946) are not of much use, given the few precise figures, in particular. M. Mokri in Persian gives information on the Sandjābī tribes of Iran (1946), and A. ʿAzzāwī presented in Arabic (1947) an excellent study on the Kurdish tribes of ʿIrāḳ (27-222). A good account of the tribes and sub-tribes of ʿIrāḳ, northern Kurdistān (18-27), and southern Kurdistān (45-51), is supplied for us by H. Field in his *Anthropology of Iraq* (1953), with their numerical importance, the names of the chiefs and the habitat. But in fact, his information is earlier than that supplied by ʿAzzāwī. In Persian, the name of 490 tribes are to be found in Mardūkh (1953), i, 75-119, and a long study on the tribes of Sanandadj, ii, 10-48. Finally, in B. Karabudat there are eight sketches of the position of the Kurdish tribes and clans of Turkey in the *vilayets* of Urfa, Mardin, Diyarbakir, Siirt, Bitlis, Muş, Van and Hakkâri, and similarly in the border districts of Syria, ʿIrāḳ and Iran. As for the Yazīdī tribes, they were in their turn enumerated and placed by A. ʿAzzāwī in 1935 (90-110), and those of Sindjār and Djabal Akrād especially by R. Lescot (1938), 251-61). The interest of this vast table and listing is particularly to show the universality of the tribal phenomenon in the history and life of the Kurdish people. Clearly, it is not our concern to write at length on these different tribes. The fundamental work remains the *Sharaf-nāma* (1596). Much historical and ethnographical information is to be found in the different works of Soane (1912-26). Longrigg (1925), Leach (1940), Nikitine (1950), Barth (1953) and Edmonds (1957). An exhaustive study of the Yazīdī tribes, clans and villages with statistics is given us by S. Damlūdjī (1949) in his work on the Yazīdīs in Arabic (224-60).

(b) *The Kurdish tribe and its components.*

"The Kurdish tribe is a community or a collection of communities which exists for the protection of its members against an external aggression and for the maintenance of the old racial customs and way of life" (Hay, 65). It is evident that a land of mountains, such as Kurdistān, favours the birth and development of groups more or less closed and shut in on themselves, as perhaps was the tribe in its origin. Although constituted like every human grouping which is formed from a kernel like the family, it would be wrong to believe that the Kurdish tribe is an enlarged family, a little in the manner of which the Bible speaks of the Twelve Tribes of Israel (F. Millingen, 284). Indeed, some contemporary Kurdish sociologists are opposed to this way of seeing things. If the vertebral column of the Arab tribe (*ḳabīla*) is a kinship line (*nasab*), among the Kurds it is the soil (*arḍ*), i.e. the region inhabited by all and submissive to the chief of the group (Khesbak, 68; ʿAkrāwī, 18).

However, the western sociologists who have studied tribal organisation among the Kurds (Leach, 1940; Barth, 1953; W. L. E., 1956) seem to have remarked some differences among the nomads on the one hand and the sedentaries on the other. Barth also examined the political organisation of the Djaff, a powerful federation of tribes, almost entirely nomadic until very recently (34-44 and diagr. no. 3); political organisation among the Hamawend (45-9 and diagr. no. 4 and 5), where the economy is based on agricultural exploitation and where non-tribal elements are mixed with the population; and finally, the organisation and political structure of the Baban, a princely family (60-6 and diagr. no. 6). For his part, the anonymous W.L.E. (432) was able to distinguish in the rural population various types of social and economic organisation, e.g. the classical tribe under an *agha* claiming a common origin and divided into *tira* or fractions, such as the Girdī and the tribe under a "feudal" chief of different lineage, such as the Dizaī and Djaff. The influence and the social role of the landlords and religious *shaykhs*, who are not chiefs of a tribe, are another aspect of the problem (cf. Rondot, *Les tribus montagnardes*, 39-47).

Furthermore, real social classes are recognisable in Kurdish society. The most evident distinction exists between the villagers of tribal origin, *eşīr* (*ʿas̲h̲īra*) and those who are not and are named after the regions and dialects, either *kurdmanč* (Kurdmandj), *goran* or *miskīn*, some of them being sometimes almost the serfs of the landlords of the village (Nikitine, 124). The last name *miskīn* should be preferred, says Edmonds (123), for the two others denote different meanings (dialect or tribe). Perhaps they are to be seen as the descendants of the autochthonous populations conquered by the warlike tribes? But even within the same tribe, there is no uniformity of rights and duties. There are the noble families, one might say, *torin*, such as the Begzādas; and the commoners who comprise firstly a military caste, the *xulam* (*g̲h̲ulām*) (Nikitine, 125) or *piştmala* (Barth, 42), a kind of praetorian guard of the chiefs who are recruited in all the *tira* of the tribe (Barth, 46) and who, in the past, had almost the status of slave (Nikitine, 125), and finally the class of peasants.

Perhaps one may now give the classical scheme of the organisation of a Kurdish tribe according to Rondot (*Tribus*, 18 ff.) with regard to the Omeran. At the base is the house or household or family in the strict sense of father, mother and children. A group of houses form a *bavik* or *mal*, an extended family. The union of many *baviks* constitutes the clan or *ber*. The collection of all these clans gives us the tribe or *eşīr* (*ʿas̲h̲īra*). The terminology is different in Barth, who divided e.g. the Djaff *ʿas̲h̲īra* into a certain number of tribes or *tira*, a political group not to be confused with the *hoz*, a group of the same lineage. The *tira* is subdivided into many *k̲h̲el*, each *k̲h̲el* composed of 20 to 30 tents or households united by economic links as well as by family links. At the head of the *ʿas̲h̲īra* there is, or used to be, a *pas̲h̲a* of the family of Begzāda; each *tira* has at its head a *raiz* (*raʾīs*); and at the head of each *k̲h̲el* an elected chief of a village, the *kik̲h̲a*. Among the Hamawend, the chief of a *tira* is called *ag̲h̲a*. For his part, Leach (13-14), distinguished the *ʿas̲h̲īra* whose "name describes at the same time the people and the territory which occupies it". It is essentially descriptive of a political grouping. It is formed of one or several clans or *ṭāʾifa*, descriptive of a kinship grouping and divided into several subsections or *tira*. He also finds, he says, the normal anthropological classification: *ʿas̲h̲īra*, *ṭāʾifa* and *tira*, i.e. tribe, clan and lineage. This divergence in vocabulary where Arabic and Kurdish words of different dialects are mixed together hardly favours clarity of exposition.

Let us draw attention to the system of the *oba* (cf. the *k̲h̲el*), which is particular to the semi-nomadic tribes and which makes its appearance towards the end of the 19th and the beginning of the 20th century. It is a temporary association of stock-breeders from different villages, formed in the spring to lead the herds to the pastures and to return at the end of the autumn. Neither kinship nor tribal relations are necessary to be a member of the *oba*. The *ser-oba* or *oba başī* organises the transhumance on condition that he has dues appropriated in kind. There are still to be remarked the differentiations in the groups: the chief *ser-oba* and his family, the different more or less important landlords and the simple shepherds. On this organisation of the *oba*, see Ereb Şemo, *Şivanê kurd* (ed. Beirut 1947, 29), Nikitine, 149-52; Ghassemlou, 158-60. According to O. L. Vilčevsky, *Economie de la communauté agricole chez les Kurdes*, 1936, it is around the *oba* that the "class struggle" is concentrated in Kurdistān.

(c) *The chief of the tribe, his obligations, his responsibilities and his compensations.*

The chief of the tribe, whatever its importance, is ordinarily called *ag̲h̲a*, a relatively recent title, at the earliest after the conquest of Bag̲h̲dād by Sultan Murād IV in 1637 (Edmonds, 223). He always comes from the family of the chiefs. He normally acquires this rank by heredity, but not always. The eldest son generally takes the place of his deceased father, but not necessarily, for a younger brother, judged more able, because more competent or better-liked, can supplant his elder brother. But the choice can also be made after the election of other chiefs or clans, or even, if necessary, by violence. In some cases even, the central government can intervene and nominate the chief directly.

In the feudal age, the chief, almost autonomous in his tribe, had to supply the suzerain, sultan or s̲h̲āh, with levies in the form of troops or tributes which, naturally, he levied on his dependents, whom he had besides to aid protect in time of war and danger. But this is ancient history. Today the chief has other obligations, and especially it is to him or his representative, the chief of the village, that there falls the duty of sheltering guest travellers, Kurds or foreigners, more or less numerous according to the seasons or circumstances. To collect his expenses, the chief imposes on the people of his tribe certain dues, which bear the general name of the *ag̲h̲a*'s right, *ağatī*, either taxes on all the revenues of the shepherd or peasant, or corvées, *herewez*, days of obligatory work, not to mention some obligatory presents, *êdanî*, in certain circumstances (marriages, feasts) and the rights of justice or fines in cash which he can exact for theft, abduction or murder, if recourse is had to his good offices and to his intervention to regulate the litigation (details of all levies due to the chief will be found in Th. Bois, *Connaissance . . .*, 36-8 or *La vie sociale*, 610-11 and notes 46 and 47 with the references). These tribal rights should not be confused with the other rights to which the Kurdish shepherds or peasants are obligated by the landlords.

3. *The economic structures.*

(a) *Kurdish nomadism.*

The nomads are essentially organised around the tribe and are devoted almost exclusively to stock-breeding in a fairly closed economy. The life of a nomad is harsh and is submissive to the heavy authority of the chief. But this way of life, both for social and economic reasons, is tending to be transformed and to disappear. On nomadism and its repercussions on the economy of Kurdistan, see J. Frölin, *Les formes de la vie pastorale en Turquie*, in *Geografiska Stockholm Annalen* (1944), 219-72; H. Christoff, *Kurden und Armenier*, Hamburg 1935; O. L. Vilčevsky, *Economie de la communauté agraire nomade kurde de la Transcaucasie et des districts environnants dans la 2e moitié du xixe s.*, in *SE* (1936), No. 4-5, 135-61; N. Bogdanova, *L'exploitation féodale des nomades*, in *Arch. Hist. Acad. Sc. URSS*, ii (1939); I. P. Petrus̲h̲evsky, *Essai sur l'histoire des relations féodales en Azerbaidjan et en Arménie, du xvie au debut du xixe s.*, Leningrad 1949, 389; W. D. Hütteroth, *Bergnomaden und Yaylabauern im mittleren kurdischen Taurus*, Marburg 1959, 190; T. R. Stauffer, *The economics of nomadism in Iran*, in *MEJ* (Summer 1965), 284-302; V. Monteil, *Les tribus du Fars et la sedentarisation des nomades*, Paris-The Hague 1966. Also, X. de Planhol, *Les fondements géographiques de l'histoire de l'Islam*, Paris 1968, 442; H. Carrère d'Encausse, *Aperçu sur le problème du*

nomadisme au Moyen-Orient, in Documentation française, *Notes et Études*, doc. No. 2095 (3 November 1955).

Some efforts at sedentarisation were undertaken between the two World Wars, in the different states where nomadic tribes, Kurds or others, were living; but both in Turkey as well as in Iran, with Mustafa Kemal or Riḍā Shāh Pahlavi, the methods used were not always well received by the interested parties. This is the reverse of Russian policy with the tribes of the Caucasus, according to R. J. M. Goold-Adams (*Middle East journey*, London 1947, 95), who says that the Russians succeeded better than anywhere else in the Middle East. "In fact, their way of approaching the problem was economic as much as political and military ... For they offered the nomads lands, water and the advice of agricultural experts to make them capable of augmenting the harvests necessary for their subsistance." Elsewhere, sedentarisation has been effected without violence and in stages, as for the Djaff, for example (Edmonds, 146).

(b) *The Kurdish peasantry.*

The Kurdish population is essentially rural. The Kurd is thus a peasant in a rough proportion of 65 to 80%, although industrialisation is beginning to take place. If such are the facts, it is understandable that the land must play a fundamental role in the life of the peasant. The land system in force among the Kurds poses more of a problem. Until the First World War, the major part of Kurdistan was contained in the Ottoman Empire, and the land system came under the Ottoman Land Code (1858), for military fiefs had been abolished in 1839. This system existed until around 1930, in the lands (Syria, ʿIrāḳ) which were inheritors of the Ottoman Empire (Warriner, 66). This Code recognised various kinds of properties: *mulk* property, in the absolute form *raḳaba*, recognised by a title deed or *senet tapo*, or in the form of usufruct, *taṣarruf*; property of the state, *mīrī*, absolute for the state, with usufruct possible for some private individuals; properties of *waḳf* or mainmorte, either *khayrī* if the beneficiaries are works of charity, such as mosques, schools or students, hospitals, or *ahlī* if the beneficiaries are minors; public properties for the use of all, *matrūka*, e.g. roads, rivers, village commons etc.; and finally dead properties, *mawāt*, desert and empty lands which all belong to the state. In Iran the *khāliṣa* crown properties must be added here (Lambton, 238-58).

The extent of these different types of property varies between the countries, and in general leaves little room for the small landowner ($^{2}/_{3}$ of the rural population in Turkey, $^{1}/_{4}$ in ʿIrâḳ). Everywhere large landownership is the rule. In ʿIrāḳ, out of 10 million hectares of arable land, 4 millions belong to the state and 6 million to private landowners. In Iran 10% of the peasants possess 8% of the land, from 1 to 3 hectares or a *cot* per household. The *cot* is both the pair of oxen used for labour and the work carried out by the peasant in one day (Ghassemlou, 128). The great landowners, i.e. the state, the chiefs of tribes, the religious *shaykh*s and the great bourgeois businessmen, lease out on short lets their immense lands at a price which renders the situation of the peasant highly precarious. Indeed, the dues are heavy. If, in Iran, the annual revenue of the great landowners reaches 5,600 dollars a head, that of the average peasant only reaches 60 dollars (Ghassemlou, 168). In ʿIrāḳ, before the Second World War, the income of the Kurdish peasant came to £ 10 a year (Khosbak). There are the dues in kind or in corvée labour (80%), in kind (15%) and for the rest (5%), which fall so heavily on the peasant. In Turkey, several systems are distinguishable: *yarıcılık*, where the peasant uses his own tools, plough and livestock and gives half of the harvest; *resimcilik*, where the amount of the rent depends on the situation and fertility of the soil, the manpower, the rentability of the cultivation and the degree of dependance of the peasant; and *murabbacılık*, where, in exchange for his work the farmer only touches $^{1}/_{4}$ of the harvest (Moiselev, 13). In Kurdish Iran, the same servitudes under different names and rather similar systems are to be found: *nimekare*, in which the landowner leases out the irrigated lands and supplies the seed, and the peasant supplies the work, with the landowner taking $^{3}/_{5}$ of the harvest and the peasant $^{2}/_{5}$; *sēykbar*, in which the landowner supplies the land, the water, the seed and the beasts of labour, and takes $^{1}/$ of the harvests; *sèqut*, in which the landowner supplies soil and water and receives $^{2}/_{3}$ of the harvest; and *dawudu*, in which the landowner, in return for supplying earth and seed, takes $^{2}/_{10}$ of the harvest (Ghassemlou, 132-8). In ʿIrāḳī Kurdistān the same problems are encountered. Thus for the summer harvests, tobacco or cotton, the landowner takes $^{1}/_{2}$ and $^{1}/_{3}$ in the case of the rice; for the winter harvests, wheat or barley, $^{1}/_{10}$ or $^{1}/_{5}$. In addition, there is that which is owned or levied: 7.5% for the *serkal*, the agent of the landowner, 10% for the government, and in addition, all that there is set aside for the *qahwaçi* or coffeemaker of the master, the *mudhif* or guest house, etc. (Khosbak, 48). Also, for the detribalised villages under landlords, the revenues of the soil are distributed roughly as follows: $^{3}/_{6}$ for the landowner, $^{1}/_{6}$ for his representative in the case of the landowners who do not always live on the spot but are settled in the towns, $^{1}/_{6}$ for the share-cropper or farmer, and $^{1}/_{6}$ for the agricultural worker who has neither land nor beast, but only his labour. If account is made at the end of the year, the poor Kurdish peasant is left with empty hands and overwhelmed by debts (Rossi, 86), for he is often forced to take on usurious loans in order to survive until the next harvest.

If such are the conditions of life of the Kurdish peasant, one can understand the rebellions which break out from time to time, e.g. that of the *mouroud* of the Kurd-Dagh (Syria) directed by Ibrâhîm Khalīl between 1930 and 1940 (cf. Th. Bois, *Les Kurdes*, 15-115), and the revolt of 20,000 families of Dizai, in 1954, who demanded the reduction of the tax to $^{9}/_{20}$th of the harvest, the suppression of forced labour, and the suppression of gifts on the occasion of feasts or marriages (Gavan, 19).

To remedy this feudalism of the land which makes the Kurdish peasant a taxable serf, subject to forced labour at pleasure, some projects of agrarian reform have been envisaged by the governments of the regions inhabited by the Kurds. In all these lands however, the feudalists, chiefs of tribes or religious *shaykh*s, privileged in the past, have been the stubborn enemies of these attempts at reform.

In Iran, since 1955, a law provides for the distribution of the lands belonging to the crown and state (Muḥammad Shāh, 205). In 1960, an agrarian law aimed at regulating the property of private lands by fixing the maximum at 400 hectares for irrigated lands and 800 hectares for non-irrigated lands. Provision was also made for rural co-operatives which, from 500 in the beginning, rose to 4,500 in 1965 and 8,000 in 1969. But above all, the Shāh proclaimed the "White Revolution" (26 January 1963), approved by referendum and which, in its

twelve points, was among other things to lead to the abolition of feudalism and the liberation of the peasant. In Turkey, since 1938, provision has been made for the purchase of the lands of the great landowners to distribute them to the peasants, but few have benefited from it. A legal project regarding agrarian reform was promulgated on the 21 June 1945, which envisaged the distribution of the lands of the state and of landowners whose area exceeded 500 hectares, but this art. 17 was abrogated in 1950. The price had to be paid within 20 years (Mouseiev, 14). A new agrarian project began in 1961. The deplorable situation of the peasants was acknowledged, hence it was concerned with the distribution of the lands belonging to the Treasury, 8 million *dönums* (in Turkey 1 *dönum* = 1,000 m² approx.); those managed and cultivated by the state, quite extensive in the provinces of the east and south-east; those of *wakfs*, of which there still remained 1 million *dönums* to distribute; and finally the private estates, whose total area exceeded 38 million *dönums* (Vatan, 14-15). In 1965, out of 13,591,622 members of the active population, nearly ³/₄, i.e. 9,764,652 lived by agriculture (Esenkova, 116). They were also the most unprovided for (cf. M. Makal, *Bizim köy*, Fr. tr. *Un village anatolien, récit d'un instituteur paysan*, Paris 1963, Eng. tr., *A village in Anatolia*, London 1954).

In ʿIrāḳ, the agrarian policy of the royal government was originally rather favourable to the chiefs of tribes, Arabs or Kurds. In 1932, law No. 50 (Dowson) assigned landed property, pasture or arable, to the tribes, then law no. 51 (called *lazma*) assigned to the chiefs the ownership of the properties of the tribe. In 1933, Law No. 28 forbade the peasant "in debt" to leave the land of his master, unless his house was destroyed. Finally, in 1954, Decree No. 11 allowed the Minister of Justice to assign the national properties. Furthermore, e.g. in 1952-4, 1,794,560 *dönums* (in ʿIrāḳ a *dönum* = ¹/₄ hectare) were distributed to 6,863 peasant families from the region of Sindjār, but the major part was assigned to Aḥmad al-Adjil, *shaykh* of the Shammar (Warriner, 160).

Such a situation could not continue. After 30 August 1958, the new Republic published an agrarian law which was aimed at putting an end to feudalism, to raise the social level of the peasant and develop agriculture. According to this law, the area of properties should not exceed 250 hectares in irrigated lands and 500 hectares in non-irrigated lands. The benefits of cultivation were strictly regulated. The lands thus freed had within five years to be distributed to the peasants, from 30 to 60 *dönums* of irrigated lands or from 60 to 120 *dönums* of non-irrigated lands. The landowners had to be compensated in goods from the Treasury at 3%, reimbursable in 20 years (Vernier, 398). There was euphoria among the peasants, who did not wait to help themselves, and a general outcry on the part of the landlords, and many rebellions had to be faced.

In these different lands, the Kurdish peasant was bound to benefit from these agrarian reforms. But it is not sufficient to have the land; he still had to have the means to cultivate it. The means are lacking or insufficient: seed is expensive, the agricultural equipment rudimentary and primitive, everywhere mediaeval ploughing methods are still in use, the indispensable irrigation works are expensive and the co-operatives cannot answer all needs. The Kurds of ʿIrāḳ, as Kurds, are the only ones to have their word today. Thus the D.P.K. at the time of its Seventh Congress, in November 1968, published its programme whose long article 14 presents its views on the group of projects which take account of the special needs of their region (Vanly, *Le Kurdistan irakien*, 365-6). A witness records a partition of lands at which she was present in Kurdistān in 1964, Joyce Lussu, *Anche i Kurdi conquistano il loro socialismo*, in *Rinascità Sarda*, an. ii, No. 9, 10 March 1964, 19.

These problems of the land are not posed in the same manner for the Kurds of Soviet Armenia. Indeed, the First World War was still not finished when the peasants of the Alagöz rebelled with the cry of: "We want the land. How long are we to remain slaves?" They were excited by their young compatriot who relates it himself (Ereb Şemo, *Şivanê kurd*, Beirut 1947, 62). After many struggles against the *kulaks*, the dream was realised, but perhaps not in the fashion originally envisaged. From then onwards, property has been collective and the peasants enrolled in the *kolkhoz* (cf. Aristova, *Kurdî Zakavkaz'ya*, 1966, 64). Instead of the plough and cart of the past, it is the tractor and the combine-harvester which serve to cultivate the lands of the *kolkhoz*. Hence the standard of living of the Kurdish peasant has been noticably raised. But perhaps this new life is somewhat idealised in the work (in Armenian) of Emine Evdal on the *Manners and customs of the Kurds of Transcaucasia*, 1957 (cf. Th. Bois, *La vie sociale des Kurdes*, 605-9; P. P. Mouseiev, *Le problème agraire en Turquie*, in *Sovietskoie Vostokovedenie*, 1956, No. 1 (Fr. tr. in *Doc. Franc.*, *Articles et Documents*, No. 0.369, 14 June 1954, 8-15); Warriner, *Land reform and development in the Middle East, a study of Egypt, Syria and Iraq*, 1957, 1962; A. K. S. Lambton, *Landlord and peasant in Persia, a study of land tenure and land revenue administration*, London 1953, 1969; P. Rossi, *L'Irak devant la reforme agraire*, in *Orient*, vii/3 (1958), 81-93; *La réforme agraire en Irak*, in *al-Bilād*, Baghdād, 12 September 1960, Fr. tr. in Doc. Franc., *Articles et Documents*, No. 01027, 29 November 1960; *Un projet (turc) de réforme agraire*, in *Vatan*, Istanbul, of the 9 and 12 October 1960, Fr. tr. in Doc. Franc., *Articles et Documents*, No. 0.1174, 9-10; Mohammad Reza Shah Pahlavi, *Mission for my country*, London 1961; B. Vernier, *L'Irak aujourd'hui*, 1963, ch. 19, *Structure du secteur rural*, 371-7, ch. 22, 1, *La réforme agraire*, 397-406; H. Mandras and Y. Tavernier, *Terre, paysans et politique*, Paris 196; Jaafar Khayyat, *The Iraqi village, a study in its condition and reform*, Beirut 1950 [in Arabic]; anon., *Notre question de l'Est aux yeux d'un sociologue*, in *Yön*, 3rd yr., No. 90, 18 December 1964 (in Turkish); Ismail Besikçi, *Doğu Anadolu'da geri bırakılmışlığı oluşumu* ("*The under-development of Eastern Anatolia*"), in *Ant*, No. 10, February 1971, 46-73; idem, *Doğu Anadolu'nun duzeni*: *sosyo-ekonomik ve etnik temeller*, ("*The situation of Eastern Anatolia: its socio-economic and ethnic causes*"); *Iran-Shahr, a survey of Iran's land, people, culture, government, economy*, Tehran Univ. Press 1963, published with the assistance of UNESCO, i, 117 pp.).

B. The religious impact.

Kurdish society, based on the land (tribe and village) and blood (family), is coloured by a religious aspect which appears often in daily life (cf. Th. Bois, *L'âme des Kurdes*, 47-8). The central kernel of the present Kurdish habitat, to the east of the Tigris, around Lakes Van and Urmiya, as well as in the north and east of ʿIrāḳ, was contained before Islam within the Sāsānid empire (224-642) where Zoroastrianism became the state religion. But already before that, in the time of the Parthians, Christian evangelisation had encountered there some Jewish groups against pagan populations who worshipped trees, had

a solar cult and sacrificed to the devil. Some of them were converted. The *Acts of the martyrs of Persia* (Syriac ed. Bedjan, Leipzig 1892) report that these autochthonous Christians suffered under Sapor II (309-63). But at the beginning of the 5th century the church was reorganised, bishops were installed in all the Kurdish lands (cf. P. Labourd, *Le christianisme dans l'Empire perse sous la dynastie sassanide (224-632)*, Paris 1904, *passim*) and a number of monasteries were built, some of which were maintained until the invasions of Tīmūr (1336-1405); cf. Fiey, *Assyrie chrétienne, passim*. But the mass of the people followed the official cult, and the Kurds recognise that their ancestors could have been *madjūs* [*q.v.*] or followers of Zoroaster (Sir Mark Sykes, *The caliphs' last heritage*, 424).

The fall of the Sāsānid dynasty (642) favoured the Islamisation of the country that the Arabs had begun to invade a decade or so previously. This happened neither without a blow nor without regret. But after many combats in which they allied themselves sometimes with the Sunnīs, sometimes with the heretical Khāridjīs, the Kurds ended by rallying collectively to the new religion. Having become Muslims faithful to the *Sunna*, the Kurds follow almost in their entirety the juridical school of al-Shāfiʿī (d. 204/820), as the *Sharaf-nāma* already recognised (i, 14) and also Ewliyā Čelebi (iv, 75).

In the course of history, the Kurdish chiefs of the community have shown a fine religious zeal without the national factor intervening, beginning with Ṣalāḥ al-Dīn or Saladin (1137-93). They immortalised their passing by building mosques, schools, hospitals or simple fountains (*Sharaf-nāma*, ed. Cairo, 96-7). Alongside these builders, an intellectual élite, *ʿulamāʾ* and *fuḳahāʾ*, devoted itself to the study of theology and law. Also to be noted are the famous *madrasas* of Bitlis (*Sharaf-nāma*, 455, 495), of Djazīra (*ibid.*, 171) and of Zakho (*ibid.*, 147). At Akhlāṭ, one of these scholars worked on the construction of the Observatory of Marāgha in the 7th/13th century (*ibid.*, 409). ʿAmādiyya is also a centre renowned for its masters (cf. Damloodji, *Imārat Bahdīnān*, 59-61; al-ʿAbbāsī, *Imārat Bahdīnān*). The famous university of al-Azhar in Cairo counts numerous Kurds as teachers of theology (cf. Nikitine, *Les Kurdes*, 210). The cemetery of Eyyūb in Istanbul and that of Scutari contain the tombs of numerous Kurds who, in the Ottoman period, held the post of *Shaykh al-Islām* (cf. Th. Bois, *La religion*, 7).

But over against this official and institutionalised Islam, there has sprung up a popular Islam, often on the fringe of the authorities, civil as well as religious, and which leads a very active life. It is the world of the small folk, peasants or artisans, illiterate for the most part, a kind of secular tertiaries attached to a mystical *ṭarīḳa* and linked directly to a *shaykh* who serves them as spiritual guide, *murshid*. From the 6th/12th century onwards Ṣūfīs entered Kurdistān and prospered there (cf. Lescot, *Enquête*, 23-4). Today, the principal brotherhoods strongly implanted among the Kurds are the Ḳādiriyya, who trace their origin to ʿAbd al-Ḳādir al-Gīlānī (1078-1166), who died at Baghdād and was a Kurd himself, and the Naḳshbandiyya, who claim attachment to Bahāʾ al-Dīn of Bukhārā (1317-89) and are quite widespread in the Islamic world, especially in India and as far as China. This *ṭarīḳa* was introduced into ʿIrāḳī Kurdistān at the end of the 19th century by Mawlānā Khālid after a journey to Dihlī. He was of the Djaff tribe, born at Kara Dağ in 1779 and dying at Damascus in 1826 (cf. Rich, *Residence*, i, 140-1, 320-1; Nikitine, *Les Kurdes*, 212-15; Edmonds, *Kurds*, 77-8). He was to encounter strong opposition on the part of the Ḳādirī *shaykhs*, but ended by supplanting some of them. In south Kurdistān, the disciples of the Ḳādirī order are ordinarily called *darwish* and those of the Naḳshbandīs are termed Ṣūfī (Edmonds, 63). The meetings of the brotherhood are held with the *shaykh* in his residence, *khānḳāh* or *takiyya* or simply *tekke*, a kind of monastery-hospice where the *shaykh* who keeps open table there dispenses his teaching to his *murīds*. But in every place where a mystical *tekke* is established, in a tribe or in a village, some tensions are going to be produced almost automatically. For the *shaykh* is rich, he is the owner of numerous villages, and because of that he is opposed to the *agha* of the tribe who sees there competition with his authority; he is endowed, it is believed, with supernatural and miraculous powers and also is regarded askance by the orthodox *ʿulamāʾ* who have almost no faith in him and distrust him; finally, and above all, he often has the ambition to play a political role; whence the suspicion which he meets with from the government authorities. On the other hand, the credulity of the *murīds* is well imaginable, and their fanaticism can lead to many excesses and eccentricities. Hence from time to time some individuals with an inner light arise who claim to be their *mahdī*, or who are reformers without a mandate but preaching social revolution. Examples abound (Campanile, *Storia*, 91-3; Nikitine, *op. cit.*, 221; Rondot, *Les tribus montagnardes*, 43; Th. Bois, *L'âme des Kurdes*, 52-3; Edmonds, *Kurds*, 74-6). A recent group of Naḳshbandīs, the Nurcular, was founded by the Kurd Saʿīd Nūrsī (1870-1960) in Turkish Kurdistān (cf. *MW* [1960], 232-3, 338-41, [1961], 71-4). The hand of the *shaykhs* and their adepts, especially Naḳshbandīs, is to be found in many uprisings in Turkey and in ʿIrāḳ, with the bloody government reactions which follow, as e.g. the movement of Shaykh ʿUbayd Allāh of Nehrī (1880) and that of Shaykh Saʿīd of Pīran (1925), which brought about the closure of all the mystical *tekkes* in Turkey, and also the insurrections of Shaykh Maḥmūd of Barzindja (1919 and 1922).

The teaching of certain *shaykhs*, in order not to be revolutionary, must be heard and followed with prudence. Such is the mystical doctrine and procedures for contemplation of Shaykh Muḥammad Amīn al-Kurdī al-Shāfiʿī al-Naḳshbandī of Arbīl (d. 1904) in his *Tanwīr al-ḳulūb*, in numerous editions (7th in 1961), cited by A. J. Arberry, *Sufism*, London 1950, 129-32, and the French translation of his mystical technique of *dhikr* by J. Gouillard, *Petite philocalie de la prière du coeur*, Paris 1953, 234-48.

But these different brotherhoods, despite all their excesses and political involvements, are always considered as integral parts of orthodox and official Islam. It is not the same with some sects who, pushing their theories to the extreme, have left Sunnī Islam, such as the Yazīdīs [*q.v.*] who, born of the ʿAdawiyya of Shaykh ʿAdī b. Musāfir (*ca.* 1073-1162), have diverted their spirituality completely from it to the point of having forgotten their origins (cf. Th. Bois, *Les Yazidis, essai historique et sociologique sur leur origine religieuse*, in *Mashriq*, lv (1961), 109-28, 191-242). Similarly, the Ahl-i Ḥaḳḳ [*q.v.*] are really Shīʿī extremists. Dr. Mohammad Mokrī has published numerous Gurani and Persian texts concerning them, e.g. *L'ésotérisme kurde*, Paris 1966. Edmonds studies the members of the sect of the ʿIrāḳ-Iranian frontier, known by the name of Kakai, *op. cit.*, 182-201; idem, *The beliefs and practices of the Ahl-i Haqq of Iraq*, in *Iran, Journ. Brit. Inst. of Persian Studies*, vii (1969),

80-101. Also to be encountered among the Kurds are some aberrant small groups in ʿIrāḳ, such as the Sarlī who are connected with them and, around Mawṣil, the Shabāk who are Kurdish Ḳizilbāsh, not without contact with the Bektāshīs, formerly so powerful in Turkey (Edmonds, 268-9).

Bibliography: In Nikitine, *Les Kurdes*, 228-33, is to be found an excellent account of the theories of N. Marr, *Eshče o slove Čelebi*, in *ZAP*, xx (1912), 99-151; G. R. Driver, *The religion of the Kurds*, in *BSOS* (1922), 197-215; Nikitine, *Les Kurdes et le Christianisme*, in *RHR* (1922), 147-56; idem, *Une apologie kurde du sunnisme*, in *RO*, viii (1923), ii, 116-60; idem, *Les thèmes religieux dans les textes kurdes de ma collection*, in *Actes du Cong. intern. d'histoire des religions*, Paris 1925, ii, 415-34; idem, *Les Kurdes racontées par eux-mêmes*, in *Asie française* (1925), No. 231, 148-57; P. Rondot, *Les tribus montagnardes de l'Asie antérieure, Quelques aspects sociaux des populations kurdes et assyriennes*, in *BEO*, Damascus, vi (1936), 1-50; Th. Bois, *La religion des Kurdes*, in *Proche-Orient Chrétien*, Jerusalem, xi (1961), 105-38; J.-M. Fiey, *A la recherche des anciens monastères du nord de l'Irak*, in *POC*, ix (1959); idem, *Assyrie chrétienne. Contribution à l'étude de l'histoire et de la géographie ecclesiastiques et monastiques du Nord de l'Irak*, Beirut, i, ii, 1965, iii, 1969; Bois, *Monastères chrétiens et temples yezidis dans le Kurdistan irakien*, in *Mashriq*, lxi (1967), 75-102; D. N. MacKenzie, *Pseudoproto-kurtica*, in *BSOAS*, xxvi (1967), 170-3; J. S. Trimingham, *The Sufi orders in Islam*, Oxford 1971; R. Lescot, *Enquête sur les Yezidis de Syrie et du Djebel Sindjar*, Beirut 1938; C. J. Edmonds, *A pilgrimage to Lalish*, London 1967.

Religious texts in Kurdish: Cl. Huart, *La prière canonique musulmane*, in *JA* (1895), 86-109; K. A. Bedir Khan, *Dersên şerîete*, in *Kitêbxana Hawarê*, 12, Damascus 1938; idem, *Tefsîra Quranê*, sûra i-iv, v. 48, in *Hawar*, Nos. 27-57 (15 April 1941 to 15 March 1943); idem, *Hedîsên Cenabê Pêxember*, in *Hawar*, Nos. 27-47 (27 July 1942); D. N. MacKenzie, *A Kurdish creed*, in *A locust's leg, studies in honour of S. H. Taqizadeh*, London 1962, 162-70.

C. Customs and social traditions.

1. *Dress.*

Clothing is characteristic of man. The style of clothing changes from one country to another and varies with the social rank [see LIBĀS]. It also evolves with the times. So it is among the Kurds. Today, the costume of the Kurds tends to fall into line with Western costume, in order to conform with the law (September 1925) in Turkey, and to follow the fashions, especially the masculine ones, for the other Kurds of the towns. But all the Kurdish women and the men in the villages keep to the traditional national costume. The evolution of Kurdish clothing can be followed through the accounts of travellers and the sketches that they give us, e.g. Campanile (1810), 135-40; Rich (1820), i, 180-1, 287-9; Frazer (1834), i, 71, 85-7; or in addition Binder (1885), 172 n. 1; Soane (1912), 399-402 and Nikitine (1956), take up the descriptions of their predecessors. One must wait for the women to have detailed information on the modern dress of the Kurds. Mrs. Aristova (1965), 108-26, speaks of the Kurds of Transcaucasia and gives some photographs of the women's jewels, and Mrs. Hansen (1961) has a very long chapter (65-98) to explain to us in detail the materials and colours of different parts of the clothing, with what is specifically Kurdish, what is the consequence of Islamic customs, and what derives from Western influence, together with measurements, diagrams and numerous photographs, so that one may have an exact idea of the present national Kurdish costume, for men as well as for women. While jewels of every kind and in every material, gold, silver, precious stones, necklaces, bracelets and pendants, sparkle on the costumes of the women, the pride of the men is to be noted in their arms, cartridge pouches and damascened belts, chased daggers and lethal revolvers. The pipe and the tobacco pouch also form part of the Kurd's accoutrement.

2. *Marriage and burial customs.*

From the cradle to the grave, man is everywhere accompanied by customs or traditional rites, which vary with civilisations. Among the Kurds are to be found some customs very much alive which have been preserved from time immemorial. The choice of a fiancée, her toilette before the wedding, the price of prenuptial virginity, whose linen bloodied by the ruptured hymen will bear clear proof, the crossing of the threshold and introduction into her new household, the joys at the birth of the first baby, after a confinement which has nothing of a story about it (cf. A. Brunel, *Gulasar, contes et légendes du Kurdistan*, Paris 1946, 109-11), are the occasion of usages respected by all. It does not concern us to give a systematic and exhaustive account, but to indicate some examples, according to the various Kurdish regions. Kurds in general: Campanile, 103-5; K. A. Bedir Khan, *La femme kurde*, in *Hawar*, 19 (1933), 6-8/294-6; Tawûsparêz, *Le mariage chez les Kurdes*, in *ibid.*, 52 (1943), 12-16/764-8. Kurds of ʿIrāḳ: Barth, in *op. cit.*, 24-9/29-37; Edmonds, 225-6; Hansen, 115-38. Kurds of Iran and the Urmiya region: *ibid.*, 113-15. Kurds of Syria and the Kurd Dagh: K. Daghestani, *La famille musulmane contemporaine en Syrie*, Paris 1932, *passim*. Kurds of Azerbaidjan: Nikitine, 108-11. Kurds of Transcaucasia: E. Avdal, *op. cit.*, 22-83 (cf. Nikitine, in *L'Afrique et l'Asie*, xlix [1960], 61-6). Kurds of the Alagöz: Ereb Şemo, *Şivanê kurd, The Kurdish shepherd*, ed. Beirut, 44-7, 114-8. Kurds of Alamut: Freya Stark, *The Valley of the Assassins*, 1946, 270-1. Yazīdī Kurds: Giamil, *Monte Singar. Storia di un popolo ignoto*, Rome 1900, 45-9, Isya Joseph, *Devil worship*, Boston 1919, 186-91; E. S. Drower, *Peacock angel*, London 1941, 17-25, 86; S. Damlūdjī, *al-Yazīdiyya*, Mawṣil 1949, 276-88. Ahl-i Ḥaḳḳ Kurds: M. Mokri, *Le mariage chez les Kurdes*, in *L'Ethnographie* (1962), 42-68.

The funerary rites are no less varied, whether in regard to the toilette of the dead, the funeral cortège or *kotel*, the ceremonies of mourning and the tree of the deceased, *dara şîn*, or the collective meal of condolences. Descriptions of them are found for the Kurds in general: Campanile, 81-6, with a fine elegy; Nikitine, 115-8; Mukri Kurds: O. Vilčevsky, *Mukriskie Kurdi*, in *Peredneaziatskiy etnografičeskiy Sbornik*, i (1958), 214-18. Kurds of Turkey: Ahmed Mêrazî, *Bîranîyêd min* ("My memoirs"), Erivan 1966, 89-91. Yazīdī Kurds: Lescot, *op. cit.*, 154-6; Drower, 97-8, 185-6; I. Joseph, 192-3; Damlūdjī, 70-2. Children's funerals: Hansen, 139-43.

3. *Festivals and seasonal rites.*

Among the numerous festivities which punctuate periodically the life of the Kurdish people, the Islamic religious festivals are famous everywhere and so do

not merit special mention, with perhaps an exception for the *mawlid* or festival of the birth of the Prophet. Indeed, the brother-in-law of Saladin, Muẓaffar al-Dīn Kökbüri, governor of Arbil, is perhaps at the origin of this festival which he had celebrated with much solemnity and gaiety in 604/1207. An account of it has been given by a native of Arbil, Ibn Khallikān (d. 681/1282), French tr. J. Sauvaget, *Historiens arabes*, Paris 1946, 118-25. On the occasion of the festival, a panegyric is read, of which numerous specimens are to be found in Kurdish. Let us cite simply the *Mewlûdnâme* of Mela Aḥmad of Batê (1425-95?) edited in Cairo in 905 and re-edited in Istanbul in 1919 and always used; Bîyisa Pêxember, *Life of the Prophet*, edited in Damascus, in *Kitêbxana Hawarê*, 4 (1933); Shaykh Mohammad Khâl, *Mewlûdnâme-i new-eser* ("The new account of the birth of the Prophet"), Sulaymânî 1937; idem, *Mewlûdnâme*, in *Kurdistan* (Tehran) Nos. 166 ff.; Mela Ḥasan Hartûşi, *Mewlûdnâme*, in *ibid.*, Nos. 43-134 (1960-2).

A very popular festival among the Kurds, and now official in ʿIrāḳ since the establishment of the Republic (1958), is *Novruz* (see NAWRŪZ), or the festival of the new year, i.e. in spring (21 May). It is a sort of national festival of the Kurds. Moreover, it has always been celebrated by the Yazidīs, who are supposed to have preserved many ancient traditions and who call it *Sertsal*. There is also the Festival of the New Year (cf. Lescot, *op. cit.*, 71). The festival is in any case earlier than Islam, as "myth of the eternal spring" which was always celebrated in the Iranian world (cf. G. Widengren, *Les religions de l'Iran*, Paris 1968, 58-67). It is said to have been instituted by the mythical King Djamshīd (H. Massé, *Croyances et coutumes persanes*, Paris 1938, 145). Today, the official festival is accompanied by speeches, poems, dances and theatrical scenes, where the myth and struggle of the smith Kāwe against the dragon Zahhāk or Aži Dahaka is mimed, a prefiguration of the struggle of the Kurdish people for its independence. In Sulaymānī, the festivities are associated with all kinds of entertainment and masquerades with a false *amīr*. It is a real carnival (Edmonds, 84-5; Taufiq Wahbi, *The rock sculptures of Gunduk caves*, in *Sumer*, iv/2 [1948], Fr. tr. in *BCEK*, vii (1949), 1-13. Ereb Şemo cites another form of carnival: *Kose geldi*, *Berbang*, in *Berevok*, Erivan 1969, 61-2. It is in connection with this festival that a special cake, *samani pazan*, is baked, which, by night, ʿĀʾisha or Fāṭima will come to bless by touching it with their hands. It is eaten in the family and with friends, with the aim of having offspring (Wahbi, 11-12). In Iran, on the eve of the New Year, magical rites are mixed with the rejoicings (M. Mokri, *Les rites magiques dans les fêtes du "Dernier Mercredi de l'Année" en Iran*, in *Mélanges Massé*, Tehran 1963, 288 ff.). The girls make vows then: Thirteen at the door, New Year. Husband in the house, baby in the lap (Massé, *op. cit.*, 159). Abroad, the Kurdish students celebrate this national festival with gaiety (Deichi Delair, *Nawroz and the legend of Kawa*, in *The Kurdish Journal*, U.S.A., ii/1 [March 1965], 3-5). Let us note further in *Kurdistan*, London, organ of the K.S.S.E., Nos. 7/8 (1961), the poem *The festival of Newroz* of Salih Karadaghi, 32.

Other seasonal festivals are celebrated above all by the shepherds on the occasion which concerns them particularly: the first lambing, *serapez*; the departure for the *zozan* or summer pasturage, *berodan*; the shearing of the sheep, *berxbir*; and above all the releasing of the rams, *beran berdan*. Ereb Şemo, *ibid.*, 58, has described these entertainments with many picturesque and lively details. Stig Wikander believed that he had discovered in this last festival reminiscences of ancient myths (*Ein Fest bei der Kurden und im Avesta*, in *Orientalia Suecana*, ix [1960], Uppsala 1961, 7-10. The peasants also have their traditions. At the time of the harvest, the first sheaf reaped is offered to the stranger who passes by (Hamilton, *op. cit.*, 51), and the gathering of the mulberries is the occasion of a festival with a special dance, *gzîdan*, the sweeping, which consists of sweeping the soil under the trees before the children climb them to shake them so as to allow the women to gather the berries (Edmonds, 170, n. 1).

Although it does not really concern us here as a festival properly so-called, let us indicate some more or less superstitious practices which relate to the cycle of nature and whose origins stretch back without doubt into remote antiquity. If activities to make the rain stop are mentioned only rarely (cf. Nikitine, *Une apologie kurde*, 16), by contrast T. Wahby, *op. cit.*, 7-9, counts no less than nine different rites, more or less laughable and doubtless efficacious, to combat drought and obtain rain. If the prayer *noja berana* does not suffice, a dervish is to be thrown into a water tank or women are to harness themselves to a plough and till the river. Still other singular acts are to be performed in order to have one's prayers finally answered (cf. S. Reinach, *Charme pour obtenir la pluie (en Kurdistan)*, in *L'Anthropologie*, xvii [1906], 633).

4. *Dances and music.*

The Kurd sings always and everywhere. All the family festivals, birth, circumcision, and especially marriage, are accompanied by dances and songs, and equally the tribal or peasant gatherings and some religious ceremonies. The name of the dances varies according to whether it designates the region or the tribe where it is danced, e.g. Botanî, Serhedî, Şêxanî, or according to the different figures which distinguish them, *sêgavî*, *giranî*, *royne*, or the rounds *govend* and *çopî*. The students have a special dance *bêlîte* or *bêlûte*, of which Tawûsparêz has given us some examples and has described the rhythm (*La vie universitaire au Kurdistan*, in *Hawar*, No. 53 [15 March 1943], 772-6). The old or more recent travellers admired the particularities of these Kurdish dances (e.g. F. Millingen, *Wild life*, 378-9, or Edmonds, *Kurds*, 84; Drower, *Peacock angel*, 130-4; Bois, *Connaissance*, 61-2, cites the name of twenty dances). Let us note that these folkloric dances are mixed, which distinguished the Kurds from the other neighbouring Muslim peoples.

Kurdish music, inseparable from the dances and songs, is part of what it is convenient to call oriental music, but it cannot be confused either with Arabic music or with Armenian or Turkish music at all, although it has had an influence at times on the songs of the neighbouring countries, such as Iran or Mesopotamia (cf. S. Jargy, *Chant populaire et musique savante au Proche Orient arabe*, in *Orient*, vi/2 [1958], 108-9). Kurdish music today is not learned, but popular, and knows neither harmony nor polyphony. Its melodies, as numerous as varied, preserve a serious, pathetic, quite often melancholy character, as a consequence quite astounding among this warlike people (cf. Dulaurier, *Chants opulaires de l'Arménie*, in *Rev. des deux Mondes*, 10 April 1852, 224-55). Western travellers have not failed to draw attention to the originality of this music. Some have felt the attraction and very palpable charm of these chants; others, on the contrary, e.g. Mrs. Hansen, 129-9, have found this music "flat and false" with its 17 tones. It was an Armenian priest, Vartabed Comitas (1869-

1935) who was the first to gather and note down some popular Kurdish songs (*Quelques spécimens des mélodies kurdes*, in *Recueil d'Emine*, Moscow 1904, and re-edited in Erivan in 1959). In Erivan precisely, the Malikian School of Music is formed of young Kurds who study the traditional songs with the old *dengbêj* or troubadours. Thus Nura Cewarî noted 33 *Chansons de danse kurdes*, 1960, gathered at Tiflis. For her part, Cemîla Celîl has published two annotated collections of *Chants populaires kurdes*. The first, at Erivan (1964), gives the Kurdish text and the musical annotation of 75 pieces; the second, at Moscow in 1965, apart from the Kurdish text, gives the musical notation and Russian translation of 100 varied songs. In ʿIrāḳ, since 1958, a society of Kurdish music has been organised with a view to preserving, standardising and developing in Kurdish music (cf. B. A. Ali, *An approach to Kurdish music*, in *Kurdistan*, K.S.S.E., 1 March 1958), 3-6; S. S. Gavan, *Divided nation*, London 1958, 15). But Europeans too are interested in Kurdish music (cf. Dr. D. Christensen, *Tanzlieder der Hakkari-Kurden. Eine materialkritisch Studie*, in *Jahrbuch für musikalische Volks- und Völker-Künde*, Berlin i [1963], 11-47). This is a very serious study of the dance, instrumental and vocal music of Hakkâri, whose melodies the author analyses and whose style and rhythms he studies scientifically. See also Edith Gerson-Kiwi, *The Music of Kurdistan Jews. A synopsis of their musical styles*, in *Yuval, Studies of the Jewish Music Research Centre*, ii, Jerusalem 1971.

The Islamic religion does not authorise music at all in its liturgy, and music has taken refuge in the rites of the different *ṭarīḳa*s where its use probably dates from the foundation of these groups (cf. Trimingham, *op. cit.*, 195, 196 and *passim*; M. Mokri, *Le Soufisme et la musique*, in *Encycl. de la Musique*, Paris 1961, 1014-15). From there, music has passed without any problems into the aberrant sects of the Yazīdīs, into their processions and their gatherings for *samāʿ* or religious recital. Three religious songs of the Yazīdīs had already been noted by H. Layard, *Niniveh and Babylon*, 1853, 507, Nos. 667-9. Similarly, E. S. Drower (*op. cit.*, 118-19), recorded the rhythm of the drums in the course of a ceremony. As for the Ahl-i Ḥaḳḳ, Mohammed Mokri enlightens us on their musical customs in his article on *La musique sacrée des Kurdes "Fidèles de Vérité" en Iran*, in *Encycl. des musiques sacrées*, Paris 1968, 444-55.

Musical instruments among the Kurds are often manufactured by artisans. The most usual are, among wind instruments, the pipe, *bilûr*, which every shepherd carries in his bag, the *zorna*, a kind of clarinet or oboe which has a place in all the dances, and the *duzale*, a flute with two pipes of reed or bird bone, pierced with holes and whose mouthpiece has a kind of vibratory tongue. The sound resembles that of the Scottish bagpipes. The percussion instruments include the *dahol* or bass drum which is beaten on both sides, the *tepil*, a narrow drum, a kind of kettledrum in pottery covered with a skin which is beaten with the fingers; and the cymbals, *zelîle*, are sometimes used by the Yazīdīs in their religious ceremonies. Among the stringed instruments, there are the *ribāb* or monochord viol, the *keman* or *kemanca*, violin, and especially the *tenbûr*, the lute, whose player plucks the strings in the sacred and heroic songs. The nomenclature of all these instruments varies with the regions. A description of some clumsy impressions of musical instruments is found in *Serincîk le derwaze-i folklor-i kurdiwe*, Notes for an introduction to Kurdish folklore, Hewlêl/Erbil n.d., 36-7.

5. *Games, sports and hunting.*

On the occasion of seasonal or other festivals, travellers have remarked among the Kurds the practice of certain popular games or sports, always in use. It is not possible to recount them all. Among the indoor games, cards, *iskenbil*, can be cited among the most frequent, especially among the townspeople; backgammon, *nard*; and above all chess, *şetrenc*, the noble game par excellence. Among the outdoor games are the *cerîd* or horseback fantasia; the ball game *çowgan*; a kind of hockey; and many games of pursuit or throwing, not to mention some modern sports like football and basketball and some games reserved for children. Worth noting are the fights of rams, buffaloes or partridges. Much information is to be found in Tawûsparêz, *Les jeux kurdes*, in *Hawar*, 42 (15 April 1942), 654-6; Kurdî we Mêrîwanî, *Kitâb-i Yarî*, Baghdād 1932, 32; M. Mokri, *Bazîhâ-ye Kordî*: *Khurmâyla*, in *Yaghmā*, 2nd year, Tehran 1331/1951; *Bazîha-ye Kordestân*, in *Tamaddon*, 2nd ser. 7, 317-20, Tehran 1332/1952. In his *Kurdish dialect studies*, i, Oxford 1961, 147, 218, D. N. MacKenzie gives the name of several Kurdish games; Bois, *La vie sociale*, 32-3/628-9 and notes 136-41.

The abundance of game in Kurdistān, furred and feathered, already mentioned above, is at the origin of the Kurd's passion for hunting. The best way of learning about this national sport is to read the two articles of Osman Sabrî, who explains in them the methods employed with the art of an experienced hunter. *Nêçîr* ("Hunting") in *Ronahî*, 17 (1 August 1943, 317-23, 18 (1 Sept. 1943), 347-50. The bear is hunted in three ways (317), also the hyena (317), the ibex (318), the fox (319) and the hare (319). There are five ways of hunting the partridge, with the spear, the decoy, the rifle or the running noose, depending on whether one wishes to capture it alive or to kill it (320). Game can also be hunted with the help of birds, sparrow-hawks or falcons of three different kinds and at a more or less expensive cost (321-2). The way in which these birds are trained is also indicated (347-8). O. Sabrî very much appreciates hunting the hare with the help of a hound, of which there are several kinds (348-9). The author does not forget fishing (319), which may be done with the net, hook or harpoon. Hamilton devotes a whole chapter to the hunting of the ibex, so picturesque and so difficult (*op. cit.*, 165-73). There are also to be found patterns of different bird-calls or whistles, traps, nets, running nooses or snares used for certain forms of hunting, in *Serincîk*, *op. cit.*, 99-102.

(Th. Bois)

V. — Language

The many forms of speech known to outsiders as Kurdish do not constitute a single, unified language. Instead it can be said that the various Kurdish dialects, which are clearly interrelated and at the same time distinguishable from neighbouring but more distantly related Western Iranian languages, fall into three main groups. The differences between dialects are generally proportional to their distance apart and beyond a certain distance certainly make them mutually unintelligible. The Northern group of dialects comprises all those spoken in the Turkish republic, the Armenian and Azerbaidjan S.S.Rs, the Mawṣil *liwā'* of ʿIrāḳ (Bahdīnān [*q.v.*]), and some areas bordering on these, together with those of Kurdish colonies in Khurāsān and the Turkmen S.S.R. All these dialects are known as *Kurmāndjī* (*Kirmāndjī*), as the speakers all call themselves Kurmāndj. Within the group a sub-division into Eastern and Western Kurmāndjī can be made, from each of which a literary language has emerged. The Central group is made up of the dialects spoken in the Arbīl, Sulaymāniyya and Kirkūk *liwā*'s of ʿIrāḳ and the neighbouring districts of Persian Kurdistān, Mahābād (Sāwdj Bulāḳ) and Sanadadj (Sinna), These dialects are generally called *Kurdī*, but are also now known collectively as *Sōrānī*, from the name of the former principality of Sōrān. The dialects of Sulaymāniyya and Sanandadj, especially, have gained pre-eminence as literary languages. The remaining Kurdish dialects, a heterogeneous group spoken in the areas south and east of Sōrānī, of which Kirmānshāhī is probably the most important, may be classed together as a Southern group. Some of these dialects, e.g. Lakkī, appear to merge with the neighbouring non-Kurdish dialects of Lurī. Between the Central and Southern groups of Kurdish an island of non-Kurdish speech, with mixed dialects on its shores, is formed by the area occupied by the Gūrān [*q.v.*]. Other Kurdish dialects are spoken by isolated colonies of Kurds scattered throughout Iran.

Northern Kurdish is more archaic than the other dialects in both its phonetic and morphological structure, and it may be inferred that the greater development of the Central and Southern dialects has been caused by their closer contact with other (Iranian) languages, or, indeed, their absorption of such a substrate. On the other hand, Northern Kurdish appears to have been somewhat more open to the penetration of Arabic and especially Turkish loanwords. Traditionally Kurdish has been written in various modifications of the Arabic script and still is so written in ʿIrāḳ and Iran. The Armenian script has also been used on occasion, and in recent years alphabets based on both the Latin and Cyrillic scripts have been devised, especially for Northern Kurdish.

The common "Iranian" phonemic inventory of Northern Kurdish is: *aiu*, *āēīōū*, *ptčk*, *bdj* (dj)*g*, *fsš* (sh)*x* (kh), *vzž* (zh)*γ* (gh), *mn lr* (flapped) *ř* (rolled), *hwy*, to which most dialects add the "Arabic" phonemes *q* (*ḳ*), *ḥ*, ʿ, and emphatic *ṭ*, *ṣ*, *ẓ*. In the north-east, probably under Caucasian (Armenian) influence, a further distinction between aspirated phonemes *p*ʿ, *t*ʿ, (*č*ʿ), *k*ʿ and unaspirated *p*, *t*, (*č*), *k* is found. In a large part of the Kurmāndjī area *ō*, *ū* are replaced by *ü*, *ǖ* respectively. In Central and Southern Kurdish the distinction between *v* and *w* is lost, in favour of *w*. A new distinction is made, however, between palatal *l* and velarised *ł* (though this coincides with *r* in Arbīl), and *ŋ* has acquired phonemic status in Sulaymāniyya and other more southerly dialects. In general, Kurdish is marked by a greater degree of phonetic development than Persian, notably of postvocalic stops to fricatives, e.g. *āv/w* "water", P(ersian) *āb*; *šav/w* "night", P *šab*. Many post-vocalic consonants, especially dentals, have been lost, e.g. *birā* "brother", P *birādar*; *dān*, *dāīn* "to give", P *dādan*; *sipī* "white", P *safīd*; *sa* "dog", P *sag*; *čiyā* "mountain", P *čakād*. The development of the ending of the past participles of verbs is noteworthy, e.g. North. *mirī*, Cent. *mirdū*, South. *mirdig* "dead", cf. Cent. *zīndū*, *zīŋū*, South. *zīnig* "alive", P. *zinda*.

There is no single early historical sound change which characterises Kurdish, but a combination of two later changes and one conservative feature serves to identify a dialect as Kurdish, viz. (i) *-m-*, *-šm-*, *-xm-* > *-v-* (*-w-*), e.g. *nāv/w* "name", P *nām*; *čāv/w* "eye", P *čašm*; *tov/w* "seed", P *tuxm*; (ii) Iranian initial *x-* > *k-*, e.g. *kar* "donkey", P *xar*; *kānī* "spring, source", P *xānī*; *kiřīn* "to buy", P *xarīdan*; (iii) Ir *čy-* > *č-* (other West. Ir. > *s-*), e.g. *čūn* "to go", P *šudan*. Kurdish shares many phonetic developments with non-Persian dialects, e.g. *z:d*, *zān-* "know": P *dān-*; *s:h*, *āsik* "deer": P *āhū*; *ž:z*, *žin* "woman": P *zan*; *řož* "day": P *rūz*, but others with Persian, *e.g.*, *y-* > *j-*, *jo*, P *jaw* "barley"; *hw-* > *xw-*, *xwa*, *xo*, P *xwad*, *xud* "self"; *-rd-* > *-l-* (*-ł-*), *pālew-*, P *pālāy-* "to filter". Taken in conjunction with a number of characteristic lexical items, these isoglosses show proto-Kurdish to have been a close, if not the closest, neighbour of Persian. There is no sound evidence to suggest a Median origin for Kurdish, though it has been suggested that the name Kur-

mānd̲j̲ may combine Kurd with a form from *Māda* "Median".

Old morphological features preserved in North. Kurd. are a distinction of case (nominative and oblique) and gender (masculine and feminine) in nouns and pronouns and the "agential" construction of the past tenses of transitive verbs, e.g. *az hātim* "I came", but *min xawnak dīt* "I saw a dream (lit., of me ... seen)". Both case and gender have been lost in South. Kurd. and in the literary forms of Central Kurdish. In these dialects the pronominal suffixes, absent from North. Kurd., have largely taken over the functions of the cases, cf. *min hātim* "I came", *xawēk-im dī* "I saw a dream". In some Central dialects, at least, the agential construction has developed in a remarkable way, with the verbal stem sometimes taking two personal endings, one representing a person only indirectly affected, e.g. *xaw-im pēwa dīw-īt* "I have seen a dream about thee (-*īt*, lit. "art")", and even the agential suffix as well, *dā-m-ī-n-ē* "he (-*ī*)" gave me (-*m*, lit. "am") to (-*ē*) you (-*n*, lit. "are"). Note the 3rd person pronominal -*ī*, plural -*yān*, in contrast to Persian -*š*. All dialects have an indefinite suffix, North. -*ak*, Cent., South -*ēk*, but only Central and Southern share (with Gūrānī) the definite suffix -*akā*. In all dialects the *iḍāfa* [*q.v.*, ii], appearing in various forms, plays a considerable rôle both as relative pronoun and simple connective particle, e.g. North. *xawnak-a xwaš*, Cent. *xawēk-ī xōš* "a pleasant dream", North. *xawn-ā min dīt*, Cent. *xawaka-y dī-m* "the dream which I saw". In the north-east, the *iḍāfa* construction of both Northern and Central dialects has been contaminated, especially in the plural, by a particle *da*, -*d*, -*t*, probably of Aramaic origin, e.g. Cent. (Mukrī) *pyāw-ī da pāšā* "the king's men", North. *kuř-et xwa* (= *kuřē di xwa*) "his sons". (This is not, however, a "*t*-plural" comparable with those of Eastern Iranian, Ossetic, Sogdian, etc.). Central and Southern Kurdish, unlike Northern dialects, have developed a secondary passive conjugation of the verb, formed from the active present stem, e.g. *kuštin, kuž-* "to kill", Cent. *kužrān, kužre-*, South. *kužyān, kužye-* "be killed".

Bibliography: A comprehensive list of all studies and monographs on Kurdish to 1926 is given in Minorsky's (otherwise outdated) article on "Kurdish Language", in *EI*[1], ii, 1153 f. This is supplemented by a select bibliography in D. N. MacKenzie, *Kurdish dialect studies I*, London 1961. Fuller, but uncritical, lists of relevant publications appear in Ž. S. Musaélyan, *Bibliografiy̲a̲ po Kurdovedeniy̲a̲*, Moscow 1963, and S. van Rooy and K. Tamboer, *ISK's Kurdish bibliography*, Amsterdam 1968 ff. The following are most readily available: (1) *History*. D. N. MacKenzie, *The origins of Kurdish*, in *TPhS* (1961), 68-86. (2) *Grammars, dialect studies*. D. N. MacKenzie, *Kurdish dialect studies*. i; K. Kurdoev, *Grammatika kurdskogo yazïka* (*Kurmandži*), Moscow-Leningrad 1957; Dj. Bedir Khan and R. Lescot, *Grammaire kurde* (*dialecte kurmandji*), Paris 1970; Č. K̲h̲. Bakaev, *Govor Kurdov Turkmenii*, Moscow 1962; idem, *Yazïk Azerbaydžanskik̲h̲ Kurdov*, Moscow 1965. (3) *Dictionaries*. A. Jaba and F. Justi, *Dictionnaire kurde-français*, St. Petersburg 1879; Č. K̲h̲. Bakaev, *Kurdsko-Russkiy slovar'*, Moscow 1957; T. Wahby and C. J. Edmonds, *A Kurdish-English dictionary*, Oxford 1966.

(D. N. MacKenzie)

vi. — Folklore and Literature

A. Popular and folk literature.

As among all peoples whose scholarly instruction is little developed, the oral literature of the Kurds is superabundant and very rich; Prof. O. Vilčevsky was able to speak of the "hypertrophy" of their folklore. A mass of documents has also been collected and published by foreign orientalists: A. Jaba, *Recueil et notices et récits kurdes*, St. Petersburg 1860; E. Prym and A. Socin, *Kurdische Sammlungen*, St. Petersburg 1890; O. Mann, *Kurdische u. Persische Forschungen. iv. Die Mundart der Mukri*, Berlin, i, 1906, ii, 1909; H. Makas, *Kurdische Texte* (Mardin), Leningrad 1926; B. Nikitine, *Kurdish stories from my collection*, in *BSOS*, iv (1926), 121-38; idem, *Quelques fables kurdes d'animaux*, in *Folklore*, xl, (1929), 228-44; E. Lescot, *Textes kurdes*, i, Paris 1940, ii, Beirut 1942; Th. Bois, *L'âme des Kurdes à la lumière de leur folklore*, in *Cahiers de l'Est*, Beirut, Nos. 5 and 6 (1946); S. Wikander, *Recueil de textes kurmandji*, Uppsala-Wiesbaden 1959; D. N. MacKenzie, *Kurdish dialect studies*, London 1961-2. Kurds themselves, since the end of the First World War, have gone about collecting their treasures of folklore from the old folk or the decreasingly numerous professional storytellers and singers. Firstly, the Bedir K̲h̲ān *amīrs* from 1932 to 1946 in their reviews *Hawar*, *Ronahî*, and *Roja nû*; H. Cindî and E. Evdal, *Folklora kurmança*, Erivan 1936; Cindî, *Folklora körmanciê*, Erivan 1957; and there is a comprehensive survey in I. M. Resul, *Edeb-i folklor-i kurdî*. Lêkolînewe, Bag̲h̲dād 1970 (cf. Th. Bois, *Connaissance*, 117-25).

This folkloric richness is found, firstly, in the proverbs, popular sayings, enigmas or riddles. The Kurd likes to embroider his conversation with rhymed and rhythmic sentences which denote a real sense of observation. Proverbs also supply a racy summary of practical wisdom. Thousands of them have been published: E. Noel, *The character of the Kurds as illustrated by their proverbs and popular sayings*, in *BSOS*, iv (1921), 79-80; D. P. Margueritte and Emir K. Bedir K̲h̲an, *Proverbes kurdes*, Paris 1938; Lescot, *Proverbes et énigmes kurdes*, in *REI*, iv (1937), 307-50, reprinted and added to in *Textes kurdes*, i, 189-237; Prampolini, *Proverbi kurdi*, Milan 1963; MacKenzie, *Some Kurdish proverbs*, in *Iran*, *JBIPS*, viii (1970), 105-13; Ismail Heqî Şaweys, *Oise-i pêşînan*, Bag̲h̲dād 1933; Marûf Çiyawok, *Hezar bêj û pend*, Bag̲h̲dād 1930; Cegerxwîn, *Gotina pêşîna*, Damascus 1957; M. Xal, *Pend-i pêşînan*, Bag̲h̲dād 1957; D̲j̲amīl Kenna, *Amt̲h̲āl kurdiyya*, Aleppo 1957; O. Celîl, *Mesela û met'elokê cima'ta k'ördа*, Erivan 1969-71, 2 vols.; O. Celîl and C. Celîl, *Kurdskie poslovici i pogovorki*, Moscow 1972; J. Nebez, *Sprichwörter und Redensarten aus Kurdistan*, Munich 1970. There are numerous proverbs and sayings cited in Cindî, *Folklor*, 1957, 249-81, and in the grammars of Jardine and Beidar, as well as in the dictionary of Mardukh, ii, 1-86.

The songs are infinite in number and variety: dance songs, *dîlok*, songs of love, *lawik*, or war, *şer* or *delal*; songs which accompany the transhumance in the spring, *serêle*, or in the autumn, *pahîzok*; lullabies, *lorî*; epithalamia, *hevalê* or *serêzavano*; also songs of mourning, *şîn* or *qewil*, punctuate the daily life of the Kurds from the cradle to the grave and throughout their days of hard labour. The reviews *Hawar*, *Ronahî* and *Roja nû* have published hundreds of them, as have Cindî and Evdal, *Folklor*, 342-474; Cindî, *Folklora kölrmanciê*, 189-248; see also Rondot, *Trois*

chansons kurdes, in *Cahiers du Sud*, No. 274 (1945), 817-24; Nikitine, *La poésie lyrique kurde*, in *Ethnographie*, xlv (1945-50), 39-53; Mokri, *Gūrānī yā taranahā-yi kurdī*, Tehran 1951; G. Chaliand, *Poésie populaire des Turcs et des Kurdes*, Paris 1961; Cindî, *K'lamêd cmae'ta K'ördaye lîrîkîe*, Erivan 1972. Furthermore, see the collections with musical notation mentioned earlier.

Stories and anecdotes (*çîrok*) abound and are full of imagination. The stories of marvels allow one to forget the worries of life; the anecdotes are replete with humour; the satirical stories do not hesitate to criticise the faults of individuals, rival tribes, religious leaders, in the spirit of the fables of the Middle Ages. Above all, the Kurds are fond of animal stories which always contain a spiritual moral. M. Duiresne, in *Un conte kurde de la région de Sö'ört*, in *JA* (1910), 107-17; Nikitine and Soane, *The tale of Suto and Tato*, in *BSOS*, iii (1923), 69-106; Nikitine, *Kurdish stories*, in *ibid.* (1926), 121-38; Lescot, *Textes*, i, 2-185; Cindî and Evdal, *Folklor*, 1936, 579-651; Cindî, *Folklor*, 1957, 161-88; M. Khaznadar, *Aleman kurdi and other Kurdish short stories*, Baghdād 1969; A. Brunel, *Gulasar, contes et légendes du Kurdistan*, Paris 1946; Joyce Blau, *Trois textes de folklore kurde*, in *Études*, Brussels, vii (1965), 29-50; J. Nebez, *Kurdische Märchen und Volkerzählungen*, NUKSE, 1972.

Alongside these minor genres, the numerous much longer legends constitute choice morsels of Kurdish folklore. They can be classified in different categories which, however, are often combined. Some legends basically concern the supernatural, such as *Mamê Alan* (Lescot, *Textes*, ii, 2-369) or Sêvahacê or Hozbek; others are a purely idyllic form, such as *Zelixa û Fatûl, Layla û Mejnûn, Siyabend û Xacê, Zambilfiroş*, "the basket-seller", *Xurşid û Xawer, Şîrîn û Xoşnew, Şîrîn û Ferhad, Faxîr û Sitiye, Manica û Bîjan*; finally, the epics with an historical plot, such as *Dimdim, Julindî*, the adventures of Rustem with Zoraw, Cihangir or Zendeheng and more recently the exploits of Nadir and Topal, the Twelve Cavaliers of Meriwan, Abdul Rehman Baban or Ezdînşêr Bedir-Xan. These accounts were the glory of the *dengbêj* or professional troubadours, whose class is on the point of disappearing. All these texts can be read in the collection of Mann, Socin, Cindî etc., and also Bois, *Poètes et troubadours au pays des Soviets*, in *al-Machriq*, liii (1959), 266-99; various authors, *Kurdskie èpičeskie pesni skazi*, texts and trs. Moscow 1962; V. Minorsky, *The Gūrān*, in *BSOS*, xi (1943), 75-103; O. Dž. Džalilov, *Kurdskiy geroičeskiy èpos "Zlatorukiykhan..*, Moscow 1967; O. F. Qazi, *Mehr-o-Vafa*, Tabrīz 1966; A. Ayyubian, *Çirike kurde*, Tabrīz 1961; idem, *Çirike Xec û Siyamend*, Tabrīz 1956; Piremerd, *Diwanzde siwarê Meriwan*, Sulaymānī 1935; Gew Mukriani, *Zembîlfiroş*, Hewlêr 1967; Mokri, *La légende de Bîzan-û Manîja*, Paris 1966; idem, *Le chasseur de Dieu et le mythe du Roi-Aigle*, Wiesbaden 1967; K. A. Bedir-Khan and A. de Falgairolle, *Le Roi du Kurdistan. Roman épique kurde*, Gap, n.d.; K. A. Bedir-Khan and Herbert Oertel, *Der Adler von Kurdistan*, Potsdam 1937; Cegerxwîn, *Serpêhatiya Resiwê Darî*, Damascus 1956; J. Blau, *Le kurde de ʿAmādiya et du Djabal Sindjār*, thèse de doctorat du 3ᵉ cycle, Paris 1973.

B. Written and learned literature.

Alongside the mass of illiterate people, there has always been among the Kurds a highly cultivated intellectual élite. The fact was already mentioned by the Kurd Ibn al-Athīr (d. 630/1233) in his *Kāmil* (ix, 7-8) and taken up many times in the *Sharaf-nāma* and also by other witnesses, such as Ḥādjdjī Khalīfa (1658) (cf. Adnan Adıvar, *La science chez les Turcs ottomans*, Paris 1939, 92, 106), or the traveller Ewliyā Čelebi in his travel account (1682), who was justly ecstatic when confronted with the so well-stocked library of Abdāl Khān, the lord of Bitlis, cf. A. Sakisian, *Abdal Khan, seigneur kurde de Bitlis au XVIIᵉ siècle et ses trésors*, in *JA*, ccxxix (1957), 253-76. Unfortunately, these men of letters preferred to write their scientific works either in Arabic, the language of the Ḳurʾān, if the works were concerned to deal with law, theology or history, as did Ibn Khallikān (d. 681/1282), author of biographical notices of famous men, or Abu 'l-Fidā (672-732/1273-1331), historian and geographer; or else in Persian, as did Sharīf Khān Bidlīsī [*q.v.*] himself in his *History of the Kurds* or *Sharaf-nāma* (1005/1596-7), as also Idrīs Ḥakīm of Bitlis (d. 926/1520), who wrote the first history of the Ottoman Empire, *Hasht bihisht*, "The eight paradises" [see BIDLĪSĪ, IDRĪS]. The great poet in the Turkish language Fuḍūlī (d. 963/1556) [*q.v.*] was a Kurd, as was the modern sociologist Ḍiyāʾ Gök Alp (cf. J. Deny, in *RMM*, lxi [1925], 3). Even today, many poets in the Arabic language—al-Zahāwī (1863-1936), Aḥmad Shawḳī, the prince of poets (1868-1932), al-Ruṣāfī (1875-1945), the sociologist Ḳāsim Amīn (1865-1908), the novelists al-ʿAḳḳād (1889-1964), Muḥammad Taymūr (1892-1921) and his brother Maḥmūd (born in 1894)—are all of Kurdish origin. The following historians who write in Persian, such as Muḥammad Mardūkh Kurdistānī, Rashīd Yāsimī and Iḥsān Nūrī, or those who write in Turkish, such as M. N. Dersimli and A. Yamulki, are all Kurds. If the old writers knew and composed in all the great Islamic languages, Arabic, Persian and Turkish, rather than their mother tongue Kurdish, the young authors of today use the European languages, English, French, German and even Russian, especially in Armenia, where they further add Armenian. Indeed, the Kurds have been at all times polyglots as they have been polygraphs, the same authors exercising their talents as much in poetry as in history, in the physical and human sciences and in journalism.

In 1860, A. Jaba, in his *Recueil de notices et de récits kourdes*, 3-11, gave a brief notice on eight poets, who used the Kurmanci dialect, and almost all originating from Hakâri. Less than a century later, ʿAlāʾ al-Dīn Sidjādī published in Baghdād a *History of Kurdish literature* (1952), a large volume of 634 pages in which, after an introduction on Kurdistān and the Kurds (3-66), he recounted the stages and forms of Kurdish literature (69-146), then gave substantial notices on twenty-four poets (147-534), followed by a rather dry list of 212 other authors (535-58). Even so, he confines himself to the no longer living poets of ʿIrāḳ and Iran. Since then, there have been two more recent works of Maʿrūf Xiznedār, *Essay on the history of contemporary Kurdish literature* [in Russian, 1967, 232 pp.] and of ʿIzz al-Dīn Muṣṭafā Rasūl, *Realism in Kurdish literature* [in Arabic, 1968, 236 pp.], not to mention other studies which show the progress of Kurdology since Jaba's time and felicitously complete our information on this oriental literature still so little known in the West.

1. *Origins and the classical period.*

Jaba's informant gave the 15th century as the period in which the first poets flourished: Elî Herîrî (1425-95), Şêx Ehmed Nîşanî, better-known under the name of Melayê Cizrî (1407-81) and Mela Ehmed of Batê (1414-95), who were therefore contemporaries. Mîr Mihemed of Mükis, surnamed Feqiyê Teyran, was

supposed to be even earlier than them (1307-75). All these dates are to be corrected and placed later. In fact, D. N. MacKenzie in his article *Melâ-ê Jizrî and Faqî Ṭayrân*, in *Yād-nāma-yi Īrānī-yi Minorsky*, Tehran 1969, showed pertinently, thanks to the method of the *abdjad*, that Melayê Cizrî lived between 1570 and 1640 and his disciple, Feqiyê Teyran, between 1590 and 1660. The most famous is Melayê Cizrî, later than Ḥāfiẓ (d. 791/1389 or 792/1390) and Djāmī (817-98/1414-92), whose *Dīwān* of more than 2,000 verses has remained very popular among the *shaykhs* and mollahs, much more than among the masses. It has always been read and commented on in the Ḳur'ān schools of Kurdistān, but its text is difficult. His ideas are those of Persian Ṣūfism. His *Dīwān* was published by M. Hartmann, *Das kurdische Diwan des Schêch Ahmed*, Berlin 1904, in photocopy; by Mohammed Şefîq Anwasî Heseniye, Istanbul 1340/1922; Qedrî Cemîl Paşa, *Diwana Melê*, in Latin characters, in *Hawar*, Nos. 35-57 (1941-3), incomplete text; and above all, the fine edition of Shaykh Aḥmad b. al-Mella Muḥammad al-Buhtī al-Zivingī, *al-ʿAḳd al-djawharī fī sharḥ Dīwān al-Shaykh al-Djizrī*, 2 vols., 943 pp., Kamishlī, 1377/1958. Under the vocalised Kurdish text, at a lower level, are given, every two verses, an Arabic word-for-word translation, a more elegant total translation and finally a mystical commentary. Melayê Batê is especially known for his *Mewlûd*, published by von Le Coq, *Kurdische Texte*, Berlin 1903. Feqiyê Teyran, who composed an elegy on the death of his master Cizrî, is the author of numerous works, in particular of the *History of Shaykh San'an*, published and translated into Russian by M. B. Rudenko, Moscow 1965, and in Persian by Q. F. Qazi, Tabrīz 1967.

The succeeding generation of poets cited by Jaba is dominated by Ehmedê Xanî (1650-1706), who settled at Bayazid. He is the author of the famous Kurdish national epic, *Memozîn*. In this work, which has been frequently re-published, the poet adapted the popular epic *Mamê Alan*, publ. by R. Lescot, Beirut 1942, and by N. Zaza, Damascus 1957, which he recomposed according to classical literary rules, and also Islamising it more. This poem of 2,655 couplets is the real breviary of Kurdish nationalism. If the text of the popular epic *Mamê Alan* has multiple variants which have been translated into German, French, Russian, Romanian, English, Armenian and Arabic, the classical poem *Memozîn* has also had numerous editions: Istanbul 1338/1920, Aleppo 1947, Hewlêr (Erbil) 1954; translated into Mukri by Hejar, Baghdād 1960; with Russian translation by M. B. Rudenko, Moscow 1962; with Turkish translation by M. E. Bozarslan, Istanbul 1968. Many authors often confuse these two epics. Apart from numerous pieces of verse written in Turkish, Arabic and Persian, Ehmedê Xanî is also the author of a rhymed Arabo-Kurdish vocabulary *Nûbuhar* "First fruits" edited by Yūsuf Ḍiyā' al-Dīn, *al-Hadiyya al-Ḥamīdiyya fi 'l-lugha al-Kurdiyya*, Istanbul 1310/1892, 279-97. and also in facsimile by von Le Coq, *Kurdische Texte*, i, 1-47. His disciple and successor in his school of Bayazid, Ismaîlê Bayazidî (1654-1709), also left behind many Kurdish poems and a Kurmanci-Arabic-Persian glossary, *Gulzar* "The rose garden".

In the 18th century, mention should be made of Şerif Xan (1682-1748), of Culamerg, of the family of the *amîrs* of Hakâri, author of numerous verses in Kurmanci and Persian, and Mûrad Xan of Bayazid (1736-78), author of numerous lyrical poems.

In the same period, but at the court of the *wālīs* of Ardalān or the sultans of Hewraman, appeared a whole pleiade of poets whose lyrical or religious works are in the Gūrānī dialect. One may cite Ehmedê Textî (*ca.* 1640) and Şêx Mistefa Besaranî (1641-1702), whom Minorsky believes to be more recent (d. 1760). In this case, he would be contemporary with a whole group of poets, with Xânay Qubâdî (1700-59), author of a *Ṣalawāt-nāma*, and with Mahzûnî (*ca.* 1783).

It is impossible to cite all the poets who lived in the 19th century and whose works have been printed between the two World Wars. Their names and the list of their works will be found cited in the literature of Xiznedar (218-20) and Resûl (228-32). On the poets in Gūrānī, cf. Minorsky's article, *The Gūrān*. Some have been studied at greater length by Sidjādī in his *History of Kurdish literature*, e.g. (247-76), Mewlewî (1806-82). It will be noted that the dates advanced by the different authors do not always coincide, and the taste of the Kurdish poets for choosing a *takhalluṣ* or pseudonym will also be remarked.

Among the poets of the 19th century whose formation was purely religious, one may mention above all Nalî (1797-1855), who travelled extensively, wrote verses in Kurdish, Persian and Arabic, and whose Kurdish *Dīwān* was published in Baghdād in 1931 and in Erbil in 1962; Salim (1800-66), and Kurdî (1803-49) (ed. Hewlêr 1961), whose lyricism blossoms into patriotism; the Naḳshbandī Mehwî (1830-1909) explains Ṣūfī theories (ed. Sulaymānī 1922), likewise, too, Mirza Rehîm Wefa'î (1836-92) ed. Hewlêr, 1951-61, 2 vols.). The greatest poets of the end of the century are Hacî Qadir Koyî (1815-92), whose patriotic poems still arouse enthusiasm in many young people (ed. Hewler 1953, Baghdād 1960); Şêx Riza Talebanî (1842-1910), agnostic and satirist, very popular still today and who composed verses in Kurdish, Persian and Turkish (ed. Baghdād 1935, 1946; cf. C. J. Edmonds, *A Kurdish lampoonist: Shaikh Riza Talebani*, in *JRCAS*, xxii [Jan. 1935]); Salih Heriq (1851-1907), writing in traditional forms and on Ṣūfī themes (ed. Baghdād 1938); Edeb, Evdelah Beg Misbah al-Diwan (1862-1917, *Dīwān* ed. H. H. Mukriani, Rawāndiz 1936, ed. Gêw Mukriani, Hewlêr 1960, and unpublished poems ed. M. Xiznedar, Baghdād 1970), a delicate and romantic poet.

Let us also mention some women who have played a role in literature: Mah Şeref Xanim of Ardelan (1800-47), Sira Xanim of Diyarbakir (1814-65) and Mihreban of Berwarî (1858-1905).

2. *The modern age.*

The end of the First World War gave Kurdish literature an impetus which still continues, thanks to the numerous newspapers and journals which have allowed young talents to publish their poems and express their national and social ideas (see section 3. below).

It is extremely difficult to make a choice among the poets of this revival which extends from 1920 to our own days.

In the intellectual radiance of Sulaymānī, the real capital in ʿIrāḳ of Kurdistān, let us cite before all Pîremêrd "The old man" (1863-1950), pseudonym of Hacî Tewfîq, an original spirit, indefatigable traveller, journalist, who devoted the last years of his life to making known to the young Kurds, who adored him, the beauties of their land, their language, their history and their literature. The tortured Bâkes, Faîq Abdallah (1905-48), did not cease to encourage the youth and to exhort them to work and study and to exalt in them love of their homeland and of goodness. Zîwer,

Abdallah Mihemed (1875-1948), is full of lyricism and sensibility in singing of nature and the national soil.

Gora, Abdallah Suleyman (1904-63), one of the greatest contemporary Kurdish poets, has abandoned stereotyped forms and classical metre, for he is the partisan and practitioner of free verse, as he has been of liberty of ideas and of life; a poet with advanced ideas, who is not lacking in lyricism to criticise social abuses. Qani', Mihemed Sêx Abdul Kerim (born in 1900), published from 1951 to 1955 numerous small books which each evoke an aspect of the Kurdistān which he celebrates with love. Let us further mention among the Kurdish poets of ʿIrāḳ, Ehmed Muxtar Caf (1897-1935; ed. Sulaymānī, 1960); Hamdī (1878-1936, ed. Baghdād, 1958) and the younger Abdul Wahīd Nùrī (1903-44), Dīldar (1918-48, *Diwan*, ed. Hewlêr 1962) and Dilzar, born in 1920, who edited in 1957 the *Quatrains* of Bābā Ṭāhir, the 5th/11th century writer, whom some Kurds claim as their own.

In Iran, at the time of the Republic of Mahābād, two young patriotic poets came to the front: M. Hêmin and especially ʿAbd al-Rahman Hejar (born in 1920), who was the official poet and who published thousands of verses to exalt love of the homeland and liberty, such as *Alekok* (Tabrīz 1945); in 1958, he published a collection of verse narratives and the comedy of the Dog and the Moon, *Beiti seremer û lasayî sag û mangesew*; he presented a summary of his autobiography (142-85) and several poems (185-222), in the *Kurdskiy dialekt Mukri* of K. R. Ayyubī and I. A. Smirnova, Leningrad 1968, and published a translation of the *Quatrains* of Khayyām (Beirut 1968).

In Kurmancî, one may note Kamiran A. Bedir Xan, writer of romantic free verse, and above all Cegerxwîn, Sêxmus Hesen (born in 1903), author of two collections; *Diwanê Cegerxwîn* (Damascus 1945) and *Sewra azadî* "The revolt of liberty" (Damascus 1954); an extremely vibrant and patriotic poet, preaching the instruction of youth and the union of all the Kurds, and going beyond pure nationalist élan to hope for radical social reforms; his many verses, varied in their workmanship, often preserve a classical form, but also he knows how to use more modern techniques. His rhymes are very rich. He is well-known and loved by the Kurds of Syria and Turkey (cf. Ordixanê Celîl, *Poèsia Cegerxwîn bajarvanié*, ["Civic poetry of Cegerxwin"], Erivan 1966).

But the great novelty is the vitality of Kurdish letters in Soviet Armenia, including Kurmancî. Those who were the pioneers in this field were mostly from the old Yazīdīs, illiterate by definition, immigrants from Turkey, who were to profit from their new social situation. Without the least Islamic culture and without any contact with the educated élite of the rest of the Kurdish world, their works are often ideologically oriented, but of a much more natural workmanship. They ignore classical prosody and their versification gains from simplicity. Lyricism is far from absent. They sing of love of the family and the beauties of nature, such as Casimê Celîl (born in 1908) and especially Mikailê Reşîd (born in 1925), who is rich in sensibility. Some of their strongly committed poems have social inspirations. Woman must be liberated, says Etarê Şero (born in 1906) in numerous quatrains. Usivê Beko (born in 1909) criticises feudal exploitation; Qaçaxê Murad (born in 1914), Wezîrê Nadiri (1911-47) and Emînê Evdal (1906-64) are pleased to recall the heroic times of the war of liberation. Let us further cite Haciyê Cindî (born in 1908) and Sement Siyabend (born in 1908), hero of the Soviet Union, who clothed in a new form the fine popular lyric epic *Siyabend û Xecê*, 1959. The teacher Karlênê Çaçanî, a younger man, has published in particular animal fables which are not lacking in freshness. The paper *Riya taze* of Erivan and various anthologies, not to mention numerous small booklets, make known these Kurdish poets of Soviet Armenia, all nourished by their rich folklore.

In fact, it is only since 1920 that prose has made its appearance in Kurdish letters. In order to enlarge the intellectual horizon and to enrich the vocabulary by allowing its progress and modernisation, the Kurdish men of letters have translated, at least in the shape of fragments, the works of foreign authors. In Syria and Lebanon they have translated from French; in ʿIrāḳ, from English and Arabic; in Iran, from Persian; in Soviet Armenia, from Russian and especially from Armenian. There have also been placed at the disposal of the potential Kurdish reader out of the plays of Shakespeare, *The tempest*, by Jamal Nebez (Baghdād 1957); of the stories of Voltaire, *Zadig*, by Mohammad Elī Kurdī (Baghdād 1954); of the pages of Victor Hugo, *Gavroche* and Daudet, *Les étoiles*, translated by Zaza, or of Anatole France. J. Nebez has also translated *The cloak* of Gogol (Baghdād 1958). But it is especially the Soviet Kurds who are the translators of Russian authors, Pushkin, Gorki, Tolstoy or Lermontov, not forgetting Lenin and Stalin, or Armenians, Abovian,Toumanian, Isahakian, etc. The principal names of the translators to be encountered are: C. Celîl, H. Cindî, E. Evdal, Q. Murad, N. Esed and T. Murad. Some even write several of their works directly in Armenian, such as C. Celîl, E. Evdal, Nadoyê Xido Mehmûdov and many others.

In ʿIrāḳ, many articles of scientific popularisation have been translated, e.g. Dr. Haşim Dixirmacî, and Naci Ebas have specialised in the translation of accounts of early British travellers in Kurdistān.

In the purely literary domain, the novel is the genre which seemed the best adapted to the mentality and art of the Kurds. In the review *Hawar*, one may read the stories of Nuredîn Zaza (born in 1919), and the fables in prose of Mistefa Ehmed Botî. In these stories, Qadri Can (born in 1918) is concerned with religious fatalism and the feudal ascendancy. But one should note very especially Osman Sebrî (born in 1909) who, whilst a poet when in the mood, is particularly a born storyteller, with a lively, simple and direct style.

In ʿIrāḳ, where the intelligentsia is more numerous, history is a privileged field, with the fecund Husayn Huznī Mukrianī (1886-1947) as the author of varied studies: *The history of the Kurdish emirates*, 1929-31, *Famous Kurds*, 1931, *The Soran emirs*, 1935, *The Kurds and Nadir Shah*, 1934, *The Zend Kurds*, 1934, *Mukriani Kurdistan or Atropatene*, 1938, etc. General Mihemed Emîn Zekî (1880-1948), published a *Summary of the history of the Kurds and Kurdistan*, 1931, a *History of the Kurdish states and emirates in the Islamic period*, 1948, a *History of Sulaimani and its district*, 1939, and two volumes of *Kurdish celebrities and Kurdistan*, 1945-7. All these works have been translated into Arabic. Refiq Hilmî (d. 1961), began the publication of his *Memoirs*, in fascicules of a hundred pages, beginning in 1956 and entitled them *A recollection, Southern Kurdistan, the revolutions of Shaykh Mahmud* (a work still uncompleted). Tewfîq Wehbî, pioneer of Kurdish grammar, 1929, 1956, is also a historian who has studied the Yazīdīs, 1962, and the origins of the Kurds and their language, 1965.

Literary criticism began with Yûnis Reûf and Dildar, Kamuran and especially Marûf Xiznedar, who

in review articles and prefaces of anthologies presented many ancient and modern poets. Xiznedar, apart from his *History of Kurdish literature*, also composed *Ḳeş û qafiyet le şi'irî kurdî da* ("Rhyme and rhythm in Kurdish poetry", Baghdād 1962). Cemîl Bendî Rojbeyanî, Arabic translator of the *Sharaf-nāma* in 1957, is especially interested in the poets and writers of the Zengene, Kelhûr and neighbouring tribes. ʿAlāʾ al-Dīn Sidjādī published not only his *History of Kurdish literature* (in 1952), *Researchs on Kurdish literature* (1968) and also the *Value of knowledge* (1970), but also five volumes of *Necklace of pearls* (1957-72), a collection of literary narratives, stories and anecdotes, in which philosophy, beliefs and history are mixed, and his *Journey in Kurdistan* (1958). Let us finally cite ʿIzz al-Dīn Rasūl (born in 1935), for his works on literature and folklore (1968).

In ʿIrāḳ also, numerous authors, writers, journalists and militants, have published, in verse and prose, collections and articles in which they have pleaded the most urgent social causes of the disinherited, such as Şekir Fetah in *The companion of the children* (1948), *The Kurdish woman* (1958), *The new life* (1960); Ibrahîm Ehmed (born in 1912), in *Misery* (1959) and many articles in newspapers; Miherem Mihemed Emîn (born in 1921), in *Uncle Omar* (1954), *The tranquil lake* (1957) and *The path of liberty* (1954).

In Soviet Armenia, one also finds young literary critics who give in *Riya taze* their often severe appreciations of poetic works which appear. Among them are Mikaîlê Reşîd, and especially Emêrikê Serdar, and Ordixanê Celîl is an excellent critic. His books on Cegerxwîn, Dimdim, on proverbs and his articles on folklore are the proof of that, and he has also published *Poems* (1954) and *Telî Hamza*, a kind of epic (1963). But the prose writers there are less numerous than the poets. They do not enter into the domain of the dream, nor even into history properly speaking, but most of their writings set forth the wretched life that they led in the past in the time of the Turks and the revival of their present social situation. At their head is their veteran Ereb Şemo (born in 1898), who is also the most fecund. His latest compilation, *Berevok* (Erivan 1969), takes up the text of *Berbang* "Dawn" (1958), a rehash, revised and corrected, of *Şivanê kurd* "The Kurdish shepherd" (1935), retranslated and republished in Beirut (1946), in which he narrated with much freshness and simplicity the life of his childhood as a small herdsman, the picturesque events of the life of the tribes and the implantation of communism among them; there are also his *Jîna bextewar* "The happy life" (1959) and the unpublished *Hopo*, which is its complement, in which is described the existence of the Kurds under the Soviet régime. Şemo has also published *Dimdim* (1966), which is the romanticised history of this famous epic. He is furthermore the author of numerous articles in many Russian language newspapers on all the social and historical subjects which interest the Kurds. Elî Evdal-Rehman published in this same vein of social preoccupations, *Xatê Xanim* "Lady Xatê" (1959) and *Gundê Merxasan* "The village of heroes" (1968), and Rehîm Gazî, *Hişyarbûn* "Awakening" (1960), which speaks of the resistance of the Kurds of Iran against their Turkish or Iranian oppressors.

Thus one sees the true novel, as it is understood in the West, does not yet really exist in Kurdish literature. It is rather the new genres which Kurdish writers prefer, even in ʿIrāḳ. The same remark may be made with reference to the theatre. In Armenia, from the beginnings, there were attempts with W. Nadirî, *Reva jinê*, "The abduction" (1935) and A. Mîrazî, *Zemanê çuyî* "Time past" (1945), and recently Ismaîle Duko, *Zewaca bê dil* "Marriage without love" (1964). In all these cases, the theme is the struggle against the customs of the past age. Similarly in Irak with Burkan, *Kiç û qutebxane* "The girl and the school" (1956), and Jiri, *Afret û niwişte* "The woman and the talisman" (1956), plays performed in the schools. There are also critical themes in the comic scenes of Emîn Mirza Kerîm. In 1953-4, Goran published in his newspaper *Jîn* several verse plays, including *The poor man's dream, The voice of death*, etc., which aim at waging a vendetta against the faults of the present society. But the *Four martyrs* (1959) is a patriotic play of Xalid Delair. Cemal Abdul Qadir Baban published *Nôrûz* (1960), a play in five acts in verse, and Zakî Ehmed Henarî, *The fate of the oppressor Dahak* (1960). Let us mention especially, because it was published in Istanbul (1965), *Birîna reş* "The black wound" of Musa Anter (born in 1920), in which the author calls attention to the misery and ignorance of the Kurdish peasant in Turkey. On Kurdish theatre, cf. Azad Kardo, *The Kurdish stage*, in *The Kurdish Journal*, ii/3-4 (1965), 13-5.

Celîl, *Efrandinêd nvîsk'arêd k'ördêd Ermenîstanêye sovetiê* ("Works of Kurdish writers of Soviet Armenia"), Erivan 1961.

C. The Kurdish press.

The influence of the press is basic in the national and cultural life of a people. With regard to this, the development and transformations of the Kurdish press are characteristic of the political evolution of the Kurds. Of the 119 recorded newspapers and reviews, whose periodicity is all relative, some have only had ephemeral life. The publishing centres have been moved from Istanbul to the different towns of ʿIrāḳ, Baghdād, Sulaymānī, Hewlêr and Kirkûk; of Iran, Tehran, Mahābād and Tabrîz; or even to Damascus and Beirut. Often these newspapers are bilingual. Most of the journals consist of a precious

and inexhaustible mine of information on language, folklore and the customs of the Kurdish land, and also on its history and geography. Furthermore to be found in them are numerous texts of poets, ancient or modern, as well as fine ideas of literary criticism. Young talents are also exercised there.

The first Kurdish newspaper, *Kurdistan*, was founded in Cairo in 1898 by Midhet Paşa Bedir Xan and his brother ʿAbd al-Raḥmān and moved from Cairo to Geneva and Folkestone (31 nos.); republished in Baghdād, 197?, by Kamāl Fuʾād. In Istanbul, there was the monthly *Roja kurd* "Kurdish day", which became "The Kurdish sun", in 1912 (3 nos.). In 1916, Sureya Bedir Xan published in Turkish the weekly *Jîn* "Life" which proclaimed "Kurdistān for the Kurds". He also published there in 1917-18 the weekly *Kurdistan* (37 nos.).

Between the two wars (1920-45), the Kurdish press really began to flourish and develope. There appeared in Sulaymānī in 1920-2, *Pêskewtin* "Progress" (118 nos.); in 1922-3, *Roj-i Kurdistan* "The Sun of Kurdistan" (15 nos.), re-published in Baghdād in 1973 by Djamāl Khaznadār; the weeklies *Bangê Kurdistan* "The call of Kurdistān" 1922 (14 nos.) in 1923, *Bangê haqq* "The call of truth", the official newspaper of Şêx Mehmûd (3 nos.) and *Umîdî istiqlal* "Hope of independence", edited by Refîq Hilmî (25 nos.). In 1925-6, *Diyarî Kurdistan* "The gift of Kurdistān" of Salih Zeki Sahîbqran, in Kurdish, Arabic and Turkish, had 16 nos. In 1924-6, the weekly *Jiyanewe* "The resurrection" an official newspaper (56 nos.) which took the name *Jiyan* "Life" 1926-38 (556 nos.), and that of *Jîn*, 1939-63, under the direction of Piremerd until his death (1950), exceeded a thousand nos. In 1938 there appeared the scientific review *Zanistî* "Science" of Salih Quftan, who published in it historical and literary articles, but which only had a few issues, while the weekly *Ziban* "Language" 1937-9, published by the municipality, had 70 nos. In Rawāndiz, Huseyn Huzni Mukriani published 1926-32 *Zari kurmancî* "The Kurdish language" which had 30 nos. Baghdād was to become an important Kurdish cultural centre through the publication of the very numerous monthlies, *Gelawêj* "Sirius", 1939-49, directed by Ibrahîm Ehmed and *Dengê Gêti-e Taza* "The voice of the New World" edited by the British Embassy and edited by Tewfîq Wehbî. Outside ʿIrāḳ, it is important to mention the major reviews, in Latin characters, *Hawar* "The alarm cry", 1932-5 and 1941-3, 57 nos., and its illustrated supplement, *Ronahî* "The lamp" 1941-5, 28 nos., both published in Damascus by Emir Celadet Bedir Xan, and the weekly *Roja nû* "The new day" 1943-6, 73 nos. and its supplement *Stêr* "The star" which only had 3 issues, published by Emir Kamiran Bedir Xan in Beirut. These journals provide an enormous mass of folkloric documents. Let us mention, in Erivan, the bi-weekly newspaper *Riya taze* "The new view", the organ of the Kurdish section of the Communist Party of Armenia, which appeared, in Latin characters from 1930 to 1938 (612 nos.), then in Cyrillic characters from 1955. It has now exceeded its 2,500th number. It is along with *Jîn* of Sulaymānī the best example of longevity of the Kurdish press.

The equivocal political situation in Iran between the years 1941 and 1946, especially after the proclamation of the independent Kurdish Republic (1945-6), brought about the blossoming of a whole Kurdish press in Mahābād: *Kurdistan*, 1945-6, the official newspaper (113 nos.) and a literary review of the same name (16 nos.) *Hawarê nîştiman, Awar, Gir û gali mindalanî kurd, Helale* "The red poppy" only survived a spring. For his part, in Lāhīdjān, Şêx Latif, son of Şêx Mehmûd, published the journal *Niştiman* "Homeland" which had 3 issues.

After the War and until the proclamation of the Republic in ʿIrāḳ (14 July 1958), the journals normally appeared in both Kurdish and Arabic. In 1948-9, in Baghdād, Eladîn Sêcadî published *Nizar* "The rock" (22 nos.), and in 1957-63, Hafiz Mistefa Qazî published there *Hêwa* "Hope" (36 nos.). In Erbil, from 1954 to 1960, Gew Mukriani published the bi-monthly *Hetaw* "The sun", which had 188 nos. Under the Republic, in Kirkûk, 1959-62, *Ray gel* "Popular opinion" (34 nos.); 1959-61, *Azadî* "Liberty", organ of the ʿIrāḳī C.P. (56 nos.). In Sulaymānī, the Teachers' Union published the monthly *Bilêsê* "The flame", 1959-60, with 10 nos. In 1960, appeared *Roj-i nuwe* "The new sun" with 18 nos. and the communist political and literary daily, *Birwa* "Belief", from July 1960 to January 1963 brought out 95 nos., while Baghdād, the bilingual daily *Xebat* "Effort", organ of the D.P.K. brought out 462 nos. in 1959-61. The Ministry of Agriculture published from 1959 to 1956, in Arabic and Kurdish, *Çareser kirdinî kişt û kal* (21 nos.), and the Ministry of Orientation *Iraqê nuwe* (24 nos.). In the course of the year 1960, the lawyer Omer Celal Huwaizi published 69 nos. of the democratic political daily *Dengê kurd*. One cannot pass over in silence *Kurdistan*, a weekly, published in Tehran under the auspices of the Iranian Government from May 1959 to May 1963 with 205 nos., political, scientific, literary and social; this very interesting weekly was only circulated abroad.

The internecine Kurdi-ʿIrāḳī war from 9 September 1961 to 13 March 1970, diminished the activity of the Kurdish press. Nevertheless, in Erbil the municipality published (1962-3) its newspaper *Hewlêr*, with 76 nos. In Baghdād there appeared in 1964 the first Kurdish issue of the seasonal journal *Tutin*, published by the tobacco administration, and, in 1967, *Biyaretî* "Fraternity", a political newspaper of Ṣāliḥ Yūsufī. It is this period which saw the appearance in Turkey, in Turkish and in Kurdish, several ephemeral reviews: *Dicle û Firat* (1962-3) in Istanbul with 8 nos.; *Deng*, in 1963 and in 1966 *Dengê taze* "The new voice" which only had 4 nos. before it was immediately stopped and the directors prosecuted.

The end of hostilities in Kurdistān saw the birth, from 1970 to 1973, of 29 periodicals, of which 2 were in Kirkûk, 6 in Hewlêr, only 4 in Sulaymānī, but 16 in Baghdād, which seems to indicate that the ʿIrāḳī capital has now become the intellectual and cultural centre of the Kurds in ʿIrāḳ. In Sulaymānī, there is *Birayetî* (1971-2, 18 nos.); *Deng-i mamosta* (7 nos.); *Jîn*, since 1971, presented as the continuation of the newspaper founded by Piremerd; and since 1972, the monthly *Êstêre* "The star", intended for children. In Baghdād, there is *Birayetî*, supplement of the daily *Taʾākhī* (1970-1, 18 nos.). Since 1970, the Philatelist Club has published *Gêti-i pûl* "The world of stamps", in Arabic, Kurdish and English. The General confederation of trade unions has as its official organ *Hişyar-i kirêkaran* "The awakening of the workers" which, since its no. 189 of December 1972, has a Kurdish section. One should mention as an annual publication *The Journal of the Kurdish Academy*, i/1 (1973), a great volume of 800 pages whose editor-in-chief is Iḥsān Shīrzād, Minister of Municipalities, and of which one section is in Arabic. In Iran, one should note the name *Rêga-i yekîtî* "The path of unity", a monthly publication of the Iranian Govern-

ment, whose no. 1 came out in April 1971 and which continues to appear regularly (in 1978).

The different Kurdish groups abroad publish ephemeral bulletins, at times simply typed. In 1949, there appeared in French *Dengê Kurdistan* "la Voix du Kurdistan", organ of the D.P.K. in Europe. Since 1958, the Association of Kurdish Students in Europe has published in English each year *Kurdistan*, in Kurdish and in Latin characters, some annual issues of *Hîviya welêt* "Hope of the homeland" in 1963-5, and similarly *Çiya* "The mountain" in 1965-7. The Commission for the Advancement of Kurdistan (CAK) of the United Kingdom published in English a single issue of *Kurdica*. In English also there exists one of the best publications of this genre, *The Kurdish Journal*, from December 1963 to September 1969, published by the Association of the Kurdish Students in U.S.A. Finally, in Kurdish and Turkish, *Ronahî*, "The lamp", organ of the Kurds of Turkey in Europe, since August 1971; this is now (1978) at its 8th issue.

Bibliography: The bibliographies of Edmonds and MacKenzie; R. Lescot, *La presse kurde*, in *Roja nû*, no. 1 (May 1943); Bishop M. L. Ryan, *Bibliography of the Kurdish press*, in *JRCAS* (1944), 313-14; Secadi, *Mejo-i . . .*, 551-7; Nerevan, *Notes sur la presse kurde d'Irak. Publication d'un hebdomadaire kurde en Iran*, in *Orient*, no. 10 (1959/2), 139-48; I. C. Vanly, *Le Kurdistan irakien . . .*, 394-5; and especially, Jamal Khaznadar, *Kurdish journalism guide*, in Kurdish, Arabic and English, Ministry of Culture, Baghdād 1973, published on the occasion of an exhibition of the Kurdish press for the 75th anniversary of the first Kurdish newspaper. (TH. BOIS)

AL-**KURDĪ**, MUḤAMMAD AMĪN (d. 1332/1914), one of the leading figures in the recent history of the Naḳshbandī order, and author of several influential works.

Born in Irbīl, he made early acquaintance with Ṣūfism, for his father, Fatḥ Allāh-zāda, was a Ḳādirī *shaykh*. His own initiation was at the hands of a Naḳshbandī *shaykh* of the city, Shaykh ʿUmar, who was separated by only one link in the initiational chain from the great renewer of the Naḳshbandiya in the western Islamic lands, Mawlānā Khālid Baghdādī (d. 1242/1826). After several years spent in the company of Shaykh ʿUmar, Muḥammad Amīn received a licence himself to initiate disciples into the Naḳshbandī path, and he left his homeland, never to return. He retained, however, a certain mode of reverential awareness of Shaykh ʿUmar's spiritual presence through the distinctive Naḳshbandī technique known as *rābiṭa*. He spent many years in Mecca and Medina, enjoying numerous mystical and visionary experiences; he compared his state while in Mecca to that of Ibn ʿArabī when he began the composition of *al-Futūḥāt al-Makkiyya*. Inspired by a desire to visit the tombs of the *Ahl al-Bayt* in Cairo, he left the Ḥidjāz for Egypt, which was to be his residence for the rest of his life, with the exception of a return visit to the Holy Cities in 1323/1905. He lived first in the *rawāḳ* of the Kurdish students at the Azhar, later moving to the village of Ambāba outside of Cairo, and finally to Būlāḳ. Initially he concealed his Naḳshbandī affiliations and Ṣūfī interests, concentrating on the study of *ḥadīth*, *tafsīr* and *fiḳh* at the Azhar. Later he began to proclaim the path, and to accept each year a small number of disciples. Upon an indication from Shaykh ʿUmar contained in a dream, he then decided to accept all who came to him, and indeed vigorously to propagate the Naḳshbandī order throughout Egypt, travelling widely to numerous towns and villages. He encountered opposition from the followers of other orders and from adherents of the Salafī movement, but soon came to gather a large following. In his instruction, he placed emphasis on two particular elements of Naḳshbandī practice; silent *dhikr* and the recitation of a litany known as the *khatm-i khʷādjagān*. He died in Būlāḳ in 1332/1914 and was buried in the Ḳarāfa cemetery of Cairo.

He left behind him numerous *khalīfa*s, the most prominent of whom was Shaykh Muḥammad Yūsuf al-Saḳḳā; many contemporary Naḳshbandīs of Egypt are descended from him. The best known of his numerous writings is *Tanwīr al-ḳulūb fī muʿāmalat ʿallām al-ghuyūb*, a compendium of religious knowledge of which the third part is devoted to Ṣūfism. The eighth edition of this book was printed in Cairo in 1368/1949. He also wrote a biographical dictionary of Naḳshbandī saints (*al-Mawāhib al-sarmadiyya fī manāḳib al-Naḳshbandiyya*, published in Cairo in 1329/1911, as well as manuals of Shāfiʿī and Mālikī *fiḳh*.

Bibliography: A comprehensive account of Muḥammad Amīn's life is given in a 55-page preface by Shaykh Salāma ʿAzzāmī to *Tanwīr al-ḳulūb* (8th ed., Cairo 1368/1949). Some mention is made of him by A. J. Arberry in his *Sufism*, London 1950, 129-32, where Muḥammad Amīn's description of Naḳshbandī practices of *dhikr* is summarised. The same passage from *Tanwīr al-ḳulūb* is also to be found in French translation as an appendix to Jean Gouillard's version of *La petite philocalie*. (HAMID ALGAR)

AL-**KURDJ**, GURDJ, GURDJISTĀN, the names in Islamic sources for the province of Georgia in western Caucasia. Georgia comprises four distinct regions: Mingrelia and Imereti in the north-west; Samtaskhe in the south-west (adjoining the Black Sea coastal region of Lazistān [see LAZ], inhabited by a people closely related to the Georgians); Kartli in the north, with the capital Tiflis [*q.v.*], Georgian Tbilisi; and Kakheti in the east. Topographically, much of Georgia comprises mountains, hills and plateaux, with lowland only on the Black Sea coastal plain and in the valleys of the River Rioni and its tributaries, draining westwards into the Black Sea, and of the River Kura (Georgian Mtkvari, Islamic Kur [*q.v.*]) and its tributaries, draining eastwards into the Caspian.

The Georgian people (who refer to themselves as Kartvel-ebi and their homeland as Sa-kartvel-o, after a mythical, semi-divine ancestor Kartlos) are linked with the Svans of northern Mingrelia and the Mingrelo-Laz in the so-called "Ponto-Zagros" group of Caucasian peoples, although over the millennia their blood must have been much mingled with that of other peoples who have invaded or have passed through their country. Linguistically, the Georgian language forms with Svanetian and Mingrelo-Laz the southern or Ibero-Caucasian group of Caucasian languages; for details, see AL-ḲABḲ, languages. It is written in an alphabet of considerable phonetic exactness, which is traditionally considered to be the creation of St. Mesrop, inventor of the Armenian alphabet, but which apparently had two forms originally; these must at all events have been derived in the first place from Aramaic-Pahlavi scripts (see D. Diringer, *The alphabet, a key to the history of mankind*[3], New York 1968, 252-4).

Early history. From earliest times, Georgia has been a meetingpoint for the cultures of East and West and a place where the products of European

and Asian commerce were exchanged. In Homeric times, the western Georgian coastal region, Imereti and Mingrelia, formed the famed Colchis, land of the Golden Fleece sought by Jason and the Argonauts, whilst the lands to the east, Kartli, Kakheti and Samtskhe, formed the Caucasian Iberia, with its capital at Mtskheta-Armazi, on the River Kur just upstream from modern Tiflis. The campaigns of Pompey in the 1st century BC brought Georgia into the sphere of Roman political and cultural influence, and to classical geographers like Strabo we owe a description of Iberia, and the fourfold class-division of its society, a division not dissimilar from that of ancient Iran. The Iberians did indeed have close cultural links with the Parthians, and we find Iberian kings and nobles with Iranian names like Parnavaz and Asparukh, together with a certain spread of the Zoroastrian religion within Iberia, a process only arrested by the adoption of Christianity within Georgia *ca.* 330 AD, during the reign of the Emperor Constantine the Great and through the missionary efforts of a Cappadocian slave woman, St. Nino. The consequences for the future history of Georgia and its people of this conversion to Christianity were incalculable. Georgia, and Armenia [see ARMĪNIYA] to the south of it, henceforth became bastions of the new faith against the pagan regions of the eastern Caucasus and against the Sāsānids of Persia, the enemies of Byzantium. At first dependent on the Patriarchate of Antioch, the Georgian Church, like that of the Armenians, espoused Monophysitism and rejected the formulae of the Council of Chalcedon, and at the Council of Dvin of the Armenian and Georgian Churches in 506, the Georgians seceded from Orthodoxy and set up their own national church of St. George, with its Catholicos-Patriarch resident at Tiflis.

The period of Byzantine-Persian rivalry. The old capital of Georgia Mtskheta (Ptolemy, *Geography*, 5.10 Μεστλῆτα = Μεσχῆτα) was sometimes called by the Arab geographers by a popular etymology Masdjid Dhi 'l-Ḳarnayn (Masʿūdī, *Murūdj*, ii, 56; cf. Marquart, *Streifzüge*, 186). According to the Georgian Chronicle, the Persian *eristav* ("ethnarch") sent against Varaz-bakar (379-93?), king of Georgia (of the Khosroid dynasty, descended from the Sāsānids), built Tiflis "between the Gates of the Caucasus" (i.e. between Darial and Darband) "to serve as a bulwark against Mtskheta" (Brosset, *Histoire de la Géorgie*, i, 140).

During the wars of king Wakhtang Gurgasal (446-99?) with the Persians, the fortress (*kala*) and the village (*sopʿeli*) of Tiflis were destroyed. Wakhtang laid the foundations of a town at Tiflis and his son Dači (499-514) completed its walls (*op. cit.*, 180, 196-201).

After 523, the Persians, having suppressed the ruling dynasty of eastern Georgia, maintained a Persian *marzbān* in Tiflis, beside whom representatives of the Georgian nobility had a nominal share in the administration of the country (Brosset, i, 226; Marquart, *op. cit.*, 397, 431-2; Djavakhov, *Khrist. Vostok*, i [1912], 110). The governor of Mtskheta was under the *marzbān*. Theophanes of Byzantium (6th century) is the first Byzantine author to mention ἡ Τίφιλις (Τιφλίς) μητρόπολις under the year 571 (Theophanes apud Photium, in Migne, *Patrologia graeca*, ciii, 139; cf. Muralt, *Essai de chronologie byzantine*, St. Petersburg 1855, i, 156).

The wars with the Turks and the Byzantines having distracted the attention of the Persians from Iberia, the Georgians asked the Byzantine emperor to give them a king and the Bagratid Guaram (575-600) was set up at Mtskheta. To this king tradition attributes the "restitution of the foundations of the church of Sion in Tiflis" (i, 222).

After the victory gained over the Byzantines by Khusraw Parwīz (after 606), the son of Guaram, Stephanos I (who was content with the title of *eristʿavi* = "ethnarch"), joined the Persians. Later, when in 624 Heraclius and his Turkish allies laid siege to Tiflis, Stephanos defended the town bravely. Heraclius appointed as *mtʿavar* ("chief") Adarnases of the old Khosroid family and associated with him the *eristʿavi* Djibghu (Theophanes: Ζιέβηλ; according to Marquart: Tʿong Yabghu Khaḳan). The citadel (*kala*) was taken and Stephanos slain.

The Arab conquest. The Arabs confounded Armenia and Georgia (cf. Balādhurī, *Futūḥ*, 194; and Yāḳūt, ii, 58, where Djurzān is a *nāḥiya* of the country of Armīniya). According to the Georgian chronicle (*Kʿartʿlis tskhovreba*), the Agarians invaded Somkhetia ("Armenia", a rather ambiguous term, for "Somkhetia of Karti" began to the south of the river Khram, about 20 miles south of Tiflis) in the reign of Stephanos II (639-63?), son of Adarnases, who lived in Tiflis. On the death of this king, his sons Mir and Arčil withdrew to Egris in Mingrelia. In the period of their joint reign (663-8) Georgia was visited by the ferocious Murwan Ḳru ("Marwān the Deaf") sent by the *Amīr al-Muʾminīn* Eshim (= Hishām whose dates are actually 105-25/724-43!). Such mistakes and anachronisms may be explained by the fact that at this period, the national life of Georgia had taken refuge far to the west in lands not easily accessible from Čʿorokh (Klardjetia). The thread of events may, however, be pieced together from Arab and Armenian statements [see ARMĪNIYA].

In reality, Arab expeditions penetrated into Transcaucasia in the reigns of the early caliphs. According to Ṭabarī, i, 2666, in 22/643 Surāḳa, having made peace with Shahr-Barāz (king of Bāb al-Abwāb [*q.v.*]), sent Ḥabīb b. Maslama against Tiflis. To the same year Ṭabarī, i, 2674, puts the peace with the people of this town, but it was actually made in 25/645 in the reign of ʿUthmān (Yaʿḳūbī, *Historiae*, 194; Balādhurī, 198). When Habīb b. Maslama had conquered Armenia, he turned his attention to Georgia. A Georgian ambassador (Nkly = Nicolas? Tfly = Theophilus?) appeared before him to testify that the *baṭrīk* of Djurzān and his people were well-disposed. Habīb's answer (cf. the versions in Balādhurī, 201 and Ṭabarī, i, 2764; Yāḳūt, i, 857, rather follows Balādhurī) was addressed simply to "the inhabitants of Tiflis, in [the *rustāḳ* of] Mandjalīs (now Manglis) in al-Djurzān (= Georgia) in the land of Hurmuz".

Habīb guaranteed the people the exercise of their religion, but he sent to Tiflis the learned ʿAbd al-Raḥmān b. Djazʾ to expound the law of Islam, and indeed the people of the town were soon converted to Islam.

After reducing Tiflis, Habīb extended his conquests or his treaties of peace over other regions inhabited by the Georgians and their neighbours (Balādhurī, 202-3; cf. the attempts to analyse them in Ghazarian, *Armenien unter der arabischen Herrschaft*, in *Zeitschr. f. armen. Philologie*, ii (Marburg 1903), 149-225). Among these, the Ṣanāriya play a prominent part Ptolemy, 5.8.13: Σαναραῖοι; in Armenian: Tsanarkh), a very warlike Christian people who lived in Kakheti and the high Alazan and who, according to the hypothesis of N.Y. Marr, were identical with the modern Tʿush, whose language is related to that of the Čečens (cf. *Izv. Akad. Nauk.*, x/12 [1916], 1379-1408).

From the time of Habīb's expedition to the reign of al-Mutawakkil (232-47/847-61) the Djurzān (eastern Georgians) and the Abkhāz (*q.v.*, here in the wide sense of "western Georgians of the valley of the Rion", i.e. of Imereti) paid tribute to the Arab military commander in Tiflis (*Murūdj*, ii, 65; Yāķūt, ii, 583). From the time of Yazīd II (101-5/720-4) we have a letter in which Djarrāḥ b. ʿAbd Allāh confirmed to the Djurzān the guarantees given by Ḥabīb b. Maslama (Balādhurī, 202; there is a reference there also to the *rustāķ* of Mandjalīs, but several place-names are still unidentified).

As to the "Murwan Ķru" of Armenian and Georgian tradition, two personnages seem to have been confused in this figure (Marquart): Muḥammad b. Marwān, of whom the Georgians seem to have heard the Armenians speak, and his son Marwān b. Muḥammad who in the reign of Hishām was fighting mainly in Dāghistān, but whose expedition against the "Gate" of the Alān [*q.v.*] must have passed through the region of Tiflis. His headquarters were at Kisāl(?), 20 *farsakhs* from Tiflis and 40 *farsakhs* from Bardhaʿa (probably Kesala below Tāwūs, which satisfies the description; see below). A *dirham* is known of ʿAbd al-Malik struck at Tiflis in 85/704.

The ʿAbbāsids. In 141/758 the Khazars [*q.v.*] under Raʾs Ṭarkhān invaded Armenia (Yaʿķūbī, ii, 446). Ṭabarī (iii, 328), speaking of the same event under 147/764, says that during the invasion of Astār Khān al-Khwārazmī (*sic*), many Muslims and *dhimmīs* were made prisoners and the Turks entered Tiflis. Yaʿķūbī immediately after 141/758 mentions a rising of the Ṣanāriya. The latter were defeated by ʿĀmir b. Ismāʿīl, who then returned to Tiflis and executed his prisoners there.

Another Khazar invasion took place in 183/799. Their king came as far as the bridge over the Kur and ravaged the country, but the taking of Tiflis is not mentioned by the Arab writers (Yaʿķūbī, ii, 518; Ṭabarī, iii, 648) while the Georgian chronicle says that in the joint reign of the brothers Ioane and Djuansher (718-86?) the Khāķān's general Blučan (in Armenian Bulčʿan) took Tiflis and conquered Kartli.

Of the governors whom Hārūn al-Rashīd (170-93/786-809) sent to Armenia, the harshest was Khuzayma b. Khāzim (Balādhurī, 210). The Georgians called him Cʿičʿum-Asim. Yaʿķūbī, ii, 210, confirms the cruelty of his second governorship. The Djurdjān (read Djurzān) and the Ṣanāriya rebelled. Khuzayma's general Saʿīd b. Haytham defeated them, drove them out of the country and then returned to Tiflis.

Under al-Maʾmūn (198-218/813-33) a certain Muḥammad b. ʿAttāb established himself in Armenia. In 214/829 he conquered the land of the Djurzān and the Ṣanāriya joined him (Yaʿķūbī, ii, 540, 565-6). Khālid b. Yazīd gave *amān* to Muḥammad b. ʿAttāb and defeated his allies, the Ṣanāriya, but the disturbances in Armīniya went on (Yāʿķūt, ii, 566; Balādhurī, 210-11). In 215-39/830-53, Isḥāķ b. Ismāʿīl carved himself out a principality in Georgia.

Isḥāķ b. Ismāʿīl. According to Masʿūdī, *Murūdj*, ii, 65, he was of Ķuraysh origin. His father Ismāʿīl was the son of Shuʿayb, a client of Marwān II (126-32/744-50); he had settled in Georgia in the time of the caliph al-Amīn (193-8/809-13) and had had skirmishes with the governor Asad b. Yazīd (Yaʿķūbī, ii, 528). The uncle of Isḥāķ, ʿAlī b. Shuʿayb, mentioned in the Georgian chronicle, i, 260, 265, is said to have received Tiflis from Khālid, probably after Muḥammad b. ʿAttāb. But already in the governorship of Ḥasan Bādhghīsī, the second successor of Khālid, we find the name of Isḥāķ. When the Byzantine troops of Theophilus (829-42) reached Wanand (near Ķars), they "were cut to pieces by Sahak, son of Ismael" (cf. Stephen Asolik, ii, ch. 5., tr. Dulaurier, 171). As a result of such exploits, the caliph al-Wāthiķ (227-32/842-7) recognised Isḥāķ as lord of Armenia, but this did not last long. Muḥammad, son and successor of Khālid, defeated Isḥāķ and drove out the Ṣanāriya. According to the Georgian chronicle, the Georgian princes (who had less fear of the central government so far away) supported Muḥammad against Isḥāķ and his allies, the people of Kakheti and the Ṣanāriya.

Finally, in the reign of al-Mutawakkil, the Turkish commander Bughā al-Kabīr al-Sharābī [*q.v.*] was sent to Armenia. In Rabīʿ I 238 (August-September 852), he left Dabīl for Tiflis. Bughā watched the operations from the high hills beside Sughdabīl (the reference is to the heights of Makhatha to the north of Isani = Sughdabīl).

Isḥāķ made a sortie, but Bughā's *naffāṭūn* (throwers of Greek fire) set fire to the town. Isḥāķ's palace was burned. He and his son ʿAmr were taken prisoners by the Turks and the Maghāriba. Isḥāķ was decapitated and 50,000 (?) men lost their lives in the destruction of the town by fire. The Maghāriba took the survivors prisoners and mutilated the dead. Isḥāķ's wife, daughter of the lord of Sarīr (= the principality of the Avars in northern Dāghistān), was at Sughdabīl, which was defended by the Khuwaythiya (people of Sasun; cf. MAYYĀFĀRIĶĪN). Bughā granted them *amān* on condition that they laid down their arms and he continued his operations in the direction of Djardmān and Baylaķān (Ṭabarī, iii, 1114-16; cf. Thomas Artsruni, iii, chs. 9-10, ed. Brosset, St. Petersburg 1874, 140-50. A Georgian inscription on the church of Ateni gives the Islamic date 239 for the taking of Tiflis by Bughā; cf. Djavakhov, *Khrist. Vostok*, i [1912], 284). The destruction of the Muslim principality of the former clients of the Umayyads, which was a focus around which local elements gathered, was an irreparable mistake for the caliphate. The Arab authors (Masʿūdī, ii, 67; Yāķūt, ii, 58) date the decline of Arab power in the Caucasus from this. Bughā was soon recalled; cf. Brosset, *op. cit.*, i, 266-8, and Thomas Artsuni, *ibid.*

There was an ʿAbbāsid mint for *dirhams* at Tiflis till 331/942 (pieces are known of 210, 248, 250, 294, 298, 304, 307, 311, 312, 314, 330, 331); cf. Tiesenhausen, *Monnaies des khalifs orientaux*, St. Petersburg 1873; Pakhomov, *Moneti Gruzii. i. Domongolskiy period*, in *Zap. Num. Otd. IRAO*, i/4 (1910); E. von Zambaur, *Die Münzprägungen des Islams zeitlich und örtlich geordnet*, i, Wiesbaden 1968, 89-90.

The aid which Bagrat (826-76) had lent to the caliph against Isḥāķ did not bring the reward desired by the eastern dynasty. The rival dynasty, called of Abkhazia (cf. the explanation of this term above), seized Kartli. Thus Masʿūdī (writing in 332/942), *Murūdj*, ii, 69, 74, says that the Kur left the possessions of Djurdjīn (Bagratid of the lateral line, d. 941; Marquart, *op. cit.*, 176) crossed the land of Abkhāz (*sic*) and arrived in front of Tiflis, the inhabitants of which, although surrounded by infidels on all sides, still retained their courage and were numerous. The founder of the Armenian Bagratid kingdom Ashot (885-90?) also intervened in the affairs of Kartli (Brosset, i, 270, n. 12). Masʿūdī gives Masdjid Dhi 'l-Ķarnayn (= Mtskheta) as the residence of the king of Djurzān (*al-ṭanbaghī*, ingeniously emended by Marquart, *op. cit.*, 186, to the Armenian **mambaghi* > *mamphali*, a Georgian title).

The Sādjids, the Sālārids and the Shaddādids. In the meanwhile, there arose in Ādhar-

bāydjān the first Muslim dynasty that owned the suzerainty of Baghdād, the Sādjids (276/889 or 279-893 to 317/929; see SĀDJIDS and R. Vasmer, *O monetakh Sadjidov*, in *Izvestia Obshč. izuč. Azerb.* (Baku 1927), No. 5, 22-51). Abu 'l-Ḳāsim Yūsuf went to assist the isolated Muslims in the north. In 299/912 (?) he came to Tiflis, the *amīr* of which was then called Dja'far b. 'Alī (cf. below), and seized the fortresses of Udjarmo and Boč'orma (on the upper Iora) (cf. Brosset, i, 275, *n.* 2). The chronicle also mentions another expedition (between 305/918 and 311/923) of the "Saracens called Sadj", in the course of which Mtskheta was taken. The Muslim sources are silent about these expeditions. Immediately afterwards the chronicle mentions the appearance of the Musāfirids [*q.v.*] or Sālārids at Bardha'a and in Ādharbāydjān.

Bagrat III and Bagrat IV. The series of reigns "shows the greatest confusion" (Brosset), until the king Bagrat III (980-1014 ?) reunited Kartli, Abkhazia, Tao (on the Č'orokh) and Ardanudj. In his time, the Shaddādid [*q.v.*] Faḍlūn invaded Armenia, but was defeated by the Georgians, and Mtskheta was always regarded as the royal city, although the rulers resided in Kutais (K'ut'at'isi). In 421/1030 the Georgian and Kakhetian notables, with the help of the *amīr* Dja'far of Tiflis, undertook an expedition against the Shaddādid P'adlon (Faḍlūn of Gandja). But when the latter died, Liparit Orbeliani, the powerful lord of T'rialet' (on the upper Khram), captured Dja'far by a ruse and only released him on the appeal of the young king Bagrat IV (1027-72), who evidently did not wish Tiflis to be annexed by the turbulent Liparit. Dja'far was re-established at Tiflis, but a few years later the king himself laid siege to Tiflis. The siege had lasted for two years when suddenly the king at the suggestion of Liparit made peace with Dja'far. After the death of the latter, the elders (*ber*) of Tiflis offered the keys of the town to Bagrat, who occupied the citadel Dār al-Djalāl and the two "towers" Ts'ḳalkin and T'abor. The inhabitants of the Isan quarter on the left bank of the Kur, however, destroyed the bridge, and Bagrat had to turn his ballistas upon them.

The Saldjūḳs. In 439/1048 the troops of Ibrāhīm Yināl (in Georgian Bahram-Lam) appeared for the first time in Basian (Pasin on the upper waters of the Araxes). In 445/1053 (?) the Saldjūḳs undertook an expedition against Gandja, but a countermovement by the Byzantines, who were allies of Bagrat IV, saved the town. Thereupon the people of Tiflis again invited Bagrat, but as a result of Liparit's intrigues, the Byzantines kept Bagrat prisoner in Constantinople for three years. Then Bagrat recovered the greater part of his fortresses, when suddenly Alp Arslan (455-65/1063-72) invaded Georgia (Brosset, i, 326). On 10 December 1068, Alp Arslan, accompanied by the kings of Armenia and Kakheti (Aghsar'an, son of Gagik, of the dynasty of Korikoz (Chorepiscopi), which ruled from 787 to 1105), as well as the *amīr* of Tiflis, marched against Bagrat. All Kartli was occupied and many Christians slain or taken prisoners. The Shaddādids were given compensation. Tiflis and Rustaw were given to Faḍlūn of Gandja, and Ānī to Manučihr b. Abi 'l-Aswār. In the spring of 461/1069, Bagrat returned to Kartli. Faḍlūn encamped at Isan (a suburb on the left bank) and with 33,000 men ravaged the country. Bagrat defeated Faḍlūn, who took the road through Kakheti, but was taken prisoner by Aghsart'an. At the price of conceding several fortresses on the Iora, Bagrat ransomed Faḍlūn and received from him the surrender of Tiflis, where in the meanwhile a certain Sithlaraba (Sayyid al-'Arab ?) was proclaimed *amīr*. This plan failed, for Alp Arslan obtained the liberation of Faḍlūn. Giorgi II, son of Bagrat (reigned 1072-89, lived to 1125), lived in Kutais. In Kakhet Aghsart'an retained his possessions on condition that he adopted Islam.

Dawid II. The revival took place under Dawid II Aghmashenebeli (the "Restorer") who took the title of king "of Kartli and Abkhazia" (1089-1125 ?). Dawid brought into Georgia through the pass of the Alans (Darial) 40,000 Ḳīpčaḳs (Polovtsi) and 5,000 slaves converted to Christianity. In spite of their unruliness (Brosset, *op. cit.*, i, 379), these warlike elements enabled Dawid to throw off Saldjūḳ domination. He ceased the payment of the *kharādj* and put an end to the seasonal migrations of the Turks into Georgia. He gave his daughter T'amar in marriage to the Shīrwān-Shāh [*q.v.*] Akhsitān (in Georgian, Aghsart'an) and treated him as his vassal.

The capture of Tiflis in 515/1121. On the complaints of the Muslims of Tiflis, the Saldjūḳ Maḥmud b. Muḥammad (511-25/1118-31) sent an expedition into Georgia in which the Artuḳid Nadjm al-Dīn Ghāzī, the Mazyādid Dubays b. Ṣadaḳa (Durbez of the Georgian chronicle) and the brother of the Sulṭān Tughrīl (lord of Arran and Nakhičewan) with his atābeg Kūn-toghdī, all took part. On 18 August 1121 this army entered T'rialet' and Manglis, but was destroyed by Dawid and his Ḳīpčaḳs, after which in 515/1121-2), Dawid stormed Tiflis, so that the town might become "for ever an arsenal and capital for his sons"; Brosset, i, 365-7, and *Additions*, i, 230, 236-41; cf. Ibn al-Athīr, x, 398-9 (= Defrémery, *Fragments*, 26); Kamāl al-Dīn, *Ta'rīkh Ḥalab*, in *Recueil des hist. des croisades*, iii, 628; Yāḳūt, i, 857 (s.v. art. Taflīs). The Arab historian al-'Aynī (761-854/1360-1451), who utilises sources, some of which are no longer accessible (Brosset, i, 241), admits that Tiflis was burned and pillaged but, contrary to the other sources which emphasise the atrocities committed by Dawid (Matthew of Edessa in Brosset, *Add.*, i, 230), says that the king respected the feelings of the Muslims more than Muslim rulers had done. Dawid is also said to have promised to strike coins with Muslim legends; the coins however of the king (cf. Pakhomov, *Moneti*, etc., 77-81) bear the image of the Virgin. Great caution in dealing with the Muslims was necessary because, as the Georgian chronicle acknowledges, the fighting between Muslims and Christians was still very bitter (cf. Brosset, i, 380).

The Banū Dja'far. Dawid succeeded in Tiflis to the Banū Dja'far, of whom it is not known whether they were of Arab or purely Georgian origin. While the Georgian Chronicle (i, 367) puts at 400 years the period of Muslim rule in Tiflis, al-'Aynī gives the Banū Dja'far alone a period of 200 years. Indeed, we have seen that in *ca.* 300/912 the *amīr* of Tiflis was already called Dja'far [b. 'Alī] (Brosset, i, 275). His successor struck coins at Tiflis; *dirhams* are known of Manṣūr b. Dja'far, dated in 342 and 343 (with the name of the caliph al-Muṭī' li 'llāh), and of Dja'far b. Manṣūr, dated 364, 366 (al-Ṭā'i' li 'llāh). In the time of Bagrat IV (1027-72) the *amīr* of Tiflis was called Dja'far (his father 'Alī had carried off the property of the Sveti-Tskhoveli church of Mtskheta). The Chronicle calls him Mukhat' Gwerd Djap'ar (Mukhat' Gwerd is a place near Mtskheta). During the 40 years before the conquest of Tiflis by Dawid, the town was governed by the young members of the Banū Dja'far family, each of whom in turn held power for a month (al-'Aynī).

The strong kings. The reign of Dimitri (1125-54) was occupied with a civil war with the Orbeliani family. The Muslim rulers contemporary with him were: in Ādharbāydjān, the *atābeg* Ildeñiz or Eldigüz [*q.v.*] (in Georgian Ildiguz); at Ānī, the scions of the Shaddādids; at Khilāt, Ẓahīr al-Dīn Shāh-i Arman (523-79/1128-83); at Erzerum, the *amīr* Saltuḳ b. ʿAlī, whom the Georgians defeated near Ānī in 548/1153; cf. Ibn al-Athīr, xi, 126, year 548/1157; Münedjdjim-bashī, ii, 577; Defrémery, *Fragments*, 40. It was Dimitri who, taking advantage of the earthquake in 1139 at Gandja, carried off the famous iron gate of this town and took it to the monastery of Gelatʿi (cf. Fraehn, *Mém. Ac. St. Pétersbourg*, ser. 6, *Sc. morales*, iii, 531). The position in Tiflis is described by Ibn al-Azraḳ, the historian of Māyyāfāriḳīn, who visited Tiflis in 548/1153. He says the Muslims were in a favoured position. Every Friday Dimitri came to the mosque and sat on a dais (*dakka*) opposite the *khaṭīb*; cf. Amedroz, *Three Arabic manuscripts* . . . , in *JRAS* (1902), 791 (al-Azraḳ may have been the source used by al-ʿAynī).

Under Giorgi III (1156-84), the Muslim kingdoms around Georgia remained the same, and the king conducted vigorous campaigns against Erzerum, Ānī, Dwīn, Nakhičewān, Gandja, Bardhaʿa and Baylaḳān. To assist his cousin the Shīrwān-Shāh Akhsitān, son of Tamar, Giorgi's aunt, the king even went to Darband (cf. Brosset, i, 383-403, and *Add.* i, 253-7, 266; Ibn al-Athīr, years 556, 557, 559, 561, 569).

The reign of Tamar (1184-1211 or 1212), the "Sun of Kartli", is the culminating point in the history of Georgia, now on the threshold of terrible trials. Having forced the diadochi of the Saldjūḳs to accept peace, the Christian kingdom now assumed the offensive and surrounded itself with Muslim vassals. Tamar played an important part in the creation of the empire of the Comnenoi of Trebizond (Kunik, *Osnov. Trapez. imperii v 1204*, in *Učen. Zap. Akad. Nauk*, ii [1853], 705-33). The troops operating from Erzerum and Erzindjān inflicted defeats on the Ildeñizids of Ādharbāydjān. The sack of Ardabīl by the Georgians (Brosset, i, 469-73) finds confirmation in the *Silsilat al-nasab-i ṣafawiyya*, Berlin 1843, 43; cf. Khanykov, *Mél. Asiatiques*, i (1852), 580-3. The Chronicle also mentions in 1210-12 an expedition through the whole of northern Persia as far as Romguaro (= Ramdjār near Nishāpūr!), but beyond Tabrīz the stages in this march seem to be quite fanciful (Brosset, i, 469-73). In spite of the brilliant success of the generals Zakharé and Iwané of the Mkhargrdzel family (Armenian of Kurdish origin; cf. Brosset, *Add.*, i, 267), the Georgian victories were not lasting and of all her conquests, Tamar could only retain Ḳars (Brosset, i, 467). At home also (Djavakhov), the growing power of the feudal lords demanded the attention of the queen. Muslim customs penetrated into Georgia; the general Iwané was given the title of *Atābeg* ("used among the Sulṭāns"; Brosset, i, 474). In the reign of Tamar, we find mention of a rebel, Gozan son of Abu 'l-Hasan, "*amīr* of Tiflis and Kartli" (is this a scion of the Banū Djaʿfar?).

The Mongols. The son of Tamar, Giorgi III Lasha ("splendid" in the Abkhazian language) who ruled from 1212-23, levied the *kharādj* of Gandja, Nakhičewān, Erzerum (Karnukalak) and Khilāṭ, but in 617/1220 the Mongol troops of Subutay and Djebe (in Georgian: Suba and Iama or Čʿeba) made their appearance in Persia. The Georgians were several times defeated; the Chronicle (Brosset, i, 493) considers the defeat at Berdudj (on the Borčala) as the turning-point in the fortunes of the Georgian armies, hitherto invincible.

Giorgi died suddenly and the throne passed to his sister Rusudan (1223-47) (*Kiz-malik*, the "maiden king" of the Muslims), a beautiful princess devoted to pleasure, whose hand was sought by her Muslim neighbours (Brosset, i, 495). In the end she chose the son of the Saldjūḳ of Erzerum, Mughīth al-Dīn Toghrīl (in Georgian Orʿul) who by his father's orders became a Christian (Ibn al-Athīr, xii, 270: *hādithat*[un] *gharībat*[un] *lam yūdjad mithluhā*). In the letter from Rusudan to the Pope Innocent III (which reached Rome in 1224), the king speaks of the Mongol invasion as an insignificant episode, but a new enemy was at the gate.

The Khwārazm-shāh Djalāl al-Dīn defeated the Georgians at Garni in Shaʿbān 622/August 1225; (Ibn al-Athīr, xii, 283; Nasawī, ed. Houdas, 112; Brosset, *Add.*, i, 309). The Georgian commander Shalwa (Djuwaynī, ii, 159: he and his brother) was taken prisoner. Tiflis was occupied on 9 March 1226, thanks to the treachery of the Persians who lived in the town. According to Djuwaynī, Djalāl al-Dīn spared the inhabitants and allowed them to withdraw to Abkhazia, but destroyed all the Christian places of worship. Ibn al-Athīr on the other hand says that the town was taken by storm (*ʿanwat*[an] *wa-ḳahr*[an] *min ghayr*[i] *amān*[in]) and all those who did not accept Islam were massacred. Nasawī (122) also confirms the massacre of all Georgians and Armenians in Tiflis (cf. Brosset, i, 504-7). The vizier Sharaf al-Mulk was appointed governor of the town. When he left for winterquarters at Gandja, the Georgians returned to Tiflis and burned the town, knowing that it was impossible for them to hold it (Nasawī, 125). Djalāl al-Dīn, occupied elsewhere, did not return to Georgia till 625/1228 when at Mindor (in Georgian "field") near Loré, he scattered the forces of the commander-in-chief Iwané, made up of very diverse elements: Georgians, Alāns, Armenians, people of Sarīr (= the Avar of Daghistān), Lakz, Ḳipčaḳ, Svan, Abkhāz, Djanīt (= Čʿan-etyi; cf. LAZ), men from Syria and Asia Minor (cf. Djuwaynī, ii, 170). The Georgian Chronicle (Brosset, i, 510) says that after the victory at Bolnis (= Mindor?), Djalāl al-Dīn committed fresh atrocities at Tiflis.

Second coming of the Mongols. Djalāl al-Dīn disappeared from the scene in Shawwāl 628/August 1231), but the remnants of the Khwārazmians disturbed the eastern part of Georgia and shut the feudal lords up in their castles. Tiflis, however, was still in possession of Rusudan, when the Mongols of Djurmaghan entered Georgia via Gandja. This took place in 1236 (Brosset, i, 333; according to d'Ohsson, iii, 75: *ca.* 632/1235). Rusudan left Tiflis for Kutais, and the governor of Tiflis burned the town (Brosset, i, 514: "thus was ruined the city of Tiflis").

The *noʾins*, of whom the Chronicle always mentions four (Čarmaghan, Čaghtar, Ioser and Bičuy) occupied the country and restored Tiflis. Rusudan's rule was confined to the valley of Rion.

The Mongols broke up the political organisation of the country: the Georgians were pressed into the Mongol service (expeditions against the Saldjūḳs of Rūm, Ghiyāth al-Dīn, against the Ismāʿīlīs of Alamūt, against Baghdād etc.). The country was divided into six *tumans* and the Georgian feudal lords (*mtʿawar*) whose fiefs underwent changes, were divided among the *noʾins*. The people of note had to go to Batu-Khān and then to the Great Khān in Mongolia, where they were kept for years. In this way the heir to the throne, Dawid (called in Mongol Narin "splendid"),

was removed from the country. A certain Egarslan tried to unite the country against the Mongols ("he only lacked the name of king"; Brosset, i, 542), but the Mongols set up against him Dawid, son of Georgi Lasha, who was crowned at Mtskheta. He also had to go to Batu and to Karakorum. The "two Dawids" are mentioned among these present at the *kuriltay* of Güyük-Khān in 643/1245 (cf. Djuwaynī, i, 205, 212; Rashīd al-Dīn, ed. Blochet, 242). Returning to Georgia, after the accession of Möngke (1248-59), they ruled together at first.

As Hülegü did not like Dawid Narin, the latter escaped to Abkhazia. "It was thus that our country became two principalities", says the Chronicle (Brosset, i, 546). Eastern Georgia owned two suzerains: on the one side, Batu-Khān, lord of the country north of the Caucasus, wished to extend his authority over Georgia; on the other side, the Il-Khāns of Persia asserted their rights over it. Dawid, son of Lasha, exasperated by the exactions of Khōdja ʿAzīz, collector of Mongol taxes (Rashīd al-Dīn, ed. Quatremère, 395, calls him "one of the governors of Georgia"), fled to his cousin. The *noʾin* Oyrat Arghun occupied Tiflis. A reconciliation only took place when the son of Lasha had fought beside Hülegü against the troops of Berke, successor of Batu who had invaded Shīrwān in 2162 (d'Ohsson, iii, 182). In the reign of Abagha or Abaka, Berke returned to Transcaucasia and reached Tiflis, where many Christians were massacred (in 1266; cf. *ibid.*, 418).

The successor to Dawid, son of Lasha, was his son Dimitri II (1273-89), who took part in the numerous campaigns of Abagha and Aḥmad, but in the reign of Arghun his treasures were confiscated and he himself beheaded after being bastinadoed at the *ordu*. The Georgians call him Tʿav-Dadebuli, "he who gave his head as a sacrifice".

Several further kings were nominated and deposed by the Mongols. In vain Dawid VI (1292-1310) endeavoured to negotiate with the Khān of the house of Batu (Otakha = Tokhtoghu); he had to send to Ghazan an embassy consisting of the Orthodox Catholicos and the *ḳāḍī* of Tiflis (cf. Brosset, i, 615; this last detail is evidence of the revival of Islam as a result of the accession of Ghazan!). The Georgians continued to take part in all the campaigns of the Mongols, which however saved them neither from persecutions (cf. the activity of the Muslim *noʾin* Nawrūz in the reign of Ghazan: Brosset, i, 617) nor from attempts to convert them (e.g. after the Gīlān expedition of 1307).

Giorgi V. After the death of Öldjeytü (717/1317), Giorgi V (Brtskinwale, the Splendid"") was placed on the throne (1316-46) under the patronage of the *amīr* Čoban. Giorgi profited by the troubles in the last years of the dynasty of the Il-Khāns to drive out the Mongols. He exterminated the rebels, went with his army into Imereti, and united under his rule not only the Georgian lands as far as Sper (now Ispir) but all the lands from "Nikophsia (15 miles from Sukhum on the Black Sea) to Darband".

Tīmūr. It was during the long reign of Bagrat V (1360-95) that Tīmūr made his appearance. The official historian of his reign represents his campaign in Georgia as a *djihād*. Tīmūr set out from Kars in the winter of 788/1386 (*Ẓafar-nāma*, i, 401). Bagrat had shut himself up in the citadel of Tiflis. The town was captured and the King and Queen taken prisoners. The Chronicle and Thomas of Metsopʿ (Nève, *Exposé*, 37) mention the apostasy of the King, but represent it as a clever ruse which enabled him to exterminate 12,000 of Tīmūr's soldiers and regain his lands. His son Giorgi succeeded him in 1395. The *Ẓafar-nāma*, i, 705, 720, does not give these details. In 796/1394 it only mentions the despatch of four generals to the district of Akhaltsikhe (Akhiskha [*q.v.*]) in order to apply the law of *ghazā*ʾ. Tīmūr in person finally chastised the Georgians called Kara-Kalkanlïk ("with black bucklers" = the Georgian mountaineers, the Pshaws and Khewsurs) and returned via Tiflis to Shakkī [*q.v.*].

In 798/1395 the Georgians, allied with Sīdī ʿAlī of Shakkī, inflicted a defeat on the troops of the Tīmūrid Mīrān-Shāh who was besieging Alindjak (near Nakhičewān) and delivered Sulṭān Ṭāhir Djalāyir, who was shut up in it (*ibid.*, ii, 203). This event brought about its reaction in winter 802/1399 when Tīmūr took Shakkī and mercilessly ravaged the wooded defile of Khimshā (?), probably in northern Kakheti, where a Khimshia family held a fief at Mareli, to the east of Tʿionetʿi (Brosset, ii/2, 464). In the spring of 802/1400 Tīmūr marched on Tiflis and demanded that King Giorgi (Gurgīn) should hand over Sulṭān Ṭāhir. On receiving an evasive answer, Tīmūr laid the country completely waste (*ibid.*, ii, 214). Tiflis received a Khurāsānian garrison, but Giorgi retired again to the mountains. After the voluntary submission of a Georgian prince named Djānī-Beg and the capture of the fortress of Zarīt (?), Tīmūr's troops set out in pursuit of Giorgi and laid Svanethia waste. Giorgi went into Abkhazia and sent Ṭāhir back to Asia Minor. Through the intermediary of a Muslim named Ismāʿīl (Brosset, i, 668) he offered to Tīmūr to pay the *kharādj*. Tīmūr accepted the offer. Next the land of the Georgian Ivané (the *atābeg* of Samtskhe) was converted to Islam and that of the Kara-Kalkanlïk plundered. After resting for two months in the summer quarters of Min-göl ("1,000 Lakes") near Kars, he sent troops against the Georgians who had concentrated at Farasgird (Pʿanaskert, on the upper Čʿorokh); *ibid.*, ii, 250.

In 804/end of 1401 Tīmūr returned to Transcaucasia via Sīvās-Baghdād-Tabrīz. His delegates (*muḥaṣṣil*) went to collect the tribute (*sāw wa-kharādj wa-djizya*) from Giorgi, who sent his brother with the contributions. Tīmūr gave Giorgi *amān* on condition that he supplied him with troops and treated the Muslims well (*ibid.*, ii, 379). In the summer of 804/1402 Tīmūr went from Karabāgh [*q.v.*] to Min-göl and took the fortress of Tortum occupied by Kurdjïk, lieutenant of a certain Tadji (?).

When, in 805/1403, Tīmūr returned to Erzerum, he decided to punish Giorgi for not having come to present his congratulations on his victory over Bāyazīd. At Min-göl, Ivané, son of Ak-budjā, arrived with gifts as did Kustāndīl (Constantine), brother of Giorgi, who was then on bad terms with his brother (*ibid.*, ii, 512). Shaykh Ibrāhīm of Shīrwān went to estimate the revenues and expenses of Georgia (*ibid.*, ii, 521). Giorgi sent new presents, but Tīmūr refused them and summoned Giorgi to appear in person. In Muḥarram 806/August 1403 he himself laid siege to the impregnable fortress of Kūrtīn defended by Nazāl or Nazwāl (the Chronicle calls it Birthwis on Alget) and took it in nine days (*ibid.*, ii, 524-32). The troops then laid waste the country round (*aṭrāf*) Georgia as far as the borders (*ḥudūd*) of Abkhazia: "which is the end of this country". Seven hundred towns and villages were destroyed, and the historian of Tīmūr waxes eloquent over the massacres and destruction (ii, 536). Tīmūr only stopped them when the *ʿulamā*ʾ The Georgians sent 1,000 *tan*possible to grant *amān*. The Georgians sent 1,000 *tangas* of gold struck in the

name of Tīmūr, 1,000 horses, a ruby weighing 18 *mithkals*, etc.

Tīmūr passed through Tiflis, destroyed all the monasteries and churches and went to Baylaķān (winter of 806/1403-4). All the country from Baylaķān to Trebizond was given as an appanage to the prince Khalīl Mīrzā (ii, 545).

Post-Tīmūrid period. The general disorder, after the havoc wrought by Tīmūr, is reflected in the part of the Chronicle which gives a brief account of the reigns. The Muslim sources (*Maṭlaʿ al-saʿdayn*, in *Notices and extraits*, xiv, 235 and Mīrkhʷānd; cf. Defrémery, *Fragments*, 245) mention an expedition of Shaykh Ibrāhīm of Shīrwān, a friend of the dynasty of the Djalāyirids against the Ķara-Ķoyunlu Ķara Yūsuf in which Kustāndīl, king of Gurdjistān, took part. The allied forces were defeated to the north of the Araxes, and Ķara Yūsuf slew Kustāndīl with his own hand. This happened in 815/1412-13. Also, 300 *aznāʾūrs* (Georgian nobles; cf. Armenian *azn* "race") were massacred. Vakhusht (Brosset, i, 689) alone mentions Constantine as king and puts his death in 1414. In 1413 (1416?) on the invitation of the Persians (= Muslims) of Akhaltsikhe, Ķara Yūsuf invaded this region and laid the country waste (Thomas of Metsopʿ; cf. Nève, *loc. cit.*, 96; Brosset, *Add.*, i, 399). The Chronicle confesses that down to the accession of Alexander (1413-43) "no consoler arose from anywhere". The king gradually drove out the invaders, restored the cathedral of Sveti Tskhoveli (at Mtskheta) and repaired the fortresses. The Georgian envoys who greeted Shāh-Rukh in 823/1420 at Ķara-bāgh (cf. Mīrkhʷānd, in Defrémery, *op. cit.*, 251) must have been sent by Alexander, and when in 841/1437 Shāh-Rukh arrived in Somkhetia (cf. above), Alexander sent him rich gifts, after which the son of Tīmūr left Georgia. In 1444/848 the Ķara-Ķoyunlu Djihān-shāh made a raid to Akhal-tsikhe (cf. Brosset, i, 683; according to Thomas of Metsopʿ, Djihān-shāh took Tiflis in 1440; cf. Nève, 149).

The partition of Georgia. At this period, Georgian tradition becomes exceedingly difficult to unravel (Brosset, i, 679-89). The history of Vakhusht, which continues and corrects the Chronicle and agrees better with the statements of the Muslim historians, begins with the reign of Constantine III (1469-1505), during which Georgia was divided into three main kingdoms (Brosset, ii/1, 11-18, 147, 208, 249): Kartli, with capital Tiflis; Imereti, with capital Kutais; and Kakheti, with capital at Gremi (Persian Girīm) and later at Tʿelav. In addition, the *atābeg* of Samtskhe (with capital Akhal-tsikhe) rebelled and founded the independent principality of Santabago (consisting of Samtskhe, on the upper course of the Kur, and of Klardjetʿia on the Čʿorokh), the princes of which from Manučar III = Ṣafar-pasha (1625) had become Muslims (Brosset, ii, 228). A number of local princes also became independent of Imereti (the Guriels of Guria, the Dadians of Mingrelia, and the Gelovani of the Svans; cf. ABKHĀZ). In Kartli also, Constantine III's reign was disturbed by the invasion of Bagrat II of Imereti.

The Aķ-Ķoyunlu. In this period Uzun Ḥasan comes on the stage. According to Münedjdjim-bashī, iii, 160, he went to Georgia for the first time in 871/1466, when he liberated the Muslim prisoners and took the fortress of Čemākār (?). Civil complications prevented him taking Akhal-tsikhe, but he returned to the attack in 877/1472. King Bakzātī (read: Bagrat II of Imereti) was dethroned (*ķahr*) and 30,000 prisoners taken from Georgia. According to Vakhusht's version, Tiflis was surrendered to Uzun Ḥasan by Constantine, evidently to prevent Bagrat getting it. Uzun Ḥasan left a garrison in Tiflis but entrusted its government to Constantine (cf. Brosset, ii, 13, 25). The *Taʾrīkh-i Amīnī*, however, calls the governor (*iyālat*) left by Uzun Ḥasan, Ṣūfī Khalīl Beg, who stayed there till the death of Uzun Ḥasan in 882/1478, when the Georgians re-occupied the town.

Sulṭān Yaʿķūb Aķ-Ķoyunlu invaded Samtskhe in the autumn of 891/1486 to chastise the *Atābeg* Ķvarķvare. In the next year, Yaʿķūb sent Ṣūfī Khalīl Beg to conquer Georgia. The construction of the forts of Aghdja-ķalʿa and Kaozani was begun by the Turkomans on the lower course of the Debeda (Borčala) at the place which commands the approaches to Georgia from the south (cf. the *Geography of Vakhusht*). Kustāndīl (Constantine III) withdrew from Tiflis, Ṣūfī Khalīl began the siege with the help of reinforcements which arrived in the winter; he took first of all the fortress of Kudjīr (Kodjori, south of Tiflis). In the fighting around Tiflis, the Muslims suffered heavily but finally Walī aghā eshikči-aghasī took the town (3 Rabīʿ I 894/4 February 1489) (cf. the unpublished history of the reign of Yaʿķūb, *Taʾrīkh-i Amīnī*, MS. Bibl. Nat. Paris, 101, fols. 101a-5a and 155a-9a). The Chronicle (Brosset, ii, 326-7), which confirms many of the details, denies however that Tiflis was taken and adds that the people of the fief of Sabaratʿiano (called Barāt-ili by the Muslims) on the Alget inflicted a defeat on the Turkomans.

The Ṣafawids. In 907/1501 a detachment of Ismāʿīl's forces under the command of Khādim-Beg invaded Georgia (*Shāhinshāh-nāma*, quoted by Dorn). The invasion by Dīw Sulṭān in 926/1520 was stopped by the embassy of Ramaz, son of Dawid VIII, to Ismāʿīl I (cf. *Ḥabīb al-siyar*, Bombay, iii, *djuzʾ* 4, 92). In 929/1522-3 the founder of the Ṣafawid dynasty seized Aghdja-ķalʿa and by making certain promises obtained the surrender of the citadel of Tiflis; he desecrated the churches and built a mosque "at the corner of the bridge"; cf. Vakhusht, in Brosset, ii/1, 23 (the mosque is still standing on the right bank).

Iskandar Munshī mentions four expeditions on a large scale sent by Shāh Ṭahmāsp against Georgia. In 947/1540 Ṭahmāsp seized Tiflis, the governor of which (for Luarsab I) submitted to the Persians and became a Muslim. Next, the fortress of Bartīs (? Birtvis) was taken (*ʿĀlam-ārā*, Tehran 1314, 63). The second time was in 193/1546 when the Georgian princes came to pay homage to Ṭahmāsp at Shūragel (near Gümri = Alexandropol = Leninakan). The third expedition in 958/1551 was sent from Shakkī on the appeal of the *atābeg* Kay Khusraw, son of Ķurķura (Ķwarķware) who complained of the injuries done him by Luarsab (Iskandar Munshī writes Lawārṣāb, but the name is Iranian: Luhrāsp; cf. *Mirʾāt al-buldān*).

According to Iskandar Munshī, *ʿĀlam-ārā*, 65, by the Turco-Persian peace of 961/1553 the territories of Masķ (Meskhi = Samtskhe), of Kārtīl (Kartli) and of Kākhit were allotted to Shāh Ṭamhāsp, while Sulṭān Sulaymān received those of Bashī-ačuk ("with head uncovered", a nickname of the king of Imereti), of Dādiyān and of Gūriyān (Guria) as far as Trebizond and Trablus (Tire-boli). Luarsab I, however, continued to worry Tiflis. This provoked the fourth expedition. Barāt-ili (Sabaratʿiano), Gori and Ateni were occupied and the king himself fel in battle. Vakhasht dates the four expeditions to 1536, 1548, 1553 and 1558 respectively. Brosset, ii/1, 452, considers these very probable as they coincide very well

with the visissitudes of the Turco-Persian war.

King Swimon I, son of the indomitable Luarsab, had a troubled reign (1558-1600). He was defeated by the Persians and replaced by this brother Dawid (Dāwūd Khān), who purchased the throne at the price of apostasy. Swimon was imprisoned in Alamūt, from where he was released by Ismāʿīl II (984/1576-7) to checkmate the activity of the Ottomans.

Ottoman domination 986-1011/1578-1603. In 986/1578, during the reign of the weak Shāh Khudābanda, the Ottomans under Muṣṭafā Lala Pasha penetrated into Georgia via Samtskhe, and in August seized Tiflis, from which Dāwūd Khān had fled. The Turks put a garrison of 200 men with 100 guns in Tiflis. Muḥammad, son of Ferhād-Pasha, was given the *sandjak* (*pashalik*?) of Tiflis (von Hammer, *GOR*², ii, 483). Two churches were turned into mosques. In October, Gori received a Turkish garrison and was given as a *sandjak* to Swimon. When Muṣṭafā Pāshā returned to Erzerum, Imām Ḳulī Khān, son of the Shamkhal slain by Özdemir-Pasha, and Swimon laid siege to Tiflis. Supplies were brought to the garrison by Ḥasan Pasha (*ibid*., 489), but the struggle around the town continued. In 1580 the new *serʿasker* Sinān Pasha arrived in Tiflis and appointed as *Beglerbeg* a son of Luarsab who had adopted Islam under the name of Yūsuf (?). Swimon made advances to the Turks which were not accepted. In Radjab 990/August 1582 Muḥammad Bey left Erzerum to bring supplies to Tiflis, but was defeated at Gori by the Persians and Georgians. Ferhād Pasha put himself at the head of a new expedition (Dhu 'l-Ḳaʿda 990/December 1582) intended to strengthen the towns held by the Ottomans. In 992/1584, Riḍwān Pasha left for Tiflis. Dāwūd Khān on further reflection went over to the Turks. Swimon attacked Riḍwān but without success. Ferhād Pasha's Janissaries mutinied at Akhal-kalaki, which forced him to retire. After the campaign of 993/1585 against Tabrīz [*q.v.*], the Ottomans obtained from Persia the cession of Ādjarbāydjān and of Transcaucasia including Georgia (treaty of 25 Djumādā I 999/March 21, 1590); cf. the *Chronicle of the Psalter of Meshki* (1559-87) in Takaishvili, *op. cit.*, 183-214; von Hammer, ii, 481-97 (Brosset has given an annotated translation, ii/1, 411-19). The principal source used by von Hammer is the *Nuṣret-nāma* of ʿAlī (Jan. 1578-Jan. 1580). On the other Turkish sources, cf. Babinger, *GOW*, 117, 181. Soon after the accession of Muḥammad III (1003/1595), Swimon was taken in a skirmish and sent to Istanbul, where he died in 1600. Ottoman rule, more or less undisturbed, lasted from 999/1591 till 15 Djumādā I 1012/21 October 1603 when Tiflis was retaken by Shāh ʿAbbās I. The Turco-Persian treaty of 1021/1612 re-established the situation as it had been under Sulṭān Selīm (918-26/1512-20).

Shāh ʿAbbās I and the Muslim Kings. The worst misfortunes fell upon Georgia (and especially on Kakheti) in the region of this monarch. Although Giorgi of Kartli and Alexander of Kakheti had fought under his banner at the siege of Eriwān in 1602, ʿAbbās after his victory took Lore from Georgia. He married the sister of Luarsab II (1605-16) but brought the latter to Persia and had him strangled at Gulāb-ḳalʿa. In 1025/1616 ʿAbbās came in person to Georgia and granted Kartli to the Muslim Bagrat VI (1616-19). He then punished Kakheti. According to the official history of the reign, *ʿĀlamārā*, 635, the number of those put to death was 60-70,000 and the number of young prisoners of both sexes 100,000-130,000: "since the beginning of Islam no such events have taken place under any king". In 1033/1623 Karčiḳa-Khān on being sent to Georgia called to the colours 10,000 men of Kakheti and instead of leading them against Imereti had them massacred "as if at a battue" (*shikārī-wār*; *ʿĀlam-ārā*, 719). Exasperated by such treachery, the *mourav* ("governor of lower rank"; Brosset, ii/1, 148; the Persians write *mihraw*) Giorgi Saakadze (a Muslim and till then a faithful servant of the Shāh) raised a rebellion in Kartli which the Persians did not overcome till 1035/1626 (Iosselian, *Žizn mourawa G. Saakadze*, Tiflis 1848; Brosset, ii/1, 53-9, 489-97). In spite of all these disasters, the part played by Georgians in the life of Persia becomes more and more important, and Shāh Ṣafī, successor to ʿAbbās I, owed his throne to the support of Khusraw Mīrzā, brother of the King Bagrat who was *darugha* of Iṣfahān.

When Swimon II perished in the civil war (1629), Tʿeimuraz I of Kakheti (1605-64, a very troubled reign marked by all kinds of misfortunes; his mother Khetʿewan was put to death at Shīrāz in 1624; Brosset, ii/1, 167) came to Kartli, where he reigned from 1629 to 1664, after which the Kay Khusraw already mentioned arrived from Persia and set himself up in Tiflis under the name of Rostom (1634-58). The old King, brought up in Persia, took the Persian title of *ḳullar-aghasi* and ordered his court in the Persian fashion. Persian garrisons were installed at Gori and Suram. The Georgian prisoners who had become converts to Islam returned from Persia; Persian manners and customs became the fashion. On the other hand, as if to celebrate the fusion of the two cultures, Rostom celebrated his marriage both in the mosque and in the church, and restored the cathedral of Mtskheta, etc.

In 1045/1636 Murād IV took Erīwān and by the treaty of 1049/1639 Persia renounced her claims to Ḳars and Akhal-tsikhe (*Taʾrīkh-i Naʿīmā*, 686); according to Vakhusht (Brosset, ii/1, 68), the Sulṭān received Imereti and Saatbago and the Shāh kept Kartli and Kakheti.

Vakhtang (to Muslims, Shāh Nawāz I), adopted son of Rostom, succeeded him (1658-76). The Persophile policy continued. Shāh ʿAbbās II (1052-77/1642-66) married the daughter of Shāh Nawāz. The latter, although a Muslim, favoured the Christian religion and even restored the confession and the communion of which the people "had been ashamed" in the reign of Rostom (Brosset, *ibid*., 79). In order to give more support to Shāh Nawāz, the Muslim tribes of Ādharbāydjān and Ḳarabāgh (15,000 Djawānshīrī and Bayats) were settled in Kakheti (cf. the *History of Shāh ʿAbbās II* by Muḥammad Ṭāhir Waḥīd, in Dorn, 109, 111 = Brosset, ii/1, 503-4). Shāh Nawāz fought in Imereti, but when he set his son on the throne there, the Shāh restored the situation as guaranteed by the treaty of 1049/1639.

Giorgi XI (Shāh Nawāz II) received investiture from Shāh Sulaymān. In 1688 he fell a victim to his own intrigues in Kakheti and the Shāh replaced him by Erekle I (1688-91, 1695-1703). This King, who had been brought up in Russia, became a convert to Islam under the name of Naẓar ʿAlī Khān.

The Afghān Invasion of Persia. When the Balūč and the Afghāns began to disturb eastern Persia, King Giorgi with a body of Georgians was sent against them by Shāh Ḥusayn. He restored order in Ḳandahār, but in 1121/1709 was treacherously slain by Mīr Ways [cf. AFGHĀNISTĀN. v. History (2)], who then defeated the new Georgian forces led by Giorgi's successor, Kay Khusraw (1709-11). These events paved the way to the Afghān invasion of Persia.

Vakhtang (governor of Kartli 1703-11; king,

1711-24 with interruptions) was at first a Christian. The Persian garrisons with the connivance of certain Georgian elements went in for slave-trading. Vakhtang tried to put down this traffic (Brosset, ii/1, 97, 101, 105) and in general "humbled the Muslims, especially those who garrisoned the citadel of Tiflis". Between 1714 and 1716 he was replaced by a fervent Muslim Iese (= ʿAlī Ḳulī Khān) and only regained the throne at the price of professing Islam.

After the decisive victory of the Afghāns at Gūnābād, near Iṣfahān (1134/1722), Shāh Ḥusayn sought help from Vakhtang, but in November 1721 the latter had offered his services to Russia (Brosset, ii/1, 117). Peter the Great, who reached Darband on 23 August 1722 had to return at once to Russia. On the other hand, the King of Kakheti Muḥammad-Ḳulī Khān (Constantine III) took the field on the side of the Lezgis against Vakhtang and in 1723 took Tiflis, which was plundered for three days.

The second Ottoman occupation (1135-47/1723-34). The troubles in Persia and the Russian advance disturbed Turkey. War against the Shīʿīs was declared permitted. In Ramaḍān 1135/June 1723 the *serʿasker* Ibrāhīm Pasha, who had been negotiating with Vakhtang, installed in Tiflis the latter's son Bakar (in Persian Shāh Nawāz and now given in Turkish the name Ibrāhīm Pāshā). The Janissaries occupied the citadel. Bakar soon rebelled, but the Turks sent to Tiflis reinforcements under Iese, uncle of Bakar (who now assumed the name of ʿAbd Allāh). In the meanwhile the Russo-Persian treaty of 12 September 1723, was signed by which the provinces on the Caspian were ceded to Russia. As a counterpoise, through the good offices of the French ambassador, a Russo-Turkish treaty was concluded at Constantinople on 12 June 1724: Russia kept Dāghistān and the narrow strip of litoral; Turkey obtained all Transcaucasia as far as Shamākha, including the Georgian territory (von Hammer, *GOR*, iv, 206-14. The Ottoman historian of these events is Čelebi-zāde; on the other sources, cf. Babinger, *GOW*, 289; Nāmī, *Feth-nāme der ḥaḳḳ-i Gürdjistān*).

The deposed King Vakhtang went to Russia with a retinue of 1,400 (August 1724). The Turks, having taken possession of Kartli, took a census and levied taxes on the inhabitants. The stay at Tiflis of the noble ʿOthmān Topal Pasha alone has left a pleasing memory among the Georgians (Brosset, ii/1, 129). Iese did not bear the title of king, and the real power passed to Isḥāḳ Pasha, a hereditary ruler of Akhaltsikhe established at Tiflis. After the death of Iese (1727), Isḥāḳ Pasha was appointed governor of all Georgia (Brosset, ii/1, 236). In 1728 he divided Kartli among the feudal lords (*mtʿavar*) whose dissensions made it easy for him to control them. The Lezgis continued to ravage Georgia (cf. Brosset, *l.c.*; von Hammer, iv, 223, 231, 235, 280, 313).

Nādir Shāh. In 1143/1730-1 after a war in which he won little glory, Shāh Ṭahmāsp recognised the Araxes as the frontier between Persia and Turkey (Mahdī Khān, *Taʾrīkh-i Nādirī*, Tabrīz 1284, 90 = tr. Jones, i, 141; von Hammer, iv, 227 dates the peace to 6 February 1732). Nādir dissatisfied, dethroned Ṭahmāsp and resumed the conquest of Transcaucasia. While he was operating against Dāghistān (1147/autumn of 1734) Isḥāḳ Pasha of Tiflis set out with an army to the help of Gandja. Tʿeimuraz, son of Naẓar ʿAlī Khān (= Erekle I), and his nephew ʿAlī Mīrzā = Alexander (son of Imām Ḳulī = Dawid III) attacked Isḥāḳ Pasha and forced him to shut himself up in the citadel of Tiflis. Nādir, highly gratified, gave presents to the two princes (*ibid.*, 114 = Jones, i, 200). At the siege of Gandja, Nādir ordered Ṣafī Khān Bughārʾirī to lay siege to Tiflis with the help of the Georgian nobles (*mawrāvān wa-aznāwurān*; *ibid.*, 116 = Jones, 205).

When ʿAbd Allāh Pasha was defeated at Baghaward near Erīwān, Isḥāḳ Pasha surrendered the citadel of Tiflis on 22 Rabīʿ I, 1147 = 17 Sept. 1734 (*ibid.*, 123). Nādir summoned the nobles (*tāwādān wa-aznāwurān*) of Kartli and Kakheti among whom Ṭahmūrath (= Tʿeimuraz) had most importance and privileges. Nādir however appointed as *wālī* of Kartli and Kakheti, ʿAlī Mīrzā, because he was a Muslim, and his brother Muḥammad Mīrzā (= Leon) had fallen in battle against ʿOthmān Pasha. Ṭahmūrath was allowed to go to Kakheti to bring his family (*kūč*) to Tiflis. Now he was a "man of the sword and rapid decision"; he fled to the mountoins of "Ḳarakalkhān (Pshaw), Rūs (Ruʾis, west of Gori?) and Čerkes". Nādir sent his troops in pursuit of him, and arrived himself at Tiflis on 29 Djumādā I, where he distributed punishments and rewards. 6,000 Georgian families of the Ḳayḳul (Abots) were transported to Khurāsān (*ibid.*, 124 = Jones, 219). In 1149/1736 Ṣafī Khān captured Tʿeimuraz and sent him to Persia. At the beginning fo the Indian campaign, Nādir released Tʿeimuraz but kept his young son Erekle with him.

In 1156/end of 1743, Ṭahmūrath Khān captured the pretender Sām Mīrzā and later (1157/1744) along with ʿAlī Khān Ḳilidja (? the Georgian sources call him Khandjal, Ḳizilidjali), new *beglerbegi* of Tiflis, defeated near Ruʾis on the Aragwi Yūsuf Pasha of Akhaltsikhe, who by order of the Porte went to Daghistān to work for another pretender Ṣafī Mīrzā. Arriving at Gori, Nādir, as a reward for Ṭahmūrath's services, transferred him to Karli and gave Kakheti to his son Erekle (*ibid.*, 202 = Jones, ii, 164; cf. Brosset, ii/1, 77 (Papuna Orbeliani) and ii/2, 208 (Kherkheulidze).

In 1158/1745 Nādir levied an impost of 50,000 *tumans* on Georgia. Tʿeimuraz went to obtain a reduction, but on reaching Tabrīz he heard of the death of Nādir. The latter's successor was ʿAlī Ḳulī Khān, husband of Khetʿevan, daughter of Tʿeimuraz.

The Bagratids of Kakhetʿi. The period of troubles after the death of Nādir (1162/1749) and the reign of Karīm Khān, a prince of a peaceful disposition, whose influence did not extend north of the Araxes, secured a respite for Georgia. The opportunity was skilfully exploited by Tʿeimuraz (king of Kartli 1744-61) and by his son Erekle or Irakli II (king of Kakheti 1744-61; king of Kartli and Kakheti 1761-90). The reign of these Christian kings is one of the happiest periods in the history of Georgia. They conducted numerous expeditions into Transcaucasia. In 1752 the Afghān Āzād-Khān, a rival of the Zand dynasty, was defeated by Erekle near Erīwān and in 1760 captured at Ḳazakh and sent to Karīm-Khān. The Kurds of Erīwān were chastised in 1765, 1770 and 1780, and the Georgian troops pursued them over the district of Bāyazīd. Almost every year the Georgians drove back successfully the incursions of the raiding bands from Dāghistān (the most dangerous leader of whom was ʿUmar Khān Awar). Only the Khāns of Shakkī, Ḥādjdjī Čelebi and Agha Kishi (in 1752-3), ever succeeded in inflicting reverses on the Georgians.

In spite of all these success, the situation of Georgia was precarious, and in 1760 Tʿeimuraz went to Russia to seek assistance. But he only arrived a few days after the death of the Empress Elizabeth, and he himself died in St. Petersburg on the 8th/20th January 1762.

Erekle, becoming king of the united kingdoms, continued the policy of rapprochement with Russia. At the beginning of the Russo-Turkish war, a Russian force under the command of General Totleben arrived in Georgia (in 1769) and with Erekle marched against Akhal-tsikhe. The allies did not agree (cf. the letter from Catherine II to Voltaire of 4 December 1770) and the Russian troops returned to Russia in 1772. But, left alone, Erekle gained a considerable success at Aspindza and, with Solomon of Imereti, besieged Akhal-kalaki. Sulaymān Pasha of Akhal-tsikhe soon assumed the offensive. The Russo-Turkish treaty of Küčük-Ḳaynardja (1774 [q.v.]) brought no territorial change in the lands of Georgia. The Porte only renounced the tribute of youths and maidens and other levies (art. 23). But after the treaty, Sulaymān Pasha of Akhal-tsikhe had to send a representative to Istanbul. On the other hand, he renewed his appeals to St. Petersburg and asked that his kingdom should be united (*prisovokupleno*) to Russia (Tsagareli, *Gramoti*, No. 144). Russia gave an evasive answer, and it was not till 24 July 1783 that the treaty establishing a protectorate was signed. Russia guaranteed to Erekle his lands and left him full control of domestic policy, but the management of foreign affairs passed to Russia. A Russian force was sent to Tiflis but recalled in 1787.

The Ḳādjārs. During this period the Ḳādjārs had succeeded the Zands. In 1795 Agha Muḥammad Ḳādjār laid siege to Shūsha in Karabāgh and then turned against Tiflis, which was taken on 11 September 1795 and pillaged in dreadful fashion; cf. Brosset, ii/2, 260; Olivier, *Voyages en Orient*, iii, 78 (testimony of an Hungarian physician who was an eye-witness). The Persian invasion was followed by an invasion by Dāghistānis. In 1795 two Russian battalions arrived in Georgia; in March 1796, Russia declared war on Persia. But on Nov. 6/18, Catherine II died and her son Paul I at once recalled the Russian troops. Agha Muḥammad set out again for Transcaucasia, but was assassinated near Shūsha (15 June 1797). The aged King Erekle died on 12/23 January 1798.

His son Giorgi XII succeeded him. Fatḥ ʿAlī Ḳādjār was occupied in dealing with his rivals. From Ḳars, Giorgi sent a force of 2,000 Lezgis under the command of his two sons; dynastic intrigues in the King's family rendered his position very difficult. In 1799 he sent an embassy to St. Petersburg, the object of which was as follows: Georgia should be placed not under a protectorate, but under the full power of the emperor, like the other provinces of Russia. On the other hand, the throne was to be guaranteed to the dynasty.

On 18 December 1800, Paul I signed the manifesto of annexation (*prisoyedineniye*) of Georgia, which was proclaimed on 18 January 1801 after the death of Giorgi on 28 December 1800. On 11 March, Paul I was put to death. In April the Georgian envoys begged the emperor Alexander I to appoint a Georgian prince as governor with the title of imperial lieutenant and king of Georgia. On 12 September 1801 Alexander I, alleging the impossibility of re-establishing the old government under a protectorate, confirmed the manifesto of Paul I and affirmed that Kartli-Kakheti were henceforth to be an integral part of the Imperial Russian dominions. The remaining members of the old Georgian ruling house were exiled forcibly to Russia.

Georgia under Russian rule. Russian possession of Georgia facilitated the extension of Russian power in Transcaucasia. The Commander of the Caucasus, Prince Tsitsianov (himself the scion of the noble Georgian family of Tsitsishvili and governor 1802-6), had to preserve Russia's latest acquisition against several open enemies, including the Lesghian tribesmen of Muslim Dāghistān and the Muslim khāns of Bakū, Shakkī and Gandja in Ādharbāydjān, nominal vassals of Persia. He now carried the war into the enemy's camp and in January 1804 captured Gandja, killing its ruler Djawād Khān, who had helped the Ḳādjār Agha Muḥammad to invade Georgia and sack Tiflis in 1795 (see above); Gandja [q.v.] was now renamed Elizavetapol in honour of the Tsar Alexander I's wife Elizabeth. But when Tsitsianov marched on Bakū in January 1806, he was killed in battle by local Persian troops, although a further expedition later in that year lead to the capture of both Bakū and Darband. Pressure was also exerted on the Ottomans, and the Black Sea port of Poti captured in 1809, Sukhum-Ḳalʿa in Abkhāzia in 1810 and the strategic centre of Akhalkalaki in south-western Georgia in 1811; it was only now, in 1810, that the local ruler of Imereti submitted to the Russians after strenuous fighting.

Meanwhile, Russian rule in Georgia had speedily become hated, and a mass revolt of the Georgians came in 1812, when a Bagratid prince was proclaimed King of Georgia, before the outbreak was suppressed. However, a general peace in Transcaucasia was now made between the exhausted warring parties. The Treaty of Bucharest of 1812 restored Poti and Akhalkalaki to the Ottomans. The Treaty of Finkenstein of 1807, by which the Emperor Napoleon Bonaparte had recognised Persia's rights over Georgia, had never had any practical effect, and in the Gulistān Treaty of 1813 Russia was now confirmed in possession of Georgia, together with Daghistān and the Muslim khānates of Ḳarabāgh, Gandja, Shakkī, Shirwān, Darband, Bakū and Ḳuba [q.vv.]. Naturally, the Persians were unreconciled to these serious losses of ancestrally-controlled territories in the eastern Caucasus, and in 1826, taking advantage of the death of Alexander I and the Decembrist conspiracy in St. Petersburg, Persia invaded Georgia and Ḳarabāgh. The attack was nevertheless repulsed by General Paskevich, and by the Treaty of Turkmānčay in 1828, the Russian frontier was firmly fixed at the Araxes and Persian influences in the Caucasus finally eliminated. An important consequence of this was that Persia was now cut off from direct contact with the Muslims of Dāghistān. Paskevich now turned to deal with Turkey in the west, aiming at the reconquest of the former Georgian province of Samtskhe, and Russian troops penetrated as far as Erzerum; the Treaty of Adrianople in 1829 handed Samtskhe over to Russia and also the Black Sea ports of Poti and Anapa, thereby cutting the Ottomans off from direct access to Circassia and the north-western Caucasus.

Muslim alarm at Russian aggrandisement in the Caucasus showed itself in the outbreak in 1829 in the eastern Caucasus of the *Murīd* movement under the *Imāms* Ḳāḍī Mollā and then Shamil [q.v.], who for a quarter of a century kept large numbers of Russian troops tied down in the region. Rebellions against the Russians also broke out in the western Caucasus, in Circassia and Abkhāzia, with Turkish and British encouragement. During the Crimean War (1854-6), Georgia was the base for Russian attacks on Turkey, leading to the capture of Ḳārṣ in 1855; meanwhile, a Turkish army under ʿÖmer Pasha landed in Abkhāzia and invaded Mingrelia.

Internally, Georgia stagnated in the first decades

of Russian rule, an especial cause of resentment being the suppresion in 1811 of the independent Georgian Church, as a focus for national Georgian loyalties, in defiance of the guarantees of the 1783 Russo-Georgian Treaty, and its forcible incorporation into the Russian Orthodox Church, with the Catholicos-Patriarch Antoni II exiled to St. Petersburg. The Russian administration cut down the feudal rights of the Georgian nobility, and taxation for the numerous wars impoverished the land. In 1830-2 Georgian conspirators, grouped round such figures as Prince Alexander Bagration, an exile in Persia, made at last attempt to throw off Russian rule in Georgia; but when this failed, all hopes of a Bagratid restoration ended, and Georgia sank into what D. M. Lang has called "a mood of torpid acquiescence" for two or three decades. Only during the viceroyalty in Georgia of Count Michael Vorontsov (1845-54) did Georgia at last enjoy a measure of prosperity, educational and cultural encouragement and commercial development, with the beginnings of industrialisation in the Tiflis district as part of the distinct industrial revolution in Russia as a whole during Nicholas I's reign (1825-55). It was during Vorontsov's time that the doyen of modern Georgian studies in the west, Marie-Félicité Brosset (1802-80), visited Georgia and worked there under his encouragement. The old Georgian nobility suffered a general decline in this period of transition, accompanied by an increased disinclination on the part of the peasantry to endure their former subjugation. Outlying parts of Georgia, which had retained some autonomy, were now brought under direct Imperial rule. In 1857, the Regent of Mingrelia, Catherine Dadiani, was deposed, and in 1867 the youthful heir, Nicholas Dadiani, was compelled to cede his sovereign rights to Russia. The mountain region of Upper Svanetia was annexed by military force to the viceroyalty of the Caucasus. In Abkhāzia, a region half-Christian and half-Muslim, with the Muslims looking to the Ottomans for support, the ruling prince Michael Sharvashidze was deposed by force of arms in 1864, leading speedily to the final subjugation of the hitherto indomitable Circassians and the consequent emigration of some 600,000 Muslim Circassians to Ottoman territory in preference to living under Russian rule [see ČERKES]. In 1864 the serfs were liberated in Georgia, and those of Mingrelia, Abkhāzia and Svaneti in the following years, although the burden of redemption payments imposed on the former serfs meant that their emancipation was formal rather than real.

There was another period of enlightened rule under the Grand Duke Michael, Alexander II's brother, Viceroy of the Caucasus 1862-82, during whose tenure of power Russia recovered during the war with Turkey of 1877-8 substantial areas of ancient Georgian territory which had been under Ottoman control since the 16th century. By the abortive Treaty of San Stefano and then the Congress of Berlin (1878), Russia acquired the port of Batum and retained her conquests of the important fortresses of Ḳārṣ and Ardahān [*q.vv.*], commanding the routes into eastern Anatolia (these last two districts were not recovered by Turkey till 1920 and 1921 respectively). The latter years of the Grand Duke's governorship were however marked by the intensification of Pan-Slavist feeling which characterised Imperial policy at this time and which was ominous for the non-Russian minorities of the empire, seen e.g. in the banning of 1872 of the use of Georgian for instruction at the Tiflis Theological Seminary, the main centre for the training of the Georgian priesthood and a focus for Georgian nationalist and anti-Russian feeling (one of its future students was to be Joseph Djugashvili, the later Stalin). One aspect of the Georgian cultural reaction and re-awakening in these years was the appearance of anarchism and the Populist or Narodnik movement in Georgia from the 1870s onwards, together with the Marxist so-called "Third Group", one of whose leaders was Noe Zhordania, the future Menshevik and president of independent Georgia (1918-21). The ending of serfdom and the break-up of feudal estates in Georgia, and the growth of railway and oil-producing industries in Transcaucasia at places like Baku, Batum, Tiflis and Kutaisi, created propitious conditions for the spread of these movements, aimed in the first place at the Russian Imperial government (which was in fact by far the largest landowner in Georgia). The 1905 revolutionary period was preceded in 1902 by peasant unrest in Guria in southwestern Georgia, where holdings were especially fragmented, and in 1905 itself, the Georgian (Marxist) Social Democratic Party organised strikes and communes. Subsequent repression by Russian and Cossack troops drew the attention of the West to Georgia's claims as a nation, seen for instance in Britain by the formation through the efforts of the Georgian scholars Oliver and Marjory Wardrop of the Friends of Georgia Committee, which worked on lines parallel to those of E. G. Browne for the Persian Constitutionalists.

During the First World War, Georgian émigrés organised themselves in Central Europe, under German patronage, and in 1915 a Georgian Legion was formed to fight on the Black Sea coastal front. In the Russo-Turkish fighting in the western Caucasus, the Muslim Georgian Laz [*q.v.*] and Ačars supported the Ottomans, and Armenian irregulars the Russians. With the fall of the Tsarist government in April 1917, the Georgian Mensheviks assumed power, but the crumbling of the Imperial Army allowed Turkey to recover her occupied territory in eastern Anatolia and to advance on Transcaucasia, wreaking vengeance on the local Armenians in requital for Armenian slaughter of Muslims. The Muslims of Ādharbāydjān refused to continue fighting against Turkey, and now, cut off from Russia itself, Transcaucasia on 12 April 1918 declared itself an independent federative republic, comprising Christian Georgia and Armenia and Muslim Ādharbāydjān. The Ottomans still pressed for the retrocession of territory in Georgia lost to Russia in the 19th century, and had taken the offensive and occupied Batum. Centrifugal forces thus soon made the Transcaucasian Republic dissolve into its three component parts, and on 26 May 1918 an independent Georgian Republic, under German protection, was set up; peace was made between Georgia and Turkey in June, with Turkey regaining Batum, Ḳārṣ, Ardahan, Akhaltsikhe and Akhalkalaki. Hence from 1918 to 1921 a Menshevik or Social Democratic régime governed Georgia, headed by Zhordania, with a great upsurge of Georgian nationalism (Georgia's first university being opened at Tiflis in 1918) and hopes of the following of a peaceful policy of democratic socialism. After the Armistice of November 1918, British troops replaced the German ones in Georgia, with Oliver Wardrop as Chief British Commissioner to the three Transcaucasian republics, with his headquarters in Tiflis. On 27 January 1921 France and Britain recognised Georgia diplomatically as a sovereign state. However, the new state was under pressure, having to fight off Armenian claims to Georgian territory, the Kemālist Turkish forces to the south, and above all, the Bolsheviks. In February 1921 the Bolsheviks were

threatening Tiflis itself, and it fell after a heroic resistance on 25 February to a fearful sacking by the Red Army, Zhordania fleeing with his government by sea to Istanbul.

Georgia under the Soviets inevitably suffered from the recrudescence of Great Russian chauvinism and imperialism, the excesses of Russian troops provoking a guerilla resistance movement in Georgia akin to the Basmači movement [*q.v.*] in Central Asia, culminating in a general uprising in 1924, ruthlessly suppressed. For the next two decades or more, up to 1953, Georgia groaned under the repression of Stalin and his henchman Beria, himself a Mingrelian and who excercised dictatorial powers in Transcaucasia 1932-8. Until 1936, Georgia was deprived of its autonomy and became part of a Transcaucasian Federated SSR, of which Tiflis was the capital, but in that year it became the Georgian SSR, and now forms one of the constituent republics of the USSR and includes the Abkhaz and Adzhar Autonomous SSRs and the South Ossetian Autonomous Oblast, with a total area of 27,000 sq. miles/70,000 km².

According to figures from January 1970, the total population of the republic is 4,686,000, 48% of these being town dwellers and 52% rural, the main towns being Tiflis (pop. 907,000) and the much smaller centres of Kutaisi, Rustavi, Sukhum and Batum. Ethnically, the population is returned as being 67% Georgian, but with considerable minorities of Armenians, Russians, Azerbaijanis, Ossetians and Abkhazians (see *BSE*³, vii, 360-92). What proportion of all these may still be described as Muslim is unclear, but in 1921 the capital Tiflis had a fair number of Turks in its population, and in 1922, under Soviet rule, there was still being produced a local Turkish newspaper, *Yeñi fikir*, and a journal, *Dan yïldïzï* (see Mīrzā Bālā, *Ādharbāydjān türk maṭbūʿātï*, Baku 1922); but the 1922 census enumerated only 3,255 Azerbaijani Turks and 3,984 Persians, presumably all Muslims. The Azerbayjani Turks in Georgia are naturally to be found mainly in the extension of the Ādharbāydjān plain to the east and south-east of Tiflis, in such districts as Borčalï and Ḳarayazï, and they formed part of the Kazak-Shams al-Dīn tribal group (see Bala, *İA* art. *Gürcistan*).

ḲURḤ, AL-ḲURḤ, a town and district of mediaeval Islamic times in the northern Ḥidjāz, mentioned in early Islamic sources as of prime importance, but not now known under this name.

It seems very likely that the place had a role in the pre-Islamic history of the Wādī 'l-Ḳurā [*q.v.*], where the settlement of later Ḳurḥ was situated, although the principal towns then were Dēdān (modern al-Khurayba) and al-Ḥidjr [*q.v.*] or Madāʾin Ṣāliḥ (modern al-ʿUlā). According to Yāḳūt, *Buldān*, Beirut 1374-6/1955-7, iv, 320-1, and al-Samhūdī, *Wafāʾ al-wafāʾ*, ed. M. M. ʿAbd al-Ḥamīd, Beirut 1393/1971, iv, 1288, there was a well-known fair at Ḳurḥ in the Djāhiliyya, and popular tradition located there the destruction of the people of Hūd, sc. ʿĀd [*q.v.*] As the culture of Dēdān and Liḥyān decayed in the northern Ḥidjāz, Ḳurḥ seems to have become the main settlement of the Wādī 'l-Ḳurā around the time of the coming of Islam, and *mukhaḍram* poets like Ibn al-Muḳbil [*q.v.* in Suppl.] and Umayya b. Abi 'l-Ṣalt mention it. The tribe of ʿUdhra [*q.v.*] lived in the district; the Prophet prayed in Ḳurḥ, and a mosque was built there (see Madjd al-Dīn Ibn al-Athīr, *al-Nihāya fī gharīb al-ḥadīth wa 'l-athar*, ed. M. M. al-Ṭannāḥī, Cairo 1383/1963, iv, 36, and H. Lammens, *L'ancienne frontière entre la Syrie et le Ḥiǧāz, notes de géographie historique*, in *L'Arabie occidentale avant l'Hégire*, Beirut 1928, 304-5).

Following a well-known process in Islamic geographical nomenclature, the name Ḳurḥ was applied both to the town, the administrative and commercial centre of the Wādī 'l-Ḳurā, and to the surrounding district, in effect, the Wādī 'l-Ḳurā itself. Hence al-Muḳaddasī, 69, says that Ḳurḥ is one of the four regions (*nawāḥī*) of Arabia and also one of the towns of the Ḥidjāz; al-Bakrī, *Muʿdjam mā 'staʿdjam*, iii, 1056, describes it as the *ḳaṣaba* of the Wādī 'l-Ḳurā, with a variant form of the name as al-Ḳurāḥ (*loc. cit.* and i, 247). It obviously flourished highly at this time. Al-Muḳaddasī, 83-4, says that it was populous and much frequented by traders, and had many amenities; it had a strong citadel, a defensive ditch and walls; and Jews were a decisive element (*al-ghālib*) there (cf. Lammens, *op. cit.*, 307), though elsewhere (96) he states that Ḳurḥ (here meaning the district) was essentially Sunnī in faith.

Where exactly, then, was the town of Ḳurḥ located, since the toponym is not in use today, although that of al-Ḥidjr (*pace* Vidal, in *EI*² s.v.) does in fact survive? C. M. Doughty (1876-7) enquired among the local people, but could find no memory of it, although he was shown a ruined site "el-Mubbiát" six miles south of al-ʿUlā; he nevertheless thought that the mediaeval Ḳurḥ lay much further south towards Medina (*Travels in Arabia deserta*, London 1926, i, 161-2). Subsequently, A. Musil definitely identified Ḳurḥ with al-ʿUlā (*The northern Heǧâz, a topographical itinerary*, New York 1926, 295; but elsewhere, 217-18, n. 52, he placed it, more correctly, to the south of al-ʿUlā). It has now been convincingly argued by ʿAbd Allāh al-Naṣīf, himself a native of the region, that the site of mediaeval Ḳurḥ should indeed be located at the present-day ruins known

locally as al-Mabyāt/al-Mābyāt (cf. *mabīt* "place where one halts for the night") along the main route down the Wādī 'l-Ḳurā to Medina, in an extensive plain, a spot well-fitted to be a flourishing commercial centre and market and a convenient staging-post, 12 miles/18 km. south of al-ʿUlā (al-Naṣīf, *The identification of the wādi 'l-Qurā and the ancient Islamic site of al-Mibyāt*, in *Arabian studies*, v [1979], 1-19). Jaussen and Savignac saw ruins there, and in 1968 the expedition of P. J. Parr, G. Lankester Harding and J. E. Dayton made a surface survey of the site (see *Preliminary survey in N.W. Arabia*, 1968, in *Bull. of the Inst. of Archaeology*, London, viii-ix [1970], 199-204, section on "Maʿabiyat"). Excavation of the site may well settle the question finally.

Bibliography: given in the article, but see also Abdullah al-Wohaibi, *The Northern Hijaz in the writings of the Arab geographers 800-1150*, Beirut 1973, 220-1. (C. E. Bosworth)

ḲURHUB b. Djābir al-Khuzāʿī, the ardent eulogist of the Zīrid princes of al-Ḳayrawān and of their governors, the Banū Abi 'l-ʿArab, and a virulent and shameless satirist. He dominated with great verve the poetic contests stirred up by his strong personality and his biting aggressiveness in the literary sessions of al-Ḳayrawān, owing his success as much to his lack of scruple as to the swiftness of his replies and his improvisations.

However, Ḳurhub remains a poet with a ready talent able to adapt himself to the thematic and formal exigencies of the genres employed by him. Variety of usage of verse-forms, suppleness of verses and purity of language combined in due course to place him in the élite of the poets of Ifrīḳiya during the Zīrid period. He died at al-Ḳayrawān in 420/1029.

ḲŪRILTĀY, Arabic orthography of Mongol *ḳurilta* from *ḳuri-* "to collect, gather together", an assembly of the Mongol princes summoned to discuss and deal with some important question such as the election of a new khān. Djuwaynī describes the *ḳūriltāy*s that preceded the accession of Ögedey, Güyük and Möngke. John de Plano Carpini was present in person at the *ḳūriltāy* held in the Khangay mountains at which Güyük was elected and enthroned. The institution still survived in the time of Tīmūr, when however it seems to have become little more than a parade. The very word has disappeared from the modern Mongolian language; it has been resuscitated by the Turks in the form *kurultay* and used in the sense of "assembly, congress".

Hazai and P. Zieme, Berlin 1974, 145-51 (147); V. V. Barthold, *Four studies in the history of Central Asia*, tr. V. and T. Minorsky, Leiden 1958, 27; G. Doerfer, *Türkische und Mongolische Elemente im Neupersischen*, i, Wiesbaden 1963, 435-7 (No. 305). (J. A. Boyle)

KÜRIN, designation used by the Ottomans in the 10th/16th century and by the Russians in the 18th-19th centuries for the Lezghins [*q.v.*]. Kürin (Russian: Kürinskiy yazïk) is also the former designation for the Lezghin language, and appears as such in the 1926 Soviet census. (R. Wixman)

KÜRIN KHĀNATE [see lezghin].

ḲŪRIYA, Ḳawriya, the Arabic name for the modern town of Coria in Spain, *municipio* of the province of Cáceres on the banks of the Alagón River. It was the Caurium of the Romans, who built its walls, as was noted by al-Ḥimyarī ("strong walls of ancient construction"). Al-Idrīsī states that Coria belonged to the *iḳlīm* of al-Ḳaṣr, and was then "an attractive, well-built and spacious town, whose surrounding countryside was fertile and highly productive of fruit". Al-Iṣṭakhrī's itinerary (43-7) places it at 12 days' journey from Cordova.

When the Muslims withdrew to the line of Coria, after the famines of the post-136/753 period (*Akhbār madjmūʿa*, 62/67), the town was thus left in the frontier zone, and must have been one of the main centres of the Berber settlement of the north-west of the peninsula. There were frequent rebellions there. In 170/786 ʿAbd al-Raḥmān I attacked there the rebel Abu 'l-Aswad Muḥammad b. Yūsuf al-Fihrī (*ibid.*, 116/106). Muḥammad b. Tādjīt al-Maṣmūdī rebelled there during the amīrate of Muḥammad I, and in alliance with Ibn Marwān al-Djillīḳī made Coria one of his main centres (Ibn Ḥazm, *Djamhara*, ed. Lévi-Provençal, 466; Ibn Khaldūn, *ʿIbar*, tr. de Slane, iv, 289). It is in this region and around this same period that the Christian sources place the revolt of Zeith/Zeiti (*Cron. Alfonso III*, Valencia 1961, 62-3). The town became much fought over; it was taken by Ordoño I in 860, but recaptured by the Muslims in 862. Alfonso III besieged it without success in 868, but ended by taking it some years later. Yaḥyā al-Tudjībī, sent by al-Ḥakam II, attacked the King of Navarre and the Count of Castile near Coria (Maḳḳarī, *Analectes*, i, 248). Al-Manṣūr [*q.v.*] passed by Coria on his route into the Christian territories during his campaign of 387/997. The town was taken by Alfonso VI (472/1079), and he fled there after the defeat of al-Zallāḳa [*q.v.*]. Al-Mutawakkil b. al-Afṭas mourned the loss of Coria in a letter to Yūsuf b. Tāshfīn (*al-Ḥulal al-mawshiyya*, ed. Allouche, 23). It was occupied by the Almoravids in 513/1119-20, but definitively taken by Alfonso VII in 1142.

ḲURḲŪB, a town in Khūzistān, on the road from Wāsiṭ to Sūs (Susa). The statments regarding distances given by the Arab geographers were collected and arranged in P. Schwarz, *Iran im Mittelalter nach den arab. Geographen*, 1921, iv, 396 ff.; cf. also 431. The town was noted for its carpets; there was also a state *ṭirāz* [*q.v.*] manufacture there. A material called *sūsandjird* was made there, cf. de Goeje's glossary in *BGA* iv, s.v. Al-Iṣṭakhrī and Ibn Ḥawḳal say that the *sūsandjird* of Fasā [*q.v.*] was better than that of Ḳurḳūb; the latter was a mixture of silk and cotton, while in the former wool was used; cf. on the textiles of Ḳurḳūb, R. B. Serjeant, *Islamic textiles, material for a history up to the Mongol con-*

quest, Beirut 1972, 45, and J. Karabaček, *Die persische Nadelmalerei Susanschird*, Leipzig 1881.

(M. Plessner)

ḲURRĀʾ. Political organisation. The term *ḳurrāʾ*, sing. *ḳāriʾ* (A.), occurs in Arabic historiography referring to a group of ʿIrāḳians rising against ʿUthmān and later on against ʿAlī, after he had accepted the arbitration. In European research, *ḳurrāʾ* has been usually rendered as "reciters of the Ḳurʾān" (*ḳurrāʾ* < *ḳ-r-ʾ* "to recite").

Brünnow was the first historian to try to assess the role of the *ḳurrāʾ* as an independent group acting within a heterogeneous Khāridjite [*q.v.*] movement. Brünnow's results were partly rejected by Wellhausen, who held that the *ḳurrāʾ* were not an autonomous movement which was merged in Khāridjism at a certain date. He claimed that the *ḳurrāʾ* had been in close connection with the learned *fuḳahāʾ*, forming a wider circle of pious men around those *fuḳahāʾ*, the supposed nucleus of men of religious learning. It was the *ḳurrāʾ*'s religious zeal, unhampered by scrupulous deliberation, which according to Wellhausen led them to act against an Islamic authority which in their opinion had failed to carry through the commandments of the Holy Book. Their ardour for the sake of Islam became obvious for the first time, when they took part in fighting against the Ridda [*q.v.*] rebels (Battle of the Yamāma or of ʿAḳrabāʾ [*q.v.*]). During ʿAlī's war against Ṭalḥa and al-Zubayr, they threw in their lots with him, and they supported ʿAlī in his abortive warfare against Muʿāwiya. When the Syrians proposed to resort to the judgement of the Ḳurʾān, they at first approved of ʿAlī's compliance with this proposal, but later on, when the disastrous consequences of the arbitration had become obvious, they turned against ʿAlī, blaming him ruthlessly for having preferred human decision to God's judgement. In the Khāridjite rebellions against ʿAlī, and later on against the Umayyads, the *ḳurrāʾ* are said to have been the most fanatical instigators. Wellhausen's account of the *ḳurrāʾ* shows his general view of the early Muslim parties as resulting from a politico-religious conflict. This view, which aimed at studying the development of political and religious thought in Islam, has proved very fruitful, but it impedes us in realising the social conflicts concomitant to religious strife. Therefore, until recently the character of the *ḳurrāʾ* was described vaguely or even misleadingly. If the *ḳurrāʾ* actually had been a group of people applying themselves to a peculiar form of reciting the Ḳurʾān, or holding a certain view concerning the validity of the Ḳurʾānic commandments, why do we not find any trace of such a group in treatises on heresiography or on recitation of the Ḳurʾān? Besides this *argumentum e silentio*, one doubts whether Wellhausen's almost generally-accepted assumption was right that only after ʿAlī's political defeat did the *ḳurrāʾ*, repenting of their imaginary failure, become the fanatical partisans of the Ḳurʾān. For according to the sources, they had never been wholehearted followers of ʿAlī's cause; hence they had no reason to consider themselves as traitors because they had urged ʿAlī to accept the appointment of the two arbiters.

Recent research into the matter has tended to take the social groups into consideration, resuming in principle Brünnow's idea. In a detailed study on Kūfan political aligunments, G. M. Hinds has drawn an entirely new picture of the *ḳurrāʾ*. He states that a group of people called *ḳurrāʾ* first acted jointly against Saʿīd b. al-ʿĀṣ, ʿUthmān's governor in Kūfa until 33/653. The evidence adduced by Hinds proves that most of them were people who had settled in southern ʿIrāḳ at the very beginning of the conquests and thus had acquired some privileges. But under ʿUthmān, the political situation in southern ʿIrāḳ was changing rapidly: those early-comers who could not stabilise their position by amalgamating with an influx of population belonging to their respective tribal entities gradually lost their influence. Al-Ashtar and Yazīd b. Ḳays, who were to play a prominent part in the subsequent troubles, were among these early-comers who feared lest they be ousted from their position. Their situation was even aggravated when ʿUthmān allowed the fighters of al-Ḳādisiyya now resident at Medina to exchange their shares of ʿIrāḳian land for landed property in the Arabian Peninsula. To carry through this measure meant first of all a careful distinguishing between the *ṣawāfī* estates and *dhimma*-land. The early-comers suspected that they would be the losers by these administrative measures. Fearing a blow to their pretended rights, they succeeded in removing Saʿīd b. al-ʿĀṣ from his post. They then elected Abū Mūsā al-Ashʿarī governor of Kūfa. During the events which led to the murder of ʿUthmān, the *ḳurrāʾ* played only a secondary part, though al-Ashtar figures in the list of the assassins. When ʿAlī arrived in the neighbourhood of Kūfa, the powerful tribal leaders did not join him. They seem to have favoured a neutral position, which would have served their interests best. ʿAlī, pursuing an egalitarian Islamic policy, did not even want to attempt a compromise with them. A coalition between him and the disappointed early-comers therefore came into being. Al-Ashtar, Ḥudjr b. ʿAdī, and ʿAdī b. Ḥātim are said to have been *ḳurrāʾ*; now they were Shīʿī leaders. During the fighting at Ṣiffīn, the *ḳurrāʾ* are mentioned as separate para-tribal entities supporting ʿAlī. When Muʿāwiya suggested settling the points at issue by means of arbitration, the *ḳurrāʾ* urged ʿAlī to accept the proposal, because they envisaged a peace in which ʿAlī would be able to accomplish an Islamic policy checking an ascendancy of the new-comers. When they felt that their dreams would not be realised, they turned against ʿAlī, who refused to withdraw from the agreement. ʿAlī tried to placate this dangerous internal opposition by giving high appointments to the most prominent *ḳurrāʾ*, but the majority of the *ḳurrāʾ* became his irreconcilable enemies. In the Khāridjite movement of the first century they are often mentioned as one of the most active groups.

In the light of these new results, it seems rather absurd to refer to the *ḳurrāʾ* as "Ḳurʾān-readers". Shaban was the first to suggest a new interpretation. He holds that *ḳurrāʾ* means "villagers" (*ahl al-ḳurā*), denoting those participants in the early wars (*ahl al-ayyām*) against the Sāsānid Empire who had occupied the vacated estates of southern Irāḳ and whose *de facto* privileges had been threatened since ʿUthmān's reign. Shaban and G. H. A. Juynboll have adduced evidence corroborating this thesis, but it still remains speculative. The rendering of *ḳurrāʾ* as "Ḳurʾān-readers" seems to be a result of the well-known fact that Muḥammad used to appoint reciters for stimulating the zeal of the Muslim fighters (see Ṣāliḥ Aḥmad al-ʿAlī, *al-Tanẓīmāt al-idjtimāʿiyya wa 'l-iḳtiṣādiyya fi 'l-Baṣra*, Beirut 1969, 56 ff.); further-

more, the ʿIrāḳian *ḳurrāʾ* had appealed to the Ḳurʾān. But they did so, not because they held some special doctrine concerning it, but because they wanted to enforce the judgement of the Ḳurʾān in that actual issue, where the reference made in the Ṣiffīn agreement to an ill-defined "practice" (*sunna*) seemed dangerous for their interests.

(T. Nagel)

ḲURRA b. SHARĪK b. Marthad b. Ḥāzim al-ʿAbsī al-Ghaṭafānī, governor of Egypt 90-6/709-14 for the Umayyad caliph al-Walīd b. ʿAbd al-Malik.

Ḳurra came from the group of North Arab tribes which had settled extensively in northern Syria and the Djazīra and which were in the forefront of the warfare along the Taurus Mountains with Byzantium. He himself came from the region of Ḳinnasrīn [*q.v.*] to the south of Aleppo, and was thus a member of the experienced and capable cadre of Syrian Arabs whom the Umayyads liked to appoint to high civil and military office; the fact that al-Walīd's mother Wallāda bint al-ʿAbbās was also from the tribe of ʿAbs may well have helped further Ḳurra's career.

The early part of this last is very obscure. From indications in Michael the Syrian's chronicle, Lammens inferred that he may have served as governor of Ḳinnasrīn or possibly of Armenia; it is obvious that he would not have been appointed to such an elevated post as the governorship of Egypt without considerable administrative experience previously.

Ḳurra was appointed governor of Egypt *ʿalā 'l-ṣalāt wa 'l-kharādj*, i.e. as *amīr* and as *ʿāmil* or financial director, in place of the caliph's own brother ʿAbd Allāh b. ʿAbd al-Malik, whose governorship had been rendered difficult by economic hardship through failure of the Nile to rise sufficiently. Ḳurra accordingly reached the capital of Egypt, Fusṭāṭ [*q.v.*], on 3 or 13 Rabīʿ I 90/10 or 20 January 709 or shortly afterwards, and took up his duties there. The Arabic general chroniclers give woefully little information about Ḳurra's governorship, if indeed they mention it at all; Ṭabarī merely records the dates of his appointment and of his continued tenure of the office, and then records his death (ii, 1200, 1208, 1266, 1305; repeated in Ibn al-Athīr).

Our best sources of historical information are naturally the local Egyptian ones, above all Kindī, *Wulāt*, ed. Guest, 63-6, more briefly in Maḳrīzī, *Khiṭaṭ*, i, 302, also Ibn Taghrībirdī, *Nudjūm*, Cairo 1383/1963, i, 217-20, resuming several earlier authorities, but the information given here is fairly exiguous too. However, contemporary records, as embodied in the papyri discovered in Egypt over the last 80 years or so, round out the later chronicles and give a much better picture of the administrative and financial condition of Egypt during Ḳurra's governorship. They also supply a corrective to the unfavourable image of Ḳurra as a typically tyrannical Umayyad governor of the stamp of al-Ḥadjdjādj [*q.v.*], which grew up in the ʿAbbāsid and post-ʿAbbāsid periods, a condemnatory view which is expressed in both the Muslim and the Coptic Christian sources. Thus one oft-repeated saying attributed to ʿUmar b. ʿAbd al-ʿAzīz runs "al-Walīd in Syria, al-Ḥadjdjādj in ʿIrāḳ, ʿUthmān al-Muzanī in Medina, Khālid al-Ḳasrī in Mecca and Ḳurra in Egypt! By God, the earth has become filled with iniquity!" (cf. the biography of Ḳurra in Ziriklī, *al-Aʿlām*, vi, 36-7). Another libellous story is that after the completion of the rebuilding of the mosque of ʿAmr b. al-ʿĀṣ in Fusṭāṭ (see below), he called for wine and music-making and held an orgy there.

Amongst the occurrences of Ḳurra's governorship is mentioned a plot against his life staged at Alexandria by a group of Ibāḍī Khāridjīs under al-Muhādjir b. Abi 'l-Muthannā al-Tudjībī, which failed, and the rebuilding of the mosque of ʿAmr. At the beginning of 92/autumn 710, the caliph ordered Ḳurra to demolish some additions made by ʿAbd Allāh b. ʿAbd al-Malik and to rebuild the mosque entirely. Yaḥyā b. Ḥanẓala al-ʿĀmirī was appointed supervisor of work; the mosque was enlarged at the north-east end and in the *ḳibla* direction, which Ḳurra caused to be corrected from ʿAmr's slightly inaccurate alignment. Whilst the work of rebuilding was in progress, the Friday prayers were held in the Ḳaysāriyyat al-ʿAsal, and the mosque was completed in Ramaḍān 93/June-July 712 (see K. A. C. Creswell, *Early Muslim architecture*, Oxford 1932-40, i, 99-100, with extensive bibliography). Yet much of Ḳurra's governorship was necessarily taken up with the financial administration of Egypt and the economic and agricultural regeneration of the province, and it is here that the papyri give valuable information. The serious famine of 86-7/705-6 in the preceeding governorship of ʿAbd Allāh (see above) had left a legacy of hardship in the land. Ḳurra was therefore concerned to increase agricultural production and to bring disused land (*arḍ mawāt*) into cultivation once more. The chronicles mention his restoration of the Birkat al-Ḥabash as an instance of this work of *iḥyāʾ*, this being planted with sugar cane [see ḳaṣab al-sukkar] and subsequently known as "Ḳurra's stable".

A further, controvertial problem was that of the imposition of the poll-tax or *djizya* [*q.v.*] on new Muslim converts from the Coptic community. The papyri show Ḳurra as keen to exact the full *djizya* from these *mawālī*, to collect arrears of taxation and generally to safeguard the caliph's financial rights. Egypt suffered, like ʿIrāḳ and other of the conquered provinces, from the flight of peasants to the towns in order to escape taxation, a process which had already been discernible in Byzantine Egypt; these fugitives were now rigorously pursued and brought back to their villages wherever possible. However, Ḳurra was equally concerned to punish tyrannical local officials, and he maintained control over the provinces by means of an efficient intelligence system or *barīd* [*q.v.*]. The bilingual (Greek and Arabic) papyri also mention the levying of special taxes (*liturgia*) for the building of ships for *koursos* or *ghazw*, presumably against the Byzantines in the eastern Mediterranean. Finally, Kindī notes that Ḳurra re-organised the *dīwān*s of Egypt in 95/713-14, being the third person (after ʿAmr b. al-ʿĀṣ and ʿAbd al-ʿAzīz b. Marwān) to do this. As Becker observed (*Beiträge*, ii, 124-5), this doubtless increased the Arab element in these departments; the official language there had already been changed from Greek and Coptic to Arabic just before Ḳurra's time [see dīwān].

Ḳurra died of the plague whilst still in office in

Ṣafar 96/October-November 714 (Ṭabarī, ii, 1305) or on 23 Rabīʿ I 96/6 December 714 (Maḳrīzī, i, 302), and was succeeded (as *amīr al-ṣalāt* only) by his trusted deputy ʿAbd al-Malik b. Rifāʿ al-Fahmī, who had been *Ṣāḥib al-Shurṭa* or police chief under Ḳurra; Usāma b. Zayd became head of finances in Egypt.

(C. E. Bosworth)

KURRAM, Kuram, the name of a river which flows down from the western end of the Safīd Kūh or Spīn Ghar range of the Hindū Kush-Koh-i Bābā massif of eastern Afghānistān and which joins the Indus River in modern Pakistan just below ʿIsā Khēl. The lower course of the river flows through Bannū [*q.v.*], and the middle reaches through the northernmost part of Wazīristān [*q.v.*]. The upper valley, beyond the railhead of Thāl, forms what in British India and now in Pakistan is the administrative region of the Kurram Agency, a thin wedge of territory some 70 miles long and covering 1,305 sq. miles. From the headwaters of the river, the fairly easy Shutargardān Pass leads towards Khōst and Kābul [*q.vv.*], with the village of Paiwar Kotal marking the present frontier between Afghānistān and Pakistan; this has always been one of the historic routes by means of which migratory peoples and armies from Central Asia and Afghānistān have descended to the Indian plains.

Little is known of the early history of the region of Kurram, though the Chinese pilgrim Fa-hien was there in the early 5th century A.D. Kurram is certainly mentioned in Ibn al-Athīr, xi, 89, as the place (here spelt Kurramān) to which the Ghaznavid sultan Bahrām Shāh fled ignominiously in 543/1148 when the Ghūrid chief Sayf al-Dīn Sūrī temporarily occupied his capital. Djūzdjānī (7th/13th century) further records that Kurramān was granted as an *iḳṭāʿ*, together with S.n.k.rān (? Shalōzān, the name of a modern left-bank affluent of the Kurram River, in the surmise of Raverty), by the Ghūrid ruler Muʿizz al-Dīn Muḥammad in 572/1176-7 to his slave commander Tādj al-Dīn Yīldiz; Muʿizz al-Dīn used regularly the Kurram valley route for descending from Ghazna to the Indus valley (*Ṭabaḳāt-i Nāṣirī*, ed. Ḥabībī², Kabul 1341-3/1962-4, i, 411-12, tr. Raverty, London 1881-99, i, 498-500). The original Pathan inhabitants of Kurram were Sunnī Bangash, but *ca.* 1500 nomads of the Tūrī tribe of the Karlānrī group of Pathans appeared as vassals (*hamsāya*) of the Bangash and gradually came to control all the villages of the upper Kurram valley. The Tūrī are Shīʿī in faith, and claim popularly to be of Persian origin; in the early 11th/17th century they participated, with other Pathan tribes, in the general movement of the Rōshaniyya sect [*q.v.*] against the attempted domination of the Mughal Emperors of Dihlī.

In the early 19th century, Kurram never formed part of the Sikh empire of the Pandjāb, but the Durrānī and Bārakzay rulers of Kābul claimed a vague suzerainty over the region. In 1845 they affirmed their claims by appointing a resident governor in Kurram, the later *amīr* in Kābul Muḥammad Aʿẓam Khān. In 1856 a British expedition was sent into the valley after Tūrī raids on the people of Kōhāt [*q.v.*]. In autumn 1878 Lord Roberts entered the valley and temporarily occupied the region as an advance base during the Second Afghān War, pushing on from there to capture Khōst. The Shīʿī Tūrī began to complain of oppression by Afghān officials, and this created a sentiment in Kurram in favour of a British presence there or at least of some degree of British protection, especially as the Treaty of Gandamak made with Muḥammad Yaʿḳūb Khān in 1879 declared Kurram to be an assigned district, to be administered by the Government of India, together with the Khyber and the Pathan districts of northern Balūčistān. Hence in 1892 British forces moved up from Thāl at the request of the Tūrī, and in the next year the border with Afghānistān was delimited along the Durand Line at the head of the valley. In 1894 it became a political agency, and then at the time of Lord Curzon's creation of the North-West Frontier Province in 1901, Kurram became one of the five tribal agencies. British garrisons were withdrawn, and replaced by two battalions of the Kurram Militia, organised on the same lines as the Khyber Rifles [see khaybar pass]. It was down the upper Kurram valley that Nādir Shāh briefly penetrated with an Afghān force during the Third Afghan War of 1919.

Kurram now comes within Pakistan, and has its administrative centre in the town of Pāračinār. The Pakistan government gives the Kurram Agency the same degree of autonomy as the other tribal areas, except that it enforces certain regulations identical with those prevailing in the directly-administered areas along the Indus, including the collection of land-tax; in fact, a negligible amount of taxation is collected from this economically poorly-endowed region, and the Agency receives back far more from the central government by way of subsidies and salaries of local militiamen and officials. It nevertheless forms the only tribal area along the Frontier where the central government's authority goes right up to the Afghānistān border. Administratively, Kurram is divided into two *taḥṣīls*, an Upper Valley and a Lower Valley. The 1961 census estimated the population of the whole Agency at 200,512, with the population of Pāračinār as 22,953.

(C. E. Bosworth)

ḲURRAT al-ʿAYN, Fāṭima Umm Salmā, also known as Dhakiya, Zarrīn-tādj, Ṭāhira (see below), Persian poetess and Bābī martyr, was born in Ḳazwīn in 1231/1814, the eldest daughter of a famous *mudjtahid*, Ḥādjdj Mullā Muḥammad Ṣāliḥ Baraghānī.

She was educated in Ḳazwīn, and became proficient in the Islamic sciences. She was married to Mullā Muḥammad, the son of her uncle Mullā Muḥammad Taḳī, by whom she had three sons, Shaykh Ismāʿīl, Shaykh Ibrāhīm and Shaykh Isḥāḳ, and one daughter. While staying with him in Karbalā, she joined the Shaykhī sect, together with her sister Marḍiya and brother-in-law, Ḥādjdj Mullā Muḥammad ʿAlī, an action that earned her the fierce hostility of her husband and father-in-law, though her own father remained neutral. She studied with Sayyid Ḳāẓim Rashtī, then living in Karbalāʾ, who was so impressed by a *risāla* she wrote on Shaykhī doctrine, that he gave her the *laḳab* of Ḳurrat al-ʿAyn. Her sectarian activities led finally to her divorce, by which time she had returned to Ḳazwīn. It was here that she first heard of the Bāb, and when Mullā Ḥusayn Bushrūya left for Shīrāz to seek out the Bāb in Rabīʿ I 1260/April 1844, he took with him a letter from Ḳurrat al-ʿAyn which so impressed the Bāb that he nominated her among the eighteen *Ḥurūf al-Ḥayy* ("Letters of the Living"). Later, in a letter addressed to certain Bābīs who had expressed doubt about the propriety of Ḳurrat al-ʿAyn's activities, he described her as *Djanāb-i Ṭāhira*, whence the name by which she came commonly to be known amongst the Bābīs and Bahāʾīs. By this time she was back in Karbalā, where she is reputed to have preached without a veil, to have claimed to be the incarnation of Fāṭima, and to have proclaimed the abrogation of the Sharīʿa. Her preaching of Bābī doctrines eventually alarmed the Ottoman authorities, and in 1263/1846 she was arrested and exiled to Iran. She travelled by way of Kirmānshāh and Hamadān, preaching openly on the way, and in due course arrived in Ḳazwīn, where she found herself subjected to the same family hostility as before. Matters came to a head when her uncle, Ḥādjdj Mullā Muḥammad Taḳī, a strenuous opponent of Babism, was found murdered (15 Dhu 'l-Ḳaʿda 1263/25 October 1847). Widely suspected of complicity, it was no longer possible for her to remain in Ḳazwīn, and she left for Tehran, and thence for Māzandarān, where she joined the great gathering of Bābī leaders at Badasht. Here she preached constantly (sometimes unveiled, though this has been denied), and took an active part in the decisions taken there. After the break-up of the gathering by local villagers, she went to Māzandarān with some of the other leaders of the community, and stayed for some time in Nūr. In 1266/1850 she was arrested and taken to Tehran, where she was detained as a prisoner in the house of Maḥmūd Khān Nūrī, the Kalāntar [*q.v.*] of Tehran, for the next four years. After the attempt on the life of Nāṣir al-Dīn Shāh in 1268/1852 by three Bābīs, Ḳurrat al-ʿAyn, together with at least twenty-seven other Bābīs, was cruelly put to death by means that have been variously reported but are still unknown, the only eyewitness account—by Dr. Polak—merely stating that "she endured her slow death with superhuman fortitude".

By a strange twist of fate, Ḳurrat al-ʿAyn was the only one of the eighteen "Letters of the Living" never to meet the Bāb. She was famous both inside and outside the Bābī movement for her beauty, eloquence, and devotion to the cause. Her poetry, a fair amount of which has survived, is said to have been widely read by the Bābīs long after her death. Though doubts have been cast on the stories of her discarding of the veil, it cannot be denied that her way of life was extremely emancipated for her time, and she has remained a symbol of women's liberation in Iran ever since.

(L. P. Elwell-Sutton and D. M. MacEoin)

ḲURṢĀN (A.), pl. *ḳarāṣina* and also *ḳarāṣin*/*ḳarāṣīn*, "corsair, pirate", stems from Italian *corsale*, which has further given forms closer to the original but less commonly-found, such as *ḳurṣāl*, pl. *ḳarāṣil*/*ḳarāṣīl*, and *kursālī*, pl. *kursāliyya*. In turn, Arabic has formed the abstract noun *ḳarṣana* "privateering, piracy", still in use today, as is also *ḳurṣān*, sometimes conceived of as a plural. In the colloquial there is further the verb *ḳarṣan* "to raid, act as a pirate", and the dialects also given to *ḳurṣān* the double sense of "corsair" and "boat". This latter term was an Andalusian one (cf. Pedro de Alcala, ... *De lingua arabica libri duo*, Göttingen 1883, 158), and it is uncertain whether one should link with the Spanish *corsario* the adjective *ḳurṣariyyāt* used by al-Saḳaṭī, ed. G. S. Colin and E. Lévi-Provençal, *Un manuel hispanique de ḥisba*, Paris 1931, 50, to denote women who are supposed to have recovered their virginity (the two editors prudently suggest the translation "carried off by the corsairs?", and P. Chalmeta, in *al-And.* (1971 ff.), § 111, translates this term as *corsarias*).

The necessity felt by the Arabic language, probably in the course of the 3rd/9th century, to use a loanword shows that, even if piracy had long existed in the Red Sea and Persian Gulf, the Arabs (who called a pirate *liṣṣ al-baḥr* "sea-robber") had a distinct feeling that privateering had a different character. They

nevertheless adopted the same term to denote two distinct forms of activity, which are indeed often enough confused, even by Europeans; in fact, privateering consists of attacking enemy ships with the more or less explicit connivance of the authorities, whilst piracy proper is a purely private enterprise involving the capture and pillaging any vessels encountered.

i. The Western Mediterranean and the Atlantic

It was in the Mediterranean, "the sea of adventures" (Ch. E. Dufourcq, *L'Espagne catalane et le Maghrib aux XIII*e *et XVI*e *siècles*, Paris 1965, 574), that the Muslims most continuously practised *ḳarṣana* from the moment onwards when they established themselves along its shores and had to face attacks from the Christian powers there. In reality, the Arabs—and very soon, as will be seen, adventurers of European origin, renegades and captives—were merely participating in a traditional practice of the Mediterranean basin since the most early antiquity, whilst at the same time giving it, more or less consciously, a religious aura, since it was often in the name of Islam that the corsairs of the southern shores of the Sea acted, just as those of the northern shores acted at times in the name of Christianity. It was for this reason that privateering, if not piracy, soon came to be considered as an integral part of the holy war, *dj̲ihād* [*q.v.*], and it is as part of this that the question is treated in the works on law.

Given the fact that it is impossible, in an encyclopaedia article, to go into detail and to trace the entire history of privateering and piracy as they were practised by men based on the coasts of the Muslim lands, what follows is a sketch oi the broad features of the topic. Reference should be made to those sources which are in general well-documented and which have been utilised for this present article, and also to the articles MILĀḤA and SAFĪNA, especially for technical details; the article FIDĀʾ in the Supplement should also be consulted for the topic of the ransoming of captives.

From the 1st/7th century onwards, there were added to the attacks against the islands and the shores of the western Mediterranean by corsairs coming from the Near East, raids undertaken by the people of Ifrīḳiya, whose regularly-organised fleets succeeded in gaining control, in the first decades of the 3rd/9th century, of Malta, Sicily and Pantellaria [see ḲAWṢARA], whilst the Balearic Islands were definitively taken over by the Spanish Umayyads in 290/903.

However, from the 2nd/8th century onwards, what one may properly call organised pirate activity began to take shape both in North Africa and in Muslim Spain. One notable action is that in which, after the suppression of the "Revolt of the Suburb" in Cordova [see AL-ANDALUS and ḲURṬUBA] in 202/818, a group of émigrés who practised piracy in the central and eastern Mediterranean gained control of Alexandria and in 212/827 seized the island of Crete, which they made into a Muslim possession and a centre for their further activities [see IKRĪṬIS̲H̲]. It was likewise from Spain that there set out the Muslims who, between 278/891 and 281/894, established themselves at Fraxinetum [*q.v.*], where they founded a pirate state which lasted for 80 years. As early as 227/842, other corsairs sailed up the Rhône to Arles, and they renewed their incursions in 235/850 and 255/869; under the Umayyads of al-Andalus, the sailors of Péchina acquired a great notoriety in this respect (cf. Lévi-Provençal, *Hist. Esp. Mus.*, i, 244, 349, 352, 355, ii, 154-60). Some centuries later, Ibn K̲h̲aldūn, *Hist. des Berbères*, text, i, 619, tr. de Slane, iii, 117, summarised the two essential forms which the activities of the *ḳarāṣina* took. "A more or less numerous group of corsairs gets together. They build a ship and choose as its crew men of proven valour. These warriors go off and descend on the coasts and islands where the Franks dwell, arriving there suddenly and carrying off everything they can find. They also attack the infidels' ships, frequently capturing them, and then return home, laden with plunder and prisoners". This text is one of the ones rarely encountered on this subject in the Arabic sources, which dwell at much greater length on the Christians' naval enterprise against the Muslim lands, or on the spectacular attacks from the Atlantic made on al-Andalus by the "Northmen" from 230/844 to 355/966 [see AL-MADJ̲ŪS]. In the Mediterranean, violent attacks by the Christians were more difficult, for a defence system had been established along the coasts, whether in Spain (see R. Arié, *L'Espagne musulmane au temps des Naṣrides*, Paris 1973, 273-6) or from Alexandria to Tangier (see M. Talbi, *Émirat aghlabide*, 395).

Concerning the situation obtaining on the high seas, Ibn K̲h̲aldūn's remark (*Muḳaddima*, ed. Quatremère, ii, 35, tr. de Slane, ii, 42, tr. Rosenthal, ii, 41) alleging that "the Christians could not even launch a plank on the Mediterranean" is probably correct for the 3rd/9th and 4th/10th centuries, when the Muslims did have command of the seas. Economic necessity accordingly compelled the states to try and assure the safety of navigation along the various commercial routes (see Chr. Courtois, in *Mélanges G. Marçais*, Algiers 1957, ii, 51-9), but the international agreements made with this end in mind were not always respected by the pirates. The activities of these last were however controlled, and there are extant some interesting *fatwā*s on these. M. Talbi has published one of them (in *Cahiers de Tunisie*, 1956), pronounced by Saḥnūn (d. 240/854 [*q.v.*]) and concerning three associates who had organised a pirate enterprise but had then fallen out over the division of their booty. More interesting still is a *fatwā* of Muḥammad b. Saḥnūn (d. 256/870 [*q.v.*]) analysed also by Talbi (*Émirat aghlabide*, 534-5); it emerges from this that seizure was legal in the case of a Christian merchant ship making for a non-Muslim country, but illegal when it was a case of a building utilised for commercial exchanges between Christendom and Islam. Thus, whilst hindering freedom of navigation, pirate activity tended to divert traffic into a pattern favourable to the Muslim lands.

After the beginning of the 6th/12th century and during all the Crusades period, privateering may be regarded as more often than not assimilable to the *dj̲ihād*. The Zīrids (see H. R. Idris, *Zīrides*, index) organised it on a grand scale and sowed terror in the western Mediterranean, whilst the island of D̲j̲arba [*q.v.*], already an important base, became a real haunt of pirates, who were not content with attacking Christian ships but also infested the coasts of Ifrīḳiya. D̲j̲arba was conquered in 510/1116 by ʿAlī b. Yaḥyā, but soon resumed its traditional rôle, until it was captured in 529/1135 by the Normans of Sicily; it was to remain the plaything of Christian and Muslim rivalries until the end of the 8th/14th century, and then was to play a leading part in the events of the 10th/16th century.

Various dockyards built along the coasts of the Mag̲h̲rib and al-Andalus [see DĀR AL-ṢINĀʿA], especially at La Calle (Marsā 'l-K̲h̲araz), Bône and Bougie,

provided local pirates with galleys which skimmed the coasts of the Mediterranean islands and swept the seas in search of prey. As well as the cargoes and crews seized on the open seas, the raids on the Sardinian and Corsican coasts secured slaves of both sexes which were much in demand.

Dufourcq (*op. laud.*, index) has gathered together considerable material on the 7th/13th and 8th/14th centuries. From this, it appears that, despite the rulers' desires to make maritime commerce safe, the occasional prohibition of privateering warfare and concluding of international treaties, the Mediterranean remained for adventurers of all varieties a special field of activity. After having died down somewhat, from the Muslim side, in the 7th/13th century, *ḳarṣana* revived with fresh force, and the islands and shores of the Christian world were often ravaged. On the Christian side, their exploits yielded nothing in scope or violence to the Muslims; Sicily was a fine jumping-off base and arsenal, and D̲j̲arba was neutralised for a while by Roger de Lauria and Ramon Montaner.

The other bases in the Mag̲h̲rib remained active, but the situation hardly changed in the course of the next century. On the other hand, it took a completely new turn in the 10th/16th century, when there began the so-called "Barbary corsairs", whose activity was to last until the 19th century. This is the period in which such figures as the Barbarossa brothers [see ʿARŪD̲J̲ and K̲H̲AYR AL-DĪN], Dragut [see ṬŪRG̲H̲ŪD], Sinān Pas̲h̲a, Aydin, and many others for whom there is not space here to recount the prowess, distinguished themselves. The articles devoted to the most famous of them should be consulted, and one should merely note that ʿArūd̲j̲ chose Tunis as his base and from there, was able to defy the power of Charles V and to seize Algiers. After his death in 924/1518, his brother K̲h̲ayr al-Dīn (d. 953/1546), who had offered the province of Algiers to the Ottoman sultan, resumed his pirate activities against Mediterranean shipping and his attacks on the Christian towns. For his part, Dragut (d. 972/1565) set up his base in D̲j̲arba, and then succeeded Murād Ag̲h̲a, whom he had helped, together with Sinān Pas̲h̲a, in seizing Tripoli from the Knights of Malta; he may be considered as the founder of the new regency.

It is, it is true, difficult to distinguish between naval warfare, privateering and piracy in the activities of these corsairs, whose common feature is that they succeeded in founding "Barbary" states in more or less nominal dependence on the Sublime Porte and that they established pirate organisations which necessitated numerous interventions by the Europeans. The battle of Lepanto in 979/1571 [see AYNA-BAK̲H̲TĪ] put an end to privateering, but made no difference to pirate activity, which continued to rage until the conquest of Algiers.

Amongst these pirates, Murād Raʾīs was especially notable. He was the first, in 993/1585, to venture into the Atlantic (if one excepts the expedition of K̲h̲as̲h̲-k̲h̲ās̲h̲ [see al-Masʿūdī, *Murūd̲j̲*, i, 258-9 = § 274] and his companions from Cordova in the 3rd/9th century, see Lévi-Provençal, *Hist. Esp. Mus.*, i, 354, iii, 342). Murād went on to plunder the Canary Islands, and en route, put in at Salé, which was not as yet the nest of corsairs of which later history was to have a burning memory.

It should also be noted that, at the moment when these Barbary states mentioned above came into existence, there was an event of highest importance happening in Spain, sc. the reconquest of Granada, followed by the exodus of the Andalusians and then, in 1610, by the expulsion of the Moriscoes [*q.v.*]. Like their predecessors, these last groups settled in various parts of North Africa where, without always openly proclaiming *d̲j̲ihād*, they constituted a fresh impetus and a new pretext for the Barbary pirate activity, seeing in this a means of mounting a revanche. Algeria and Tunisia remained very active centres (see M. de Epalza and R. Petit (eds.), *Études sur les Moriscos andalous en Tunisie*, Madrid 1973, index), but it is from this point onwards that piracy based on the port of Salé comes into prominence, and the history of this is well-documented for us (see H. de Castries, *Les corsaires de Salé*, in *Revue des deux mondes*, xv/2 (1903); L. Brunot, *La mer dans les traditions et les industries indigènes à Rabat et Salé*, Paris 1920, 152-72; and R. Coindreau, *Les corsaires de Salé*, Paris 1948). During the 8th/14th and 9th/15th centuries, Salé [see SALĀ] had been a centre for privateering on a relatively modest scale only, like other ports of the Moroccan littoral like Tetuan [see TIṬṬĀWĪN], whose corsair fleet had however been destroyed by the Spaniards in *ca.* 803/1400, or al-Mahdiyya [*q.v.*], which on occasion gave refuge to pirates, whose captured booty was sold to the sultans. In the 17th century, however, the twin town of Rabat became, under the influence of Andalusian emigrants, a real corsair republic, in which certain strong personalities stand out, these being used for diplomatic missions (e.g. the Bénache and vars. = Sīdī ʿAlī b. ʿĀʾis̲h̲a, who was charged by Mawlāy Ismāʿīl with a mission to Louis XIV for the hand of the Princess de Conti). These Salé corsairs, called "Turks" by the Europeans, were generally no more Turkish in origin than were the "Barbary" pirates; they included in their ranks Andalusians and Moroccans, to be sure, but also Greeks, Russians, Portuguese, Spaniards, Frenchmen, Dutchmen, etc., renegades and even Christians. The diverseness of the polyglot crews allowed them to hoist false colours and to reassure ships under attack by addressing the enemies in the tongue of their own nation. One notable feature of the Salé pirates was that, being right on the spot for combing the North Atlantic seas, they were bold enough to sail as far as Iceland, to reach the fishing-grounds of the coasts of the New World and Nova Scotia, or to enter the Channel and reprovision themselves in the Netherlands, where they had accomplices. For almost a century, from 1668 to 1757, privateering was organised by the sultans, and may be considered as taking the place of a national fleet.

There is no need here to dilate upon the various types of vessel employed by the corsairs and pirates, nor upon their arms, for these questions will be studied under MILĀḤA and SAFĪNA. It should merely be noted that until the end of the 16th century, the pirates in the Mediterranean used galleys propelled by a large number of oarsmen (sometimes more than 200) and that the lateen sails of these ships were only auxiliaries; on the other hand, in order to secure a speed superior to that of the merchant ships, these galleys were slender in shape (the proportion of length to breadth reaching up to 9 times) and hence instable. In 1606, a Dutch renegade called Simon of Danser taught the Algerians to construct and to operate sailing ships, and Salé, which, because of the bar and shallow waters, could only used light vessels, benefitted particularly by this innovation, and built so-called "round" (i.e. with a proportion of only 3 or 4) ships, which were much more stable.

Finally, thanks to the anonymous author of *La connaissance des Pavillons ou Bannières que la plupart des Nations arborent en mer*, The Hague 1737 (cf.

Coindreau, *op. laud.*, 211-22), we have information about several of the flags of the Muslim corsairs.

Bibliography: The above account, inevitably brief, can only give a slight sketch of *ḳarṣana* in the western Mediterranean and the Atlantic. Outside the archives, some of which have been used by the authors cited above, and the *Sources inédites de l'histoire du Maroc*, reference should be made to the works cited in the text, which usually have detailed bibliographies, and to the following basic works: F. Dan, *Histoire de Barbarie et de ses corsaires*, Paris 1649; J. Morgan, *Histoire des États barbaresques qui exercent la piraterie*, Paris 1757; L. de Mas-Latrie, *Relations et commerce de l'Afrique septentrionale avec les nations chrétiennes au moyen age*, Paris 1886; S. Lane Poole, *The Barbary corsairs*, London 1890; P. Gossee, *The history of piracy*, London 1932 (Fr. tr. P. Teillac, *Histoire de la piraterie*, Paris 1933, 2nd edn., 1952); Ch. Penz, *Les captifs français du Maroc au XVII^e siècle*, Rabat 1944; G. ii. In Turkish waters

Within a decade of the Saldjūḳ victory at Manzikert (Malāzgird [*q.v.*]) in 463/1071, the Turkish invaders had extended their raids to the Aegean. In 474/1081, or shortly afterwards, the Turks of Nicaea (Iznik [*q.v.*]) constructed a fleet at Kios (Gemlik [*q.v.*]), possibly for the transport of troops. However, the Byzantine Emperor, Alexios I Comnenos, burned it before it could put to sea. A more formidable Turkish maritime force appeared in 481-2/1088-9, when a Turkish chieftain called Tzachas (this name is probably a Greek form of Čaka), with the aid of a Smyrniot Greek, built a fleet at Smyrna (Izmir [*q.v.*]), which harried the Aegean coast of Asia Minor from Smyrna to Adramyttion (Edremit [*q.v.*]) and captured the neighbouring islands of Chios (Saḳîz), Lesbos (Mytilene), Samos (Susam), and possibly some other islands. The unexpected appearance of Tzachas, so soon after the Byzantine destruction of Arab pirate bases in Cilicia, led to the construction of a new fleet at Constantinople in 484/1091, and the expulsion of Tzachas from the islands. His rival, the Saldjūḳ Ḳîlîč Arslan, poisoned him in 489/1096.

After the defeat of Tzachas, Alexios I was able to recapture the coastlands lost to the Turkish invaders and built a number of coastal fortresses between Abydos (near Čanaḳ ḳala [*q.v.*]) and Syria. Muslim corsairs did not disturb Byzantine waters again until the last quarter of the 6th/12th century, when Arab pirates reappeared in the eastern Mediterranean. This does not mean that piracy in general diminished. In fact, it increased with the growth of commerce in the Levant following the Crusades. A pattern arose of professional pirates in the Aegean and Mediterranean finding employment in the Byzantine and other fleets. The same phenomenon was to occur with the growth of Turkish fleets.

The Latin occupation of Constantinople in 601/1204 did nothing to prevent piracy, despite the presence of Venetian fleets in the Aegean. In 633/1236, the Despot Manuel of Epiros could claim that pirates made the sea too dangerous for his bishops to cross from Greece to the Laskarid capital at Nicaea. The Latin conquest seems merely to have increased the number of Latin pirates, such as the Lombard Licario, who was to serve Michael VIII Palaiologos as Admiral after the Byzantine recapture of Constantinople in 659/1261. Muslims, however, were not in evidence. The Laskarid administration effectively fortified the boundaries with the Saldjūḳs in Asia Minor, preventing the Muslim access to the Aegean coast. Ibn Bībī [*q.v.*] refers to an *amīr-i sawāḥil*, possibly commanding Saldjūḳ vessels in the Mediterranean, but there are no further references to Muslim maritime activity.

Despite Michael VIII's construction of a powerful Byzantine fleet after 659/1261, his reign saw the foundation of Turkish naval power in the Aegean. Pre-occupied with regaining Byzantine territories in the west and warding off the threat of an Angevin invasion, Michael neglected his eastern frontier. Turkish raids and settlements followed and, as in the 5th/11th century, the invaders soon took to the sea. Already in 676-7/1278, there are records of pirates, including the obviously Muslim "Saladinus" at Ania to to south of Ephesus. In 681-3/1284, Michael VIII's successor, Andronikos II Palaiologos, disbanded his father's fleet, which he evidently regarded as an unnecessary expense after the removal of the Angevin threat. The results were disastrous. Not only were the seas unprotected against burgeoning Turkish piracy, but unemployed Greek sailors now defected to the Turks. After 682-3/1284, Turkish sea-raids extended to the Cyclades and even into the Sea of Marmara and Black Sea. By 700/1300, the Turks had occupied the Aegean coast and, according to the Catalan Muntaner, were pillaging Chios and the surrounding islands.

It was these years in the late 7th/13th and early 8th/14th centuries that saw the establishment of the Turkish emirates on the Aegean coast. Since these states sheltered corsairs and used their own vessels simply to collect booty by harrying foreign settlements or commerce, rather than to protect trade or acquire new lands, they may be described as "pirate-states". The most notorious was Aydîn [see Aydînoghlî], especially in the days of Umūr Pasha [*q.v.*] but ships from other maritime emirates of Menteshe, Sarukhān and Ḳarasî [*q.vv.*] also engaged in sea-borne raids. In the Black Sea, Ghāzī Čelebi (d. *ca.* 724/1324?) established an emirate around Sinop [*q.v.*], whence he made raids on Genoese and Trapezuntine commerce and settlements. The Ottomans do not seem immediately to have taken to the sea as corsairs. When Orkhan [*q.v.*] gave lands to Ḳara Mürsel after the conquest of Nicomaedia (Iznikmid, Izmit [*q.v.*]) in 1737/1337, his purpose appears to have been to protect the shores of the Gulf of Izmit against Byzantine raids.

During the 8th/14th century, Turkish raids became a feature of life in the Aegean. In 718/1318, corsairs from the mainland of Anatolia ravaged Santorin, and in 726/1326 Marino Sanudo reported how the Turks infested the Cyclades, their attacks made easier by the disunity among the Latin Lords of the islands. In 739/1328-9, Umūr of Aydîn occupied the harbour of Smyrna and began his attacks on Christian ships and on islands and territories in the Aegean and mainland Greece. In 736/1335, however, he signed an agreement with Andronikos III Palaiologos not to attack Byzantine shipping. It was possibly in part to compensate them for loss of booty that Andronikos employed Umūr's troops as mercenaries in Albania. With the death of Andronikos III in 742/1341, Umūr again began to raid throughout the Aegean and, between 742/1341 and 745/1344, intervened in the Byzantine civil war on behalf of his friend and ally John Cantacuzene.

Piracy particularly affected Venetian and other Latin commerce. In 731/1331, Venice had imposed a treaty on the Catalans of Athens, forbidding them to help or employ Turkish corsairs, although this did not prevent the Catalans calling on Umūr to defend the Duchy of Athens against the claims of Gautier de Brienne. The activities of Umūr and other Muslim corsairs eventually led Pope John XXII to assemble a fleet under the command of the Venetian Pietro Zen to which Venice, the Papacy, France and the Knights of St. John contributed vessels. This force did much damage to the Turkish corsairs and defeated the fleet of Ya<u>kh</u><u>sh</u>i Beg of Ḳarasī in the Gulf of Edremit in 735/1334. However, it disbanded after the death of Pope John in the same year, and piracy continued as before. More effective was the Latin occupation of the port of Smyrna in 745/1344, and the death of Umūr in 749/1348, after which <u>Kh</u>iḍr of Aydïn signed a treaty with the Latins, according to which he undertook to burn all the ships in the emirate, forbid all acts of piracy and offer no help to corsairs. Large-scale raids may have ceased, but in a letter dated 751/1350 the Dodge Andrea Dandolo indicated that Turks from Aydïn continued to attack Christian shipping. Piracy based on other emirates seems also to have flourished. After 671-2/1360, Aḥmed <u>Gh</u>āzī of Mente<u>sh</u>e preyed on shipping between Cyprus and Rhodes.

Ottoman raiders began to appear on the Aegean in the 1390s. They seem to have infested the Sea of Marmara considerably earlier, leading the Emperor John VI Cantacuzene to clear the old harbour of Heptaskalon in Constantinople some time after 750/1349, as a base against Turkish pirates. The annexation by Bāyezīd I [*q.v.*] of Saru<u>kh</u>ān, Aydïn and Mente<u>sh</u>e brought the western Aegean shoreline under Ottoman control by the 1390s. With Bāyezīd's construction of an arsenal at Gallipoli, the Ottomans were able to build sizeable fleets. In 793/1391 an Ottoman fleet of 60 vessels ravaged Chios, the Cyclades and the coasts of Euboea (Negroponte, I<u>gh</u>riboz) and Attica. To meet this new threat, Venice allotted a fleet to Francesco I Crispo of Naxos.

The defeat of Bāyezīd by Tīmūr in 804/1402 and the subsequent restoration of the emirates put an end to the depredations of an Ottoman fleet under the Sultan's auspices, but did not otherwise prevent piracy. In 806/1403, the restored ruler of Mente<u>sh</u>e, Ilyās Beg, signed a treaty with Venice in which he undertook to prevent acts of piracy. He was evidently unsuccessful, since in 813/1410 a Venetian fleet appeared off the ports of the emirate as a forceful reminder of the *beg* to adhere to the terms of the treaty. It made no difference. In 819/1416 vessels from Ottoman territory raided the Cyclades and, at about this time, the Florentine Buondelmonti reported Turkish raids on all the Aegean islands except Patmos. Perhaps the shared reverence for the shrines of certain saints, such as St. George of Levitha, called Ḳoč Papas or Ḳoč Baba in Turkish, led the Turks to leave the monks of Patmos in peace. Piracy remained endemic throughout the 9th/15th century, and measures such as the imposition of direct rule on the Venetian Duchy of Naxos in 899/1494 only temporarily deterred the corsair fleets of Ḳarā Ḥasan and others.

There were, however, significant changes in the Aegean in the late 9th/15th and 10th/16th centuries. Under Meḥemmed II and his successors, the Ottoman fleet became an instrument of conquest and a weapon of imperial policy rather than simply a pirate fleet of the Sultan. Meḥemmed II's fleet, for example, played an important part in the conquests of Constantinople in 857/1453, Sinop, Trebizond (Ṭrabzon [*q.v.*]), and Lesbos (Midilli) in 865-7/1461-2 and Euboea in 875/1470. Under his successor Bāyezīd II, Ottoman fleets appeared in the Ionian Sea during the war with Venice between 904/1499 and 908/1503. As the frontiers of naval warfare moved south and westwards from the Aegean, Turkish pirates such as the famous Kemāl Reʾīs [*q.v.*] extended their activities to North Africa and the western Mediterranean. By 947/1540 most of the Aegean coasts and islands were Ottoman possessions, and the odd exceptions such as the Venetian Tinos (Istindīn) and the Genoese Chios, which in any case fell to the Ottomans in 974/1566, did not threaten Turkish hegemony in the area.

The Aegean was now an Ottoman sea and the Sultan had no wish to encourage piracy in his own waters. The Ottoman government attempted to control the activities of corsairs, forbidding the construction of privateer vessels without special permission. In 967/1560, the *ḳāḍī* of Iznikmid received instructions to seize an illegally-constructed ship; whereas in 972/1565, the *levends* [*q.v.*] of Rhodes (Rodos [*q.v.*]) and Mente<u>sh</u>e were encouraged to build ships and serve in the Imperial Fleet. The squadrons permanently based in the Aegean at Kavalla, Lesbos and Rhodes presumably guarded the seas against pirates as much as against enemy action. In the 990s/1580s Muṣṭafā ʿAlī of Gallipoli or Gelibolu [*q.v.*] looked back with nostalgia to the mid-century when the Imperial Fleets kept the sea free of corsairs.

It is, however, most unlikely that Muslim pirates ever disappeared from the Aegean. The western shores of Anatolia seem, in fact, in the 10th/16th century to have been a forcing ground for pirates who, after acquiring sufficient ships and booty in their native waters emigrated to Algiers (al-<u>Dj</u>azāʾir [*q.v.*]), or later to Tripoli (Ṭarābulus al-<u>Gh</u>arb [*q.v.*]) or Tunis [*q.v.*], where their raids on non-Ottoman Christian shipping changed them, in Ottoman eyes, from pirates to warriors of the faith. The famous <u>Kh</u>ayr al-Dīn Barbarossa [*q.v.*] and Ṣāliḥ Reʾīs of Algiers, for example, originated from the west coast of Anatolia, found fame in North Africa and, like many lesser known corsairs, later served in the Ottoman Imperial Fleet. Muṣṭafā ʿAlī specifies Ḳazda<u>gh</u>ī in particular as an area from which many North African pirates originated.

In the late 10th/16th century, piracy seems to have increased throughout the Mediterranean, and the Aegean too was affected. It is most likely that the disorders in Anatolia in this period found their counterpart on the sea.

Bibliography: There are no modern studies of Turkish pirates in the Aegean. The only coherent account, relating to the 16th century only, appears to be Gelibolulu Muṣṭafā ʿAlī, *Mewāʿid ül-nefāʾis fī ḳawāʿid ül-me<u>dj</u>ālis*, facs. edition, Istanbul 1956, 54-9. For Tzachas, see *The Alexiad*, Books VII, VIII, IX, XI, and A. N. Kurat, *Caka Bey*, Ankara 1966. There are scattered references to piracy in Pachymeres, *De Michaele et Andronico Palaiologis*, ed. Bekker, Bonn 1839; Nikephoros Gregoros, tr. J. L. van Dieten, *Rhomäische Geschichte*, Stuttgart 1973; Buondelmonti, *Liber insularum archipelagi*, ed. Sinner 1824, Legrand 1897, and in other contemporary Greek and Italian writers. See also Pīrī Reʾīs, *Kitāb-i baḥriyye*, facs. Istanbul 1935. For further references, see M. F. iii. In the Persian Gulf

Piracy has been endemic in the Persian Gulf since ancient times, which is hardly to be wondered at in view of the poverty, until very recently, of the peoples dwelling around its shores and the richness of the commerce which has at various periods passed through its waters. Piracy has flourished most in time of war or in its wake, when authority has broken down and the predatory instincts of the maritime tribes have been given full rein. Thus, for example, the Ḳarmaṭian revolt, the Mongol invasions and the collapse of the ʿAbbāsid caliphate were all accompanied or followed by maritime depredations on an extensive scale.

To all intents and purposes, piracy in the Gulf was indistinguishable from maritime warfare, which in turn originated in political, dynastic, sectarian or racial conflict among the littoral principalities. Hostilities at sea were apt to degenerate swiftly into the indiscriminate plunder of any and all shipping, not only in the Gulf but in the adjacent seas also. Such was the case with the first great piratical campaign of modern times, that waged by the seafaring tribes of ʿUmān against the trade and shipping of the Gulf, the Arabian Sea and the western Indian Ocean in the late 11th/17th century. After the expulsion of the Portuguese from Masḳaṭ, Ṣuḥār and their other footholds on the ʿUmāni coast by the Yaʿrubī *imām*, Sulṭān b. Sayf (1059-90/1649-79), the ʿUmānīs pursued their vendetta against the Portuguese by attacking and plundering their shipping and their settlements on the coasts of India, Persia and East Africa. Under Sulṭān b. Sayf's successors, and especially the fourth Yaʿrubī *imām*, Sayf b. Sulṭān (*ca.* 1103-23/1692-1711), ʿUmān became a formidable maritime power; and commensurate with the increase in her naval strength the scope of her marauding activities widened to embrace vessels under any flag wherever they might be encountered. The depredations of the Masḳaṭ and ʿUmānī pirates only ceased when civil strife broke out in ʿUmān over the succession to the Ibadi imāmate following the death of the Yaʿrubī *imām*, Sulṭān II b. Sayf, in 1131/1718-19.

A wave of piracy followed the Afghān incursions into Persia in the 1130s/1720s and again after the death of Nadīr Shāh in 1160/1747. On both occasions, as during the height of the ʿUmānī piratical campaigns, some of the chief sufferers were the European trading establishments on the Persian coast. The most notorious pirate of the 12th/18th century was Mīr Muḥannā b. Naṣir of Bandar Rīg, whose family, an off-shoot of the Zaʿāb tribe dwelling on the southern shore of the Gulf, had migrated to the Persian coast earlier in the century, intermarried with Persians, espoused Shīʿism and settled at Bandar Rīg. While still a youth Mīr Muḥannā had helped contrive the murder of his father, and when his mother reproached him with his crime he slew her in a fit of rage. He likewise put to death his two sisters for receiving offers of marriage, and exposed his first-born child, a daughter, to die on the seashore. The greatest triumph of Mīr Muḥannā's career was the capture and destruction of the Dutch trading settlement on Khārg or Khārk I island [see KHĀRAG] in Radjab 1179/December 1765-January 1766. Eighteen months later he despoiled the Masḳaṭ coffee fleet on its way to Baṣra in the summer of 1181/1767. It was his final *coup*. Driven from Bandar Rīg by his own people, who had finally sickened of his monstrous cruelties, he sought refuge in Dhu 'l-Ḳaʿda 1182/March 1769 at Baṣra, where he was unceremoniously put to death by the Ottoman *mütesellim*.

An outbreak of piracy by the Kaʿb of the lower Kārūn followed the siege and capture of Baṣra by the Persians in 1189-90/1775-6. A far more serious upsurge, however, was that which occurred after the death of Karīm Khān Zand [*q.v.*] in 1193/1779. The coastal tribes of Fārs, most of whom were of Arab descent, threw off the authority of Shīrāz and became a law unto themselves, plundering any vessels that came within their reach. Their depredations were shortly to be overshadowed by those of the Ḳāsimī tribal confederacy [see AL-ḲAWĀSIM] of Shārdja (al-Shāriḳa) and Raʾs al-Khayma [*q.vv.*], who took advantage of the disturbed state of Persia to re-establish themselves at Linga [*q.v.*] (which they had first seized after the death of Nadīr Shāh and from which they had been expelled by Karīm Khān in 1179/1765) and to prey upon shipping—European and Indian as well as Arab and Persian—off the Persian coast and in the Straits of Hurmuz.

Part of the impulse for the Ḳawāsim's marauding derived from their persistent quarrel with the Āl Bū Saʿīd rulers of ʿUmān, a quarrel which in the last two decades of the 18th century came to focus upon control of the stretch of coast to the north of Ṣuḥār, which the Ḳawāsim endeavoured—with some success—to wrest from the Āl Bū Saʿīd with the object of commanding the approaches to the Gulf and waylaying vessels passing through the Straits of Hurmuz. It was largely the exploits of the Ḳawāsim that were responsible for the southern shore of the Gulf, from Rams to Dubayy, becoming known to European mariners in these years as "the Pirate Coast". A new twist, and added strength, was given to the Ḳawāsim's piratical activities, and to their feud with the Āl Bū Saʿīd, by the assertion by the Wahhābīs of Nadjd of an ascendancy over the Pirate Coast in the first decade of the 19th century. The conversion of the Ḳawāsim and other maritime tribes to the Wahhābi practice of Islam injected an element of fanaticism into their piratical forays, so that the campaign of depredation that ensued took on the character of a seaborne *djihād*.

The Ḳāsimī war fleet, operating with Wahhābī encouragement, if not under actual Wahhābī direction, was reckoned in 1223/1808 to number some 70-80 large dhows; if fishing and pearling vessels were included, the Ḳāsimī confederacy's total strength was said to exceed 800 vessels manned by 18,000-25,000 fighting men. (Another estimate, made in 1233/1818, put the resources of the Arabian maritime tribes at 89 large dhows and 161 smaller craft, manned by 10,000 fighting men.) Controlling Linga and part of

Ḳishm Island, and with bases at Khawr Fakkān, Dibba and Khawr Kalba, facing the Gulf of ʿUmān, the Ḳawāsim were able to strike at will at any ships entering or leaving the Straits of Hurmuz. Often they would lie concealed, waiting for their prey, in the deep winding inlets of Khawr al-Shaʿm (Elphinstone's Inlet) and Ghubbat ʿAlī (Malcom's Inlet) on the western and eastern sides respectively of the Musandam peninsula (Raʾs al-Djibāl), the existence of which was not known to European seamen until the first survey of the Gulf was undertaken by the Bombay Marine (the armed maritime service of the English East India Company) after 1235-6/1820. Hence the Ḳawāsim were able on a number of occasions to elude pursuit by the cruisers of the Bombay Marine by slipping into these hidden anchorages.

With the passage of time the Ḳawāsim grew bolder, ranging as far afield as the coasts of Kutch and Kathiawar, the ports of the Ḥaḍramawt and the lower reaches of the Red Sea. They sailed in squadrons of up to twenty dhows, taking their prizes by closing alongside, grappling and boarding. As often as not they would put the entire crew of a captured vessel to the sword—generally amid clamorous avowals of religious fervour. Women, children and slaves taken captive were afterwards either distributed among their captors or, in the case of the first two, held for later ransom. A fifth of all booty taken was reserved for eventual consignment to the Saʿūdī *imām* at Dirʿiyya [*q.v.*], the Wahhābī capital. A good portion of the remainder was customarily disposed of at Baḥrayn, which served as the principal clearing-house for the proceeds of Ḳāsimī piracy.

After the capture of a number of European and Indian ships by the Ḳawāsim the British authorities in India dispatched an expedition to attack Raʾs al-Khayma, Linga and the Ḳāsimī outposts on Ḳishm I. and at Shinas, on the ʿUmānī coast, in the autumn and winter of 1809-10 (Shaʿbān-Dhu ʾl-Ḥidjdjah 1224). The expedition had only partial success in crippling the Ḳawasīm's naval capabilities. Many Ḳāsimī dhows were absent from their home ports on piratical or trading voyages, while others had been hidden, after word of the expedition's objectives had leaked out ahead of its sailing, in the inlets of the Raʾs al-Djibāl. The expedition's commanders were also inhibited by the orders given them not to cross swords with the Wahhābi ruler. A second expedition, dispatched in the winter of 1819-20 (Muḥarram-Djumādā I, 1235), after the defeat of the Wahhābis and the destruction of Dirʿiyya by Ibrāhīm Pasha the previous year, was far more effective in subduing the Ḳawāsim. Raʾs al-Khayma and the other piratical ports were reduced, the Ḳāsimī war fleet was burned or prized, and the Ḳāsimī chieftains, along with the other principal *shaykh*s of the Pirate Coast, were made to subscribe to a treaty (the General Treaty of Peace of Rabīʿ I, 1235/January 1820) outlawing piracy for ever.

Neither the expedition of 1809-10 nor that of 1819-20 had attempted to bring to book the man who was undoubtedly the most reckless and ferocious free-booter in the Gulf in the entire 19th century—Raḥma b. Djābir, head of the Āl Djalāhima branch of the ʿUtūb, whose base for more than thirty years was located at Khawr Ḥasan in north-western Ḳaṭar [*q.v.*]. Raḥma's blood-stained career had its origins in his falling out with the Āl Khalīfa of Baḥrayn [*q.v.*] over the division of the spoils from their joint conquest of the island in 1197/1783. From that time until the end of his life he conducted an unrelenting war of attrition, marked as much by fierce daring as by atrocious cruelty, against the trade and shipping of the Āl Khalīfa and their kinsmen, the Āl Ṣabāḥ of Kuwayt. His most remarkable single feat was his capture in Dhu ʾl-Kaʿda 1224/December 1809 of twenty large Kuwaytī dhows, whose crews he massacred to a man. He escaped the attentions of the British expeditionary force at that time in the lower Gulf, partly because of confusion over his status (he was a Wahhābī protégé) but mainly because his stronghold at Khawr Ḥasan was deemed too difficult of access to attack from the sea. Some time later (in 1227/1812 or 1231/1818—the accounts vary) he fell out with the Wahhābis and was forced to abandon Khawr Ḥasan. He established a new lair in 1234/late 1818, after the Wahhābī collapse, at Dammām, on the Ḥasā coast, from which he continued to harry the seaborne commerce of Baḥrayn.

Raḥma b. Djābir was again spared retribution at the hands of the British expedition of 1819-20, less because he had now assumed the guise of a Persian dependant than because his vendetta against the Āl Khalīfa, however, brutally it might be conducted, was reluctantly conceded to come within the category of legitimate warfare and not that of piracy. As a consequence of the improved security established by the British expedition and the subsequent system of "watch and cruise" operated by the Bombay Marine, Raḥma b. Djābir's fortunes steadily declined, until by 1241-2/1826 his fleet has been reduced to a single dhow. Now seventy years of age and totally blind, he had his last fight with the Āl Khalīfa war fleet off Dammām in Djumāda II, 1242/December 1826-January 1827. Surrounded and outnumbered, he calmly set fire to the magazine of his ship and blew her, himself and everyone aboard to the gates of Paradise.

The last serious piratical outbreak in the Gulf occurred in Shawwāl-Dhu ʾl-Ḥidjdja 1250/February-April 1835, when the Banū Yās of Abū Dhabī (Abū Ẓabī), hitherto little given to piracy, made a wholesale attempt upon the trade of the Gulf in a desperate bid to recoup their economic fortunes, which had been severely depressed by prolonged warfare with the Ḳawāsim and the loss of the annual pearl fishery for several years running. Brought to action off the Tūnbs by the Bombay Marine sloop ***Elphinstone*** on 18 Dhu ʾl-Ḥidjdja 1250/16 April 1835, the Banū Yās war fleet was outfought and scattered. The following month the British political resident in the Gulf, Captain Samuel Hennell, persuaded the rulers of Abū Dhabī, Shārdja, Raʾs al-Khayma, Dubayy and ʿAdjmān to agree to a suspension of hostilities at sea among themselves for the duration of the coming pearling season. The maritime truce signed on 22 Muḥarram 1251/21 May 1835 ran for a period of six months, to 29 Radjab 1251/21 November 1835. It was renewed every spring for the next seven years, being gradually extended in length to cover the full twelve months of the year. In 1259/1843 it was renewed for a ten-year period, at the expiry of which it was made permanent, in a treaty signed by the principal Trucial Shaykhs on 25 Radjab 1269/4 May 1853. Though isolated outbreaks of piracy were to occur at intervals up to this century, notably in the narrow waters between Baḥrayn and the Ḥasā coast, the institution and consolidation of the trucial system brought to an end the great age of piracy in the history of the Gulf.

KURSĪ, an Arabic word borrowed from Aramaic (Syriac form *kurseyāʾ*, in Hebrew: *kissē*; see Th. Nöldeke, *Mandäische Grammatik*, 128; Fraenkel, *De vocabulis peregrinis*, 22; L. Koehler, W. Baumgarten, *Lexicon in Veteris Testamenti libros*, 446) which can signify seat, in a very general sense (chair, couch, throne, stool, even bench). In the daily life of mediaeval Muslims it refers more specifically to a stool (i.e. seat without back or arm-rests), and there are a number of other terms which are applied to a throne (*sarīr* and *takht*, for example).

Kursī is found on two occasions in the Ḳurʾān (II, 256, XXXVIII, 33), and the commentators (al-Ṭabarī, *Djāmiʿ al-bayān*, Cairo 1323, iii, 7; al-Zamakhsharī, *al-Kashshāf*, Calcutta 1856, i, 170; Ibn al-Djawzī, *Zād*, Cairo 1964, i, 304; al-Bayḍāwī, *Anwār*, Leipzig 1846, i, 139; Ibn Kathīr, *Tafsīr*, Cairo 1952, i, 309-310; al-Suyūṭī, *Tafsīr al-Djalālayn*, Beirut 1969, 56; al-Ḳāsimī, *Maḥāsin*, Cairo 1957, iii, 659-67) tend to accord it the sense of throne, since its function (in the first verse, the throne of God which encompasses both Heaven and Earth, in the second, the throne of King Solomon) is to bestow a particular majesty on the one who sits there. In opposition to an apparently anthropomorphic concept of God "sitting" on a seat, another explanation has been put forward according to which, of the seven heavens encircling the universe, the two furthest from the globe will be *ʿarsh* (see below) and *kursī* (the commentators and the *Rasāʾil Ikhwān al-ṣafāʾ*, Cairo 1929, ii, 22; Ibn Sīnā, *Risālat al-ʿArsh*, Ms. Nuruosmaniye 4894, fol. 494 b -495 b). *Kursī* (in the Ḳurʾān) need not therefore indicate a seat in the usual sense of the word. There are other interpretations of the term, some allegorical (*kursī* = the absolute knowledge of God, or his kingdom), some literal, for example: *ʿarsh* (Ḳurʾān, XVII, 44; XL, 15; XLIII, 82; LXXXI, 20;) = throne of God, while *kursī* = footstool, a bench set before the throne. This throne of God has been an object of debate among theologians (A. J. Wensinck, *The Muslim creed*, 67, 90, 93, 115 and especially 148, concerning *ʿarsh* and *kursī*). The rite of a certain Shīʿī sect, at an early period in Muslim history, attributed a particular sanctity to an empty *kursī* (al-Balādhurī, *Ansāb*, ed. S. D. Goitein, vi, 242; J. Wellhausen, *Die religiös-politischen Oppositionsparteien*, 85).

The distinction between throne (*ʿarsh*) and footstool (*kursī*) probably reflects the tendency of mediaeval Muslims to indicate by means of the term *kursī* all kinds of supports: the word *mirfaʿ*, which, among other usages (including that of footstool!) indicates an ink-stand and the base of the small oriental table, may be replaced, in certain texts, by *kursī* (J. Sadan, *Le mobilier au Proche-Orient médiéval*, Leiden 1976, 91-4). To this meaning of "support", that of "lectern" should also be added. Many examples, designed to support copies of the Ḳurʾān (with straight or crossed legs) adorn mosques and are to be found in various museums (*ibid.*, 124-5, n. 470; J. A. Jaussen, in *Mélanges Maspero*, iii, 19-23 and especially O. Kurz, in *Islamic art in the Metropolitan Museum*, ed. R. Ettinghausen, 299-314). The term tends thus to become loaded (especially in colloquial speech) with senses which, in richer and more exact terminology, are covered by distinct terms. Among the other objects designated by *kursī* the following are examples: a support (stool) on which the turban is deposited during the night (Dozy, *Suppl.* ii, 455-6); a chair of particular design used by women in childbirth (*ibid.*); a stool for daily ablutions (al-Tanūkhī, *al-Mustadjād*, 108); in mediaeval Egypt, a seat for flour sellers (Maimonides, *Ṭeharōt*, ed. Derenbourg, i, 137); an astrolabe-stand (Dozy, *loc. cit.*); a slab into which a pointed instrument is implanted, through the base (*ibid.*); in Mecca, a kind of moving ladder (or staircase) near the Kaʿba (*ibid.*); among the Persians, a kind of stove (a low "table", under which a fire is lit; blankets are laid on this table and then wrapped round the knees to provide warmth, *ibid.*); the base of a column, pedestal (Beaussier, s.v.); a plate supporting the powder compartment and percussion mechanism of the flint-lock rifle (*ibid.*); in Spain, small pieces of silver or gold worn by women in their collars and known in Spanish as *corci* (Dozy-Engelmann, *Glossaire des mots espagnols*, 93); *kursī* is the seat of a bishop, his see, diocese etc. (Dozy, *Suppl.*, *loc. cit.*); in orthography, each of the characters (*alif*, *wāw*, *yāʾ*) on (or under) which the *hamza* is placed; in calligraphy, a kind of embellishment in square form (Huart, *Calligraphes*, 352).

In certain miniatures illustrating an Arabic astronomical work, which represent *dhat al-kursī* (Cassiopeia) in the form of a woman seated on a chair with back and arm-rests, we find the shape of a genuinely "classical" chair (E. Wellesz, in *Ars Orientalis*, iii, 8-9 and figs. 6, 44, 47, 51), which, copied from one manuscript to another, tends to become modified to the point where it is adapted to the mediaeval Muslim concept (Sadan, *op. cit.*, 125-6). In general, the *kursī* is nothing more than a stool. But, surrounded by other lower seats (cushions for example), such a stool can draw attention to the person who is seated there (see the dimensions indicated by M. D. Lutfi in *Sumer*, xvi, 129-30, in the Arabic section, unless it is lecterns that are in question). These *kursī*-stools were of various heights. Some had straight legs, others crossed legs (they are illustrated by a rich iconography, as well as by texts: O. Kurz, *loc. cit.*; Sadan, *op. cit.*, 123-33). In the modern period, *kursī* is also applied to various chairs of "western-style" form.

Bibliography: given in the article.

(Cl. Huart - [J. Sadan])

ḲURṬUBA, Spanish Córdoba, French Cordoue, English, Italian and German Cordova (Kordova), Latin Corduba, a town of southern Spain situated at 370 feet above sea-level on the right (north) bank of the central course of the Guadalquivir (from the Arabic al-Wādī al-Kabīr "the great river"), the ancient Baetis, with 1,234,000 inhabitants, is at the present day the capital of the province of the same name which lies on both sides of the river in the heart of Andalusia.

The southern and smaller half of the province, practically the famous La Campiña [see ḳanbāniya], rising in the south-east to a height of over 1,200 feet, is more level, hot and fertile, being especially devoted

to viniculture, while the northern, larger half which begins in the Sierra de Córdoba immediately to the north of the town, rises to heights over 2,900 feet high in the central Sierra Morena (Mariani Montes) with the plateau of los Pedroches which inclines in a northerly direction to the Zújar valley in the west and the Guadalmez valley in the east; this plateau is called *Iḳlīm al-Balāliṭa* by al-Idrīsī and by others *Faḥs al-Ballūṭ* "Field of Oaks", and in it lies the little town of Pedroche, known to the Arabs as Biṭrawdj or Bitrūsh (whence al-Biṭrūdjī [*q.v.*]). The north has a more temperate climate and includes great stretches of hill country, suited for sheep and horse breeding (*caballos cordobeses*) and rich deposits of coal and minerals. The name Córdoba has frequently been explained as from the Phoenician-Punic קרת טובה, "good town" since Conde first suggested this etymology in his *Descripcion de España de Xerif Aledris*, Madrid 1799, 161 (for even rasher etymologies, see Madoz, vi, 646 and al-Maḳḳarī, i, 355). The name is certainly not Semitic but Old Iberian (cf. Salduba, the Old Iberian name for Caesar-Augusta, whence Saragossa, Zaragoza; there is a Salduba = Marbella in the south between Málaga and Gibraltar). After the Second Punic war it became known as an important and wealthy commercial city (*aes Cordubense*) under the name Κορδύβη or Κορδυβά or Corduba. It was finally taken for Rome by C. Marcellus in 152 B.C., colonised with Roman citizens and as Colonia Patricia raised to be the capital of the Provincia of Hispania Ulterior. As Cordoba had taken the side of Pompey, it was severely punished by Caesar after the battle of Munda in 49 B.C., but in Imperial times it remained the capital of the province (it was the home of the two Senecas and Lucan) alternately with Hispalis (Seville) and Italica (later the Arabic Ṭāliḳa).

Towards the second decade of the 5th century A.D., Cordova was devastated when the Vandals conquered Baetica en route for North Africa. In 554 it passed to the Byzantines, who had come into the Iberian peninsula to help King Athanagild of the Visigoths, and the Greeks spread all through southern Spain. They probably took upon themselves the rebuilding of the old protective wall of the Roman *urbs quadrata* and the enlargement of this enceinte in a southwards direction, as far as the northern bank of the river. In 571, King Leovigild, Athanagild's successor, recovered it from the Byzantines; but although it was an episcopal see, it remained a place of no importance under the Visigothic domination.

At the time of the Muslim conquest of Spain, Cordova was leading a precarious existence; its protective enceinte was partially ruinous on the west side, and a heavy surge in the river's height had destroyed its bridge. The freedman Mughīth al-Rūmī, lieutenant of Ṭāriḳ b. Ziyād, occupied the town without resistance in Shawwāl 92/July-August 711, and three months later, in Muḥarram 93/October-November 711, the fortified church of San Acislo to the south-west of Cordova, where 400 knights of the Cordovan nobility had held out against the invaders, surrendered to al-Mughīth; he treated the Cordovan citizens with clemency and entrusted the guarding of the town to the Jews. The governor al-Ḥurr b. ʿAbd al-Raḥmān al-Thaḳafī transferred the capital of al-Andalus from Seville to Cordova (97-100/716-19). His successor, the governor al-Samḥ b. Mālik al-Khawlānī (100-2/719-21) restored the old Roman bridge and the ruinous part of the protective enceinte, and he founded the first Muslim cemetery of the town, sc. the Maḳbarat al-Rabaḍ or "Cemetery of the Suburb" on the northern bank of the river. In *ca.* 133/750, the governor Yūsuf b. ʿAbd al-Raḥmān al-Fihrī expropriated the church of San Vicente, where he established the first cathedral mosque (*al-Djāmiʿ*) in Cordova. This governor (129-38/747-56) was overthrown by the Umayyad prince ʿAbd al-Raḥmān I b. Muʿāwiya al-Dākhil [*q.v.*], the only Umayyad who had escaped from the massacre of his house in Syria; the great period of prosperity of the city now began, and lasted throughout the Umayyad dynasty [*q.v.*] of Cordova, which was independent of the ʿAbbāsids in Baghdād (138-403 or 422/756-1013 or 1031).

This incomparable period of splendour of the western rival of Baghdād, the city of the caliphs, is uniquely perpetuated in the great mosque lying just in front of the lofty ancient Moorish bridgehead, the Christian fortress-tower of La Calahorra (Arabicised from the Iberian Calagurris), the Kaʿba of the west; although, at the reconquest in 1236, it became a Christian cathedral and was disfigured by alterations, it has on the whole faithfully retained its Arabic character with its forest of pillars, its outer court (Patio de los Naranjos), the wall which encircles it as if it were a fortress or monastery, and the bell-tower, which is a work of the 16th century constructed from the remains of the 4th/10th century Arab minaret. Also, the name of La Mezquita or "The Mosque" has remained the popular one for this building. However, all the other splendid buildings and monuments of this world-famed period of splendour in the early middle ages have disappeared except for a few wretched fragments. When the shrewd ʿAbd al-Raḥmān I had laid the foundations for the supremacy of his dynasty in circumstances of exceptional difficulty, by attaining some success in putting a stop to the rivalries and quarrels of not only the Arabs of North and South but also between them and the Berbers of North Africa, the Spanish renegades and the Mozarabs who remained a constant weakness to Arab rule in Spain and brought about its ultimate fall, he began the building of the great mosque in the last two years of his life 171-2/787-8. His son and successor Hishām I (172-80/788-96) completed it, and built the minaret (often called in Spain *ṣawmaʿa* and *manār* = *manāra*), but ʿAbd al-Raḥmān II (206-38/822-52), son and successor of the *Amīr* al-Ḥakam I (180-206/796-822), found himself forced to enlarge the building; by extending the 11 naves southwards he added 7 transepts with 10 rows of pillars and built the second *miḥrāb* into the south wall, where was later constructed the chapel of Nuestra Señora de Villaviciosa (833-48), while his son and successor Muḥammad I (238-73/852-86) had in 852-6 thoroughly to overhaul the older building, which had been too hurriedly put up; he devoted particular attention to the decoration of the doors and walls, railed off the *maḳṣūra* reserved for the *Amīr* and the court in front of the *miḥrāb* by a wooden screen and built a covered passage (*sābāṭ*) from Alcázar, the palace to the west of the mosque, to provide a direct and private entrance to the *maḳṣūra* at the daily prayers. ʿAbd al-Raḥmān III, al-Nāṣir (300-50/912-61) [*q.v.*] who marks the zenith of the Arab epoch in Spain, rebuilt the minaret, which had been severely damaged by the earthquake of 880, in splendid fashion. He enlarged the *ṣaḥn* or courtyard in a northerly direction, demolished the ancient *ṣawmaʿa* and built another one, the forerunner of the great Hispano-Moorish minarets of the 6th/12th century, which support an actual bell hidden behind a stone revetment. It was this same prince who was the builder of the celebrated country estate Madīnat al-Zahrāʾ (now called Cordoba la Vieja) for his beloved al-Zahrāʾ, one-and-a-half

hours' journey north-west of Cordova at the foot of the Sierra (cf. al-Maḳḳarī, i, 344 ff.). In 1853, Pedro de Madrazo identified the remains of this town, and in 1923 the whole of its enceinte was declared a national monument; since then, excavations have restored some of the splendours of the great caliph al-Nāṣir's creation, and especially, the great hall called the "Salon Rico", which is at present to a considerable extent restored. The most beautiful extension of the mosque proper (almost doubling it) was carried out by the learned and scholarly caliph al-Ḥakam al-Mustanṣir billāh (350-66/961-76), son and successor of the great ʿAbd al-Raḥmān III, who ordered his Prime Minister or Grand Vizier (called *ḥādjib* in Spain) Djaʿfar al-Ṣaḳlabi to extend the colonnades in the mosque to the south by the addition of 14 transepts, and built a splendid new *maḳṣūra*, a new *sābāṭ* and the third noble *miḥrāb*, which alone has survived in its entirety. The last great extension was made by Hishām II al-Muʾayyad's (366-99/976-1009) powerful vizier, the regent al-Manṣūr (Almanzor, d. 392/1002), who added seven colonnades to the whole length of the building in the east and thereby raised the total number of naves (previously 11) to 19, but threw the *miḥrāb* out of its proper place at the end of the central axis of the sanctuary (on account of the precipitious slope down to the Guadalquivir it was found impossible to extend the building further to the south). Like al-Zahrāʾ in the north-west, al-Madīna al-Zāhira ("the flourishing city"), founded to the east of Cordova by al-Manṣūr to be the seat of the government and its offices, was destroyed in the period of revolution in the beginning of the 5th/11th century and has now quite disappeared.

After the complete extinction of the Umayyads with Hishām III al-Muʿtadd (418-22/1027-31), Cordova became a republic under the presidency of three Djahwarids: Abu 'l-Ḥazm Djahwar b. Muḥammad b. Djahwar (1031-43), Abu 'l-Walīd Muḥammad (1043-64) and ʿAbd al-Malik (1064-70). In the latter year it passed to the ʿAbbādids of Seville; in 1091 to the Almoravids, who in 517/1123 built the protective enceinte of the eastern part of the town; and in 1148 to the Almohads. With its conquest by Ferdinand III of Castile in 1236, it was doomed to inevitable decline.

Of the countless Arab scholars who belonged to Cordova, we will only mention here Ibn Ḥazm (d. 456/1064 [*q.v.*]), Averroës (Ibn Rushd [*q.v.*]) (d. 595/1198) and Maimonides (d. 601/1204 [see IBN MAYMŪN]).

Bibliography: Maḳḳarī devotes a whole book to Cordova, i, 297-462 (epitomised in Gayangos, *History of the Mohammedan dynasties in Spain*, i, 200-49), though it contains many literary and historical notes referring to other places; Idrīsī, *L'Afrique et l'Espagne*, 1866, 208-14 (Arabic text) = tr. 256-66; Yāḳūt, iv, 58-61; al-Ḳazwīnī, *Āthār al-bilād*, 370; Madoz, *Diccionario geogr.-estadist. hist.*, vi, 646-60; Schack, *Poesie und Kunst der Araber in Spanien und Sicilien*[2], ii, 182-224; Contreras, *Estudio descriptivo de los monumentos árabes de Granada, Sevilla y Córdoba ó sea La Alhambra, El Alcázar y la gran Mezquita de Occidente*[3], Madrid 1885 (2nd ed. 1878) (with drawings and plans), 40-108; Rodrigo Amador de los Rios, *Inscripciones árabes de Córdoba*[1], Madrid 1879, 3rd ed. 1892; idem, *Una excursión a las ruinas de Medina Az-Zahra* in *La España Moderna* (1. (C. F. Seybold - [M. Ocaña Jimenez])

AL-ĶURṬUBĪ, Abū ʿAbd Allāh Muḥammad b. Aḥmad b. Abī Bakr b. Faradj al-Anṣārī al-Khazradjī al-Andalusī, Muslim scholar of the Mālik, law school, an expert on *ḥadīth* and well-known for his commentary on the Ķurʾān. He is the subject of an article in the *Dībādj* of Ibn Farḥūn, which is devoted to biography of the Mālikī *fuḳahāʾ* of Spain and the Maghrib up till the 8th/14th century. He also features in an article in *Nafḥ al-ṭīb* of al-Maḳḳarī. Very little information is known concerning his life. Born in Spain, he was one of those who travelled outside this country (al-Maḳḳarī). Al-Dhahabī is said to have written of him: "He travelled, he wrote and he took lessons from the masters." In fact, he made his way to the Orient and settled at Munyat Abi 'l-Khuṣayb in Upper Egypt (Mīnat Banī Khaṣīb in the version of Ibn al-Imād, *Shadharāt*, v, 335); he died and was buried there in 671/1272.

Al-Dhahabī says of him, in his *Taʾrīkh al-Islām*, that he was an *imām* versed in numerous branches of scholarship, an ocean of learning whose works testify to the wealth of his knowledge, the width of his intelligence and his superior worth. Al-Kutubī, in his *ʿUyun al-tawārīkh*, refers to him in approximately the same terms. But in addition to being a conscientious scholar, he was remembered as a pious man, inclined towards asceticism and towards meditation on the life after death. He appeared in public attired in a single garment and wore a small cap (*ṭaḳiyya*) on his head.

Among his masters, the best known is Abu 'l-ʿAbbās Aḥmad b. ʿUmar al-Ķurṭubī whose commentary on Muslim, *al-Mufhim fī sharḥ Muslim*, he studied. This man was an eminent Mālikī *faḳīh*, born in Cordova in 578/1173, and died in Alexandria in 656/1259. (He was a teacher of traditions and a foremost expert on the Arabic language. He travelled in the Orient where his reputation became widespread. Al-Nawawī quotes his *Mufhim* in a number of places in his own work.) There is mention of two other masters from whom he learned *ḥadīth*: the *ḥāfiẓ* Abū ʿAlī al-Ḥasan b. Muḥammad b. Muḥammad al-Bakrī, and the *ḥāfiẓ* Abu 'l-Ḥasan ʿAlī b. Muḥammad b. ʿAlī b. Ḥafṣ al-Yaḥṣubī.

Among his works, his biographers first mention his commentary on the Ķurʾān intitled *al-Djāmiʿ li-aḥkām al-Ķurʾān wa 'l-mubayyin li-mā taḍammana min al-sunna wa-āyāt al-furḳān*. Then they refer to the following titles: *al-Asnā*, on the interpretation of the most beautiful names of God; *al-Tadhkār fī afḍal al-adhkār*, where "he followed the pattern of the *Tibyān* of al-Nawawī, while producing a more complete work and making use of greater learning"; *Kitāb al-Tadhkira bi-umūr al-ākhira* [see AL-MAHDĪ]; *Sharḥ al-Taḳaṣṣī*; *Kitāb Ḳamʿ al-ḥirṣ bi 'l-zuhd wa 'l-ḳanāʿa wa-radd dhill al-suʾāl bi 'l-kutūb wa 'l-shafāʿa*, which Ibn Farḥūn considers the best example of writing in this genre; and an *Urdjūza*, where the names of the Prophet were brought together. All these titles testify eloquently to the religious preoccupations of al-Ķurṭubī.

His commentary is of great richness and of great utility. All the authors who have spoken of al-Ķurṭubī acknowledge it and insist on the benefit which may be derived from it. From the introduction onwards, he puts emphasis on the worth of the Ķurʾān, on the elevated rank of those who are its "bearers", on the eminence in the eyes of God of those who make an effort (*idjtihād*) to derive from it by *istinbāṭ* teaching which conforms to the *maʿānī*, that is to say, to that which God wishes to signify: "what is known with certainty by the man who

knows the Book of God, is that he is to reject that which He forbids and to remember that which has been explained to him in this Book, to fear God and stand in awe of Him, to hold himself under His protection, and to abstain from disobeying Him through shame in respect to Him; then he is charged with the burdens of the prophets (*fa-innahu ḥummila aʿbāʾa 'l-rusul*) and he must become a witness to the Resurrection before adepts of religions of a different persuasion (*milal*)." Such is the high estimation placed by al-Ḳurṭubī on the role of the commentator.

The entire Introduction is divided into chapters which constitute a sort of ethic, methodology and theology of the commentary. Attention is drawn to the superior qualities of the Ḳurʾān (*faḍāʾil al-Ḳurʾān*) which comes from the light of the essence of God (*fa-huwa min nūr dhātihi*); God gives his servants the strength to bear it (4 ff.). Then (10), al-Ḳurṭubī turns to the manner of reading the Book of God (*kayfiyyat al-tilāwa li-Kitāb Allāh*) in a chapter which may be compared with that of al-Ghazālī in the *Iḥyāʾ*, intitled *Ādāb ḳirāʾat al-Ḳurʾān*; he discusses at length the problem of knowing whether the Ḳurʾānic text may be chanted or set to music: he maintains that it is impious to believe that the Ḳurʾān requires embellishment by the human voice. An important chapter (17) concerns the inward dispositions of men who pursue knowledge of the Ḳurʾān: they must rid themselves of all hypocritical consideration of the self (*taḥdhīr min al-riyāʾ*) and, turning towards God through *tawba* and *ināba*, attain with self-purification to perfect sincerity (*ikhlāṣ*). This could be interpreted, on account of the opposition of the two terms *riyāʾ* and *ikhlāṣ*, well-known in Ṣūfism, as a sign of deep mystical piety, and this is confirmed by the passage which follows (20) dealing with that which the soul must observe and not neglect. Then comes a technical chapter (23) on the *iʿrāb* of the Ḳurʾān and the effort which must be made to read and recite it correctly. A few more headings may be noted: Value of commentary and commentators (26): That respect for the Book and its sacred character is an obligatory requirement of the reader and of the "bearer" of the Ḳurʾān (27); Against a commentary based on personal point of view (*raʾy*) (31); On interpretation (*tabyīn*) of the Book through the *sunna* of the Prophet (37); How to study and understand the Book and the *sunna* (39); and On the meaning of the saying of the Prophet: "This Ḳurʾān has been revealed according to seven letters" (or readings:) *nuzzila ʿalā sabʿat aḥruf*); "therefore read according to that which is the easiest for you" (41). Particularly interesting is the chapter (49) on the unity (*djamʿ*) of the parts of the Ḳurʾān; it comprises a precise and concise history of the text, as far as the recension of ʿUthmān, with a study of the arrangement (*tartīb*) of the sūras and verses (59). After which, al-Ḳurṭubī defines the meaning of the words *sūra*, *āya*, *kalima*, *ḥarf* (65), and he replies to the question as to whether there are in the Book words foreign to the Arabic language (68), which leads him to speak of the inimitability of the Ḳurʾān (*iʿdjāz al-Ḳurʾān*) (59), of which he examines ten aspects: 1. the extraordinary stylistic arrangement (*al-naẓm al-badīʿ*); 2. the method (*uslūb*), different to all those followed by the Arabs; 3. the penetrating eloquence (*djazāla*) which cannot be that of any created being; 4. the information regarding events of the past since the beginning of the world until the revelation given to Muḥammad; 5. the power to handle the Arabic language in a way that no Arab has been able to do, which has led to the unanimous consensus on the fact that God "has placed every word and every letter in its correct place"; here al-Ḳurṭubī refutes the Muʿtazilī concept of *iʿdjāz*; 6. the fulfilment of promises, whether absolute, or accompanied by a condition; 7. information concerning the future; 8. the teaching of *aḥkām*, the permitted and the forbidden constituting the sustenance of all men (*ḳiwām djamiʿ al-anām*); the sonorous phrases (*al-ḥikam al-bāligha*) of which the number and the nobility are beyond the abilities of a human being; and 10. the coherence (*tanāsub*) between all that is contained in the Book whether of manifest or arcane nature, without any contradiction. The introduction ends with reflections on the *istiʿādha* and the *basmala*.

The commentary of al-Ḳurṭubī is principally distinguished by the recourse to a very great number of *ḥadīths*. Many are found here which are not mentioned by al-Ṭabarī and, unlike his eminent predecessor, al-Ḳurṭubī is more interested in the content (*matn*) than in the process of transmission. The *ḥadīths* are therefore assembled for the purpose of the reply that they offer to the question raised by the verse under discussion. Above all, the work consists of exegeses designed to clarify the meaning and implication of the Law. On this point, his work approximates to the composition of a treatise of *uṣūl* and of *furūʿ*, and it can be understood how Aḥmad ʿAbd al-ʿAlīm al-Bardūnī, in the preface to the second edition of the *Tafsīr*, should write: "This work is such that the reader can almost dispense with the study of works of *fiḳh*."

Al-Ḳurṭubī also devotes considerable space to philological and stylistic commentary, founded on the vast knowledge that he had of the work of grammarians, of works of rhetoric, as well as of books of *adab*. In addition, there are brief references to the theological ideas of *kalām*, accompanied by discussion of doctrines. For example, with regard to the verse (II, 7) "God has set a seal on their heart", he gives the Sunnī interpretation and rejects that of the Ḳadariyya. But, unlike Fakhr al-Dīn al-Rāzī, al-Ḳurṭubī does not attempt to derive philosophical notions and conceptions from Ḳurʾānic verses. Thus, when explaining the word *ḳayyūm* (II, 255) in the verse of the Throne, al-Rāzī interprets it at once as denoting *ḳāʾim li-dhātihi* (existing through Himself) as Ibn Sīnā defined it in the *Ishārāt*, and he draws from this all the metaphysical consequences: al-Ḳurṭubī simply gives it the sense, according to Ḳatāda, of *al-ḳāʾim bi-tadbīr mā khalaḳa* (He who concerns Himself with the government of His creation), or, according to al-Ḥasan al-Baṣrī, the sense of *al-ḳāʾim ʿalā kulli nafs bi-mā kasabat*, He who exercises His surveillance over every soul and that which it acquires, with a view to recompensing it according to its actions.

Finally, al-Ḳurṭubī reduces considerably, but not entirely, the dependence on interpretations and especially elucidations based on accounts furnished by rabbinical legends, apocryphal gospels and other equally unreliable sources. Thus he makes very little use of the *isrāʾīliyyāt* [*q.v.*], unlike al-Ṭabarī and even al-Rāzī.

Bibliography: Given in the article. The *Tafsīr* is quoted according to the 3rd Cairo edition (*Dār al-Kutub*), 1387/1967. (R. Arnaldez)

AL-ḲURṬUBĪ, Yaḥyā b. ʿUmar b. Saʿdūn al-Azdī, poet and Mālikī jurist, born in Cordova in 486/1093. He travelled extensively in the east, visiting Cairo, Baghdād and Damascus for the purpose of study. He died in Mawṣil on the ʿĪd al-Fiṭr in 567/1172. His chief surviving literary works are

Dalāʾil al-aḥkām, *ʿAḳīdat al-Imām ʿAlī*, and the poem on Muslim religious observances, the *Urdjūzat al-wildān*, also known as *al-Muḳaddima al-Ḳurṭubiyya*, for which he is best known. The *Urdjūza* sets out in summary form the basic observances of the five "Pillars of Islam" in rhyming couplets designed to be easy for children to memorise, but the contents of the poem are in no way simplified for the juvenile reader. The eighteen *abwāb* into which the *Urdjūza* is divided deal both with the obligatory rul (*farāʾiḍ*) connected with each observance, and with rules which are recommended but not obligatory (*sunan*).

The *Urdjūza* has been the subject of two commentaries, those of Aḥmad b. Zarrūḳ al-Fāsī (died 898/1493) and Muḥammad b. Ibrāhīm b. Khālid al-Tatāʾī (died 941/1535).

Young, *The Urjūzat al-wildān of Yaḥya al-Qurṭubī (486-567/1093-1172)*, in *IQ*, xviii (1976), 15-32; *Les Ned'mou de Ebnou A'chir et de el K'ortobi*, ed. Si Salah el A'nteri, Constantine 1846.

(R. Y. Ebied and M. J. L. Young)

ḲŪṢ, a town of Upper Egypt situated on the eastern bank of the Nile, some 30 km. to the north of the ruins of Thebes (al-Aḳsur/Luxor) where the course of the river is at its closest point to the Red Sea, or about 200 km. from Ḳusayr [*q.v.*].

This large village with a Coptic name, first called Ksa or Ksi (H. Gauthier, *Dictionnaire des noms géographiques contenus dans les textes hiéroglyphiques*, v, Cairo 1928, 178) seems to have become a more important place with the name Apollinopolis Parva in the Ptolemaic age, when the Greek sovereigns of the 2nd and 3rd centuries A.D. undertook to develop commercial contacts between Egypt and Arabia Felix and the Indian Ocean through the ports of the Red Sea, and favoured the building-up in this region of various centres to the detriment of what was left of Thebes. The remains of the small Ptolemaic temple are still visible in the town. Under the Roman domination, Apollinopolis Parva was, like Coptos/Ḳifṭ [*q.v.*], although to a lesser degree, the terminus of the caravan route from Berenice; it took the name Diocletianopolis towards the end of the 3rd century A.D. A bishop of the town is mentioned among those present at the Council of Ephesus in 431. The Greek residents would appear to have been in a minority, and when the pressure exerted by nomadic peoples between the Nile and the Red Sea brought to an end contacts with the east and caused a decline of urban life, the town reverted to its Egyptian name (in Coptic form, Kôs) more than a century before the Arab conquest; this name was retained, transcribed into Arabic as Ḳūṣ. In the organisation of Arab Egypt, it belonged first to the *kūra* of Ḳifṭ and al-Aḳsur. A rampart was constructed in about 212/827 to protect the urban area against the attacks of the Bedja [*q.v.*].

Subsequently the town developed: al-Yaʿḳūbī noted towards the end of this century that it had taken the place of al-Aḳsur (*Buldān*, BGA, vii, 334, tr. Wiet, 188) and according to al-Masʿūdī, in the first half of the 4th/10th century, it had taken the place of Ḳifṭ (*Murūdj*, iii, 50 = § 893). The reason for this prosperity must doubtless be attributed to the trading of its merchants with Nubia; its administrative status, however, did not change, because the population of the town was basically Christian, and the Muslim community was comparatively small. Under the Fāṭimids, the restoration of contacts with the Indian Ocean through the ports of the Red Sea, especially ʿAydhab [*q.v.*] brought advantages, at first most notably to Uswān [*q.v.*], where goods unloaded at ʿAydhab joined the Nile. But at the time of the serious crisis experienced by the Fāṭimid caliphate in the mid-5th/11th century, the occupation of the region of Uswān by the negro troops who took refuge there after being expelled from the capital, after 459/1067, and the revolt of the Arab tribes of Upper Egypt, disrupted commercial traffic until the restoration of order by the vizier Badr al-Djamālī [*q.v.*] in 469/1077; the traders then adopted the practice of joining the Nile at Ḳūṣ, thus avoiding the extreme south of Upper Egypt, where Uswān began to decline. The governor of the Upper Ṣaʿīd, given the task of maintaining order in the region, installed himself in the town which became the new capital of the south and a point of surveillance on the situation in the Red Sea. Ḳūṣ was henceforward an important market on the major trade-route with the Far East, frequently mentioned in the documents of the Geniza of Cairo on account of the presence of a Jewish community providing a staging-post for these exchanges.

The establishment in Palestine of the Latin kingdom of Jerusalem, which cut the normal route of the Pilgrimage to the Ḥidjāz, deflected towards Ḳūṣ a large proportion of the pilgrims (who used to embark at ʿAydhāb, which lies opposite Mecca) and added still further to the increase of traffic. A mint was established there in 516/1122 (al-Maḳrīzī, *Ittiʿāẓ*, iii, 93) and no doubt continued to function there until the arrival of the Ayyūbids. In the troubled times that marked the decline of the Fāṭimid caliphate, the role of the governor of the Upper Ṣaʿīd was seen as "the most important post after the vizierate" (Ibn al-Athīr, xi, 191) and an ante-room of power, to which the careers of the viziers Riḍwān and Shāwar also bear witness.

In 550/1155, Ṭalāʾiʿ b. Ruzzayḳ ordered the construction of the mosque and gave to the town one of the finest *minbars* of the Fāṭimid epoch; the Muslim community grew, apparently through the installation of families from Uswān and Isnā; but the town continued to have a Christian majority.

The abolition of the Shīʿī Fāṭimid caliphate seems to have been strongly felt; from 562/1167, Ḳūṣ was besieged by the Sunnī troops of Shīrkūh, who did not succeed in capturing the town, and it seems to have been affected by the revolts in Upper Egypt that followed Saladin's accession to power in Cairo. However, when the Ayyūbids reverted to the policies of the Fāṭimids in the area of the Red Sea, the growth of Ḳūṣ continued. It served as a point of arrival for Yemenī traders in Egypt and it was a staging-post for the merchants of the "Alexandrian Kārim" (al-Nuwayrī [see KĀRIMĪ]). This flow of wealth into the town was reflected in the agricultural prosperity of the surrounding countryside, where the growing of sugar-cane was developed, and Ḳūṣ became a centre for sugar production. The urban area outgrew its fortifications, and in the 7th/13th century Yāḳūt considered it the third city of Egypt, after Cairo and Alexandria (*Mushtarik*, ed. Wüstenfeld, 362). Cultural life developed; the poets Ibn Maṭrūḥ and Bahāʾ al-Dīn Zuhayr spent part of their lives in Ḳūṣ. The town was nevertheless unable to play the part of a regional capital because the minds of the growing Muslim community of Ḳūṣ were not reconciled to Sunnī

Islam: the influence of the Sunnī counter-reformation promoted by the pietist school in the neighbouring town of Ḳinā [*q.v.*] led to the founding of the first *madrasa* of Ḳūṣ in 607/1210. Henceforward Ḳūṣ became in its turn a centre for the propagation of Sunnī Islam in Upper Egypt.

It is under the Baḥrī Mamlūks that the town seems to have reached its zenith, even though the inclusion of Egypt in a political unity embracing the Syrian states had long ago deprived the governors of Ḳūṣ of the power that they had enjoyed in the last days of the Fāṭimid caliphate. The expeditions mounted against the Christian kingdom of Nubia in the last quarter of the 7th/13th century and at the beginning of the 8th/14th one contributed to the maintenance of a strategic role for the town, its main function being to control the highways of the South.

Doubtless following the collapse of the Latin kingdom of Jerusalem, and especially since the start of the Mamlūk period, the pilgrims to the Ḥidjāz for the most part reverted to the route via the Gulf of Suez, but a certain number continued to use the ʿAydhāb route, and traders still frequented it. Ḳūṣ was then known to Europeans as a staging-post in the transporting of spices. The profits from large-scale commerce, but also from urban craftsmanship (textiles in particular), created the wealth of its markets. The Christian community continued to be important and perfectly integrated into the Mamlūk state (they were employed in the administration of the funds of the sultans and *amīrs*); it was during this period that Athanasius of Ḳūṣ drafted in Arabic his grammar of the Coptic language. But the Muslim community now played a dominant role. Nothing, however, of an architectural nature remains of the Muslim city which seems to have developed around the ancient town, never penetrating the Christian enclave with its churches, grouped round the Pharaonic temple; this is because the severe post-mediaeval decline affected this peripheral zone first. The names are known, however, of some fifteen places of education, *madrasas* or mosques, including a *dār al-ḥadīth*, whose Sunnī Muslim teaching was felt throughout Upper Egypt, eliminating the last traces of Shīʿism which in the Mamlūk period continued to hold out only in Udfū, creating a movement of people from the minor centres of the province to Ḳūṣ, and from Ḳūṣ to Cairo, and ultimately spreading Islamic culture in Upper Egypt to an unprecedented extent. The Shāfiʿī chief *ḳāḍī* Taḳī al-Dīn Ibn Daḳīḳ al-ʿĪd al-Ḳushayrī, al-Nuwayrī and al-Udfuwī were the products of this social and cultural phenomenon.

The factors which had assisted the expansion of the town disappeared altogether towards the end of the Baḥrī period and at the beginning of the Circassian era. The fight against the Arab tribes, constantly growing in strength since the disappearance of Christian Nubia permitted them useful access towards the upper Nile valley and Sudanese Africa, necessitated the dispatching and then the maintenance of military units at other points of the valley, especially at Asyūṭ [*q.v.*], from the middle of the 8th/14th century. On account of changes affecting the equilibrum between the Arab tribes controlling the highways, the use of the route from ʿAydhāb to Ḳūṣ came to be endangered following the disorders of 767/1365-6; goods still had to be transported to Ḳūṣ via Ḳuṣayr until, faced with the instability prevailing over Mamlūk territory as a result of the decline of the administration of the Baḥrī Mamlūks, the traders decided to avoid Upper Egypt, unloading their wares at Ṭūr in the Sinai peninsula, closer to the Mediterranean. This occurred perhaps from 776/1374-5 onwards, the date at which a serious drought affected Ḳūṣ and the surrounding region. (al-Maḳrīzī, *Khiṭaṭ*, ed. Wiet, iii, 300).

Henceforward, the major commerce of the spice trade only occasionally passed through Ḳūṣ. The town, living on its assets, nevertheless remained probably the most important urban centre of Upper Egypt until the catastrophic crisis at the start of the 9th/15th century: famine, epidemic and political upheaval. According to al-Maḳrīzī, the plague of 808/1405-6 killed 17,000 people at Ḳūṣ (*Khiṭaṭ*, ed. Wiet, iv, 124), or a large section of the population. In the unfavourable demographic context of the 9th/15th century, and in view of the total transformation of the regional framework which had formerly promoted the prosperity of the town, this destruction of the fabric of the town proved irreparable. When the Mamlūk state had succeeded in surmounting the problems of the early decades of the century, at least from the time of the sultanate of Barsbāy [*q.v.*] onwards, the governor of Ḳūṣ was nothing more than a secondary figure under the authority of the *kāshif* of Asyūṭ. A section of the Muslim élite apparently left this declining city, and the proportion of the population formed by Christians began to rise once more, in an Upper Egypt no longer invigorated by commerce of any kind and henceforward less Islamised then the rest of the country. Commercial relations, on a reduced scale, with the Red Sea through the Ḳuṣayr highway, now tended to be directed from Ḳinā, and not from Ḳūṣ; it was to Ḳinā that the *ḳāḍī* was transferred after the Ottoman conquest. The major regional centre was henceforward Girga [*q.v.*], where the Hawwāri Bedouins [*q.v.*] settled; their hegemony was gradually established over the region in the course of the 9th/15th century and was to be maintained until the end of the 18th century. The material ruin of the mediaeval Muslim urban cadre seems to have been essentially brought about during the 17th century, a period when the city, although the seat of a *kāshif*, appears to have sunk to its lowest depths of degradation and dilapidation. It only recovered a certain degree of vitality in the second half of the 18th century, although the population numbered only 5,000 at the time of the French expedition.

The renewal of the town dates from the end of the 19th century. The swelling of the population following the rural exodus to towns, the opening-up of the town towards the outside world by means of education dispensed by foreign missions and the Egyptian state, and the installation of a modern sugar-producing industry, have brought about the rebirth of a expansive urban area, where, apart from a few isolated remains, nothing bears witness to the ancient mediaeval centre.

KŪS OWASİ [see ḳoṣowa].

ḲUSANṬĪNA [see ḳusṭanṭīna].

al-**ḲUSANṬĪNĪ** (in dialect Ḳsentīnī, in French Ksentini) Rashīd, Algerian dramatist, comic actor and song-writer. Under his real name Ibn al-Akhḍar (pronounced Bel-Lakhḍar) he was born on 11 November 1887 at Bouzarea (a surburb of Algiers). His father, a shoemaker, was a native of Constantine. As a child he attended a Ḳurʾānic school, where his

progress was mediocre, and he learned French in the street. Some years later he was apprenticed to a cabinet-maker. In 1909 he married one of his cousins by whom he had two daughters, both dying in infancy. Having grown up in a class of petty Algerian artisans, nostalgic for the past and constantly on the verge of poverty, al-Ḳusanṭīnī inherited a dual legacy of bitterness and failure. He felt ill at ease in his milieu, from which he brusquely broke away in 1914, abandoning his wife and setting out to travel the world. During the first months of the war he worked as a merchant seaman; Marseilles, Malta, Salonica, India, China and America were all to be visited in turn by this son of the Mediterranean, this bit of a "card", insatiably curious, interested in everything but attached to nothing.

Four years later he returned to France, where he worked for a while in a factory in Normandy and married a Frenchwoman. In 1920 he moved to Paris and obtained employment as a cabinetmaker in the workshop of a large store. It was at this time that he began attending theatres and he even played a number of walk-on parts, in particular at the Alhambra, the Châtelet and the Odéon.

Returning to Algiers in 1926, he rapidly became friendly with some amateur comic actors (ʿAllalū, Daḥmūn, Bash Djarrāḥ), and, a few months later, he appeared in public for the first time in a play by ʿAllalū, *Bou Akline* (*Bū ʿAklīn*), a play which owed its success to his flair for energetic bufoonery. From the very start he made a powerful impression, with his innate acting talent and his unusual gift for improvisation, expressing himself not only with his face but with his whole body, from head to foot; he was all movement. His silhouette, his mime, the twinkle of his eye, the unexpected laugh gave a sharp edge to each response emphasising the word, with an incomparable shaft of humour. To call him a comedian would be an understatement; he was a spectacle.

In fact, he was still not sure at this time how to make his own entry into the threatre, and his first attempt—*al-ʿAhd al-wāfī*, "The promise kept", a drama in three acts performed in Algiers in March 1927, was far from being a masterpiece. After this failure, he was luckier the following year with a comedy (*Bū Bōṛma*), which was warmly received by the Algerian public.

Over the next ten years, al-Ḳusanṭīnī was to compose, stage and act in twenty-five plays, as well as a number of farces, most of which have been lost. In this brief space of time he chalked up a number of important dates in the history of the young Algerian theatre. In fact, his successes were as varied as were the responses of the public and the critics, and the conditions under which the plays were staged. Even the settings varied: sometimes the municipal theatre of Algiers, Constantine or Oran, sometimes a cinema auditorium, sometimes, in a rural district, a hastily-adapted barn. Furthermore, these performances generally gave only a meagre profit to the author and his colleagues, actors, singers, dancers and musicians.

During this same period, al-Ḳusanṭīnī played minor roles in French films like *Sarati le Terrible* and *Pépé le Moko*, alongside Harry Baur and Jean Gabin.

After 1938 he practically stopped writing for the stage, but, deeply attached to his profession, he was acting in the plays of his successor, Muḥyī 'l-Dīn Bāsh Ṭarzī, almost to his last day. He died in Algiers on 2 July 1944, having lived for close on twenty years the somewhat austere existence of the milieu to which he belonged; he was however, a straightforward man, generous and sincere, an enemy of all forced pretence and all hypocrisy.

Written in Algerian dialect and almost entirely unpublished, al-Ḳusanṭīnī's work covers a wide variety of genres. But in spite of the diversity of form, the central core is one of powerful originality. His work comprises:

(a) Approximately two hundred satirical songs, for the most part on moral and social themes, often written as parodies of well-known Arabic and French songs. About a hundred have been recorded on disc. The most successful of these are: *Mən taḥt l-oʿdjār*, "Under the veil"; *Wlīd l-blād*, "The father's son"; *Ḳālā ḳulnā* "The gossips"; *Bīh grello* "That gives him the itch"; *Djārī Sīd-Aḥməd* "My cousin Sid Ahmad"; *Z-zmān tbəddəl* "Times have changed";

(b) About thirty sketches, composed of series of humorous and entertaining scenes with two or three characters, accompanied by songs, in a realistic setting, that of the Algerian petit-bourgeoisie, whose foibles and vices are energetically satirised. Half of these have been recorded on disc: the peasant before the judge, the rustic and the man-about-town, the drunkard, the old man and the old woman, the old woman and the ghost, the mysterious table, the unwilling sportsman Bachir, etc.

(c) Twenty-five stage-plays, listed below in chronological order: 1. *al-ʿAhd al-wāfī* (see above); 2. *Bū Bōṛma*, comedy in three acts, Algiers, 22 March 1928; 3. *Zeghirebbane ou les deux mangeurs de haschisch et le fils du roi* (*Zrirabbān*), comedy in three acts, Algiers, 15 February 1929; 4. *Tūnəs w-əl-Djazāʾir*, "Tunis-Algiers", revue in two acts, Algiers, 11 March 1929; 5. *Khūdh ktābī* "Take my book", comedy in three acts, Blida, 13 November 1929; 6. *Bābā Ḳaddūr əṭ-ṭəmmāʿ* "Bābā Kaddour the Envious", or "My cousin from Istanbul", comedy in three acts, Algiers, 20 December 1929; 7. *Lundja 'l-Andalusiyya*, comedy in five acts, Algiers, 28 February 1930; 8. *Shədd rūḥək* "Take care!", comedy in three acts, Algiers, 25 January 1931; 9. *Thukba f-əl-arḍ* "A hole in the ground", comedy in three acts, Algiers, 18 February 1931; 10. *Čənəč* "Carry on talking!", comedy in three acts, Algiers, 11 January 1932; 11. *Bū Səbsī* "The man with the pipe", comedy in three acts. Algiers, 18 January 1932; 12. *ʿAysha w-Bēndū*, comedy in four acts, Algiers, 22 January 1932; 13. *al-Murṣṭān*, "The lunatic asylum", comedy in three acts, Algiers, 25 January 1932; 14. *Fāḳū* "They woke up!", revue in two acts and twelve tableaux, Algiers, 5 February 1932; 15. *Yā rāsi yā rāshā* "It's her or it's me!", comedy in two acts, Algiers, 7 February 1932; 16. *Zīd aʿlīh* "Outdo him!", melodrama in three acts, Algiers, 2 January 1933; 17. *Aḷḷāh yəstərnā*, "Allah protect us!", comedy in three acts, Algiers, 23 January 1933; 18. *Bābā Shīkh*, comedy in three acts, April 1933; 19. *Təkhīr əz-zmān*, "The time is ripe", comedy in three acts, Mascara, 1933; 20. *Khūdnī b-əs-sīf*, "Take me by force!" comedy in one act, Djidjelli, 20 November 1934; 21. *Sbābī djārī* "It's my neighbour's fault!", comedy in one act, Djidjelli, 20 November 1934; 22. *Shədd mlīḥ* "Hold tight!", comedy in two acts, Orléansville, May 1935; 23. *Ḳaṣba Ūtīl*, comedy in two acts, Fez, 1936; 24. *Yā ḥasra ʿlīk*, "All this trouble you're causing me!", melodrama in three acts, Bougie, 3 July 1936 (inspired by Marcel Pagnol's film *Angèle*); 25. *Ash ḳālū* "What are they saying?", comedy in three acts, Blida, 19 February 1938.

The theatrical work of al-Ḳusanṭīnī thus presents a rich variety. It is in fact possible to classify his plays as: drama (1); melodramas (2); revues (2);

farces (8), which were performed at public festivals and whose essential object was to entertain the spectators; moral comedies (7), where the author satirises Algerian society; and finally, comedies of character (5), which describe the failings and vices of humanity. But it is clear that such a classification cannot be absolute, since all these elements, or at least the majority of them, combine, to varying degrees, in each play: there is a plot, simple to the point of being negligible, a depicting of morals and a description of human nature in general, set in motion with the full panoply of sarcasm, with man as a prey to a quasi-tragic contradiction, represented by the blunt and malicious rustic, or one of his rivals, the vagabond, the insecure, the unfortunate, condemned to do battle in the jungle of society and struggling there in his own way, clumsily, nervously, sometimes craftily, his conscience never easy, but at the same time anxious for respectability, secretly longing to integrate himself in the world which rejects him, always ready to accept the situation that presents itself, and even more than this, to be excited by outward appearances, as a means of approaching reality; in short, a Charlie Chaplin figure, drinking anisette and munching Barbary figs.

The comedy of al-Ḳusanṭīnī depends to some extent on the characters, but more frequently on the situations, and also on the wit of the dialogue, which in most cases is not included simply for its own sake, but with the object of throwing light on a character.

However, without being totally pessimistic, the themes tackled by al-Ḳusanṭīnī are not primarily light-hearted—a fact not uncharacteristic of a humorist. We find here the naïve provincial cheated by flatterers and mischievous servants, vain bourgeois merchants exploited by swindlers, egotistical parents sacrificing the well-being of their children for their own interests or for social traditions, etc. But this gloom, which should not be exaggerated and which al-Ḳusanṭīnī, a keen observer, has drawn from his own experience of life, is always concealed beneath his comic sense. At the moment where comedy is in danger of turning into tragedy, farce intervenes, with its sometimes rather crude elements, and brings back the laughter. Predictably, under these circumstances, the dénouements tend to be happy. Al-Ḳusanṭīnī is no more concerned than was Molière in making his endings plausible. Often, in fact, the dénouement should logically be an unhappy one; but then it would no longer be a comedy.

Al-Ḳusanṭīnī is a comic author and not a philosopher. It is vain to attempt the discovery of a coordinated doctrine in his works. However, it is not impossible to draw from his plays a group of ideas which make up what might be called a system of morality.

Everything which is contrary to nature and hostile to reason is anathema to al-Ḳusanṭīnī: the prejudices which trap Algerian society in a stifling traditionalism, the superstitions which divert the faithful from true piety, the hypocritical distortion of religion to favour the machinations of corrupt individuals and profiteers, and the greed which transforms man into a kind of moral monster. Conversely, he is eager to spring to the defence of the young, even when they are not totally irreproachable.

It is clear that such a philosophy might appear to be a somewhat superficial approach to the problems; nevertheless, the fact remains that it is a philosophy closely linked to the life experienced by the mass of Algerians between the First and Second World Wars, concerned with the images that people saw around them every day, in the street as well as within their families, and this is fairly remarkable.

Al-Ḳusanṭīnī confined himself in general to making rough drafts, sketching out his ideas, laying down the simple foundations of what was to become a play on the stage. His style also reflects this improvisation: it is a comedy style, meaning that it commends itself better to performance than to reading. It is admirably suited to its purpose, natural, alive, full of ingenious features and significant images, always pleasing and witty, often provocative.

In his satirical verses, which by contrast were written before being sung, the phrases are short and staccato, punctuated by exclamations and rhetorical appeals; it could be said that they represent an almost breathless approach to the pursuit of emotion.

In conclusion, it is thanks to al-Ḳusanṭīnī that Arabic comedy rose for the first time in Algeria to heights similar to those attained, for example, in Athens with Aristophanes, in Rome with Plautus and Terence, and in France with Georges Courteline.

For his high qualities of theme and of form, in drama as well as in his satirical songs, al-Ḳusanṭīnī deserves to be long remembered.

KUSAYLA b. Lamzam, or Kasīla was, in the tradition of the Massinissa and of Jugurtha, one of the most eminent figures in the struggle of the Berbers to preserve their independence. In 55/674, at the time when the *mawlā* Abu 'l-Muhādjir Dīnār came from Egypt to replace ʿUḳba b. Nāfiʿ as governor of the recently-conquered province of the Maghrib, Kusayla was certainly "king" of the Awraba, a broad alliance of tribes of the Barānis group, for the most part sedentary. The territory of the Awraba was centred at that time on the region of Tlemcen, called Pomaria in antiquity, and it probably stretched from west of the Aurès range to Walīla (= Volubilis) to the north of Fez. It may be recalled that Idrīs [*q.v.*] was brought to power by the Awraba of Walīla. At the time of the conquest, the majority of the latter were no doubt Christianised. In fact, according to al-Bakrī their

capital Tlemcen maintained, along with the features of its ancient civilisation, a large Christian population until the 5th/11th century. It was at Tlemcen that Abu 'l-Muhādjir was confronted by Kusayla. The new governor, preferring a policy of conciliation to one of force, took the opportunity of making an ally of the "king" of the Awraba. Kusayla became converted to Islam and henceforward lived with Abu 'l-Muhādjir at Takerwān which had replaced the capital founded by ʿUḳba b. Nāfiʿ, and the name of which, by its prefix, symbolised a full scheme of Arab-Berber agreement.

The death of the founder of the Umayyad dynasty, Muʿāwiya, led to a change of policy. In 62/681 ʿUḳba set out once again for Ifrīḳiya, dreaming only of vengeance and a great *djihād*. With him, the policy of subjugating the Berbers by force took on a new lease of life. His first act was to put Abu 'l-Muhādjir in irons, to take Kusayla prisoner, and to re-instate as the capital, with its former name, the place which he had initially selected for the purpose during his first term of authority. Subsequently, forcing Abu 'l-Muhādjir and Kusayla to accompany him, he embarked on the major expedition which was supposed to take him—there is no serious reason to doubt it—as far as the Atlantic. On the way, in spite of the warning of Abu 'l-Muhādjir, he went out of his way to humiliate the Berber "king". We are familiar with the typical scene, described in all the sources, where ʿUḳba, as a means of humiliating Kusayla, forces him to skin a sheep in his presence.

In the early stages, the lightning campaign that he initiated, the more unexpected in that it followed the policy of peace and conciliation of his predecessor, seems to have had the advantage of surprise, which explains, in part at least, his initial decisive success. But resistance soon became organised. In fact, ʿUḳba made no major conquest. The Barānis, the most romanised of the Berbers, allied themselves with the Byzantines. The Awraba secretly made contact with Kusayla, their chief. He—it is not known from where—escaped from detention under ʿUḳba, and assumed leadership of the resistance. Over-confident in his successes, did ʿUḳba for his part, as all the sources assert, commit the foolish error of sending the bulk of his troops towards al-Ḳayrawān, keeping with him only a handful of men, some of three hundred horsemen? Was there an over-riding need to relieve the capital threatened by the Byzantines? Or was this more simply a question of an act of indiscipline on the part of soldiers exhausted by a long and tedious campaign? Whatever the case may have been, to the south of Biskra, at Tahūda (= Thabudeos), ʿUḳba found himself confronted by Kusayla at the head of powerful Barānis and Byzantine contingents. Here he found, along with all his men, including Abu 'l-Muhādjir, the epic and spectacular death of which he dreamed and which perpetuated his legend. A mausoleum, that of Sīdī ʿUḳba, was erected on the site of the battlefield and became a centre for pilgrimage which is still revered today.

At al-Ḳayrawān, there was panic, which illustrates the importance of Kusayla's victory and especially the strength of his forces. The idea of evacuating the country, proposed by Ḥanash al-Ṣanʿānī, finally prevailed over that of resistance, supported by Zuhayr b. Ḳays al-Balawī. So the army withdrew. But al-Ḳayrawān did not lose the whole of its Arab and Muslim population. It had already advanced beyond the status of a simple military camp, a fact which deserves underlining. Between the years 64-9/683-8, it became the capital of a huge Berber kingdom ruled by Kusayla. Ibn ʿIdhārī (*Bayān*, i, 31) notes that: "Kusayla granted *amān* to the Muslims who had stayed in al-Ḳayrawān. He established himself there as sovereign (*amīr*) of all the inhabitants of Ifrīḳiya and the Maghrib, including the Muslims present in that area." Hence no xenophobia, no persecution, no religious fanaticism. We may underline this fact, reported by witnesses who had no cause to flatter their adversaries. Kusayla himself, we are assured, took care not to renounce Islam after his victory. These measures are sure evidence of a political programme designed to deprive the Arabs of any religious pretext for invading the Maghrib once again.

But the wave of conquest was not yet exhausted. When the crisis which arose in the East with the revolt of Ibn al-Zubayr had abated, Zuhayr b. Ḳays al-Balawī set out for Ifrīḳiya with a strong army. Kusayla, who was not sure of the conditions prevailing at his rear in al-Ḳayrawān, chose to go and wait for his enemy at Mams, 50 km. to the west of the capital, thus in a region where mountains could offer refuge in the event of defeat. The battle, in which he lost his life, went against him. But it should not be believed that it was as decisive as our sources claim. In fact, although victorious, Zuhayr preferred to evacuate the region again, so as not to succumb to the good things of this world, so we are told. In turn, he met his death on the return journey, at Barḳa where the Byzantines had effected a landing. Was this supposed to be a combined operation, designed to catch the Arabs in the Ifrīḳiyan trap, a plan which failed because of poor co-ordination? If Kusayla's attempt to found a great empire governed from the city founded by ʿUḳba b. Nāfiʿ had succeeded, the history of the Maghrib would certainly have taken a different turn. But were the Berbers ripe then for such a scheme? With al-Kāhina [*q.v.*], the torch of resistance passed subsequently to the Buṭr, but with no more lasting success.

ḲUṢAYR, a port situated on the African

shore of the Red Sea, a little to the north of lat. 26°. A gap in the madreporic barrier which runs along the coast (A. Prompt, *La vallée du Nil*, in *Bull. de l'Institut Égyptien*, 3rd ser., 1891) has allowed at various periods of history the utilisation of this anchorage which, by virtue of the sweep described by the Nile towards the east at the level of Ḳifṭ, Ḳūṣ and Ḳinā [*q.vv.*], is in fact the nearest access from the sea to the Nile (about 200 km.).

Remains of works from the period of the Middle Kingdom and from Ptolemaic times (P. Jouguet, in *Histoire de la nation égyptienne*, iii, 94-5) show that the site was used from ancient times onwards, although it lost its importance in the Roman period when, because of difficulties in navigation through the Red Sea to Suez, landing was preferred on the coast further to the south, at the port of Berenice, in the neighbourhood of the future ʿAyd̲h̲āb, despite the increased distance along the track between the sea and the Nile thereby required (G. W. Murray, *The Roman roads and stations and the Eastern Desert of Egypt*, in *Jnal. of Egyptian archaeology*, xi [1925]). Towards the end of the Romano-Byzantine period, inadequate control of the regions through which this more southerly road passed probably brought Ḳuṣayr an increased importance, and at the opening of the Islamic period it served as a port of embarkation for pilgrims travelling to the Ḥid̲j̲āz.

However, when the Fāṭimid caliphate in Cairo revived the ancient traffic of Greco-Roman times with the Yemen and the Indian Ocean shore lands, the security which was re-established in the mountainous desert between the Nile and the Red Sea favoured the use once more of the southerly route to ʿAyd̲h̲āb, a port which was moreover more or less opposite the holy places of the Ḥid̲j̲āz. From the end of the 5th/11th century, the installation of the capital of Upper Egypt at Ḳūṣ nevertheless brought a certain amount of traffic to Ḳuṣayr, even if it was still much less important than that of ʿAyd̲h̲āb. Whilst ʿAyd̲h̲āb was over two weeks' journey from Ḳūṣ, Ḳuṣayr is given as only three days' journey from it, and is described as "the port of Ḳūṣ". In the Mamlūk period, naval units intended to maintain Mamlūk control over the Red Sea were stationed there, and some commercial operations were conducted through Ḳuṣayr. The western portolans of the 14th century mix up, however, Ḳūṣ and Ḳuṣayr (which last they pinpoint correctly but call "Chôs"). The revival of Ḳuṣayr increased in tempo after 767/1365-6 when the abandoning of the ʿAyd̲h̲āb road, by now increasingly unsure, brought about the decline of the latter port, from which large-scale commerce now turned away; but after some fifty years, it was Ṭūr, on the Sinai peninsula, which inherited the role of ʿAyd̲h̲āb as the main spices port on the Red Sea.

The local importance of Ḳuṣayr continued to grow in the 9th/15th century. Apart from the fact that the spice merchants sometimes still used it as a port of disembarkation, Ḳuṣayr became the main outlet for Upper Egypt on to the Red Sea. Corn exported to the Ḥid̲j̲āz travelled via Ḳuṣayr, which had become the departure port for the Pilgrimage and whence one could also travel to the ports of Ethiopia. The inconspicuous Christian missions which tried to establish relations with the Negus of Ethiopia set off from Ḳuṣayr, and Fra Mauro's map of 1460 gives it the name of "Cuser" (the site of ʿAyd̲h̲āb further to the south symptomatically received that of "Chaser"). Ḳuṣayr's primacy was all the more firmly established because the economic centre of gravity of the Upper Ṣaʿīd was from this time onwards fixed in the northern part of the province. The beginning of the Ottoman occupation saw the rise of Ḳinā, which replaced Ḳūṣ as the regional centre and also, it seems, as the main departure point for Ḳuṣayr. The greater part of commercial traffic continued to consist of corn, continuously despatched to the Ḥid̲j̲āz, and of coffee imported from the Yemen. In the 18th century, Hawwāra control over Upper Egypt did not harm the port's traffic, in fact the reverse, since Ḳuṣayr's situation along the route to the Indies attracted the attention of the French and British as much as that of the Beys of Cairo. Bonaparte's soldiers found at Ḳuṣayr an agglomeration essentially made up of stalls open to the sky, with a very scanty permanent population (this being also the case with ʿAyd̲h̲āb in his time), and with Ḥid̲j̲āzī influence very strong (*Description de l'Égypte, État moderne*, i, 193-202). Under Muḥammad ʿAlī, buildings for the Egyptian government were again set up at Ḳuṣayr. The small town became one of the district centres of the province of Ḳinā. The pilgrim traffic remained each year the main source of activity for the port, but after 1859 the Pilgrimage traffic was deflected to Suez. At the time of the 1897 census, Ḳuṣayr had *ca.* 1,802 inhabitants.

ḲUṢAYR ʿAMRA [see ARCHITECTURE].

ḲUṢAYY, an ancestor of Muḥammad in the fifth generation and restorer of the pre-Islamic cult of the Kaʿba in Mecca.

His genealogy is unanimously given in all sources as Ḳuṣayy b. Kilāb b. Murra b. Kaʿb b. Luʾayy b. Fihr or Ḳurays̲h̲ b. G̲h̲ālib (Ibn al-Kalbī-Caskel, *Ǧamhara*, Tab. 4), and his life and exploits are recorded by our sources in three recensions which only differ from each other in trifling details; these go back to Muḥammad al-Kalbī (d. 146/763-4), Ibn Isḥāḳ (d. 150/767) and ʿAbd al-Malik b. ʿAbd al-ʿAzīz b. D̲j̲urayd̲j̲ al-Makkī (d. 150/767). Ḳuṣayy is represented, like the usual legendary type of hero who founds a city, as having passed his childhood and youth far from his native land and in obscurity: a younger son of Kilāb b. Murra, a descendant of the Ḳurays̲h̲ whose supremacy in Mecca had been replaced by that of the Banū K̲h̲uzāʿa, he loses his father soon after his birth and is taken by his mother Fāṭima bint Saʿd b. Sayāl who had married again, her second husband being a member of the tribe of Banū ʿUd̲h̲ra, to that new husband's tribe in the north of the Arabian Peninsula (in the neighbourhood of Sarg̲h̲, according to Ibn al-Kalbī [in Ibn Saʿd, i/1, 36, 26] a place on the Syrian frontier of the Ḥid̲j̲āz, near Tabūk [Yāḳūt, iii, 77], or right into Syrian territory near Yarmūk [al-Bakrī, 773]); here his original name of Zayd was changed to Ḳuṣayy from the root *ḳ-ṣ-y*, "to go far away". Having learned his true origin from his mother, he returned to Mecca where as a result of his marriage with Ḥubbā, the daughter of the K̲h̲uzāʿī chief Ḥulayl b. Ḥubs̲h̲iyya, who controlled all the arrangements for the worship of the Kaʿba and the pilgrimage, he soon acquired an important position in the city. On the death of his father-in-law, Ḳuṣayy managed to succeed him in his offices, either after a long struggle with the K̲h̲uzāʿa, or as a less reliable tradition has it by means of a tricky bargain which he made with (Abū) G̲h̲ubs̲h̲ān, with the son or only some more distant

relative of Ḥulayl (cf. Ibn Durayd, *al-Is̲h̲tiḳāḳ*, 277, 7 with 282, 2). The detailed narrative of the events which brought Ḳuṣayy to fame is given in the article K̲h̲uzāʿa.

Becoming master of Mecca and guardian of the Kaʿba, Ḳuṣayy rebuilt the latter and organised its worship; he united the clans of the Ḳurays̲h̲, who were previously scattered, into a solid body which assured them the mastery of the town for the future; indeed it is even said that it was on this account that the name Ḳurays̲h̲ (from *taḳarras̲h̲a*, "to combine") replaced the old name Banu 'l-Naḍr; Ḳuṣayy is said to have been called *al-Mud̲j̲ammiʿ* "the re-uniter". On his death, the sacred offices that had become his perquisites, were inherited by his four sons ʿAbd al-Dār, ʿAbd Manāf, ʿAbd al-ʿUzzā and ʿAbd Ḳuṣayy, the second of whom through his son Hās̲h̲im was the direct ancestor of the Prophet. The house which Ḳuṣayy had built himself quite close to the Kaʿba was henceforth the centre of the civil and religious functions of the Ḳurays̲h̲ under the name *Dār al-Nadwa*. To Ḳuṣayy is also attributed the discovery and digging of the well of al-ʿAd̲j̲ūl (Ḳuṭb al-Dīn = *Chron. Stadt Mekka*, ed. Wüstenfeld, iii, 107, below; Balād̲h̲urī, *Futūḥ*, 48; Yāḳūt, iii, 19-20; al-Bakrī, 646, cf. 766).

From what has been said above, it is evident that the Ḳurays̲h̲ regarded Ḳuṣayy as their true founder and the founder of the Kaʿba. The antiquity of this tradition is attested by a verse of al-Aʿs̲h̲ā (al-Bakrī, 489) and by several of Ḥassān b. T̲h̲ābit. Later historiography has tried to harmonise this old native tradition with the genealogical system which later became established and according to which Ḳurays̲h̲ = Fihr b. Mālik b. al-Naḍr (Wüstenfeld, *Geneal. Tabellen*, N.) as well as with the tradition quite different in origin and character of the Abrahamic cult of the Kaʿba and its vicissitudes under the D̲j̲urhum and the K̲h̲uzāʿa. Ḳuṣayy is therefore to Mecca "what Theseus was for Athens and Romulus for Rome" (Caetani). In the present state of our knowledge, it is impossible to say whether he should be regarded as a historical personage transformed into a hero or the mythological transfiguration of a hero. His name is found, although by no means commonly, in the Arab onomasticon: a Nahīk b. Ḳuṣayy al-Salūlī, a contemporary of Muḥammad, is mentioned by Ibn al-At̲h̲īr, *Usd*, vi, 14-15; Ibn Ḥad̲j̲ar, *al-Iṣāba*, ed. Cairo vi, 257; the *D̲j̲amhara* of Ibn al-Kalbī (Caskel, Tab. 114) mentions a Ḳuṣayy b. ʿAwf and (Tab. 125) a Ḳuṣayy b. Mālik. The fact that this name is to be recognised in the קציו of the Nabataean inscriptions and probably also in the Κουσας of a parchment from Dura on the Euphrates (cf. Cumont, *Les fouilles de Doura-Europos*, Paris 1926, 320) does not justify us in concluding that it is of northern origin, since as we have seen, it is found among different tribes. The tradition which makes Ḳuṣayy pass his childhood in Syria is in favour of the hypothesis which makes the worship of the Kaʿba introduced, or at least renewed, as a result of influences from the north; perhaps in some statements of tradition (e.g. al-Kalbī, quoted by Ibn Saʿd i/1, 39, 1-11) we have an echo of an actual fact, namely that on the old cult of Hubal [*q.v.*], "the idol of the K̲h̲uzāʿa" there was super-imposed that of al-ʿUzzā and Manāf-Manāt, for which we have definite evidence in Northern Arabia in particular.

In any case, the figure of Ḳuṣayy soon became legendary; his story, as we have seen, has the characteristic features of the legends of eponymous heroes; his alleged sons are only symbols of the part played by Ḳuṣayy in the religion of Mecca. If it is not quite true that he was the object of regular divine worship (the name ʿAbd al-Ḳuṣayy borne by one of his sons does not necessarily imply the divine character of the father), he was undoubtedly venerated according to the ancestor worship, which certainly existed in pre-Islamic Arabia, although we know very little about it. The eponymous hero of the people of al-Ṭāʾif, T̲h̲aḳīf, is analogous in character to Ḳuṣayy. The latter's memory remained particularly associated with the Dār al-Nadwa [*q.v.*].

Whatever the origins may be, it is certain that at the beginning of the 6th century A.D. the control of the Kaʿba and of the *ḥad̲j̲d̲j̲* was in the hands of a clan claiming descent from Ḳuṣayy and that the Ḳurays̲h̲ were agreed that he was the founder of their tribal unity. It is to be noted on the other hand that even if this clan included among its members some of the recognised chiefs of the Ḳurays̲h̲, among others the Banū Umayya, it was far from having complete political and financial control in its hands; the Banū Mak̲h̲zūm, for example, one of the most powerful families in Mecca, were not descended from Ḳuṣayy. It seems probable then that the Meccan "republic" was constituted on the initiative and under the direction of the Banū Ḳuṣayy, but that the latter were forced to admit into their social organism other clans having the same rights and privileges as themselves, although the prestige of noble blood and supremacy in religious matters always remained the exclusive prerogative of the Banū Ḳuṣayy.

(G. Levi Della Vida)

ĶUṢDĀR, Ḳuzdār, the name of a town in mediaeval Islamic Balūčistān [*q.v.*], modern town and district of K̲h̲uzdār in the former Kalāt state [see kilāt] in Pakistan. It lies in lat. 27° 48′ N. and long 66° 37′ E. at an altitude of 4,050 feet, some 85 miles south of Kalāt; the long, narrow valley of the Kolachi River in which it is situated is strategically important as a nodal point of communications, from Karāčī and Las Bēla [*q.vv.*] in the south, from Kaččhī in the east, from Kalāt in the north, and from Makrān and K̲h̲ārān [*q.vv.*] in the west.

Ḳuṣdār was first raided by the Arabs under Sinān b. Salma al-Hud̲h̲alī, who was appointed governor over the Indian marches early in Muʿāwiya's caliphate by Ziyād b. Abīhi, and then by al-Mund̲h̲ir b. al-D̲j̲ārūd al-ʿAbdī (Balād̲h̲urī, *Futūḥ*, 433-4). The 4th/10th century geographers mention it, together with Kīzkānān or Ḳīḳān [see kilāt] as one of the towns of the region of Ṭūrān or Ṭuwārān, which must have lain in the east-central part of Balūčistān (see Minorsky, *EI*[1] art. *Ṭūrān*), and as being 80 *farsak̲h̲s* from al-Manṣūra in Sind. Kīzkānān is mentioned in he middle years of this century as being the residence

of the local ruler, but Ḳuṣdār is described as the chief town, with a citadel and a flourishing mercantile quarter, to which traders from Khurāsān, Kirmān and India resorted, and with fertile agricultural lands around it (Ibn Ḥawḳal², 324-6, tr. Kramers and Wiet, 317-20; Muḳaddasī, 476, 478, 486; *Ḥudūd al-ʿālam*, 123, 373; Yāḳūt, ed. Beirut, iv, 353; Le Strange, *The lands of the Eastern Caliphate*, 331-2). Ḳuṣdār was certainly the seat of the local ruler by the later years of the century, the time of the rise of the early Ghaznawids, for in 367/977-8 Sebüktigin reduced the ruler of Ḳuṣdār to obedience. However, his son Maḥmūd of Ghazna had to come once more and attack Ḳuṣdār in 402/1011 and make its ruler tributary (ʿUtbī, in Nāẓim, *The life and times of Sulṭān Maḥmūd of Ghazna*, 74), and his son Masʿūd in 420-1/1030-1 also sent his uncle Yūsuf b. Sebüktigin to Ḳuṣdār and Makrān on a punitive expedition (Bayhaḳī, in R. Gelpke, *Sulṭān Masʿūd I. von Ġazna. Die drei ersten Jahre seiner Herrschaft (421/1030-424/1033)*, Munich 1957, 87 ff.).

Thereafter we hear little about Ḳuṣdār. In recent times it fell within the Khānate of Kalāt. H. Pottinger visited it in 1810 and found it a small town of *ca.* 500 houses, it being the summer residence of Mīr Murād ʿAlī of the Brahūī Kambarānī tribe, brother-in-law of Maḥmud Khān of Kalāt (*Travels in Beloochistan and Sinde; accompanied by a geographical and historical account of those countries*, London 1816, 35-7). C. Masson noted a large tepe north of the town of Khuzdār, with the remains of mud walls, presumably relics of the mediaeval Ḳuṣdār (*Narrative of various journeys in Balochistan, Afghanistan and the Panjab*, London 1842, ii, 41-4). In 1870 a fort was constructed there and a garrison placed in it by Mīr Khudādād b. Miḥrāb Khān of Kalāt in the course of his warfare with the Djām or local ruler of Las Bēla [*q.v.*]. Khuzdār town and district now form a *taḥsīl* of the Djahlawān Subdivision of the Kalāt District of Pakistan, with a population in 1961 of 26,476.

(C. E. Bosworth)

KŪSH, a Biblical personage whose name appears in ch. x of Genesis in the genealogical lists of the posterity of Noaḥ (Nūḥ). According to the information in verses 6-7, Kūsh, the eldest son of Ḥām, is the brother of Miṣrayim, Pūṭ and Kenaʿan (Kanʿān), the father of Sebāʾ, Ḥawīlāh, Sabtāʾ, Raʿmāh and Sabteka' and, by Raʿmāh, the grandfather of Shebāʾ and Dedān. Miṣrayim is Egypt, Pūṭ doubtless Libya, Kenaʿan, the land of Canaan (Palestine and Phoenicia). Most of the names of the descendants of Kūsh are to be attached to the maritime regions of the Red Sea. Sebāʾ has been identified hypothetically with the port of Saba in the Bay of Adulis on the south-west of the Red Sea, which is mentioned in Strabo (xvi, 4, 8, 10); Ḥawīlāh, which is given in Genesis xxv, 18, for the western border of the Ishmaelites' territory, has been associated with the name of the South Arabian tribe of Khwln; is Sabtah the Σαβατα of Strabo (xvi, 42), the Sabota of Pliny (vi, 155, xii, 63), the Σαββαθα of the *Periplus of the Erythraean Sea* (27)? Whatever may be the case, it is to be located in the Arabian peninsula, as Raʿmāh is placed by various authors in Ḥaḍramawt. Shebāʾ, which is not the Kingdom of Saba, is situated in the north-west of Arabia. As for Dedān, this is the oasis of al-ʿUlā, near Madāʾin Ṣāliḥ, in the north-east of the Ḥidjāz.

Thus Kūsh appears to be linked by this genealogy with Arabia and the Red Sea. But in verse 8 of the same ch. x of Genesis, which seems to reflect another tradition, he is presented as the father of Nimrōd (Arabic Namrūd) with whom Mesopotamia is associated.

Indeed, in the whole text, Kūsh, as an ethnic term, in the ordinary way designates neither Arabia nor Mesopotamia, but the neighbouring populations of Egypt, on the south-west borders of the land, i.e. precisely the region which the Egyptians called Kʾsh (see also Babylonian *kūshu*, Assyrian *kūsu*, Old Persian *kūsha*). An oracle of Ezekiel (xxix, 10) also announces the destruction of the land of Egypt "from Migdol to Syene (from the extreme north to the extreme south) and as far as the frontier of Kūsh". In 2 Kings xix, 9, the Pharaoh Tirhāqāh, of the so-called Ethiopian dynasty, is called King of Kūsh. Everything leads us to suppose that Kūsh is the name of ancient Nubia, i.e. of the region which extends as a whole from the first to the fourth cataract of the Nile. The Septuagint translates it in general as Ethiopia, which, because of the value placed on the word "Ethiopian" in antiquity, is at the source of the erroneous interpretation of *kūshī* as "black" or "African".

In the Ḳurʾān, Kūsh is named no more than the sons of Nūḥ. Islamic tradition, which knew his name, however, supplies pieces of evidence which do not agree totally with one another or with the evidence of the Bible. They are all reported by al-Ṭabarī. According to some, Kūsh, son of Ḥām, is the brother of Miṣrayim, Ḳūṭ (Biblical Pūṭ) and Kanʿān (*Annales*, i, 212, 217). But elsewhere Kūsh appears as the son, and not the brother, of Kanʿān, himself presented as a fourth son of Ḥām (i, 219, 220; see also i, 192; Ibn al-Athīr, i, 50). He is given finally as the predecessor of Kanʿān as king of the universe after the disappearance of the sons of Afrīdūn (*Chronique*, French tr. H. Zotenberg, i, 120). In all the traditions, he is the father of Namrūd, tyrant (*mutadjabbir*) of Bābil, conforming with Genesis, x, 8. But if, in the general way, the paternity of the Ḥabasha as well as those of the peoples of Sind and Hind are attributed to him, the Nubians on the other hand are never explicitly associated with him. In the genealogy supplied by al-Ṭabarī (i, 223) on the authority of Wahb b. Munabbih, it is from Kanʿān, brother of Kūsh, and his wife Ḳrnbyl, great-granddaughter of Yāfith, that the Nubians are descended, together with the populations of Fezzān, the Zandj, the Zaghāwa and all the Blacks (or, according to another passage, the blacks with fuzzy hair). Elsewhere (i, 216), it is Ḥām who is the only one named as the ancestor of these peoples.

The Kushitic languages.—It is from the name Kūsh that the word Kushitic is derived, under which are grouped a body of Hamito-Semitic (but not Semitic) languages spoken by about fifteen million people, the majority of them Muslims, scattered over a vast territory of almost 2 million km², within which are included the populations speaking the Semitic languages of Ethiopia. The area is constituted basically by the Horn of Africa and spreads in the north into Sudanese and Egyptian territory to around the first cataract of the Nile and in the south into Tanzania, as far as the 4th degree of latitude.

Bedja (Tu-Beḍawiye) is spoken by Muslims in the north of the area, in the northern part of Eritrea, and stretches between the Nile on the west (where it is in contact with Nubian and Arabic) and the Red Sea (where it is in contact with Semitic Tigré) as far as the environs of Ḳuṣayr. It is true that in the northern-

most part, the Muslim ʿAbābde tribes are today almost entirely Arabised. At the same time, in the south, a part of the Beni Amer (Banū ʿĀmir) nomads have abandoned Bedja for Tigré. Between these two groups are to be distinguished, with their particular dialects, in the centre the Bishari and Hadendowa, and in the south the Halenga and Arteiga.

Still further to the south, on the shores of the Red Sea, there is the area of Saho and ʿAfar, other Kushitic languages.

Saho is the language of an almost entirely Islamised population leading a pastoral existence in the south of the Massawa region in Eritrea. The Irob-Shao Christians, who constitute an enclave on the Abyssinian plateau, have partially abandoned Saho in favour of Semitic Tigrinya.

The language of the ʿAfar (Arabic Danākil) is spoken in the south of Eritrea, in the north of the region of Djibouti, and extends towards the west as far as the Awash River.

The Somali-speaking tribes who inhabit the extreme shore of the Horn at the mouth of the Tana River are also almost entirely Islamised. The most important dialects are those of the Isāk who inhabit the shore of the Gulf of Aden and the Darōd tribes at the edge of the Indian Ocean as far as the north of Kenya and who also inhabit the province of Ogaden in Ethiopia. In the north, in the territory of Djibouti and as far as Diré-Dawa in Ethiopia, it is the dialect of the ʿĪsā which is widespread.

In the valley of the Wēbi Shebelle as far as Khamar (ancient Mogadishu), it is Hawiya which dominates, while in the south, in the province of Benadir, Digil is spoken, a dialect of the Sab, also widespread in Aden among the emigrant foreigners called *Djabartis* [see DJABART].

The Oromo (whom the Europeans, adopting an Abyssinian word resented as pejorative by the natives, call Galla) at present occupy a vast territory from the centre of the Abyssinian plateau as far as the centre of Kenya (to the north of Mombasa and along the Tana River). These are on the whole pagans. Islam, however, has conquered a part of the northernmost populations. Of the dialects of the Oromo, Mača in the west, Tulamā in the north-east and Boranā in the south-east, are very close to each other. They are opposed to a southern dialect group, sc. that which constitutes the speech of the Bararetta and Kofira in Kenya.

Agaw, in the north of Ethiopia, occupies no more than a limited and fragmented territory, having for the most part given place to Semitic, sc. Tigrinya and especially Amharic. A northern Agaw dialect, Bilin, is spoken by a small Muslim population. Other dialects still in use are Khamir, Khamta, Ḳwara, Kamant and Awngy or Awiya.

To the west, a group of languages relatively close to one another covers the region of the lakes (from Zway to Shamo and Lake Rudolf) and extends into the adjacent mountainous zone (the province of Sidamo). These are Gudella or Hadiya and Kambatta in the north-west of the region in question, Alaba, Sidamo, Darasa, Burdji and Konso in the east. Generally connected with them, but without any totally compelling reason, are Gidole or Gardulla, Arbore, Galaba etc. On the other hand, there is a tendency today to consider Rendille in the north-east of Kenya, on the edge of Lake Rudolf, and Bayso in an island to the north of Lake Abaya, as projections of Somali.

In the region of Omo, one can distinguish Ometo, Dawro or Kullo, Goba, Walamo, Maruro or Gatsamba, Badittu, Zaysse, Basketto, Doko, Čara, Djandjero, Kaffečo, Anfillo, Shinasha or Gonga, etc.

In the same region, some languages, which are probably Kushitic, are spoken by Nilotic peoples, sc. Gimira, Madji and Gunza.

A Kushitic extension in Tanzania is possibly represented by Iraḳw and less probably by Mbugu.

There may be seen from this simple inventory, although it remains incomplete, the immense linguistic variety of the vast area generally considered as Kushitic. It is still very inadequately explored, and numerous tongues are known to us only by a rare and insignificant documentation. There result from this problems of classification which lead at times to calling into question the very membership in the group of some of the most anciently recognised languages. There has also been a proposal to detach from the Kushitic ensemble an Omotic group consisting essentially of the languages of the region of the Omo, and from this some authors have come to consider Bedja as a particular division of Hamito-Semitic without any special connection with Kushitic.

In so far as the existing documentation allows one to judge, such questionings appear excessive. The existence of common traits peculiar to a body which can be called Kushitic do not appear capable of being explained by simple phenomena of diffusion. But it is no longer as possible today to admit the traditional division into two groups: Lower Kushitic with Bedja, ʿAfar, Saho, Somali and Oromo, Upper Kushitic consisting of Agaw, Burdji, Sidamo and the western languages. Without attempting here to propose a real classification, for which the state of studies still gives no authority, one may to some extent rely on the characteristics of these languages to discern some particular affinities. The linguistic information which is to be supplied below can justify the following table:

A. *Northern Kushitic*: Bedja;

B. I. *Eastern and southern Kushitic*: ʿAfar, Saho, Somali and Oromo;

II. *Central Kushitic*: Agaw and languages of the region of the lakes;

C. *Western Kushitic*: languages of the region of the Omo.

The group of Eastern and Southern dialects and that of the Central dialects are closer to one another than each of the two others.

Linguistic characteristics.—These are the principal common traits in the Kushitic languages or in the majority of them.

(i) *On the phonetic plane*.—The predominant syllabic type is of the consonant + vowel form, at the beginning of a word; closed syllables of the consonant + vowel + consonant type are present especially as final syllables. In the intervocalic position, the best-tolerated consonant groups have a first liquid element or are constituted by a nasal — an oral homorganic consonant (*mb*, *nt*, etc.).

The consonant system includes in general "emphatics", most often glottalised in effect, which complete, at the same point of articulation, the orders formed by an unvoiced stop and a voiced stop, without always participating themselves in correlation of voicing. The majority of the languages also present a post-palatal order: *k*, *g*, *ḳ*, but none opposes a *g* to a *ḳ*. However, one must take account of the very frequent present of a voiced cerebral *ḍ* which can adjoin the "emphatic", unvoiced dental.

Except in some Agaw dialects which are innovative on this point, there is no distinction in the labial zone between the spirants and occlusives. Where there is

an *f*, it is not opposed to *p*, and the voiced equivalent is in general *b*, never *v*. The following table, in which the phonemes are put in parentheses, being frequently, but not in all cases, represented, will give an idea of the Kushitic consonant system:

labials: *p/f, b, m, w*;
dentals: *t, d, (ṭ), ḍ, n*;
sibilants: *s, (z)*;
palatals: *k, g, ḳ, y*;
laryngals: *h*, ʾ;
liquids: *l, r*;

The pharyngals *ḥ*, ʿ, the labio-velars *kʷ*, *gʷ*, at times *ḳʷ*, the prepalatals *č*, *dj*, at times *c*, the emphatics *ṣ* and *ṭ*, are only attested in certain languages. The minimal vowel system is triangular, with five vowels: *i, e, a, o, u*, with most often an opposition of quantity.

The majority of languages are familiar with tonal opposition, in various degrees of development. In a language like Be<u>dj</u>a, only a small number of lexemes of the CVC-form seem to bear a characteristic descending tone, capable of constituting a distinctive morphological mark, cf. *dêt* "mother": *det* "mothers", *kʷât* "sister": *kʷāt* "sisters"; but in Awiya and in Moča for example, tones play as important a role in the morphological plan as in the lexical one: (Moča) *búno* "ashes": *bùno* "coffee"; (Awiya) *ədjé* "I give": *ədjè* "he gives". Unlike the tonal schemes, the accentual schemes are not generally distinctive, except possibly in some forms where phonetic evolutions have accidentally conferred on them a differentiating role: (Bedja) *ha'ḍāb adir* "I killed a lion", *'haḍāb adir* "I killed lions".

(ii) *On the morphological plane.*—Lexemes are constituted in Kushitic by constant radicals with variable morphemes, generally suffixed: (Sidamo) *min-*: *min-ino* "he built", *min-é* "house", (Ometo) *meḍ-*: *meḍ-és* "he forms", *meḍ-a* "form"; (Somali) *ḍeḥ-*: *ḍeḥ-da* "environment", *ḍeḥ-ē* "to be between, among", *ḍeḥ-dōdi* "between". Despite some phenomena of apophony in some languages (Bedja *dir* "to kill": *dar* "to massacre", *rimid* "to avenge": *rimad* "to be revenged", the radical vowel may be considered stable in every series of derivation, as may be seen from the preceding examples.

By far the most frequent form of radical is CVC: 90% of the verbal radicals in Kaffečo, 67% in Somali. In Bedja, however, and uniquely in Bedja, it yields predominance to radicals of type CVCC or CVCVC. But analysis reveals that these roots are often derived from Semitic, and particularly from Arabic. The verbal system is based in general on the fundamental opposition of two aspects: the incompleted and completed. Conjugation is of two types. In some languages, a certain number of verbs are conjugated by means of prefixed signs. This is the case with ʿAfar, where this type of conjugation represents more than a third of all verbs, and especially with Bedja, where it represents nearly two-thirds; but Somali and Agaw have only four verbs with prefixal conjugation. For all the other verbs and in all the other languages, conjugation is suffixal. Thus the verbal forms are constituted in principle according to one of the following two schemes:

A. *Prefixal conjugation*: sign of the person + sign of the aspect/mode + verbal root + desinence of the gender and/or number. Example ʿAfar: *t-a-ḟigd* "you know" incompleted indicative); *t-i-ḟigd* "you knew" completed or perfective indicative).

B. *Suffixal conjugation*: root + sign of the aspect/mode + desinence of the gender and/or number. For example Bedja: *tám-t-én-i* "you (fem.) eat" (incompleted indicative) *tám-ta-i* "you (fem.) ate" (completed or perfective; *tam-ti-i* "(if) you were eating" (modal).

These schemes are capable of minor modifications in various languages. In particular, attention is drawn to newly-developed forms by means of suffixed morphemes. The most frequently used variable morphemes are:

— for the gender and number: *i* for the feminine singular and *n* for the plural;

— for the aspect: *a* as the sign of the incomplete is often opposed to an antecedent vowel (*ä, e, i*) for the completed or perfective, while the modal form is characterised by *u*; certain languages however, such as Bedja or Agaw, present some slightly different situations from this point of view;

— for the expression of the persons, the paradigm is the following: Sing. 1. (ʾ-) 2. *t-*, 3. masc. (*y-*), fem. *t-*; Plur. 1. *n-*, 2. *t-*, 3. (*y-*). (The forms between parentheses are often represented by *ø*). The identity of this system of signs with that of Semitic and Berber conjugation, whose very characteristics it presents (the same form in the singular for the 2nd pers. and the 3rd fem., distinct forms for the 1st pers. sing. and plur., the 1st pers. plur. being in addition deprived of the sign of number) has led to the positing of the probable hypothesis that the morphemes of aspect/mode which in the scheme follow these marks, are no more etymologically than short auxiliary verbs conjugated by means of prefixes.

The completed: incompleted opposition, with possibly a modal form, does not exhaust the complexity of the Kushitic verbal systems. Periphrastic forms, constituted by means of auxiliaries, often serve to add the expression of different aspectivo-temporal nuances such as the near past, the pluperfect and especially the "continuous-progressive" or "concomitant". Examples: ʿAfar: *tábelä tinä* (incomplete + complete of *nä* "to be") "you were engaged in looking, you were looking"; Somali: *ʿún-a* "he eats (will eat)", *ʿún-ay-a* "he is engaged in eating".

As regards their conjugation, the languages of the Omo have a separate place in the Kushitic group. The scheme there is also suffixal, but the morphemes used and their modes of combination are peculiar to them. For example, Ometo: 2nd sing. incomplete *er-ása* "you know", complete *er-ád-asa* "you knew".

The Kushitic languages distinguish various secondary verbal themes by added signs. A first method of derivation is partial or total duplication of the radical which gives the roots intensive or frequentative value: Agaw (Bilin): *dāb-* "to cover": *dābdāb* "to cover completely"; Sidamo; *ḳub* "to shake": *ḳubḳub* "to shake strongly"; Bedja: *beʾas* "to turn": *babeʾas* "to turn and turn again"; Oromo: *bēk-* "to know": *bebbēk* "to know well".

The second method is the fixing of signs to express the orientation of the process in relation to the subject: *s* (*č*, <u>sh</u>) for the causative, *t* (*ḍ*), *m*, n for the internal reflexive, the passive and the reciprocal. Hence in Bedja: *hi<u>sh</u>am* "to extend" (intrans.), *hi<u>sh</u>am-i<u>sh</u>* "to extend" (trans.); *dir* "to kill", *so-dir* "to have [someone] killed"; *tam* "to eat", *tam-am* "to be eaten"; *min* "to shave", *(a)to-man* "to be shaved". In Oromo: *čab* "to break" (intrans.), *čab-s* "to break" (trans.), *bēk-a* "he knew", *bēk-at-a* "he understood"; *arg* "to see", *arg-am* "to be seen". In Ometo: *ke* "to go out", *ke-s* "to cause to go out"; *beʾ* "to see", *beʾet* "to be seen".

One should also mention a type of verbal composition widespread in the majority of the Kushitic languages and which consists in the juxtaposition of

an invariable element (plain verbal radical, noun, interjection, onomatopoeia, etc.) and of a verb meaning "to say": ʿAfar: *hō y* "to say *ho*" = "to roar", Sidamo: *suta y* "slowly + to say" = to act slowly"; Agaw: *yik y* "down + to say" = "to lower"; Oromo: *ol gečč* "to say + up = to raise"; Ometo: *shiʾi ga* "hush + to say = to be silent".

The Kushitic languages of the centre and east have various series of pronominal forms. One of them, called "emphatic", is used especially to act as a subject. Other forms generally suffixal serve to express the complements of the verb and noun. The following tables will show both the common bases and the developments peculiar to the various languages:

"Emphatic" pronouns

	Somali (Benadir)	ʿAfar	Oromo	Awiya	Sidamo
Sing. 1	*ani*	*anū*	*áni*	*án*	*áni, ané*
2	*adi*	*atū*	*áti*	*ənt*	*áti, até*
3 mas.	*ussu*	*ússuk*	*inni*	*ŋi*	*isi, isó*
fem.	*iyyo*	*issi*	*ishin*	*ŋi*	*ise*
Plur. 1	*anu*	*nanū*	*nū(i)*	*ənnódji*	*ninke*
2	*idin*	*issīn*	*isīn(i)*	*əntódji*	*kinʾe*
3	*iyyu*	*ussún*	*isān(i)*	*ŋádji*	*inse, insa*

Attached pronouns

	Somali	ʿAfar	Oromo	Sidamo
Sing. 1	*-key*	*-yi*	*-ko, -kīya*	*-ʾya*
2 mas.	*-kā*	*-ku*	*-kē*	*-ki*
2 fem.	*-kā*	*-kā(y)*	*-kē*	*-ki*
3 mas.	*-kīs*	*-tā*	*-sa*	*-si*
fem.	*-kēd*	*-tā*	*-shi, -she*	*-si*
Plur. 1	*-keyn*	*-na*	*-kēna*	*-nke*
2	*-kīn*	*-sīn*	*-kēsan(i)*	*-nʾe*
3	*-kōd*	*-kān*	*-kēsan(i)*	*-nsa*

In Northern Kushitic (Bedja) the "emphatic" forms, apart from the first persons, appear to be clearly constituted by an invariable base with personal suffixal signs added: Sing. 1. *ani* 2. mas. *bar-i-ūk*, fem. *bat-i-ūk*, 3. mas. *bar-i-ūs*, fem. *bat-i-ūs*; plur. 1. *āni*, 2. mas. *bar-i-āk*, fem. *bat-i-āk*, 3. mas. *bar-i-ās*, fem. *bat-i-ās*.

The languages of the west have a system of their own which is well illustrated by Ometo: Sing. 1. *tā*, 2. *nē*, 3. *i*; plur. 1. *nu*, 2. *inte*, 3. *enta*.

All the Kushitic languages recognise a distinction of gender between masculine and feminine, at times in a vestigial state, as in certain languages of the west, for example. Among the varied signs which are used, the frequency of the suffixal morpheme *-t-* for the feminine should be noted. On the syntactical plane, the essential fact is the agreement of the majority of the languages on the order determinant-determined. The only exceptions are Somali and Oromo which regularly present the inverse order; in Bedja, the qualifying adjective follows the qualified noun when the latter has a definite article. But in all the languages, the dependent proposition precedes that on which it depends (except, in certain particular cases, in Bedja and Somali) and the verb is placed at the end of the phrase after the subject and the various complements.

On the lexical plane, the certain cognate forms are still relatively few in number, above all because of inadequacy of the theory of phonetic correspondences. Nevertheless, the existence of a common vocabulary can be established in several forms. Here are some examples. Bedja: *sim*, Agaw: *shun*, Sidamo: *shumʾe*, Ometo: *sun-ta*, Djandjero: *sun* "name"; Somali: *wadne*, ʿAfar: *wodana*, Oromo: *onne*, Sidamo: *wodana*, Ometo: *wozana* "heart"; Somali: *daw*, Oromo: *dandi*, Sidamo: *doga*, Burdji: *dawa*, Agaw: *dokʷ*, Ometo: *age*, Kaffa: *dag* "way". For some words, the languages of the west present forms which distinguish them from the rest of the Kushitic group: Bedja: *lili*, Somali: *il*, ʿAfar: *il*, Oromo: *ig-ia*, Sidamo: *ille*, Agaw: *yil*, but Ometo: *ayfe*, Djandjero: *afa*, Kaffa: *afo* "eye"; Bedja: *yaf*, Somali: *af*, Sidamo: *afo*, but Djandjero, Kaffa: *nōnō* "mouth".

Bibliography: In Ernest Renan's ***Histoire générale et système comparé des langues sémitiques*** (1st part only appeared, 1855; other editions revised with additions 1858, 1863, 1878), the term "couschite" is already used in relation to the East-African languages: "One may believe that, among the non-Semitic languages (of Ethiopia), the remains of the ancient language of the Kushites have been preserved" (2nd ed. 1863, 339). But it was R. Lepsius who first recognised the linguistic group and definitively gave it its name in his *Nubische Grammatik mit einer Einleitung über die Völker und Sprachen Afrika's*, 1880. Kushitic appeared there to be constituted by Bedja, Shoho (or Saho), Falasha (an Agaw dialect), Agaw, Galla (or Oromo), Dankali (or ʿAfar), Somali to which is added Hottentot. In an earlier work, *Standard alphabet*, 2nd ed. 1863, he had grouped under the name of Ethiopian, the majority of these languages with Semitic Harari, but without Hottentot. For the recognition of their membership in the Hamito-Semitic family, see the information supplied by M. Cohen, *Essai comparatif sur le vocabulaire et la phonétique du chamito-sémitique*, Paris 1947, 3 ff. For Kushitic in general: A general overview of the distribution of the languages and their linguistic structures is to be found in M. A. Bryan, *The distribution of the Semitic and Cushitic languages*, London 1947, completed by A. N. Tucker and M. A. Bryan, *The non-Bantu languages of North-Eastern Africa*, London 1966; J. Greenberg, *Studies in African linguistic classification*, New Haven 1955; idem, *The languages of Africa*, The Hague 1966. For recent perspectives, see F. R. Palmer, "Cushitic", in *Current trends in linguistics* (vol. vi, under the direction of T. A. Sebeok), The Hague 1970, and D. Cohen, *Les langues chamito-sémitiques. 4. Le couchitique*, in *Les langues dans le monde*, under the direction of M. Cohen and J. Perrot, Paris, in the press. Comparative studies. A. B. (D. COHEN)

KUSHĀDJIM, MAḤMŪD B. AL-ḤUSAYN B. AL-SINDĪ B. SHĀHAK, ABU 'L-FATḤ, poet of the 4th/10th century whose death is variously given in the sources between 330/941 and 360/971, but which must have taken place *ca.* 350/961. Originally from a family of Sind [see IBRĀHĪM B. AL-SINDĪ], he was born at al-Ramla and lived at al-Mawṣil at the court of Abu 'l-Haydjāʾ ʿAbd Allāh b. Ḥamdān [see ḤAMDĀNIDS], and then at Aleppo, in the entourage of Sayf al-Dawla [*q.v.*]; he also made several journeys to Egypt, Baghdād, Damascus and Jerusalem. His verses are described by R. Blachère, *Motanabbî*, 134, as "excessively florid and enjoying a contemporary vogue", which is confirmed by al-Masʿūdī, who in his own lifetime, devoted long passages to him in his *Murūdj* (see index). He was closely associated with his son-in-law al-Ṣanawbarī [*q.v.*], and he is one of the creators of nature poetry in Arabic, in which he evokes visual pleasure by his descriptions of gardens, flowers and trees. But he was also a *kātib*, an astrologer and master-cook to Sayf al-Dawla; he excelled in so many branches of knowledge and activity that his surname Kushādjim is said to be an acrostic formed out of the initial letters of the subjects in which he excelled, or out of various adjectives—a *kāf* for *kitāba/kātib*, *shīn* for *shiʿr/shaʿir*, *alif* for *adab/adīb* or for *inshāʾ*, *djīm* for *djadal/djawād*, *mīm* for *manṭiḳ/munadjdjim*. It is even said that, after having studied medicine, he added a *ṭāʾ* (for *ṭibb*) to his name, which became Ṭakushādjim, but had hardly any success.

He has left behind a *Dīwān*, first published at Beirut in 1313/1895-6, then at Baghdād in 1970 (by T. Kh. M. Maḥfūẓ); a collection of *Rasāʾil* (*Fihrist*, 200), an *Adab al-nadīm/al-nudamāʾ*, ed. Būlāḳ 1298, Alexandria 1329; a *K. Khaṣāʾiṣ al-ṭarab*; a *K. al-Ṭabīkh*; a *Kanz al-kuttāb* (al-Ḳalḳashandī, *Ṣubḥ*, i, 154, 162-3; a *K. al-Maṣāyid wa 'l-maṭārid* (partial ed., carelessly done, Baghdād 1954) comprising some 20 poems on hunting, some of which are reproduced in the *K. al-Bayzara* (cf. F. Viré, *Le traité de l'art de volerie*, Leiden 1967, 2), in the *Dīwān* and in vol. x of al-Nuwayrī's *Nihāya*.

Bibliography: Ibn Charaf, *Questions de critique*, index; Thaʿālibī, *Yatīma*, i, 22; idem, *Khāṣṣ al-khāṣṣ*, 107; Ibn al-ʿImād, *Shadharāt*, iii, 37-8; M. Canard, *Saif ad-daula*, 292-3; A. Mez, *Renaissance*, index; Brockelmann, S I, 137; Ziriklī, *Aʿlām*, s.v.

(CH. PELLAT)

AL-ḲUSHASHĪ, ṢAFĪ AL-DĪN AḤMAD B. MUḤAMMAD B. YŪNUS, AL-MADANĪ AL-DADJĀNĪ, Ṣūfī mystic and scholar, b. Medina 991/1583. Little is known of his life. His family on his father's side migrated from the village of Dadjān near Jerusalem and settled in Medina. He spent part of his life as a soldier. In 1011/1602-3 he travelled with his father to the Yemen, where he studied with various of the religious teachers, especially those with whom his father, Muhammad b. Yūnus had studied. An incident not specified in the sources disturbed him deeply, causing him to return hurriedly first to Mecca, and then to Medina, where he continued to study from some of the great mystics of Indian origin, especially al-Shinnawī and Ṣibghat Allāh, and through them, the works of al-Ghawth al-Hindī. He was affiliated to several mystical orders, including the Naḳshbandī, the Ḳādirī and the Shaṭṭārī. He attracted numerous students, and enjoyed a reputation for extraordinary humility. He is of particular importance because of the character of his transmission of the doctrines of the school of Ibn al-ʿArabī [*q.v.*], particularly as reformulated by ʿAbd al-Karīm al-Djīlī [*q.v.*] to various parts of the Muslim world, including Sumatra and Java. Among his students for almost twenty years (1051-70/6141-60) was the Sumatran ʿAbd al-Raʾūf of Singkel, and numerous Djāwī associates of whom we do not know the names. His pupil and successor as *shaykh* of the Shaṭṭāriyya order, al-Kūrānī [*q.v.*], maintained his wide circle of students, and gives much information about him in his *al-Amam* (see *Bibl.*). It is worthy of note that Ṭāhir, the son of his greatest student al-Kūrānī, was a teacher of Shāh Walī Allāh [*q.v.*].

His works include Ṣūfī interpretations of *ḥadīth*, rare among Ṣūfī authors, who devote most of their exegetical skill to the Ḳurʾān. He was noted for the extent to which he associated Ḳurʾānic and *ḥadīth* quotations with his views, and his skill in presenting the *isnād* of every *ḥadīth* that he cited. A commentary on his rhymed credal statement *al-ʿAḳīda al-manẓūma* by his student Ibrāhīm al-Kūrānī entitled *Ḳaṣd al-sabīl* was rendered into Malay, possibly by his student ʿAbd al-Raʾūf.

His books on *ḥadīth*, *uṣūl* and *taṣawwuf* number more than fifty. One has been published (*al-Simṭ al-madjīd fī talḳīn al-dhikr*, Ḥaydarābād 1327). Other works, listed by al-Baghdādī, include *Hāshiya ʿala 'l-Insān al-kāmil li-ʿAbd al-Karīm al-Djīlī*, *al-Kalima al-wusṭā fī sharḥ ḥikam Ibn al-ʿAṭāʾ*, and *al-Kamālāt al-ilāhiyya*. He died at Medina in 1071/1660-1, and was buried in the Baḳīʿ cemetery.

Bibliography: al-Muḥibbī, *Khulāṣat al-athar fi aʿyān al-ḳarn al-ḥādiya ʿashar*, i, 342-6; Ibrahīm al-Kūrānī, *al-Amam li-iḳāẓ al-himam*, ms. Cairo, Dār al-Kutub, Ṭalʿa, No. 504, fols. 55a-56a; Ismāʿīl al-Baghdādī, *Hadiyyat al-ʿārifīn*, Istanbul 1951, i, 161; D. A. Rinkes, *Abdoerraoef van Singkel*, Leiden 1909; Sarkis, 1553; J. Voll, *An analysis of an intellectual group in eighteenth-century Madina*, in *BSOAS*, xxxviii (1975), 32-9. (A. H. JOHNS)

ḲUSHAYR, an Arab tribe forming part of the great group of the Banū ʿĀmir b. Ṣaʿṣaʿa [*q.v.*] whose fortunes we find them almost continuously sharing in the period before as well as after Islam.

They had particularly close associations with the tribes of ʿUḳayl and Djaʿda, whose genealogical table makes them brothers. Their genealogy is Ḳushayr b. Kaʿb b. Rabīʿa b. ʿĀmir b. Ṣaʿṣaʿa. Tradition makes the mother of Ḳushayr Rayṭa bint Ḳunfudh b. Mālik of the tribe of the Banū Sulaym [*q.v.*]. During the pre-Islamic period, the Banū Ḳushayr settled in al-Yamāma were involved in all the wars of the ʿĀmir b. Ṣaʿṣaʿa, especially in those against the Tamīm, the Shaybān, whose chief Ḥādjib b. Zurāra was made prisoner by Mālik b. Salama al-Khayr b. Ḳushayr, called Dhu 'l-Ruḳayba, at the battle of Djabala, and against the kings of al-Ḥīra (cf. *Naḳāʾiḍ*, ed. Bevan, 70, 404-5). After Muḥammad's successes in central Arabia, the Ḳushayr joined with the other tribes of the ʿĀmir in sending him envoys and coming to an arrangement with him; it is to this time that tradition dates their conversion to Islam (cf. the texts in Caetani, *Annali*, i/1, 297 [9 A.H., § 78]). Later they took part, without particularly distinguishing themselves, in the wars of conquest in Syria and ʿIrāḳ, and settled particularly in the eastern parts of the Arab empire. In the Umayyad period they were very numerous and powerful in Khurāsān, of which several Ḳushayris were governors (among others Zurāra b. ʿUḳba, whose family possessed a very highly esteemed breed of horses). This Ḳushayrī colony has as its founder and common ancestor Hayda b. Muʿāwiya b. Ḳushayr, a half-mythical personage who is said to have lived to a fabulous age and to have had a thousand descendants (Ibn Ḥadjar, *Iṣāba*, Cairo 1325, ii, 56, No. 1890; Abū Ḥātim al-Sidjistānī, *K. al-Muʿammarīn*, in Goldziher, *Abhandlungen zur arab. Phil.*, ii, 97). On the other hand, we find in Mubarrad, *Kāmil*, ed. Wright, 273, a similar longevity attributed to Dhu 'l-Ruḳayba, the Ḳushayrī chief mentioned above, and indeed almost all the Ḳushayrīs of note settled in Khurāsān recorded by history, belonged to the clan of Salama al-Khayr to which Dhu 'l-Ruḳayba belonged, and which seems to have been the aristocracy of the tribe.

The Ḳushayr did not number many poets of note among them; the best known is Yazīd Ibn al-Ṭathriyya who lived between the end of the Umayyad period and the beginning of the ʿAbbāsid period.

The genealogical sources, and in particular Ibn al-Kalbī, also mention other ethnic groups bearing the name Banū Ḳushayr, two of which belonged to the southern tribes of the Aslam and the Aws (Anṣār).

Bibliography: Ibn al-Kalbī-Caskel, *Ǧamhara*, Tab. 101 and Register, ii, 473; Wüstenfeld, *Genealogische Tabellen*, D. 117 (*Register*, 140-1); Ibn Durayd, *K. al-Ishtiḳāḳ*, ed. Wüstenfeld, 181; Ibn Ḳutayba, *K. al-Maʿārif*, ed. Wüstenfeld, 43, ed. ʿUkāsha, 89 and index. (G. LEVI DELLA VIDA)

AL-ḲUSHAYRĪ, the *nisba* of two noted Khurāsānian scholars.

1. ABU 'L-ḲĀSIM ʿABD AL-KARĪM B. HAWĀZIN, theologian and mystic. He was born in 376/986 in Ustuwā (the region of actual Ḳūčān [*q.v.*] on the upper Atrak), the son of a man of Arab descent (from B. Ḳushayr) and a woman from an Arab (from B. Sulaym) *dihḳān* family. He got the education of a country squire of the time: *adab*, the Arabic language, chivalry (*furūsiyya*) and weaponry (*istiʿmāl al-silāḥ*). When as a young man he came to Naysābūr with the intention to get the taxes on one of his villages reduced, he became acquainted with the Ṣūfī *shaykh* Abū ʿAlī al-Daḳḳāḳ, who became his master on the mystical path. Later on he married Abū ʿAlī's daughter Fāṭima (born 391/1001).

Besides his mystical exercises, he studied *fiḳh* with the Shāfiʿī jurist Abū Bakr Muḥammad b. Bakr al-Ṭūsī (d. 420/1029) in nearby Ṭūs; he seems also to have visited the city of Marw *fī ṭalab al-ʿilm* (Subkī, v, 158). In Naysābūr he studied *kalām* and *uṣūl al-fiḳh* with the Ashʿarī scholars Abū Bakr b. Fūrak (d. 406/1015-16) and Abū Isḥāḳ al-Isfarāʾīnī (d. 418/1027).

After the death of Abū ʿAlī in 405/1015, he seems to have become the successor of his master and father-in-law as leader of the mystic sessions (*madjālis al-tadhkīr*) in the *madrasa* of Abū ʿAlī (built in 391/1001), which henceforth was known as *al-madrasa al-Ḳushayriyya* (later on as *madrasat al-Ḳushayriyya*, "the *madrasa* of the Ḳushayrī family").

At an indeterminable date, al-Ḳushayrī performed the Pilgrimage in company with Abū Muḥammad al-Djuwaynī (d. 438/1047), the father of the *Imām al-Ḥaramayn*, and other Shāfiʿī scholars; during these travels he heard *ḥadīth* in Baghdād and the Ḥidjāz. Probably after his return to Naysābūr he held his first *madjlis al-imlāʾ*, i.e. session for the teaching of *ḥadīth*, in 437/1046.

After Naysābūr had passed under the control of the Saldjūḳs in 429/1038, al-Ḳushayrī was involved in the struggles between the Ḥanafī and Ashʿarī-Shāfiʿī factions in the city. In 436/1045 he issued a manifesto defending the orthodoxy of Abu 'l-Ḥasan al-Ashʿarī; the document (preserved by Ibn ʿAsākir, *Tabyīn*, 112-14; cf. Subkī, iii, 374 f.; Halm, *Der Wesir al-Kundurī*, 214 ff.) was signed by the most renowned Shāfiʿī scholars of the city. When in 446/1054 the Ḥanafī-Shāfiʿī conflict broke out into a violent *fitna*, al-Ḳushayrī was imprisoned by his adversaries, but was rescued some weeks later by his partisans by force of arms. As a reaction to these events, he wrote his famous "Complaint", *Shikāyat ahl al-sunna bimā nālahum min al-miḥna* (preserved by Subkī, iii, 399-423; separately ed. by Muḥammad Ḥasan, see below), by which he defended al-Ashʿarī against the slanderous accusations of his adversaries (analysed in Halm, *Der Wesir al-Kundurī*, 224 ff.).

In 448/1056 al-Ḳushayrī went to Baghdād, where the caliph al-Ḳāʾim commissioned him to teach *ḥadīth* in his palace. After his return to Khurāsān he left Naysābūr, now dominated by the Ḥanafī faction, and emigrated with his family to Ṭūs, where he stayed until the accession to the throne of sultan Alp Arslan in 455/1063. When the vizier Niẓām al-Mulk re-established the balance of power between the Ḥanafīs and the Shāfiʿīs, he returned to Naysābūr where he lived until his death. He died on 16 Rabīʿ II 465/30 December 1072 and was buried in his *madrasa* besides his father-in-law Abū ʿAlī al-Daḳḳāḳ. He left six sons and several daughters; some of his numerous descendants (cf. the pedigrees in Bulliet, *Patricians*, 180-4; Halm, *Ausbreitung*, 61) officiated as *khaṭīb* of the Shāfiʿī Manīʿī mosque in Naysābū

Even if al-Ḳushayrī's studies covered the whole scale of the traditional Islamic sciences, his writings

mostly deal with mystical topics. His great mystical *tafsīr*, the *Laṭā'if al-ishārāt*, was composed before 410/1019; the *Tartīb al-sulūk* is an introduction to the practice of *taṣawwuf*, and the famous *Risāla* (composed in 438/1045) is a most important compendium of the principles and terminology of Ṣūfism (analysed by R. Hartmann). In all his works (cf. Subkī, v, 159; Brockelmann, I, 556 f.) al-Ḳushayrī tried to reconcile mystical practices, suspected by so many scholars, with the principles of the *Sharīʿa*.

Bibliography: al-Ḳushayrī, *Laṭā'if al-ishārāt*, ed. Ibrāhīm Bisyūnī, 5 vols., Cairo 1390/1970; *Arbaʿ rasā'il fi 'l-taṣawwuf*, ed. Ḳāsim al-Sāmarrā'ī, Baghdād 1389/1969 (contains *Mukhtaṣar fi 'l-tawba*, 22-8; *ʿIbārāt al-ṣūfiyya wa-maʿānīha*, 44-59; *Manthūr al-khiṭāb fi mashhūr al-abwāb*, 60-70; and *al-Ḳaṣīda al-ṣūfiyya*, 71-3); *al-Rasā'il al-Ḳushayriyya*, ed. Pīr Muḥammad Ḥasan, Karachi 1384/1964 (contains *Shikāyat ahl al-sunna*, 1-49; *K. al-Samāʿ*, 50-65; and *Tartīb al-sulūk fī ṭarīḳ Allāh*, 66-80; with Urdu tr.; *al-Risāla*: several Cairo editions; *Tartīb al-sulūk*; ed. F. Meier, *Qušayrī's Tartīb as-sulūk*, in *Oriens*, xvi (1963), 1-39 (with German tr.); ed. Ḳāsim al-Sāmarrā'ī, in *The theme of ascension in mystical writings*, Baghdād 1968, i, 155-77; ʿAbd al-Ghāfir al-Fārisī, *Siyāḳ li-ta'rīkh Naysābūr*, (facs. ed. R. N. 2. ABU 'L-NAṢR ʿABD AL-RAḤĪM B. ʿABD AL-KARĪM B. HAWĀZIN, son of the former; Shāfiʿī jurist and Ashʿarī theologian. Born in Naysābūr before 434/1043, he studied *tafsīr* and *uṣūl* with his father and with the *Imām* al-Ḥaramayn al-Djuwaynī. When in 469/1077 he publicly taught Ashʿarī *kalām* in the Niẓāmiyya *madrasa* in Baghdād, he provoked the wrath of the local traditionalist Ḥanbalī faction supported by the masses, and caused a violent *fitna*. The vizier Niẓām al-Mulk, who protected the young scholar, had to summon him to Iṣfahān, from where he sent him back to Naysābūr. There Abu 'l-Naṣr died, after a peaceful life, in 514/1120, in his eighties.

ḲUSHBEGI [see ḲOSH BEGI].

AL-**ḲUSHDJĪ** [see ʿALĪ AL-ḲUSHDJĪ].

KUSHIYĀR B. **LABĀN** B. BASHAHRĪ, ABU 'L-ḤASAN AL-DJĪLĪ, Persian astronomer and mathematician. He was born in Gīlān, to the south of the Caspian sea, in the first half of the 4th/10th century, probably between 322/934 and 332/944. The date of his death is equally obscure, but was probably in the first quarter of the 5th/11th century. Very little is known of his life; most of it was spent in Baghdād, with the peak of his career in *ca.* 990/1000.

His principal works comprise two *zīdjs*, the *z. al-djāmiʿ* and the *z. al-bāligh*, as well as an arithmetical treatise, the *Uṣūl ḥisāb al-Hind*. His astronomical tables mark an advance on those of Abu 'l-Wafā' and al-Battānī. Whereas the latter only indicate the values of sines and the cotangent, Kushiyār also gives those of the tangent, and the values of these functions are given by him to the third sexagesimal.

His other great work, the *Uṣul ḥisāb al-Hind*, contains the first description of the "Indian system of calculation", i.e. of the system of numeration by position (the value of the figures depending on their place in a number), which brought about a revolution in the ways of calculating used in the Near East. The work is divided into two parts. In the first, the author works out logarithms for the four basic arithmetical operations and for finding the square root. Whole numbers are treated within the decimal system, and fractions in the sexagesimal one. The second part deals with this latter system, already used by the astronomers, but set forth by Kushiyār in a way of numeration by position. He shows how whole numbers can be converted from the decimal into the sexagesimal system, and then sets forth logarithms for the basic arithmetical operations, for finding the square root and for finding the cube root. Finally, he gives a famous multiplication table, called "the table of sixty", for multiplying within the sexagesimal system. In these various calculations, he already makes use of the elementary rules for multiplying and dividing both positive and negative whole powers. As for the figures which he uses, for calculations made in the sexagesimal system he uses the Arabic alphabetical characters, the *ḥurūf al-djumal*; but for those in the decimal system, the so-called "Indian" figures, the origin of what were later called "Arabic numerals". Kushiyār's system of logarithms for finding the square root forms the basis for the theory of decimal fractions which was subsequently to be elaborated by al-Karadjī and al-Samaw'al.

(K. JAOUICHE)

KUSKUSŪ (A.), a word probably of Berber origin meaning couscous, a culinary preparation containing semolina which is the national dish of the peoples of North Africa. It appears with the article and with a final *nūn* in an anecdote depicting an Oriental being advised by the Prophet, in a dream, to treat with *al-kuskusūn* a sick Maghribī; this anecdote, related by Dozy (*Suppl.*, s.v.) is very well known and is probably responsible for leading Moroccan scholars to adopt the form attributed to the Prophet. L. Bauer (*Wörterbuch der arabischen Umgangsprache*[2], Wiesbaden 1957, 402), heard *kusukson/kuskusān* in Palestine, describing it as "Teigkügelchen in Fleischdampf gekocht". Couscous was known in Spain, and the word *kuskusū* is provided with the article in the *Kitāb al-Ṭabīkh* published by A. Huici Miranda (Madrid 1965, 181), but this is a case

of an arabisation which is not found in vernacular Arabic, where the word never takes the article; *sekso, ksēkso, kuskus, kusksi*, etc., which betrays its non-Arabic origin. The equivalent term among the majority of the Bedouin tribes of Algeria and at Tlemcen is *ṭʿām* used alone, elsewhere it is *ʿaysh, mʿāsh*, or *noʿma*, all of which illustrate the importance of couscous in the minds of the people, especially those in rural areas, who make it the invariable staple of their evening meal.

The quality and the weight of the grains as well as the presentation of the dishes offer a considerable diversity, which is covered by the generic terms cited above but which is expressed by means of a detailed and extremely varied vocabulary according to regions. We confine ourselves here to a description of the general processes.

Couscous may be prepared at any time, but it is exclusively the work of women: some chose out of preference the nights of Monday and of Friday to take advantage of the *baraka* [*q.v.*] which is attached to them. The housewife makes an invocation and she must not see or hear anything that might constitute a bad omen; on the contrary, it is the custom to speak in her company only of saints, of the prosperity of the land, etc.

To make her couscous, the woman sits on the ground, places in front of her a wooden plate called *djəfna, gəṣʿa, ḳəṣriyya*, etc. and, to one side, a receptacle containing lightly salted water and a sack of semolina; in some regions, a little flour is also used and to the salted water are added a few drops of *nīsān* water (rain of early May preserved in a flask). The housewife takes a handful of semolina, puts it in the plate, sprinkles it with salted water applied with the hand or with a spoon and proceeds to roll it (verb *ftəl*) with the flat of her hand, until small grains are formed with the size of small buckshot. When the stock of semolina provided is exhausted, the grains are passed through a sieve, and the bigger ones are rolled again until they acquire the desired dimensions or set aside to make a coarse couscous called *mḥammṣa, bərkūks, bərkukesh, mardūd*, etc. The grains are then cooked in steam and may be kept for some time.

When they are to be eaten, the housewife cooks them for a second time. In a cooking-pot (*ḳədra*), she boils water to which she adds vegetables (chick-peas, turnips, wild teasels, etc.) and/or mutton or beef sometimes browned in a little oil; she puts the couscous grains in a special receptacle (*kəskās*), a conical vessel made of earthenware or plaited alfalfa, the perforated, smaller base of which is placed over the cooking-pot and sealed by means of a twist of straw. Escaping, the steam passes through the holes and cooks the couscous. The housewife takes care that no curds are formed, and when the grain is cooked, she tips it into a bowl, garnishes it with a little butter and covers it with gravy. The vegetables and the meat are most often laid out on the grain. The diners make pellets with their thumb, index and second fingers, and flick them dexterously into their mouths.

In the preparation of couscous with sugar (*səffa, məsfūf*), the cooking-pot contains only water; once cooked, the grains, which are generally finer, are garnished with rather more butter, and the cone which they form in the dish is decorated with ground sugar and cinnamon.

Among the other varieties, we mention *bərbūkh*, with fine grain, eaten cold, without butter, and moistened with a little milk; *barbūsha*, made with barley semolina; this is called *ṣīkūk* in Morocco. The *Kitāb al-Ṭabīkh* gives the recipe of *fityānī* which is prepared by cooking grain in gravy and which is sprinkled with cinnamon; it also mentions couscous with chicken.

Couscous is quite widely known at the present time, especially in France where it is found commercially produced in food factories and sold "pre-cooked"; conical utensils ("couscoussiers") made of metal are also produced. Restaurants serve several varieties of this Maghribī dish accompanied by a sauce strongly seasoned with pepper (*marga ḥārra; harīsa*).

ḲUSS b. **SĀʿIDA** al-Iyādī, a semi-legendary character of Arab antiquity pictured as the greatest orator of all the tribes (al-Djāḥiẓ, *Bayān*, i, 52) and whose eloquence has become proverbial (*ablagh min Ḳuss*: al-Maydānī, *Madjmaʿ*, i, 117-18; ʿImād al-Dīn al-Iṣfahānī [*q.v.*] even formed an adjective rhyming with *ḳudsī* in the title of his history of the conquest of Jerusalem by Saladin, *al-Fatḥ al-ḳussī* "of Ḳussian inspiration"). He is also an heroic figure, described as being also the poet, sage, judge, etc. par excellence of the Arabs of his time. His genealogy cannot be established with certainty, but the nearest to reality seems to be: Ḳuss b. Sāʿida b. ʿAmr b. Shamir b. ʿAdī b. Mālik b. Aydaʿān b. al-Namir b. Wāʾila b. al-Ṭamathān b. ʿAwdh Manāt b. Yaḳdum b. Afṣā b. Duʿmī b. Iyād (cf. Ibn al-Kalbī-Caskel, Tab. 174 and Register, ii, 473). Moreover, his very name poses a problem, since it is unique (cf. however the toponym Ḳuss al-Nāṭif, in Yāḳūt, iv, 97-8); although it is given without the definite article, it could well be connected with *ḳass* and *ḳissīs* and point therefore to a relationship more or less close to the Christian clergy. It is not impossible that Ḳuss had relations with the Christians of Nadjrān, but it is wrong to take him, as has sometimes been done, as the bishop of that town, perhaps on account of an assimilation brought about by the phrase "eloquent as the bishop of Nadjrān" (see e.g. al-Djāḥiẓ, *Ḥayawān*, iii, 88). Legend, which also credits him with a number of miracles, has it that he presented himself at the court of the Emperor of Byzantium, but he seems to have delivered his orations in the regions between ʿIrāḳ (where the Iyād [*q.v.*] had been established, but had lost however their independent existence by the end of the Djāhiliyya), the Ḥidjāz and Syria. Nothing is known of the date of his death, which Cheikho (*Shuʿarāʾ al-Naṣrāniyya*, 211) fixes arbitrarily in 600 A.D., and it is at Rūḥin, one of the dependencies of Aleppo, that his tomb was fixed, becoming the goal of a still much-followed pilgrimage in the 7th/13th century (al-Harawī, *Ziyārāt*, 5/10; Yāḳūt, ii, 829; D. Sourdel, in *Syria*, xxxi [1953], 89-107). Interred beside him were supposedly the two friends to whom he is said to have devoted an elegy (in *ṭawīl* metre, and the rhyme-*ākumā*) which is often

mentioned but attributed to various poets (al-Baghdādī, *Khizāna*, ed. Būlāḳ, i, 261-8 = ed. Cairo ii, 66-79, of which *shāhid* 92 is taken from this piece of verse, lists the possible authors in his long commentary; see also D. Sourdel, *op. laud.*, 100-1).

In fact, as well as his eloquence—the specimens which are extant of this, in rhymed prose, being of very doubtful authenticity—tradition further ascribes to him a poetic talent and attributes to him an extensive œuvre whose remnants are equally suspect (they have been gathered together, with extracts from his homilies, by L. Cheikho, *Shuʿarāʾ al-Naṣrāniyya*, 211-18).

He is counted amongst those who enjoyed longevity, having allegedly lived between 180 and 700 years, so that in the view of certain people he had even known the Apostles; but we have here the manifestation of a tendency of the traditionists to prolong considerably the lives of certain personalities of the past [see MUʿAMMARŪN]. Although al-Suyūṭī (*al-Laʾālī al-maṣnūʿa fi ʾl-aḥādīth al-mawḍūʿa*, i, 95-100) criticises the legend of Ḳuss, no-one doubts his historical existence, which seems to be attested by an *ḥadīth* often given on the authority of Ibn ʿAbbās. When receiving a delegation from the Bakr b. Wāʾil (whom the Iyād had joined), the Prophet is said to have enquired about Ḳuss, and learning that he was dead, to have recited a passage from a speech which he had heard delivered at ʿUkāẓ and to have had someone (Abū Bakr or another person) remind him of some lines of the orator-poet's which he had forgotten. He is even said to have exclaimed, "I hope that on the Day of Resurrection, he will return to life and form a people of his own". Al-Djāḥiẓ, who is usually fairly prudent, remarks (*Bayān*, i, 52) that if the Prophet repeated his words, it was because Ḳuss upheld the concept of monotheism and believed in the resurrection. This is why he was quickly included in the list of the *ḥanīf*s [*q.v.*] and of the "people of the interval" [see FATRA], and even considered as an ascetic (al-Djāḥiẓ, *Bayān*, i, 365). Ibn al-Athīr (*Usd*, iv, 204) and Ibn Ḥadjar (*Iṣāba*, No. 7340) cite him in their biographies of Companions, and although Ibn Isḥāḳ and Ibn Hishām do not mention him, ʿAlī b. Burhān pays some attention to him in his *Sīra Ḥalabiyya* (i, 210-12, 216-18).

Finally, tradition attributes to him the merit of being not only the first to believe in the resurrection, but also to have been the first to preach mounted on a camel or leaning on a sword or staff [see ʿANAZA] and to use the formula *ammā baʿdu* and write at the beginning of a letter (!) *min Fulān ilā Fulān* (cf. Goldziher, in *Abhandl. zur arab. Philologie*, ii, 56). He is even said to have formulated the juridical rule that "proof is incumbent on the plaintiff and the defendant who denies his guilt must speak on oath". All these legendary details are evidently aimed at exalting the prestige of a personage considered to be a precursor of Islam.

ḲUṢṢĀṢ [see ḲĀṢṢ].

ḲUSṬĀ B. LŪḲĀ AL-BAʿLABAKKĪ, mediaeval scientist and translator. He was of Christian origin, from the town of Baʿlabakk [*q.v.*]. In Baghdād, where he worked for some time as a doctor, scientist and translator, his reputation was as high as that of Ḥunayn b. Isḥāḳ [*q.v.*]. He was fluent in Greek, Syriac and Arabic, being particularly noted for his excellent style in Arabic. The last part of his life was spent in Armenia, where he was induced to take up residence by the prince Sanḥarīb. According to ʿUbayd Allāh b. Djibrāʾīl, he came into contact with a certain Abu ʾl-Ghiṭrīf al-Baṭrīḳ, for whom he composed a number of scholarly works. Ḳusṭā died in Armenia *ca.* 300/912-13; a shrine was erected over his grave, which was accorded the same honours as the graves of kings and other eminent personages.

It was, of course, usual for Arabic scholars to be well versed in a wide range of subjects, and Ḳusṭā was no exception. He is said to have been skilled in medicine, philosophy, geometry, arithmetic, astronomy, and music—all these subjects are included in the lists of his works given by the biographers. Ibn al-Nadīm (*Fihrist*, 410-11), having first stated specifically that he has excluded translations, lists over thirty of Ḳusṭā's original works, and Ibn Abī Uṣaybiʿa adds a further thirty works to this list (*ʿUyūn al-anbāʾ*, ed. A. Müller, Cairo 1882, i, 244-5). Medical works, which preponderate, include the following treatises: on gout; infectious diseases; insomnia; knowledge of fevers, types of crises in illnesses, the pulse; paralysis-types, causes and treatment; the four "humours"; and phlebotomy. Non-medical works include several treatises on philosophy and logic; on astronomy, on the celestial sphere; two commentaries on Euclid's *Elements*, a treatise on algebra, a commentary on the book of Diaphantos on algebra; on the steelyard (*ḳarasṭūn* [*q.v.*]); on weights and measures; and on burning mirrors. Some of Ḳusṭā's translations are extant, e.g. those of Diaphantos, Theodosios, Autolykos, Hypsikles, Aristarchos, and Hero. For a list of his works, both originals and translations see Suter, 40-2 and Index, and Sezgin, *GAS*, iii, 270-4, v, 285-6, and Indexes). Both writers give locations of extant manuscripts.

No comprehensive study of Ḳusṭā's works has yet been undertaken, nor has there been made any detailed evaluation of his contribution, certainly a significant one, to the progress of science. His services as a translator must surely rank at least equally with his original works. The biographers are unanimous in praising his skill as a translator of Greek works into Arabic, and in the light of the surviving translations their esteem seems to be fully justified. For example, although the original of Hero's *Mechanics* is lost, an examination of Ḳusṭā's Arabic version (Carra de Vaux in *JA*, 9e Série [1893], Tome i, 386-472, Tome ii, 152-269, 420-514 = Arabic text and French translation) leaves us with little doubt that this is a faithful and sensitive rendering.

ĶUSṬANṬĪNA, Ķusanṭīna, Constantine, a town in Algeria and the chief town of the *wilāya* (department) of the same name. It lies 330 miles east of Algiers and 50 miles south-east of Skidda (former Philippeville), which is the port for Constantine, with which it is connected by railway, in lat. 36° 22′ N. and long. 18° 56′. The population in 1965 was 235,000.

The situation of Constantine makes the town a natural fortress. It is built on a rocky plateau in the form of a trapezoid, bounded on the south-east, north-east and north-west, by deep ravines and connected with the surrounding country on the south-east only by a narrow isthmus. The plateau itself declines rapidly from north to south. The Ķaṣba on its highest point is 2,500 feet above sea-level, while the Marabout of Sīdī Rās͟hid not a mile away is only 2,170 feet high. Of the ravines which represent the moats of this natural fortress, the most remarkable is that which runs along the south-east and north-east faces of the plateau, at the bottom of which the Rummel (Wādī 'l-Raml) flows. This river runs along a narrow gully, a real cañon, the walls of which rise sheer upright to a height of 500 to 600 feet, disappears for 1½ miles under three subterranean passages which the water has hollowed out, makes its exit in waterfalls and descends to the verdant plain of al-Ḥamma. Across this gorge, above which on the right bank rises the plateau of Manṣūra (2,340 feet), the Romans threw a bridge which existed for several centuries after the Arab conquest. Al-Bakrī (*Description de l'Afrique*, ed. and tr. de Slane, Ar. text 63, tr. 131-2) mentions it, and al-Idrīsī (ed. de Goeje, 111, ed. Naples-Rome, iii, 265) describes it as one of the most remarkable works which it had ever been granted him to see. Consisting of two rows of arches, one above the other, 217 feet high, a road and an aqueduct bringing the water necessary for the town ran across it. It collapsed in the 7th/13th century, was rebuilt in the 18th by order of Ṣāliḥ Bey under the supervision of a Spanish engineer, and on finally breaking down in 1947, it was replaced by an iron bridge 423 feet long crossing the Rummel at a height of 528 feet. Another bridge is, farther up the river, to connect the plateau of Manṣūra with the quarters previously in existence to the southwest of the town.

This last preserves an originality of aspect which is in striking contrast to that of other Algerian towns. It resembles a great Kabyle village rather than a oriental city. It is an agglomeration of houses with clay roofs, penetrated by an irregular system of narrow, tortuous streets, which sometimes descend like stairways to the edge of the ravine, the heights of which are crowned by houses. A few monuments recall the past history of Constantine. The great mosque dates from the time of the first Ḥafṣid sovereigns (7th/13th century). The mosques of Sūķ al-G͟hazāl, of Sīdī Lak͟hḍar and of Sīdī al-Kattānī, all of which were built in the 18th century, belong to the Turkish period, as does the palace built by Aḥmad, the last Turkish Bey, just before the French conquest.

The origins of Constantine are obscure. But in all probability, the site must have been occupied at a very early period by autochtonous peoples. The classical texts mention the existence of a town named Cirta at this place. The origin of the name (*ķart* "town" [see ķarya]) would lead one to suppose that the Carthaginians had established a colony there. In any case, Cirta appears in the period of the Punic Wars as the capital of the kings of Numidia; Syphax had a palace there. Masinissa and his successors erected important buildings in it and invited Greek and Roman merchants thither. During the civil wars of the 1st century B.C., P. Sittius Nucerianus, an adventurer, seized Cirta and on the latter's ultimate triumph received the town and territory. Cirta then became a Roman colony under the name of Colonia Cirta Julia or Cirta Sittianorum. Juba II made it his capital after the restoration of the kingdom of Numidia by Augustus and lived there for seven years (24-17 B.C.), till he was forced to exchange Numidia for Mauritania. Cirta still remained the capital of the republic of the "four colonies", then in the 3rd century A.D. it became that of the province of Numidia Civilis or Numidia Cirtensis established by Maximianus Herculus in 297. In the course of the civil wars which followed the abdication of Diocletian, the inhabitants recognised the authority of the usurper Alexander and gave him asylum after he had been driven from Carthage and thus brought upon their heads the wrath of Maxentius. The latter took Cirta and razed the town to the ground in 311. It was rebuilt in 313 by Constantine, the conqueror of Maxentius, and received the name of Constantine which it has retained to the present day. At the Vandal invasion, Constantine was occupied by the barbarians, but given back in 442 by Gaiseric to the Emperor. After the destruction of the Western Empire, Constantine remained independent, till the Byzantines, victorious over the Vandals, brought Northern Africa under their sway in 533. It remained subject to them till the invasion of North Africa by the Arabs.

The chroniclers are silent as to the date at which it fell into the hands of the Muslims. It is probable, however, that it was not affected by the first Arab incursions but was only occupied at the end of the 1st/7th century at the same time as Carthage and the other Byzantine strongholds which were the last to surrender. Included in the province of Ifrīķiya, Constantine owned the rule successively of the governors of Ķayrawān, the Ag͟hlabids, the Fāṭimids, then the Zīrids. The latter retained it even after the Ḥammādids had deprived them of a portion of the eastern Mag͟hrib. They lost it entirely at the Hilālī invasion. The Ḥammādid al-Muʿizz took advantage of their troubles to seize the town and include it among his own possessions. The successors of al-Muʿizz retained the town for a century in spite of a revolt instigated by the uncle of the *amīr* al-Nāṣir. After the capture of Bougie by the Almohads, Yaḥyā, the last king of Bougie, sought refuge in Constantine, then giving up any idea of further resistance, surrendered to ʿAbd al-Muʾmin whose troops took possession of the town. Attacked unsuccessfully by ʿAlī b. G͟hāniya in 581/1185, Constantine remained faithful to the Almohads till the final collpase of the empire founded by ʿAbd al-Muʾmin.

At this period, Constantine was a very prosperous city: "Ķusanṭīna", says al-Bakrī (*op. cit.*, 63, tr. 131-2), "[is a] large and ancient town with a numerous population; . . . it is inhabited by various families who were originally part of the [Berber] tribes established at Mila, in the land of Nafzāwa in that of Ķasṭīliyā, but it belongs to certain Kutāmī tribes. It has rich bazaars and a prosperous trade". Al-Idrīsī describes Constantine (Ķusanṭīnat al-hawāʾ, "of the air", because of its position) as a populous and commercial town. "The inhabitants, he continues, "are rich; they have agreements with the rural population (*al-ʿArab*) and co-operate with them for the cultivation of the soil and the preservation of the harvests.

Their silos are so good that corn may be kept in them for a century without suffering any deterioration. They collect large quantities of honey and butter, which they export to the outside . . ." (*loc. cit.*).

When the Almohad Empire broke up, Constantine recognised the authority of the Ḥafṣid Abū Zakariyyā', who was proclaimed at Tunis in 628/1230 [see ḤAFṢIDS]. The history of the town under the Ḥafṣids (7th-10th/13th-16th centuries) is very confused and disjointed. The rulers of Tunis attached great importance to the possession of Constantine; they frequently lived there and delighted in improving it; they usually entrusted its government to princes of their own family. Nevertheless, in spite of their precautions and trouble they lost it on several occasions; in 681/1282 for example, in the reign of Abū Isḥāḳ, the governor Ibn al-Wazīr rose against the sovereign of Tunis, who had to send his son, Abū Fāris, to retake the town by force. In 683/1284, its inhabitants opened their gates to the pretender Abū Zakariyyā' of Bougie; in 704/1305 at the suggestion of the governor Ibn al-Amīr, they submitted to the Ḥafṣid sovereign of Tunis, whom they cast off almost immediately afterwards, however, to place themselves again under the authority of the king of Bougie, Abu 'l-Baḳā'. The latter succeeded in restoring to his own advantage the unity of the Ḥafṣid kingdom in 709/1309 and for some years maintained peace in the eastern Maghrib. But new troubles were not long in arising. From 712/1312 to 719/1319, Constantine was almost independent under the authority of the vizier Ibn Ghamr, who succeeded in placing on the throne of Tunis a prince of his own choosing, Abū Yaḥyā. In 725/1325, the revolt of another vizier, Ibn al-Ḳātūn, exposed the inhabitants to an attack, which proved unsuccesful, from the ʿAbd al-Wādids. The wars which then broke out in the eastern Maghrib between the Marīnids and the ʿAbd al-Wādids, as well as the good government of the governors Abū ʿAbd Allāh and Abū Zayd, son and grandson of Abū Yaḥyā, king of Tunis, gained Constantine a few years of respite. But peace, which had only been established with difficulty, was again broken in the middle of the 8th/14th century by Marīnid expeditions. Abu 'l-Ḥasan entered Constantine without striking a blow and supplanted Ḥafṣid authority by his own in 748/1347. The defeat of Abu 'l-Ḥasan at Ḳayrawān brought about a revival in favour of the Ḥafṣids and one of them, al-Faḍl, took advantage of the occasion to seize the town. He held it for only a short time. The former Ḥafṣid governor, Abū Zayd, set at liberty by Abū ʿInān, retook Constantine, then abandoning his protector, proclaimed as Sulṭān a son of al-Ḥasan named Tāshfīn. Soon afterwards, Abū Zayd's brother, Abu 'l-ʿAbbās, overthrew him and dethroned Tāshfīn. He in his turn took the title of Sulṭān, repulsed the Dawāwida and Sadwīkash Arabs, who had laid siege to Constantine in 756/1355, but could not prevent the town being taken by Abū ʿInān, who came in person against it. He regained it from the Marīnids in 761/1360. Becoming Sulṭān of Tunis in 772/1370, Abu 'l-ʿAbbās maintained peace in the province of Constantine till his death. His successor Abū Fāris had on the other hand twice to reconquer the town from his brother Abū Bakr, who had seized it with the help of the Arab tribes.

We have no exact details on the history of Constantine in the 9th/15th century. Rebellions against Ḥafṣid rule were, it seems, less frequent than in the preceding century, but its authority was more nominal than real. During this period, the real masters of Constantine were the chiefs of the Awlād Sala, a section of the Arab tribe of Dawāwida. In the town itself the exercise of authority was in the hands of a few families, clients of the Awlād Sala. Such, for example, were the family of ʿAbd al-Mu'min of Marabout origin, whose chiefs exercised by hereditary right the functions of *shaykh al-Islām* and *Amīr al-Rakab* (leader of the caravan of pilgrims to Mecca); the family of the Banū Bādis, whose members had arrogated to themselves the duties of *ḳāḍī*; and that of the Banu 'l-Faggān (or Lafgūn), famous as legal authorities.

The arrival of the Turks in Northern Africa reopened an era of troubles for Constantine. There were two parties in the field. The one, led by the ʿAbd al-Mu'min, was favourable to the maintenance of Ḥafṣid suzerainty; the other, led by the Lafgūn, invited the Turks thither. According to Vaysettes, a first attempt by the Turks to occupy the town was made as early as 923/1517. According to Mercier, Ḥasan, one of Khayr al-Dīn's lieutenants, forced the people of Constantine to recognise his master's authority in 925/1519 or 926/1520. The submission of the town was only an ephemeral one, however, for in 932/1526 a representative of the Ḥafṣid sovereign of Tunis was residing in the town. It is not till 940/1534 that the establishment of a garrison definitely marks the occupation of Constantine by the Turks. Their authority was not firmly established without difficulty. The belated partisans of the Ḥafṣids did not bow at once to the Turkish yoke, but sought to rid themselves of their new masters. In 975/1567-8 they massacred the Turkish garrison and expelled their supporters. To restore order, the Pasha Muḥammad had to lead an expedition against Constantine, the inhabitants of which did not dare resist but opened the gates without showing fight. Another rebellion broke out in 1572 and was suppressed with the greatest rigour. The ʿAbd al-Mu'mins who had instigated it, were deprived of their privileges, and from that date ceased to play a predominant part in the affairs of the town. They resigned themselves to their fall with a very bad grace. We find them again in 1052/1642 taking advantage of the difficulties caused to the Turks by the revolt of the Kabyles and the insubordination of the great Arab chiefs to stir up risings again which were, however, speedily put down. After being selected as the capital of the *beylik* of the East in the 10th/16th century, Constantine enjoyed complete tranquility for the half century following the period of government of the Bey Farḥat (1046/1637). But the intervention of the Algerians in the affairs of Tunisia ended in exposing Constantine to the reprisals of its neighbours. In 1112/1700, Murād Bey of Tunis, victorious in two battles against ʿAlī Khōdja Bey of Constantine, laid siege to the town and blockaded it for three months. The Dey of Algiers at length received warning of the precarious situation of the town by a messenger, who had succeeded in escaping from Constantine after being let down the cliff by a rope, and sent an army to its help, the arrival of which the Tunisian general did not dare await.

The 18th century marks the zenith of Turkish domination at Constantine. The *beylik* was held during this period by men of energy and intellect, ruling like independent sovereigns rather than as docile representatives of the Dey of Algiers. Such were Kalyān Ḥasan Bey, called Bū Kamya (1713-36), Ḥasan b. Ḥusayn called Bū Ḥanak (1736-54), Aḥmad al-Ḳullī (1756-71) and above all Ṣāliḥ Bey (1771-92). Constantine owes to them many public works and buildings of general interest. Bū Kamya built the

mosque of Sūḳ al-Ghazāl; Bū Ḥanak made new streets and built the Mosque of Sīdī Lakhḍar. Ṣāliḥ Bey rebuilt the bridge over the Rummel and the Roman aqueduct bringing the waters of the Djabal Waḥsh to the city; he also built the mosque and *madrasa* of Sīdī al-Kattānī and commissioned Italian artificers to built him a palace adorned with faiences and marble columns purchased in Italy.

A period of anarchy and disorder succeeded this brilliant epoch. Ṣāliḥ Bey himself, deposed by the Dey of Algiers, to whom he had given offence, tried to stir up a rebellion but perished miserably. Seventeen Beys ruled Constantine in the period 1792-1826. Some of them only held office a few months or even a few days; almost all were distinguished by their cruelty and rapine. Constantine suffered much from this state of affairs. To the internal disorder were soon added attacks by the surrounding peoples. The Kabyle hordes of the Marabout (Ibn al-Aʿrash Sulaymān Kāhya) rose against the Turks and advanced up to the walls of Constantine in 1804. A Tunisian army commanded by Sulaymān Kāhya besieged the town three years later. It was blockaded for two months (April-May 1807) and was once bombarded. The approach of a relieving army from Algiers caused the Tunisians to raise the siege, and in their retreat they lost 1,167 prisoners and all their artillery.

Aḥmad, the last Bey of Constantine, possessed those qualities which were lacking in his predecessors, Intellectual, active, ambitious and energetic, he unfortunately made himself hated by his acts of cruelty and by the exactions levied by him to raise funds to built a palace in Constantine to replace the old Dār al-Bey. After the French occupation of Algiers, he sought to profit by the disappearance of the *odjaḳ* to create an independent principality in the east, and had the title of Pasha given to him by the Ottoman Porte. Deposed by a decree from General Clauzel on 15 December 1830, he nevertheless retained possession of Constantine. The hesitation on the part of the French government, which tried to come to terms with him for his voluntary submission and after the failure of these negotiations did not wish to enter on a dangerous campaign, delayed his fall. But in 1836, Marshall Clauzel, then governor-general of Algeria, obtained permission to undertake an expedition against Constantine. Leaving Bone on 2 November, the French troops arrived without difficulty in sight of the town and took up a position on the heights of the Manṣūra and of the Kudya. Two sorties by the besieged, led by Ibn ʿĪsā, *khalīfa* of the Bey, were repulsed; on the other hand, two attacks by the French in the night of the 22-3 December also failed. Clauzel decided to raise the seige and returned to Bone after a retreat which was rendered very difficult by bad weather. This check was made good the following year. An army under General Damrémont laid siege to Constantine on 6 October 1837. He was killed on 12 October; but his successor, General Valée, ordered an assault on the 13th. The town was taken after fierce fighting by columns led by Colonels Combe and Lamoricière. Aḥmad Bey, who had left Constantine on the approach of the French troops, retired to the south where he held the country against the French for eleven years longer. It is said that the siege of 1837 was the ninetieth that Constantine had to endure.

After the French occupation, Constantine, the administration of which had been entrusted to a *ḥākim* under the supervision of the military authorities, became the headquarters of a *commandement supérieur* and the base of French operations in the eastern province. At first under military law, it was not given a municipal government till 1848 and became the capital of the *département* in 1849. Since then the town has developed considerably. It has in fact remained a market and centre of supplies for the tribes of the east; its native industries have survived and supply the population of the surrounding country with cotton stuffs and articles of leather.

(AL-)ḲUSṬANṬĪNIYYA, Constantinople.

1. TO THE OTTOMAN CONQUEST (1453).

The city, which Constantine the Great on 11 May 330 raised to be the capital of the Eastern Empire and which was called after him, was known to the Arabs as *Ḳusṭanṭīniyya* (in poetry also *Ḳusṭanṭīna*, with or without the article); the older name *Byzantion* (*Buzanṭiyā* and various spellings) was also known to them, as well as the fact that the later Greeks, as at the present day, used to call Constantinople simply ἡ πόλις as "the city" par excellence (Masʿūdī, iii, 406 = § 1291 n.; Ibn al-Athīr, i, 235; Abu 'l-Fidā, ii/1, 39; Dimashḳī, 241, 259; Ibn Baṭṭūṭa, ii, 431). From εἰς τὴν πόλιν arose the Turkish name "Istanbul" [*q.v.*]. *Ḳusṭanṭīniyya*, with the variant *Ḳusṭanṭiniyya*, remained the official designation on coins and firmans under the Ottomans.

The campaigns of the Arabs against Constantinople. It is said that the Prophet himself had foretold the conquest of Constantinople by the faithful. The Ottoman historians adduce the following *ḥadīth* "You shall conquer Constantinople; peace be upon the prince and the army to whom this shall be granted!" (ʿĀlī, *Künh al-akhbār*, v, 252; Ṣolaḳzāde, 194; Ewliyā, 1, 32, 73; ʿAlī Sāṭiʿ, *Ḥadīḳat al-djewāmiʿ*, i, 2); Suyūṭī's *al-Djāmiʿ al-ṣaghīr* is given as authority; older references are wanting. As a matter of fact, the Umayyads set about this enterprise with the energy and valour that inspired the early warriors of Islam. In the year of the world 6146 (beginning 1 September 653), according to Theophanes, 345, a fleet was equipped in Tripolis "against Constantinople", which under the leadership of Αβουλαθάρ (i.e. Busr b. Abī Arṭāt) defeated the Greek fleet at Phoenix (Finika) on the Lycian coast [see DHĀT AL-ṢAWĀRĪ in Suppl.], but did not reach Constantinople; at the same time, Muʿāwiya had invaded Byzantine territory by land.

In the year 44/644 took place the campaign of ʿAbd al-Raḥmān b. Khālid, who advanced as far as Pergamon; the admiral Busr b. Abī Arṭāt, according to Arabic sources, is said to have reached Constantinople (Ṭabarī, ii, 86).

In the course of the next years, Faḍāla b. ʿUbayd advanced as far as Chalcedon, and Yazīd, son of Muʿāwiya, was sent after him (according to Theophanes, in the year 6159 of the world, beginning 1 September 666; according to Elias of Nisibis, Yazīd

appeared before Constantinople in 51/672); a fleet commanded by Busr b. Abī Arṭāt supported this enterprise. In 672 a strong fleet cast anchor off the European coast of the Sea of Marmora under the walls of the city. The Arabs attacked the town from April to September; they spent the winter in Cyzicus and renewed their attacks in the following spring until they finally retired "after seven years' fighting". A great part of the fleet was destroyed by Greek fire; many ships were wrecked on the return journey (Theoph., 353 ff.). There are difficulties in the chronological arrangement in Theophanes of the various phases of this seven years' blockade. The land army seems to have appeared before Constantinople in 47/667 and the fleet to have finally retired in 53 673. The Arab historians vary between the years 48 49, 50 and 52 and place the death of Abū Ayyūb in the year 50, 51, 52 or even 55. As the fighting around Constantinople was spread over several years, the difference in the estimates is not so unaccountable.

This siege has acquired particular renown in the Arab world, as the Anṣārī Abū Ayyūb Khālid b. Zayd fell in it and was buried before the walls of Constantinople; the finding of his tomb during the final siege by Meḥemmed II was an event only comparable to the discovery of the holy lance by the early Crusaders at the siege of Antioch. (The grave of Abū Ayyūb is first mentioned by Ibn Ḳutayba, 140; according to Ṭabarī, iii, 2324, Ibn al-Athīr, iii, 381, Ibn al-Djawzī and Ḳazwīnī, 408, the Byzantines respected it and made pilgrimages to it in times of drought to pray there for rain (*istisḳā'*); the Turkish legend is given very fully in Leunclavius, *Hist. Mus.*, 41 ff. and in the painstaking monograph by Ḥādjdjī ʿAbd Allāh, *al-Āthār al-madjīdiyya fi 'l-manāḳib al-khālidiyya*, Istanbul 1257.)

There was a truce for over 40 years between Byzantines and Arabs until in 97/715-16 Sulaymān b. ʿAbd al-Malik came to the throne. A *ḥadīth* was at this time current according to which a caliph who should bear the name of a prophet was to conquer Constantinople. Sulaymān took the prophecy to refer to himself and equipped a great expedition against Constantinople. His brother Maslama led the army which was equipped with siege artillery through Asia Minor, crossed the Dardanelles at Abydos and surrounded Constantinople. The Arab armada anchored partly near the walls on the coast of the Sea of Marmora and partly in the Bosporus; the Golden Horn was barred by a chain. The siege began on 25 August 716 and lasted a whole year; Maslama then found himself forced to retire owing to the attacks of the Bulghars and the scarcity of provisions (Theophanes, 386-99; full details in Ibn Miskawayh, ed. de Goeje, 24-33; cf. also Ṭabarī, ii, 1314 ff.; Ibn al-Athīr, iv, 17 ff.; cf. the vivid account in Gelzer, *Pergamon unter Byzantinern und Osmanen*, 49-64). There are many references to Maslama's hazardous march among the later Arabs. Even several centuries later they knew of "Maslama's Well" at Abydos, where he had encamped (Masʿūdī, ii, 317 = § 738; Ibn Khurradādhbih, 104), and the mosque built by him there (Yāḳūt, i, 374). ʿAbd Allāh b. Ṭayyib, the first Muslim to lead an attack on the "Gate of Ḳusṭanṭīniyya" was one of Maslama's comrades (Ibn Ḳutayba, 275). Maslama is said to have made the building of a house near the Imperial palace for the Arab prisoners of war one of the conditions of the treaty of peace and to have built the first mosque in Constantinople (Muḳaddasī, 147; Ibn al-Athīr, x, 18; Dimashḳī, 227); finally, he is credited with building the Tower of Galata (Dimashḳī, 228) and the ʿArab Djāmiʿ in Galata (Ḥādjdjī Khalīfa, *Taḳwīm al-tawārīkh*, year 97 A.H.). Ewliyā and his sources have made two sieges out of Maslama's campaign and embellished their narrative with incredible stories. Nerkesī (d. 1044/1634) discusses Maslama's campaigns in the fourth section of his Pentas, following, so he says, Muḥyī 'l-Dīn al-ʿArabī's *Musāmarāt*.

Only on one other occasion did an Arab host appear within sight of Constantinople, namely in 165/782. Hārūn, the son of the caliph al-Mahdī, had marched through Asia Minor unopposed and encamped at Chrysopolis (Scutari). The Empress Irene, who was acting as Regent for her son Constantine, hastened to make peace and agreed to pay tribute (Theophanes, 455 ff. under the year 6274 of the world [781-2]; Balādhurī, 168; Ṭabarī, iii, 504 ff.; Ibn al-Athīr, vi, 44: year 165/781-2). Ewliyā and his authority (Muḥyī 'l-Dīn Djamālī, died 957/1550 according to Rieu, *Catalogue*, 46 ff.) have made no less then four regular sieges of Constantinople out of the campaigns of the Arabs under al-Mahdī and Hārūn against the Greeks. After the second, Hārūn gained a quarter in the city by a trick similar to that by which Dido gained the site of Carthage (Leunclavius, *op. cit.*, 54; Ewliyā, i, 81 = *Travels, etc.*, i/1, 25); the same story is given by Clavijo, 23, of the settlement of the Genoese in Galata, and Ewliyā, *Travels*, i/2, 66, of the building of Rumeli Ḥiṣār by Meḥemmed II.

The Arab accounts of Constantinople date from the 3rd/9th century. They considered the Dardanelles, the Sea of Marmora and the Bosporus as a single "canal" (*khalīdj*), connecting the Mediterranean with the Black Sea. Iṣṭakhrī and others mention the great chain which prevented the entrance of Arab ships; this is probably the chain, which was stretched between Galata and Constantinople in time of war, that is referred to. The high double walls of the city with their towers and gateways, including the Golden Gate, the Aya Sofya, the Hippodrome with its monuments (notably the Egyptian obelisk), the four brazen horses at the entrance to the palace, and the great equestrian statue in bronze of "Constantine" (really of Justinian, the so-called Augusteus) are described by them in greater or less detail. Ibn Ḥawḳal and Muḳaddasī devote particular attention to the Praetorium where their countrymen, prisoners of war, were kept under a mild custody and to the mosque attributed to Maslama (Yāḳūt, i, 709, s.v. *Balāṭ*, and Constantine Porphyrogenitus, *De ceremoniis*, i, 592, 767). The most detailed account is that of Ibn al-Wardī (8th/14th century); he mentions the bronze Obelisk of Porphyrogenitus, the Pillar of Arcadius and the Aqueduct of Valens and also knew that the Golden Gate was closed. Ibn Baṭṭūṭa (ii, 431-44) described from his own observation the monastic life of his time; the latest notices are given by Fīrūzābādī (d. 817/1415) in his dictionary the *Ḳāmūs*.

Apart from prisoners of war, numerous Muslim merchants and envoys from the caliphs and other Muslim rulers sojourned in Byzantium; the Mamlūk Sulṭāns occasionally banished thither troublesome persons with their families; Saldjūḳ Sulṭāns and pretenders (Ḳilidj Arslān II, Kaykhusraw I, Kaykāwūs II) repeatedly spent long periods in Constantinople; remarkable details of their life in the capital are given by Byzantine writer and in the Saldjūḳ historians.

No definite traces have as yet been discovered of the two sieges by the Arabs and the residence of Arabs and other Muslims in Constantinople; in particular, the mosque of Maslama has not come to

light; it is first mentioned by Const. Porphyr., *De adm.*, ch. xxii (Bonn *Corpus*, 101, l. 22); it was destroyed in a popular rising in 1200 and pillaged by the Crusaders in 1203 (Nicetas Choniates, 696, 731, ed. Bonn). According to Ibn al-Athīr, ix, 381, cf. x, 18 (whence Abu 'l-Fidā derives his information), it was restored in 441/1049-50 by Constantine Monomachos at the request of the Saldjūķ Ṭoghrīl Beg. According to Maķrīzī (i, 177, ed. Quatremère), Michael VIII Palaeologus built a mosque about 660/1261-2 which the Mamlūk Sulṭān Baybars equipped in splendid style. The accounts of the ʿArab Djāmiʿ and other buildings by the Arabs in Constantinople belong to the domain of fable.

(J. H. MORDTMANN)

2. AFTER THE OTTOMAN CONQUEST [see ISTANBUL].

KÜSTENDIL, KÖSTENDIL (in Serbian: Ćustendil), a town of some 35,000 inhabitants in Western Bulgaria. It was in the Serbo-Bulgarian Middle Ages a small fortified stronghold on a hill above the wide plain of Küstendil, serving as a princely residence, and was known as Velbuzhd. In Ottoman times it was capital of the *sandjāķ* of Küstendil, and was an Islamic cultural and administrative centre of some importance. The town is the indirect successor of the Roman Pautalia, of which substantial remains have been unearthed.

The Ottoman chroniclers Saʿd al-Dīn and Münedjdjimbashī mention that the ruler of the land of Konstantin (the son of the Serbian nobleman Dejan) accepted Ottoman overlordship in 773/1371-2, after the latter had captured the strategic fortresses of Ikhtiman and Samokov. Neshrī mentions Konstantin among Murād's vasals during the Ķaramān Campaign. ʿAshīķpashazāde, Oruč Beg and the Anonymus Giese do not however mention the acquisition of the land of Konstantin. This prince married Helena, the daughter of the Bulgarian Tsar Ivan Alexander (their daughter married Manuel Palaeologus, emperor of Byzantium), and died as a loyal Ottoman vassal in the Battle of Rovine in 1395 assisting Bāyezīd I against the Walachians (797/1395). He left no suitable heir behind. The memory of the princely couple is perpetuated by the monastery of Poganovo in the ravine of the Erme north of Küstendil, today just across the Yugoslav border. Konstantin's lands, including the towns and castles of Štip, Radomir, Petrič, Melnik, Vranje and the rich silver mines of Kratovo (places today partly in Yugoslavian, partly in Bulgarian territory), were transformed into an Ottoman *sandjāķ* known as Ķostadin-ili, the land of Ķostadin. There are some traditions that the Bulgarian population rose in revolt in the difficult years of the Fetret Dewri and around the time of the ascession of Murād II. The fortified town had allegedly to be retaken, after which it was dismantled. The unreliable population was transferred to the neighbouring villages. Whether true or not, it is at least certain that in the time of Murād II a new open town was founded below the "Castle Hill", grouped around a mosque, a caravanserai and a school. The new settlement became known as Ilīdja-yī Küstendil, or Ilīdja in Turkish, Konstantinova Banja or Velbužka Banja in Slavic. The Turkish form Küstendil appears to be a corruption of Ķostadin-ili.

At the end of the 8th/14th century and the beginning of the 9th/15th century, important groups of Turkish colonists from Asia Minor were settled in the *sandjaķ* of Küstendil. According to an Ottoman census from the beginning of the 10th/16th century, these groups numbered 6,640 families. The Christian section of the population then comprised 56,988 families. According to the census of 925/1519, the city itself counted a Muslim population of 293 families and 60 bachelors, as well as 47 Christian families, six bachelors and eight widows, perhaps altogether 1,800 civil, non-administrative inhabitants. In spite of this relatively small size, Küstendil appeared in 1499 to the widely-travelled Rhenish knight Arnold van Harff as "eyn gar grosse schone Stadt". This source also remarks that "Wruskabalna" (Velbužka Banja) had a palace where the sultan kept a number of his wives. At the beginning of the 20th century, Jordan Ivanov still saw a "Seray Kulesi", situated next to a fine basin (*ḥawḍ*) built and paved with large slabs of marble. Tower and basin were situated in the "Seray Mahallesi".

In the 10th/16th century, Küstendil witnessed a rapid expansion. In 966/1559 an anonymous Italian traveller described it as a town with "about a thousand houses, built in the Turkish manner, many mosques and quite a number of baths. The town is inhabited by Turks and some Jews . . ." We passed the night in a Khan, called Imaret, which in our language is an inn. A Sandjakbeg ordered the construction of this very convenient building for the traveller and stranger, for the salvation of his soul." During this century, a number of military commanders and members of the administration erected a considerable number of mosques and caravanserais, and opened up mineral baths. Meḥmed-i ʿĀshīķ in his *Menāẓirü'l-ʿawālim* (Halet Efendi, No. 616, I, fol. 212a) noted in 997/1589 twelve mineral baths, many with stone-built domes over the disrobing section and over the bathroom proper, others even with separate rooms. The most beautiful was the so-called Beg Ilīdjasī. In 894/1489 the *beglerbegi* of Rumeli, Khādīm Süleymān Pasha, had erected a large domed mosque and a double bath in the city, and had laid out a water supply system which brought good drinking water from the village of Bogoslov, some 15 km. away, to the town. The villagers of Bogoslov received a privileged status as *ṣu-yoldjī*. The *taḥrir defteri* of 925/1519 also attributes an *ʿimāret* and a number of shops to this governor. (The mosque, very similar to that built by Khādīm Süleymān Pasha on the banks of the Tundja in Edirne, was demolished shortly before the Second World War.) Other important buildings were the ʿImāret Djāmiʿi, with

caravanserai, *madrasa* and bath, erected in 937/1531 by Meḥmed Beg (the building was often confused with the mosque of Murād II; see Ayverdi, *Osmanlı mimarisinde Fatih devri*, iv, Istanbul 1974, 806, which enumerates and continues the old mistakes). The mosque was demolished in 1949. Other 10th/16th century buildings, happily preserved, are the Dervīsh Banya from 973/1566 and the large mosque of Aḥmed Beg from 983/1575-6, this last now serving as a local museum.

According to the Ottoman census register of 981/1573, the town then numbered 623 Muslim households, 90 Muslim bachelors, 84 Christian households, 28 Christian bachelors, 14 widows and a Jewish community of four families. The whole population, including the members of the administration and their families, amounted perhaps to 4,000 souls. By then the number of Muslim *maḥalle*s had risen from six (in 925/1519) to 21, the number of *imām*s of mosques from seven to seventeen. An Ottoman Djeleb register (*Turksi Izvori za Bălgarskata Istorija*, iii, Sofia 1972, 129-50) from 981/1573 gives a fair cross-section of the composition of the town's population. A total of 57 Muslim *djeleb*s are registered against six Christians, all given by name, patronymic and profession. Both groups were almost all craftsmen, leatherworkers, smiths, *mütāf*s, *ḥelvādjī*s, goldsmiths, shoemakers, soapmakers, cartwrights, etc. Out of the number of *djeleb*s in the villages of the *ḳaḍā'* of Küstendil, 558 were Christian against 20 Muslims, from which may be concluded that the Bulgarian Christian element continued to be the bulk of the rural population.

In the 11th/17th century, the development of Küstendil apparently stagnated. The city had suffered badly from earthquakes in 993/1585 and 1051/1641. Ewliyā Čelebi (*Seyāḥat-nāme*, vi), who visited it in 1071/1660-1 and left his signature on the front wall of the Aḥmed Beg Mosque, counted eleven small *maḥalle*s with 1,100 houses, and he further made some important notes on the Islamic buildings of the city, among which he mentions a number of mosques, three *madrasa*s, five *tekke*s, six schools and twelve mineral baths "with lofty vaults and many basins".

In March 1690 Küstendil was occupied by an Austrian force under Antonio Valerio Žić, which led to a considerable diminishing of the Muslim population. In about or after that year, the entire settlement was surrounded by a wall with towers and gates, and the Castle Hill was again fortified. A picture of these works, made at the end of the 17th century by the Dutch artist Harrewyn, is preserved in the "Prenten Kabinet" of the Amsterdam Rijksmuseum.

In the early 19th century, Küstendil recovered slowly. St. Denis gives the number of inhabitants in 1807 as 7,000. J. Hütz (*Beschreibung der europäischen Türkei*, Munich 1828, 250-1) gives the same number. Ami Boué (*Recueil d'itinéraires*, i, Paris 1836) counted 9,000 inhabitants, Bulgarians and Muslims. The *Sāl-nāme* of the Ṭūna Wilāyeti of 1285/1868-9 mentions 16 mosques in Küstendil, three *madrasa*s and 16 *tekke*s. When in 1878 Küstendil came within the frontiers of the newly-established Bulgarian state, most of the Muslim inhabitants emigrated. In 1890 Jireček (*Das Fürstenthum Bulgarien*, Prague-Vienna-Leipzig 1891) counted in 1890 10,689 inhabitants, of which only 581 were Turks. Jireček still saw nine lead-covered mosques. Jordan Ivanov noted in 1908 ten mineral baths. Today (1979) only two mosques and one of the baths remain preserved, and the Muslim element is reduced to a handful of families.

Küstendil produced some Ottoman scholars and men of letters, such as Sanūberzāde Ḥāletī (d. 973/1566); Shem'ī Meḥmed Efendi Küstendil, scholar, poet, and calligrapher who was for a long time *muftī* of the town (d. 1272/1855-6); and especially, Küstendilī Mollāzāde Süleymān Sheykhī Efendi, for a long time *shaykh* of the Naḳshbandī convent of Küstendil, who left behind some 26 works including a *History of Küstendil*. The Naḳshī Dergāh, built by Süleymān himself, and in the yard of which he was buried, was demolished shortly after Bulgaria became independent.

(M. Kiel)

KUSŪF, Khusūf, eclipse of the sun or of the moon. As regards linguistic usage, it may be noted that *al-kusūf* is used alike for the eclipse of the moon (*kusūf al-ḳamar*) and for that of the sun (*kusūf al-shams*), e.g. in al-Farghānī, Ḳusṭā b. Lūḳā, al-Battānī, al-Bīrūnī; but they are often distinguished as *al-khusūf*, eclipse of the moon, and *al-kusūf*, of the sun, e.g. by al-Ḳazwīnī (on the linguistic usage, it should be noted that according to the *Mafātīḥ al-ulūm*, ed. van Vloten, 222-3 the viith form, as in *inkasafat al-shams*, should not be used, although this is very often done; e.g. by al-Ḳazwīnī and others).

The eclipse of the sun and of the moon have from the earliest times attracted the liveliest attention. Ptolemy, following Hipparchus, studied the theory of eclipses, and following him the Arabs and Syrians, etc. We shall deal first with the eclipse of the moon. It must be premised that the apparent path of the moon—we must adhere to the geocentric view—cuts the ecliptic in two opposite points, which however in course of time come to move on to the

ecliptic. These points are called *al-djawzahar* (Persian *djawz čihr*, nut-shape, or less correctly *gūy čihr*, globe-shape); they are also called *al-tinnīn*, "dragon" (see below). All the planets have of course such *djawzahar*; without an addition the word always refers to the moon. Their positions are given in the Ephemerides. The massive ball into which, according to Ibn al-Haytham, the moon is inserted, and which carries it along as it moves, is called *falak al-djawzahar*.

The eclipse of the moon is caused, as was early recognised, by a dark body coming between the sun and the moon. It was at one time thought that this was a dragon, which ended at two opposite points on the globe of the heavens and had the same motion as the nodes of the moon. Eclipses occur when we cannot see the moon, because the head or tail of the dragon comes between us and the moon. From this idea comes the name for the crescent and waning nodes, i.e. the points where the moon passes through the ecliptic, "head, *al-ra'*s" and "tail, *al-dhanab*", which were retained long after the "dragon" had disappeared. The sign Ω for the length of the node is a distorted dragon. The astrologers credited this dragon with certain influences on the horoscope. But Severus Sebukht (*ca.* 650) (F. Nau, *Notes d'astronomie syrienne*, in *JA*, Ser. 10, xvi [1910], 15) long ago denied this, as there was no dragon and the calculations in question referred to the movements of the modes. But we still find in al-Bīrūnī's *Tafhīm*, etc. the assertion that head and tail have separate natures. The head is hot, auspicious, and indicates increase (of property etc.). The tail is cold, brings misfortune, and indicates diminution of wealth, etc. Eclipses of the sun or of the moon are really caused by the earth coming between the sun and moon or the moon coming between the earth and the sun. Instead of *djawzahar* we often have the word "node" *ʿaḳd* and *ʿuḳda* used, also in combination with *ra's* and *dhanab*.

The shadow of the earth arising in the first instance, because the sun is considerably larger than the earth, consists of a cone-shaped convergent shadow (the shadow) on one side and a divergent shadow (penumbra) on the other side. Only in the shadow is there absolute darkness. As the diameter of the shadow at the place of the moon's path is considerably greater than that of the moon at the same point, under certain conditions, the moon may remain some time in the shadow and therefore be perfectly eclipsed for the period. Ibn al-Haytham, for example, investigated these conditions very fully (E. Wiedemann, *Beitr.* xiii, *Über eine Schrift von Ibn al-Haitham, "Über die Beschaffenheit der Schatten"*, in *SBPMS Erl.* [1907], xxxix, 226).

If earth, sun and moon were very small bodies, mere points, eclipses would only take place when the sun and moon were exactly in the nodes. But as they are large, eclipses also occur when these bodies have passed beyond the nodes, i.e. have experienced an alteration in latitude and longitude. A total eclipse occurs when the breadth is smaller than the difference between the diameter of the shadow and that of the moon, a partial eclipse when it is larger than the latter but smaller than the sun of the diameters; if it is however equal to the latter, there is only a contact but no eclipse.

Taking into consideration the shadow alone, the *makhrūṭ* (cone) or *ṣanawbar* (pine-cone)—its cross-section is called *dā'irat al-ẓill*—we have the following: the entrance into the shadow is called *bad' al-kusūf*, beginning of the eclipse; the phase from the beginning of the eclipse, to the beginning of totality, is called *suḳūṭ* (falling, the ἔμπτωσις of Ptolemy), the middle of the path covered in shadow is called *wasṭ* (middle). The phase which corresponds to complete emergence is called *tamām al-indjilā'* ("the completion of disappearance"); *al-makth* ("stop, stay") means the phase in which the moon is eclipsed; in a partial eclipse there is no such stop. A *kusūf kull al-ḳamar bilā makth*, a total eclipse without a stop, is said to occur when the moon's path is such that the darkened moon touches the cone of the shadow at only one point; then a total eclipse exists at this point only. For the case of total eclipse, the place where it begins is called *awwal al-makth* and where the moon begins to emerge from the shadow, *ākhir al-makth*.

A diminution of light but no complete extinction also occurs when the moon moves through the half-shadow. In his classical work on the shadows Ibn al-Haytham (see above) discussed the theory of this question and checked it by observation. In very rare cases, however, the whole of the eclipsed moon does not appear quite black but shows different colours, especially a dark red; this was observed by various early astronomers and minutely described by Ibn al-Haytham (his statements agree with modern observation, e.g. Joh. Müller, *Lehrbuch der kosmischen Physik*[3], § 9, p. 196). Al-Bīrūnī further studied these colours (*al-Ḳānūn al-Masʿūdī, maḳāla* vii, *bāb* vii, *faṣl* iii); he also examines critically earlier views and particularly Indian ideas on the astrological significance of the colours (cf. E. Wiedemann, *Über die verschiedenen bei der Mondfinsternis auftretenden Farben nach Bīrūnī*, in *Eders Jahrbuch für Photographie, etc.*, 1914). This light on the completely eclipsed moon is explained by the fact that the sun's rays are diverted in passing through the earth's atmosphere and thus enter the shadow and illuminate the moon. According to the amount of moisture in the atmosphere, these diverted rays are more or less coloured. For the possibility of a solar eclipse, the conditions are the same as for a lunar one.

Solar Eclipse: As the angle at which the moon appears to us is smaller, although only slightly, than that at which the sun appears, the moon can never completely cover the sun. Therefore even at a so-called total eclipse of the sun, even if the centres of sun and moon and earth all lie on a straight line, a narrow rim of light still remains. Bright formations, the corona and the protuberances radiate from this. They are described by al-Bīrūnī in *al-Ḳānūn al-Masʿūdī, maḳāla* viii, *bāb* xi (cf. E. Wiedemann, *Erscheinungen bei der Dämmerung und Sonnenfinsternis*, in *Arch. f. Gesch. d. Med.*, xv [1923], 43).

The local times at which the same lunar or solar eclipse appears at different places are obtained from the difference of their geographical longitudes. The calculations are made difficult by the fact that these bodies show a considerable parallax. This partly explains the great differences between the calculated and true values.

It would take us too far to go into the details of the theoretical considerations, for example when each eclipse begins, how long it lasts, its periodicity, etc. In the works of al-Farghānī, Ḳusṭā b. Lūḳā, al-Ḳazwīnī, al-Djaghmīnī, al-Khiraḳī, and particularly in that of Abu 'l-Faradj, *Le Livre de l'ascension de l'esprit*, ed. F. Nau, Paris 1899, also in the *Kitāb al-Tafhīm* etc. of al-Bīrūnī, we find more or less full general descriptions, while the works on astronomical theory like the *Zīdj* (tables) of al-Khwārazmī, of al-Battānī, the *Ḳānūn al-Masʿūdī* of al-Bīrūnī, the *Zīdj* of Naṣīr al-Dīn al-Ṭūsī, etc., give information about

mathematical considerations and the particular observations to be made (on the above scholars, cf. H. Suter, *Die Mathematiker und Astronomen der Araber*, in *Abhandl. zur Gesch. der math. Wissensch.*, x [1900]).

To obtain a standard for measuring the amount of the eclipse, the diameter of the sun or of the moon, was divided into twelve equal parts, called "fingers" (*iṣbaʿ* or *iṣbaʿ al-kusūf*) and the number of these that were eclipsed was calculated. In the West one spoke of "digits". In the same way, the surface is imagined to be divided into 12 equal parts and it is calculated how many of these are eclipsed. The latter may be calculated from the former which refer only to length. Al-Battānī, for example, gives tables in connection with this. The diopter of Hipparchus was used to measure the magnitude of a lunar eclipse. Two rods are fixed at right angles to a rod. The one with a small round hole is fixed and the other with a larger round hole can be moved towards the other. The second hole is so placed that at an appropriate distance from the other the moon is seen to fill it exactly. A dark plane is pushed in front of the second hole. The amount a of the shifting of its edge from one side of the hole, which bounds the dark side of the moon, to the edge of its bright part, is measured, and the magnitude b of the shifting over the whole surface of the moon and their relation expressed as $a:b$. The amount g in fingers of the eclipse is $g = \frac{a}{b}\,12$.

Bibliography: Given in the article. For details of eclipse computations, see now E. S. Kennedy, *A survey of Islamic astronomical tables*, in *Transactions of the American Philosophical Society*, N.S., xlvi/2 (1956), 123-77, esp. 143-4.

(E. WIEDEMANN)

KŪT AL-ʿAMĀRA, a place in al-ʿIrāḳ (lat. 32° 30′ N., long 45° 50′ E.), on the left bank of the Tigris, between Baghdād and ʿAmāra, 100 miles south-east of Baghdād as the crow flies. *Kūt* is the Hindustānī word *kōt* meaning "fortress" [see KŌTWĀL] found in other place-names in al-ʿIrāḳ, like Kūt al-Muʿammir; Kūt al-ʿAmāra is often simply called Kūt. Kūt lies opposite the mouth of the Shaṭṭ al-Ḥayy, also called al-Gharrāf, the old canal connecting the Tigris with the Euphrates, which has several junctions with the Euphrates, e.g. at Nāṣiriyya and Sūḳ al-Shuyūkh. The plains to the north of Kūt are inhabited by the Banū Rabīʿa, a division of the great tribe of Banū Lām [*q.v.*]. Kūt is not an old town; it has been proposed to identify it with al-Madhār mentioned by Yāḳūt (iv, 275; cf. Le Strange, *Lands*, 38, and H. H. Schaeder in *Islam*, xiv, 17). In the beginning of the century and down to 1860 it was a miserable little village surrounded by walls of terre pisée (Keppel in 1824, according to Ritter; Petermann, *Reisen im Orient*, Leipzig 1860, ii, 150). But after Messrs. Lynch obtained a concession for a line of steamers between Baghdād and Baṣra, Kūt became an important station on the river and the result was a considerable increase in its population. In the last period of Turkish administration (beginning 1861), Kūt was the capital of a *ḳaḍāʾ* of the same name in the *sandjaḳ* of Baghdād. About 1890 the population was estimated at 4,115 (Cuinet), almost all Shīʿīs (but including about 100 Sunnīs and 100 Jews). The *ḳaḍāʾ* extends northwards as far as the mountains of Luristān [*q.v.*]. The plain at the foot of the mountains is watered by the river Kallāl and contains several villages, the Turkish ownership of which was disputed by the Persian authorities. The population of the *ḳaḍāʾ* likewise grew after 1861, and about 1890 numbered 30,000, all Sunnīs (except the population of Kūt itself).

It was at Kūt al-ʿAmāra during the course of the First World War that several thousand British and Indian troops were cut off by Turkish forces and compelled to surrender on 26 Djumāda II 1334/29 April 1916, after a siege lasting five months.

Ḳūt was first taken by the Sixth British-Indian division under Major-General Charles Townshend in Dhu 'l-Ḳaʿda 1333/late September 1915. Continuing his advance northwards, in an ill-judged attempt to occupy Baghdād, Townshend was repulsed at Ctesiphon in late November by the Turkish Sixth army under Yūsuf Nūr ad-Dīn Bey and forced to retire on Ḳūt. Here he decided to stand, for the ostensible purpose of blocking a Turkish advance down the Tigris to ʿAmāra, or by way of the Shaṭṭ al-Ḥayy to Nāṣiriyya. In fact, however, his troops were exhausted, he was burdened with many wounded, and the Turks, under their new commander, Khalīl Bey (later Pasha), were hard on his heels. If he had not halted at Ḳūt, his division would almost certainly have been caught in the open and destroyed.

Ḳūt was invested by the Turks on 27 Muḥarram 1334/5 December 1915. Townshend's force consisted of just under 13,000 infantry and artillerymen (he had sent his cavalry south before Ḳūt was encircled) and over 3,000 Indian non-combatants (cooks, drivers, etc.). A quarter or more of the fighting troops were sick or wounded. The Arab population of the town, which Townshend allowed to remain, numbered about 6,000. The besieging force was made up of one-and-a-half divisions (about 7,500 men) of the Turkish Sixth Army, whose total effective strength of something under 30,000 men was mainly disposed between Ḳūt and Shaykh Saʿd, 30 miles to the east. Its tactical direction lay with Field-Marshal von der Goltz, head of the German military mission in ʿIrāḳ.

Desperate endeavours were made by the main body of the British expeditionary force between January and April 1916 to relieve the garrison at Ḳūt. In a series of severely fought actions, notably at Shaykh Saʿd, Ḥanna and Dudjayla, the British and Indian troops suffered 23,000 casualties, while Turkish losses were estimated at 10,000. The British efforts were in vain, and in the last week of April Townshend asked Khalīl Pasha for terms. When the Turkish commander indicated that he would not be content with anything less than unconditional surrender, Townshend suggested, with the concurrence of the Cabinet in London, that the Ḳūt garrison be freed on parole in exchange for its guns, stores and one million pounds sterling. On the orders of Enver Pasha [*q.v.*], the Turkish Minister of War, the offer was rejected, and the fact of its having been made was afterwards used to good effect by the Turkish government to discredit Britain's reputation in the Middle East. A last-minute attempt to persuade Khalīl Pasha to change his mind was made by Colonel W. H. Beach, head of military intelligence in ʿIrāḳ, and Captains Aubrey Herbert and T. E. Lawrence of Military Intelligence, Cairo, who were authorised to double the ransom offered. The attempt failed, and twenty-four hours later, after destroying his guns and stores, Townshend surrendered, under a solemn guarantee from Khalīl Pasha, which was afterwards reaffirmed by Enver Pasha that his troops would be treated as "the honoured guests of the Turkish nation".

During the siege, the garrison at Ḳūt had suffered

casualties of 1,818 men killed or died of wounds (278 of them Indian non-combatants) and 2,500 wounded. Nearly 250 of the Arab inhabitants had been killed and over 600 wounded, though more were to die after Turkish forces had re-occupied the town. The Turks allowed the worst cases among the British and Indian wounded, 1,475 in all, to be sent down to Baṣra in exchange for Turkish prisoners of war. Nearly 12,000 British and Indian troops, along with their Indian camp followers, went into captivity in Anatolia and elsewhere. By the end of the war more than 4,000 of them, including 70% of the British rank and file, had died from disease, starvation and inhuman treatment at the hands of their Turkish captors.

Ḳūt was retaken by the Mesopotamian expeditionary force in Djumādā I 1335/late February 1917, opening the way for the occupation of Baghdād a fortnight later. After the war, in the administrative reorganisation that accompanied the institution of the mandate, Ḳūt was made the principal town of a new *liwāʾ*.

None of the popular accounts of the siege of Ḳūt and the ʿIrāḳ campaign of 1914-17 published in recent years (e.g. A. J. Barker, *The neglected war*, London 1967; R. Braddon, *The siege*, London 1969; R. W. Millar, *Kut: the death of an army*, London 1969) is of any scholarly value.

(J. H. Kramers - [J. B. Kelly])

ḲUTADGHU BILIG ("Knowledge that brings happiness"), the first long narrative poem in Turkic literature as well as the oldest monument of Turkic Islamic literature. A relatively long (6,645 distichs) didactic work, it is in Ḳarakhānid, the earliest variety of Eastern Middle Turkic and the first literary language of the Muslim Turks. Its author, Yūsuf Khāṣṣ Ḥādjib of Balāsāghūn [*q.v.*], a Muslim Turk educated in the Arabic and Persian languages and in the classical Islamic sciences, completed his work in 462/1069-70 in Kāshghar and dedicated it to Abū ʿAlī al-Ḥasan Tabghač Bughra Khān (d. 495/1102), ruler of the eastern Ḳarakhānids [see ilek-khāns].

The *Ḳutadghu bilig* has come down to us in three manuscripts: the Harāt ms., dated 842/1439, which is in the Uyghur script and was made from an unknown version in the Arabic script; and the Farghāna and Cairo mss., both undated and in the Arabic script.

It is essentially a political essay which, in an Islamic setting, describes an ideal monarchy of the Sāsānid type. The main goal of this monarchy is the public good, which is conceived of as the strength of the king and the happiness of his subjects. This ideal kingdom is based on dedicated service rendered by highly-qualified state officials and servants to a wise and noble ruler of royal descent, who properly rewards those who serve him. Islam, of an Avicennan and Fārābian hue, has a vital role in it. Every individual must possess the faith and act in accord with it. He should not renounce this world: services rendered by ascetics in seclusion are of little value, since they produce no public good. Through his services to God and men, he should rather aspire to obtain both this world and the hereafter.

The author presents his views in a series of dialogues, in which the chief participants are a king, Kün Toghdï; his ministers, first Ay Toldï and, after his death, his son Ögdülmish; and the ascetic Odghurmïsh, a relative of Ögdülmish. The author uses these characters symbolically: Kün Toghdï represents the true path; Ay Toldï, happiness; Ögdülmish, reason; and Odghurmïsh, destiny.

No one source or model for the *Ḳutadghu bilig* has been discovered. Frequent references in it, however, indicate a broad spectrum of still-unidentified sources: poetic works (*shāʿir sözi*); sayings of elders (*örüng bashligh är, kökčin, avučgha*), the learned (*biliglig, bögü, bilgä*), the wise (*uḳushluḳ*), and notables (*sartlar bashï, ötükän begi*); as well as proverbs (*türkčä mathal*). Some of these references appear to be direct quotations, especially those in the form of quatrains.

The *Ḳutadghu bilig* follows the rules of Arabic-Persian prosody, but also includes a few elements of the traditional Turkic syllabic versification. It is in the *mathnawī* form and in the *mutaḳārib* metre (◡−−/◡−−/◡−−/◡−). The quatrains (*rubāʿ*is or *tuyugh*s) embedded in the poem are all in the same metre, and all have the rhyme pattern *aaba*. Alliteration and rhythmico-syntactic parallelism, features of pre-Islamic Turkic prosody, occur quite frequently. The author's style is concise and expressive. He favours such stylistic devices as epithets, apostrophes and rhetorical questions, and he often indulges in word-play and folk-etymology.

The language is very closely related to Late Uyghur, although the Persian language—colloquial and classical—has left an imprint in the form of loan-translations and direct borrowings, both on its grammar and vocabulary.

Philological research on the *Ḳutadghu bilig* is at a fairly advanced stage. The three extant mss. have been published in facsimile. There is also a good critical edition, translation into Modern Turkish and thorough philological analysis by R. R. Arat (*Kutadgu bilig. I. Metin.* Istanbul 1947, II. *Tercüme*, Ankara 1958). Its language has been described, very sketchily, by M. Mansuroğlu (*Das Karakhanidische*, in *Philologiae Turcicae Fundamenta*, i, 87-112). Most of the lexical material of the *Ḳutadghu bilig*, with illustrations, has been included in the Old Turkic dictionary, prepared by Nadelaev and his team (*Drevnetyurkskiy slovar'*, Leningrad 1969). The best content-analysis of the work to date is that given by A. Bombaci in his book on the history of Turkish literature (*La letteratura turca*, Milan 1969, 83-96).

(A. J. E. Bodrogligeti)

KUTĀHIYA, modern Kütahya, a town of north-western Anatolia, lying at an altitude of 3,251 feet/991 m. in lat. 39° 25′ north and long. 29° 59′ east. It is in the south-western corner of the well-cultivated plain of the Porsuk Çay, which eventually runs into the Sakarya river; the old town nestles on the slopes of the hill called 'Adjem Dagh, which is crowned by the ruined citadel. In classical times it was Cotyaeum, the city of Cotys, and the largest city of Phrygia Salutaris, an early centre of Christianity and then in Byzantine times the seat of an archbishopric.

Kutāhiya was taken by the Turkmen Sulaymān b. Kutulmush in *ca.* 472/1080, in the aftermath of the battle of Mantzikert or Malāzgird [*q.v.*], and until the battle of Dorylaeum remained under Saldjūk control. It then reverted to the Greeks for a brief while as a frontier fortress subject to Turkmen attacks, and was retaken in 579/1183 by the Saldjūks under Kılıdj Arslan II [*q.v.*]. It later passed once again to the Byzantines but was finally regained by the Saldjūks in 631/1233-4. In the 8th/14th century it formed the centre of the *beylik* of the Germiyān-oghullarī [*q.v.*]. Süleymān Shāh Čelebi (*ca.* 765-90/1363-98) transferred Kutāhiya, with others of his towns, to the Ottoman prince Bāyezīd Yıldırım when the latter married his daughter Dewlet Khātūn. Süleyman's son Ya'kūb Čelebi tried to recover it on the death of Murād I (791/1389), but it was regained by Bāyezīd in the following year. After the Ottoman defeat at Ankara (804/1402), Kutāhiya was taken over by Tīmūr, who installed his son Shāh Rukh as governor whilst he himself went on towards Ephesus. In the subsequent period of succession squabbles in the Ottoman ruling house, Kutāhiya fell briefly into the hands of the Karamānid Meḥmed I [see karamān-oghullarī] (814/1411), but was recaptured by Ya'kūb Germiyānī with Ottoman help. When Ya'kūb died at Kutāhiya in 832/1429, the principality of the Germiyān-oghullarī passed, according to his bequest, to the Ottoman Murād II.

Under the Ottomans, Kutāhiya was the capital of a *sandjak* of Anadolu, and then in 1841 a *sandjak* of the province of Khudāwendigār [*q.v.*]; in 1902 it comprised the *kaḍā*'s of Kutāhiya, Eski Shehir [*q.v.*], 'Ushāk [*q.v.*], Kedus or Gediz and Sīmāw. Kutāhiya was the farthest point reached by the Egyptian army of Ibrāhīm Pasha b. Muḥammad Pasha [*q.v.*] in its advance on Istanbul (1833), and his camp at the nearby hot springs of Yenidje was the scene of diplomatic negotiations which followed the intervention of the European powers. In *ca.* 1890, Cuinet numbered the population of the town at 22,266, including 4,000 Greeks and 3,000 Armenians; there were 24 mosques, 21 *madrasas*, 16 dervish *tekkes*, 4 churches, 9 caravanserais, 11 baths and 12 potteries. Kutāhiya was indeed formerly an important centre for the production of glazed, polychrome pottery with floral decorations, the so-called Rhodian ware, and this is still produced today in a somewhat cruder form; carpet weaving has also been an important family craft. A standard-gauge railway runs from Balikesir to Kutāhiya and joins the Eski-Şehir-Afyon Karahisar line a few miles further on. Kutāhiya is today the capital of an *il* (formerly *vilayet*) of the same name; in 1975 the town's population was 82,442 and that of the *il* 470,423.

The monuments of Kutāhiya, from the Germiyān and early Ottoman periods, are significant, and include the Kurshunlu Djāmi' (777/1375-6), the Ulu Djāmi' (814/1411), the Ya'kūb Čelebi Djāmi' (837/1433-4) and the Karagöz Aḥmed Djāmi' (915/1509); notable is the use of tiles for roofing rather than lead. There are also some interesting old houses remaining.

KUTAI, now a *kabupaten* (regency) in the Indonesian province of Kalimantan Timur (East K.) [see borneo in Suppl.] which stretches along the Mahakam river .It covers 40,000 km.² and has 250,492 inhabitants, among them 137,229 Muslims (1971). It is rich in oilfields (near Balik Papan), gold, and timber.

The population consists of: Kutainese, probably originally Malays who immigrated as pagans, and whose Malay language now bears the influence of Javanese, Buguinese and Banjarese; Buginese, from South Sulawesi, and especially from the old kingdom of Wajo, who appeared as sailors, shipbuilders and traders since the first half of the 17th century; Banjarese, who may have participated already in the colonisation of Kutai by Hindu-Javanese from Banjarmasin, which later on kept close contacts with Kutai; Bajau, who originate from the Sulu Islands and who came first as sea-

nomads until they finally settled on the coasts; several Dayak tribes, living mainly in the interior and up-river areas; and some 245 Chinese and 246 Indian traders (1971).

In the hillside area of Muara Kaman, some plates with votive inscriptions in Sanskrit from the 4th century A.D., which belong to the oldest known Hindu relics in the archipelago, have been discovered. The Hindu kingdom of that area, which in the course of time moved more to the interior, obviously developed independently from the Hindu and Buddhist empires in Java, and was only conquered and consequently Islamised by Kutai around 1630 A.D.

Kutai itself appears in history as a dependency of Majapahit at the time when Gajah Mada was *patih* of that kingdom (1331-64), as is stated in the *Nāgarakṛtāgama* (14, I).

According to the *Salasila raja-raja di dalam negeri Kutai Kerta Negara*, or Chronicle of Kutai, Islam was first introduced during the reign of Raja Makota by Tuan di Bandang (in Buginese sources known as Dato' ri Bandang), who only stayed for a short while, and Tuan Tunggang Parangan, both of whom arrived from Makassar, most probably in the first years of the 17th century. In his efforts to spread Islam, Tuan Tunggang Parangan extensively used magical means, as the *Salasila*, composed under the reign of Raja Makota's grandson Pangeran Adipati Sinum Panji Mendapa ing Martapura before 1635, eloquently narrates.

This *Salasila* reveals a still-existing attachment to the animistic and magical mentality which is stronger here than in other Malay chronicles. It tries to avoid anachronism, such as the mentioning of Islamic terms or customs in its narratives about pre-Islamic events, and although it shows a remarkable familiarity with the moral and legal prescriptions of the *Tādj al-salāṭīn*, or *Makota segala raja-raja*, and the Javanese *Panji* narratives as well as the *wayang*, it gives the impression that the *adat* law [see ʿĀDA, iv. Indonesia] which remained in use even at the sultan's court at Tenggarong, was to a large extent the old, indigenous one.

An important role in the history of Kutai was played by the Buginese settlers, most of whom originated from Wajo, and who were centred on Samarinda, forming the strongest "foreign" colony and enjoying some kind of internal autonomy under the *Pua Adu* or *Matoa* elected from among their own nobility, but reconfirmed by the sultan (until 1860). In 1726-7, prince Aru Singkang from Wajo conquered for a short time Pasir and Kutai, but usually the Buginese supported the sultan, especially in his fights against the pagan Dayaks and the pirates. The relations with the Dutch, who first appeared in 1635, were, generally speaking, smooth, and these preserved to the sultan a considerable degree of internal jurisdiction based on Islamic and *adat* law.

(O. SCHUMANN)

KUTĀMA or KETAMA, one of the great Berber families; when Islam was introduced into North Africa, they occupied all the northern part of the region of the Constantincis, between the Awrās [*q.v.*] and the sea, that is the region containing the towns of Īkdjān, Setīf, Bāghāya, Ngaus (Niḳāwus), Tiguist (Tikist), Mīla, Constantine, Skīkda, Djidjellī, Bellezma, and also Lesser Kabylia. One legend flattering the national pride makes them to have been descended from the Ḥimyarites brought there by Ifrīḳus. Katām, the eponymous ancestor of their race, was said be the son of Bernes. He had two sons, Gharsen and Issūda, from whom are descended all the tribes of the Kutāma. They do not seem to have played a part in the civil and religious wars which desolated North Africa from the time of ʿUḳba to the days of the Aghlabids; we do not find them among the Khāridjīs. When ʿUbayd Allāh gave himself out to be the Mahdī, his emissaries met some Kutāma pilgrims in Arabia and converted them to Ismāʿīlī doctrines. The principal convert was Mūsā-chief of the Sakyān, a branch of the Djamīla whose name survives in the town of this name. The missionary (*dāʿī*) Abū ʿAbd Allāh al-Shīʿī [*q.v.*] settled in Īkdjān and succeeded in maintaining his position there in spite of the efforts of the Aghlabids. From there he was able to extend his conquests and to deliver the *Mahdī*, who was a prisoner at Sidjilmāsa.

The empire of the Fāṭimids was thus founded with the help of the Kutāma. It was they who furnished its main strength and supplied the means of conquering Egypt. But these continual efforts exhausted them. Those who remained in the Maghrib after the departure of al-Muʿizz were forced to submit to local rulers, as Ibn Khaldūn tells us. In our day the principal representatives of the Kutāma are the Zuwāwa of the Djurdjura and the population around Djidjellī and in Lesser Kabylia. We do not know at what date Ismāʿīlī doctrines disappeared from among them, but long afterwards their attachment to this teaching was regarded as a subject of obloquy, and for this reason the powerful tribe of Sedwīkish, of Kutāma origin, renounced all connection with this family. At the present day, all the Berbers of this region are Sunnīs.

Dachraoui, *Le califat fāṭimide au Maghreb* (in the press); H.-R. Idris, *Zirides*, index; R. Brunschvig, *Ḥafṣides*, index.

(R. BASSET)

AL-**ĶUṬĀMĪ** ("the falcon"), the name of several poets (including one from Ḍubayʿa b. Rabīʿa and another from Kalb; see al-Āmidī, *Mukhtalif*, 166); the best-known of these was ʿUMAYR B. SHUYAYM B. ʿAMR, who probably came from the Djusham b. Bakr of Taghlib (see Ibn al-Kalbī-Caskel, *Register*, 474). On account of one of his verses, he was also given the name of Ṣarīʿ al-Ghawānī "the one felled by beautiful maidens". Like his fellow-tribesman and maternal uncle (?) al-Akhṭal [*q.v.*], he was involved in the quarrels of the second half of the 1st/7th century between the Taghlib and Ḳays ʿAylān in the region of the Khābūr [*q.v.*].

In opposition to late sources which depict him as a convert to Islam, it seems correct to follow the author of the *Aghānī*, who states that he remained a Christian. The verses favourable to Islam figuring in piece No. 20 of the *Dīwān* could have been added later or could have resulted from an attitude dictated by gratitude; the eulogies of the Umayyads, and especially of ʿAbd al-Malik b. Marwān (No. 29), prove nothing about his adhesion to Islam. This point has been discussed by Father L. Cheikho, with strong arguments (*Shuʿarāʾ al-Naṣrāniyya baʿd al-Islām*, 191-203).

Al-Ḳuṭāmī's Dīwān was published, with notes, by J. Barth (*Dīwān des ʿUmeir ibn Schujeim al-Quṭāmī*, Leiden 1902), together with an anonymous com-

mentary, and has also been the subject of a somewhat enlarged edition by I. Sāmarrāʾī and A. Maṭlūb (Beirut 1960). The first edition contains 35 pieces of varying length (the longest of 100, 71, 66 and 58 verses) and 9 isolated verses, making a total of 764 verses, to which should be added 52 hemistiches of *radjaz*.

Al-Ḳuṭāmī was a Bedouin poet who detested the townspeople, and who hymned his own military exploits and those of his tribe, together with the virtues of *sayyids* like Zufar b. al-Ḥārith. According to Ḥādjdjī Khalīfa (iii, No. 5619), he died in 101/719-20.

(H. H. Bräu - [Ch. Pellat])

ḲUTAYBA B. MUSLIM, Abū Ḥafṣ Ḳutayba b. Abī Ṣāliḥ Muslim b. ʿAmr al-Bāhilī, Arab commander under the Umayyad caliphs. He was born in 49/669 into a family influential at the court and with extensive possessions in Baṣra. His father Muslim was the boon-companion of Yazīd b. Muʿāwiya, and during the revolt of al-Mukhtār [*q.v.*], he was in charge of the prison at Baṣra; but he later sided with Muṣʿab b. al-Zubayr and was killed in 72/691-2 when Muṣʿab's dominion in ʿIrāḳ was ended, after having failed to secure a pardon from ʿAbd al-Malik. The family nevertheless continued to be important in Baṣra, and a tribal mosque of their branch of Bāhila, the *masdjid Banī Ḳutayba*, is mentioned (see Balādhurī, *Ansāb*, ivb, 11, 87, 91-2, v, 341-2).

Ḳutayba himself attracted the attention of the governor of ʿIrāḳ and the east, al-Ḥadjdjādj b. Yūsuf, after participating in the warfare against the rebel ʿAbd al-Raḥmān b. Ashʿath [see IBN AL-ASHʿATH]. He was given the governorship of Rayy in 83/701 after he had expelled from there the rebel ʿUmar b. Abi 'l-Ṣalt (see G. C. Miles, *The numismatic history of Rayy*, New York 1938, 9). Then at the end of 85/704 or beginning of 86/705 he was appointed by ʿAbd al-Malik to succeed al-Mufaḍḍal b. al-Muhallab as governor of Khurāsān under al-Ḥadjdjādj, thus reversing the position in Khurāsān, where the Yamanī Muhallabīs had previously been dominant, for the Bāhila tribe [*q.v.*] generally allied itself to the Ḳaysī or North Arab interest in the Marwānid period.

There thus begins the ten years' governorship of Ḳutayba, which contributed much to the extension of Islam in what is now Afghānistān and Central Asia, and which forms one aspect of the wave of Arab expansionism which characterised al-Walīd's caliphate. Ḳutayba's administrative talents, backed by the authority of al-Ḥadjdjādj, had full play in the consolidation of Arab rule in Khurāsān, although the momentum was not maintained after his death. An appreciable factor in his success here seems to have been some recognition of the position of the indigenous Iranian population, and some care to use their administrative talents. There were in his time perhaps as many as 7,000 *mawālī* troops registered in the *dīwān* and receiving regular pay, and in addition to these regular forces, Ḳutayba required *ad hoc* levies of soldiers from the towns of Khurāsān for his spring and summer campaigns into Central Asia; in Ṭabarī, ii, 1245, the contingents from Bukhārā and Khwārazm besieging Samarḳand in 93/712 are described as "the slaves" (*al-ʿabīd*). Also, he left the local Persian *dihḳāns* in power on payment of tribute, apart from the planting of Arab garrisons in Bukhārā, Samarḳand and probably Kāth in Khwārazm. With regard to the Arab tribesmen in Khurāsān, Ḳutayba organised these, on the Baṣra model, into the five groups of the Azd, Tamīm, Ahl al-ʿĀliya, Bakr and ʿAbd al-Ḳays; at least, it is in his time that such a division is first mentioned. (See for general reviews of Ḳutayba's political and social policies, Gibb, *The Arab conquests in Central Asia*, 29-31, and Shaban, *The ʿAbbāsid revolution*, 63 ff.)

The military campaigns of Ḳutayba's governorship have been divided by Gibb, *op. cit.*, 31 ff., into four periods: firstly, the recovery of Bādghīs and Ṭukhāristān in 86/705; secondly, the conquest of Baykand and Bukhārā from the local Soghdians, 87-90/706-9; thirdly, the consolidation of Arab authority in the Oxus valley and the securing of Khwārazm and Samarḳand, 91-3/71-12; and fourthly, expeditions into the Jaxartes valley from Shāsh against Isfīdjāb and Farghāna, 94-6/713-15. Many of these undoubtedly remarkable successes were achieved through Ḳutayba's own blend of military skill and ruthlessness, combined with a willingness to use treachery, if need arose, and to exploit local divisions, as amongst the princes of Ṭukhāristān and Soghdia and amongst the rival claimants to the throne of Khwārazm.

In 86/705 Ḳutayba moved against the princes of the upper Oxus valleys of Shūmān, Akhrūn and Čaghāniyān, and he also persuaded Ṭarkhān Nīzak, ruler of the northern Hephthalite principality in Bādghīs [see HAYĀṬILA], to submit to the Arabs and accompany Ḳutayba on the ensuing campaign against Bukhārā. The campaigns of 87-90/706-9 against Baykand and Bukhārā were long and arduous. Ḳutayba's savage sacking of Baykand stiffened the resistance of the Soghdians under Wardān Khudāh, but Bukhārā was in the end stormed against fierce local resistance, apparently backed up by Turkish help. A tribute of 200,000 dirhams was imposed on the city and an Arab garrison placed in it; in 94/712-13 Ḳutayba built a mosque inside the citadel, but had at the outset to pay the local people to attend the worship. In 91/709-10 Ḳutayba and his brother ʿAbd al-Raḥmān b. Muslim were occupied with suppressing the last rebellion of Nīzak, now in collusion with the *Yabghu* (Arabic form *Djabbūya*) or local ruler of Ṭukhāristān. On capturing Nīzak, Ḳutayba had him killed, despite his earlier promise of *amān* or quarter; and although in the poetry quoted by Ṭabarī, ii, 1225-6, we find Nahār b. Tawsiʿa praising Ḳutayba's behaviour as salutary for the interests of Islām, like that of the Prophet towards the Jews of Medina, we also find a verse by Thābit Ḳuṭna warning against calling perfidy "resolute action". However, for the first time, Arab rule became reasonably secure in lower Ṭukhāristān, and Balkh now developes as a centre of Arab power and Islamic culture; a subsequent governor of Khurāsān, Asad b. ʿAbd Allāh al-Ḳasrī, was to move temporarily the provincial capital from Marw to Balkh (118/736).

In 92/711 Ḳutayba was in Sīstān, which was at that time under the subordinate governorship of his brother ʿAmr. Here, the Arabs in their strongpoints of Zarang and Bust faced the powerful ruler of the southern Hephtalites, the Zunbīls of Zābulistān [see ZUNBĪL]. Ḳutayba's presence scared the Zunbīl into temporary submission, but as always happened, once the Arab forces departed, all obedience was

renounced. The conquest of Khwārazm in 93/712 was a spectacular feat of Ḳutayba's, and it led to the tentative implanting of Islam there, though it was several decades before the people of the province or their Shāhs were fully converted; for details, see KHWĀRAZM. In the last years of his governorship, Ḳutayba's attention was focussed on Soghdia again. In 93/712, on the way back from Khwārazm, he attacked Samarḳand and imposed a fresh peace treaty on its ruler Ghūrak; the breaking thus of an earlier agreement considerably tarnished Ḳutayba's reputation in Soghdia amongst the Iranian population. It may be that it was at this point that the Western Turks or Türgesh intervened in Transoxania at the request of the Soghdian princes; at all events, Ḳutayba endeavoured to secure the regions of the Jaxartes adjacent to the steppes of Turkistān, moving into Shāsh and Ushrūsana, and in 94-5/713-14 he led a series of raids into Farghāna. Whether Ḳutayba had expressly in mind the securing of the trade route through Central Asia towards China is uncertain, and the report in Ṭabarī, ii, 1276, that his troops crossed the Tien Shan Mts. to Kāshghar was rejected by Gibb as a fabrication, see his *The Arab invasion of Kashghar in A.D. 715*, in *BSOS*, ii (1923), 467-74.

The fall of Ḳutayba in 96/715 was ultimately the result of the change of régime in Damascus from al-Walīd to Sulaymān, the death of Ḳutayba's patron al-Ḥadjdjādj, and an expected reversal of the favour previously shown to the Ḳaysī elements in the empire. Ḳutayba was campaigning in Farghāna when he heard the news of al-Walīd's death, and though the new caliph confirmed him in his governorship, he feared an imminent change of attitude. He therefore proclaimed rebellion against the caliph's authority, but was supported only by his own family, the inadequate power-base of his fellow-Bāhilī tribesmen, and his bodyguard of Iranian archers; the mass of the Arabs mutinied and refused to support him, as also did the Persian *mawālī* troops under Ḥayyān al-Nabaṭī, formerly his faithful supporters. He and several of his family were therefore killed by their soldiers in Dhu 'l-Ḥidjdja 96/August 715, or according to some sources, later in that autumn at the beginning of 716, and Wakīʿ b. Abi 'l-Sūd al-Tamīmī assumed power in the east in his stead.

Ḳutayba's death meant a halting for several decades, and indeed, a definite regression, in the momentum of Arab conquest beyond the Oxus; the Soghdians and their Turkish allies were now able to mobilise their forces for counterstrokes. He is undeniably one of the heroic figures of the age of Arab conquests, even if the Bāhilī tribal tradition enshrined in Ṭabarī tends at time to exaggerate his exploits, and this halo placed around his head brought about much confusion in the sources over the events surrounding his death.

The descendants of Ḳutayba continued to be influential in both the later Umayyad and the early ʿAbbāsid periods, with various of his sons and grandsons attaining official posts; his son Muslim (d. 149/766) was twice governor of Baṣra, and his grandson Abū ʿAmr Saʿīd b. Salm (d. 217/832) was governor of Armenia, Mawṣil, al-Djazīra, Sīstān, Sind and Ṭabaristān.

AL-ḲUṬB (A.), pole.

1. As an astronomical term

In Arabic, *ḳuṭb* covers nearly the same field of semantic aspects as Greek ὁ πόλος: a pivot around which something revolves (in Arabic, especially the pivot for mill stones), which was extended to the revolution of the sky, designating the axis of the celestial east-west movement and, more specifically, its two "poles" (*LA*, Beirut 1955, i, 681b f.; Lane, *Lexicon*, s.v. *ḳuṭb*; Liddell and Scott, *Greek-English lexicon*, s.v. πόλος). Hence later, in Arabic translations of Greek works, *ḳuṭb* was often used as a rendering of πόλος, (e.g. Ptolemy, *Almagest*, i, 3 (both translations, al-Ḥadjdjādj b. Yūsuf b. Maṭar, and Isḥāḳ b. Ḥunayn); but Aristotle, *De caelo*, has *al-falak* in all instances, cf. Badawī's edn., Cairo 1961, 232 f., 280, 294).

The celestial pole was a known feature among the Arabs already in their "pre-scientific" period, i.e. before their contact with the scientific literature of the Greeks. Certain traditions concerning the location and nature of the pole have been transmitted in some philological and astronomical books (Ibn Ḳutayba, *K. al-Anwāʾ*, Hyderabad 1956, 122 f.; Abū Ḥanīfa al-Dīnawarī, *apud* al-Marzūḳī, *K. al-Azmina wa 'l-amkina*, Hyderabad 1332, ii, 7 f., 371 ff.; Ibn al-Adjdābī, *al-Azmina wa 'l-anwāʾ*, Damascus 1964, 65 f.; Ibn Manẓūr, *K. Nithār al-azhār*, Istanbul 1298, 146, 173; Abu 'l-Ḥusayn al-Ṣūfī, *K. Ṣuwar al-kawākib*, Hyderabad 1954, 27 f. (repeated by al-Ḳazwīnī, *Kosmographie*, ed. Wüstenfeld, i, Göttingen 1849, 29; tr. H. Ethé, *El-Kazwīnī's Kosmographie*, Leipzig 1868, 62); al-Bīrūnī, *K. al-Tafhīm*, ed. and tr. R. R. Wright, London 1934, 77 [§ 163]; idem, *al-Ḳānūn al-Masʿūdī*, Hyderabad, iii (1956), 995 f.). Here it is stated that the [north] pole was not a star, but merely a spot (*nuḳṭa, buḳʿa*) in the sky. Its place was assumed to be in the middle of the figure of a fish (*samaka*; al-Bīrūnī has instead: *shakl halīladjī*, "an elliptical figure") formed by two curved lines of stars, one consisting of the five stars β, ζ, ε, δ, α Ursae Minoris, and the opposite one of very small and faint stars (most of them not registered by Ptolemy in his *Almagest*), among which Fl. 5 and 4 Ursae Minoris and 32 H Camelopardalis. In some places, this statement is corrected, with the addition that the true place of the pole is not in the very middle of that figure, but more in the direction of α Ursae Minoris, near one of the small stars in the curved line of faint stars, (al-Marzūḳī, Ibn al-Adjdābī, al-Ṣūfī, *locc. cit.*). This difference in location obviously reflects the effect

of precession, due to which the place of the north pole was near the star 32 H Camelopardalis in A.D. 1000, and still more southwards in A.D. 500. It was also observed that the opposite point of the sky, the south pole, was invisible in the lands of the Arabs (Ibn Ḳutayba, *loc. cit.*, 122; Ibn Manẓūr, *op. cit.*, 173)

After the introduction of scientific astronomy, it was known that this pole belonged to the equatorial system, hence it was occasionally called *ḳuṭb muʿaddil al-nahār*, "pole of the equator", besides its other designations, such as simply *al-ḳuṭb*, or *al-ḳuṭb al-shamālī* (and *al-djanūbī* respectively), *ḳuṭb al-djudayy*, *ḳuṭb banāt naʿsh*, *ḳuṭb al-falak*, *ḳuṭb al-kull*, etc. Al-Bīrūnī seems to be the first to declare α Ursae Minoris (= "Polaris") to be the nearest bright star to the [north] pole, at his time, and hence to serve as a substitute for the pole *wa-yanūbu ʿani 'l-ḳuṭbi li-annahū fī zamāninā aḳrabu 'l-nayyirati ilayhi* (*Tafhīm*, 77 [§ 163]). At the same time, the ecliptical system was assigned two poles, as well, which were called *ḳuṭb[ā] falak al-burūdj* and *ḳuṭb[ā] dāʾirat al-burūdj*, "pole[s] of the ecliptic" (al-Ṣūfī, *loc. cit.*, 25 f.; al-Bīrūnī, *Tafhīm*, 55 f. [§ 139]; idem, *Ḳānūn*, iii, 993, 995 ff.; al-Ḳazwīnī, *op. cit.*, 27, tr. 59, and 52 f., tr. 108).

North and south pole became of actual value for the Islamic navigators of the Indian Ocean (*ca.* A.D. 1500), who used both of them for altitude measurements in order to fix their position and determine their routes. In their terminology the north pole was generally called *al-djāh* (a word of Persian origin, used both for the pole itself and for the Pole Star). Travelling south of the equator, they also acquired a complete knowledge of the south pole, *ḳuṭb suhayl* ("the pole [in the region] of the star α Carinae"), or simply *al-ḳuṭb* (as opposed to *al-djāh*), which they observed—in contradistinction to the north pole—not to be marked by a bright star near it, but having the two Magellanic Clouds at some distance (Aḥmad b. Mādjid and Sulaymān al-Mahrī; in English tr. see G. R. Tibbetts, *Arab navigation in the Indian Ocean*, London 1971, the glossaries and indexes, 518 and 547 [s.v. *al-djāh*], 538 [s.v. *ḳuṭb*], 609 [s.v. Polaris; Pole, North-South]).

The poles also seem to have excited the fantasy of astrologers, for two lists of magic virtues (*khawāṣṣ*) appertaining to both of them are repeated by Ibn Manẓūr (*op. cit.*, 146-53; partially also in al-Ḳazwīnī, *op. cit.*, i, 30 f. tr. 64 f. and 40, tr. 83 f.).

In modern terminology, the terrestrial poles are also called *ḳuṭb* (with adjective *ḳuṭbī*, "polar").

Apart from this, in the construction of the astrolabe *al-ḳuṭb* signifies the central pivot, or axis (elsewhere also called *al-miḥwar*), which keeps together its different discs, the spider, and the rule (*Alhidade*), latinised (since the 10th century) as *Alchotob*, *Alchitob*, *Alchitoth*, etc. See ASṬURLĀB; al-Khwārazmī, *Mafātīḥ al-ʿulūm*, 235; al-Battānī, *Opus astronomicum*, ed. Nallino, i, Milan 1903, 141 and 319; al-Bīrūnī, *Tafhīm*, 195 [§ 325], etc. Latin: J. M. Millás Vallicrosa, *Assaig de història de les idees físiques i matemàtiques a la Catalunya medieval*, i, Barcelona 1931, 278, 66; 288, 4; 289, 29. 32. 36; N. Bubnov (ed.), *Gerberti postea Silvestri II papae opera mathematica*, Berlin 1899, 123, 10; Herimannus, *De mensura astrolabii*, in Migne, *Patrologia latina*, cxliii, Paris 1882, 387 A; (Ps.-) Messahalla (Māshāʾallāh), *De compositione astrolabii*, ed. 2. In mysticism

In Islamic mysticism, this term (lit. "pole", "axis") denotes either the most perfect human being, *al-insān al-kāmil* [*q.v.*], who heads the saintly hierarchy [see AL-GHAYB and WALĪ] and is also referred to as *al-ḳuṭb al-ḥissī* ("the [temporal] phenomenal *ḳuṭb*"); or else *al-ḥaḳīḳa al-muḥammadiyya* [see ḤAḲĪḲA] which manifests itself in *al-insān al-kāmil* and is sometimes referred to as *al-ḳuṭb al-maʿnawī* ("the [cosmic] noumenal *ḳuṭb*"). Both meanings of the term are covered by ʿAbd al-Razzāḳ al-Ḳāshānī's definition: "the place of God's appearance in the world at all times" (Kamāl al-Dīn Abi 'l-Ghanāʾim ʿAbd al-Razzāḳ b. Djamāl al-Dīn al-Kāshī [al-Kāshānī] al-Samarḳandī, *Kitāb Iṣṭilāḥāt al-ṣūfiyya*, ed. A. Sprenger, London-Calcutta 1845, 141; cf. Muḥyī 'l-Dīn b. al-ʿArabī, *al-Futūḥāt al-Makkiyya*, Būlāḳ 1274/1857, ii, 6).

The conception of the temporal *ḳuṭb* (A. *ḳuṭb al-waḳt*, *ṣāḥib al-waḳt*, *ṣāḥib al-zamān*; P. *mard-i waḳt*), referred to by some authors as *al-ghawth* ("the helper") [*q.v.* in Suppl.], who exists by virtue of the cosmic *ḳuṭb* or *ḳuṭb al-aḳṭāb*, manifest in him, has been traced back to al-Ḥallādj [*q.v.*], whose *huwa huwa* (i.e. the image of God with all his *asmāʾ* [*q.v.*] and *ṣifāt* [*q.v.*] in Adam) may be considered as the prototype of the conception of *al-insān al-kāmil* (cf. A. E. Afifi, *The mystical philosophy of Muhyid Din Ibnul Arabi*, Cambridge 1939, 79, 189), and also further back to pre-Islamic ideas, in particular to Iranian, Neo-Platonic and early Christian thought (see T. Andrae, *Die Person Muhammeds in Lehre und glaube seiner gemeinde*, Upsala 1917, 333 ff.; and H. H. Schaeder, *Die islamische Lehre vom Vollkommenen Menschen, ihre Herkunft und ihre dichterische Gestaltung*, in *ZDMG*, N.F. iv [1925], 192-268).

The notion of the *ḳuṭb* as head of the saintly hierarchy is found in the teaching of al-Ḥakīm al-Tirmidhī [*q.v.*] outlined by ʿAlī b. ʿUthmān al-Hudjwīrī in his *Kashf al-maḥdjūb* (see R. A. Nicholson, tr., *The Kashf al-Mahjúb. The oldest Persian treatise on Ṣúfism*, Leiden-London 1911, 214, 228). The scriptural justification for the belief in this hierarchy, of which the different forms mentioned by a variety of authors are discussed by E. Blochet, *Études sur l'ésoterisme musulman*, in *JA*, xx (1902), 77 ff. (in addition, see Ḥasan al-ʿIdwī al-Ḥamzāwī, *al-Nafaḥāt al-Shādhiliyya fī Sharḥ al-Burda al-Būṣīriyya*, Cairo n.d.; Sayyid Ḥaydar Āmulī, in *La philosophie Shiʿite*, ed. H. Corbin and O. Yahia, Bibl. iranienne 16, Tehran-Paris 1969, 446, and H. Corbin, *En Islam iranien. Aspects spirituels et philosophiques*, Paris 1971-2, i, 118 ff.), is a *ḥadīth* attributed to Ibn Masʿūd (cf. Abū Muḥammad ʿAbd Allāh al-Yāfiʿī, *Rawḍ al-rayāḥīn fī ḥikāyat al-ṣāliḥīn wa 'l-awliyāʾ wa 'l-akābir*, Cairo 1286/1869-70, 10; Yūsuf b. Ismāʿīl al-Nabhānī, *Shawāhid al-ḥaḳḳ fi 'l-istighātha bi-sayyid al-khalḳ*, Cairo 1323/1905-6, 101; Djalāl al-Dīn al-Suyūṭī, *al-Khabr al-dāll ʿalā wudjūd al-ḳuṭb wa 'l-awtād wa 'l-nudjabāʾ wa 'l-abdāl*, Cairo 1351/1932-3, 27). The reliability of the *sanad* of this *ḥadīth* was discarded by Muḥammad Rashīd Riḍā (*al-Manār*, xi [1908], 50 ff.). Other *aḥādīth*, all without *isnād*, mentioning the existence of a saintly hierarchy headed by the *ḳuṭb*, are listed in al-Yāfiʿī's *Rawḍ al-rayāḥīn*, 10 (see also al-Zamzamī al-Ṣiddīḳ, *al-Abdāl wa 'l-nudjabāʾ wa 'l-akhyār fī ḥadīth sayyidinā Rasūl al-Mukhtār*, in *al-Muslim*, ii/6 [Cairo, September 1952], 18 f.), including the most frequently cited one attributed to Dhu 'l-Nūn al-Miṣrī [*q.v.*].

The tentative suggestion by R. A. Nicholson (*The*

idea of personality in Ṣūfism, Cambridge 1923, 44 ff.) that *al-muṭā'*, mentioned in al-Ghazālī's *Mishkāt al-anwār*, is identical with the *ḳuṭb* as *al-ḥaḳīḳa al-muḥammadiyya* was discarded by W. H. T. Gairdner, *Al-Ghazzālī's Mishkāt al-anwār ("The niche for lights"). A translation with introduction*. London 1924, 23 ff., who had earlier questioned L. Massignon's suggestion that *al-muṭā'* is an obscure allusion to the doctrine of the *ḳuṭb* as the head of the saintly hierarchy (idem, *Al-Ghazālī's Mishkāt al-anwār and the Ghazālī-problem*, in *Isl.*, v [1914], 144).

Each of the various ranks in the saintly hierarchy has also been conceived of as being headed by a *ḳuṭb*. From these *aḳṭāb* the saints who belong to these different ranks receive their knowledge, which they owe in the last resort to the supreme (temporal) *ḳuṭb* (cf. Ibn al-'Arabī, *Futūḥāt*, ii, 7; Aḥmad Ḍiyā' al-Dīn al-Gümüshkhānlī, *Djāmi' al-uṣūl fi 'l-awliyā'*, Cairo 1328/1910, 4; 'Alī Sālim 'Ammār, *Abu 'l-Ḥasan al-Shādhilī, 'aṣruhu, ta'rīkhuhu, 'ulūmuhu, taṣawwufuhu*, Cairo 1951, i, 192; Aḥmad b. Muḥammad b. 'Ayyād, *al-Mafākhir al-'aliyya fi 'l-ma'āthir al-Shādhiliyya*, Cairo 1964, 20 ff.).

For Muḥyi 'l-Dīn b. al-'Arabī [*q.v.*], the universal rational principle, the *rūḥ Muḥammad*, or *al-ḥaḳīḳa al-muḥammadiyya* through which Divine knowledge is transmitted to all prophets and saints, finds its fullest manifestation in and is identical with the *ḳuṭb*, who is *al-insān al-kāmil*. He is the cause of creation, for in him alone creation is fully realised. He is *al-barzakh* [*q.v.*], the *ḥaḳīḳat al-ḥaḳā'iḳ*, or in other words he is Muḥammad as the inward aspect of Adam, i.e. the real Adam (Mankind) or *al-lāhūt* [*q.v.*], which is forever manifesting itself on the plane of *al-nāsūt* [*q.v.*] in prophets and saints (i.e. in *aḳṭāb*) who come within the category of *al-insān al-kāmil*, since they are perfect manifestations of God and have realised, in mystical experience, essential oneness with Him. This makes *aḳṭāb* infallible, and since there is only one *ḳuṭb* at a time (*al-ḳuṭb al-wāḥid*), he is God's real *khalīfa* [*q.v.*], who is the preserver and maintainer of the universe, the mediator between Divine and human, who passes on knowledge of the *manāzil* (degrees of mystical perfection [see MANZIL]), which cannot be entered by anybody else except by him, through virtue of his being in the *manzilat tanzīh al-tawḥīd* (absolute transcendence of God); cf. Ibn al-'Arabī, *Futūḥāt*, i, 168 ff., 201 ff., 253 ff.; ii, 7 ff., 77, and in particular iv, 80 ff.

These ideas were further elaborated by 'Abd al-Karīm al-Djīlī (cf. Nicholson, *Studies in Islamic mysticism*, Cambridge 1921, 86 ff.). They were rephrased and/or simplified by other authors (cf. Blochet, 86 ff.) and have remained part of the mainstream of Islamic mystical thinking ever since.

An identical conception of the *ḳuṭb* as the active principle (or interior, *bāṭin*; cf. al-Kāshānī, 141) in all inspiration and revelation, comparable to the νοῦς in Neo-Platonism and manifesting itself in the form (*ṣūra*) of a prophet, is found earlier with 'Umar b. al-Fāriḍ (cf. Muḥammad Muṣṭafā Ḥilmī, *Ibn al-Fāriḍ wa 'l-ḥubb al-ilāhī*, Cairo 1945, 273). This idea as noted by Ḥilmī, ibid., 277, has a striking similarity to the Ismā'īlī [*q.v.*] belief in the personification of *al-'aḳl al-awwal* in (*al-imām*) *al-nāṭiḳ*. Other authors have equally drawn attention to the similarity between the Shī'ī conception of the *Imām* as a manifestation of the Divine Logos and the conception of the cosmic *ḳuṭb* in Islamic mysticism, or the possible identity of both concepts (see e.g. Kāmil Muṣṭafā al-Shaybī, *al-Ṣila bayn al-taṣawwuf wa 'l-tashayyu'*, Cairo 1969, 463, and Corbin, *En Islam iranien*, i, 92). Several authors have noted the analogy between the Ismā'īlī (Fāṭimid) *da'wa* hierarchy and the mystical hierarchy under the *ḳuṭb* (see e.g. al-Shaybī, 457 ff. and Y. Marquet, *Des Iḫwān al-Ṣafā' à al-Ḥaǧǧ 'Umar (b. Sa'īd Tall), marabout et conquérant toucouleur*, in *Arabica*, xv [1968], 27) or have regarded the mystical hierarchy as derived from it. The historical possibility of such a derivation was discarded by W. Ivanow, *An Ali-Ilahi Fragment*, in *Collectanea*, i, The Ismaili Society, Series A, No. 2, Leiden-Bombay 1948, 166.

Among the Shī'ī scholars, some have stated explicitly that *ḳuṭb* and *Imām* are terms which have the same meaning and which refer to one and the same person (Amoli, *La philosophie shi'ite*, 223; 'Allāma Sayyid Muḥammad Ḥusayn Ṭabāṭabā'ī, *Shi'ite Islam* (tr., ed., introd. and notes by Seyyed Hossein Nasr), London 1975, 114; Corbin, *En Islam iranien*, ii, 76). The notion of the saintly hierarchy headed by the *ḳuṭb* is considered by H. Corbin as basically a Shī'ī idea which has been appropriated by Sunnī mysticism (see e.g. his *En Islam iranien*, i, 229, iii, 279; cf. al-Shaybī, 213). Several of his publications contain phenomenologically-inclined analysis of the hermeneutics involving conceptions of *ḳuṭb* in a perspective of Iranism (see e.g. his *L'homme de lumière dans le soufisme iranien*, Paris 1971, *passim*, and his *En Islam iranien*, i, 186 ff.).

Conceptions of a saintly hierarchy headed by the *ḳuṭb* and distinct from the hierarchy headed by the *Imām* are found in the works of 'Azīz al-Dīn Nasafī (cf. M. Molé, ed., *'Azizoddin Nasafi, Le livre de l'homme parfait* (*Kitāb al-Insān al-Kāmil*), Bibl. Iranienne xi, Tehran-Paris 1962, 20, 26) and 'Alā' al-Dawla Simnānī (*idem*, *Les Kubrawiyya entre Sunnisme et Shiisme aux huitième et neuvième siècles de l'Hégire*, in *REI*, xxix (1961), 107 f.; cf. Corbin, *op. cit.*, ii, 74). Similar conceptions are held in contemporary Shī'ī mysticism (cf. R. Gramlich, *Die Schiitischen Derwischorden Persiens. Zweiter Teil: Glaube und Lehre*, Wiesbaden 1976, 160 ff.). Shī'ī mystics have referred to the twelfth Imām as *ḳuṭb al-aḳṭāb* (Corbin, *En Islam iranien*, ii, 74-5, iv, 357) or *ḳuṭb-i shamsī* (Gramlich, *op. cit.*, 158), and to the head of a *ṭarīḳa* [*q.v.*] as *ḳuṭb*, *ḳuṭb-i ḳamarī* and *ḳuṭb-i zamān* (idem, 159 ff. for further references and additional detail).

Belief in the existence of *aḳṭāb* and in the whole saintly hierarchy was denounced by Ibn Khaldūn (cf. Ibn Khaldûn, ed. de Slane, ii, 164; iii, 74, 105-6; Ibn Ḫaldûn, *Şifâ'u 's-Sâ'il litehzîbi 'l-Mesâ'il*, ed. M.B.T. al-Ṭanjī, Istanbul 1958; H. S. Nyberg, *Kleinere Schriften des Ibn al-'Arabī*, Leiden 1919, 113 f.), and has been under attack by those adhering to a non-mystical conception of Islam up to the present day (see e.g. 'Abd al-Raḥmān al-Wakīl, *Hādhihi hiya 'l-ṣūfiyya*, Cairo 1375/1955, 124 ff.).

The *ḳuṭb* is regarded as being able to perform distinct *karāmāt*, which reveal his *maḳām* (cf. Ibn 'Aṭā' Allāh al-Sakandārī, *Laṭā'if al-minan*, Tunis 1304/1886-7, 57 f.; and 'Ammār, i, 193), to know the meaning of the letters at the beginning of the *sūras*, which he has received from God directly—this qualifies him for *al-khilāfa* (al-Idwī, *op. cit.*, ii, 98), which is known as *khilāfat ūlā 'l-iṣṭifā'* (see e.g. 'Abd Allāh b. 'Alawī b. Ḥasan al-'Aṭṭās, *Ẓuhūr al-ḥaḳā'iḳ fī bayān al-ṭarā'iḳ*, Bombay 1312/1894-5, 263; Muṣṭafā Yūsuf Salām al-Shādhilī, *Djawāhir al-iṭlā' wa-durar al-intifā' 'alā matn al-Iṣfahānī Abī Shudjā'*, Cairo 1350/1931-2, 270)—and to incorporate the *ṣifāt* of the *nuḳabā'*, the *nudjabā'*, the *abdāl* and of all those who belong to the saintly hierarchy (al-Gümüshkhānlī, *Djāmi' al-uṣūl*, 4; 'Ammār, i, 192),

in consequence of the fact that he is the means by which *al-ḥaḳḳ* sees his own names and *ṣifāt* (cf. ʿAbd al-Karīm al-Djīlī, *al-Insān al-Kāmil fī maʿrifat al-awākhir wa 'l-awāʾil*, Cairo 1328, ii, 48). All secret beings and every animate and inanimate body have to give him their pledge (*bayʿa*) except for the following three classes of beings: *al-afrād*, who belong to the angels and are independent of the *ḳuṭb* (cf. Ibn al-ʿArabī, *Futūḥāt*, i, 223); the *djinn* who are under the authority of al-Khaḍir [*q.v.*] (cf. Muḥyi 'l-Dīn b. al-ʿArabī, *Kitāb Manāzil al-ḳuṭb wa-maḳālihi wa-ḥālihi*, Ḥaydarābād 1948, 4); and those belonging to the tenth stratum of *ridjāl al-ghayb* [see AL-GHAYB], namely *al-ḥukamāʾ* or *al-wāṣilūn* (cf. al-ʿIdwī, *op. cit.*, ii, 101). According to Dāwūd al-Ḳayṣarī in his *Sharḥ Muḳaddima al-tāʾiyya al-kubrā* (the relevant section is published in al-Tirmidhī, *Kitāb Khatm al-awliyāʾ*, ed. ʿUthmān I.Yaḥyā, Beirut 1965, 494 f.) only the *awtād* [*q.v.*] do not come under the authority of the *ḳuṭb*: they are equal to him in rank, they owe to God everything they are but they have not been granted the *maḳām al-khilāfa* (*ibid.*, 495). In another treatise, *Maṭlaʿ khuṣūṣ al-kilam*, al-Ḳayṣarī states that al-Khaḍir was the *ḳuṭb* in secret at the time of Mūsā before the latter became *ḳuṭb* on the plane of manifest being (see Andrae, 345).

Belief in al-Khaḍir as a mortal being identical with the temporal *ḳuṭb* is reported as being held by contemporary Shīʿī mystics (Gramlich, 146). The possibility of such an identification is implicit in the conception of a mortal Khaḍir, related by Ibn Ḥadjar al-Asḳalānī, *al-Iṣāba fī tamyīz al-Ṣaḥāba*, Cairo 1358/1939, i, 434-5. This scholar, however, expresses himself in a *fatwā* to the effect that the orthodoxy of the belief in the *ḳuṭb* (*al-ghawth*) cannot be established (cf. al-ʿIdwī, ii, 98).

Early belief in the existence of a saintly hierarchy headed by the *ḳuṭb* (cf. Nicholson, *Studies*, 78 f.) seems in the course of time to have been elaborated into a conception of a secret assembly (*dīwān bāṭinī*) where the saints presided over by the *ḳuṭb* directed the affairs of the seen and unseen worlds (see Aḥmad b. Mubārak al-Sidjilmāsī, *al-Ibrīz min kalām ʿAbd al-ʿAzīz*, Cairo 1292/1875-6, i, 2 ff. Al-Sidjilmāsī relates the sayings and ideas of his *shaykh*, ʿAbd al-ʿAzīz al-Dabbāgh. Al-Dabbāgh's description of the composition and functioning of the *dīwān* has found its way into the works of Muḥammad al-Makkī b. Muṣṭafā b. ʿAzūz, *al-Sayf al-rabbānī fī unḳ al-muʿtariḍ ʿalā al-ghawth al-Djīlānī*, Tunis 1310/1892-3, 74; and ʿUbayd Allāh Ṣāliḥ b. Muḥammad al-Ḳusanṭīnī al-Ḥanṣalī, *Fatḥ al-Raḥīm al-Raḥmān bi-sharḥ naṣīḥat al-ikhwān*, Cairo 1312/1894-5, 176). This conception is prominent in certain mystical traditions to the present day (see Muḥammad Zakī Ibrāhīm, *Maʿ al-Badawī al-muftarī ʿalayhi*, in *al-Muslim*, xv/7 (Cairo, June 1965), 15; and *idem*, *Maʿ ḳaḍiyyat al-aḳṭāb al-arbaʿ wa-marātib ahl al-ghayb*, in *al-Muslim*, xx/11 (August 1970), 11 f.: and ʿAbd Rabbihi b. Sulaymān al-Ḳalyūbī, *Fayḍ al-Wahhāb fī bayān ahl al-ḥaḳḳ wa-man ḍalla ʿan al-ṣawāb*, Cairo 1964, v, 57 ff.).

Opinions as to the whereabouts of the *ḳuṭb* vary. According to Ibn al-ʿArabī (cf. *Futūḥāt*, i, 168; *Manāzil al-ḳuṭb*, 4), the *ḳuṭb* is corporeally present at Mecca; according to Aḥmad Muḥammad Riḍwān, *al-Nafāḥāt al-rabbāniyya*, Cairo 1390, 270, his bodily presence is confined to Upper Egypt. Popular belief in Egypt held him to be miraculously present in a niche behind one of the doors of Bāb al-Zuwayla, the southern gate of Cairo (see E. W. Lane, *An account of the manners and customs of the modern Egyptians*, London 1860, 231 f.; and H. H. Harrison, *The Bab il Metawalli*, in *MW* viii [1918], 141-4), which was a site for veneration and votive offerings (cf. J. W. McPherson, *The Moulids of Egypt*, Cairo 1941, 141). In contemporary Islamic mysticism, the dominant view seems to be that only his spirit is seen at Mecca, i.e. at the Kaʿba, which is the *maḳām* [*q.v.*] of his spirit and the throne of his heart (see Muḥammad Zakī Ibrāhīm, *Kulaymāt mukammilāt li-mawḍūʿ al-aḳṭāb*, in *al-Muslim*, xv/8 [June 1965], 8).

A few cases are found where a *ṭarīḳa* teaches explicitly that the *ḳuṭb* will always belong to this particular *ṭarīḳa*. Examples are al-ʿAzāziyya (see the relevant section in F. de Jong, *The Ṣūfī orders in post-Ottoman Egypt*, forthcoming) and al-Shādhiliyya (see Ibn ʿAyyād, 105). The latter *ṭarīḳa* teaches that God gave Abu 'l-Ḥasan al-Shādhilī the *bayʿat al-ḳuṭbiyya* after the death of Abu 'l-Ḥadjdjādj al-Uḳṣurī (b. ʿAyyād, *ibid.*, 35). The *silsila* of the *ṭarīḳa* is referred to as the *silsilat al-aḳṭāb* (Abū Bakr b. Muḥammad al-Bannānī, *Madāridj al-sulūk ilā Mālik al-Mulūk*, Cairo 1330/1912, 90) going back to ʿAlī b. Abū Ṭālib through his son Ḥasan, who is considered the first *ḳuṭb* (al-Sakandārī, 59; Ibn ʿAzūz, 75; al-Ḳusanṭīnī, 181).

Distinct cosmological systems revolving around a conception of *ḳuṭb* and derived from the ideas outlined above, and presenting or incorporating a modified version, have been developed and have gained some degree of significance at distinct times and places. Notable are, in chronological order, Abu 'l-Faḍl ʿAllāmī's [*q.v.*] presentation of the Mughal emperor Akbar [*q.v.*] as *insān al-kāmil* or temporal *ḳuṭb* around whom the world revolves in his *Akbar-nāma*; Aḥmad Sirhindī's [*q.v.*] conception of the *ḳayyūm*—the vicar of God on earth to whom the *ḳuṭb* is a servant under his rule, a rank which he ascribed to himself and which was claimed by four of his descendants (S. A. A. Rizvi, *Muslim revivalist movements in Northern India in the sixteenth and seventeenth centuries*, Agra 1965, 266 ff.): this belief seems to have influenced the teaching of Mīr Dard (cf. A. Schimmel, *Pain and grace. A study of two mystical writers of eighteenth-century Muslim India*, Leiden 1976, 81); and Tidjānī doctrine centred upon the belief that Aḥmad al-Tidjānī [*q.v.*] was *khatm al-wilāya* and *ḳuṭb al-aḳṭāb* simultaneously (J. M. Abun-Nasr, *The Tijaniyya. A Sufi order in the modern world*, London 1965, 27 ff.).

Before and after Aḥmad al-Tidjānī, Ṣūfīs claimed or were considered to be *aḳṭāb*. Some examples from among the earlier mystics are listed in Gramlich, 168, n. 910). Other notable examples among the later mystics are Abū Saʿīd b. Abi 'l-Khayr (see Muḥammad Nūr al-Dīn Munawwar b. Abī Saʿd Asʿad, *Asrār al-tawḥīd fī maḳāmāt al-shaykh Abī Saʿīd*, ed. Dhabīḥ Allāh Ṣafā, Tehran 1348, 352 f.), ʿAbd al-Raḥīm al-Ḳināwī (cf. Aḥmad Ḥusayn Djabaruh, *Kalima mutawāḍiʿa ʿan ḳuṭb Ḳinā sīdī ʿAbd al-Raḥīm al-Ḳināʾī*, n.p. Ḳinā] 1388/1968); Abu 'l-Ḥadjdjādj al-Uḳṣurī (see Ibn ʿAyyād, 35); Abu 'l-ʿAbbās al-Mursī (see al-Sakandārī, 68); ʿAbd al-Ḳādir al-Djīlānī [*q.v.*], Aḥmad al-Rifāʿī, Aḥmad al-Badawī [*q.v.*], and Ibrāhīm al-Dasūḳī [*q.v.*]. The last four of these are frequently referred to as *al-aḳṭāb al-arbaʿa* (see Muḥammad Maḥmūd al-Suṭūḥī, *al-Taṣawwuf wa-aḳṭābuhu*, Cairo 1970, 15, 24; cf. Muḥammad Zakī Ibrāhīm, *Maʿḳaḍiyyat al-aḳṭāb al-arbaʿa*, 6 ff.). In some mystical cosmologies they are presented as occupying a position of pre-eminence in the successive stages of pre-creation out of *al-nūr al-muḥammadī* before their birth, as successors to the four *khulafāʾ al-rāshidūn* during their lifetime, and as continuing forces in the world of the unseen after their death

(see ʿAḳīl Maẓhar, *Ḳuṭra min baḥr al-Ḳurʾān*; *dawlat Abi 'l-ʿAynayn*, in *Sanābil* v (Cairo-Kafr al-Shaykh, April 1967), 41; and Muḥammad Zakī Ibrāhīm, *Maʿ al-Badawī*, 8 ff.; cf. idem, *Kulaymāt mukammilāt li-mawḍūʿ al-aḳṭāb*, 8 ff.).

In some mystical traditions, those belonging to the saintly hierarchy, including the *ḳuṭb*, are held to be identical with the serious mystical teachers present at a certain time but whose spiritual rank remains undivulged to those outside this hierarchy (cf. ʿImrān Aḥmad ʿImrān, *al-Talbiya fī wudjūd shaykh al-tarbiya*, Asyūṭ 1354/1936, 14). This tenet may imply the belief that potentially everybody can become *ḳuṭb* by means of following the *ṭariḳa*, i.e. by means of the method prescribed by a distinct mystical tradition (cf. Sulaymān al-Djamal, *al-Futūḥāt al-ilāhiyya bi-tawḍīḥ Tafsīr al-Djalālayn bi 'l-daḳāʾiḳ al-khafiyya*, Cairo 1913, i, 114).

The statement by J. S. Trimingham, *The Sufi orders in Islam*, Oxford 1971, 163 f., that the conception of the *ḳuṭb* has gone through a process of vulgarisation would seem to be in need of further substantiation.

Bibliography: given in the article.

(F. DE JONG)

ḲUṬB AL-DĪN [see MAWDŪD B. ZANGĪ; AL-NAHRAWĀLĪ].

ḲUṬB AL-DĪN AYBAK, the first ruler of the Indo-Muslim state which arose after the death of the Ghūrid Shihāb al-Dīn (Muʿizz al-Dīn) Muḥammad b. Sām in 1206 and was subsequently to be based at Dihlī. Brought as a slave from Turkestān first to Nīshāpūr and then to Ghazna, he was purchased by Muḥammad, then engaged in the reduction of the independent Hindu principalities in northern India, and rose to be *amīr-i ākhūr* (master of the horse) and *muḳtaʿ* of Kohŕām (now Ghurām in Patiāla) and Sāmāna. The sources for this period, composed either under Aybak's hegemony or under his successors, ascribe to him personally the capture of Meerut, Dihlī, Kōl (ʿAlīgaŕh), Thankīr (Bayāna), Gwāliyār, Badāʾūn, Kanawdj and Kālindjar, between 587/1191 and 599/1202-3, and the sack of Nahrwāla in Gudjarāt (593/1197).

On his master's assassination in 602/1206, he moved from Dihlī to Lahore, where he is said to have ascended the throne on 17 Dhu 'l-Ḳaʿda/25 June, and which became his permanent residence. Aybak's precise status is problematical. No coins of his are extant, and the statement of Ḥasan Niẓāmī that the *khuṭba* was read and coins struck in his name is not corroborated elsewhere. Djūzdjānī on the contrary specifies at one point that these prerogatives were retained by Muḥammad's immediate successor Ghiyāth al-Dīn Maḥmūd, who now reigned at Fīrūzkūh, though elsewhere he says that Maḥmūd conferred on Aybak the title of Sulṭān. In view of Aybak's slave rank, it is most likely that he was simply manumitted by the new Ghūrid sovereign, as we read in Ibn al-Athīr, and remained his subordinate, receiving a diploma and canopy of state as *malik* of Hindūstān. Aybak's attentions appear to have been absorbed by the situation in the north-west, where the Ghūrid empire was succumbing to pressure from the Khwārazm-Shāh Muḥammad b. Tekish, and it is significant that no efforts to extend the Muslim conquests in India are recorded for his reign. He engaged in hostilities with another Ghūrid slave officer, Tādj al-Dīn Yīldiz, who was based at Ghazna and who endeavoured unsuccessfully to take Lahore in 605/1208-9. Aybak's own subsequent occupation of Ghazna, however, was merely temporary, and he was expelled by the citizens in favour of Yīldiz. He died at Lahore in 607/1210-1, of wounds sustained in an accident during a game of polo (*čawgān*), and his successor Ārām Shāh, whose relationship to him is uncertain, was soon set aside in favour of the *muḳtaʿ* of Badāʾūn, Aybak's son-in-law Iltutmish [*q.v.*, and see also DIHLĪ SULTANATE].

Aybak, who has achieved renown as the builder of the Ḳuṭb Mīnār [*q.v.*] at Dihlī, was a patron also of the literary arts. Fakhr-i Mudabbir [*q.v.* in Suppl.], author of a manual of war, the *Ādāb al-ḥarb*, dedicated to him his book of genealogies, and it was probably under Aybak's régime that Ḥasan Niẓāmī [*q.v.* in Suppl.] began writing his florid *Tādj al-maʾāthir*, which was completed under Iltutmish. Both are important sources for the early period of Muslim rule in Hindūstān.

ḲUṬB AL-DĪN BAKHTIYĀR KĀKĪ, a Ṣūfī who settled at Dihlī during the reign of Iltutmish [*q.v.*].

Khwādja Ḳuṭb al-Dīn Bakhtiyār (Aḥmad b. Mūsā al-Kākī al-Ushī) was a native of Ush, a town in eastern Farghāna. The *tadhkira* literature depicts him as the disciple of Muʿīn al-Dīn Čishtī (d. 634/1236), the founder-figure of the Čishtī affiliation in India. The accounts disagree on whether the two contemporaries first met at Ush, or at Iṣfahān, or in the Ṣūfī circle of Abū Ḥafṣ ʿUmar al-Suhrawardī (d. 632/1234), or in the mosque of Abu 'l-Layth al-Samarḳandī at Baghdād. After years of wandering, Ḳuṭb al-Dīn came to Multān early in the 7th/13th century during the rule of Naṣir al-Dīn Ḳabāča (d. 625/1228). There Farīd al-Dīn Masʿūd (d. 664/1265) sought his company, while Bahāʾ al-Dīn Zakariyyāʾ (d. 666/1268) seems to have encouraged his departure for Dihlī. Ḳuṭb al-Dīn settled outside the walls of Dihlī near the tank, *ḥawḍ-i shamsī*, during the reign of Iltutmish (607-33/1211-36), but declined the office of *Shaykh al-Islām* offered to him by the Sulṭān. Ḳuṭb al-Dīn was well-known for his Ṣūfī practice of listening to music (*samāʿ*), and is said to have died during a *samāʿ* performance on 14 Rabīʿ I 633/27 November 1235. His tomb is in the vicinity of the Ḳuṭb Mīnār at Mihrawlī. The Ḳuṭb Mīnār [*q.v.*], completed by Iltutmish in 629/1229, is believed to derive its name from Ḳuṭb al-Dīn Bakhtiyār (not from Ḳuṭb al-Dīn Aybak).

The Čishtī affiliation venerates Ḳuṭb al-Dīn as one of the outstanding members of its founder-generation in India, and records him in its *silsila* as the link between Muʿīn al-Dīn and Farīd al-Dīn. Ḳuṭb al-Dīn is the alleged compiler of the apocryphal *malfūẓāt* of Muʿīn al-Dīn, entitled *Dalīl al-ʿārifīn* (Lucknow 1868), whereas his own sayings supposedly have been collected by Farīd al-Dīn in the spurious *Fawāʾid al-sālikīn*. A more reliable source, however, appears to be the *Miftāḥ al-ṭālibīn*, which was compiled in the immediate circle of Ḳuṭb al-Dīn's associates at Dihlī.

ḲUṬB AL-DĪN AL-IZNĪḲĪ, Muḥammad al-Rūmī, early Ottoman Ḥanafī scholar and father of Ḳuṭb al-Dīn-zāde Muḥammad [*q.v.*]. He was born at Iznīḳ [*q.v.*] and died there on 8 Dhu 'l-Ḳa'da 821/7 December 1418. Popular story puts him in contact with the conqueror Tīmūr when the latter occupied Anatolia, and he was the author of commentaries on the work of the great Spanish mystic Ibn al- Arabī [*q.v.*].

Bibliography: Ṭāshköprüzāde, *al-Shaḳā'iḳ al-nu'māniyya*, Beirut 1395/1975, 24, German tr. O. Rescher, Constantinople-Galata 1927, 18-19. (Ed.)

ḲUṬB AL-DĪN MUBĀRAK [see KHALDJĪS]

ḲUṬB AL-DĪN MUḤAMMAD [see KHWĀRAZM-SHĀHS].

ḲUṬB AL-DĪN SHĪRĀZĪ, Maḥmūd b. Mas'ūd b. Muṣliḥ, Persian astronomer and physician, was born in Ṣafar 634/October 1236 in Shīrāz and died in Tabrīz on 17 Ramaḍān 710/February 1311.

Like many Muslim medical men, Ḳuṭb al-Dīn belonged to a family of distinguished physicians; at the same time, however, he was not only a prominent medical man, at least as regards his writings, but he distinguished himself also in astronomy, philosophy, and the treatment of religious problems. This versatility induced Abu 'l-Fidā' to give him the name *al-mutafannin* "experienced in many fields". He received his medical training with his father Ḍiyā' al-Dīn Mas'ūd al-Kāzarūnī, i.e. of Kāzarūn (to the west of Shīrāz), in the hospital of Shīrāz. He lost his father at the age of 14 and then became a pupil of his uncles Kamāl al-Dīn Khayr al-Kāzarūnī and Sharaf al-Dīn al-Zakī al-Rushkānī (Suyūṭī has Rukshawī) and Shams al-Dīn al-Kutubī; he then went to Naṣīr al-Dīn al-Ṭūsī, studied with him and surpassed everyone. It was probably Naṣīr al-Dīn who stimulated him to study astronomy. While still quite young he conceived the idea of editing the *Kulliyyāt*, the first theoretical part of the *Ḳānūn* of Ibn Sīnā. He next sought instruction with the physicians in Shīrāz and then studied deeply the works of earlier scholars. He then travelled in Khurāsān, the two 'Irāḳs, Persia, Anatolia, and Syria. Everywhere, as he tells us in the introduction to the commentary on the *Kulliyyāt*, he sought the acquaintance of scholars. It was probably after these journeys that he became associated with the Mongol rulers of Persia, the Īl-Khāns; in what year and under which ruler this happened, we do not know. In any case in 681/1282 he was *ḳāḍī* of Sīwās and of Malaṭya in Anatolia under Aḥmad Nikudār (680-3/1281-4). There he was still engaged on the *Kulliyyāt*; he must have played a part in politics, as Aḥmad sent him with his uncle Kamāl al-Dīn to Egypt to the Mamlūk Sulṭān al-Manṣūr Sayf al-Dīn Ḳalāwūn (678-89/1279-90 [*q.v.*]). He was sent to report the former's conversion to Islam, no doubt the result of Ḳuṭb al-Dīn's influence, and to conclude a peace between the Mnslims and the Mongols. The latter part of his mission was a failure. In Egypt also he collected material for the *Kulliyyāt*. He dedicated the work, probably fiuished shortly after his return from Egypt, to Muḥammad Sa'd al-Dīn, Aḥmad Khān's vizier, and called it *al-Tuḥfa al-Sa'diyya*, "the present to Sa'd", or *Nuzhat al-ḥukamā' wa-rawḍat al-aṭibbā'*, "the delight of the wise and garden of the physicians".

In his later years Ḳuṭb al-Dīn retired to Tabrīz. Towards the end of his life he ardently studied *ḥadīth* and made critical notes on the subject, e.g. on the *Djam' al-uṣūl* ("Encyclopaedia of principles") and to the *Sharḥ al-Sunna* ("Commentary on the *Sunna*"). Ibn Shuhba and al-Subkī give a sketch of the character of Ḳuṭb al-Dīn. He had a brilliant intelligence, combined with unusual penetration; at the same time his humour was innocent; he was known as "the scholar of the Persians". It is evidence of his efforts to preserve his independence that, in spite of his prestige with princes and subjects, he lived remote from the court. He also led the life of a Ṣūfī. It is emphasised that he had many pupils; among these was Kamāl al-Dīn al-Fārisī (see below), who cannot praise him highly enough: he also induced al-Taḥtānī (d. 766/1364; see Brockelmann, II², 271, S II, 293-4) to come to critical decisions (*muḥākamāt*) on the *Ishārāt* of Ibn Sīnā on points disputed between Naṣīr al-Dīn and Fakhr al-Dīn al-Rāzī (Ḥādjdjī Khalīfa, No. 743). He neglected his religious duties; nevertheless, al-Suyūṭī mentions that in Tabrīz he always performed his *ṣalāts* with the congregation. He loved wine and sat among the scorners. He was a brilliant chessplayer and played continuously; he was also skilled in the tricks of the conjurer and played the small viol (*rabāba*). His commentary on the *Ḥikmat al-ishrāḳ* ("the philosophy of illumination") of Suhrawardī is undoubtedly connected with his religious attitude. Nevertheless, as Ḥādjdjī Khalīfa (No. 1169) emphasises, Ḳuṭb al-Dīn distinguished himself in theology. He annotated the Ḳur'ān very thoroughly and in a fashion that won recognition in his *Fatḥ al-mannān fī tafsīr al-Ḳur'ān*; in the *Fī mushkilāt al-Ḳur'ān* he also dealt with passages in the Ḳur'ān difficult to reconcile with one another. He wrote a commentary on *al-Kashshāf 'an ḥaḳā'iḳ al-tanzīl* of al-Zamakhsharī. Ḳuṭb al-Dīn played a special part in the history of optics, because he called the attention of his pupil Kamāl al-Dīn al-Fārisī [*q.v.*] (d. *ca.* 720/1320) to the *Optics* of Ibn al-Haytham [*q.v.*], with which he had become acquainted on his travels, and procured a copy for him. Al-Fārisī wrote a commentary on it and extended it by his own observations. It is noteworthy that Ḳuṭb al-Dīn so completely forgot Ibn al-Haytham's expositions that he based his observation not on rays of light like the latter, but on rays of vision.

In the two comprehensive astronomical works *Nihāyat al-idrāk fī dirāyat al-aflāk*, the "highest intelligence in the knowledge of the spheres", and *al-Tuḥfa al-shāhiyya fi l-hay'a*, which are very similar to each other, Ḳuṭb al-Dīn has given what is conceivably the best Arabic account of astronomy (cosmography) with mathematical aids. It closely follows the al-*Tadhkira al-naṣīriyya*, the memoranda of Naṣīr al-Dīn al-Ṭūsī, his teacher. But Ḳuṭb al-Dīn's works are very much fuller and deal with many questions which Naṣīr al-Dīn did not touch; they are therefore much more than commentaries. The

Nihāya discusses, for example, details of the cosmography of al-Khiraḳī or Ibn al-Haytham, which are again found in Roger Bacon. Passages from these works are discussed by E. Wiedemann in: *Zu den optischen Kenntnissen von Ḳuṭb al-Dīn al-Schīrāzī*, in *Archiv für die Gesch. der Naturwissensch., etc.*, iii (1912), 187-93; *Über die Gestalt, Lage und Bewegung der Erde, sowie philosophisch-astronomische Betrachtungen von Ḳuṭb al-Dīn al-Schīrāzī*, in *ibid.*, 395-422; *Beiträge*, xxvii, *Auszüge aus al-Schīrāzīs Werk über Astronomie*, in *SBPMS Erl.* xliv (1912), 27-35, reprinted in *Aufsätze zur arab. Wissenschaftsgesch.*, Hildesheim 1970, i, 802-10; *Erscheinungen bei der Dämmerung und bei Sonnenfinsternissen nach arabischen Quellen*, in *Archiv für Gesch. der Medizin*, xv (1923), 47-8; *Inhalt eines Gefässes in verschiedenen Abständen vom Erdmittelpunkt*, in *Zeitschr. für Physik.*, xiii (1923), 59-60.

One work is entitled *Sharḥ al-tadhkira al-naṣīriyya*. As an appendix to the *Nihāya*, Ḳuṭb al-Dīn wrote the *Fī ḥarakāt al-daḥradja wa 'l-nisba bayn al-mustawī wa-'l-munḥanī*, "On the motion of rolling and the connection between the straight and the crooked". Other works are *al-Tabṣira fi 'l-hayʾa* and a work with a very peculiar title, *Kitāb faʿaltu fa lā talum fi 'l-hayʾa*, "Work on astronomy; I have composed it but blame it not".

Besides the works by Ḳuṭb al-Dīn already mentioned, there are also recorded a treatise on diseases of the eye and a commentary on the *Urdjūza* of Ibn Sīnā; a work on medical ethics, the *K. Bayān al-ḥādja ilā 'l-ṭibb wa-ādāb al-aṭibbāʾ wa-waṣāyāhum*; commentaries on the work, mainly grammatical of al-Sakkākī and on a work of Ibn al-Ḥādjib, and an encyclopaedia of philosophy, the *Durrat al-tādj*, written for one of the Isḥāḳwand amīrs of Gīlān [see FŪMAN], which includes an important section on music.

After his death, Zayn al-Dīn Ibn al-Wardī wrote verses on Ḳuṭb al-Dīn, in which he expresses surprise that the mill (*raḥā*) of knowledge still turns after it has lost its axis (*ḳuṭb*).

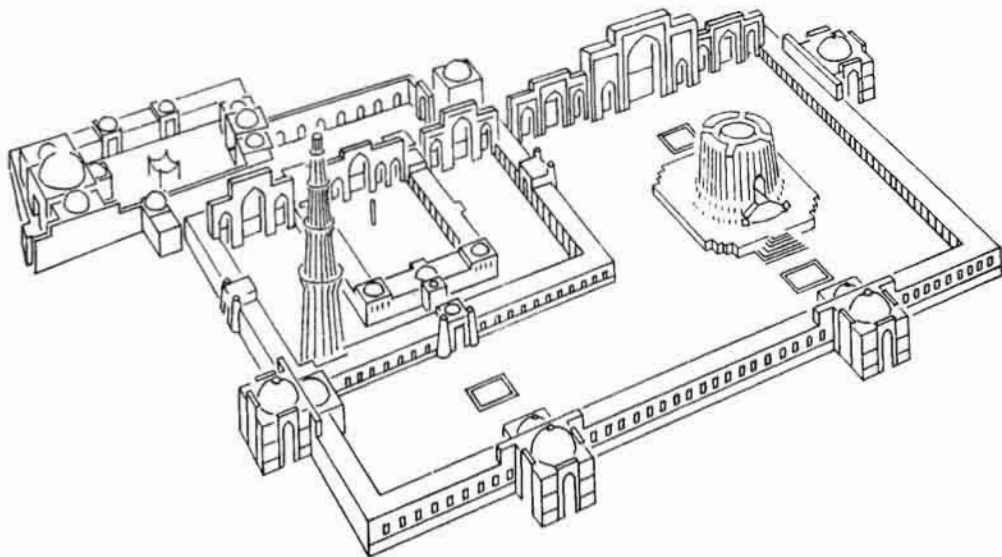
ḲUṬB al-DĪN-ZĀDE, Muḥyī al-Dīn Muḥammad b. Ḳuṭb al-Dīn Izniḳī, Ottoman scholar and mystic. He was born in the early 9th/15th century, the son of Ḳuṭb al-Dīn Izniḳī (d. 821/1418 [*q.v.*]), himself a scholar and the author of works on *tafsīr* and *fiḳh* (see *ʿOthmānlī müʾellifleri*, i, 144, romanised version, i, 124-5). He was in his early years the pupil of the famous *muftī* Shams al-Dīn Muḥammad, Mollā Fanārī (d. 834/1431) [see FENĀRĪ-ZĀDE], and later became interested in Ṣūfism. He wrote several works, many of them commentaries, e.g. on the mystical works of Ibn al-ʿArabī and his pupil Ṣadr al-Dīn Muḥammad al-Ḳūnawī, and others on the interpretation of dreams (*taʿbīr al-ruʾyā*), He died in 885/1480 and was buried in the Tatār Khān cemetery at Edirne.

Rescher, Constantinople-Galata 1927, 63; Bursalī Meḥmed Ṭāhir, *ʿOthmānlī müʾellifleri*, i, 159-60, romanised version, Istanbul n.d. (1972?), i, 133-4; Brockelmann, S II, 328. (Ed.)

ḲUṬB KHĀN LŌDĪ [see LŌDĪs].

ḲUṬB MĪNĀR, a lofty tower of red sandstone, said by Fergusson (ii, 206) and Diez (165) to be one


Reconstruction of the area of the Ḳuṭb Mosque. From left to right: ʿAlāʾī Darwāza (705/1305), Ḳuṭb-Mīnār (591/1198) and unfinished tower ʿAlāʾī Mīnār (after A. Volwahsen, *Islamisches Indien*, Munich 1969, 40).

of the most beautiful buildings of its kind in the world.

It is situated about 11 miles from the modern city of Dihlī [*q.v.*], in the ruins of the first city of that name, and about 160 feet from the great mosque which was erected by Ḳuṭb al-Dīn Aybak [*q.v.*] in 589/1193, just after the capture of the city from the Hindu king, Prithvīrā**dj**. Like the Mīnār at **Gh**azna [*q.v.*] and the Mīnār at Koyl [*q.v.*] (no longer in existence), it is an isolated structure, from which the *mu'a**dhdh**in* gave the call to prayer, and is 238 feet in height; it is not attached to the mosque, but stands in the southeastern corner of the southern outer court, which was added in 622/1225 to Aybak's mosque by Iltutmi**sh** [*q.v.*]; it is not straight, but tapering, and is divided into five stories, above each of which (with the exception of the topmost story) are boldly projecting balconies, with richly-sculptured bands of inscriptions below them. The basement storey appears to have been built while Aybak still recognised the overlordship of Muʿizz al-Dīn **Gh**ūrī (i.e. before 601/1205); the second, third and fourth stories were built by Iltutmi**sh**, but during the reign of Fīrūz **Sh**āh Tu**gh**luḳ [*q.v.*] the building was struck by lightning, and this king in 769/1368 had it repaired and added a fifth storey. The two uppermost stories, both of which in their present form are probably the work of Fīrūz **Sh**āh, have a plain surface, chiefly of white marble, with bands of red sandstone; but the rest of the surface of the tower is entirely of red sandstone, and is not round but made up of flutings, which in the basement story are alternately round and angular, in the second rounded only, and in the third angular only. The line of each fluting is carried up unbroken through each story. The inscriptions are partly historical in character and partly made up of quotations from the Ḳur'ān; they have been reproduced and translated in *Epigraphia Indo-Moslemica* (1911-12).

Recently, the prototype of this Mīnār was discovered in the ruins of the tower at **Kh**ʷā**dj**a Siyāh Pū**sh** in Af**gh**ān Sīstān: in the ground plan of the regularly alternating 8-rounded and angular flanges, we can recognise the transition between the Eastern Iranian stellate plan, continued for example at **Gh**azna [see **GH**AZNAWIDS. Art and monuments] and the round plan of **Dj**am [see **GH**ŪRIDS] in Central Af**gh**ānistān (K. Fischer, ed., *Nimruz*, pls. 252-4).

The tower derives its name from the saint **Kh**ʷā**dj**a Ḳuṭb al-Dīn Ba**kh**tiyār Kākī (d. 633/1235 [*q.v.*]), who was held in high honour by Iltutmi**sh**.

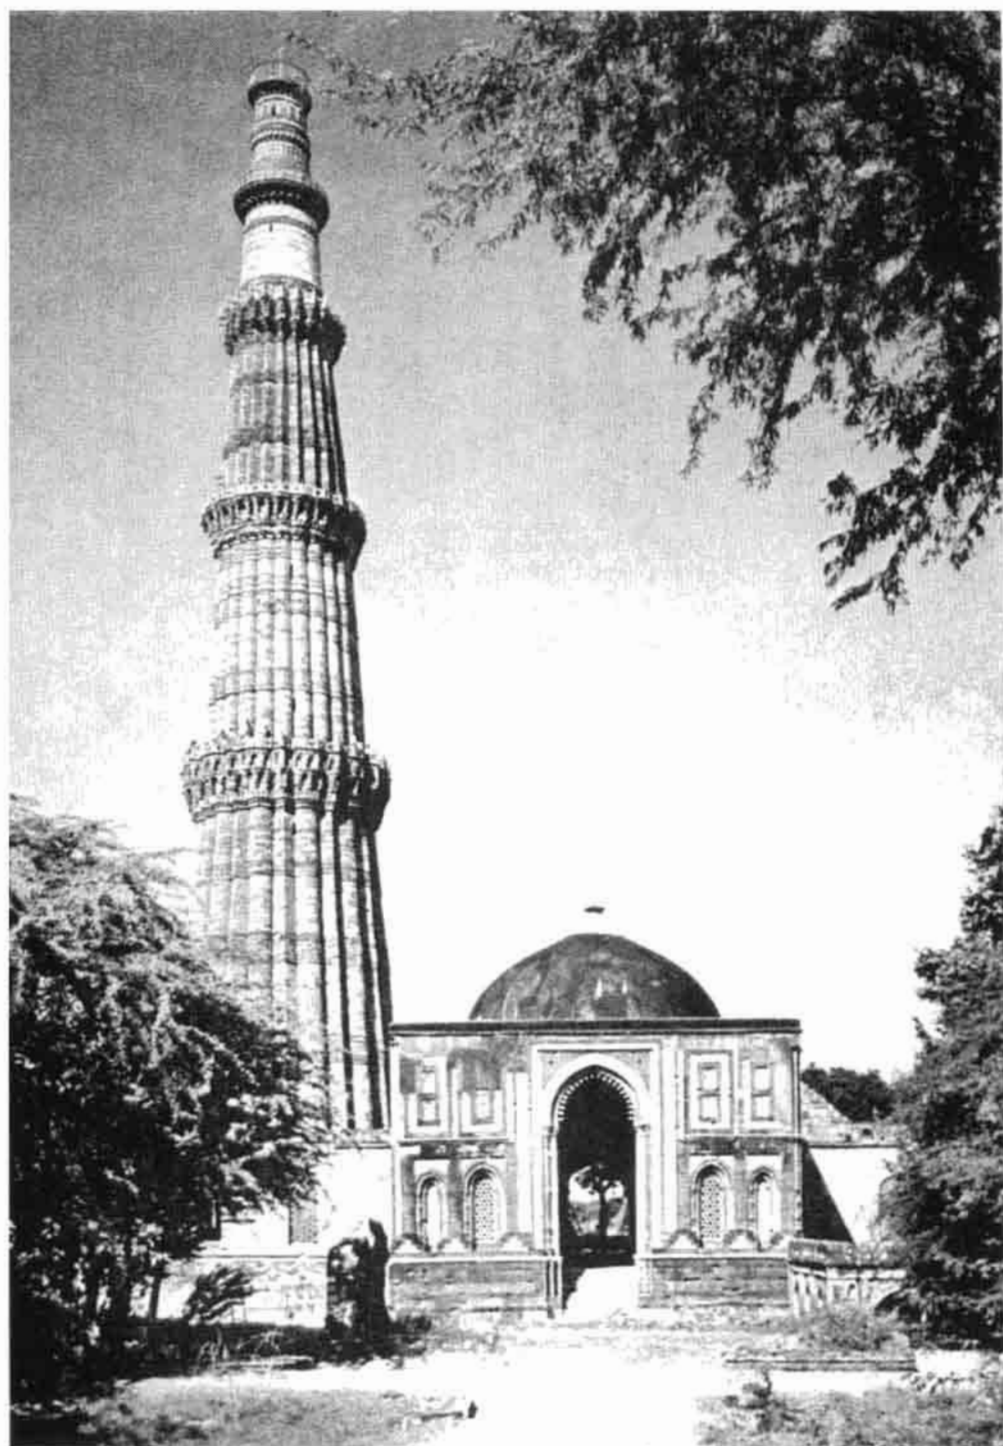
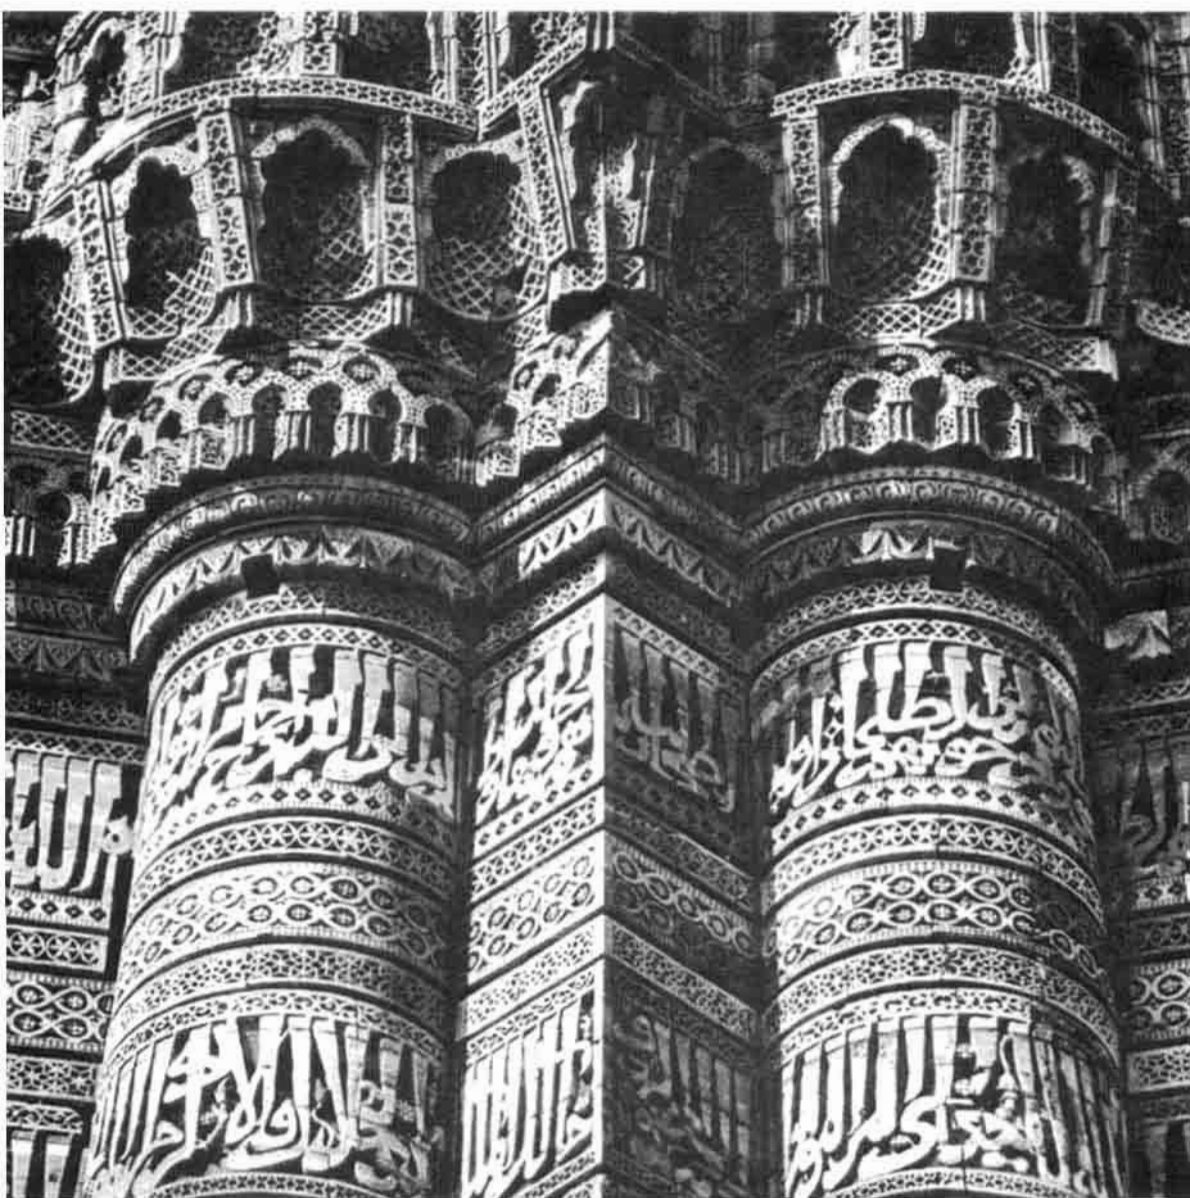
ḲUṬB SHĀHĪ, the name of an Indo-Muslim dynasty that dominated the eastern Deccan plateau as one of the five successor states to the Bahmanī kingdom. Basing their power on the city and hill-fort of Golkonḍā [*q.v.*], the Ḳuṭb **Sh**āhī kings achieved *de facto* independence with the decline of the parent Bahmanī kingdom in the early 10th/16th century, maintaining effective rule until Mu**gh**al armies under Awrangzīb conquered and annexed the kingdom in 1098/1687.

The founder of the dynasty, Sulṭān Ḳulī Ḳuṭb al-Mulk, was a Turkoman adventurer of the Ḳarā Ḳoyunlu clan [*q.v.*] who, having migrated from Persia to India as a youth, rose in Bahmanī service until in 901/1496 he was appointed governor over the easternmost Bahmanī dominions. Although he never claimed legal sovereignty during his long rule, Sulṭān Ḳulī managed to carve out for himself and his descendants the broad territorial outlines of a kingdom over which they held effective sway for nearly two hundred years. He also gave the dynasty ideological definition by declaring **Sh**īʿism the official creed, following the precedent set by **Sh**āh Ismāʿīl of Persia in 907/1501. This orientation, continued by all of Sulṭān Ḳulī's successors, caused the dynasty to identify ideologically with Persia as its link with *Dār al-Islām*, rather than with the Ottoman or Mu**gh**al empires, which were Sunnī. The sequence of Ḳuṭb **Sh**āhī kings is as follows:

Ḳulī Ḳuṭb al-Mulk	901-50/1496-1543
Djam**sh**īd b. Ḳulī	950-7/1543-50
Subḥān b. Jam**sh**īd	957/1550
Ibrāhīm b. Ḳulī	957-88/1550-80
Muḥammad-Ḳulī b. Ibrāhīm	988-1020/1580-1612
Muḥammad b. Muḥammad-Ḳulī	1020-35/1612-26
ʿAbd Allāh b. Muḥammad	1035-83/1626-72
Abu 'l-Ḥasan, son-in-law of ʿAbd Allāh	1083-98/1672-87

Throughout most of the 10th/16th century and the early 11th/17th century, the Kingdom of Golkonḍā was engulfed in constant warfare either with the most powerful two of its sister successor states to the west, Bī**dj**āpūr and Aḥmadnagar, or with the Hindu state of Vijayanagar to the immediate south. These conflicts were sustained by mutual jealousies and petty intrigues, resulting in constantly shifting military alliances among these four principal states of the Deccan. Thus, although Golkonḍā, Bī**dj**āpūr and Aḥmadnagar were able to band together in 972/1565 to crush Vijayanagar and sack its wealthy capital in the battle of Talikota, immediately after this battle the three Muslim states resumed their mutual hostilities. This situation prompted increasing intervention in Deccan affairs by the Mu**gh**al empire, which was expanding its imperial interests in the 11th/17th century. Finally, in 1045/1636 **Sh**āh **Dj**ahān forced ʿAbd Allāh Ḳuṭb **Sh**āh to recognise the Mu**gh**al government's ultimate suzerainty over Golkonḍā in a "Deed of Submission". By clarifying Golkonḍā's relationship to Dihlī, however, this arrangement relieved ʿAbd Allāh of further anxieties about Mu**gh**al aggression so long as tribute was paid, and freed him to expand Ḳuṭb **Sh**āhī arms southward as far as the Palar river (near Madras), absorbing a number of petty Hindu principalities formerly dependent upon Vijayanagar.

But the reign of ʿAbd Allāh's successor, Abu 'l-Ḥasan Ḳuṭb **Sh**āh, witnessed a dramatic transformation in the internal ruling structure of the kingdom as a number of Brahmins, especially the brothers Madanna and Akkanna, acquired the reins of central authority. This development, combined with the


1. Dihlī, Ḳuṭb Minār (594/1198) and ʿAlāʾī Darwāza (705/1305). (A. Volwahsen, *Inde islamique*, Fribourg 1971, 17)


2. Ḳuṭb Minār, decoration and inscriptions. (A. Volwahsen, *Inde islamique*, Fribourg 1971, 19)

state's official Shīʿī ideology, arrears of unpaid tribute to the Mughals, the general chaos in the Deccan prompted by the rise of the Marāṭhās, and renewed expansionist sentiment in the Mughal government now under Awrangzīb, led to a determined Mughal effort to end Golkondā's subordinate but semi-independent status and annex it to the Empire. In 1098/1687, after a protracted siege of Golkondā fort, the Mughal conquest and annexation of the kingdom was accomplished.

In its two centuries of rule, the Ḳuṭb Shāhī monarchy sank roots deep into Indian society and culture by successfully integrating multiple groups into its political fabric, by founding an efficient economic basis for the kingdom, and by forming a distinctive Indo-Muslim culture that accommodated itself in important ways with the pre-existing Hindu culture. On the political level the dynasty, faced with the choice of dislodging or absorbing the indigenous class of Hindu warrior chiefs (*nāyaks*) already dominant in Telugu society, adopted the latter alternative, employing *nāyaks* in garrisons throughout the kingdom and even in the royal guard at the capital. The other indigenous élite group, the Brahmins, were likewise absorbed into the dynasty's political structure, especially in the central revenue administration as clerks, accountants, and even chief administrators. On the local level too, virtually the entire revenue system was entrusted to Brahmins who functioned as agents, brokers or accountants. In fact the more important members of this rural gentry received royal orders guaranteeing their tenure, frequently hereditary, and assuring them of royal support against rivals.

By far the greatest share of the kingdom's revenue was derived from the land tax, collected in cash through a highly-organised and ruthlessly efficient revenue bureaucracy. Further contributing to the kingdom's economic stability, and also its notorious wealth, was the successful exploitation of a number of diamond mines discovered in the Krishna river valley during the early years of the dynasty's history. The diamond enterprise became a vast state monopoly that involved several hundred thousand labourers, officials, and merchants, and made Golkondā the world's most important diamond market in the 11th/17th century.

A distinctive aspect of the dynasty was its composite culture that combined Islamic and Indian styles, as reflected in the nature of its rule, in the flourishing of Telegu, Persian, and Dakhnī literature, and in painting and architecture. Having lived seven years in exile in Vijayanagar, where he learned Telugu and acquired a Hindu wife, Ibrāhīm Ḳuṭb Shāh set the tone of this syncretic culture. He adopted not only the usual symbols of Muslim sovereignty (*sikka*, *khuṭba*, etc.), but also the style of a traditional Hindu rajah, reserving tax-free lands for the support of Brahmins and temples, erecting pillars on which the sworn loyalty of *nāyaks* was inscribed, patronising Telugu poets, and reviving the ancient Telugu monarchical tradition of building large irrigation works. Moreover, extensive contact between Hindus and Muslims in the Deccan gave rise to a new language, Dakhnī, which achieved its first literary expression in Golkondā in the 10th/16th century, with Sulṭān Muḥammad-Ḳulī himself being one of the foremost writers in the language. A blending of Hindu and Muslim styles is similarly reflected in contemporary painting and architecture, especially the architecture of Ḥaydarābād. Planned in 999/1690-1 by Muḥammad-Ḳulī Ḳuṭb Shāh as a suburb of Golkondā fort, the city of Ḥaydarābād [*q.v.*], with its gardens, bazaars, palaces, and such architectural masterpieces as the Čārminār, has indeed remained the dynasty's most lasting legacy.

KŪTHĀ, a very old town of ʿIrāḳ, on one of the canals joining the Euphrates and Tigris and one stage from Baghdād on the Kūfa road. The town as well as the canal are often mentioned in cuneiform inscriptions (cf. the references in Meissner, *Babylonien und Assyrien*, 1920-5, Indices, s.v. Kutû and the map by Schwenzner in vol. i). The town is said to be identical with the place mentioned in 2 Kings, xvii, 24, from which came a part of the people whom the king of Assyria settled in Samaria in place of the deported Israelites. The course of the canal, at least for its western part, coincided with that of the modern Ḥabl Ibrāhīm; on modern maps, this last ends in the Shaṭṭ al-Nōl; the Arab geographers make no reference to this, but make this canal flow direct into the Tigris (cf. Le Strange, *The lands of the Eastern Caliphate*, Map II facing p. 25).

The Arab geographers distinguish two places called Kūthā Rabbā and Kūthā al-Ṭarīḳ, but only give further information about the former. (The distances from other places are collected in Streck, *Die alte Landschaft Babylonien*, 11.) The geographers also mention the bridge of boats over the canal at Kūthā, which gave it the further name of Djisr Kūthā, and the Abraham legends, which are associated with the town; al-Muḳaddasī (*BGA*, iii², 121) actually calls the town Madīnat Ibrāhīm, and to this day the ruins of the town are erroneously located in the Tell Ibrāhīm which lies approximately on the site of the ancient Kūthā. Abraham is said to have been born at Kūthā, and the name of the town comes from that of his maternal great-grandfather. When his mother (her name is very variously given: Yāḳūt writes Būnā bint Karnabā b. Kūthā; the Talmud, *Bābdā bathrā*, 91ᵃ. אמלתאיבת כרנבו; for other names, see Eisenberg, *EI*¹ art. IBRĀHĪM and *The life of the prophets according to Arabic legend*. ii. *The life of Abraham* [in Hebrew, 1912], 9 n.) was about to give

him birth, she had to take refuge from Nimrod in a cave outside the town. Later, Nimrod threw her into a fiery furnace; therefore, in the time of the Arab geographers, many heaps of ashes were still pointed out which came from this fire.

Kūt͟hā is also the name of the *ṭassūdj* around the town, which comes within the district of Arda͟shīr Pāpakān and is in turn divided into 10 *rustāḳs*. According to al-Masʿūdī (*Tanbīh*, *BGA*, viii, 79), Ūr Ka͟shd (the Biblical Ūr Kasdīm) from which Abraham migrated is a place *min bilād Kūt͟hā*. The *nisba* from *Kūt͟hā* is *Kūt͟hī* or *Kūt͟hānī*.

Besides Kūt͟hā in Mesopotamia, Yāḳūt and al-Bakrī also mention a place of pilgrimage of this name in Mecca.

KUT͟HAM B. AL-ʿ**ABBĀS** B. ʿABD AL-MUṬṬALIB AL-HĀS͟HIMĪ, Companion of the Prophet, son of the Prophet's uncle and of Umm al-Faḍl Lubāba al-Hilāliyya, herself Muḥammad's sister-in-law. Although the *Sīra* brings him into contact with Muḥammad by making him one of the inner circle of the Hās͟himī family who washed the Prophet's corpse and descended into his grave, and although his physical resemblance to the Prophet is also stressed, he was obviously a late convert to Islam, doubtless following his father al-ʿAbbās [*q.v.*] in this after the conquest of Mecca.

Nothing is heard of him during the reigns of the first three Orthodox Caliphs, but then ʿAlī on his accession made Ḳut͟ham governor of Medina (36/656), and in the next year, when menaced by his rivals for the caliphate, Ṭalḥa, al-Zubayr and ʿĀʾis͟ha, he made him governor of Mecca and al-Ṭāʾif. He seems to have retained this office all through his cousin's caliphate, leading the Pilgrimage in 38/659 (cf. Ibn His͟hām, iii, 1018, 1020, tr. Guillaume, 687-8; Ibn Saʿd, ii/2, 70, iv/1, 2, 22, vii/2, 100; Balād͟hurī, *Ansāb*, i, ed. Hamidullah 447, 569, 577-8; Ṭabarī, i, 1830, 1833, 3092, 3106, 3390, 3343; Muḥammad b. Ḥabīb, *al-Muḥabbar*, 17, 46; Ibn K͟hallikān, ed. Iḥsān ʿAbbās, vi, 351; etc.).

After this comparatively undistinguished career, Ḳut͟ham achieved fame through the manner of his ostensible death. He was with the army of K͟hurāsān under Saʿīd b. ʿUt͟hmān b. ʿAffān when the latter invaded Transoxania in 56/676 (cf. Gibb, *The Arab conquests in Central Asia*, 19-20), and was allegedly killed (thus in Muḥammad b. Ḥabīb, 107, and Zubayrī, *Nasab Ḳurays͟h*, 27) or died a natural death (thus in Balād͟hurī, *Futūḥ*, 412) at the siege of Samarḳand in 57/677. Ṭabarī makes no mention of Ḳut͟ham's death in his account of this campaign, and Yaʿḳūbī, *Buldān*, 298, tr. Wiet, 119, and Nars͟hak͟hī, *Taʾrīk͟h-i Buk͟hārā*, tr. Frye, 40, state that he in fact died at Marw.

Whatever the truth of the matter, the supposed tomb of Ḳut͟ham at Samarḳand subsequently became a shrine and pilgrimage place; Barthold plausibly surmised that this cult was probably built up by his family, the ʿAbbāsids, when they came to power. It is, however, equally possible that some existing pre-Islamic cult of Sog͟hdia was islamicised and transformed into the cult of Ḳut͟ham. In the inscriptions of the later buildings making up the shrine complex of Afrāsiyāb, the citadel area of Samarḳand and the heart of the pre-Mongol invasion city [see SAMARḲAND], Ḳut͟ham is generally referred to as the *S͟hāh-i zinda* "living prince" or *S͟hāh-i djawānān* "prince of the youths", and I. I. Rempel has suggested that Ḳut͟ham is a syncretistic figure incorporating elements of the Islamic prophet K͟hiḍr [see AL-K͟HAḌIR] and of Siyāwus͟h and other ancient Iranian heroes (in G. A. Pugačenkova, ed., *Iz istorii velikogo goroda*, Tashkent 1972, 36-52).

The shrine flourished greatly and was added to in Ḳarak͟hānid and Saldjūḳ times, so that a whole complex was formed there, and during Sandjar's sultanate, probably in the 520s/1130s, a *Madrasa Ḳut͟hamiyya* was founded. When Ibn Baṭṭūṭa visited Samarḳand two centuries later, in the reign of the Čag͟hatayid ʿAlāʾ al-Dīn Tarmas͟hīrīn (726-34/1326-34), he found the shrine opulently appointed and much visited by the local people of Samarḳand plus the Tatārs of the region. It had a *zāwiya* [*q.v.*] or hospice attached to it for pilgrims and travellers, and a scion of the ʿAbbāsids, the *amīr* G͟hiyāt͟h al-Dīn Muḥammad b. ʿAbd al-Ḳādir, great-great-grandson of the penultimate Bag͟hdād caliph al-Mustanṣir (623-40/1226-42), who had migrated from ʿIrāḳ to Transoxania, acted as *nāẓir* or superintendent of the shrine (*Riḥla*, iii, 52-4, tr. Gibb, iii, 568-9). The shrine continued to attract royal patronage, including from the Tīmūrids; a mausoleum, possibly to be ascribed to Ḳutlug͟h Āḳā, one of Tīmūr's wives, was built in 762/1361, and in the next century, Ulug͟h Beg [*q.v.*] added to it. Alterations were, indeed, made to it up to the early 19th century.

Rogers and ʿĀdil Yāsīn, in *Iran, Jnal. of the Brit. Inst. of Persian Studies*, xv (1977), 125-47. (C. E. BOSWORTH)

KUT͟HAYYIR B. ʿ**ABD** AL-**RAḤMĀN** (better known as KUT͟HAYYIR ʿAZZA and often called al-Mulaḥī after Mulayḥ, a sub-tribe of K͟huzāʿa, or Ibn Abī Djumʿa, after his maternal grandfather), a poet of the ʿUd͟hrī school of the Umayyad period. Like other poets of the same school, his life was a favourite field for the imagination of story-tellers who wrote entertaining *asmār* literature. In such cases, legend plays such havoc with history that it becomes almost impossible for later critical studies to separate one from the other. Legends were introduced to suggest pseudo-historical occasions for some poems, and some poetry was made to suit stereotypes of the ideal lover. Other factors, both political and sectarian, made it easy for the *ruwāt* to shroud Kut͟hayyir's character with ever thicker layers of legendary material. Nowhere else does authentic poetry stand in sharp contrast to the alleged character of its writer as it does in the case of Kut͟hayyir. When stripped of such accretions, the biography of such a poet becomes a mere skeleton.

Kut͟hayyir's parents were both from K͟huzāʿa, and lived in Medina or in the adjacent hills to the east. If we believe al-Marzubānī, who states that the poet lived 80 or 81 years (*Muʿdjam*, Cairo 1960, 242), then he must have been born *ca.* 23 or 24/643 or 644 (since

there is no doubt that he died in 105/723). This date of birth seems very early if we consider that there are no traces of his poetical activities before 60/679, a fact which makes one think that he could not have been born earlier than 40/660. Although Kuthayyir's father died when he was still in need of a guardian, he is nevertheless accused of being an undutiful son (this is more likely a reflection of much later sectarian prejudice). When his father was afflicted with a sore in one of his fingers, Kuthayyir considered that as a heavenly punishment for the father, who used to raise that same finger whenever he swore falsely. The pious interpretation here is ignored, and the sharp comment is taken as indicating an unfilial attitude. Kuthayyir's uncle became a watchful guardian who, to keep the boy away from the vices of urban life, sent him to tend a herd of camels in the outskirts. At that stage, so the legend says, a brass figure trudging heavily appeared to him and ordered him to begin to recite poetry. Thus his inspiring *djinni* disclosed himself to him at an early age. Yet it was not this *djinnī*, but the author of the legend, who reduced the camels to sheep and took Kuthayyir to al-Djār on the Red Sea coast where, on his way, he met a group of women, from among whom a young girl approached him in order to buy a sheep. The lad, who in his manhood became known for his proverbial stinginess (Djāḥiẓ, *al-Bukhalā'*, Cairo 1948, 165), gave her a sheep and refused to accept payment. This girl was inevitably ʿAzza, the daughter of Ḥumayl from the Dhamra tribe, who entangled Kuthayyir with her beauty. According to later evidence from a woman who knew ʿAzza, ʿAzza is described as a "sweet", pretty, clean and pale-skinned woman, whose conversation was most enchanting. ʿAzza's family must have previously given her as a wife to a first suitor because, shortly after that heady meeting, Kuthayyir's poetry became very embarassing to them. That same husband is referred to in his poetry as a jealous, impotent old man (*hawkal*), who used his authority over his wife to make her scold her lover and abuse him. It is also probable that the migration of ʿAzza and her husband to Egypt (*ca.* 67/686) was not only due to a drought that broke out in the Ḥidjāz, but also represented the husband's wish to avoid embarassment. Nevertheless, Kuthayyir, who cared but little about the feelings of his rival, found in travelling to Egypt a good opportunity to see both ʿAzza and his friend ʿAbd al-ʿAzīz b. Marwān, governor of Egypt. Through the latter, the poet's attachment to the Umayyad caliphs and *amīrs* was strongly established, an attachment which endured until his death.

Yet at a date previous to these travels, Kuthayyir is said to have met a man called Khandaḳ who attracted him to the Kaysānī beliefs. In its early stage, the Kaysāniyya sect [*q.v.*] must have been compatible with the belief in the right of ʿAlī's son, Muḥammad b. al-Ḥanafiyya, to the imāmate, as successor to his half-brother, Ḥusayn. The poet's relation with Ibn al-Ḥanafiyya is a historical fact, to which Kuthayyir's own poetry attests. Ibn al-Ḥanafiyya was imprisoned by the rebel and anti-caliph ʿAbd Allāh b. al-Zubayr, and that imprisonment was strongly resented by the poet (*Dīwān*, Beirut 1971, 224). As for the other Kaysānī beliefs, such as those of the occultation of Ibn al-Ḥanafiyya in the mountain of Raḍwā, near Medīna and his final return (*radjʿa*), or the transmigration of souls, nothing is explicitly or implicitly expressed about them in Kuthayyir's poetry. Even his two surviving elegies for his friend Khandaḳ are completely silent about any doctrines or beliefs. Yet the poet was later identified with the extremist Kaysānī poet, al-Sayyid al-Ḥimyarī (d. 173/789), and some of the latter's poems were ascribed to him. The *riwāyas* about his Kaysānī beliefs hardly conform with the accepted Kaysānī doctrines. Ludicrously enough, instead of believing in the return of his *imām*, Kuthayyir, according to these *riwāyas*, believed in his own *radjʿa*. In examining similar traditions, one can discover not only contradictions but also a humorous strain which was intended to mock Kuthayyir's own character. Kuthayyir's attachment to the Kaysāniyya must have been a short, emotional interlude, to which he was driven by his friendship with Khandaḳ and his pity for Ibn al-Ḥanafiyya's imprisonment. When the latter acknowledged the caliphate of ʿAbd al-Malik in 69/688, the poet felt no ambivalence in his allegiance and became an Umayyad partisan till the end.

Some traits in Kuthayyir's character made it easy to ascribe rather ridiculous beliefs or modes of behaviour to him. He was a very short, ugly, red-faced, long-necked, huge-headed and very slender man, who adopted a haughty and conceited manner to mask his limitations. His naiveté and lack of urban sophistication are easily detected in his poetry. In one of his poems he bridles at ʿAzza's humorous comment that he has become pale and rough in manner of late, and accuses her of ridiculing him only to please her husband (*Dīwān*, 379). Yet he explicitly acknowledges, in the same poem, that he had really become a shadow of a man, "like the remnants of a rope", totally bony but, in spite of all that, naturally handsome, without adornment, "like a Byzantine *dīnār*". Madness, which must be taken to mean no more than eccentricity, becomes an easy accusation. But no mad person, in reality, could have enjoyed the durable favour and esteem which the poet gained from his Umayyad patrons, or could have become so well-loved that nearly all the men and women of Medina would throng his funeral in order to bid him a final farewell. Kuthayyir was also accused of being insincere in his love. Considered as a ʿUdhrī lover, this accusation might be true; at a certain time, he was temporarily attracted to another woman called Ẓallāma, whose "magical tie" was easily broken by ʿAzza. Other tales about his unfaithfulness in love are mere elaborations on the same theme by *asmār* writers. His poetry, in a way, gives credence to such an accusation because it shows a sober restraint which falls short of a passionate abandonment to love. Love, in Kuthayyir's poems, is conceived in the terms of friendship. Let it be also remembered that he, unlike other ʿUdhrī-love poets, like al-Madjnūn or even his tutor Djamīl, did not restrict himself to love-poetry. Not only his eulogies, but also his harsh satirical poems against his beloved's tribe, testify that love, in his heart, was rivalled by other strong emotions. His elegies on his friends, Khandaḳ and ʿAbd al-ʿAzīz, are not less in warmth than his love poems. His eulogies, though not so warm, are lengthy and symmetrical. In them, the poet's hard Bedouin life or the pangs of his forlorn love, are sharply contrasted with the luxurious life of the patron (*mamdūḥ*), and this latter is also drawn in contrast to the hardships which the patron faced in an inevitable war. Although the Umayyad *amīr* is an Arab chief who has, sometimes, the eyes of a snake and who seized sovereignty by force, it seems as if the poet resorts to a special set of distinguishing Umayyad attributes in his eulogies. Friendship, rather than financial benefit, is the stronger incentive for such poems This feeling of social equality helped

the poet to preserve much of his dignity. But when such a feeling is exploited in love-poetry, it reduces the sense of sacrifice to a minimum. The lover even, in moments of self-esteem, acquires the awe of the sovereign when he describes how admiring women feel towards him and how he enjoys the sight of entreating "subjects". It is true that this is not always the case, but, being there for once, it can outweigh all his other expressions of total absorption in love.

Kut̲h̲ayyir was a prolific poet. During his long life, he appears never to have stopped writing poetry except for a certain period, after the death of ʿAzza and ʿAbd al-ʿAzīz (86-99/705-17); the poet's use of a simple and direct style of composition helped that profuseness. When writing on love or praise, or combining both themes in one poem, his vivid descriptions of the scenes from the Ḥid̲j̲āz or those on the route to Egypt or Syria add much to the length of his poem. It is said that, of *lāmiyyāt*, he wrote 30 of considerable length. However, all that has survived of that poetry, scattered through the available sources, does not exceed 2,000 lines.

(IḤSĀN ʿABBĀS)

ḲUTLUG̲H̲-K̲H̲ĀNIDS. 1. a dynasty in Kirmān [*q.v.*] in the 7th/13th century, descended from the Kara-K̲h̲itay [*q.v.*] of Transoxania. The dynasty, successively vassals of the K̲h̲ʷārazm-S̲h̲āh, the Mongol Great K̲h̲āns and the dynasty of Hūlāgū K̲h̲ān (Īlk̲h̲āns), lasted from 619/1222 or 620/1223 to 706/1305-6, but never had more than local importance. It entertained close relations with the neighbouring dynasties of the Atābegs of Yazd, the Salg̲h̲urids of Fārs and the Muẓaffarids [*q.v.*] and came into occasional contact with the caliph and with India. The founder of the dynasty (from 619 or 620) was Naṣr al-Dunyā wa 'l-Dīn Abu 'l-Fawāris Ḳutlug̲h̲ Sulṭān Burāḳ-Ḥād̲j̲ib [*q.v.*], son of Kuldūz (?), d. 632/1235. His title Ḳutlug̲h̲ Sulṭān was given him by the caliph, although his conversion to Islam was of a very recent date. He had a son Rukn al-Dīn K̲h̲ād̲j̲ad̲j̲ūḳ (or Mubārak K̲h̲ʷād̲j̲a) and four daughters, of whom Sawind̲j̲ Turkān was married to Čag̲h̲atay K̲h̲ān, K̲h̲ān Turkān to her cousin Ḳuṭb al-Dīn and the two others to members of the family of the Atābegs of Yazd.

Burāḳ appointed as his successor his nephew and son-in-law Ḳuṭb al-Dīn Abu 'l-Fatḥ Muḥammad K̲h̲ān, whose father K̲h̲amītūn Tāyangū b. Kuldūz (variants: K̲h̲amītbūr, K̲h̲antimūr, Tānīkū) is perhaps identical with the Ḳara-K̲h̲itay chief captured by the K̲h̲ʷārazmians in 607/1210; cf. Barthold, *Turkestan*, 364. Ḳuṭb al-Dīn at the end of a year had to retire into Mongolia on the approach of Rukn al-Dīn, son of Burāḳ and Ukā-K̲h̲ātūn, who after spending some time at the Mongol court received from Ögedey investiture for the fiefs of Kirmān and Narmas̲h̲īr. He ruled for 16 years. He was not well disposed to the Tād̲j̲īks and men of letters, according to the *Simṭ al-ʿulāʾ*.

In 650/1252 he had in turn to make way for Ḳuṭb al-Dīn, who had in the interval been serving in China under Maḥmūd Yalawač and upon whom Möngke after his accession conferred the *yarlīḳ* over Kirmān. Ḳuṭb al-Dīn was authorised by the Ḳāʾān to put Rukn al-Dīn to death as he was suspected of intriguing with the caliph. He soon suppressed a rising by a pretender who claimed to be the K̲h̲ʷārazm-S̲h̲āh D̲j̲alāl al-Dīn. He severely punished the Kūč and Balūč [see BALŪČISTĀN and KUFṢ]. His successes were attributed to the advice of his wife, Ḳutlug̲h̲ Turkān K̲h̲ātūn, whose wisdom is highly praised by the historians. Some doubts exist as to her origin; according to the *Taʾrīk̲h̲-i guzīda* she had been the concubine (*surriyya*) of Burāḳ (according to the *Ḥabīb al-siyar*, that of G̲h̲iyāt̲h̲ al-Dīn, brother of the K̲h̲ʷārazm-S̲h̲āh D̲j̲alāl al-Dīn) and would thus be a different person from K̲h̲ān Turkān, daughter of Barāḳ; this fact might explain her feud with the sons of Ḳuṭb al-Dīn.

Ḳuṭb al-Dīn died in 655/1257. His son Ḥad̲j̲d̲j̲ād̲j̲ being a minor, the notables asked the Ḳāʾān to entrust the government to the widow of Ḳuṭb al-Dīn ʿIṣmat al-dunyā wa 'l-Dīn Ḳutlūg̲h̲ Turkān who ruled 655-81/1257-82 (in 662/1264 her powers were confirmed by Hūlāgū; cf. Ras̲h̲īd al-Dīn, ed. Quatremère, 403).

Ḥad̲j̲d̲j̲ād̲j̲ when he grew up sought to get into touch with the sons of Ögedey and acted with little regard for Ḳutlug̲h̲ Turkān, but the latter, strong in the support of her daughter Pāds̲h̲āh-K̲h̲ātūn, married to Abaḳa-K̲h̲ān, forced Ḥad̲j̲d̲j̲ād̲j̲ to retire to Dihlī in 666/1267-8. Then the other son of Ḳuṭb al-Dīn, Suyurg̲h̲atmīs̲h̲, successfully disputed Turkān's power and she went to Tabrīz, where she died in 681/1282-3. Her daughter Bībī K̲h̲ātūn, who had married the *amīr* ʿAḍud al-Dīn Ḥād̲j̲d̲j̲ī, removed her remains to Kirmān. Marco Polo went through Kirmān (*ca.* 1272) in the reign of Ḳutlug̲h̲ Turkān.

D̲j̲alāl al-Dīn Abū Muẓaffar Suyurg̲h̲atmīs̲h̲ (681-93/1282-94) received his investiture from the Īl-K̲h̲ān Aḥmad, but could not agree with his sister Pāds̲h̲āh-K̲h̲ātūn. She had been brought up among her brothers under the name of Ḥasan S̲h̲āh (cf. MIRK̲H̲ʷĀND) to enable her to escape compulsory marriage with a Mongol prince. She became, however, the wife first of Abaḳā and after his death, of his son Gayk̲h̲ātū. The latter on coming to the throne in 690/1291 gave Kirmān to Pāds̲h̲āh-K̲h̲ātūn. The princess, who was a poetess of talent, was of a vindictive and passionate nature. At first, Suyurg̲h̲atmīs̲h̲ governed the province in the name of the Pāds̲h̲āh, but she later threw him into prison. He was freed by his wife K̲h̲udāwand-zāda Kardud̲j̲īn, daughter of Mengü Tīmūr b. Hūlāgū and the Salg̲h̲urid [*q.v.*] princess Abis̲h̲, ruler of Fārs, and by his daughter S̲h̲āh ʿAlam. Gayk̲h̲ātū, however, handed him over to Pāds̲h̲āh-K̲h̲ātūn, who had him strangled. His death was followed by the execution of his vizier, who was captured by stratagem. In 694/1295 Baydū,

husband of ʿĀlam Khātūn, became king, and Pādshāh was handed over the vengeance of the wife and daughter of Suyurghatmish. In the reign of Pādshāh Marco Polo (ed. Yule-Cordier, 23, 91) passed through Kirmān on his return journey (*ca.* 1293).

In 695/1296 Muẓaffar al-Dīn Abu 'l-Ḥārith Muḥammad Shāh Sulṭān b. Ḥadjdjādj succeeded his aunt by command of Ghāzān Khān, but his brother slew his vizier and rebelled in Kirmān. The troops of Fārs and ʿIrāḳ besieged Kirmān for 18 months. Muẓaffar al-Dīn came from Tabrīz, forced the town to surrender and executed the ringleaders. His methods must have been summary, for his new vizier left him in terror. Muẓaffar al-Dīn, who loved wine, died in 703/1303-4 as a result of his excesses.

His nephew Sulṭān Ḳuṭb al-Dīn II Shāh Djahān b. Suyurghatmish succeeded him and ruled for two years and a half (until 706/1306-7). As he was very cruel and did not pay his dues regularly to the Mongol treasury, Öldjeytü deposed him and appointed a simple governor to Kirmān, Nāṣir al-Dīn Muḥammad b. Burhān. Ḳuṭb al-Dīn II retired to Shīrāz to Kardudjīn, wife of his father. His daughter Ḳutlugh Khān (*wālidat al-salāṭīn*) in 729/1328-9 became the wife of Mubāriz al-Dīn Muḥammad, the real founder of the Muẓaffarid dynasty, who later took possession of Kirmān (in 741/1340-1).

Before the earthquake of 1896 there still existed in Kirmān the *Ḳubba-yi sabz* (remains of the *madrasa* of Turkānābād) bearing the date 640/1121-3 (i.e. contemporary with Rukn al-Dīn). This "green mausoleum" was the family tomb for the dynasty (cf. P. M. Sykes, *Ten thousand miles in Persia*, London 1902, 60-2, 194, 264). Turkān Khātūn founded the little towns of Sar-āsiyāb and Čatrūd, to which she brought a water supply. Suyurghatmish built the *madrasa* of Darb-i Naw, where he was buried.

Bibliography: The special history of the Ḳutlugh-Khānids is the *Simṭ al-ʿulā' li 'l-ḥaḍrat al-ʿulyā*, written in 716/1316-17, cf. Storey, i, 358, 1297. The author Nāṣir al-Dīn was the son of Khwādja Muntadjab al-Dīn Yazdī, the trusted adviser of Ḳuṭb al-Dīn (cf. the Paris ms., B. N. Persian No. 1377, f., 125). On Burāḳ, Rukn al-Dīn and Ḳuṭb al-Dīn, cf. Djuwaynī, ed. Ḳazwīnī, ii, 211-18, tr. Boyle, ii, 476-82. On the whole dynasty: *Ta'rīkh-i guzida*, ed. Browne, 527-35, 625; Mīrkhwānd, *Rawḍat al-ṣafā'*, Bombay 1266, iv, 128-31; cf. E. A. Strandman, *Chuandamir's afhandling om Qarachitaiska i Kirman*, Helsingfors 1869; Khwāndamīr *Ḥabīb al-siyar*, Bombay, ii/3, 10-12; Münedjdjim-bashī, Turkish tr., Istanbul 1285, iii, 587; Rieu also quotes Waṣṣāf, iii (to the year 694) and the *Geography* of Ḥāfiẓ-i Abrū, part ii, which seems to contain full references. Cf. also d'Ohsson, *Hist. des Mongols*, iii, 5, 19, 32, 131-3, 396; iv, 90-3, 269, 485; Zambaur, *Manuel*, 237; Boyle, in *Camb. hist. of Iran*, v, 323.

2. The title Ḳutlugh-Khān was conferred in 629/1231 by Ögedey on Abū Bakr b. Saʿd, the Salghurid [*q.v.*], cf. d'Ohsson, iii, 398.

(V. MINORSKY)

ḲUTLUGH-SHĀH NOYAN, a notable Mongol *amīr* in Īlkhānid Persia, especially during the reigns of Ghāzān Khān and Öldjeytü (694-716/1295-1316). He was a member of the Manqut tribe, and a descendant of Čingiz Khān's general Djedey Noyan.

After the accession of Ghāzān, Ḳutlugh-Shāh led the pursuit of the *amīr* Nawrūz, besieged Harāt, where Nawrūz had taken refuge, and captured and executed him in 696/1297. He was also charged with the execution of the fallen *wazīr* Ṣadr al-Dīn. In 698/1299 he was sent by Ghāzān to Rum to suppress the revolt of prince Sūlāmish. In 699/1299 he accompanied Ghāzān's invasion of Syria, and was subsequently appointed by him *shaḥna* of Damascus. He commanded the right wing of the Īlkhānid army when the Mamlūk forces were defeated at Ḥimṣ. During the Syrian campaign of 703/1303, Ḳutlugh-Shāh was less successful; he was defeated by the Mamlūks at Mardj al-Ṣuffar. He among others was held responsible by Ghāzān, and together with his fellow-general Čūbān he was sentenced to be beaten with rods at the judicial enquiry (*yārghū*) which followed his precipitate return to Persia. Any eclipse that Ḳutlugh-Shāh may have suffered as a result of this defeat was only temporary, however. On his accession in 704/1304, the Īlkhān Öldjeytü appointed him commander-in-chief. But in 707/1307 Öldjeytü's armies invaded Gīlān, and during the campaign Ḳutlugh-Shāh was defeated and killed. His death cleared the way for the later ascendancy of Čūbān in the Īlkhānid state.

Ḳutlugh-Shāh's eminence among the *amīrs* of his time is amply attested in anecdotes concerning him. Ḳāshānī records that during a dispute at court between Ḥanafīs and Shāfiʿīs during the reign of Öldjeytu, Ḳutlugh-Shāh urged in his exasperation that the Mongols should abandon Islam—of whose tenets he is represented as having a very curious conception—and return to the *yāsāḳ* and *yūsūn* of Čingiz Khān (*Ta'rīkh-i Uldjāytū*, ed. M. Hambly, Tehran 1969, 98 = Aya Sofya MS 3019, f. 178a). On the other hand, in Ibn Bazzāz's *Ṣafwat al-ṣafā*, a near-contemporary life of Shaykh Ṣafī al-Dīn of Ardabīl, he is shown as a devotee of Ṣūfī *shaykhs*, and there is an entertaining account of how in a contest of piety and abstinence, Ḳutlugh-Shāh's favoured *shaykh* was beaten by Ghāzān Khān's candidate, Shaykh Zāhid Gīlānī (ed. Aḥmad b. Karīm Tabrīzī, lith. Bombay 1911, 38-9 = Aya Sofya MS 3099, f. 28b).

(D. O. MORGAN)

ḲUṬN, ḲUṬUN (A.), cotton.

1. In the mediaeval Arab and Persian lands.

In the period of the Arab conquests cotton had already been propagated from India to eastern Persia and the neighbouring lands. It was cultivated everywhere and a flourishing industry produced cotton goods there. The Arab geographers, in describing the economy of these lands in the ʿAbbāsid period, speak especially of the production of cotton goods, but there is good reason to suppose that these factories used the cotton planted in their own regions.

In modern Afghānistān, Kābul and Herāt had cotton factories which were known for the excellent quality of their products. Kābul exported cotton goods as far as China. Marw and Nīshāpūr were the most important centres of the cotton industry in Khurāsān. The province of Marw also exported large quantities of raw cotton, much appreciated for its softness. The cotton materials produced at Marw, especially *mulḥam*, a cotton and silk fabric, were so renowned that, according to al-Thaʿālibī, in all countries fine materials originating from Khurāsān were called *shāhidjānī* (after the name of Marw).

The industry of Nīshāpūr was known for the material called *haffī*. The cotton goods of these two towns passed in the caliphal empire, according to an observation of al-Djāḥiẓ cited by al-Thaʿālibī, as the best in the world. Transoxania also produced large quantities of cotton. From the province of Shāsh it was exported into the Turkish lands. Samarḳand, the small town of Wadhār not far from it, Bukhārā and Ṭawāwīs were the most important centres of the cotton industry there, whilst Bukhārā was renowned for its heavy cotton goods, whose firm fabric was praised. The cotton plantations had even been introduced into cold lands such as Khwārazm. Factories for cotton goods were also developed there, whose products, such as those called *arandj* and *amīrī*, enjoyed a great reputation.

Djibāl itself produced cotton and had factories which worked it, although on a smaller scale than those of Khurāsān. The Arab geographers of the 4th/10th century relate that the cotton of the province of Rayy was exported as far as ʿIrāḳ and Ādharbāydjān. Speaking of irrigation by means of subterranean canals in the province of Iṣfahān, Ibn Ḥawḳal remarks that it served for the cultivation of cotton. In Kirmān, there was a flourishing cotton industry at Bamm which doubtless used the raw material produced in the province. As for the province of Fārs, there is no room for doubt about its presence there, for Ibn Ḥawḳal points out to us the rate of tax levied on the cotton plantations in the district of Shīrāz. Yazd and Abarḳūya themselves had factories which certainly worked the cotton cultivated in their provinces. However, in this part of Persia, the cultivation of flax and its manufacture prevailed over that of cotton.

At the end of the 3rd/9th century and beginning of the 4th/10th century, there were already cotton plantations in Upper Mesopotamia, Syria and Palestine, but in these lands they constituted a new sector of agriculture. Al-Iṣṭakhrī, writing in the first half of the 4th/10th century, relates that in most of the lands of Rās al-ʿAyn, in Upper Mesopotamia, cotton was cultivated, and Ibn Ḥawḳal speaks of the cotton plantations and cotton goods production in the town of ʿArabān, in the same province. Al-Muḳaddasī, for his part, mentions cotton plantations in the district of Ḥarrān. Later on, Yāḳūt mentions cotton goods' production at Ḥazza, a small town near Rās al-ʿAyn. In the 4th/10th century much cotton was also planted in the province of Aleppo and in Palestine, in the region of the Ḥūla and in the Djawlān, near Bāniyās. To judge by the description of Palestine by al-Muḳaddasī, it was also cultivated near Jerusalem. A passage in the description of Upper Mesopotamia by Ibn Ḥawḳal reveals that the cotton plantations increased considerably in the 4th/10th century in this land, when the new lords, who had replaced the caliphal régime, established large estates and introduced the cultivation of industrial plants such as cotton. Ibn Ḥawḳal speaks of the Ḥamdānids, but there is reason to suppose that other dynasties were also involved. Whatever may be the case, the cultivation of cotton as yet only played a modest role in this period within the total agricultural production of these lands. Indeed, Ibn Ḥawḳal specifies that cotton goods were imported from Upper Mesopotamia into Syria.

In Egypt, the cultivation of cotton constituted, in this period and also later, under the domination of the Fāṭimids, a still more limited agricultural sector. Several papyri, it is true, testify to the cultivation of cotton in Egypt, in the 2nd-4th/8-10th centuries, and other documents refer to cotton plantations in Egypt under the Fāṭimids. According to al-Idrīsī it was even exported in this period from Egypt to Libya. On the other hand, numerous Judaeo-Arabic documents preserved in the Cairo Geniza from the second half of the 5th/11th and first half of the 6th/12th century show that cotton and cotton goods were imported from Sicily and especially from Syria and Palestine.

The same observation will be made as to the cultivation of cotton in the Maghrib in this period; it was planted almost everywhere but on a relatively small scale. Ibn Ḥawḳal mentions the cotton plantations in the districts of Tunis and M'sila in Algeria. Abū ʿUbayd al-Bakrī mentions too the cotton plantations in the province of M'sila and speaks of them further in his description of Mostaganem in western Algeria. In Morocco, cotton was planted, according to the reports of the Arab geographers, in the districts of Fez, Tādlā, Baṣra and Kurt. In Islamic Spain it was cultivated, in the 4th/10th century, in the province of Seville and also in the district of Guadix, to the east of Granada.

In the period of the Crusades, the cultivation of cotton developed to a great extent in Syria, especially in its northern provinces. Several treaties concluded between Venice and the Ayyubīd princes of Aleppo and Ṣahyūn report the export of cotton from their states. However, the great rise of cotton cultivation in Syria was to begin later, after the fall of the Crusader states. When the farmers lost the great markets provided by the Crusaders' towns, there was a glut of cereals and they went over apparently to the cultivation of cotton. Already in 1304, some Venetian emissaries went to visit the Mamlūk governor of Ṣafad, doubtless to negotiate with him concerning the trade in cotton, the plantations of which had increased considerably in his province. The depopulation following the Black Death and the still further diminished demand for cereals accelerated this development, so that the export of Syrian cotton became an important sector of the Levant trade.

The connection between the reduced demand for cereals and the increase in cotton production emerges clearly from the development of agriculture in Upper Mesopotamia and Armenia. Marco Polo relates, at the end of the 13th century, that the provinces of Mush and Mārdīn produce enormous quantities of cotton which was worked there. Ḥamd Allāh Mustawfī, writing in the first half of the 8th/14th century, also speaks of the cotton plantations in the district of Mārdīn and still others in the districts of Bāzabdā, Barṭallā and Irbil in Upper Mesopotamia and in the environs of Walasdjird in Armenia. The Venetian ambassador Giosafa Barbaro, who travelled across these lands in 1474, also mentions the cultivation of cotton and the cotton goods' factories at Mārdīn as well as plantations in the district of Ḥiṣn Kayfā. The fiscal regulations of Uzun Ḥasan, then lord of this country, refer to the cotton industries of Urfa, ʿArabgīr and Erzindjān, towns today forming part of Turkey. In ʿIrāḳ cotton was cultivated then in the districts of Baghdād, Kūfa and Ḥilla. The accounts of Ḥamd Allāh Mustawfī of the agricultural production of several provinces of Persia are particularly significant in this regard, in so far as they mention cotton plantations in some districts which do not figure as producers of cotton in earlier sources. He speaks of large harvests of cotton in several districts of Ādharbāydjān, Djibāl, Ḳūhistān and Kirmān. There is no doubt that the diminution of the population and consequently of the demand for

cereals after the Mongol conquests led also the farmers of these regions to go over to the cultivation of cotton. Al-Mawṣil and several other towns then became centres of the cotton goods industry and their products were exported to other lands, such as Egypt.

In this latter country, the production of cotton also increased from the middle of the 7th/13th century, although it was still imported from the Sudan. The Irish pilgrim Simeon Simeonis, who in 1323 passed by Fuwwa in the western delta, describes the plantations of cotton which he had seen there and later, at the beginning of the 9th/15th century, Emmanuel Piloti relates that cotton is the most important product of the province of al-Gharbiyya. Arnold von Harff, a German traveller of the end of the 9th/15th century, saw cotton plantations on his way from Ḳaṭya to Ghazza. In the late Middle Ages, Egypt was also able to export cotton to Europe.

Nevertheless, in no other country of the Near East was the role of cotton, in the late Middle Ages, as important as in Syria, nor was the volume of its production as considerable in relation to other crops; Syria exported large quantities of cotton to Europe, where it served as the raw material for the flourishing fustian industries in Lombardy and southern Germany. The great centres of the plantations were the region of Aleppo, the province of Ḥamā and the northern districts of Palestine. In northern Syria cotton was cultivated especially in the districts of Djabala, ʿAzāz and Sarmīn (called Siamo by the Italians, by confusion with al-Shām), and in Palestine in the environs of Acre and in the valley of Jizreel. But cotton was also planted in the province of Tripoli and on the coasts of Lebanon, near Bayrūt, Ṣaydā and Tyre. In the travel books which pilgrims in the Holy Land have left for us, there is mention of cotton plantations near Jaffa and Ramla. In Transjordania cotton was planted in the district of ʿAdjlūn. Accordding to the Merchants' Guide of Pegolotti, the cotton of Ḥamā was considered the best, and this statement is corroborated by numerous price lists of the Venice market. But all varieties of Syrian cotton were more appreciated in Europe than the cotton originating from other countries, such as Turkey, Cyprus, Egypt or Malta. It was appreciated for its longer fibres and for being more flexible. Part of the Syrian cotton fed the cotton goods' industry (especially "bocasin" from the Turkish *būghāsī*) which flourrished at Baʿlabakk, in the villages of the Lebanon, to the east of Tripoli and in the villages near Aleppo. It appears however that this industry only worked up a small part of the cotton produced in the country and that the greatest part of it was in fact destined for export. From the end of the 15th century, the Venetians made the largest purchases, while the Genoese traded especially in the cotton originating from the Balkans or Turkey, where there existed important plantations in the provinces of Konya and Siwas. The Catalans, who, at the end of the 14th century, still bought on a large scale in Syria, were supplied in the 15th century especially in Sicily. Venice sent each year two convoys of cogs to Syria, one in February and the other in August. Numerous documents which have been preserved in the archives of Italy allow us to evaluate the volume of the export of Syrian cotton by the Venetians. It will be concluded that in some periods of good (political and economic) conjuncture, the Venetians exported each year from Syria 8,000 sacks of raw cotton (apart from relatively small quantities of cotton thread) and in others, 5,000. Since a sack contained, on average, 150 kg., the value of these exports may be evaluated at 90-140,000 ducats a year. But when the price of cotton rose, at the beginning of the 15th century, from 24-5 ducats a *ḳinṭār* (of northern Syria) to 30-5 ducats, the Venetian investment rose to 200-250,000 ducats and more. Also, there were some years in which the Venetians bought Syrian cotton for 300,000 ducats.

The registers of fiscal returns made in Palestine in 1525-6 and 1555-6 indicate the large volume of cotton production in Galilee and also in the district of Jaffa after the conquest of the land by the Ottomans. Indeed, Syria still exported cotton to Egypt and other countries until the end of the 18th century. In Egypt cotton was cultivated, at the beginning of the 19th century, near Damanhūr on the western branch of the Nile and in the provinces of Sammanūd and Manṣūra on its eastern branch. But these plantations were not of great extent. Then, in 1818 or 1819, the French engineer Louis Alexis Jumel discovered in Cairo a species of cotton which was distinguished by its long, strong fibres and began to cultivate it with the help of Muḥammad ʿAlī. As the new species fetched a much higher price in Europe than the others, it was cultivated from 1822 on a large scale, principally on the eastern bank of the eastern branch of the Nile. Always under the sponsorship of Muḥammad ʿAlī, experts on cotton cultivation were invited to Egypt and in 1830 a type of agricultural code (*lāʾiḥat zirāʿat al-fallāḥ*) containing detailed instructions for the cultivation of cotton was published. However, the great rise of its cultivation in Egypt only began in the 1860s, when the Civil War in America made the price of Egyptian cotton rise and the plantations were greatly enlarged. It is from this time that cotton has come to occupy a place of the first rank in the agriculture of Egypt.

2. In the Ottoman Empire.

In western Turkish dialects, *pan(m)buḳ, pamuḳ, bamuḳ* or *mamuḳ* (see G. Clauson, *An etymological dictionary of pre-thirteenth century Turkish*) "cotton" is derived from Middle Persian *pambaḳ*, while in eastern dialects cotton is *paḵẖta, baḵẖta*, or *baḳta* (Radloff, *Versuch eines Wörterbuches der Türkdialecte*, iv) and cotton cloth *boḵẖtāy* (Maḥmūd Kās̲h̲gharī, *Divānü Lûgāt-it-Türk*, facs. ed. B. Atalay, 550; in Chinese *po-tie*, see J. R. Hamilton, *Les Ouighours*, Paris 1955, 57-8). In Uyghur, *kebez* designated cotton. The word *bäz* (*bez*) is a common word for coarse cotton cloth in various dialects (also in the forms of *böz, biz*, or *bös*, with a theory of its derivation from the Greek βύσσος, Assyrian *busu*, W. Bang, *Vom Köktürkischen zum Osmanischen*, Berlin 1921, 14 n. 2, now challenged; see G. Doerfer and S. Tezcan, *Wörterbuch des Chaladsch*, Budapest 1980, 91; H. Ecsedy, *Böz, an exotic cloth in the Chinese imperial court*, in *Alt-orientalische Forschungen*, iii, 145-63).

Continuing a long tradition of cotton growing and industry in Central Asia, the Uyghur Turks produced cotton and exported cotton textiles to China, as recorded in the Chinese sources of the 9th century (Hamilton, *op. cit.*, Index, s.v. *po-tie*). Under the Sald̲j̲ūḳs [*q.v.*], cotton production and manufacture had apparently a considerable development in Asia Minor, in which principal towns had cotton bazaars (for instance, *panbah furūs̲h̲ān* in Ḳonya, Aflākī, *Manāḳib*, 618) and caravanserais of cotton textiles (for al-K̲h̲ān al-Bazzāzī in the *Sūḳ al-Bazzāzīn* in Ḳīrs̲h̲ehir, see A. Temir, *Caca oğlu Nūr el-Din*, 23). "Cotton fabrics edged with gold embroidery" of Lād̲h̲iḳ (Laodicaeaon-Lykos, today Denizli) noted by Ibn Baṭṭūṭa in 733/1322 (tr. Gibb, ii, 425) were famous all over Anatolia and referred to as late as the 9th/15th century (see ʿĀs̲h̲īḳ-Pas̲h̲a-zāde, ed. Giese, 52).

Although European markets preferred better-quality northern Syrian types (Ḥamā, Aleppo) and those of Cilicia and Cyprus (in the 1330s, Pegolotti: *cotone*; Heyd, *Histoire du commerce du Levant*, ii, 463), a substantial part of the cotton imported into Europe in the 8th/14th and 9th/15th centuries came from western and southern Anatolian ports—Ayasoluk (Ephesus), Balat (Palatia), Alanya (ʿAlāʾiyya, Candelore), Antalya (Satalia), and Ayas (Lajazzo) (Heyd, ii, 463; H. Wescher, 2335; M. Mazzaoui, ch. 2). Cotton was grown in the immediate hinterlands of these ports. The island of Chios became the main entrepôt of the Anatolian cotton exported by the Genoese in this period. In the mid-15th century, the value of the annual export of cotton via Chios was estimated at 600,000 ducats. Turkish cotton was re-exported by the Genoese to other European countries and even to the Mag̲h̲rib (J. Heers, 393).

Over the course of time, Venice tried to monopolise the import and distribution of imported cotton in the West. Venetian annual cotton trade with Lombardy alone was estimated to be worth 250,000 gold ducats in the 9th/15th century (Wascher, 2337; M. Mazzaoui, *ibid.*). By the end of the 10th/16th century, Venice imported an average 4,000 tons annually from the Levant (8,000 sacks from Cyprus and 6,000 from Izmir). The expanding Swiss and German fustian industries were dependent on the cotton imported from the Levant.

Although first known in Germany in *ca.* 978/1570, cotton from Brazil and the West Indies became a serious competitor only after the mid-18th century. At that time, the cotton industries in France and England began to experience rapid growth. Favvoured by special trade privileges [see imtiyāzāt] granted by the Ottomans, France, England, and the Netherlands were then directly importing cottons from the Levant, and superseded Italy in cotton industries in the 11th/17th century. The war of Cyprus (1570-1) can be taken as a turning point for the Venetian decline.

Cotton-producing areas in the Ottoman Empire before 1215/1800. Ottoman survey books, customs registers, guilds and price regulations, as well as *ḳāḍī* court records, attest to a very active cotton manufacturing industry with export capacity in Anatolia, both in the small towns near main cotton producing areas as well as in the large cities with extensive dye-houses in the 9th/15th and 10th/16th centuries.

Apart from a growing demand by the Europeans and from internal trade, the state's need of cotton products for the navy and army too appears to have become one of the factors contributing to the extension of cotton production and that of certain kinds of cotton fabrics. According to the tax regulations of the 9th/15th and 10th/16th centuries (see Ö. L. Barkan, *Kanunlar*, Index, s.v. *panbuk, penbe*), tithes on cotton produce were collected in the provinces of western Anatolia (K̲h̲udāwendigār, Ḳarasī, Kütahya, Aydīn), of the Aegean Sea and Greece (Triccala, Morea, Euboea, Chios), of southwestern Anatolia (Ḳaramān, Ḥamīd-ili, Ič-il, Adana, Sīs, Özer) and south-eastern Anatolia (Malatya, Behisni, ʿArabgīr, Kemāḵẖ, Ergani, Mārdīn, Urfa, Diyārbakir, and Mawṣil). Northern limits of cotton cultivation on the southern Mediterranean coast reached as far as north as Egirdir lake (X. de Planhol, *De la plaine pamphylienne*, fig. 7). Today, the cotton cultivation is concentrated in the valleys of Gediz and the two Menderes rivers, and in the Čukurova (Cilicia), and to a lesser degree, in the Antalya, Hatay, Marʿas̲h̲, and Diyārbakr areas (*Atlas of Turkey*, map no. 75).

The Ottoman survey of the Aydīn province dated 859/1455 (Başvekâlet Arşivi, Istanbul, No 1/1M), which included the Küçük-Menderes and Büyük-Menderes valleys with the Izmir (Smyrna) area, attest to extensive cotton cultivation in the region. In many villages (Adakitlü, Yūsuflu, Bozdeg̲h̲an, Ḥaydara, Orta-Seyid, Čalis̲h̲u, Ḳalu-beglu, Ḳutlīld̲j̲, etc.) cotton production was near or sometimes exceeded wheat production. Ḳalu-beglu, for example, where two Türkmen nomad groups had settled, produced about 8.44 tons of cotton against 5.83 tons of wheat in 858-9/1454-5. These were flooded lands and mostly settled by Türkmen nomads by the mid-15th century. Obviously, cotton production in this area was oriented to supplying distant markets as well as to supplying towns and cities exporting cotton goods in the region. In the interior, the Beypazarī-Miḵẖaličcīḳ area in the Saḳarya-Kirmir valley, a number of villages (Čeltük, Ḳaraköy, Sürmeli, Ḳayalar, Sobran, Ḳīzīld̲j̲a-vīrān, Bas̲h̲-vīrān, Yarīmd̲j̲a-Avs̲h̲ar, Čay, etc.) showed a different structure with a much more limited production of cotton compared to other crops—wheat, barley, and rice (see the *taḥrīr* and *waḳf* registers of K̲h̲udāwendigār province, ed. Ö.L. Barkan). Apparently, this area supplied cotton to the nearby towns as well as to Ankara, the important centre of loom industries in this region. The area of Toḳāt, another important centre of cotton industry, displays a similar situation. Here,Venk, Ḳaraḥiṣār, Niksar, Felis,

Katar, and Ķaraķush in particular, cotton cultivation constituted only a small percentage of the overall agricultural production (H. İslamoğlu, *Dynamics of agricultural production*, ch. 2) The general trend, however, showed an increase in cotton production, over ten times in some areas. In no case is there a shift to monoculture in the period before the 13th/19th century.

According to the Ottoman surveys of the 10th/16th century (Soysal, 32), 6,506 hectares or 19% of the cultivated land in the *sandjaķ* of Adana was devoted to cotton, while barley and wheat cultivation took an area four times larger. By the middle of the 12th/18th century, the cotton production of the Čukurova appears to have been quite important. O'Heguerty (200) tells us that in the good harvest years, "cotton of Adana" was exported from Izmir.

Varieties of Indian *gossypium herbaceum*, the so-called *yerli* ("native") cotton, were well suited to the climate and soil conditions, and were known as the only varieties cultivated in Asia Minor until the 13th/19th century. Yielding a coarse fibre, thick, short, and of unequal length and curl, this variety was not considered suitable for fine cotton fabrics. However, in the Ķlrķaghač area in the Baķirčay valley, in the Ḥamīd-ili, Gelibolu (Gallipoli) the Čukurova (Adana, Cilicia), and Toķāt areas, superior varieties were produced for making fine *boghasī* fabrics. It was in the second half of the 13th/19th century that American and Egyptian varieties were introduced and cultivated in Asia Minor and the Balkans. In 1333/1941, however, 90-95% of the cotton production in western Anatolia and the Adana region still came from the *yerli* varieties (W. F. Brück, *Türkische Baumwollwirtschaft*, tr. C. Issawi, *The economic history of Turkey*, Chicago 1980, 242-6; *Türk ziraat tarihi*, 129-35)

At the exhibition of Istanbul of 1279/1863, many qualities of cottons from various parts of the Empire were displayed: 24 varieties from western Anatolia, 4 from Içel (Ič-il), 3 from Adana, 1 from Marʿash, 1 from Mārdīn, 1 from Diyārbakir, 7 from Amasya, 6 from Serez, 4 from Filibe, 3 from Edirne, 3 from Drama, 1 from Trikkala, 1 from Rhodes, 9 from Syria, and 4 from Egypt. Egyptians cottons were considered the best quality, while those of Aydîn, though of short fibre, were preferred for their colour and strength (*Türk ziraat tarihi*, 166). Of the varieties of western Anatolia, that of Subiča and Ķlrķaghač were rated first, with those of Aķhiṣār, Ķaṣaba, Ķlnlk, and Bayîndlr coming next. Ķirķaghač and Aķhiṣār, as well as Gelibolu, were the chief suppliers of the Istanbul cotton industries in the 11th/17th century (*Eṣnāf niẓāmlarî*, in the *Müftülük Arşivi*, Istanbul).

Cotton-producing lands were listed among the best quality lands, and a higher land tax was imposed (Uluçay, doc. 41). Tithe on cotton was, as a rule, one-tenth, while in grain it was one-eighth.

Irrigation works for cotton growing were carried out only on large farms organised and created by the élite (see *Vakıflar dergisi*, ii, 364-5). On big farms, *ortaķdjis*, sharecroppers, were usually employed, and one-third of the crop went to the landowner (at Turgutlu in Ṣarukhān, see Uluçay, doc. no. 33). Such farms of the élite were almost always converted into *awķāf*. On lands under the *tīmār* [*q.v.*] system, cotton was grown by individual peasants using primitive means, and often with no irrigation. Disputes arose when cotton prices were low and the *tīmār*-holder tried to leave the tithe to the peasant and ask instead for cash (examples in Uluçay, docs. 33, 41).

In Ottoman Egypt, cotton was grown on irrigated land in parts of Middle Egypt and the Delta. Egypt, however, had to import cotton from Syria to meet the needs of its cotton industries. By the end of the 12th/18th century, the imports of Syrian cotton reached 2,000-3,000 bales (Raymond, i, 190, 250, 273, 317-18). A special *muķāṭaʿa* [*q.v.*] was established on the cotton trade in the ports of Rosetta and Būlāķ in 1132/1720-1 and 1161/1740 respectively, which provided evidence of the growing importance of cotton in the Egyptian economy. During the same period, the cotton markets at Būlāķ, Damietta, Rosetta, Maḥallat al-Kubrā, Manṣūra and Semenūd, united under one *muķāṭaʿa*, brought 2,195,000 *paras* per year in tax revenues collected on cotton grown in Egypt or imported from Syria. The total amount of this cotton was approximately 24,000 bales (1 bale = 325 *raṭl* or 143,9 kg). The *muķāṭaʿa* figures show an eight-fold increase in the period 1169-82/1755-68, falling to half that amount in the following period 1183-1213/1769-98 (see S. Shaw, *Ottoman Egypt*, Index, s.v. *cotton*; for the following period, see E. R. J. Owen, *Cotton and the Egyptian economy*, Oxford 1969).
